Safe Harbor Statement Under the Private Securities Litigation Reform Act of 1995

Information included in this Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (Securities Act), and Section 21E of the Securities Exchange Act of 1934, as amended (Exchange Act). This information may involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of View Systems, Inc. (the Company), to be materially different from future results, performance or achievements expressed or implied by any forward-looking statements. Forward-looking statements, which involve assumptions and describe future plans, strategies and expectations of the Company, are generally identifiable by use of the words may, will, should, expect, anticipate, estimate, believe, intend, or project or the negative of these words or other variations on these words or comparable terminology. These forward-looking statements are based on assumptions that may be incorrect, and there can be no assurance that these projections included in these forward-looking statements will come to pass. Actual results of the Company could differ materially from those expressed or implied by the forward-looking statements as a result of various factors. Except as required by applicable laws, the Company has no obligation to update publicly any forward-looking statements for any reason, even if new information becomes available or other events occur in the future.

Notes to the Consolidated Financial Statements

March 31, 2009

GENERAL

View Systems, Inc. (the Company) has elected to omit substantially all footnotes to the financial statements for the three months ended March 31, 2009 since there have been no material changes (other than indicated in other footnotes) to the information previously reported by the Company in their Annual Report filed on the Form 10-K for the twelve months ended December 31, 2008.

UNAUDITED INFORMATION

The information furnished herein was taken from the books and records of the Company without audit. However, such information reflects all adjustments which are, in the opinion of Management, necessary to properly reflect the results of the interim period presented. The information presented is not necessarily indicative of the results from operations expected for the full fiscal year.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

EXECUTIVE OVERVIEW

The following analysis of our consolidated financial condition and results of operations for the months ended March 31, 2009 should be read in conjunction with the Consolidated Financial Statements and other information presented elsewhere in this quarterly report.

Overview

Our current product lines are related to visual surveillance, intrusion detection and physical security. We introduced a new product that we call the MINI (Mobile Intelligent Network Informer). We have received multiple inquiries about the need for such a device during 2008 and have invested engineering resources to create a working device that should be market ready in the fourth quarter of 2009. We expect that the production of the device for beta versions and testing purposes will be accomplished in the third quarter of this year.

Our current principal products and services include:

The MINI (Mobile Intelligent Network Informer) The MINI is a wireless watchdog communication device that checks for intrusion into uninhabited areas like foreclosed houses, storage spaces and vacation homes. It is a portable device that senses motion and sends text messages to a user's cell phone. Property and remote assets may be guarded by this innovative device that requires no plug-in electricity, no physical phone line and no monitoring service. We have a full explanation and specifications on our web site.

ViewScan Magnetic Detection System a walk-through archway detector which uses passive magnetic sensing technology and unique location algorithms to suggest the location of certain kinds of threat objects and other potentially undesirable objects such as cell phones or digital cameras. The control unit combines the magnetic and video information in a manner that allows it to be displayed for easy recognition and auditory warning. The network architecture allows for remote monitoring, integration of biometrics and access control devices and storage locally on the control unit or remotely on servers.

Biometric analysis such as fingerprint verification has been incorporated into the ViewScan and facial recognition can be incorporated into ViewScan. Access control methods such as magnetic door locks can and have also been incorporated in several banks and credit unions.

Passport and driver's license verification for positive identification in correctional facilities, large government and commercial office buildings have been and are currently being combined with the ViewScan portal.

ViewMaxx Digital Video products a high-resolution, digital video recording and real-time monitoring system. The cameras are viewable remotely via internet access.

Multi-mission Mobile Video (MMV) a lightweight mobile camera and recording system housed in a tough, waterproof enclosure designed to be worn on tactical body wear. The camera systems sends real-time images back to a video monitor at a command post located outside the exclusion zone or contaminated area. The MMV is able to transmit high quality video in the most difficult environments. A multitude of these systems have been deployed and are currently being field-tested. We offer a variety of transmission options including encryption, diversity receivers and on-body recording in case of transmission failure. SWAT, fire fighters and first responders are the focus of the MMV.

