QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
ACT OF 1934

For the quarterly period ended June 30, 2012

OR
 TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
ACT OF 1934

Commission File Number: 001-31648

EURONET WORLDWIDE, INC.

(Exact name of registrant as specified in its charter)

Delaware

74-2806888

(State or other jurisdiction

(I.R.S. Employer

of incorporation or organization)

Identification No.)

3500 College Boulevard

Leawood, Kansas

66211

(Address of principal executive offices)

(Zip Code)

(913) 327-4200

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer

Smaller reporting company

(Do not check if a smaller reporting
company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The number of shares of the issuer's common stock, \$0.02 par value, outstanding as of July 31, 2012 was 50,830,210 shares.

Table of Contents

EURONET WORLDWIDE, INC. AND SUBSIDIARIES
NOTES TO THE UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

(1) GENERAL

Organization

Euronet Worldwide, Inc. and its subsidiaries (the “Company” or “Euronet”) is a leading global electronic payments provider. Euronet offers payment and transaction processing and distribution solutions to financial institutions, retailers, service providers and individual consumers. The Company's primary product offerings include: comprehensive automated teller machine (“ATM”), point-of-sale (“POS”) and card outsourcing services; electronic distribution of prepaid mobile airtime and other electronic payment products; and global consumer money transfer services.

Basis of presentation

The accompanying unaudited consolidated financial statements have been prepared from the records of the Company, in conformity with accounting principles generally accepted in the U.S. (“U.S. GAAP”) and pursuant to the rules and regulations of the Securities and Exchange Commission (“SEC”). In the opinion of management, such unaudited consolidated financial statements contain all adjustments (consisting of normal interim closing procedures) necessary to present fairly on a consolidated basis the financial position of the Company as of June 30, 2012, and the results of its operations for the three- and six-month periods ended June 30, 2012 and 2011 and cash flows for the six-month periods ended June 30, 2012 and 2011. The unaudited consolidated financial statements should be read in conjunction with the audited consolidated financial statements of Euronet for the year ended December 31, 2011, including the notes thereto, set forth in the Company’s 2011 Annual Report on Form 10-K.

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the amounts reported in the unaudited consolidated financial statements and accompanying notes. Actual results could differ from those estimates. The results of operations for the three- and six-month periods ended June 30, 2012 are not necessarily indicative of the results to be expected for the full year ending December 31, 2012.

(2) SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND PRACTICES

Recent accounting pronouncements

In September 2011, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) 2011-08, Intangibles - Goodwill and Other (Topic 350): Testing Goodwill for Impairment. ASU 2011-08 permits an entity to make a qualitative assessment of whether it is more likely than not that a reporting unit's fair value is less than its carrying amount before applying the two-step goodwill impairment test. If an entity concludes that it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, it would not be required to perform the two-step impairment test for that reporting unit. The qualitative assessment is applicable to the annual test of goodwill impairment as well as determining if an interim test of goodwill impairment is necessary. The Company adopted ASU 2011-08 effective January 1, 2012 and its adoption did not materially affect the Company's financial statements.

Money transfer settlement obligations

Money transfer settlement obligations are recorded in accrued expenses and other current liabilities on the Company’s unaudited Consolidated Balance Sheet and consist of amounts owed by the Company to money transfer recipients. As of June 30, 2012, the Company’s money transfer settlement obligations were \$48.4 million.

Table of Contents

(3) EARNINGS PER SHARE

Basic earnings per share has been computed by dividing earnings available to common stockholders by the weighted average number of common shares outstanding during the respective period. Diluted earnings per share has been computed by dividing earnings available to common stockholders by the weighted average shares outstanding during the respective period, after adjusting for any potential dilution of the assumed conversion of the Company's convertible debentures, restricted stock and options to purchase the Company's common stock. The following table provides the computation of diluted weighted average number of common shares outstanding:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
Computation of diluted weighted average shares outstanding:				
Basic weighted average shares outstanding	50,765,005	51,219,681	50,643,949	51,144,154
Incremental shares from assumed conversion of stock options and restricted stock	906,496	738,261	839,199	806,459
Diluted weighted average shares outstanding	51,671,501	51,957,942	51,483,148	51,950,613

The table includes the impact of all stock options and restricted stock that are dilutive to Euronet's weighted average common shares outstanding during the periods. The calculation of diluted earnings per share excludes stock options or shares of restricted stock that are anti-dilutive to the Company's weighted average common shares outstanding of approximately 3,496,000 and 3,662,000 for the three- and six-month periods ended June 30, 2012, respectively, and approximately 1,817,000 and 1,751,111 for the three- and six-month periods ended June 30, 2011, respectively. The Company has convertible debentures that, if converted, would have a potentially dilutive effect on the Company's stock. As required by Accounting Standards Codification ("ASC") Topic 260, Earnings per Share, if dilutive, the impact of the contingently issuable shares must be included in the calculation of diluted earnings per share under the "if-converted" method, regardless of whether the conditions upon which the debentures would be convertible into shares of the Company's common stock have been met. The Company's outstanding 3.50% debentures are convertible into 4.2 million shares of common stock only upon the occurrence of certain conditions. Under the if-converted method, the assumed conversion of the 3.50% debentures was anti-dilutive for the three- and six-month periods ended June 30, 2012 and 2011 and, accordingly, associated shares have been excluded from diluted weighted average shares outstanding.

(4) ACQUISITIONS

In January 2012, the Company acquired the remaining 51% of the common stock, which it did not previously own, of Euronet Middle East W.L.L. The purchase price of approximately \$6.4 million was paid from cash on hand. Accordingly, all assets and liabilities of Euronet Middle East W.L.L. were recorded at fair value which resulted in a \$4.4 million gain on the increase of the book value of the 49% interest previously owned.

The following table summarizes the fair values of the acquired net assets at the acquisition date:

(dollar amount in thousands)	Estimated Life	
Current assets		\$4,413
Property and equipment	3-5 years	84
Customer relationships	8 years	2,735
Goodwill	Indefinite	5,869
Other non-current assets		1
Fair value of net assets		13,102
Current liabilities		(602)
Net assets acquired		\$12,500

Table of Contents

(5) GOODWILL AND ACQUIRED INTANGIBLE ASSETS, NET

A summary of acquired intangible assets and goodwill activity for the six-month period ended June 30, 2012 is presented below:

(in thousands)	Acquired Intangible Assets	Goodwill	Total Intangible Assets
Balance as of December 31, 2011	\$99,878	\$488,628	\$588,506
Increases (decreases):			
Acquisition	2,735	5,869	8,604
Amortization	(11,471)	—	(11,471)
Other (primarily changes in foreign currency exchange rates)	(1,529)	(9,002)	(10,531)
Balance as of June 30, 2012	\$89,613	\$485,495	\$575,108

Estimated annual amortization expense on intangible assets with finite lives, before income taxes, as of June 30, 2012, is expected to total \$22.2 million for 2012, \$17.5 million for 2013, \$14.9 million for 2014, \$9.7 million for 2015, \$8.1 million for 2016 and \$6.7 million for 2017.

The Company's annual goodwill impairment test is performed during the fourth quarter. The Company's annual impairment test for the year ended December 31, 2011 resulted in no impairment charges. Determining the fair value of reporting units requires significant management judgment in estimating future cash flows and assessing potential market and economic conditions. It is reasonably possible that the Company's operations will not perform as expected, or that estimates or assumptions could change, which may result in the Company recording material non-cash impairment charges during the year in which these changes take place.

(6) DEBT OBLIGATIONS

A summary of debt obligation activity for the six-month period ended June 30, 2012 is presented below:

(in thousands)	Revolving Credit Facilities	Other Debt Obligations	Capital Leases	3.5% Convertible Debentures Due 2025	Term Loans	Total
Balance at December 31, 2011	\$87,194	\$981	\$6,427	\$165,173	\$79,000	\$338,775
Increases (decreases):						
Net additions (repayments)	(16,546)	119	(1,498)	—	(2,000)	(19,925)
Accretion	—	—	—	3,906	—	3,906
Capital lease interest	—	—	206	—	—	206
Foreign currency exchange gain	(1,391)	(108)	(131)	—	—	(1,630)
Balance at June 30, 2012	69,257	992	5,004	169,079	77,000	321,332
Less — current maturities	—	(992)	(1,928)	(169,079)	(5,500)	(177,499)
Long-term obligations at June 30, 2012	\$69,257	\$—	\$3,076	\$—	\$71,500	\$143,833

The 3.50% convertible debentures had principal amounts outstanding of \$171.4 million and unamortized discounts outstanding of \$2.3 million and \$6.3 million as of June 30, 2012 and December 31, 2011, respectively. The discount will be amortized through October 15, 2012. Interest expense, including contractual interest and discount accretion, was \$3.5 million and \$3.4 million for the three-month periods ended June 30, 2012 and 2011, respectively, and \$6.9 million and \$6.8 million for the six-month periods ended June 30, 2012 and 2011, respectively. The effective interest rate was 8.4% for the three- and six-month periods ended June 30, 2012 and 2011.

Table of Contents

(7) DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

As of June 30, 2012, the Company had foreign currency forward contracts outstanding with a notional value of \$80.6 million, primarily in euros and Mexican pesos, which were not designated as hedges and had a weighted average remaining maturity of 3 days. Although the Company enters into foreign currency forward contracts to offset foreign currency exposure related to the notional value of money transfer transactions collected in currencies other than the U.S. dollar, they are not designated as hedges under ASC Topic 815, Derivatives and Hedging. This is mainly due to the relatively short duration of the contracts, typically 1 to 14 days, and the frequency with which the Company enters into them. Due to the short duration of the contracts and the Company's credit profile, the Company is generally not required to post collateral with respect to its foreign currency forward contracts.

The Company has an office lease in a foreign country that requires payment in a currency that is not the functional currency of either party to the lease or the Company's reporting currency. Therefore, the lease contains an embedded derivative per ASC Topic 815. At June 30, 2012 and December 31, 2011, the embedded derivative is recorded at fair value in the Consolidated Balance sheets.

