**SEC Form 20F, File No. 0-30306**

**No. 05-107**

**NEWS RELEASE**

**MAY 2, 2005**

**Elandsfontein Acquisition Complete**

**Platinum Group Metals Ltd.** (PTM: TSXV; PTMQF: OTCBB) reports the acquisition of mineral and surface rights to 365.64 hectares of the farm Elandsfontein 102 JQ located on the south-western corner of the Western Bushveld Joint Venture ( WBJV ) property near Rustenburg, South Africa. Preliminary engineering by the Company and its advisors indicates that the property is ideally located for the installation of a trackless-developed decline into the known resource area of the WBJV and that the property is large enough to host all mine related infrastructure, equipment and facilities. Drilling completed by the Company in 2003 indicates the farm hosts sufficient platinum and palladium mineralization within the Merensky Reef to justify the cost of acquisition. The Company intends to drill along the intended path of the decline in 2005. At a 10-degree gradient it is estimated that a decline would intercept the Merensky Reef at a vertical depth of approximately 50 to 80 metres.

The Company optioned the Elandsfontein property in December 2002 and exercised its option to acquire the property in June 2003. Subsequent to exercising its option the Vendors disputed the final purchase price under the terms of the option agreement and the matter was referred to arbitration. The Vendors and the Company have settled the matter and the purchase price is the same as it would have been if calculated and paid under the original option agreement. The Company will purchase the rights in exchange for five payments to December 15, 2005 totalling Rand 7.2 million (approximately C \$1.45 million).

The Company's interests in the mineral rights to the Farm Elandsfontein 102 JQ are included in the WBJV (PTM 37%, Anglo Platinum 37%, and Africa Wide 26%). An initial resource of 4.74 million ounces platinum, palladium, rhodium and gold is reported on the WBJV. Drilling to increase the size and confidence level of this resource is now underway with 3 drilling rigs.

**About PTM**

PTM is based in Vancouver BC, Canada and is focused on the exploration and development of platinum and palladium projects in Canada and South Africa. PTM is exploring and developing significant mineral rights in the northern and western Bushveld Platinum Complex of South Africa including the large scale Western Bushveld Joint Venture with Anglo Platinum Corporation Limited and Africa Wide Mining north of Rustenburg, South Africa.

PTM is also the largest mineral rights holder in the area surrounding Canada's only primary platinum and palladium mine near Thunder Bay, Ontario. Results are pending from earlier drilling completed on the Seagull project northeast of Thunder Bay where significant platinum and palladium mineralization was recently discovered within the Seagull layered intrusion. The Company has a separate active joint venture with Anglo Platinum at Agnew Lake near Sudbury, Ontario.
