NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 – THE COMPANY AND BASIS OF PREPARATION.

T. Rowe Price Group derives its consolidated revenues and net income primarily from investment advisory services that its subsidiaries provide to individual and institutional investors in the sponsored T. Rowe Price U.S. mutual funds and other investment portfolios, including separately managed accounts, subadvised funds, and other sponsored investment portfolios. We also provide our investment advisory clients with related administrative services, including distribution, mutual fund transfer agent, accounting and shareholder services; participant recordkeeping and transfer agent services for defined contribution retirement plans; brokerage; and trust services.

Investment advisory revenues depend largely on the total value and composition of assets under our management. Accordingly, fluctuations in financial markets and in the composition of assets under management impact our revenues and results of operations.

These unaudited condensed consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States, which require the use of estimates and reflect all adjustments that are, in the opinion of management, necessary to a fair statement of our results for the interim periods presented. All such adjustments are of a normal recurring nature. Actual results may vary from our estimates. Certain prior year items have been reclassified to conform to current year presentation.

The unaudited interim financial information contained in these condensed consolidated financial statements should be read in conjunction with the consolidated financial statements contained in our 2012 Annual Report.

During the second quarter of 2013, we determined that we no longer had a controlling financial interest in certain of the sponsored investment portfolios that were consolidated at December 31, 2012. Accordingly, we deconsolidated the carrying value of their assets and liabilities, and recorded our remaining equity interest at its fair value. Given that our consolidated investment portfolios were carried at fair value, we did not recognize any gain or loss in our condensed consolidated statement of income upon deconsolidation. Our residual interest in these sponsored investment portfolios is accounted for under the equity method of accounting. The impact of the deconsolidation on our condensed consolidated balance sheet was immaterial.

On January 1, 2013, we adopted new financial reporting guidance that requires the disclosure of information about significant items reclassified out of accumulated other comprehensive income, including the line item of our condensed consolidated income statements to which such items were reclassified. The required information could be presented either on the face of the financial statements or in the notes. We elected to present these disclosures in Note 10 to the financial statements.

NOTE 2 – INFORMATION ABOUT RECEIVABLES, REVENUES, AND SERVICES.

Accounts receivable from our sponsored mutual funds for advisory fees and advisory-related administrative services aggregate \$184.0 million at December 31, 2012, and \$194.1 million at June 30, 2013.

Revenues (in millions) from advisory services provided under agreements with our sponsored mutual funds and other investment clients include:

Investors that we serve are primarily domiciled in the U.S.; investment advisory clients outside the U.S. account for about 7% of our assets under management at June 30, 2013.

Fees for advisory-related administrative services provided to our sponsored mutual funds in the U.S. during the first half of the year were \$128.8 million in 2012 and \$133.8 million in 2013. Fees for these services during the second quarter were \$64.1 million in 2012 and \$66.0 million in 2013. Distribution and other servicing fees earned from certain classes of our sponsored mutual funds in the U.S. during the first half of the year were \$45.9 million in 2012 and \$54.3 million in 2013. Such fees during the second quarter were \$23.7 million in 2012 and \$28.1 million in 2013.

NOTE 3 – INVESTMENTS IN SPONSORED FUNDS - AVAILABLE-FOR-SALE.

We make investments in our sponsored funds for general corporate investment purposes or to provide seed capital for newly formed funds. These investments (in millions) are voting interest entities and include:

	Aggregate cost	Unrealized holding gains	Unrealized holding losses	Aggregate fair value
December 31, 2012				
Stock and blended asset funds	\$336.9	\$178.9	\$—	\$515.8

Bond funds	596.0	43.2	(2.8)	636.4
Total	\$944.8	\$253.4	\$(2.8)	\$1,195.4

The unrealized holding losses at June 30, 2013, are attributable to 10 fund holdings with an aggregate fair value of \$256.6 million and are considered temporary.

NOTE 4 – SAVINGS BANK SUBSIDIARY.

On May 23, 2013, we entered into an agreement to sell 100% of the capital stock of our savings bank subsidiary to Jacob M. Safra for cash equal to the bank's net book value on the closing date plus \$500,000. The transaction is subject to requisite regulatory approval from the Office of the Comptroller of the Currency and other customary closing conditions. We expect the transaction to close in the fourth quarter of 2013.

