TransAlta decommissions temporary Pacific Northwest plant

CALGARY, Alberta (Sept. 26, 2002) – TransAlta Corporation (TSX: TA; NYSE: TAC) is removing from service the 154-megawatt Pierce Power Station located in Frederickson, Washington, as intended when commissioned in August 2001. TransAlta built the simple-cycle gas-fired power facility to help alleviate a short-term power shortage in the Pacific Northwest.

TransAlta Corporation is Canada's largest non-regulated electric generation and marketing company, with more than \$7 billion in assets and 9,000 megawatts of capacity in operation or under construction. As one of North America's lowest-cost operators, our growth is focused on developing coal- and gas-fired generation in Canada, the U.S. and Mexico.
