FIRST CITIZENS BANCSHARES, INC. AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)
 MARCH 31, 2005
 (Stated in Thousands)

NOTE 1 - CONSOLIDATED FINANCIAL STATEMENTS

The consolidated balance sheet as of March 31, 2005, the consolidated statements of income for the three month periods ended March 31, 2005 and 2004, and the consolidated statements of cash flows for the three-month periods then ended have been prepared by the company without an audit. The accompanying reviewed condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments necessary to present fairly the financial position, results of operations and cash flows at March 31, 2005 and for all periods presented have been made. Operating results for the reporting periods presented are not necessarily indicative of results that may be expected for the year ended December 31, 2005. For further information, refer to the consolidated financial statements and footnotes thereto included in the company's Annual Report on Form 10-K for the year ended December 31, 2004.

NOTE 2 - ORGANIZATION

First Citizens Bancshares, Inc., is a bank holding company chartered on December 14, 1982, under the laws of the State of Tennessee. On September 23, 1983, all of the outstanding shares of common stock of First Citizens National Bank were exchanged for an equal number of shares in First Citizens Bancshares, Inc.

NOTE 3 - CONTINGENT LIABILITIES

There is no material pending litigation as of the current reportable date that would result in a liability.

NOTE 4 - RESERVE FOR LOAN LOSSES

The Reserve for Loan Losses is evaluated and recorded in accordance with SFAS 5, 114 and 118 as applicable. Accordingly, certain loans have been considered impaired. Investment in impaired loans as of current quarter end is as follows:

	Balance
Impaired loans with specific reserve allocations	\$ 859,000
Impaired loans without specific reserve allocations	<u>993,244</u>
	\$ 1,852,244
	=====
Specific reserve for impaired loan losses	\$ 328,000

Interest income recognized on impaired loans has been applied on a cash basis. Interest income recognized on impaired loans is immaterial for all reportable periods presented. Cash receipts are applied as cost recovery first or principal recovery first, consistent with OCC regulations. Management is confident the overall reserves are adequate to cover possible losses within the portfolio in addition to impaired loans.

NOTE 5 - DERIVATIVE TRANSACTIONS

FASB 133, 137 and 138 - FASB 133 establishes accounting and reporting standards for derivative instruments, embedded in other contracts, and for hedging activities. It requires derivatives to be reported as either assets or liabilities in the statement of financial position and measures those instruments at fair value. The accounting for changes in the fair value of a derivative depends on the intended use of the derivative and the resulting designation. FASB 137 and 138 amended FASB 133. Bancshares' used the derivative as a cash flow to hedge the "Benchmark Interest Rate." First Citizens designated a Federal Home Loan Bank Variable LIBOR Borrowing to be hedged and effectively locked in a fixed cost on the liability.

In June 2000, First Citizens swapped a fixed investment cash flow for a variable cash flow that is tied to the 90 day LIBOR Rate. The new variable investment cash flow is matched with a variable borrowing cash flow generating a positive spread of 250 basis points with no interest rate risk. The transaction was implemented to increase earnings of First Citizens. Volume used in the transaction was \$1.5 million. Volume and risk associated with the transaction is well within the Funds Management Policy of the bank. Maturity of the hedge is 10 years.

The cash flow hedge has produced negative income because First Citizens swapped a fixed cash flow for a variable cash flow and rates later decreased. Value of the derivative increased \$50 thousand net of tax for the current reportable period. Other comprehensive income reflects fair market value of the derivative at \$177 thousand, gross and \$109 thousand, net of tax.

-5-

NOTE 6 - GOODWILL AND INTANGIBLE ASSETS

SFAS 142 addresses financial accounting and reporting for acquired goodwill and other intangible assets and supercedes APB 17. Goodwill is no longer amortized. This statement adopts a more aggregate view for goodwill and bases the accounting on the units of the combined units of the combined entity into which an acquired entity is integrated (those units are referred to as reporting units in FASB 131). Currently First Citizens' has one reporting unit and does not meet the tests to segment per FASB 131. As of January 2002, First Citizens ceased to amortize goodwill (\$25 thousand per month). Tests performed first quarter 2005, 2004 and 2003 resulted in an impairment of zero. Total goodwill as of the reportable date is \$11.8 million or 1.52% of total assets or 19.38% of total capital.

Amortization expense of the other identifiable intangibles for the quarter was \$21 thousand for 2005 and 2004.