The following table summarizes the assets and liabilities (in millions) held for sale in our consolidated balance sheets:

	12/31/2012	6/30/2013
Cash and cash equivalents	\$44.3	\$41.4
Debt securities	136.0	127.4
Other assets	.4	.1

Accounts payable and accrued expenses	\$.1	\$—
Income taxes payable	1.3	.7
Customer deposits	154.7	144.6
Total liabilities held for sale	\$156.1	\$145.3

NOTE 5 – DEBT SECURITIES HELD BY SAVINGS BANK SUBSIDIARY.

Our savings bank subsidiary holds investments in marketable debt securities, including mortgage- and other asset-backed securities, which are accounted for as available-for-sale. The following table (in millions) details the components of these investments.

	12/31/2012		6/30/2013	
	Fair value	Unrealized holding gains (losses)	Fair value	Unrealized holding gains (losses)
Investments with temporary impairment (0 securities in 2013) of				
Less than 12 months	\$6.4	\$—	\$—	\$—
12 months or more	1.0	—	—	—
Total	7.4	—	—	—
Investments with unrealized holding gains	128.6	3.2	127.4	1.8
Total	\$136.0	\$3.2	\$127.4	\$1.8
Aggregate cost	\$132.8		\$125.6	

The unrealized losses in these investments at December 31, 2012 totaled \$35,000. These losses were generally caused by changes in interest rates and market liquidity, and not by changes in credit quality. We intended to hold these securities to their maturities and believed it was more-likely-than-not that we would not be required to sell any of these securities before recovery of their amortized cost. Accordingly, impairment of these investments was considered temporary.

NOTE 6 – OTHER INVESTMENTS.

These investments (in millions) include:

	12/31/2012	6/30/2013
Cost method investments		
10% interest in Daiwa SB Investments Ltd. (Japan)	\$12.7	\$6.6
Other investments	46.5	48.9
Equity method investments		
26% interest in UTI Asset Management Company Limited (India)	139.8	139.6
Sponsored fund investments	—	77.7
Other investments	9.4	7.5
Investments held as trading		
Sponsored fund investments	2.6	2.6
Securities held by consolidated sponsored investment portfolios	92.7	35.1
U.S. Treasury note	1.0	1.0
Total	\$304.7	\$319.0

The securities held by consolidated sponsored investment portfolios relate to investment portfolios in which we provided initial seed capital at the time of its formation. We have determined at December 31, 2012 and June 30, 2013, that these investment portfolios are voting interest entities in which we have a controlling financial interest.

During the second quarter of 2013, we deconsolidated certain sponsored investment portfolios in which we provided initial seed capital at the time of its formation as we no longer had a controlling financial interest. Accordingly, we deconsolidated \$80.1 million in investments held as trading and are reporting our residual interest in these sponsored investment portfolios as an equity method investment.

NOTE 7 – FAIR VALUE MEASUREMENTS.

We determine the fair value of our investments using the following broad levels of inputs as defined by related accounting standards:

Level 1 – quoted prices in active markets for identical securities.

Level 2 – observable inputs other than Level 1 quoted prices including, but not limited to, quoted prices for similar securities, interest rates, prepayment speeds, and credit risk. These inputs are based on market data obtained from independent sources.

Level 3 – unobservable inputs reflecting our own assumptions based on the best information available. We do not value any investments using Level 3 inputs.

These levels are not necessarily an indication of the risk or liquidity associated with our investments. There have been no transfers in or out of the levels. The following table summarizes our investments (in millions) that are recognized in our condensed consolidated balance sheets using fair value measurements determined based on the differing levels of inputs.

	Level 1	Level 2
December 31, 2012		
Cash equivalents	\$732.8	
Investments in sponsored funds - available-for-sale	1,140.1	
Investments held as trading	18.1	\$77.2
Debt securities held by savings bank subsidiary	—	136.0
Total	\$1,891.0	\$213.2
June 30, 2013		
Cash equivalents	\$1,267.4	
Investments in sponsored funds - available-for-sale	1,195.4	
Investments held as trading	26.7	\$11.0
Debt securities held by savings bank subsidiary	—	127.4
Total	\$2,489.5	\$138.4

Customer deposits at our savings bank subsidiary are not measured at fair value in our condensed consolidated balance sheets. At December 31, 2012, the estimated fair value of these deposits, based on discounting expected cash outflows at maturity dates that range up to five years using current interest rates offered for deposits with the same dates of maturity, was \$157.8 million. At June 30, 2013, the carrying value of these deposits approximates fair value. The fair value was based on the price to transfer the customer deposit obligation to a market participant as evidenced in the agreement to sell our savings bank subsidiary. These fair values were determined using Level 2 inputs.