Fiber Optic Data Network Installation Service (FIOS) - we have invested in tools, vehicles and testing equipment to enter the fiber optics installations arena. Using a credit line provided by Lafayette Commercial Bank we have expended \$200,000 plus to purchase tools to splice, test and install fiber optic transmission ducts. Several opportunities have been presented to us and we have investigated the potential and probabilities of success. During this work, opportunities for video surveillance and access control contract will present themselves and we hope to capitalize on those opportunities.

Since we have invested in tools, vehicles and testing equipment to enter the fiber optics installations arena, several opportunities have been presented to us and we have investigated the potential and probabilities of success. We advertised the receipt of several multi-million dollar contracts with Verizon. The contracts were presented by several individuals associated with a company called HC Professional, LLC. Verizon informed us that neither individuals nor HC Professional were associated with them and were *persona no grata*. As a result we were channeled to one of their prime contractors and have retracted our announcement of the contracts received with Verizon. We have since then, established qualifications and a relationship with the designated prime contractor and are insured, bonded and an approved sub-contractor with the prime. There are five contracts on the table and we are diligently moving to assemble teams to begin work in the near future. These teams and our plethora of tools, vehicles and testing equipment should provide a substantial revenue stream for a significant number of years.

On our merger and acquisition front, we have signed a Memorandum of Understanding (MOU) with a private research and development company named Visisys. Visisys Holding Plc (Visisys) is a multinational, private holding company organized under the laws of the United Kingdom and Wales with offices in New York, London and Moscow. The entity has two wholly owned subsidiaries: Visisys Systems Ltd. and Face Trend, Ltd. Visisys and its subsidiaries enjoy an international reputation for developing and marketing of intelligent video, monitoring and sensory systems. The company's main focus is the integration of proprietary and/or estimable devices with design and applied science to provide customized applications in a number of diverse fields, such as, security, medical, retail, hospitality and financial/clerical management.

We may exchange shares of our companies. Visisys has a network of individuals in its shareholder base that can be instrumental in developing our business plan. We have been collaborating our plans and intend to work jointly to market and our products synergistically.

We are still perusing the acquisition and merger strategy started last year and are in negotiations and collaboration with several companies. The slowdown of the economy has caused a slowdown of most activities in that arena.

The next phase of our business plan will be to continue to raise additional funds through common stock offerings to provide working capital to finance several acquisitions and the integration of new technologies and/or businesses. We also intend to continue to strengthen our balance sheet by paying off debt.

We are continuing to plan to hold an annual meeting in 2009 even though we were not able in 2008. We will issue information statements and mail out proxy statements as necessary at the appropriate time.

RESULTS OF OPERATIONS

The following discussions are based on the consolidated financial statements of View Systems and its subsidiaries. These charts and discussions summarize our financial statements for the three months ended March 31, 2009 and 2008 and should be read in conjunction with the financial statements, and notes thereto, included with this report at Part II, Item 7, below.

SUMMARY COMPARISON OF OPERATING RESULTS

	Three months ended March	
	31,	
	2009	2008
Revenues, net	111,362	290,431
Cost of sales	41,344	107,230
Gross profit (loss)	70,018	183,201
Total operating expenses	532,235	228,489
Loss from operations	(462,217)	(45,288)
Total other income (expense)	(19,705)	(20,654)
Net income (loss)	(65,942)	(65,942)
Net income (loss) per share	\$ (0.02)	\$ (0.00)

Revenue is considered earned when the product is shipped to the customer. The concealed weapons system and the digital video system each require installation and training. Training is a revenue source separate and apart from the sale of the product. In those cases revenue is recognized at the completion of the installation and training.

We have experienced a decrease in sales of our products which resulted in decreased revenues for the first quarter of 2009 compared to the first quarter of 2008. We believe the cause of that is the domestic and worldwide down turn of the economy although we received verbal indications of increased need from our international customers such as Pakistan, UAE and China. Those orders have been stalled and or cancelled, we do not know which at this time. We have inquiries for quotes from Turkey, Lebanon and Georgia. Management anticipates that increases in revenues will resume as these sales and marketing channels are developed. We continue to establish local sales and service offices in geographic areas where we have already completed sales.

Our backlog at March 31, 2009, was \$300,000. We received cancellations for orders and indications that these orders would be re-established when the political climate stabilizes. The delay between the time of the purchase order and shipping of the product results in a delay of recognition of the revenue from the sale. This delay in recognition of revenues will continue as part of our results of operations.