NOTE 7 - LONG TERM OBLIGATIONS

In March 2002, the Company formed a wholly owned subsidiary First Citizens (TN) Statutory Trust II. The Trust was created under the Business Act of Delaware for the sole purpose of issuing and selling preferred securities and using proceeds from the sale to acquire long term subordinated debentures issued by Bancshares. The debentures are the sole assets of the Trust. First Citizens Bancshares owns 100% of the common stock of the Trust.

On March 26, 2002 the Company through its wholly owned subsidiary, First Citizens (TN) Statutory Trust II, sold 5,000 of its floating rate Preferred Trust Securities at a liquidation amount of \$1000 per security for an aggregate amount of \$5,000,000. For the period beginning on (and including) the date of original issuance and ending on (but excluding) June 26, 2002 the rate per annum of 5.59%. For each successive period beginning on (and including) June 26, 2002, and each succeeding interest payment date at a rate per annum equal to the 3-month LIBOR plus 3.60%; provided however, that prior to March 26, 2007, this interest rate shall not exceed 11%. Interest payment dates are: March 26, June 26, September 26, and December 26 during the 30-year term.

Bancshares' obligation under the debentures and related documents, constitute a full and unconditional guarantee by the Company of the Trust issuer's obligations under the Preferred Securities. Although the debentures are treated as debt of the Company, they are treated as Tier I capital subject to a limitation that the securities included as Tier I

capital not exceed 25% of the total Tier I capital. The securities are callable by the Company after 5 years. These funds are a partial source for the acquisition of Munford Union Bank, along with a line of credit and capital infusion from First Citizens National Bank.

In March 2005, the Company formed a wholly owned subsidiary First Citizens (TN) Statutory Trust III. The Trust was created under the Business Act of Delaware for the sole purpose of issuing and selling preferred securities and using proceeds from the sale to acquire long term subordinated debentures issued by Bancshares. The debentures are the sole assets of the Trust. First Citizens Bancshares owns 100% of the common stock of the Trust.

On March 17, 2005 the Company through its wholly owned subsidiary, First Citizens (TN) Statutory Trust III, sold 5,000 of its floating rate Preferred Trust Securities at a liquidation amount of \$1,000 per security for an aggregate amount of \$5,000,000. For the period beginning on (and including) the date of original issuance and ending on (but excluding) June 17, 2005 the rate per annum of 4.84%. For each successive period beginning on (and including) June 17, 2005, and each succeeding interest payment date at a rate per annum equal to the 3-month LIBOR plus 1.80%. Interest payment dates are: March 17, June 17, September 17, and December 17 during the 30-year term. The entire \$5 million in proceeds was used to reduce Bancshares' revolving line of credit with First Tennessee discussed in Note 8 below.

The ability of First Citizens to service its long-term debt obligation is dependent upon the future profitability of its banking subsidiaries and their ability to pay dividends to the Company.

NOTE 8 - REVOLVING LINE OF CREDIT

First Citizens Bancshares has an approved two-year renewable line of credit with First Tennessee Bank in the amount of \$13 million. As of the reportable date, the drawn amount was \$3.9 million. This note was reduced by \$5 million during first quarter 2005 by proceeds from the issuance of Trust Preferred Securities as noted in Note 7 above.

-6-

ITEM 2 - MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

GENERAL INFORMATION

First Citizens Bancshares, Inc. (the "company") headquartered in Dyersburg, Tennessee, the bank holding company for First Citizens National Bank ("the Bank"), First Citizens Capital Assets, Inc., First Citizens (TN) Statutory Trust II and First Citizens (TN) Statutory Trust III. First Citizens National Bank is a diversified financial service institution, which provides banking and other financial services to its customers. The bank operates two wholly owned subsidiaries: First Citizens Financial Plus, Inc. and First Citizens Investments, Inc. The bank also owns 50% of White and Associates/First Citizens Insurance LLC and First Citizens/White and Associates Insurance Company, Inc. First Citizens Investments, Inc. owns First Citizens Holdings, Inc. First Citizens Holdings, Inc. owns First Citizens Properties, Inc. These subsidiary activities consist of: brokerage, investments, insurance related products, credit insurance and investments in real estate mortgage participation interests.