NOTE 8 – STOCK-BASED
COMPENSATION.

STOCK OPTIONS.

The following table summarizes the status of and changes in our stock option grants during the first half of 2013.

	Options	Weighted- average exercise price
Outstanding at beginning of year	34,622,435	\$48.82
Semiannual grants	1,766,900	\$71.41

Forfeited	(51,167)	(11,102)	\$ 60.82
Nonvested at end of period	1,500,406	777,600	\$ 62.32

The nonvested totals at the end of the period include 36,000 performance-based restricted shares and 104,925 performance-based restricted stock units. The performance period has lapsed and the performance threshold has been met for 12,000 shares and 36,750 units that were outstanding at the end of the period.

FUTURE STOCK-BASED COMPENSATION EXPENSE.

The following table presents the compensation expense (in millions) to be recognized over the remaining vesting periods of the stock-based awards outstanding at June 30, 2013. Estimated future compensation expense will change to reflect future option grants, including reloads; future awards of unrestricted shares, restricted shares, and restricted stock units; changes in estimated forfeitures; changes in the probability of performance thresholds being met; and adjustments for actual forfeitures.

NOTE 9 – EARNINGS PER SHARE CALCULATIONS.

The following table presents the reconciliation (in millions) of our net income to net income allocated to our common stockholders and the weighted-average shares (in millions) that are used in calculating the basic and diluted earnings per share on our common stock. Weighted-average common shares outstanding assuming dilution reflects the potential dilution, determined using the treasury stock method that could occur if outstanding stock options were exercised and non-participating stock awards were vested.

Other comprehensive income, net of tax, related to our net unrealized holding gains for the six month period ended June 30, 2012 and 2013, includes \$2.5 million and \$11.5 million, respectively, in gains realized on dispositions that were reclassified from accumulated other comprehensive income to non-operating investment income. The income taxes related to these gains of \$1.0 million and \$4.5 million, respectively, were reclassified from accumulated other comprehensive income to our provision for income taxes.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders
T. Rowe Price Group, Inc.:

We have reviewed the condensed consolidated balance sheet of T. Rowe Price Group, Inc. and subsidiaries (“the Company”) as of June 30, 2013, the related condensed consolidated statements of income and comprehensive income for the three- and six-month periods ended June 30, 2013 and 2012, the related condensed consolidated statements of cash flows for the six-month periods ended June 30, 2013 and 2012 and the related condensed consolidated statement of stockholders’ equity for the six-month period ended June 30, 2013. These condensed consolidated financial statements are the responsibility of the Company’s management.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to the condensed consolidated financial statements referred to above for them to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of T. Rowe Price Group, Inc. and subsidiaries as of December 31, 2012, and the related consolidated statements of income, comprehensive income, stockholders’ equity, and cash flows for the year then ended (not presented herein); and in our report dated February 5, 2013, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 2012, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

GENERAL.

Our revenues and net income are derived primarily from investment advisory services provided to individual and institutional investors in our U.S. sponsored mutual funds and other investment portfolios. The other investment portfolios include separately managed accounts, subadvised funds, and other sponsored investment portfolios including common trust funds, target-date retirement trusts, and mutual funds offered to investors outside the U.S. and through variable annuity life insurance plans. Investment advisory clients domiciled outside the U.S. account for about 7% of our assets under management at June 30, 2013.

We manage a broad range of U.S., international and global stock, bond, and money market mutual funds and other investment portfolios, which meet the varied needs and objectives of individual and institutional investors. Investment advisory revenues depend largely on the total value and composition of assets under our management. Accordingly, fluctuations in financial markets and in the composition of assets under management affect our revenues and results of operations.

We remain debt-free with substantial liquidity and resources that allow us to take advantage of attractive growth opportunities, invest in key capabilities including investment professionals and technologies and, most importantly, provide our clients with strong investment management expertise and service both now and in the future. In the coming quarters, we expect to increase funding for long-term initiatives to sustain and deepen our investment talent, broaden our distribution reach in the U.S. and internationally, and expand capabilities through enhanced technology.

BACKGROUND.

U.S. equities added to their strong first quarter gains in the second quarter of 2013. Several major indexes reached multi-year highs or all-time highs by the end of May, as the economy expanded, corporate earnings remained mostly favorable, and the Federal Reserve continued its stimulus efforts. However, equities retreated and long-term bond yields rose sharply late in the quarter, as the Federal Reserve signaled that it may begin tapering its asset purchase program later in 2013 if the economy evolved in line with their projections. Non-U.S. developed markets were mixed in the quarter, while emerging markets declined sharply amid concerns about slowing economic growth, rising interest rates, political unrest, and currency weakness versus the dollar.

Returns of several major equity market indexes for the three- and six-month periods ended June 30, 2013 are as follows:

Index	Three months ended 6/30/2013	Six months ended 6/30/2013
S&P 500 Index	2.9%	13.8%
NASDAQ Composite Index ⁽¹⁾	4.2%	12.7%
Russell 2000 Index	3.1%	15.9%
MSCI EAFE (Europe, Australasia, and Far East) Index	-0.7%	4.5%
MSCI Emerging Markets Index	-8.0%	-9.4%

⁽¹⁾ returns exclude dividends

Bond markets around the world experienced sharp declines in the second quarter of 2013, as investors reacted to the Federal Reserve's comments on ongoing stimulus efforts, specifically the tapering of asset purchases in the future. Longer-term Treasuries suffered the largest losses, but every major bond sector was lower. The yield on the benchmark 10-year U.S. Treasury increased 65 basis points during the second quarter of 2013, and ended June 30, 2013 at 2.5%, its highest level since August 2011. The Federal Reserve did reaffirm that it would maintain its low short-term interest rate policy so long as the unemployment rate remains above 6.5% and annual inflation remains

below 2.5% in the short-term. Bonds in overseas markets were also negatively affected in the second quarter of 2013 by concerns over slowing economic growth in emerging markets, and currency weakness against the dollar.

Total cash flows for the three- and six- month periods ended June 30, 2013 include \$2.5 billion and \$6.3 billion, respectively, in net cash inflows sourced from our target-date retirement portfolios. The target-date retirement portfolios in turn invest in a broadly diversified portfolio of other Price funds or Price trust funds, and automatically rebalance to maintain their specific asset allocation weightings. Assets under management in these retirement portfolios at June 30, 2013, totaled \$101.4 billion, including \$89.4 billion in target-date retirement funds and \$12.0 billion in target-date retirement trusts.

We incur significant expenditures to attract new investment advisory clients and additional investments from our existing clients. These efforts involve costs that generally precede any future revenues that we might recognize from additions to our assets under management.

RESULTS OF OPERATIONS.

Second quarter of 2013 versus second quarter of 2012.

Investment advisory revenues were up 17.4%, or \$109.7 million, to \$739.7 million in the second quarter of 2013, as average assets under our management increased \$86.8 billion to \$625.1 billion. The average annualized effective fee rate earned on our

Page 17

assets under management was 47.5 basis points during the second quarter of 2013, up from the 47.2 basis points earned during the full-year 2012, due primarily to assets shifting into higher than average fee rate portfolios. We waived \$11.9 million in money market advisory fees in the second quarter of 2013, an increase of \$4.1 million from the comparable 2012 quarter, in order to maintain a positive yield for fund investors. These fee waivers represent about 2% of total investment advisory revenues earned during the second quarter of 2013. We have waived fees from each of our money market mutual funds and trusts, which have combined net assets of \$15.9 billion at June 30, 2013. We expect that these fee waivers will continue for the remainder of 2013.

Net revenues increased \$117.5 million, or 15.9%, to \$854.3 million in the second quarter of 2013. Operating expenses were \$455.5 million in the second quarter of 2013, an increase of \$46.7 million or 11.4%. Overall, net operating income for the second quarter of 2013 increased \$70.8 million to \$398.8 million. The increase in our average assets under management and corresponding investment advisory revenues from higher market valuations lifted our operating margin in the second quarter of 2013 to 46.7% compared to 44.5% in the 2012 period. Net income increased \$41.0 million, or 19.8%, to \$247.8 million, in the second quarter of 2013 and our diluted earnings per share on our common stock increased 16.5% to \$.92 from the \$.79 earned in the second quarter of 2012.

Revenues

Investment advisory revenues earned from the T. Rowe Price mutual funds distributed in the U.S. were \$519.4 million, an increase of \$85.1 million, or 19.6%, on higher average assets under management. Average mutual fund assets under management in the second quarter of 2013 were \$382.5 billion, an increase of 20.2% from the average in the second quarter of 2012. Mutual fund assets at June 30, 2013, were \$379.5 billion, an increase of \$2.5 billion from March 31, 2013.

During the second quarter of 2013, market appreciation and income of \$2.7 billion earned by our mutual funds was tempered by net cash outflows of \$.2 billion. Money market funds had net cash inflows of \$.6 billion while the stock and blended asset funds and bond funds each had \$.4 billion in net cash outflows. These cash flow amounts for the second quarter of 2013 include \$3.1 billion in assets that clients transferred to our other investment portfolios, including the target-date retirement trusts. Without these transfers, the mutual funds would have had net cash inflows of \$2.9 billion in the second quarter of 2013.

Investment advisory revenues earned in the second quarter of 2013 on our other investment portfolios increased \$24.6 million compared to the 2012 quarter to \$220.3 million, as average assets under management increased \$22.6 billion, or 10.3%, to \$242.6 billion. Ending assets in these portfolios at June 30, 2013, were \$234.5 billion, a decrease of \$5.9 billion from March 31, 2013. Market appreciation and income of \$1.9 billion was more than offset by net cash outflows of \$7.8 billion during the second quarter of 2013. This net cash outflow amount is presented net of the \$3.1 billion in assets that clients transferred from the mutual funds in the second quarter of 2013. The majority of the net cash outflows for the second quarter of 2013 were concentrated among a small number of institutional and intermediary clients that changed their investment objectives or repositioned their strategy allocations during the quarter.

Administrative fee revenues increased \$3.7 million to \$86.4 million in the second quarter of 2013. The increase is primarily attributable to transfer agent servicing activities and defined contribution recordkeeping services provided to the mutual funds and their investors. Changes in administrative fee revenues are generally offset by similar changes in related operating expenses that are incurred to provide services to the funds and their investors.

Distribution and servicing fee revenues earned from 12b-1 plans of the Advisor, R, and variable annuity class shares of our sponsored funds and portfolios increased \$4.4 million from the second quarter of 2012 on greater average assets under management in these share classes. The 12b-1 fees earned are offset entirely by the costs paid to third-party intermediaries who source these assets. These costs are reported as distribution and servicing costs on the face of the

condensed consolidated statements of income.

Operating expenses

Compensation and related costs were \$288.3 million in the second quarter of 2013, an increase of \$26.8 million, or 10.2%, compared to the second quarter of 2012. The largest part of the change is attributable to a \$13.5 million increase in the interim accrual for our annual variable compensation programs and \$9.9 million in higher salaries and related benefits, which results from a modest increase in salaries at the beginning of 2013 combined with a 3.5% increase in our average staff size from the second quarter of 2012. The balance of the change from the 2012 quarter is attributable to an increase in non-cash stock-based compensation expense, an increase in temporary personnel to support our business growth and higher other employee-related costs. At June 30, 2013, we employed 5,448 associates.

Occupancy and facility costs, together with depreciation and amortization expense, were \$57.0 million in the second quarter of 2013, up \$5.7 million compared to the second quarter of 2012. The change includes costs of \$2.8 million to terminate certain facility leases, as well as costs to expand our international facilities and update our technology capabilities, including related maintenance programs, to meet increasing business demands.

Other operating expenses in the second quarter of 2013 were up \$10.4 million from the comparable 2012 quarter as increased business demands and our continued investment in capabilities have increased costs. These include costs related to our defined contribution recordkeeping business, consulting and professional fees, information services, and other third-party services.

Non-operating investment income

Net non-operating investment income in the second quarter of 2013 of \$1.4 million decreased \$6.0 million from the 2012 quarter primarily due to unrealized market losses recognized on certain sponsored investment portfolios that we consolidate or account for under the equity method of accounting. Also, the 2012 period included realized gains from the sale of certain of our sponsored funds that did not reoccur in the second quarter of 2013.

Provision for income taxes

The effective tax rate for the second quarter of 2013 of 38.1% is unchanged from the effective rate for the first quarter of 2013. We currently estimate our effective tax rate for the full year 2013 will be 38.3%. Our effective income tax rate reflects the relative contribution of pre-tax income generated by our non-U.S. subsidiaries that are subject to tax rates lower than our U.S. rates. Changes in the relative contribution of pre-tax income from U.S. and non-U.S. sources or changes in tax rates in the U.S. or relevant non-U.S. jurisdictions may affect our effective income tax rate and overall net income in the future.

First half of 2013 versus first half of 2012.

Investment advisory revenues were up 15.1%, or \$189.6 million, to about \$1.4 billion in the first half of 2013, as average assets under our management increased \$78.8 billion to \$613.1 billion. The average annualized fee rate earned on our assets under management was 47.4 basis points in the first half of 2013, up from the 47.2 basis points earned in the full-year 2012. We waived \$22.9 million in money market advisory fees in the first half of 2013, an increase of \$6.2 million from the \$16.7 million waived in the 2012 period. The fee waivers in the first half of 2013 represent about 2% of our total investment advisory revenues earned during the same period.

Net revenues increased \$204.5 million, or 14.0%, to nearly \$1.7 billion. Operating expenses were \$898.6 million in the first half of 2013, an increase of \$77.3 million, or 9.4%. Overall, net operating income for the first half of 2013 increased \$127.2 million to \$771.4 million. Our operating margin in the first half of 2013 was 46.2% compared to 44.0% in the 2012 period. Non-operating investment income of \$19.7 million for the first half of 2013 included \$11.5 million in gains realized from rebalancing our available-for-sale sponsored investments portfolio. Net income increased \$85.4 million to \$489.7 million for the first half of 2013, and our diluted earnings per share on our common stock increased 18.8% to \$1.83.

Revenues

Investment advisory revenues earned from the T. Rowe Price mutual funds distributed in the U.S. increased 17.4%, or \$149.8 million, to \$1.0 billion, on higher average mutual fund assets. Average mutual fund assets in the first half of 2013 were \$373.7 billion, an increase of 18.5% from the average for the comparable 2012 period. Mutual fund assets of \$379.5 billion at June 30, 2013, increased \$32.6 billion from \$346.9 billion at the end of 2012.

Net cash inflows into our mutual funds were \$7.4 billion during the first half of 2013, including \$4.8 billion into the stock and blended asset funds, \$2.1 billion into the bond funds, and \$.5 billion into the money market funds. These mutual fund net inflow amounts are presented net of \$5.0 billion that clients transferred to the other investment portfolios, primarily our common trust funds and target-date retirement trusts. Higher market appreciation and income in the first half of 2013 increased our mutual fund assets under management by \$25.2 billion.

Investment advisory revenues earned on the other investment portfolios for the first half of 2013 were \$432.6 million, an increase of \$39.8 million, or 10.1%, from the \$392.8 million earned in the comparable 2012 period. Average assets in these portfolios were \$239.4 billion during the first half of 2013, up \$20.5 billion from the comparable 2012 period. Assets under management of \$234.5 billion at June 30, 2013, increased \$4.6 billion from the end of 2012. Market appreciation and income of \$16.7 billion was offset in part by net outflows of \$12.1 billion during the first half of 2013. Net outflows during the first half of 2013 are presented net of the \$5.0 billion transferred from the mutual funds. The majority of the net cash outflows in the

first half of 2013 were concentrated among a small number of institutional and intermediary clients that changed their investment objectives, repositioned their strategy allocations, or experienced relative investment performance challenges within their portfolio.

Administrative fee revenues increased \$7.1 million to \$172.7 million in the first half of 2013. The increase is primarily attributable to our transfer agent servicing activities and defined contribution recordkeeping services for the mutual funds and their investors. As noted above, changes in administrative fee revenues are generally offset by similar changes in related operating expenses that are incurred to provide services to the funds and their investors.

Distribution and servicing fee revenues earned from 12b-1 plans of the Advisor, R, and variable annuity class shares of our sponsored portfolios were \$54.3 million in the first half of 2013, an increase of \$8.4 million from the comparable 2012 period on greater average assets under management in these share classes. The 12b-1 fees earned are offset entirely by the costs paid to third-party intermediaries who source these assets. These costs are reported as distribution and servicing costs on the face of the condensed consolidated income statements.

Operating expenses

Compensation and related costs were \$567.4 million in the first half of 2013, an increase of \$45.2 million, or 8.7%, compared to the 2012 period. The largest part of the increase is attributable to a \$20.5 million increase in our interim accrual for our annual variable compensation program and a \$17.4 million increase in salaries and related benefits. Our average staff size has increased 3.3% from the first half of 2012. Higher temporary staff expenses, non-cash stock-based compensation expense, and other employee costs account for the remainder of the increase in compensation and related costs in the 2013 period.

Occupancy and facility costs, together with depreciation expense, increased \$11.0 million, or 10.9%, compared to the first half of 2012. The change includes costs of \$3.5 million to terminate certain facility leases, as well as costs to expand our international facilities and update technology capabilities, including related maintenance programs, to meet increasing business demands.

Other operating expenses were \$120.9 million in the first half of 2013, an increase of \$13.8 million from the comparable 2012 period as increased business demands and our continued investment in capabilities have increased costs. These costs include costs related to our defined contribution recordkeeping business, consulting and professional fees, information services, and other third-party services.

Non-operating investment income

Our non-operating investment income, which includes the recognition of investment gains and losses, was up \$7.2 million from the first half of 2012, including \$9.0 million in additional gains realized from rebalancing our available-for-sale sponsored investments portfolio and \$4.1 million in higher net gains recognized on our other non-sponsored investments. These higher gains were offset by unrealized market losses recognized on those sponsored investment portfolios that we consolidate or account for under the equity method of accounting.

CAPITAL RESOURCES AND LIQUIDITY.

Operating activities during the first half of 2013 provided cash flows of \$727.9 million, up \$233.4 million from the 2012 period, including an \$85.4 million increase in net income. Timing differences in the cash settlement of our assets and liabilities increased our operating cash flows by \$87.2 million compared to the first half of 2012. The first half of 2013 includes \$25.7 million in cash outflows compared with \$89.3 million in the 2012 period for the net purchase of securities held by consolidated sponsored investment portfolios to which we provided seed capital at their formation and were deemed to have a controlling interest. These operating cash flow increases are offset by the addback of an

additional \$9.0 million in gains recognized on the sale of certain available-for-sale sponsored fund investments as the related cash flow activity is reflected in net cash used in investing activities. Our interim operating cash flows do not include the cash impact of variable compensation that is accrued throughout the year before being substantially paid out in December.

Net cash used in investing activities totaled \$57.2 million in the first half of 2013, down \$117.5 million from the comparable 2012 period. We made \$130.4 million more net investments in our sponsored investment funds in the first half of 2012 than in the 2013 period. This decrease in cash used was offset by an \$18.4 million reduction in the net cash proceeds received from the debt securities held by our savings bank in the first half of 2013 compared to the 2012 period.

Net cash used in financing activities was \$93.9 million in the first half of 2013, down \$151.5 million from the comparable 2012 period. The first half of 2012 includes cash used of \$129.2 million for stock repurchases compared to no repurchases in the 2013 period. Cash proceeds from option exercises increased \$51.8 million in the first half of 2013 compared to the comparative 2012 period as the higher market valuation that our common stock experienced in the 2013 period led our associates to exercise their options. These cash flow increases were partially offset by the change in customer deposits at our savings bank subsidiary during the first half of 2013 and the \$24.6 million increase in dividends paid. The increase in dividends paid in the first half of 2013 is primarily due to the \$.04 increase in our quarterly per-share dividend.

Our cash and sponsored investment holdings at June 30, 2013 were nearly \$2.7 billion, and we have no debt. We anticipate property and equipment expenditures for the full year 2013 to be about \$125 million and expect to fund them from our cash balances. We generally repurchase shares of our common stock over time to offset the dilution created by our equity-based compensation plans. Given the availability of our financial resources, we do not maintain an available external source of liquidity.

NEW ACCOUNTING STANDARDS.

We have considered all other newly issued accounting guidance that is applicable to our operations and the preparation of our condensed consolidated statements, including that which we have not yet adopted. We do not believe that any such guidance will have a material effect on our financial position or results of operation.

FORWARD-LOOKING INFORMATION.

From time to time, information or statements provided by or on behalf of T. Rowe Price, including those within this report, may contain certain forward-looking information, including information or anticipated information relating to: our revenues, net income and earnings per share on common stock; changes in the amount and composition of our assets under management; our expense levels; our estimated effective income tax rate; and our expectations regarding financial markets, future transactions, investments, capital expenditures, and other market conditions. Readers are cautioned that any forward-looking information provided by or on behalf of T. Rowe Price is not a guarantee of future performance. Actual results may differ materially from those in forward-looking information because of various factors including, but not limited to, those discussed below and in Item 1A, Risk Factors, of our Form 10-K Annual Report for 2012. Further, forward-looking statements speak only as of the date on which they are made, and we undertake no obligation to update any forward-looking statement to reflect events or circumstances after the date on which it is made or to reflect the occurrence of unanticipated events.

Our future revenues and results of operations will fluctuate primarily due to changes in the total value and composition of assets under our management. Such changes result from many factors including, among other things: cash inflows and outflows in the T. Rowe Price mutual funds and other managed investment portfolios; fluctuations in global financial markets that result in appreciation or depreciation of the assets under our management; our introduction of new mutual funds and investment portfolios; and changes in retirement savings trends relative to participant-directed investments and defined contribution plans. The ability to attract and retain investors' assets under our management is dependent on investor sentiment and confidence; the relative investment performance of the Price mutual funds and other managed investment portfolios as compared to competing offerings and market indexes; the ability to maintain our investment management and administrative fees at appropriate levels; competitive conditions in the mutual fund, asset management, and broader financial services sectors; and our level of success in implementing our strategy to expand our business. Our revenues are substantially dependent on fees earned under contracts with the Price funds and could be adversely affected if the independent directors of one or more of the Price funds terminated or significantly altered the terms of the investment management or related administrative services agreements. Non-operating investment income will also fluctuate primarily due to the size of our investments and changes in their market valuations.

Our future results are also dependent upon the level of our expenses, which are subject to fluctuation for the following or other reasons: changes in the level of our advertising expenses in response to market conditions, including our efforts to expand our investment advisory business to investors outside the U.S. and to further penetrate our distribution channels within the U.S.; variations in the level of total compensation expense due to, among other things, bonuses, stock option grants, other incentive awards, changes in our employee count and mix, and competitive factors; any goodwill or investment impairment that may arise; fluctuation in foreign currency exchange rates applicable to our investment in and the costs of our international operations; changes in our effective tax rate; expenses and capital costs, such as technology assets, depreciation, amortization, and research and development, incurred to maintain and enhance our administrative and operating services infrastructure; unanticipated costs that may be incurred to protect investor accounts and the goodwill of our clients; and disruptions of services, including those provided by third parties, such as facilities, communications, power, and the mutual fund transfer agent and accounting systems.

Our business is also subject to substantial governmental regulation, and changes in legal, regulatory, accounting, tax, and compliance requirements may have a substantial effect on our operations and results, including but not limited to effects on costs that we incur and effects on investor interest in mutual funds and investing in general, or in particular classes of mutual funds or other investments.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

There has been no material change in the information provided in Item 7A of the Form 10-K Annual Report for 2012.

Item 4. Controls and Procedures.

Our management, including our principal executive and principal financial officers, has evaluated the effectiveness of our disclosure controls and procedures as of June 30, 2013. Based on that evaluation, our principal executive and principal financial officers have concluded that our disclosure controls and procedures as of June 30, 2013, are effective at the reasonable assurance level to ensure that the information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934, including this Form 10-Q quarterly report, is recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission's rules and forms, and to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is accumulated and communicated to our management, including our principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

Our management, including our principal executive and principal financial officers, has evaluated any change in our internal control over financial reporting that occurred during the second quarter of 2013, and has concluded that there was no change during the second quarter of 2013 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II – OTHER INFORMATION

Item 1. Legal Proceedings.

From time to time, various claims against us arise in the ordinary course of business, including employment-related claims. In the opinion of management, after consultation with counsel, the likelihood that an adverse determination in one or more pending claims would have a material adverse effect on our financial position or results of operations is remote.

Item 1A. Risk Factors.

With the exception of the following additions or updates to the list of current and proposed legal or regulatory requirements discussed in Item 1A of our Form 10-K Annual Report for 2012 there have been no material changes in the risk factors previously provided.