The increase of margins from year to year was primarily the result of decreased costs and due to engineering changes and an increase of volume of units shipped. Management anticipates that the relative margins of each product line will increase even more with an increase of number of units shipped. The quantities per average sale have been increasing steadily. For 2008, the total operating expenses and cost of goods has decreased significantly due to less product being sold and our attention being focused on future fiber (FIOS) data installation work.

LIQUIDITY AND CAPITAL RESOURCES

Annually our revenues from product sales have been increasing but are not sufficiently to cover our operating expenses. Our auditors have expressed substantial doubt that we can continue as a going concern. We are continuing to push sales and control costs.

Historically, we have relied on revenues, debt financing and sales of our common stock to satisfy our cash requirements. For the quarter ended March 31, 2009, we received cash from revenues of \$111,362, \$0 from issuance of equity, and \$60,890 from stockholder advances. We will also continue to rely on the issuance of our common stock to pay for services and to convert debt when cash is unavailable. Management anticipates that we will continue to issue shares for services in the short term.

Management believes we will need to take the necessary steps to increase our authorized common stock during 2009.

The Company intends to hold a meeting of shareholders as soon as practicable to consider, among, other things, an increase in the authorized common stock of the Company.

Management intends to finance our 2009 operations primarily with the revenue from product sales and any cash short falls will be addressed through equity or debt financing, if available. Management expects revenues will continue to increase but not to the point of profitability in the short term. We will need to continue to raise additional capital, both internally and externally, to cover cash shortfalls and to compete in our markets. At our current revenue levels management believes we will require an additional \$1,200,000 during the next 12 months to satisfy our cash requirements of approximately \$100,000 per month for operations. These operating costs include cost of sales, general and administrative expenses, salaries and benefits and professional fees related to contracting engineers. We have insufficient financing commitments in place to meet our expected cash requirements for 2009 and we cannot assure you that we will be able to obtain financing on favorable terms. If we cannot obtain financing to fund our operations in 2009, then we may be required to reduce our expenses and scale back our operations.

Commitments and Contingent Liabilities

The Company leased office and warehouse space in Baltimore, MD under a three-year non-cancelable operating lease, which expired October 2008. Base rent is \$3,300 per month. We have leasing on a month to month basis.

Our total current liabilities increased to \$1694,445 at March 31, 2009, compared to \$1,591,021 at March 31, 2008.

Our current total liabilities at March 31, 2009 included accounts payable of \$373,810, accrued expenses of \$56,199, accrued interest of 144,672, accrued royalties of 243,750, loans from shareholders of \$205,528 and notes payable of \$670,486.

Our notes payable consist of the following:

We issued notes in the aggregate amount of \$343,093 pursuant to a Subscription Agreement, dated December 23, 2005, with three accredited investors; Starr Consulting, Inc., Active Stealth, LLC, and KCS Referral Service LLC (the Subscribers). We agreed to sale and the Subscribers agreed to purchase convertible promissory notes and warrants. However, on January 6, 2006, the Subscribers consented to the removal of the warrants from the subscription agreement, with the understanding that the warrants would be reinstated after we increased our authorized common stock and the shares underlying the warrants would be registered at a later date. The Subscribers did not receive any other additional consideration for the removal of the warrants. The Subscribers agreed to purchase up to an aggregate of \$500,000 of 8% promissory notes convertible into shares of our common stock at a per share conversion price of \$0.10. The notes were originally to be due and payable by December 31, 2006. The Subscribers agreed to purchase the promissory notes over a 5 month period in \$100,000 per month installments; however, the investment threshold was never achieved, so the conversion option of the notes was terminated and the loans became due on demand with interest at 8% per annum. As of the date of this report the investors have demanded repayment of these loans. The Company has taking steps to negotiate these defaults. In November of 2008 the holders agreed to accept shares of common stock as payment. The holders of these notes have received \$100,008 in cash payments from the sale of stock received.

Unsecured convertible loans from two stockholders in the principal amount of \$216,000. \$100,000 of the loans was due in full on November 1, 2007 with interest at 7%. The holder of this note has demanded payment and has chosen not to convert to equity. The holder of the second note of \$116,000 has been receiving interest payments irregularly.

Off-Balance Sheet Arrangements

The Company does not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on the Company's financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that is material to investors.