BRANCH OPERATIONS

Land has been acquired in Collierville, Tennessee for the location of a new branch facility. A temporary banking facility opened for operations April 4, 2005. Construction of a permanent banking facility on this site began in April 2005. The permanent facility in Oakland, Tennessee was opened in February 2005. Although there are currently no other plans for additional branches, First Citizens will continue to search for expansion opportunities that will result in a positive deployment of Bancshares' capital.

FORWARD-LOOKING STATEMENTS

Quarterly reports on Form 10-Q, including all documents incorporated by reference, may contain forward-looking statements. Additional written or oral forward-looking statements may be made from time to time in other filings with the Securities Exchange Commission. The discussion of changes in operations may contain words that indicate the company's future plans, goals, and estimates of assets, liabilities or income. Forward-looking statements will express the company's position as of the date the statement is made. These statements are primarily based upon estimates and assumptions that are inherently subject to significant banking, economic, and competitive uncertainties, many of which are beyond management's control. When used in this discussion, the words, "anticipate," "project," "expect," "believe," "should," "intend," "is likely," and other expressions are intended to identify forward-looking statements. The statements are within the meaning and intent of section 27A of the Securities Exchange Act of 1934. Such statements may include, but are not limited to, projections of income or loss, expenses, acquisitions, plans for the future, and others.

CRITICAL ACCOUNTING ESTIMATES

The accounting and reporting of First Citizens Bancshares and its subsidiaries conform to accounting principles generally accepted in the United States and follow general practices within its industry. The preparation of these financial statements requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. The company's estimates are based on historical experience, information supplied from professionals, regulators and others believed to be reasonable under the facts and circumstances. Accounting estimates are considered critical if (1) management is required to make assumptions or judgments about items that are highly uncertain at the time the estimate is made, and (2) different estimates reasonably could have been used during the current period or changes in such estimates are reasonably likely to occur from period to period, that could have a material impact of the presentation of the Consolidated Financial Statements.

The development, selection and disclosure of critical accounting policies are discussed with the Audit Committee of the Board of Directors. Due to the potential impact on the financial condition or results of operations and the required subjective or complex judgments involved, management believes its critical accounting policies to consist of the allowance for loan losses, fair value of financial instruments, and goodwill and assessment of impairment.

ALLOWANCE FOR LOAN LOSSES

The allowance for loan losses on loans represents management's best estimate of inherent losses in the existing loan portfolio. Management's policy is to maintain the allowance for loan losses at a level sufficient to absorb reasonably estimated and probable losses within the portfolio. The company believes the loan loss reserve estimate is a critical accounting estimate because: changes can materially affect bad debt expense on the income statement, changes in the borrower's cash flows can impact the reserve, and management has to make estimates at the balance sheet date and also into the future in reference to the reserve. While management uses the best information available to establish the allowance for loan losses, future adjustments may be necessary if economic or other conditions change materially.

-7-

FAIR VALUE OF FINANCIAL INSTRUMENTS

Accounting principles generally accepted in the United States require that certain assets and liabilities be carried on the balance sheet at fair value. Furthermore, the fair value of financial instruments is required to be disclosed as a part of the notes to the consolidated financial statements for other assets and liabilities. Fair values are volatile and may be influenced by a number of factors, including market interest rates, prepayment speeds, discount rates, the shape of yield curves and the credit worthiness of counter parties.

Fair values for the majority of First Citizens' available-for-sale investment securities are based on quoted market prices from actively traded markets. In instances where quoted market prices are not available, fair values are based on the quoted prices of similar instruments with adjustment for relevant distinctions (e.g., size of issue, interest rate, etc.).

Fair value of the only derivative held by the company is determined using a combination of quoted market rates for similar instruments and quantitative models that are based on market inputs including rate, price and index scenarios

to generate continuous yield or pricing curves and volatility factors. Third party vendors are used to obtain fair value of available-for-sale securities and the cash flow hedge.

GOODWILL

The Company's policy is to review goodwill for impairment at the reporting unit level on an annual basis unless an event occurs that would likely impair the goodwill amount. Goodwill represents the excess of the cost of an acquired entity over fair value assigned to assets and liabilities. Management believes accounting estimates associated with determining fair value, as part of the goodwill test is a critical accounting estimate because estimates and assumptions are made based on prevailing market factors, historical earnings and multiples and other contingencies.

