**Media Release**

For Release: 27 February 2007

**ANZ National performs well in first three months**

ANZ National Bank today announced a profit of \$350m for the three months ended 31 December 2006, up 28% on the December 2005 result. The headline result was boosted by a number of significant items including the sale of the FleetPartners business.

**December 2006 Three Month Performance Summary**

- Net Profit After Tax of \$350 million, a 28% increase over the December 2005 quarter (\$274 million).
- Underlying Profit Before Provisions ( PBP ) of \$423 million, an 8% increase over the December 2005 quarter (\$390 million). Refer Appendix for an outline of the Underlying calculations.
- Good underlying revenue growth of 8% on December 2005 quarter. Underlying cost-to-income ratio improved to 44.2% compared to 44.6% in the December 2005 quarter.
- Net loans and advances increased by \$8.6 billion or 12% on December 2005. Total customer deposits increased by \$5.9 billion or 12% on December 2005.

The result was driven by good revenue growth, with headline revenue up 4% and underlying revenue up 8% on the December 2005 period. Underlying net interest income increased by 12%, with strong lending and deposit growth across most businesses being partly offset by the impact of a competitive market. Underlying other operating income fell by 3% reflecting the above average Markets performance in December 2005. Fees and other income increased by 5%.

Headline costs were 1% lower in the period, with the impact of reduced integration activity (\$26m), offsetting increases in personnel costs. Underlying costs of \$335 million were up 7% (refer Appendix) due to annual salary increases, rental increases and timing of advertising and project costs. With the good revenue growth, the underlying cost to income ratio improved from 44.6% for December 2005 to 44.2% for December 2006.

The provisioning charge was \$25m, an increase of \$24m on the December 2005 period. The Individual Provision charge increased by just \$4m whilst the Collective Provision charge increased by \$20m. The increase in the Collective Provision charge reflected both volume growth over the year and the impact of a reassessment of the retail portfolio risk profile in the December 2005 period.

ANZ National Bank maintained strong balance sheet growth with net loans and advances increasing by \$8.6 billion or 12% over December 2005, to \$79.6 billion.

Mortgages grew by \$5.3 billion since December 2005 to \$44.9 billion, an increase of 13%. Customer deposits grew by \$5.9 billion since December 2005 to \$53.4 billion, an increase of 12%.

Commenting on the result, ANZ National Bank Chief Executive Officer Graham Hodges said. We are continuing to deliver good revenue and profit growth in a very competitive market environment, as well as reinvesting in our business.

In the last twelve months all of our businesses have focused on our customer propositions in order to retain and attract new customers. This is being recognised by our customers, with ANZ Retail Banking's customer satisfaction at the highest level for many years and The National Bank maintaining its already strong customer satisfaction levels.

In addition, we are working closely with communities across New Zealand in areas such as financial literacy and staff volunteering programmes, Mr Hodges said.

## 20. SEGMENTAL ANALYSIS

For segment reporting purposes, the Banking Group is organised into four major business segments – Retail Banking, Relationship Banking, Institutional and UDC. Centralised back office and corporate functions support these segments.

A summarised description of each business segment is shown below:

Retail Banking	Provides banking products and services to the personal banking segment and the small business segment through separate ANZ and The National Bank branded distribution channels. Personal banking customers have access to a wide range of financial services and products. Small business banking services are offered to enterprises with annual revenues of less than \$5 million. Included in this segment is Private Banking, a stand-alone business unit, which offers a fully inclusive banking and investment service to high net worth individuals.
Relationship Banking	This segment provides services to rural, commercial and corporate customers. A full range of banking products and services are provided to Rural customers. Corporate and Commercial customers consist of medium to large businesses with annual revenues from \$5 million to \$150 million. The Banking Group's relationship with these businesses ranges from simple banking requirements with revenue from traditional lending and deposit products, to more complex arrangements with revenue sourced from a wider range of products and services.
Institutional	Comprises businesses that provide a full range of financial services to the Banking Group's largest corporate and institutional customers. The Institutional business unit is made up of the following specialised units: <ul style="list-style-type: none"> <li>• Client Relationship Group – manages customer relationships along industry segment lines, typically with wholesale clients with turnover greater than \$100 million.</li> <li>• Corporate and Structured Finance – provides specialist lending, underwriting and capital structuring and solutions to corporates, institutions and governments.</li> <li>• Markets – provides securities, derivatives and foreign exchange products and services to the Banking Group's client base.</li> <li>• Trade and Transaction Services – provides trade finance, cash management, international payments, clearing and custodian services to the Banking Group's client base.</li> </ul>
UDC	UDC is primarily involved in the financing and leasing of equipment, plant and machinery for small and medium sized businesses.
Other	Includes minor profit centres supporting the Retail Banking segment (e.g. Direct Banking and the ING joint venture), Treasury and back office support functions, none of which constitutes a separately reportable segment.

Truck Leasing Limited (trading as Esanda FleetPartners) is classified as a discontinued operation, and is not included in this analysis.

As the composition of segments has changed over time, prior period comparatives have been adjusted to be consistent with the 2006 segment definitions.

(1) With effect from 1 October 2006, financial guarantee contracts are recognised initially at fair value. After initial recognition, such contracts are measured at the higher of the amount determined in accordance with NZ IAS 37: Provisions, Contingent Liabilities and Contingent Assets, or the amount initially recognised. There was no financial impact on adoption of this amendment to NZ IAS 39: Financial Instruments: Recognition and Measurement.

The detailed and estimated maximum amount of other contingent liabilities that may become payable are set out below.

**Contingent tax liability**

As previously disclosed, the New Zealand Inland Revenue Department ( IRD ) is reviewing a number of structured finance transactions as part of an audit. This is part of an industry-wide review by the IRD of these transactions undertaken in New Zealand.

The Bank has received Notices of Proposed Adjustment (the Notices ) in respect of some of these transactions. The Notices are formal advice that the IRD is proposing to amend tax assessments. The Notices are not tax assessments and do not establish a tax liability but are the first step in a formal disputes process.

The IRD issued amended tax assessments as a follow up to the Notices in respect of two transactions for the 2000 tax year and in respect of four transactions for the 2001 tax year (in each case prior to that tax year becoming statute-barred). Proceedings disputing the amended tax assessments with respect to the 2000 and 2001 tax years had been commenced.

Based on the independent tax and legal advice obtained, the Bank is confident that the tax treatment it has adopted for these transactions and all similar transactions is correct.

The tax adjustments proposed so far by the IRD cover the 2000 to 2003 tax years and imply a maximum potential liability of \$159 million (\$225 million with interest tax effected).

The IRD is also investigating other transactions undertaken by the Banking Group, which have been subject to the same tax treatment. Should the same position be taken by the IRD for all years on all these transactions, including those that the Notices cover, the maximum potential liability would be approximately \$365 million (\$477 million with interest tax effected) as at 31 December 2006.

Of the maximum potential tax liability in dispute, it has been estimated that approximately \$99 million (\$135 million with interest tax effected) is subject to indemnities given by Lloyds TSB Bank plc under the agreement by which the Bank acquired the NBNZ Holdings Limited Group, and which relate to transactions undertaken by NBNZ Group before December 2003.

This leaves a net potential tax liability as at 31 December 2006 of \$266 million (\$342 million with interest tax effected).

All of these transactions have now either matured or been terminated.

**Other contingent liabilities**

Following a Commerce Commission investigation of the banking industry as a whole in relation to the disclosure of currency conversion fees on foreign currency credit and debit card transactions, the Bank was charged under the Fair Trading Act 1986 in relation to ANZ and National Bank branded credit card products. In addition, the Bank received a civil claim, with the Commerce Commission as plaintiff, seeking compensation for affected cardholders.

On 30 March 2006, the Bank reached an agreement with the Commerce Commission relating to these charges and the related civil proceeding. Under this agreement, the Bank paid fines of \$1.3 million and refunded a portion of the currency conversion fee which had been paid by affected cardholders. ANZ brand cardholders received \$5.2 million in compensation, and National Bank brand cardholders, \$4.8 million. While the settlement with the Commerce Commission does not preclude cardholders bringing a separate claim for any additional loss they consider they have suffered, no further liability is expected to arise from this issue.

In November 2006, the Commerce Commission brought proceedings under the Commerce Act 1986 against Visa, MasterCard and all New Zealand issuers of Visa and MasterCard credit cards, including ANZ National Bank Limited. The Commission alleges price fixing and substantially lessening competition in relation to the setting of credit card interchange fees and is seeking penalties and orders under the Commerce Act.

Subsequently, several major New Zealand retailers have issued proceedings against ANZ National Bank Limited and the other abovementioned defendants seeking unquantified damages, based on allegations similar to those contained in the Commerce Commission proceedings.

ANZ National Bank Limited is defending the proceedings. At this stage, the risks and any potential liabilities cannot be assessed.

The peak end-of-day credit exposures for the quarter to connected persons are measured over Tier 1 Capital as at the end of the quarter. There are no individual provisions provided against credit exposures to connected persons as at 31 December 2006 (31/12/2005 \$nil; 30/09/2006 \$nil). The Banking Group had no contingent exposures arising from risk lay-off arrangements to connected persons as at 31 December 2006 (31/12/2005 \$nil; 30/09/2006 \$nil).

**Note 2**

The Banking Group has amounts due from its Parent Company and Ultimate Parent Company and other entities within the Ultimate Parent Group arising from the ordinary course of its business. These balances arise primarily from unrealised gains on trading and hedging derivative financial instruments with the Ultimate Parent Bank.

**Note 3**

The method of calculating the peak end-of-day disclosure above differs from that applied in determining the connected persons limit under the Bank's Conditions of Registration. The peak end-of-day disclosure is measured against Registration. The peak end-of-day disclosure connected is measured exposure under the Conditions of Registration is measured against Tier 1 Capital on a continuous basis. The Banking Group has complied with the limits on aggregate credit exposures (of a non-capital nature and net of individual provisions) to connected persons and non-bank connected persons, as set out in the Conditions of Registration, at all times during the quarter.

**Note 4**

Represents the maximum peak end-of-day aggregate credit exposures limit (exclusive of exposures of a capital nature and net of individual provisions) to all connected persons. This is based on the rating applicable to the Bank's long term senior unsecured NZD obligations payable in New Zealand, in New Zealand dollars (refer page 33 for the credit rating). Within the overall limit a sub-limit of 15% of Tier 1 Capital applies to aggregate credit exposures (exclusive of exposures of a capital nature and net of individual provisions) to non-bank connected persons. No changes to the rating-contingent limit have occurred during the quarter.

**Note 5**

There are no exposures with non-bank connected persons.

**27. PARENT COMPANY**

The parent company is ANZ Holdings (New Zealand) Limited which is incorporated in New Zealand. The Ultimate Parent Company is Australia and New Zealand Banking Group Limited which is incorporated in Australia.

The Ultimate Parent Company is required to hold minimum capital at least equal to that specified under the Basel framework. The capital adequacy ratios are:

	<b>Australian IFRS 30/09/2006</b>	<b>Australian Previous GAAP 30/09/2005</b>	
Tier 1 Capital	<b>6.8</b>	% 6.9	%
Total Capital	<b>10.6</b>	% 10.5	%

The Ultimate Parent Company meets those requirements imposed on it by its home supervisor as at 30 September 2006 whereby banks must maintain a ratio of qualifying capital to risk weighted assets of at least 8 per cent. The comparative period capital ratios disclosed were calculated under previous Australian GAAP prior to the Ultimate Parent Company adopting Australian IFRS on 1 October 2005. The

comparative period ratios were calculated in accordance with Australian Prudential Regulatory Authority (APRA) requirements effective at that date. No retrospective adjustments have been made. APRA introduced new prudential capital standards as at 1 July 2006 which contain various transitional rules which run through to different dates in 2008 and 2010 to coincide with Basel II implementation.

**CREDIT RATING INFORMATION**

The Bank has two current credit ratings, which are applicable to its long-term senior unsecured obligations which are payable in New Zealand in New Zealand dollars. The credit ratings are:

Standard & Poor's **AA-**

Moody's Investors Service **Aa3**

The Standard & Poor's revised rating was first issued on 11 September 1996. There have been no changes in the credit rating issued in the past two years ended 31 December 2006. The rating is not subject to any qualifications.

The Moody's Investors Service rating was first issued on 31 July 2000. There have been no changes in the credit rating issued in the past two years ended 31 December 2006. The rating is not subject to any qualifications.