Contractual Obligations

As a smaller reporting company as defined by Item 10 of Regulation S-K, the Company is not required to provide this information.

Critical Accounting Policies

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Estimates of particular significance in our financial statements include annual tests for impairment of our licenses. These estimates could likely be materially different if events beyond our control, such as changes in government regulations that affect the usefulness of our licenses or the introduction of new technologies that compete directly with our licensed technologies affect the value of our licenses.

We first determine the value of the license using a projected cash-flow analysis to determine the present value of cash flows. The test is done using assumptions as to various scenarios of increases and decreases in the revenue stream and applying a discount rate of 6%. If the value achieved under these various methods is less than the carrying value of the assets then it is considered that an impairment has occurred and the asset's carrying value is adjusted to reflect the impairment.

Management also makes estimates on the useful life of our licenses based on the following criteria:

.
Whether other assets or group of assets are related to the useful life of the licenses,

.
Whether any legal, regulatory or contractual provisions will limit the use of the assets,

.
We evaluate the cost of maintaining the license,

.
We consider the possible effects of obsolescence, and

.
Whether there is maintenance or any other costs associated with the license.

Risk Factors, including Going Concern Opinion

You should carefully consider the risks, uncertainties and other factors described in our Form 10-K for the year ended December 31, 2008 which are incorporated by reference and the several risks identified below because they could materially and adversely affect our business, financial condition, operating results and prospects and could negatively affect the market price of our Common Stock. Also, you should be aware that the risks and uncertainties described below are not the only ones facing us. Additional risks and uncertainties that we do not yet know of, or that we currently believe are immaterial, may also impair our business operations and financial results. Our business, financial condition or results of operations could be harmed by any of these risks. The trading price of our Common Stock could decline due to any of these risks, and you may lose all or part of your investment.

In assessing these risks you should also refer to the additional risks and other information contained in or incorporated by reference to this Annual Report on Form 10-K for the year ended December 31, 2008, including our financial statements and the related notes. We include in this report only a few of the substantial risks reported in our Form 10-K for the year ended December 31, 2008. You are strongly urged to review our Form 10-K.

WE HAVE EXPERIENCED HISTORICAL LOSSES AND A SUBSTANTIAL ACCUMULATED DEFICIT. IF WE ARE UNABLE TO REVERSE THIS TREND, WE WILL LIKELY BE FORCED TO CEASE OPERATIONS.

We have incurred losses for the past two fiscal years which consists of a net loss of \$173,539 for 2008 and had a net loss of \$462,217 for at the end of March 31, 2009. Our operating results for future periods will include significant expenses, including new product development expenses, potential marketing costs, professional fees and administrative expenses, and will be subject to numerous uncertainties. As a result, we are unable to predict whether we will achieve profitability in the future, or at all.

WE HAVE A WORKING CAPITAL DEFICIT AND SIGNIFICANT CAPITAL REQUIREMENTS. SINCE WE WILL CONTINUE TO INCUR LOSSES UNTIL WE ARE ABLE TO GENERATE SUFFICIENT REVENUES TO OFFSET OUR EXPENSES, INVESTORS MAY BE UNABLE TO SELL OUR SHARES AT A PROFIT OR AT ALL.

The Company has a net loss of \$462,217 for the fiscal year quarter ending in March 31, 2009 and net cash used in operations of \$182,726 for the fiscal quarter ending March 31, 2009. Because the Company has not yet achieved or acquired sufficient operating capital and given these financial results along with the Company's expected cash requirements in 2009, additional capital investment will be necessary to develop and sustain the Company's operations.

OUR INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM HAS RAISED DOUBT OVER OUR CONTINUED EXISTENCE AS A GOING CONCERN.

We have incurred substantial operating and net losses, as well as negative operating cash flow and do not have financing commitments in place to meet expected cash requirements for the next twelve months.

Our net loss for the quarter ending March 31, 2009 was \$462,217 and our net loss for the quarter ending March 31, 2008 was \$45,288. Our retained deficit was \$21,246,344 at March 31, 2009. We are unable to fund our day-to-day operations through revenues alone and management believes we will incur operating losses for the near future while we expand our sales channels. While we have expanded our product line and expect to establish new sales channels, we may be unable to increase revenues to the point that we attain and are able to maintain profitability. As a result we rely on private financing to cover cash shortfalls.