RESULTS OF OPERATIONS

Earnings per share increased \$0.03 or 5.55% when comparing the first quarters of 2005 and 2004. The reduction of average outstanding shares achieved through treasury stock purchases enhanced earnings per share by \$0.02 in the current quarter. Net interest income is the principal source of earnings for First Citizens and is defined as the amount of interest generated by earning assets minus interest cost to fund those assets. Net interest income increased \$97 thousand or 1.55%, when comparing first quarter of 2005 to first quarter 2004. The net yield on average earning assets declined 17 basis points from first quarter 2004 to first quarter 2005. Beginning in late June 2004, the Federal Open Market Committee (FOMC) began removing accommodative monetary conditions through consistent 25 basis point increases in federal fund rates. From June 2004 to March 2005, federal funds rates have increased from 1.00% to 2.75%. Although shorter-term rates have increased as federal funds rates have, longer-term rates have not and thus, the yield curve has continued to flatten during the second half of 2004 and into 2005. The flattened yield curve has negatively impacted net interest margins, as the market has demanded higher rates for deposits, which have outpaced increases in loan and investment yields. From first quarter 2004 to first quarter 2005, cost of total interest bearing liabilities increased 31 basis points while the yield on interest-earning assets increased a modest 13 basis points. This negative trend in net interest margins is primarily due to increases in deposit rates over increases in loan rates. Cost of deposits increased 38 basis points while loan yields increased only four basis points when comparing first quarters of 2005 and 2004. Cost of funds for Bancshares' subsidiary, First Citizens National Bank, have been 1.82%, 1.94%, 2.04%, and 2.32% over the last four quarters from second quarter 2004 to first quarter 2005, respectively.

The concern about net interest margins is not unique to First Citizens. Most financial institutions are battling margins as increases in yields on long-term assets lags behind increases in federal fund rates and other short-term liability rates. The most recent peer information contained in the December 31, 2004 Uniform Bank Performance Report (UBPR) indicates that First Citizens had net interest income to average assets of 3.63% compared to peer at 3.86%. Interest income to average assets is above peer at 5.34% compared to peer of 5.25%. Comparisons of interest expense on deposits indicate deposits are priced consistently with peer at 1.65% for First Citizens and 1.62% for peer. Interest expense on other borrowed money is much higher for First Citizens at 4.84% compared to 2.87% peer. This difference is due to fixed rate Federal Home Loan Bank (FHLB) advances, which were used to fund the balance sheet and reduce exposure to rising rates. Rates decreased subsequent to obtaining these advances in 2002 and 2003. Currently, fixed rate FHLB advances total \$64.5 million with a cost of 5.13%. The cost of these advances dilute quarterly earnings by approximately \$450,000 when compared to average cost of funds for first quarter 2005 of 2.32% for Bancshares' bank subsidiary.

Another major factor impacting peer comparisons of net interest margins is the dilution caused by significant investments in fixed assets and Bank-owned life insurance (BOLI) policies, which total approximately \$38 million or 4% of total assets as of March 31, 2005. The statement of cash flows reflects growth in fixed assets of \$2.1 million during first quarter 2005. Earnings on BOLI policies are included in other non-interest income and totaled approximately \$161,000 for first quarter 2005.

The loan loss provision for first quarter 2005 decreased \$49 thousand or 16% compared to first quarter 2004. First quarter net charge-offs for 2005 and 2004 were \$87 thousand and \$77 thousand, respectively. Reserve for losses on loans as a percent of total loans was 1.20% at March 2005 and 1.25% at March 2004. The reserve as a percent of total loans increased 0.04% from 1.16% at year-end 2004. See also Loan section below.

Non-interest income represents fees and other income derived from sources other than interest-earning assets. Non-interest income to average assets has outpaced peer over the last few years and was 1.23% compared to peer of 0.95% as of year-end 2004. Non-interest income increased \$152 thousand, or 6.21% over the prior year's first quarter. In first quarter of 2005, fee income (non-interest income) contributed 20.24% to total revenue compared to 20.62% for the same period last year. Brokerage fees, full insurance income and service charges on deposits contributed to the positive 6.21%% variance. The variance is diluted by gains on sale of securities enjoyed in first quarter 2004 that were not duplicated in First Citizens quarter 2005. In 2004, First Citizens/White and Associates Insurance Company, LLC brought suit to protect certain rights and earnings in 2004 were down due to related legal fees incurred. Settlement of the subsidiary's litigation occurred early in 2005 in favor of the subsidiary and First Citizens' portion of the gain of approximately \$150,000 was recorded in first quarter of 2005. Excluding the settlement of the litigation, income received from White and Associates/First Citizens insurance subsidiary for first quarter 2005 increased \$65,000 from first quarter 2004. Brokerage income is also \$66,000 more in first quarter 2005 compared to first quarter 2004. The following table compares non-interest income for **first quarter** of 2005, 2004 and 2003:

Non-interest expenses represent the operating expenses of First Citizens. Non-interest expense increased \$408 thousand, or 7.27%, over first quarter of 2004. Salary and benefits increased because of full time salaries, and incentive accruals. Average full-time equivalent employees are 257.42 for three months ended March 31, 2005 compared to 250.72 for three months ended March 31, 2004. Bancshares' growth strategies are also increasing certain other sectors of the non-interest expense areas such as depreciation which increased 18.45% over prior year's first quarter. The efficiency ratio as of March 31, 2005, 2004 and 2003 was 65.53%, 63.23% and 64.75%, respectively. Executive management continues to be committed to the improvement of the efficiency ratio that will meet or exceed peer group ratio with the understanding the implementation of growth strategies may temporarily increase during the digestion of new branches and pressure of tight net interest margins. Impaired Goodwill expense is \$0 for the current and prior reportable periods. The core deposit intangible expense for the current reportable quarter was flat at \$21,000. Quarter-to-date advertising, community relations, and other forms of marketing expenses were \$117 thousand or 1.94% of total non-interest expense in 2005 compared to \$107 thousand or 1.90% of total non-interest expense in 2004. All marketing or advertising items are expensed at the time they are incurred.

Total Loans	\$ 2,217	\$ 1,253	\$ 3,577	\$ 2,477	\$ 3,860
	=====	=====	=====	=====	=====

One of Bancshares' primary objectives is to seek quality-lending opportunities in West Tennessee. The majority of First Citizens' borrowers lives and conducts business in West Tennessee. Total loans were flat during first quarter of 2005. Volume is expected to grow during second quarter 2005 due to advances on agricultural production lines. Construction real estate loans grew \$26 million or 33% when comparing March 2005 to March 2004 and the growth is primarily due to the Southwest market consisting of Shelby, Tipton and Fayette Counties, Tennessee. The unemployment rate for Tennessee is 5.9% as of March 2005 compared to 5.2% in December 2004 and 5.0% in March 2004. Cash flows reflect flat loan growth at \$1.5 million versus \$19 million and \$15 million for the years of 2004 and 2003, respectively. The aggregate amount of loans that the company is permitted to make under applicable bank regulations to any one borrower is 15% of unimpaired capital. First Citizens National Bank's legal lending limit at March 31, 2005 was \$10.16 million. Non-performing loans at quarter end were 0.42% of total loans. Weighted average loan yields had a slight increase from 6.56% in 2004 to 6.60% in 2005. Loan rates have begun to increase as a result in the increase in federal funds rates, but the loan yield increases have lagged well behind the increase in cost of short-term funding due to the flat yield curve as well as local economic and competitive factors.

AGRICULTURAL LOANS

First Citizens is one of the largest agriculture lenders in the State of Tennessee and is an approved Farm Credit Services lender. Agriculture makes a significant contribution to Dyer County commerce, generating approximately \$75-\$85 million in revenue on an annual basis. Agricultural credits secured by farmland and other types of collateral comprise more than \$47 million of total loans. Recoveries, net of charge-offs in this category were \$10 thousand for first quarter of 2005.

LOAN LOSS EXPERIENCE AND RESERVES FOR LOAN LOSSES

An analytical model based on historical loss experience, current trends and economic conditions as well as reasonably foreseeable events is used to determine the amount of provision to be recognized and to test the adequacy of the loan loss allowance. The ratio of allowance for loan losses to total loans, net of unearned income, was 1.20% for the current quarter and 1.16% at year-end 2004. A recap of activity posted to the Reserve account in current quarter resulted in the following transactions: (1) loans charged-off (\$131,000) (2) recovery of loans previously charged off \$44,000 and (3) additions to reserve \$251,000. The provision for loan losses decreased \$49,000 when compared to the same time period in 2004.