The required tabular disclosures for derivative instruments are as follows:

(in thousands)	Consolidated Balance Sheet Location	Fair Values of Derivative Instruments as of	
		June 30, 2012	December 31, 2011
Derivatives not designated as hedging instruments under ASC Topic 815			
		Liability Derivatives

Foreign currency derivative contracts — gross losses	Other current liabilities	(671)	(178)
Embedded derivative in foreign lease	Other long-term liabilities	(46)	(141)
Total derivatives		\$(611)	\$(219)
		Amount of Gain (Loss) Recognized in Income on Derivative	
(in thousands)	Location of (Loss) Gain Recognized in Income on Derivative	Three Months Ended June 30, 2012	Six Months Ended June 30, 2011
Derivatives not designated as hedging instruments under ASC Topic 815			
Foreign currency derivative contracts	Foreign currency exchange (loss)gain, net	\$ 1,295	\$(621)
Embedded derivative in foreign lease	Foreign currency exchange (loss) gain, net	35	14
Total		\$ 1,330	\$(607)

See Note 8, Fair Value Measurements, for the determination of the fair values of derivatives.

Table of Contents

(8) FAIR VALUE MEASUREMENTS

The carrying amounts of cash and cash equivalents, trade accounts receivable, trade accounts payable and short-term debt obligations approximate fair values due to their short maturities. The carrying values of the Company's term loan due 2016 and revolving credit agreements approximate fair values because interest is based on the London Inter-Bank Offered Rate ("LIBOR") that resets at various intervals of less than one year. The following table provides the estimated fair values of the Company's other financial instruments, based on quoted market prices or significant other observable inputs.

(in thousands)	As of June 30, 2012		December 31, 2011	
	Carrying Value	Fair Value	Carrying Value	Fair Value
3.50% convertible debentures, unsecured, due 2025	\$(169,079)	\$(171,224)	\$(165,173)	\$(170,581)
Foreign currency derivative contracts	(565)	(565)	(78)	(78)
Embedded derivative in foreign lease	(46)	(46)	(141)	(141)

The fair values disclosed above for the Company's convertible debentures are based on quoted prices in active markets for identical assets and liabilities (Level 1). The Company's assets and liabilities recorded at fair value on a recurring basis using significant other observable inputs (Level 2) are the foreign currency derivative contracts and the embedded derivative in foreign lease. The Company values foreign currency derivative contracts using foreign currency exchange quotations for similar assets and liabilities. The embedded derivative in foreign lease is valued using present value techniques and foreign currency exchange quotations.

(9) SEGMENT INFORMATION

Euronet's reportable operating segments have been determined in accordance with ASC Topic 280, Segment Reporting. The Company currently operates in the following three reportable operating segments:

1) Through the EFT Processing Segment, the Company processes transactions for a network of ATMs and POS terminals across Europe, the Middle East and Asia Pacific. The Company provides comprehensive electronic payment solutions consisting of ATM network participation, outsourced ATM and POS management solutions, credit and debit card outsourcing, dynamic currency conversion and other value added services. Through this segment, the Company also offers a suite of integrated electronic financial transaction software solutions for electronic payment and transaction delivery systems.

2) Through the epay Segment, the Company provides distribution, processing and collection services for prepaid mobile airtime and other electronic payment products in Europe, the Middle East, Asia Pacific, North America and South America.

3) Through the Money Transfer Segment, the Company provides global consumer-to-consumer money transfer services through a network of sending agents and Company-owned stores (primarily in North America and Europe), disbursing money transfers through a worldwide correspondent network. The Company also offers customers bill payment services, payment alternatives such as money orders and prepaid debit cards, comprehensive check cashing services and foreign currency exchange services.

In addition, the Company accounts for non-operating activity, share-based compensation expense, certain intersegment eliminations and the costs of providing corporate and other administrative services to the three segments in its administrative division, "Corporate Services, Eliminations and Other." These services are not directly identifiable with the Company's reportable operating segments.

Table of Contents

The following tables present the segment results of the Company's operations for the three- and six-month periods ended June 30, 2012 and 2011:

(in thousands)	For the Three Months Ended June 30, 2012				
	EFT Processing	epay	Money Transfer	Corporate Services, Eliminations and Other	Consolidated

(10) GUARANTEES

As of June 30, 2012, the Company had \$89.2 million of stand-by letters of credit/bank guarantees issued on its behalf, of which \$34.4 million are outstanding under the revolving credit facility. The remaining stand-by letters of credit/bank guarantees are collateralized by \$14.8 million of cash deposits held by the respective issuing banks.

Under certain circumstances, Euronet grants guarantees in support of obligations of subsidiaries. As of June 30, 2012, the Company had granted off balance sheet guarantees for cash in various ATM networks amounting to \$16.5 million over the terms of the cash supply agreements and performance guarantees amounting to approximately \$27.5 million over the terms of the agreements with the customers.

From time to time, Euronet enters into agreements with unaffiliated parties that contain indemnification provisions, the terms of which may vary depending on the negotiated terms of each respective agreement. The amount of such potential obligations is generally not stated in the agreements. Our liability under such indemnification provisions may be mitigated by relevant insurance coverage and may be subject to time and materiality limitations, monetary caps and other conditions and defenses. Such indemnification obligations include the following:

In connection with contracts with financial institutions in the EFT Processing Segment, the Company is responsible for damage to ATMs and theft of ATM network cash that, generally, is not recorded on the Company's Consolidated Balance Sheets. As of June 30, 2012, the balance of ATM network cash for which the Company was responsible was approximately \$315 million. The Company maintains insurance policies to mitigate this exposure;

In connection with the license of proprietary systems to customers, Euronet provides certain warranties and infringement indemnities to the licensee, which generally warrant that such systems do not infringe on intellectual property owned by third parties and that the systems will perform in accordance with their specifications;

Euronet has entered into purchase and service agreements with vendors and consulting agreements with providers of consulting services, pursuant to which the Company has agreed to indemnify certain of such vendors and consultants, respectively, against third-party claims arising from the Company's use of the vendor's product or the services of the vendor or consultant;

In connection with acquisitions and dispositions of subsidiaries, operating units and business assets, the Company has entered into agreements containing indemnification provisions, which can be generally described as follows: (i) in connection with acquisitions of operating units or assets made by Euronet, the Company has agreed to indemnify the seller against third party claims made against the seller relating to the operating unit or asset and arising after the closing of the transaction, and (ii) in connection with dispositions made by Euronet, Euronet has agreed to indemnify the buyer against damages incurred by the buyer due to the buyer's reliance on representations and warranties relating to the subject subsidiary, operating unit or business assets in the disposition agreement if such representations or warranties were untrue when made; and

Euronet has entered into agreements with certain third parties, including banks that provide fiduciary and other services to Euronet or to the Company's benefit plans. Under such agreements, the Company has agreed to indemnify

such service providers for third party claims relating to carrying out their respective duties under such agreements. The Company is also required to meet minimum capitalization and cash requirements of various regulatory authorities in the

13

Table of Contents

jurisdictions in which the Company has money transfer operations. The Company has obtained surety bonds in compliance with money transfer licensing requirements of the applicable governmental authorities.

To date, the Company is not aware of any significant claims made by the indemnified parties or third parties to guarantee agreements with the Company and, accordingly, no liabilities were recorded as of June 30, 2012 or December 31, 2011.

(11) INCOME TAXES

The Company's effective tax rates were 47.5% and 35.7% for the three-month periods ended June 30, 2012 and 2011, respectively, and 35.9% and 30.2% for the six-month periods ended June 30, 2012, and 2011, respectively. The effective tax rates were significantly influenced by the foreign currency exchange gains and losses, \$4.4 million gain on acquisition during the six-month period ended June 30, 2012 and a \$1.0 million gain on legal settlement during the six-month period ended June 30, 2011. Excluding these items from pre-tax income, as well as the related tax effects for these items, the Company's effective tax rates were 33.6% and 44.2% for the three-month periods ended June 30, 2012 and 2011, respectively, and 38.1% and 44.5% for the six-month periods ended June 30, 2012 and 2011, respectively.

The Company's effective tax rate, as adjusted, for the second quarter of 2012 was lower than the applicable statutory rate of 35% primarily because of the recognition of previously unrecognized tax benefits and tax return true ups in foreign jurisdictions. The Company's effective tax rate, as adjusted, for the first half of 2012 was higher than the applicable statutory rate of 35% primarily because of our U.S. income tax positions, partly offset by the recognition of previously unrecognized tax benefits and tax return true ups in foreign jurisdictions. For the six-month period ended June 30, 2012, we have recorded a valuation allowance against our U.S. income tax net operating losses as it is more likely than not that a tax benefit will not be realized. Accordingly, the income tax benefits associated with pre-tax book losses generated by our U.S. entities have not been recognized in these periods.

(12) LITIGATION AND CONTINGENCIES

Contingencies

Computer Security Breach - A unit of the Company's European processing business was the subject of a criminal security breach in late 2011. The affected business represents less than 5% of the Company's revenues, profits and transactions. Euronet took immediate steps to remediate the breach and ensure its impact was contained.

Bank card association rules provide a process by which loss and expense arising from such breaches is allocated among card issuers, acquirers and service providers such as Euronet. The Company expects that some claims may be asserted against it under such rules or under its agreements with acquiring banks. However, the Company believes that any liability under such claims will be limited by a number of factors including the fact that the majority of cards processed by the affected business were EMV compliant chip and PIN cards to which such rules either do not apply or apply a lower level of liability. Losses from fraudulent card activity appear to have been limited to magnetic stripe transactions processed on the affected systems. In addition, the Company maintains insurance to cover the financial exposure for response costs, losses by card issuers and fines or penalties from such incidents.

At this time, the Company is unable to predict the possible range of loss, if any, associated with the resolution of claims against it in connection with the breach. However, the Company does not at this time expect the net financial impact of loss or expense from the breach after the probable insurance recovery to be material.

The Company is continuing to take aggressive measures to strengthen its security controls, and is working closely with computer security specialists in this regard.

Expenses related to the breach were \$0.5 million in the first half of 2012, net of \$1.7 million in amounts recovered from our insurance carrier and expected additional insurance recoveries of \$0.2 million.

Antitrust Investigation - In the second quarter of 2009, the Antitrust Division of the United States Department of Justice (the "DOJ") served Continental Exchange Solutions, Inc. d/b/a Ria Financial Services ("CES"), an indirect, wholly owned subsidiary of the Company, with a grand jury subpoena requesting documents from CES and its affiliates in connection with an investigation into possible price collusion related to money transmission services to the Dominican Republic ("D.R.") during the period from January 1, 2004 to the date of the subpoena. The Company acquired all of the stock of Ria Envía, Inc., the parent of CES, in April 2007. CES foreign exchange transactions between the U.S and the D.R. generated approximately 0.3% of the Company's 2009 consolidated revenues. The Company and CES are fully cooperating with the DOJ in its investigation.

Table of Contents

The Company believes that, during the period covered by the DOJ investigation, CES generally derived part of its charge for exchanging U.S. dollars into D.R. pesos from a reference rate recommended by ADEREDI, a trade association in the D.R. composed of a CES subsidiary and other D.R. money transfer firms. The Company further believes, however, that CES set its own service fee on the D.R. transactions and its overall transaction price to customers. Customers were also free during this time period to use CES and other firms to transmit dollars into the D.R., without conversion into D.R. pesos, and the Company believes such transmissions occurred with increasing frequency over the course of this time period.

At this time, the Company is unable to predict the outcome of the DOJ investigation, or, if charges were to be brought against CES, the possible range of loss, if any, associated with the resolution of any such charges. Nor can the Company predict any potential effect on the Company's business, results of operations or financial condition arising from such charges or potential collateral consequences, which could include fines, penalties, limitations on or revocation of CES's license to engage in the money transfer business in one or more states, and civil liability. During the three- and six-month periods ended June 30, 2012, no significant fees were incurred related to this investigation and related matters. In addition, the Company may incur in the future significant fees and expenses in connection with the DOJ investigation and related matters.

Litigation

From time to time, the Company is a party to litigation arising in the ordinary course of its business. Currently, there are no legal proceedings that management believes, either individually or in the aggregate, would have a material adverse effect upon the consolidated results of operations or financial condition of the Company. In accordance with U.S. GAAP, the Company records a liability when it is both probable that a liability has been incurred and the amount of the loss can be reasonably estimated. These provisions are reviewed at least quarterly and adjusted to reflect the impacts of negotiations, settlements, rulings, advice of legal counsel, and other information and events pertaining to a particular case.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

OVERVIEW

COMPANY OVERVIEW, GEOGRAPHIC LOCATIONS AND PRINCIPAL PRODUCTS AND SERVICES

Euronet Worldwide, Inc. and its subsidiaries ("Euronet," the "Company," "we" or "us") is a leading electronic payments provider. We offer payment and transaction processing and distribution solutions to financial institutions, retailers, service providers and individual consumers. Our primary product offerings include comprehensive automated teller machine ("ATM"), point-of-sale ("POS") and card outsourcing services; electronic distribution of prepaid mobile airtime and other electronic payment products; and global consumer money transfer services. As of June 30, 2012, we operate in the following three principal operating segments:

The EFT Processing Segment, which processes transactions for a network of 17,048 ATMs and approximately 69,000 POS terminals across Europe, the Middle East and Asia Pacific. We provide comprehensive electronic payment solutions consisting of ATM cash withdrawal services, ATM network participation, outsourced ATM and POS management solutions, credit and debit card outsourcing, and value added services, including dynamic currency conversion. Through this segment, we also offer a suite of integrated electronic financial transaction software solutions for electronic payment and transaction delivery systems.

The epay Segment, which provides distribution, processing and collection services for prepaid mobile airtime and other electronic payment products. Including terminals operated by unconsolidated subsidiaries, we operate a network of approximately 617,000 POS terminals providing electronic processing of prepaid mobile airtime top-up services and other electronic payment products in Europe, the Middle East, Asia Pacific, North America and South America. We also provide vouchers and physical gift fulfillment services in Europe.

The Money Transfer Segment, which provides global consumer-to-consumer money transfer services, primarily under the brand name Ria. We offer this service through a network of sending agents and Company-owned stores (primarily in North America and Europe), disbursing money transfers through a worldwide correspondent network that includes approximately 158,000 locations. In addition to money transfers, we also offer customers bill payment services (primarily in the U.S.), payment alternatives such as money orders and prepaid debit cards, comprehensive check cashing services for a wide variety of issued checks, along with competitive foreign currency exchange services. We have four processing centers in Europe, two in Asia Pacific, two in North America and one in the Middle East. We have 28 principal offices in Europe, six in North America, nine in Asia Pacific, one in South America, and two in Africa. Our executive offices are located in Leawood, Kansas, USA. With approximately 77% of our revenues denominated in currencies other than the U.S. dollar, any significant changes in currency exchange rates will likely have a significant impact on our results of operations.

SOURCES OF REVENUES AND CASH FLOW

Euronet primarily earns revenues and income based on ATM management fees, transaction fees, commissions and foreign currency spreads. Each operating segment's sources of revenues are described below.

EFT Processing Segment — Revenues in the EFT Processing Segment, which represented approximately 18% of total consolidated revenues for the first half of 2012, are derived from fees charged for transactions made by cardholders on our proprietary network of ATMs, fixed management fees and transaction fees we charge to customers for operating ATMs and processing debit and credit cards under outsourcing and cross-border acquiring agreements and other value added services such as advertising, money transfers and foreign currency exchange margin on dynamic currency conversion transactions provided over ATMs. Through our proprietary network, we generally charge fees or earn margin on four types of ATM transactions: i) cash withdrawals, ii) balance inquiries, iii) transactions not completed because the relevant card issuer did not give authorization, and iv) value added services such as prepaid telecommunication recharges, dynamic currency conversion, bill payment and ATM advertising. Revenues in this segment are also derived from license fees, professional services and maintenance fees for proprietary application software and sales of related hardware.

epay Segment — Revenues in the epay Segment, which represented approximately 57% of total consolidated revenues for the first half of 2012, are primarily derived from commissions or processing fees received from mobile phone

operators for the sale and distribution of prepaid mobile airtime. We also generate revenues from commissions earned from the distribution of other electronic payment products, vouchers and physical gifts. Due to certain provisions in our mobile phone operator agreements, the operators have the ability to reduce the overall commission paid on top-up transactions. However, by virtue of our

Table of Contents

agreements with retailers (distributors where POS terminals are located) in certain markets, not all of these reductions are absorbed by us because we are able to pass a significant portion of the reductions to retailers. Accordingly, under certain retailer agreements, the effect is to reduce revenues and reduce our direct operating costs resulting in only a small impact on gross profit and operating income. In some markets, reductions in commissions can significantly impact our results as it may not be possible, either contractually or commercially in the concerned market, to pass a reduction in commissions to the retailers. In Australia, certain retailers negotiate directly with the mobile phone operators for their own commission rates, which also limits our ability to pass through reductions in commissions. Agreements with mobile operators are important to the success of our business. These agreements permit us to distribute prepaid mobile airtime to the mobile operators' customers. Other electronic payment products offered by this segment include prepaid long distance calling card plans, prepaid Internet plans, prepaid debit cards, gift cards, vouchers, transport payments, lottery payments, bill payment, money transfer and digital content such as music, games and software.

Money Transfer Segment — Revenues in the Money Transfer Segment, which represented approximately 25% of total consolidated revenues for the first half of 2012, are primarily derived from charging a transaction fee, as well as the margin earned from purchasing foreign currency at wholesale exchange rates and selling the foreign currency to consumers at retail exchange rates. We have a sending agent network in place comprised of agents and Company-owned stores primarily in North America and Europe and a worldwide network of correspondent agents, consisting primarily of financial institutions in the transfer destination countries. Sending and correspondent agents each earn fees for cash collection and distribution services. These fees are recognized as direct operating costs at the time of sale.

Corporate Services, Eliminations and Other - In addition to operating in our principal operating segments described above, our "Corporate Services, Eliminations and Other" category includes non-operating activity, certain inter-segment eliminations and the cost of providing corporate and other administrative services to the operating segments, including share-based compensation expense. These services are not directly identifiable with our reportable operating segments.

OPPORTUNITIES AND CHALLENGES

EFT Processing Segment — The continued expansion and development of our EFT Processing Segment business will depend on various factors including, but not necessarily limited to, the following:

- the impact of competition by banks and other ATM operators and service providers in our current target markets;
- the demand for our ATM outsourcing services in our current target markets;
- our ability to develop products or services, including value added services, to drive increases in transactions;
- the expansion of our various business lines in markets where we operate and in new markets;
- the entrance into additional card acceptance and ATM management agreements with banks;
- our ability to obtain required licenses in markets we intend to enter or expand services;
- the availability of financing for expansion;
- our ability to efficiently install ATMs contracted under newly awarded outsourcing agreements;
- our ability to renew existing contracts at profitable rates;
- our ability to maintain pricing at current levels or mitigate price reductions in certain markets;
- the impact of reductions in ATM interchange fees;
- our ability to expand and sign additional customers for the cross-border merchant processing and acquiring business; and
- the continued development and implementation of our software products and their ability to interact with other leading products.

epay Segment — The continued expansion and development of the epay Segment business will depend on various factors, including, but not necessarily limited to, the following:

- our ability to negotiate new agreements in additional markets with mobile phone operators, content providers, agent financial institutions and retailers;

our ability to use existing expertise and relationships with mobile operators, content providers and retailers to our advantage;
the continued use of third-party providers such as ourselves to supply electronic processing solutions for existing

17

Table of Contents

and additional content;

the development of mobile phone networks in the markets in which we do business and the increase in the number of mobile phone users;

the overall pace of growth in the prepaid mobile phone market, including consumer shifts between prepaid and postpaid services;

our market share of the retail distribution capacity;

the development of new technologies that may compete with POS distribution of prepaid mobile airtime and other products;

the level of commission that is paid to the various intermediaries in the electronic payment distribution chain;

our ability to fully recover monies collected by retailers;

our ability to add new and differentiated products in addition to those offered by mobile operators;

our ability to take advantage of cross-selling opportunities with our Money Transfer Segment, including providing money transfer services through our distribution network; and

the availability of financing for further expansion.

Money Transfer Segment — The expansion and development of our Money Transfer Segment business will depend on various factors, including, but not necessarily limited to, the following:

the continued growth in worker migration and employment opportunities;

the mitigation of economic and political factors that have had an adverse impact on money transfer volumes, such as changes in the economic sectors in which immigrants work and the developments in immigration policies in the U.S.;

the continuation of the trend of increased use of electronic money transfer and bill payment services among immigrant workers and the unbanked population in our markets;

our ability to maintain our agent and correspondent networks;

our ability to offer our products and services or develop new products and services at competitive prices to drive increases in transactions;

the development of new technologies that may compete with our money transfer network;

the expansion of our services in markets where we operate and in new markets;

our ability to strengthen our brands;

our ability to fund working capital requirements;

our ability to recover from agents funds collected from customers and our ability to recover advances made to correspondents;

our ability to maintain compliance with the regulatory requirements of the jurisdictions in which we operate or plan to operate;

our ability to take advantage of cross-selling opportunities with our epay Segment, including providing prepaid services through Ria's stores and agents worldwide;

our ability to leverage our banking and merchant/retailer relationships to expand money transfer corridors to Europe, Asia and Africa, including high growth corridors to Central and Eastern European countries;

the availability of financing for further expansion; and

our ability to successfully expand our agent network in Europe using our Payment Services Directive license.

Table of Contents

Impact of changes in foreign currency exchange rates

Compared to most of the currencies of the foreign countries in which we operate, the U.S. dollar was stronger during the second quarter and first half of 2012 than it was during the comparable 2011 periods. Because our revenues and local expenses are recorded in the functional currencies of our operating entities, amounts we earned for the second quarter and first half of 2012 reflected a negative impact due to the weaker foreign currencies. Considering the results by country and the associated functional currency, we estimate that our consolidated operating income for the second quarter and first half of 2012 was approximately 11% and 8% lower, respectively, when compared to the same periods of 2011 as a result of changes in foreign currency exchange rates. If significant, in our discussion we will refer to the impact of fluctuations in foreign currency exchange rates in our comparison of operating segment results for the three- and six-month periods ended June 30, 2012 and 2011. To provide further perspective on the impact of foreign currency exchange rates, the following table shows the changes in currency values relative to the U.S. dollar from the second quarter and first half of 2011 to the same periods of 2012 for the countries and regions in which we have our most significant operations:

Currency (dollars per foreign currency)	Average Translation Rate			Average Translation Rate		
	Three Months Ended	Three Months Ended	Decrease Percent	Six Months Ended	Six Months Ended	Decrease Percent
	June 30, 2012	June 30, 2011		June 30, 2012	June 30, 2011

Table of Contents

Revenues

Our revenues for the second quarter and first half of 2012 increased when compared to the same periods of 2011, primarily due to an increase in the number of ATMs under management, including those added from 2011 acquisitions, and growth in value added services, including dynamic currency conversion. These increases were partly offset by the impact of the weaker foreign currencies in 2012. The increase for the first half was also partly offset by the \$1.2 million previously deferred revenue recognized in the first quarter of 2011 related to a customer discontinuing a certain product in Greece.

Average monthly revenue per ATM was \$1,160 for the second quarter and \$1,129 for the first half of 2012 compared to \$1,436 for the second quarter and \$1,395 for the first half of 2011. These decreases were primarily the result of ATM and transaction growth in India and Pakistan, where revenues per ATM and revenues per transaction are generally lower than those in Europe, and the impact of the weaker foreign currencies. Revenue per transaction was \$0.20 for the second quarter and \$0.19 for the first half of 2012 compared to \$0.22 each for the second quarter and the first half of 2011. These decreases were primarily due to transaction growth in India and Pakistan along with the impact of the weaker foreign currencies in 2012.

Direct operating costs

Direct operating costs consist primarily of site rental fees, cash delivery costs, cash supply costs, maintenance, insurance, telecommunications and the cost of data center operations-related personnel, as well as the processing centers' facility-related costs and other processing center-related expenses. Direct operating costs increased in the second quarter and first half of 2012 compared to the same periods of 2011, primarily due to the increase in the number of ATMs under management, partly offset by the impact of the weaker foreign currencies.

Gross profit

Gross profit, which is calculated as revenues less direct operating costs, was \$30.1 million for the second quarter and \$54.3 million for the first half of 2012 compared to \$27.0 million for the second quarter and \$49.3 million for the first half of 2011. The increase for the second quarter of 2012 was primarily due to the increase in ATMs under management and the growth in value added services, partly offset by the impact of the weaker foreign currencies. The increase for the first half of 2012 was also partly offset by the additional revenue recognized in Greece in the first quarter of 2011. Gross profit as a percentage of revenues ("gross margin") was 52% for the second quarter and 50% for the first half of 2012 compared to 54% for the second quarter and 52% for the first half of 2011; these decreases were largely due to the greater number of newly installed ATMs in the second quarter and first half of 2012 compared to the same periods of 2011.

Salaries and benefits

The increases in salaries and benefits for the second quarter and first half of 2012 was primarily due to adding employees to support the growth in ATMs under management, including those obtained through acquisitions, partly offset by the impact of the weaker foreign currencies. As a percentage of revenues, these costs decreased to 14.4% for the second quarter and 14.6% for the first half of 2012 compared to 15.9% for the second quarter and 15.7% for the first half of 2011; these decreases resulted from revenue growth that did not require similar increases in support costs.

Selling, general and administrative

The increases in selling, general and administrative expenses for the second quarter and first half of 2012 compared to the same periods of 2011 was primarily due to increased costs in growing markets, including those in which acquisitions were made in the past year. These increases were partly offset by the impact of the weaker foreign currencies. As a percentage of revenues, selling, general and administrative expenses decreased to 8.6% for the second quarter and 9.2% for the first half of 2012 from 8.9% for the second quarter and 9.3% for the first half of 2011. These decreases were primarily due to the growth in value added services, including dynamic currency conversion.

Depreciation and amortization

Depreciation and amortization expense increased for the second quarter and first half of 2012 compared to the same periods of 2011, primarily due to the increase in ATMs under management and the amortization of intangible assets related to recent acquisitions, partly offset by the impact of the weaker foreign currencies. As a percentage of revenues, depreciation and amortization expense increased to 10.8% for the second quarter and 11.3% for the first half of 2012 compared to 10.4% for the second quarter and 10.7% for the first half of 2011, mainly as a result of the

amortization of intangible assets related to recent acquisitions.

Table of Contents

Operating income

Operating income increased for the second quarter and first half of 2012 compared to the same periods of 2011, primarily due to an increase in ATMs under management and growth in value added services, including dynamic currency conversion, partly offset by the impact of the weaker foreign currencies. The increase for the first half of 2012 was also partly offset by the additional revenue recognized in Greece in the first quarter of 2011. Operating income per transaction was \$0.04 for both the second quarter of 2012 and 2011 and \$0.03 for both the first half of 2012 and 2011. Operating income as a percentage of revenues (“operating margin”) decreased to 17.7% for the second quarter and 15.1% for the first half of 2012 compared to 18.2% for the second quarter and 16.2% for the first half of 2011. These decreases reflect the increase in amortization of intangible assets related to recent acquisitions and the transaction growth in India, where the revenues per ATM and revenues per transaction are generally lower than Europe. The decrease for the first half of 2012 also reflects the additional revenues recognized in Greece in the first quarter of 2011.

EPAY SEGMENT

The following table presents the results of operations for the three- and six-month periods ended June 30, 2012 and 2011 for our epay Segment:

	Three Months Ended		Year-over-Year			Six Months Ended		Year-over-Year		
	June 30,		Change			June 30,		Change		
	2012	2011	Increase (Decrease)	Increase (Decrease)		2012	2011	Increase (Decrease)	Increase (Decrease)	
(dollar amounts in thousands)	2012	2011	Amount	Percent		2012	2011	Amount	Percent	
Total revenues	\$166,671	\$156,479	\$10,192	7 %		\$343,014	\$311,592	\$31,422	10 %	
Operating expenses:										
Direct operating costs	127,993	118,554	9,439	8 %		263,186	238,465	24,721	10 %	
Salaries and benefits	12,428	11,521	907	8 %		25,692	21,940	3,752	17 %

Transactions processed (millions)	272	264	8	3 %		538	507	31	6 %	

Revenues

The increase in revenues for the second quarter and first half of 2012 compared to the same periods of 2011 was primarily due to the impact of our third quarter 2011 acquisition of cadooz Holding GmbH (“cadooz”) and an increase in transactions processed in Germany – mainly from increased demand for non-mobile products – and the U.S. These increases were partly offset by revenue declines in Australia, Brazil, Spain and the U.K., as well as the impact of the weaker foreign currencies. Revenues in Brazil decreased for the second quarter and first half of 2012 compared to the same period of 2011 due to certain mobile operators modifying their distribution strategies beginning in the fourth quarter of 2011. These mobile operator changes are expected to negatively impact revenues for the remainder of 2012. The revenue declines in Spain and the U.K. were mostly driven by economic and competitive pressures. Revenues in Australia decreased for the second quarter and first half of 2012 compared to the same periods of 2011 primarily due to the impact of certain large retailers entering into direct agreements with two mobile operators during the second half of 2011.

In certain markets, our revenues have declined or growth has slowed due to mobile phone operators driving competitive reductions in commissions or removing us from the airtime distribution chain by using alternative distribution strategies, as well as overall economic conditions impacting customers' buying decisions. We expect most of our future revenue growth to be derived from: (i) additional electronic payment products sold over the base of POS

terminals, (ii) developing markets or markets in which there is organic growth in the electronic top-up sector overall, and (iii) acquisitions, if available and commercially appropriate.

Revenues per transaction were \$0.61 for the second quarter and \$0.64 for the first half of 2012 compared to \$0.59 for the second quarter and \$0.61 for the first half of 2011. The increase in revenues per transaction was mainly due to the impact of cadooz transactions, which are recorded at gross value, in contrast to our other electronic payment products which are recorded at net value. This increase was partly offset by the impact of the weaker foreign currencies and other changes in the mix of transactions, particularly due to growth in India, and our ATX subsidiary. ATX and India provide only transaction processing

Table of Contents

services without significant direct costs and other operating costs related to installing and managing terminals; therefore, the revenues we recognize from these transactions are a fraction of those recognized on average transactions, but with strong contribution to gross profit.

Direct operating costs

Direct operating costs in the epay Segment include the commissions we pay to retail merchants for the distribution and sale of prepaid mobile airtime and other prepaid products, as well as expenses required to operate POS terminals, and the cost of vouchers sold and physical gifts fulfilled. The increase in direct operating costs was primarily attributable to the impact of cadooz transactions, as well as the growth in transactions in Germany and the U.S., partly offset by the decrease in the number of transactions processed in Australia, Brazil, and Spain, lower commission costs in the U.K. and the impact of the weaker foreign currencies.

Gross profit

Gross profit, which represents revenues less direct costs, was \$38.7 million for the second quarter and \$79.8 million for the first half of 2012 compared to \$37.9 million for the second quarter and \$73.1 million for the first half of 2011. The primary factors behind the increase in gross profit are the impact of cadooz transactions and the increased transaction volumes in Germany – mainly from increased demand for non-mobile products – and the U.S. These increases were partly offset by a decline in transaction volume in Australia, Brazil, and Spain and the impact of weaker foreign currencies. Gross margin declined to 23% for the second quarter of 2012 from 24% in the same period of 2011, reflecting the impact of the cadooz transactions and lower gross margins in Brazil and Spain. Gross margin was flat at 23% for both the first half of 2012 and 2011. Gross profit per transaction was flat at \$0.14 for the second quarter of 2012 and 2011. Gross profit per transaction increased to \$0.15 for the first half of 2012 compared to \$0.14 for the first half of 2011. This increase reflects the impact of cadooz transactions, partly offset by the impact of weaker foreign currencies and a higher percentage of lower profit transactions.

Salaries and benefits

The increase in salaries and benefits for the second quarter and first half of 2012 compared to the same periods of 2011 was primarily due to the impact of the cadooz acquisition, growth of sales staff and additional headcount to support development of new products and growing markets, partly offset by the impact of the weaker foreign currencies. As a percentage of revenues, salaries and benefits increased to 7.5% for both the second quarter and the first half of 2012 from 7.4% for the second quarter and 7.0% the first half of 2011. These increases were primarily due to a decrease in revenues in Australia and Brazil for the first half of 2012 compared to the same period of 2011.

Selling, general and administrative

The increase in selling, general and administrative expenses for the second quarter and first half of 2012 compared to the same periods of 2011 was mainly due to the impacts of the cadooz acquisition and increased bad debt expense in certain countries, partly offset by the impact of the weaker foreign currencies. As a percentage of revenues, these expenses increased to 6.7% for the second quarter and 6.1% for the first half of 2012 from 5.4% for the second quarter and 5.0% for the first half of 2011, primarily because of the decreases in epay Australia's and epay Spain's revenues for the second quarter and first half of 2012. The increase for the second quarter of 2012 was also due to the increase in bad debt expense compared to the second quarter of 2011.

Depreciation and amortization

Depreciation and amortization expense primarily represents amortization of acquired intangible assets and the depreciation of POS terminals we install in retail stores. Depreciation and amortization expense increased for the second quarter and first half of 2012 compared to the same periods of 2011 mainly due to the impact of the cadooz acquisition, including amortization of acquired intangible assets, and the addition of POS terminals in growing markets. These increases were partly offset by decreased expense in markets where acquired intangible assets became fully amortized, as well as the impact of the weaker foreign currencies. As a percentage of revenues, these expenses increased slightly to 3.0% for both the second quarter and the first half of 2012 from 2.9% in the same periods of 2011.

Operating income

The decrease in operating income for the second quarter and first half of 2012 compared to the same periods of 2011 was primarily due to transaction volume and revenue declines in Australia, Brazil, and Spain, and the impact of the

weaker foreign currencies. The declines in volume and revenue in Brazil were due to certain mobile operators modifying their distribution strategies beginning in the fourth quarter of 2011. These mobile operator changes are expected to negatively impact revenues for the remainder of 2012. The declines in volume and revenue in Spain were mostly driven by economic and competitive pressures. In addition, the declines in volume and revenues in Australia were due to certain large retailers entering into direct

Table of Contents

agreements with two mobile operators during the second half of 2011. These decreases were partly offset by increases in transaction volumes in the U.S. and Germany and the impact of the cadooz acquisition. Operating margin was 6.0% for the second quarter and 6.8% for the first half of 2012 compared to 8.6% for the second quarter and 8.5% for the first half of 2011. These decreases were primarily due to the inclusion of cadooz revenues at gross value and the increase in bad debt expense. Also contributing to these decreases were the revenue declines in Australia, Brazil, and Spain for both the second quarter and first half of 2012 compared to 2011. Operating income per transaction declined to \$0.04 for both second quarter and first half of 2012 and compared to \$0.05 for the same periods of 2011, primarily due to the declines in operating income discussed above.

As discussed earlier, in our epay Brazil operations, operating expenses have increased significantly and revenues are expected to be negatively impacted by certain mobile operators' distribution strategies throughout 2012. To regain our desired profitability in Brazil, we are adjusting our strategy and making changes in the business to better align costs with its revenues. Additionally, we expect to introduce other electronic payment products in this market during 2013 to increase revenues. However, if we are unable to achieve adequate profitability within epay Brazil in the longer term, it is possible that the goodwill or other acquired intangible assets of this reporting unit could become impaired.

MONEY TRANSFER SEGMENT

The following tables present the results of operations for the three- and six-month periods ended June 30, 2012 and 2011 for the Money Transfer Segment:

	Three Months Ended June 30,		Year-over-Year Change			Six Months Ended June 30,		Year-over-Year Change		
	2012	2011	Amount	Percent		2012	2011	Amount	Percent	
(dollar amounts in thousands)										
Total revenues	\$77,483	\$73,005	\$4,478	6	%	\$148,918	\$136,182	\$12,736	9	%
Operating expenses:										
Direct operating costs	36,438	33,497	2,941	9	%	69,643	62,464	7,179	11	%
Salaries and benefits	18,442	17,360	1,082	6	%	36,617	33,365	3,252	10	%
Selling, general and administrative	11,291	12,166	(875)	(7)	%	22,328	22,187	141	1	%
Depreciation and amortization	4,638	4,960	(322)	(6)	%	9,358	10,374	(1,016)	(10)	%
Total operating expenses	70,809	67,983	2,826	4	%	137,946	128,390	9,556	7	%
Operating income	\$6,674	\$5,022	\$1,652	33	%	\$10,972	\$7,792	\$3,180	41	%
Transactions processed (millions)	7.4	6.1	1.3	21	%	14.1	11.4	2.7	24	%

Revenues

The increase in revenues for the second quarter and first half of 2012 compared to the same periods of 2011 was primarily due to increase in the number of transactions processed and growth in other products such as mobile top-up, check cashing and bill payment, partly offset by the impact of the weaker foreign currencies. The growth in transactions processed was driven by a 10% and 12% increase in money transfers, including a 11% and 13% increase from the U.S. and 9% and 10% from non-U.S. markets in the second quarter and first half of 2012, respectively. The increase in transfers from the U.S. was primarily the result of the continued recovery of U.S. to Mexico money transfer activity and the expansion of the number of company-owned stores and agents. The increase in transfers from non-U.S. markets was due to the expansion of our agent and correspondent payout networks.

Revenues per transaction decreased to \$10.47 for the second quarter and \$10.56 for the first half of 2012 from \$11.97 for the second quarter and \$11.95 for the first half of 2011. The growth rate of transactions exceeded the revenue growth rate for the second quarter and first half of 2012 compared to the same periods of 2011, largely because of the increase in the number of non-money transfer transactions, which generate considerably lower revenues per transaction than money transfers, and the impact of the weaker foreign currencies.

Direct operating costs

Direct operating costs in the Money Transfer Segment primarily represent commissions paid to agents who originate money transfers on our behalf and correspondent agents who disburse funds to the customers' destination beneficiary, together with less significant costs, such as telecommunication costs and bank depository fees. The increase in direct operating costs in the second quarter and first half of 2012 compared to the same periods of 2011 was primarily due to the growth in transactions

Table of Contents

processed.

Gross profit

Gross profit, which represents revenues less direct costs, was \$41.0 million for the second quarter and \$79.3 for the first half of 2012 compared to \$39.5 million for the second quarter and \$73.7 million for the first half of 2011. These increases were primarily due to the growth in money transfer transactions and the addition of new products. Gross margin was 53% for both the second quarter and first half of 2012 compared to 54% for the same periods of 2011. These declines were primarily due to the increase in the number of non-money transfer transactions, which generate considerably lower revenues and margin per transaction than money transfers.

Salaries and benefits

The increase in salaries and benefits for the second quarter and first half of 2012 compared to the same periods of 2011 was due to the increased expenditures we incurred to support expansion of our operations in the U.S and internationally. As a percentage of revenues, salaries and benefits remained flat at 23.8% for the second quarter of 2012 compared to the same period of 2011. For the first half of 2012 salaries and benefits as a percentage of revenues increased slightly to 24.6% from 24.5% in same period of 2011.

Selling, general and administrative

Selling, general and administrative expenses decreased for the second quarter of 2012 compared to the same period of 2011, primarily as the result of cost control measures implemented during second quarter of 2012, both in the U.S. and internationally, and the impact of weaker foreign currencies. Selling, general and administrative expenses increased slightly for the first half of 2012 compared to the same period of 2011 primarily due to first quarter costs for expansion being largely offset by the cost control measures discussed above implemented during second quarter of 2012. As a percentage of revenues, selling, general and administrative expenses decreased to 14.6% for the second quarter and 15.0% for the first half of 2012 from 16.7% for the second quarter and 16.3% for the first half of 2011, primarily due to the decrease in expenditures for the second quarter of 2012 discussed above combined with the increases in revenues.

Depreciation and amortization

Depreciation and amortization primarily represents amortization of acquired intangible assets and depreciation of money transfer terminals, computers and software, leasehold improvements and office equipment. For the second quarter and first half of 2012, depreciation and amortization decreased compared to the same periods in 2011, primarily as a result of certain acquired intangible assets becoming fully amortized at the end of the first quarter of 2012 and 2011. As a percentage of revenues, depreciation and amortization decreased to 6.0% for the second quarter and 6.3% for the first half of 2012 from 6.8% for the second quarter and 7.6% for the first half of 2011, primarily due to the decrease in depreciation and amortization discussed above combined with the increases in revenues.

Operating income

Operating income increased by \$1.7 million for the second quarter and \$3.2 million for the first half of 2012 compared to the same periods of 2011. These increases reflect the growth in transactions processed, the acquired intangible assets becoming fully amortized and the addition of new products, partly offset by increased salaries and benefits expense. As a result, operating margin increased to 8.6% for the second quarter and 7.4% for the first half of 2012 from 6.9% for the second quarter and 5.7% for the first half of 2011, while operating income per transaction increased to \$0.90 for the second quarter and \$0.78 for the first half of 2012 from \$0.82 for the second quarter and \$0.68 for the first half of 2011.

CORPORATE SERVICES

The following table presents the operating expenses for the three- and six-month periods ended June 30, 2012 and 2011 for Corporate Services:

Table of Contents

(dollar amounts in thousands)	Three Months Ended June 30,		Year-over-Year Change			Six Months Ended June 30,		Year-over-Year Change		
	2012	2011	(Decrease) Increase Amount	(Decrease) Increase Amount	(Decrease) Increase Percent	2012	2011	(Decrease) Increase Amount	(Decrease) Increase Percent	
Salaries and benefits	\$5,531	\$6,851	\$(1,320)	(19)%		\$11,011	\$9,867	\$1,144	12 %	
Selling, general and administrative	1,506	1,962	(456)	(23)%		3,627	3,678	(51)	(1)%	
Depreciation and amortization	114	85	29	34 %		202	169	33	20 %	
Total operating expenses	\$7,151	\$8,898	\$(1,747)	(20)%		\$14,840	\$13,714	\$1,126	8 %	
Corporate operating expenses										

Overall, operating expenses for Corporate Services decreased for the second quarter of 2012 compared to the same period of 2011, mostly due to a decrease in salaries and benefits and selling, general, and administration expenses. The decrease in salaries and benefits was primarily the result of lower share-based compensation and bonus expense due to poorer performance relative to the award criteria. The decrease in selling, general and administrative expenses was due mainly to lower professional fees. Operating expenses for Corporate Services increased for the first half of 2012 compared to the same period of 2011, mostly due to an overall increase in salaries and benefits expenses. This increase was primarily the result of an increase in share-based compensation expense recognized in the first quarter of 2012 compared to 2011, partly offset by a decrease in bonus expense.

Interest income

The decrease in interest income for the second quarter of 2012 compared to the same period of 2011 was primarily due to less interest earned on overnight deposits in Australia and Brazil and the impact of weaker foreign currencies, partly offset by an increase in interest earned on overnight deposits in Poland that began in the second half of 2011. The increase in interest income for the first half of 2012 compared to the same period of 2011 was primarily due to the increase in interest earned in Poland, as discussed above, exceeding the decreases in interest income earned in Australia and Brazil during the first quarter of 2012, partly offset by the impact of weaker foreign currencies.

Interest expense

The increase in interest expense for the second quarter and first half of 2012 from the same periods of 2011 was primarily related to having larger amounts outstanding under the credit facility during both periods of 2012 than during the same periods of 2011.

Income from unconsolidated affiliates

Income from unconsolidated affiliates primarily represents the equity in income of our 40% equity investment in epay Malaysia and our 49% investment in Euronet Middle East during 2011 before our acquisition of the remaining 51% interest in January 2012. The decrease in income from unconsolidated affiliates was nearly all the result of consolidating Euronet Middle East's results beginning in January 2012.

Table of Contents

Legal Settlement

In the first quarter of 2011, we recorded a \$1.0 million gain from the settlement of a class action lawsuit related to losses on MoneyGram International, Inc. stock we formerly held.

Other (losses) gains, net

In the second quarter and first half of 2012, we recorded an investment in marketable securities at fair value which resulted in a loss of \$0.15 million and \$0.2 million, respectively.

Additionally, our acquisition of the remaining 51% interest in Euronet Middle East in January 2012 resulted in Euronet obtaining control of the entity and, therefore, was considered a business combination. Accordingly, we valued all assets and liabilities at fair value which resulted in a \$4.4 million gain on the increase of the book value of the 49% interest previously owned.

Foreign currency exchange (loss) gain, net

Assets and liabilities denominated in currencies other than the local currency of each of our subsidiaries give rise to foreign currency exchange gains and losses. Exchange gains and losses that result from re-measurement of these assets and liabilities are recorded in determining net income. The majority of our foreign currency gains or losses are due to the re-measurement of intercompany loans, which are not long-term in nature, that are in a currency other than the functional currency of one of the parties to the loan. For example, we make intercompany loans based in euros from our corporate division, which is comprised of U.S. dollar functional currency entities, to certain European entities that use the euro as the functional currency. As the U.S. dollar strengthens against the euro, foreign currency losses are generated on our corporate entities because the number of euros to be received in settlement of the loans decreases in U.S. dollar terms. Conversely, in this example, in periods where the U.S. dollar weakens, our corporate entities will record foreign currency gains.

We recorded a net foreign currency exchange loss of \$4.8 million in the second quarter and \$2.7 million in the first half of 2012 compared to a net foreign currency exchange gain of \$3.7 million in the second quarter and \$12.9 million in the first half of 2011. These realized and unrealized foreign currency exchange gains and losses reflect the respective weakening and strengthening of the U.S. dollar against most of the currencies of the countries in which we operate during the respective periods.

INCOME TAX EXPENSE

Our effective tax rates as reported and as adjusted are calculated below:

	Three Months Ended June 30,		Six Months Ended June 30,	
(dollar amounts in thousands)	2012	2011	2012	2011
Income before income taxes	\$10,913	\$19,119	\$29,378	\$42,875
Income tax expense	(5,187)	(6,825)	(10,554)	(12,950)
Net income	\$5,726	\$12,294	\$18,824	\$29,925
Effective income tax rate	47.5	% 35.7	% 35.9	% 30.2
Income before income taxes	\$10,913	\$19,119	\$29,378	\$42,875
Adjust: Foreign currency exchange (loss) gain, net	(4,792)	3,652	(2,656)	12,937
Adjust: Other (loss) gains, net	(154)	—	4,171	—

--	------	---	------	---	------	---	------	---

27

Table of Contents

Our effective tax rates were 47.5% and 35.7% for the three-month periods ended June 30, 2012 and 2011, respectively, and were 35.9% and 30.2% for the six-month periods ended June 30, 2012 and 2011. The effective tax rates were significantly influenced by the foreign currency exchange gains and losses and other non-operating gains and losses in the respective periods. Excluding these items from pre-tax income, as well as the related tax effects for these items, our effective tax rates were 33.6% and 44.2% for the three months ended June 30, 2012 and 2011, respectively, and were 38.1% and 44.5% for the six months ended June 30, 2012 and 2011, respectively.

The effective tax rate, as adjusted, for the second quarter of 2012 was lower than the applicable statutory rate of 35% primarily because of the recognition of previously unrecognized tax benefits and tax return true-ups in foreign jurisdictions. The effective tax rate, as adjusted, for the first half of 2012 was higher than the applicable statutory rate of 35% primarily because of our U.S. income tax positions, partly offset by the recognition of previously unrecognized tax benefits and tax return true-ups in foreign jurisdictions. For the six-month period ended June 30, 2012, we have recorded a valuation allowance against our U.S. income tax net operating losses as it is more likely than not that a tax benefit will not be realized. Accordingly, the income tax benefits associated with pre-tax book losses generated by our U.S. entities have not been recognized in these periods.

The decrease in the effective tax rate, as adjusted, for the second quarter and first half of 2012 from the same periods of 2011 was primarily due to a smaller proportion of the Company's income being earned in countries with higher tax rates. The recognition of previously unrecognized tax benefits and tax return true-ups in foreign jurisdictions in the second quarter and first half of 2012 provided further reductions to the effective tax rate.

Income from continuing operations before income taxes, as adjusted, income tax expense, as adjusted and effective income tax rate, as adjusted are non-GAAP financial measures that management believes are useful for understanding why our effective tax rates are significantly different than would be expected.

NET INCOME OR LOSS ATTRIBUTABLE TO NONCONTROLLING INTERESTS

The net loss attributable to noncontrolling interests was \$0.02 million for the second quarter and \$0.1 million for the first half of 2012 compared to net income attributable to noncontrolling interests of \$0.4 million for the second quarter and \$0.8 million for the first half of 2011. These losses were primarily due to decreased profitability at our Movilcarga and ATX subsidiaries. Noncontrolling interests represents the elimination of net income or loss attributable to the minority shareholders' portion of the following consolidated subsidiaries that are not wholly owned:

Subsidiary	Percent Owned	Segment - Country
Movilcarga	80	% epay - Spain
e-pay SRL	51	% epay - Italy
ATX	75.5	% epay - various
Euronet China	75	% EFT - China
Euronet Pakistan	70	% EFT - Pakistan

NET INCOME ATTRIBUTABLE TO EURONET WORLDWIDE, INC.

Net income attributable to Euronet Worldwide, Inc. was \$5.7 million for the second quarter and \$18.9 million for first half of 2012 compared to \$11.9 million for the second quarter and \$29.2 million for the first half of 2011. As more fully discussed above, the decrease in net income of \$10.3 million for the first half of 2012 as compared to the same period in 2011 was primarily the result of a foreign currency exchange loss of \$2.7 million in the first half of 2012 compared to a gain of \$12.9 million in the same period of 2011, a \$0.3 million decrease in operating income, and the recognition of a gain on settlement of \$1.0 million during the first quarter of 2011. These decreases were partly offset by a \$4.2 million increase in other non-operating gains, a \$2.4 million decrease in income tax expense and the \$0.9 million decrease in net income attributable to noncontrolling interests. Other items decreased net income by \$0.9 million during the first half of 2012 compared to the same period of 2011.

LIQUIDITY AND CAPITAL RESOURCES

Working capital

As of June 30, 2012, we had negative working capital, which is calculated as the difference between total current assets and total current liabilities, of \$18.4 million, compared to negative working capital of \$20.5 million as of December 31, 2011. Our ratio of current assets to current liabilities was 0.97 at both June 30, 2012 and December 31, 2011. The increase in working capital was primarily due to working capital produced by operations during the first half of 2012, mostly offset by the acquisition of Euronet Middle East, repayments of borrowings under the revolving credit facility and capital expenditures. Working capital was negative June 30, 2012 and December 31, 2011, primarily due to the inclusion in current maturities of long-term debt of \$169.1 million and \$165.2 million, respectively, the of 3.50% convertible debentures. Holders of the debentures have the option to require us to purchase their debentures at par on October 15, 2012, 2015 and 2020. As of June 30, 2012, the convertible price per share is significantly greater than the current trading value of the Company's stock; therefore, we expect the bondholders to exercise their option on October 15, 2012. We believe we will have sufficient cash on hand and amounts available under our revolving credit facility to fund these required repurchases as well as our other current obligations. We require substantial working capital to finance operations. The Money Transfer Segment funds the correspondent distribution network before receiving the benefit of amounts collected from customers by agents. Working capital needs

Table of Contents

increase due to weekends and international banking holidays. As a result, we may report more or less working capital for the Money Transfer Segment based solely upon the day on which the reporting period ends. As of June 30, 2012, working capital in the Money Transfer Segment was \$77.5 million. We expect that working capital needs will increase as we expand this business. The epay Segment produces positive working capital, but much of it is restricted in connection with the administration of its customer collection and vendor remittance activities. The EFT Processing Segment does not require substantial working capital.

We had cash and cash equivalents of \$178.6 million at June 30, 2012, of which \$131.8 million was held outside of the United States and is expected to be indefinitely reinvested for continued use in foreign operations. Repatriation of these assets to the U.S. could have negative tax consequences.

Operating cash flow

Cash flows provided by operating activities were \$61.7 million for the first half of 2012 compared to \$55.9 million for the first half of 2011. The increase was primarily due to improved operating results as adjusted for non-cash charges, as well as fluctuations in working capital mainly associated with the timing of the settlement processes with mobile operators in the epay Segment and with correspondents in the Money Transfer Segment.

Investing activity cash flow

Cash flows used in investing activities were \$32.4 million for the first half of 2012 compared to \$21.3 million for the first half of 2011. During the first half of 2012, we used \$5.9 million for acquisitions compared to \$3.4 million in the first half of 2011. Purchases of property and equipment used \$24.8 million and \$16.7 million of cash for the first half of 2012 and 2011, respectively. Additionally, cash used for other investing activities totaled \$1.8 million and \$1.1 million for the first half of 2012 and 2011, respectively.

Financing activity cash flow

Cash flows used in financing activities were \$20.0 million during the first half of 2012 compared to \$5.6 million during the first half of 2011. Our financing activities for the first half of 2012 consisted primarily of net repayments of debt obligations of \$21.1 million compared to \$2.6 million for the first half of 2011. To support the short-term cash needs of our Money Transfer Segment, we generally borrow amounts under our revolving credit facility several times each month to fund the correspondent network in advance of collecting remittance amounts from the agency network. These borrowings are repaid over a very short period of time, generally within a few days. As a result, during the first half of 2012 we had a total of \$179.7 million in borrowings and \$197.4 million in repayments under our revolving credit facilities. During the first half of 2012, we paid \$0.9 million in debt issuance costs associated with the amendment of our credit facility in 2011. In addition, during the first half of 2012 and 2011 we had \$2.0 million and \$1.0 million in repayments under our term loan, respectively. Additionally, for the six months ended June 30, 2012 and 2011, we paid \$1.4 million and \$1.6 million, respectively, for capital lease obligations. During the first half of 2011, we paid \$5.5 million in settlement of contingent consideration amounts recorded at the time of two different acquisitions. Further, we received \$1.9 million in proceeds from the issuance of shares for each of the periods ended June 30, 2012 and 2011.

Expected future financing and investing cash requirements primarily depend on our acquisition activity and related financing needs.

Other sources of capital

Credit Facility — We have a \$355 million senior secured credit facility (the "Credit Facility") consisting of a \$265 million five-year revolving credit facility, a \$10 million five-year India revolving credit facility and an \$80 million five-year term loan. The revolving credit facility allows for borrowings in U.S. dollars, euro, British pound sterling, Australian dollars and/or Indian rupees.

The \$265 million revolving credit facility contains a \$200 million sublimit for the issuance of letters of credit and a \$25 million sublimit for swingline loans. We use the revolving credit facility primarily to fund working capital requirements, which are expected to increase as we expand the Money Transfer business. Based on our current projected working capital requirements, we anticipate that our revolving credit facility will be sufficient to fund our working capital needs. Subject to certain conditions, we have the option to increase the Credit Facility by up to an additional \$205 million by requesting additional commitments from existing or new lenders. Fees and interest on borrowings vary based upon the Company's consolidated total leverage ratio (as defined in the Amended and Restated

Credit Agreement) and will be based, in the case of letter of credit fees, on a margin, and in the case of interest, on a margin over London Inter-Bank Offered Rate ("LIBOR") or a margin over the base rate, as selected by us, with the applicable margin ranging from 1.5% to 2.5% (or 0.5% to 1.5% for base rate loans). The base rate is the highest of (i) the Bank of America prime rate, (ii) the Federal Funds rate plus 0.50% or (iii) the Fixed LIBOR rate plus 1.00%. The term loan is subject to scheduled quarterly amortization payments, as set forth in the Amended and Restated

Table of Contents

Credit Agreement. The maturity date for the Credit Facility is August 18, 2016, at which time the outstanding principal balance and all accrued interest will be due and payable in full. Financing costs of \$4.5 million have been deferred and are being amortized over the terms of the respective loans.

As of June 30, 2012, we had borrowings of \$77.0 million outstanding under the term loan. We had \$69.3 million of borrowings and \$34.4 million of stand-by letters of credit outstanding under the revolving credit facility as of June 30, 2012. The remaining \$171.3 million under the revolving credit facility was available for borrowing. As of June 30, 2012, our weighted average interest rate was 2.7% under the revolving credit facility and 2.2% under the term loan, excluding amortization of deferred financing costs.

Short-term debt obligations — Short-term debt obligations at June 30, 2012 were primarily comprised of the \$169.1 million carrying value (\$171.4 million in principal) of the 3.5% convertible debentures because the initial put option occurs on October 15, 2012 (see description below). Additionally, we have \$5.5 million of payments due in the next twelve months under the term loan. Certain of our subsidiaries also have available credit lines and overdraft facilities to supplement short-term working capital requirements, when necessary, and there was \$1.0 million outstanding under these facilities as of June 30, 2012.

The \$171.4 million in principal amount of 3.50% Convertible Debentures Due 2025 is convertible into 4.2 million shares of Euronet common stock at a conversion price of \$40.48 per share upon the occurrence of certain events (relating to the closing prices of Euronet common stock exceeding certain thresholds for specified periods). The debentures may not be redeemed by us until October 20, 2012, but are redeemable at par at any time thereafter. Holders of the debentures have the option to require us to purchase their debentures at par on October 15, 2012, 2015 and 2020, or upon a change in control of the Company. On the maturity date, these debentures can be settled in cash or Euronet common stock, at our option, at predetermined conversion rates. These terms and other material terms and conditions applicable to the convertible debentures are set forth in the indenture agreement governing the debentures. Should holders of the 3.50% convertible debentures require us to repurchase their debentures on October 15, 2012, we believe we will have sufficient cash on hand and amounts available under our revolving credit facility to fund these required repurchases as well as our other current obligations.

Other uses of capital

Debt and equity repurchases — In August 2011, our Board of Directors authorized the repurchase of any of our convertible debentures and up to \$100 million or 5 million shares of our common stock. While we made no repurchases during the first half of 2012, we may repurchase such securities if prices provide attractive returns on capital.

Payment obligations related to acquisitions — A portion of the net assets acquired in the September 2011 acquisition of cadooz includes a liability for additional purchase price consideration based upon the level of revenues achieved by one of cadooz's subsidiaries for the three-year period ending in February 2014.

We have potential contingent obligations to the former owner of the net assets of Movilcarga. Based upon presently available information, we do not believe any additional payments will be required. The seller disputed this conclusion and initiated arbitration as provided for in the purchase agreement. An independent expert was engaged to review the results of the computation, but procedures for such review have never been commenced, principally because the seller is in a bankruptcy proceeding. Any additional payments, if ultimately determined to be owed the seller, will be recorded as additional goodwill and could be made in either cash or a combination of cash and Euronet common stock at our option.

Capital expenditures and needs — Total capital expenditures for the first half of 2012 were \$24.9 million. These capital expenditures were primarily for the purchase of ATMs in Poland and India, as well as office, data center and company store computer equipment and software, and POS terminals for the epay Segment. Total capital expenditures for 2012 are currently estimated to be approximately \$40 million to \$50 million.

In the epay Segment, approximately 129,000 of the approximately 617,000 POS devices that we operate are Company-owned, with the remaining terminals being operated as integrated cash register devices of our major retail customers or owned by the retailers. As our epay Segment expands, we will continue to add terminals in certain independent retail locations at a price of approximately \$300 per terminal. We expect the proportion of owned terminals to total terminals operated to remain relatively constant.

At current and projected cash flow levels, we anticipate that cash generated from operations, together with cash on hand and amounts available under our revolving credit facility and other existing and potential future financing will be sufficient to meet our debt, leasing, contingent acquisition and capital expenditure obligations. If our capital resources are not sufficient to meet these obligations, we will seek to issue additional debt and/or equity under terms acceptable to us. However, we can offer no assurances that we will be able to obtain favorable terms for the refinancing of any of our debt or other obligations or for the issuance of additional equity.

Table of Contents

Other trends and uncertainties

Although Euronet has no direct investments in European sovereign debt, we are indirectly exposed to its risks. Many of the customers of our EFT Processing Segment are banks who may hold investments in European sovereign debt. To the extent those customers are negatively impacted by those investments, they may be less able to pay amounts owed to us or renew service agreements with us. Further, to the extent that sovereign debt concerns depress economic activity, such concerns may negatively impact the number of transactions processed on our epay and money transfer networks, resulting in lower revenue.

Our Australia, Brazil and Spain epay businesses have recently experienced revenue declines as a result of changes in the distribution strategies of certain mobile operators in Australia and Brazil and a weak economy in Spain. Continued competitive and economic pressures in these markets may negatively impact the epay Segment's profitability in the near term.

Inflation and functional currencies

Generally, the countries in which we operate have experienced low and stable inflation in recent years. Therefore, the local currency in each of these markets is the functional currency. Currently, we do not believe that inflation will have a significant effect on our results of operations or financial position. We continually review inflation and the functional currency in each of the countries where we operate.

OFF BALANCE SHEET ARRANGEMENTS

On occasion, we grant guarantees of the obligations of our subsidiaries and we sometimes enter into agreements with unaffiliated third parties that contain indemnification provisions, the terms of which may vary depending on the negotiated terms of each respective agreement. Our liability under such indemnification provisions may be subject to time and materiality limitations, monetary caps and other conditions and defenses. As of June 30, 2012, there were no material changes from the disclosure in our Annual Report on Form 10-K for the year ended December 31, 2011. To date, we are not aware of any significant claims made by the indemnified parties or parties to whom we have provided guarantees on behalf of our subsidiaries and, accordingly, no liabilities have been recorded as of June 30, 2012. See also Note 10, Guarantees, to the unaudited consolidated financial statements included elsewhere in this report.

CONTRACTUAL OBLIGATIONS

As of June 30, 2012, there have been no material changes from the disclosures relating to contractual obligations contained in our Annual Report on Form 10-K for the year ended December 31, 2011.

FORWARD-LOOKING STATEMENTS

This document contains statements that constitute forward-looking statements within the meaning of section 27A of the Securities Act of 1933 and section 21E of the Securities Exchange Act of 1934 ("Exchange Act"). All statements other than statements of historical facts included in this document are forward-looking statements, including statements regarding the following:

- our business plans and financing plans and requirements;
- trends affecting our business plans and financing plans and requirements;
- trends affecting our business;
- the adequacy of capital to meet our capital requirements and expansion plans;
- the assumptions underlying our business plans;
- our ability to repay indebtedness;
- our estimated capital expenditures;

Table of Contents

the potential outcome of loss contingencies;
business strategy;
government regulatory action;
technological advances; and
projected costs and revenues.

Although we believe that the expectations reflected in these forward-looking statements are reasonable, we can give no assurance that these expectations will prove to be correct. Forward-looking statements are typically identified by the words believe, expect, anticipate, intend, estimate and similar expressions.

Investors are cautioned that any forward-looking statements are not guarantees of future performance and involve risks and uncertainties. Actual results may materially differ from those in the forward-looking statements as a result of various factors, including, but not limited to, conditions in world financial markets and general economic conditions, including economic conditions in specific countries and regions; technological developments affecting the market for our products and services; foreign currency exchange fluctuations; our ability to renew existing contracts at profitable rates; changes in laws and regulations affecting our business, including immigration laws, changes in our relationships with, or in fees charged by, our business partners, competition, the outcome of claims and other loss contingencies affecting the Company and those referred to above and as set forth and more fully described in Part I, Item 1A — Risk Factors of our Annual Report on Form 10-K for the year ended December 31, 2011. All forward-looking statements made in this Form 10-Q speak only as of the date of this report. We do not intend, and do not undertake, any obligation to update any forward looking statements to reflect future events or circumstances after the date of such statements.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Interest rate risk

As of June 30, 2012, our total debt outstanding was \$321.3 million. Of this amount, \$169.1 million, or 53% of our total debt obligations, relates to contingent convertible debentures having a fixed coupon rate. Our \$171.4 million principal amount of contingent convertible debentures, issued in October 2005, accrue cash interest at a rate of 3.50% of the principal amount per annum. Based on quoted market prices, as of June 30, 2012, the fair value of our fixed rate convertible debentures was \$171.2 million, compared to a carrying value of \$169.1 million. Interest expense for these debentures, including accretion and amortization of deferred debt issuance costs, has a weighted average interest rate of 8.4% annually. Additionally, approximately \$5.0 million, or 1% of our total debt obligations, relates to capitalized leases with fixed payment and interest terms that expire between 2012 and 2015.

The remaining \$147.2 million, or 46% of our total debt obligations, relates to debt that accrues interest at variable rates. If we were to maintain these borrowings for one year and maximize the potential borrowings available under the revolving credit facility for one year, a 1% (100 basis points) increase in the applicable interest rate would result in additional annual interest expense to the Company of approximately \$3.1 million.

Our excess cash is invested in instruments with original maturities of three months or less or in certificates of deposit that may be withdrawn at any time without penalty; therefore, as investments mature and are reinvested, the amount we earn will increase or decrease with changes in the underlying short-term interest rates.

Foreign currency exchange rate risk

For the six-month period ended June 30, 2012, 77% of our revenues were generated in non-U.S. dollar countries and we expect to continue generating a significant portion of our revenues in countries with currencies other than the U.S. dollar.

We are particularly vulnerable to fluctuations in exchange rates of the U.S. dollar to the currencies of countries in which we have significant operations, primarily the euro, British pound, Australian dollar, Polish zloty, Brazilian real and Indian rupee. As of June 30, 2012, we estimate that a 10% fluctuation in these foreign currency exchange rates would have the combined annualized effect on reported net income and working capital of approximately \$35 million to \$40 million. This effect is estimated by applying a 10% adjustment factor to our non-U.S. dollar results from operations, intercompany loans that generate foreign currency gains or losses and working capital balances that require translation from the respective functional currency to the U.S. dollar reporting currency. Additionally, we have

other non-current, non-U.S. dollar assets and liabilities on our balance sheet that are translated to the U.S. dollar during consolidation. These items primarily represent goodwill and intangible assets recorded in connection with acquisitions in countries other than the U.S. We estimate that a 10% fluctuation in foreign currency exchange rates would have a non-cash impact on total comprehensive income of approximately \$50 million to \$55 million as a result of the change in value of these items during translation to the U.S. dollar. For the fluctuations described above, a strengthening U.S. dollar produces a financial loss, while a weakening U.S. dollar produces a financial gain. We believe this

Table of Contents

quantitative measure has inherent limitations and does not take into account any governmental actions or changes in either customer purchasing patterns or our financing or operating strategies. Because a majority of our revenues and expenses are incurred in the functional currencies of our international operating entities, the profits we earn in foreign currencies are positively impacted by the weakening of the U.S. dollar and negatively impacted by the strengthening of the U.S. dollar. Additionally, our debt obligations are primarily in U.S. dollars; therefore, as foreign currency exchange rates fluctuate, the amount available for repayment of debt will also increase or decrease.

We are also exposed to foreign currency exchange rate risk in our Money Transfer Segment. A majority of the money transfer business involves receiving and disbursing different currencies, in which we earn a foreign currency spread based on the difference between buying currency at wholesale exchange rates and selling the currency to consumers at retail exchange rates. This spread provides some protection against currency fluctuations that occur while we are holding the foreign currency. Our exposure to changes in foreign currency exchange rates is limited by the fact that disbursement occurs for the majority of transactions shortly after they are initiated. Additionally, we enter into foreign currency forward contracts primarily to help offset foreign currency exposure related to the notional value of money transfer transactions collected in currencies other than the U.S. dollar. As of June 30, 2012, we had foreign currency forward contracts outstanding with a notional value of \$80.6 million, primarily in euros and Mexican pesos, that were not designated as hedges and mature in a weighted average of 3 days. The fair value of these forward contracts as of June 30, 2012 was an unrealized loss of \$0.6 million, which was partly offset by the unrealized gain on the related foreign currency receivables.

ITEM 4. CONTROLS AND PROCEDURES

Our executive management, including our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Rule 13a-15(b) under the Exchange Act as of June 30, 2012. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that the design and operation of these disclosure controls and procedures were effective as of such date to provide reasonable assurance that information required to be disclosed in our reports under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosures.

CHANGE IN INTERNAL CONTROLS

There has been no change in our internal control over financial reporting during the second quarter of 2012 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II—OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

The Company is, from time to time, a party to litigation arising in the ordinary course of its business.

The discussion regarding contingencies in Part I, Item 1 — Financial Statements, Note 12, Litigation and Contingencies, to the unaudited consolidated financial statements in this report included elsewhere in this report is incorporated herein by reference.

Currently, there are no other legal proceedings that management believes, either individually or in the aggregate, would have a material adverse effect upon the consolidated results of operations or financial condition of the Company. In accordance with U.S. GAAP, we record a liability when it is both probable that a liability has been incurred and the amount of the loss can be reasonably estimated. These provisions are reviewed at least quarterly and adjusted to reflect the impacts of negotiations, settlements, rulings, advice of legal counsel, and other information and events pertaining to a particular case or matter.

ITEM 1A. RISK FACTORS

You should carefully consider the risks described in Part I, Item 1A. Risk Factors in our Annual Report on Form 10-K for the fiscal year ended December 31, 2011, as may be updated in our subsequent filings with the SEC, before

making an investment decision. The risks and uncertainties described in our Annual Report on Form 10-K, as may be updated by any subsequent Quarterly Reports on Form 10-Q, are not the only ones facing our Company. Additional risks and uncertainties not presently known to us or that we currently deem immaterial may also impair our business operations. If any of the risks identified in our Annual Report on Form 10-K, as may be updated by any subsequent Quarterly Reports on Form 10-Q, actually occurs, our business, financial condition or results of operations could be materially adversely affected. In that case, the trading price of our common stock could decline substantially. This Quarterly Report also contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in the forward-looking statements as a

Table of Contents

result of a number of factors, including the risks described in our Risk Factors and elsewhere in this Quarterly Report. Other than as set forth below, there have been no material changes from the risk factors previously disclosed in the Company's Annual Report on Form 10-K for the year ended December 31, 2011, as filed with the SEC.

Our operating results depend in part on the volume of transactions on ATMs in our network and the fees we can collect from processing these transactions. We generally have little control over the ATM transaction fees established in the markets where we operate, and therefore, cannot control any potential reductions in these fees.

Transaction fees from banks, customers and international card organizations for transactions processed on our ATMs have historically accounted for a substantial majority of our revenues. These fees are set by agreement among all banks in a particular market. The future operating results of our ATM business depend on the following factors:

• the increased issuance of credit and debit cards;

• the increased acceptance of our ATM processing and management services in our target markets;

• the maintenance of the level of transaction fees we receive;

• the installation of larger numbers of ATMs;

• the continued use of our ATMs by credit and debit cardholders;

• our ability to generate revenues from interchange fees and from other value added services, including dynamic currency conversion; and

• our ability to adjust to changes in the regulatory environment affecting our ATM business and the various value added services we provide via our ATM network.

The amount of fees we receive per transaction is set in various ways in the markets in which we do business. We have card acceptance agreements or ATM management agreements with some banks under which fees are set. However, we derive the bulk of our revenues in most markets from interchange fees, surcharges or cash withdrawal related services that are set by the central ATM processing switch or various card organizations. The banks that participate in these switches or the card organizations that enable the services or transactions set the interchange fee and/or establish the rules regarding the services allowed, and we are not in a position in any market to greatly influence these fees or rules, which may increase or decrease over time. A significant decrease in the interchange fee, or limitations placed on our ability to offer value added services via our ATM network, in any market could adversely affect our results in that market.

Although we believe that the volume of transactions in developing countries may increase due to growth in the number of cards being issued by banks in these markets, we anticipate that transaction levels on any given ATM in developing markets will not increase significantly. We can attempt to improve the levels of transactions on our ATM network overall by acquiring good sites for our ATMs, eliminating poor locations, entering new less-developed markets and adding new transactions, including new value added services, to the sets of transactions that are available on our ATMs. However, we may not be successful in materially increasing transaction levels through these measures. Per-transaction fees paid by international card organizations have declined in certain markets in recent years and competitive factors have required us to reduce the transaction fees we charge customers. If we cannot continue to increase our transaction levels and per-transaction fees generally decline, our results would be adversely affected.

Additionally, the evolving regulatory environment may change the competitive landscape across various jurisdictions and adversely affect our financial results. If governments implement new laws or regulations, or organizations such as Visa and MasterCard issue new rules, that effectively limit our ability to provide certain value added services or set fees and/or foreign currency exchange spreads, then our business, financial condition and results of operations could be materially and adversely affected. In addition, changes in regulatory interpretations or practices could increase the risk of regulatory enforcement actions, fines and penalties and such changes may be replicated across multiple jurisdictions.
