INNODATA ISOGEN, INC. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
NINE MONTHS ENDED SEPTEMBER 30, 2007 AND 2006
(Unaudited)

1. DESCRIPTION OF BUSINESS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Description of Business-Innodata Isogen, Inc. and subsidiaries (the "Company"), is a leading provider of business services that help organizations create, manage, use and distribute information more effectively and economically. The Company provides content-related business process outsourcing (BPO) services and content-related information technology (IT) professional services. The Company's content-related BPO services focus on fabrication services and knowledge services. Fabrication services include digitization and data conversion services, content creation and XML services. Knowledge services include content enhancement, hyperlinking, indexing and general editorial services. The Company's content-related IT professional services focus on the design, implementation, integration and deployment of systems used to author, manage and distribute content.

Basis of Presentation-Consolidated financial statements for the interim periods included herein are unaudited; however, they contain all adjustments (consisting of only normal recurring accruals) which in the opinion of management, are necessary to present fairly the consolidated financial position of the Company as of September 30, 2007, the results of its operations and its cash flows for the three and nine months ended September 30, 2007 and 2006. The results of operations for the interim periods are not necessarily indicative of results that may be expected for any other interim period or for the full year.

Principles of Consolidation-The consolidated financial statements include the accounts of Innodata Isogen, Inc. and its subsidiaries, all of which are wholly owned. All significant intercompany transactions and balances have been eliminated in consolidation.

Use of Estimates-In preparing financial statements in conformity with accounting principles generally accepted in the United States of America, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities, and the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Significant estimates include deferred taxes and related valuation allowances, allowances for bad debts and billing adjustments, cash flows used in impairment analysis of long-lived assets, litigation accruals, post retirement benefits, and estimated accruals for various tax exposures.

These financial statements should be read in conjunction with the financial statements and notes thereto for the year ended December 31, 2006 included in the Company's Annual Report on Form 10-K. Unless otherwise noted, the accounting policies used in preparing these financial statements are the same as those described in the December 31, 2006 financial statements.

Foreign Currency-The functional currency for the Company's production operations located in the Philippines, India and Sri Lanka is U.S. dollars. As such, transactions denominated in Philippine pesos, Indian and Sri Lanka rupees were translated to U.S. dollars at rates which approximate those in effect on transaction dates. Monetary assets and liabilities denominated in foreign currencies at September 30, 2007 and 2006 were translated at the exchange rate in effect as of those dates. Exchange gains and (losses) resulting from such transactions were (\$89,000) and \$90,000 in the three months ended September 30, 2007 and 2006, respectively, and (\$291,000) and (\$46,000) in the nine months ended September 30, 2007 and 2006, respectively.

Cash Equivalents-For financial statement purposes (including cash flows), the Company considers all highly liquid debt instruments purchased with an original maturity of three months or less to be cash equivalents.

2. GOODWILL AND OTHER INTANGIBLE ASSETS

Goodwill represents the excess purchase price paid over the fair value of net assets acquired. Effective July 1, 2002, the Company adopted SFAS No. 142, "Goodwill and Other Intangible Assets." Under SFAS 142, the Company tests its goodwill on an annual basis using a two-step fair value based test. The first step of the goodwill impairment test, used to identify potential impairment, compares the fair value of a reporting unit, with its carrying amount, including goodwill. If the carrying amount of the reporting unit exceeds its fair value, the second step of the goodwill impairment test must be performed to measure the amount of the impairment loss, if any. If impairment is determined, the Company will recognize additional charges to operating expenses in the period in which they are identified, which would result in a reduction of operating results and a reduction in the amount of goodwill.

The Company performed the preliminary annual impairment test on September 30, 2007. The estimated fair values of the reporting unit exceeded its carrying amount, including goodwill. Furthermore, the Company is in the process of realigning resources, revenues and cost structures for IT Professional Services and new BPO service offerings in 2008. The Company will continue to monitor the effect on goodwill in the succeeding quarters and record potential adjustment if such occurs.

3. LONG TERM OBLIGATIONS

In 2007, the Company financed the acquisition of certain computer and communications equipment approximating \$819,000. The capital lease obligations bear interest ranging from 6% to 10% and are payable over two to five years.

The cost of equipment under capital leases is included in the balance sheets as property, plant, and equipment and was \$1,526,000 and \$707,000 at September 30, 2007 and December 31, 2006, respectively. Accumulated amortization of the leased equipment at September 30, 2007 and December 31, 2006, was approximately \$760,000 and \$671,000, respectively. Amortization of assets under capital leases is included under depreciation expense.

The future minimum lease payments required under the capital leases and the present value of the net minimum lease payments as of September 30, 2007 are as follows (in thousands):

As of September 30	Amount
2008	341
2009	315
2010	189
2011	10
Thereafter	2
Total minimum lease payments	857
Less: Amount representing interest	96
Present value of net minimum lease payments	761
Less: Current maturities of capital lease obligations	285
Long-term capital lease obligations	476

In 2006, the Company financed the acquisition of software licenses totaling \$164,000. The amount is payable in equal quarterly installments through December 31, 2007.

Total long term obligations as of September 30, 2007 and December 31, 2006 consist of the following (amounts in thousands):

	2007	2006
Vendor obligations for software licenses	\$ 167	\$ 609
Capital lease obligations	761	23
Deferred lease payment	74	27
Pension obligations - accrued pension liability	893	877
	1,895	1,536
Less: current portion of long term obligations	451	632
Long term obligations	\$ 1,444	\$ 904

4. COMPREHENSIVE INCOME / LOSS

Other comprehensive losses for the three months and nine months ended September 30, 2007 amounted to \$60,000 and \$24,000, respectively, and are principally due to changes in the transitional project benefit obligation under SFAS 158 Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans. Total comprehensive income after considering the impact of these adjustments were \$2,055,000 for the three months ended September 30, 2007 and \$2,310,000 for the nine months ended September 30, 2007.

5. INCOME TAXES

The provision for income taxes for the three and nine months ended September 30, 2007 and 2006 principally represents foreign taxes.

In assessing the realization of deferred tax assets, management considers whether it is more likely than not that all or some portion of the deferred tax assets will not be realized. The ultimate realization of the deferred tax assets is dependent upon the generation of future taxable income during the periods in which temporary differences are deductible and net operating losses are utilized. Based on a consideration of these factors, the Company has established a valuation allowance of approximately \$4,293,000 and \$4,269,000, at September 30, 2007 and December

31, 2006, respectively.

10

The Company adopted Financial Accounting Standards Board (“FASB”) Interpretation No. 48 (“FIN 48”) “Accounting for Uncertainty in Income Taxes” on January 1, 2007. FIN 48 requires companies to determine whether it is “more likely than not” that a tax position will be sustained upon examination by the appropriate taxing authorities before any tax benefit can be recorded in the financial statements. It also provides guidance on the recognition, measurement, classification and disclosure in the financial statements for uncertain tax positions taken or expected to be taken in a tax return. No cumulative effect of a change in accounting principle or adjustment to the liability for unrecognized tax benefits was recognized as a result of the adoption of FIN 48. Accordingly, the adoption of FIN 48 did not have an effect on the results of operations or financial position of the Company.

The Company is subject to US federal income tax as well as income tax in various states and foreign jurisdictions. In the third quarter of 2007, the IRS completed the audit of the Company’s 2004 and 2005 income tax returns, which resulted in a decrease to the Company’s net operating loss carryforward of approximately \$70,000.

The Company is no longer subject to examination of federal and New Jersey taxing authorities for years prior to 2006.

Various foreign subsidiaries currently have open tax years ranging from 2003 through 2006.

Pursuant to an income tax audit by the Indian bureau of taxation, on March 27, 2006, one of the Company’s Indian subsidiaries received a tax assessment approximating \$399,000, including interest through September 30, 2007, for the fiscal tax year ended March 31, 2003. Management disagrees with the basis of the tax assessment, and has filed an appeal against the assessment, which it will fight vigorously. The Indian bureau of taxation has also completed an audit of the Company’s Indian subsidiary’s income tax return for the fiscal tax year ended March 31, 2004. The ultimate outcome was favorable, and there was no tax assessment imposed for the fiscal tax year ended March 31, 2004. On March 20, 2007, the Indian bureau of taxation commenced an audit of the subsidiary’s income tax return for the fiscal year ended 2005. The ultimate outcome cannot be determined at this time.

The liability for net unrecognized tax benefits at September 30, 2007 and December 31, 2006 was approximately \$443,000 and \$481,000, respectively. This liability represents an accrual relating to uncertain income tax positions the Company has taken on its domestic and foreign tax returns. The Company reports interest expense and penalties related to income tax liabilities as a component of its provision for income taxes. As of September 30, 2007 and December 31, 2006, the Company had accrued a liability for interest and penalties totaling approximately \$143,000 and \$138,000, respectively.

Furthermore the Company had unrecognized tax benefits of \$176,000 and \$167,000 as of September 30, 2007 and December 31, 2006, respectively, which, if recognized, would increase the Company's net operating loss carryforward. Such increase, if recognized, would not have an impact on the Company's effective tax rate since the increase to its deferred tax assets would result in a corresponding increase to its valuation allowance.

The following presents a roll forward of the Company's unrecognized tax benefits and associated interest for the nine months ended September 30, 2007 (amounts in thousands):

	Unrecognized tax benefits	Interest and penalties
Balance - January 1, 2007	\$ 648	\$ 138
Settlement of IRS income tax audit	(167)	-
Reduction of state tax liability resulting from settlement of IRS audit	(67)	-
Unrecognized tax benefits	208	-
Interest accrual	-	5
Other	(3)	-
Balance - September 30, 2007	\$ 619	\$ 143

As a result of the IRS audit settlement mentioned above, the Company recognized approximately \$234,000 of previously unrecognized tax benefits in the third quarter of 2007. The table above also reflects an additional \$208,000 of unrecognized tax benefits relating to uncertain income tax positions. The Company is subject to various tax audits and claims which arise in the ordinary course of business. Management currently believes that the ultimate outcome of these audits and claims will not have a material adverse effect on the Company's financial position or results of operations.

6. COMMITMENTS AND CONTINGENT LIABILITIES

Line of Credit-The Company has an uncommitted line of credit of \$5 million which expires on May 31, 2008. Under the terms of the agreement any amounts drawn against this facility must be secured by a certificate of deposit of an equal amount. Additionally, any amounts drawn will bear interest at the bank's alternate base rate plus ½% or LIBOR plus 3%. The Company has no outstanding obligations under this credit line.

Litigation - In connection with the cessation of operations in 2002 at certain Philippine subsidiaries, and the failure in 2001 to arrive at agreeable terms for a collective bargaining agreement with one of these subsidiaries, certain former employees and the Innodata Employee Association (IDEA) filed various actions against subsidiaries of Innodata Isogen, Inc., and also purportedly against Innodata Isogen, Inc. and certain of the Company's officers and directors. The Supreme Court of the Philippines has refused to review a decision in these actions by a lower appellate court against one of these subsidiaries in the Philippines that is inactive and has no material assets, and purportedly also against Innodata Isogen, Inc., that orders the reinstatement of certain former employees to their former positions and payment of back wages and benefits that aggregate approximately \$6.5 million. The Philippine subsidiary has filed a motion with the Supreme Court to reconsider the refusal of the Supreme Court to review the decision of the lower appellate court. All other Company affiliates were found by the lower appellate court to have no liability. Based on consultation with legal counsel, the Company believes that should the order of the lower appellate court be upheld, recovery against Innodata Isogen, Inc. would nevertheless be unlikely.

The Company is also subject to various legal proceedings and claims which arise in the ordinary course of business.

While management currently believes that the ultimate outcome of these proceedings will not have a material adverse effect on the Company's financial position or overall trends in results of operations, litigation is subject to inherent uncertainties. Substantial recovery against the Company in the above referenced Philippines actions could have a material adverse impact on the Company, and unfavorable rulings or recoveries in the other proceedings could have a material adverse impact on the operating results of the period in which the ruling or recovery occurs. In addition, the Company's estimate of potential impact on the Company's financial position or overall results of operations for the above legal proceedings could change in the future.

7. EMPLOYMENT AGREEMENTS

On May 18, 2007, the Company entered into a three year agreement with its Chief Operating Officer ("COO") whereby the Company agreed to cause two of its subsidiaries to employ the COO. The agreement, which has an effective date of January 1, 2007, provides for annual base compensation of \$175,000 subject to annual reviews for discretionary annual increases by the Company; incentive compensation pursuant to an incentive compensation plan; and a signing bonus of \$30,000. The agreement also provides for insurance and other fringe benefits, and contains confidentiality, non-compete and non-interference provisions. In the event the Company terminates the agreement without cause, the COO is entitled to receive his then base salary for 12 months following the date of termination.

8. RESTRUCTURING COST

As part of an overall cost reduction plan to reduce operating costs, in September 2006 the Company announced a worldwide workforce reduction of slightly under 300 employees, the majority of whom were based in Asia. Most of these employees were terminated prior to September 30, and the plan was complete as of June 30, 2007.

As of December 31, 2006, accrued expenses included approximately \$102,000 related to restructuring costs charged in 2006. During the nine months ended September 30, 2007, the Company paid severance costs totaling \$102,000.

9. STOCK OPTIONS

The following table presents information related to stock options for the nine months ended September 30, 2007.

	Number Outstanding	Weighted Average Exercise Price	Number Exercisable	Weighted Average Exercise Price

\$2.00	95,844	7	\$ 2.00	180,187	95,844	\$ 2.00	180,187
\$2.59 - 2.88	1,244,346	4	\$ 2.60	1,596,506	1,221,846	\$ 2.59	1,574,006
\$3.00 - 4.00	1,454,750	7	\$ 3.45	604,068	1,382,237	\$ 3.45	588,981
	3,330,440			\$ 4,135,671	3,235,427		\$ 4,098,084

The fair value of options at date of grant was estimated using the Black-Scholes pricing model with the following weighted average assumptions for options granted in the nine months ended September 30, 2007: eight years; risk free interest rate of 4.61%; expected volatility of 123% and a zero dividend rate. The weighted average grant date fair value of options granted in 2007 was \$2.98. No options were granted during the nine months ended September 30, 2006.

The number and weighted-average grant-date fair value of non-vested stock options is as follows:

	Shares	Weighted Average Grant-Date Fair Value
Non-vested January 1, 2007	70,783	\$ 2.92
Granted 2007	105,000	\$ 2.99
Forfeited 2007	(39,692)	\$ 2.81
Vested 2007	(41,078)	\$ 2.66
Non-vested September 30, 2007	95,013	\$ 3.13

The total compensation cost related to non-vested stock options not yet recognized as of September 30, 2007 totaled approximately \$254,000. The weighted-average period over which these costs will be recognized is thirty-five months.

The total intrinsic value of options exercised during the nine months ended September 30, 2007 and September 30, 2006 was \$3,702,000 and \$1,131,000 respectively. The total grant date fair value of stock options vested during the nine months ended September 30, 2007 was \$109,000.

On September 12, 2007, the Company's Chairman and CEO (the "CEO") exercised 1,139,160 stock options at a total exercise price of \$882,844. The CEO paid the exercise price by surrendering to the Company 229,310 of the shares of common stock he would have otherwise received on the option exercise. In addition, the CEO surrendered 395,695 shares to the Company in consideration of the payment by the Company on his behalf of \$1,523,426 of the Company's minimum withholding tax requirement payable in respect of the option exercise. Because the payment value attributable to the surrendered shares upon settlement does not exceed the fair value of the option, no compensation cost was recognized at the date of settlement. In connection with this transaction, the Company issued a net total of 514,155 shares of common stock to the CEO.

10. SEGMENT REPORTING AND CONCENTRATIONS

The Company's operations are classified into two reporting segments: (1) content-related BPO services and (2) content-related IT professional services. The content-related BPO services segment focuses on fabrication services and knowledge services. Fabrication services include digitization and data conversion services, content creation and XML services. Knowledge services include content enhancement, hyperlinking, indexing and general editorial services. The content-related IT professional services segment focuses on the design, implementation, integration and deployment of systems used to author, manage and distribute content. The Company's content-related BPO services revenues are generated principally from its production facilities located in the Philippines, India and Sri Lanka. The Company does not depend on revenues from sources internal to the countries in which the Company operates; nevertheless, the Company is subject to certain adverse economic and political risks relating to overseas economies in general, such as inflation, currency fluctuations and regulatory burdens.

One client accounted for 36% of our total revenues for the three months ended September 30, 2007. A second client accounted for 17% and 31% of our total revenues for the three months ended September 30, 2007 and 2006, respectively. A third client accounted for 11% of our revenues for the three month period ended September 30, 2006. No other client accounted for 10% or more of our total revenues for these periods. Further, for the three months ended September 30, 2007 and 2006, revenues from clients located in foreign countries (principally in Europe) accounted for 23% and 38% respectively, of our total revenues.

One client accounted for 30% of our total revenues for the nine months ended September 30, 2007. Another client accounted for 17% and 28% of our total revenues for the nine months ended September 30, 2007 and 2006, respectively. Two other clients accounted for 12% and 10% of our revenue for the nine months ended September 30, 2006. No other client accounted for 10% or more of our total revenues for these periods. Further, for each of the nine months ended September 30, 2007 and 2006, revenues to non-US clients accounted for 23% and 36% respectively, of the Company's revenues.

A significant amount of the Company's revenues is derived from clients in the publishing industry. Accordingly, the Company's accounts receivable generally include significant amounts due from such clients. In addition, as of September 30, 2007, approximately 19% of the Company's accounts receivable was from foreign (principally European) clients and 52% of accounts receivable was due from two clients.

11. INCOME (LOSS) PER SHARE

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2007	2006	2007	2006
Net income (loss)	\$ 2,115	\$ (2,196)	\$ 2,334	\$ (6,494)
Weighted average common shares outstanding	24,122	24,050	23,994	24,057
Dilutive effect of outstanding options	1,437	-	1,124	-
Adjusted for dilutive computation	25,559	24,050	25,118	24,057
Basic income (loss) per share	\$.09	\$ (.09)	\$.10	\$ (.27)
Diluted income (loss) per share	\$.08	\$ (.09)	\$.09	\$ (.27)

Basic income (loss) per share is computed by dividing income (loss) available to common shareholders by the weighted-average number of common shares outstanding during the period. Diluted income (loss) per share is computed by dividing income (loss) available to common shareholders by the weighted-average number of common shares outstanding during the period increased to include the number of additional common shares that would have been outstanding if the dilutive potential common shares had been issued. The dilutive effect of the outstanding options is reflected in diluted income (loss) per share by application of the treasury stock method. Options to purchase 665,000 and 2.9 million shares of common stock in the nine months ended September 30, 2007 and 2006, respectively, were outstanding but not included in the computation of diluted income per share because the options' exercise price was greater than the average market price of the common shares and therefore, the effect would have been antidilutive. In addition, diluted net loss per share does not include 691,000 and 834,000 potential common shares derived from stock options for the three months and nine months ended September 30, 2006, respectively, because as a result of the Company incurring losses, their effect would have been antidilutive.

There is no effect of antidilutive shares on income per share for the three months ended September 30, 2007.

12. SIGNIFICANT NEW ACCOUNTING PRONOUNCEMENTS NOT YET ADOPTED

In February 2007, FASB issued Statement of Financial Accounting Standards ("SFAS") No. 159, The Fair Value Option for Financial Assets and Financial Liabilities Including an Amendment of FASB Statement No. 115 ("SFAS 159"). SFAS 159 permits entities to choose to measure many financial instruments and certain other items at fair value. SFAS 159 is effective for fiscal years beginning after November 15, 2007. The Company is currently evaluating the impact of adopting SFAS 159 on its financial statements.

In September 2006, FASB issued SFAS No. 157, Fair Value Measurements ("SFAS 157"). FAS 157 establishes a common definition for fair value under accounting principles generally accepted in the United States of America ("GAAP"), establishes a framework for measuring fair value and expands disclosure requirements about such fair value measurements. SFAS 157 is effective for fiscal years beginning after November 15, 2007. The Company is currently evaluating the impact of adopting SFAS 157 on its financial statements.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Disclosures in this Form 10-Q contain certain forward-looking statements, including without limitation, statements concerning our operations, economic performance, and financial condition. These forward-looking statements are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. The words “estimate,” “believe,” “expect,” and “anticipate” and other similar expressions generally identify forward-looking statements, which speak only as of their dates.

These forward-looking statements are based largely on our current expectations, and are subject to a number of risks and uncertainties, including without limitation, continuing revenue concentration in a limited number of clients, continuing reliance on project-based work, worsening of market conditions, changes in external market factors, the ability and willingness of our clients and prospective clients to execute business plans which give rise to requirements for digital content and professional services in knowledge processing, difficulty in integrating and deriving synergies from acquisitions, potential undiscovered liabilities of companies that we acquire, changes in our business or growth strategy, the emergence of new or growing competitors, various other competitive and technological factors, and other risks and uncertainties indicated from time to time in our filings with the Securities and Exchange Commission.

Our actual results could differ materially from the results referred to in the forward-looking statements. In light of these risks and uncertainties, there can be no assurance that the results referred to in the forward-looking statements contained in this release will occur.

We undertake no obligation to update or review any guidance or other forward-looking information, whether as a result of new information, future developments or otherwise.

The Company

Innodata Isogen, Inc. and subsidiaries (the “Company”), is a leading provider of business services that help organizations create, manage, use and distribute information more effectively and economically. The Company provides content-related business process outsourcing (BPO) services and content-related information technology (IT) professional services.

The Company’s content-related BPO services focus on fabrication services and knowledge services. Fabrication services include digitization and data conversion services, content creation and XML services. Knowledge services include content enhancement, hyperlinking, indexing and general editorial services.

The Company’s content-related IT professional services focus on the design, implementation, integration and deployment of systems used to author, manage and distribute content.

Services for business processes that we anticipate a client will require for an indefinite period generate what we regard as recurring revenues. Services for a specific project generate revenues that we regard as non-recurring.

We have experienced, and expect to continue to experience, significant fluctuations in our quarterly revenues and results of operations. While we seek, wherever possible, to counterbalance periodic declines in revenues on completion of large projects with new arrangements to provide services to the same client or others, we have at times been unable to avoid declines in revenues when large projects are completed, and we may continue to encounter this difficulty in the future. Our inability in any period to obtain sufficient new projects to counterbalance any decreases in such work adversely affects our revenues and results of operations for the period.

We have historically relied on a very limited number of clients that have accounted for a significant portion of our revenues. We may lose any of these or any of our other major clients as a result of our failure to meet or satisfy our clients' requirements; the completion, termination or reduction of a project or engagement; or the selection of another service provider. Our revenues and results of operations are adversely affected when these events occur.

Our services are typically subject to client requirements, and in many cases are terminable by the client upon 30 to 90 days' notice.

Other factors, some of which are beyond our control, that may also affect our quarterly results include the size, mix, timing and terms and conditions of client projects; variations in the duration, size and scope of our projects or engagements; market acceptance of our clients' new products and services; our ability to manage costs; local factors and events that affect our production volume, such as local holidays; unforeseen events, such as earthquakes, storms and civil unrest; currency exchange fluctuations; changes in pricing policies by us or our competitors; the introduction of new services by us or our competitors; and acquisition and integration costs related to possible acquisitions of other businesses.