The ratio of net charged off loans during first quarter 2005 to average net loans outstanding was 0.02% compared to 0.01% for the same quarter of 2004. Non-performing loans as of current quarter end have increased approximately \$964 thousand from March 2004. Despite an increase from prior year, non-performing loans remain at a very manageable level and within the range of non-performing averages over the last five years and less than 0.5% of total loans. First Citizens had no concentrations of credit of 10 percent or more of total loans in any single industry. There are no material reportable contingencies as of this report date.

LIQUIDITY

Liquidity is managed to ensure there is ample funding to satisfy loan demand, investment opportunities, and large deposit withdrawals. Bancshares primary funding sources include customer core deposits, FHLB Borrowings, other borrowings, and correspondent borrowings. Customer based sources accounted for 83% of the funding for the current and prior years. Borrowed funds from the FHLB amounted to 11.94% of total funding for year 2004 compared to 10.20% last year. The FHLB line of credit was \$101 million with \$32 million available at quarter end. The Company has \$23 million in deposit funds from the State of Tennessee. First Citizens National Bank has \$23 million of brokered certificate of deposits comprising 3.85% of total deposits.

The bank's current liquidity position has improved since year-end 2004 due to flat loan growth and increase of \$5 million in fed funds sold. The cash flow statement reflects the smallest outflow for loans in first quarter 2005 versus the previous two years of \$19 million and \$14 million in first quarters 2004 and 2003, respectively. Growth in deposits was modest at approximately \$3 million. Although deposit growth is expected to continue, loan demand is expected to increase at a higher rate throughout the remainder of 2005. Ample liquidity is available to absorb the demands placed on cash flows for the expected growth.

The bank's liquidity position has been strengthened by ready access to a diversified base of wholesale borrowings. These include correspondent borrowings, federal funds purchased, securities sold under agreements to repurchase, Federal Home Loan Bank, Brokered certificates of deposit, and others. First Citizens Bank has available lines of credit with the FHLB and correspondent banks totaling \$125 million as of current quarter-end. Bancshares has a (\$13 million) line of credit established for acquisitions and other holding company needs (see long-term debt and revolving line of credit footnotes). Since the 2002 merger with Munford Union Bank, the focus for growth has been on internally generated growth through new branches. The company has a crisis contingency liquidity plan at the bank and holding company level to defend against any material downturn in our liquidity position.

INVESTMENT SECURITIES

Investment securities are primarily held in the bank's subsidiary, First Citizens Investments, Inc. and in its subsidiary, First Citizens Holdings, Inc. The bank has a portfolio advisory agreement with FTN Financial to manage the investment portfolio. Peer data per the December 31, 2004 Uniform Bank Performance Report indicates that our yields on investments exceed peer at 4.14% compared to 4.06% peer. Quarterly average rates for taxable and tax-exempt securities for the current quarter end have increased 22 and 102 basis points, respectively, over prior year's first quarter. The investment portfolio is heavily weighted in mortgage-related securities, which account for approximately 50% of the total portfolio. Bancshares' goal is to steadily improve the investment portfolio without taking on material risk.

The pledged investments amount to \$109 million as of the current reportable period.

The book value of listed investment securities as of the dates indicated are summarized as follows:

	<u>AS OF MARCH 31,</u>				
	<u>2005</u>	<u>2004</u>	<u>2003</u>	<u>2002</u>	<u>2001</u>
U.S. Treasury & Government Agencies	\$ 95,449	\$ 111,510	\$ 105,561	\$ 77,409	\$ 68,275

	=====	=====	=====	=====

*Includes Federal Home Loan Bank and Federal Reserve Bank stock which are classified as Other Assets on the Balance Sheet consistent with regulatory reporting classifications.

Accumulated other comprehensive income reflects the unrealized gain (loss) on securities, net of tax. During first quarter 2005, the unrealized gain (loss) on securities significantly decreased due to the current rising interest rate environment and the flattened yield curve and its impact on the 10-year Treasury rate. The market value of the investment portfolio is heavily influenced by the 10-year Treasury benchmark due to the volumes of U. S. Government Treasury and Agency securities (including mortgage-related investments) that comprise our portfolio. The 10-year Treasury rate increased in first quarter from about 4.2 - 4.3% in December 2004 to 4.5 - 4.6% in March 2005. Other comprehensive income for the current quarter, net of tax, was a loss of approximately \$1 million. The decrease in market value of the portfolio is due entirely to the current interest rate environment and does not relate to quality of the issuer or the issuer's ability to repay the bonds.

The only derivative transaction of Bancshares or its subsidiaries is an interest rate swap, which is discussed in the derivative transactions footnote.

CAPITAL RESOURCES

The management of the equity section in a highly regulated environment requires a balance between leveraging and return on equity while maintaining adequate capital amounts and ratios. Total capital on March 31, 2005 was \$61.0 million, down 0.34% from \$61.2 million on December 31, 2004. The decrease in capital was from negative fair market moves in the investment portfolio (other comprehensive income) offset by undistributed income from the Bank and its subsidiaries. Bancshares has historically maintained capital in excess of minimum levels established by the Federal Reserve Board. The risk based capital ratio reflects continuous improvement when reviewing prior years. Total risk-based capital ratio as of March 31, 2005 was 11.86%, significantly in excess of the 8% mandated by Regulatory Authorities. Capital as a percentage of total assets for the quarter ending March 31, is presented in the following table for the years indicated (excluding loan loss reserves):

AS OF MARCH				
	31,			
<u>2005</u>		<u>2004</u>	<u>2003</u>	<u>2002</u>
7.86%		8.06%	7.98%	9.30%
				<u>2001</u>
				9.45%

The dividend payout ratio was 49.12% for the current period versus 51.95% and 49.94% for first quarter 2004 and 2003, respectively. We anticipate the dividend payout ratio to end the year in the range of 49-51%. Dividends per share remain at \$0.28 per quarter due to Bancshares' strategy to reduce outstanding debt on the revolving line of credit during 2005. First quarter dividends per share were \$0.28 for 2005 and 2004. Bancshares has re-purchased approximately 8,000 shares of its own stock in the open market since December 31, 2004. Stock repurchase average price for first quarter 2004 was \$31.00 per share.

RECENTLY ISSUED ACCOUNTING STANDARDS

There were no significant accounting pronouncements issued by the Financial Accounting Standards Board during the quarter ended March 31, 2005.

INTEREST RATE RISK

The bank maintains a formal asset and liability management process to quantify, monitor and control interest rate risk. The Asset/Liability Committee strives to maintain stability in net interest margin under various interest rate cycles. Multiple strategies have been utilized to reduce interest rate risk and include the following: extended long-term Federal Home Loan Bank borrowings, shortened the re-pricing date of loans, encourage existing deposit customers to extend maturities past one year, reduced overnight borrowings exposure, implemented an interest rate swap (see below), and increased mortgage-related investments securities to provide constant cash inflows.

First Citizens swapped a \$1,500,000 fixed investment cash flow for a variable cash flow stream tied to 90 day LIBOR rate June 2000. The new variable investment cash flow is matched with a variable borrowing, resulting in an ongoing positive spread of 250 basis points with no interest rate risk. The transaction was implemented to increase earnings and reduce interest rate risk. The cash flow hedge has produced a positive income, but because the bank swapped a fixed cash flow for a variable cash flow and rates have declined the value of the derivative has decreased since inception. The volume and risk associated with this derivative is well within the Funds Management Policy of the bank. There have been no material changes since year-end 2001 applicable to this transaction.

ITEM 3 - QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

A comprehensive qualitative and quantitative analysis regarding market risk was disclosed in the Company's December 31, 2004 Form 10-K. The trend of increasing interest rates that began in late June 2004 continues in 2005 with Federal Funds rate of 2.75% as of current quarter end compared to 1.00% prior year first quarter. The effects of the new rising rate environment are discussed throughout Item 2 - Management's Discussion and Analysis including

the following sections: Results of Operations, Loans, Liquidity, and Interest Rate Risk. The analysis included in the December 31, 2004 Form 10-K included scenarios for a rising rate environment. Actual results for the year ended December 31, 2005 will differ from simulations due to timing, magnitude, and frequency of interest rate changes, market conditions and management strategies.

ITEM 4 - CONTROLS AND PROCEDURES

An evaluation of the effectiveness of the design and operation of disclosure controls and procedures was performed as of March 31, 2005 under the supervision and with the participation of Management, including the Chief Executive Officer and Chief Financial Officer. Based on that evaluation, Management including the Chief Executive Officer and Chief Financial Officer, concluded that disclosure controls and procedures were designed and operating effectively as of March 31, 2005. Also, there have been no material changes in internal control over financial reporting during the quarter ended March 31, 2005 or subsequently.
