Andrew P. Calerich  
Chief Financial Officer

### EXHIBIT 99.1

On January 30, 2003, the Registrant issued the following press release:

#### "PYR ENERGY UPDATES SAN JOAQUIN BASIN EXPLORATION ACTIVITY

DENVER -- PYR Energy Corporation (AMEX:PYR) today announced that the operator of the Pyramid Power well, located in Kern County, California, has recommended plugging and abandoning this exploration well. Production testing in the Point of Rocks formation has resulted in non-commercial delivery of hydrocarbons and, based on log analysis, the operator has determined that production testing in the Temblor formation is not warranted. Other participants in the well, including PYR Energy Corporation, have consented to the plugging operations. PYR owns a carried working interest of 2.81% in the well and as a result of the carry, PYR has not incurred and will not incur any costs in the drilling or plugging of the well.

"While it is certainly disappointing that the Pyramid Power project was not successful, we remain optimistic concerning our Temblor formation targeted Bulldog and Wedge prospects," said Scott Singdahlsen, President of PYR. "These new Temblor projects are considerably more shallow than the Pyramid Power and East Lost Hills exploratory drilling that we have undertaken to the Temblor thus far in the San Joaquin Basin. With shallower depths for the same Temblor formation, we expect to encounter better reservoir quality." Singdahlsen continued by stating, "we are optimistic that hydrocarbons exist at this depth in the Temblor formation because of our experience in drilling to the deeper Temblor at East Lost Hills and at Pyramid Power."

PYR owns approximately 12,100 gross and 11,600 net acres at its Wedge prospect and approximately 15,600 gross and 15,100 net acres at its Bulldog prospect.

Denver based PYR Energy is an independent oil and gas company primarily engaged in the exploration for and the development and production of natural gas and crude oil. PYR's activities are focused in the San Joaquin Basin of

This release contains forward-looking statements regarding PYR Energy Corporation's future plans and expected performance based on assumptions the Company believes to be reasonable. A number of risks and uncertainties could cause actual results to differ materially from these statements, including, without limitation, the success rate of exploration efforts and the timeliness of development activities, fluctuations in oil and gas prices, and other risk factors described from time to time in the Company's reports filed with the SEC. In addition, the Company operates in an industry sector where securities values are highly volatile and may be influenced by economic and other factors beyond the Company's control. This press release includes the opinions of PYR Energy and does not necessarily include the views of any other person or entity. This release may not have been reviewed or approved by the operator and/or participants in any of the projects discussed."