As a result, we continue to have significant working capital and stockholders' deficits including a substantial accumulated deficit at March 31, 2009. In recognition of such, our independent registered public accounting firm has included an explanatory paragraph in its report on our consolidated financial statements for the fiscal years ended December 31, 2008 and December 31, 2007 that expressed substantial doubt regarding our ability to continue as a going concern.

WE NEED ADDITIONAL EXTERNAL CAPITAL AND IF WE ARE UNABLE TO RAISE SUFFICIENT CAPITAL TO FUND OUR PLANS, WE MAY BE FORCED TO DELAY OR CEASE OPERATIONS.

Based on our current growth plan we believe we may require approximately \$1,200,000 in additional financing within the next twelve months to develop our sales channels. Our success will depend upon our ability to access equity capital markets and borrow on terms that are financially advantageous to us. However, we may not be able to obtain additional funds on acceptable terms. If we fail to obtain funds on acceptable terms, then we might be forced to delay or abandon some or all of our business plans or may not have sufficient working capital to develop products, finance acquisitions, or pursue business opportunities. If we borrow funds, then we could be forced to use a large portion of our cash reserves, if any, to repay principal and interest on those loans. If we issue our securities for capital, then the interests of investors and stockholders will be diluted.

WE ARE CURRENTLY DEPENDENT ON THE EFFORTS OF RESELLERS FOR OUR CONTINUED GROWTH AND MUST EXPAND OUR SALES CHANNELS TO INCREASE OUR REVENUES AND FURTHER DEVELOP OUR BUSINESS PLANS.

We are in the process of developing and expanding our sales channels, but we expect overall sales to remain down as we develop these sales channels. We are actively recruiting additional resellers and dealers and have hired in-house sales personnel for regional and national sales. We must continue to find other methods of distribution to increase our sales. If we are unsuccessful in developing sales channels we may have to abandon our business plan.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

As a smaller reporting company as defined by Item 10 of Regulation S-K, the Company is not required to provide information required by this Item.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

We have carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer/Principal Financial Officer, of the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) as of March 31, 2009. Based on such evaluation, we have concluded that, as of such date, our disclosure controls and procedures were effective to ensure that information required to be disclosed by us in our Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in applicable SEC rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer/Principal Financial Officer, as appropriate, to allow timely discussions regarding required disclosure.

Management s Report on Internal Control over Financial Reporting

View Systems, Inc. s management is responsible for establishing and maintaining internal control over financial reporting for the Company. View Systems, Inc. s internal control system was designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Internal control over financial reporting of the Company includes those policies and procedures that:

(1) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions of the company.

(2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorization of management and directors of the Company; and

(3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the Company's financial statements.

All internal control systems, no matter how well designed, have inherent limitations, including the possibility of human error or circumvention through collusion or improper overriding of controls. Therefore, even those internal control systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation. Further, because of changes in conditions, the effectiveness of internal control may vary over time.

The management of View Systems, Inc. assessed the effectiveness of the Company's internal control over financial reporting as of March 31, 2009. In making its assessment of internal control over financial reporting, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSD) in *Internal-Control-Integrated Framework* and implemented a process to monitor and assess both the design and operating effectiveness of the Company's internal controls. Based on this assessment, management believes that as of March 31, 2009, the Company's internal control over financial reporting was effective.

This annual report does not include an attestation report of the Company's registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by the Company's registered public accounting firm pursuant to temporary rules of the Securities and Exchange Commission that permit the Company to provide only Management's report in this annual report.

Changes in Internal Control Over Financial Reporting

Management of the Company has evaluated, with the participation of the Company's Chief Executive Officer/Chief Financial Officer, changes in the Company's internal controls over financial reporting (as defined in Rule 13a-15(f) of the Exchange Act) during the first quarter of 2009. In connection with such evaluation, there have been no changes to the Company's internal control over financial reporting that occurred since the beginning of the Company's first quarter of 2009 that have materially affected, or are reasonably likely to materially affect the Company's internal control over financial reporting.

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

None.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

We issued an aggregate of 13,536,000 shares of our unregistered common stock at purchase prices ranging from \$0.0313 to \$0.0625 per share during the reporting period, as follows:
