Item 1.01. Entry into a Material Definitive Agreement.

On February 26, 2014, Genoccea Biosciences, Inc. (the *Company*) entered into a Bioprocessing Services Agreement (the *Agreement*) with FUJIFILM Diosynth Biotechnologies U.S.A., Inc. (*Fujifilm*). The Agreement provides the terms and conditions under which Fujifilm will manufacture and supply certain recombinant protein antigens to the Company for its Phase II clinical study for the Company's lead product, GEN-003. Under this Agreement, the Company is obligated to pay Fujifilm certain milestone payments up to the mid seven figures upon the achievement of certain manufacturing milestones. Additionally, raw materials, resins and consumables purchased for the vaccine production will be invoiced separately as such costs are incurred by Fujifilm. The Company will pay Fujifilm's actual costs plus a percentage fee in the mid-single digits for these raw materials, resins and consumables. The Company will also pay a reservation fee, which equals a percentage of production fees in the low double digits, to reserve manufacturing slots in the production timeframe as agreed upon under the Agreement. The Company is required to use commercially reasonable efforts to timely provide Fujifilm with the technology, materials and resources needed to produce and supply the recombinant protein antigen.

The Agreement will expire on February 25, 2024. Subject to termination fees under applicable circumstances, the Company may terminate the Agreement at any time by giving Fujifilm advance written notice. The Agreement may also be terminated by either party due to a material uncured breach by the other party.