*The following is a description of the major ratings categories by Ratings Agency:*

**Standard & Poor's** Credit rating scale for long-term ratings:

Ratings scale	Description
<b>AAA</b>	Extremely strong capacity to pay interest and repay principal in a timely manner. Highest rating assigned.
<b>AA</b>	Very strong capacity to pay interest and repay principal in a timely manner. This differs from the highest rating only in a small degree.
<b>A</b>	Strong capacity to pay interest and repay principal in a timely manner, but may be more susceptible to the adverse effects of changes in circumstances and economic conditions than higher rated entities.
<b>BBB</b>	Adequate capacity to pay interest and repay principal in a timely manner, however adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity to meet debt servicing commitments than higher rated entities.
<b>BB</b>	A degree of speculation exists with respect to the ability of an entity with this credit rating to pay interest and repay principal in a timely manner. Adverse business, financial, or economic conditions could impair the borrower's capacity to meet debt service commitments in a timely manner.
<b>B</b>	Entities rated B are more vulnerable to adverse business, financial or economic conditions than entities in higher rating categories. Adverse business, financial or economic conditions will likely impair the borrower's capacity or willingness to meet debt service commitments in a timely manner.
<b>CCC</b>	Entities rated CCC are currently vulnerable to default and are dependent on favourable business, financial and economic conditions to meet debt service commitments in a timely manner. In the event of adverse business, financial or economic conditions the entity is likely to default.
<b>CC</b>	Entities rated CC are currently highly vulnerable to non-payment of interest and principal.
<b>C</b>	Entities rated C have filed a bankruptcy petition or taken similar action, but payment of obligations are being continued.
<b>D</b>	D rated entities are in default. This is assigned when interest or principal payments are not made on the date due or when an insolvency petition or a request to appoint a receiver is filed.

Plus (+) or Minus (-): The ratings from **AA** to **CCC** may be modified by the addition of a plus or minus sign to show relative standing within the major rating categories.

**Moody's Investors Service** Credit rating scale for long-term ratings:

**Ratings scale**

Description	Description
<b>Aaa</b>	Judged to be of the best quality. They carry the smallest degree of investment risk and are generally referred to as 'gilt edged'. Interest payments are protected by a large margin and principal is secure. While the various protective elements are likely to change, such changes as can be visualised are most unlikely to impair the fundamentally strong position of such issues.
<b>Aa</b>	Judged to be of high quality by all standards. Together with the Aaa group they comprise what are generally known as high-grade bonds. They are rated lower than the best bonds because margins of protection may not be as large as in Aaa securities or fluctuation of protective elements may be of greater amplitude or there may be other elements present which make the long-term risk appear somewhat larger than the Aaa securities.
<b>A</b>	Possess many favourable investment attributes and are to be considered as upper-medium-grade obligations. Factors giving security to principal and interest are considered adequate, but elements may be present which suggest a susceptibility to impairment some time in the future.
<b>Baa</b>	Considered as medium-grade obligations (i.e. they are neither highly protected nor poorly secured). Interest payments and principal security appear adequate for the present but certain protective elements may be lacking or may be characteristically unreliable over any great length of time. Such bonds lack outstanding investment characteristics and in fact have speculative characteristics as well.
<b>Ba</b>	Judged to have speculative elements; their future cannot be considered as well-assured. Often the protection of interest and principal payments may be very moderate, and thereby not well safeguarded during both good and bad times over the future. Uncertainty of position characterises bonds in this class.
<b>B</b>	Generally lack characteristics of the desirable investment. Assurance of interest and principal payments or of maintenance of other terms of the contract over any long period of time may be small.
<b>Caa</b>	These bonds are of poor standing. Such issues may be in default or there may be present elements of danger with respect to principal or interest.
<b>Ca</b>	Represent obligations which are speculative in a high degree. Such issues are often in default or have other marked shortcomings.
<b>C</b>	These are the lowest rated class of bonds, and issues so rated can be regarded as having extremely poor prospects of ever attaining any real investment standing.

Moody's Investors Service bond ratings, where specified, are applied to financial contracts, senior bank obligations and insurance company senior policyholder and claims obligations with an original maturity in excess of one year.

Moody's Investors Service applies numerical modifiers **1**, **2** and **3** in each generic rating classification from **Aa** through **Caa**. The modifier **1** indicates that the obligation ranks in the higher end of its generic rating category; the modifier **2** indicates a mid-range ranking; and the modifier **3** indicates a ranking in the lower end of that generic rating category.