Our production facilities are located in the Philippines, India and Sri Lanka. To the extent that the currencies of these countries fluctuate, we are subject to risks of changing costs of production after pricing is established for certain customer projects. However, the majority of our contracts contain provisions for an annual price adjustment.

Direct operating costs for both our content-related BPO services and content-related IT professional services consist of direct payroll, occupancy costs, depreciation, telecommunications, computer services and supplies.

Selling and administrative expenses for both our content-related BPO services and content-related IT professional services consist of management and administrative salaries, selling and marketing costs and administrative overhead.

Results of Operations

Three Months Ended September 30, 2007 and 2006

Revenues

Revenues were \$18.1 million for the three months ended September 30, 2007 compared to \$10.4 million for the similar period in 2006, an increase of 74%.

Revenues from content-related BPO services increased 90% to \$17.3 million for the three months ended September 30, 2007 from \$9.1 million for the similar period in 2006. The \$8.2 million increase in revenues, which is principally attributable to one customer, reflects a \$3.9 million increase from recurring revenue and \$4.3 million from non-recurring project revenue. Furthermore, more than 59% of the total revenue increase is attributable to knowledge services.

Revenues from content-related IT professional services decreased 40% to \$784,000 for the three months ended September 30, 2007, from \$1.3 million for the similar period in 2006. Although there were revenues derived from new projects that started during the second quarter of 2007, there were also decreases due to the completion in 2007 of several IT professional services projects.

One client accounted for 36% of our total revenues for the three months ended September 30, 2007. A second client accounted for 17% and 31% of our total revenues for the three months ended September 30, 2007 and 2006, respectively. A third client accounted for 11% of our revenues for the three month period ended September 30, 2006. No other client accounted for 10% or more of our total revenues for these periods. Further, for the three months ended September 30, 2007 and 2006, revenues from clients located in foreign countries (principally in Europe) accounted for 23% and 38% respectively, of our total revenues.

For the three months ended September 30, 2007, approximately 56% of our revenue was recurring and 44% was non-recurring, compared with 61% and 39%, respectively, for the three months ended September 30, 2006. All recurring revenues are from content-related BPO services segment.

Direct Operating Costs

Direct operating costs were \$12.5 million and \$8.9 million for the three months ended September 30, 2007 and 2006, respectively, an increase of 40%. Direct operating costs as a percentage of revenues for the three months ended September 30, 2007 and 2006, were 69% and 85% respectively.

Direct operating costs for content-related BPO services were \$11.5 million and \$7.9 million in the three months ended September 30, 2007 and 2006, respectively, an increase of 46%. Direct operating costs of content-related BPO services as a percentage of revenues from content related BPO services were 66% and 87% for the three months ended September 30, 2007 and 2006, respectively. The increase in direct operating costs of content-related BPO services was principally attributable to increases in variable labor and other operating costs in support of higher revenue volume. The direct operating expenses as a percentage of revenues for our content-related BPO services segment were lower in the three months ended September 30, 2007, than in the comparable 2006 period, principally due to decreased variable costs as a percent of revenues, and increased operating leverage resulting from the increase in revenues with no significant increase in fixed costs. These favorable results were offset in part by an \$800,000 increase in direct operating costs resulting from a weakened US dollar against the Philippine peso and Indian rupee.

Direct operating costs for content-related IT professional services were \$1.0 million for each of the three months ended September 30, 2007 and 2006. Direct operating costs for content-related IT professional services as a percentage of revenues from content-related IT professional services were 128% and 77% for the three months ended September 30, 2007 and 2006, respectively. The increase in direct operating costs of content-related IT professional services as a percentage of revenues was primarily attributable to decreased revenues from two projects completed in May 2007, and not replaced, without any corresponding decrease in fixed costs.

Selling and Administrative Expenses

Selling and administrative expenses were \$3.6 million and \$3.3 million for the three months ended September 30, 2007 and 2006, respectively. Selling and administrative expenses as a percentage of revenues were 20% and 32% for the three months ended September 30, 2007 and 2006, respectively. Included in selling and administrative expenses for the three months ended September 30, 2006 are costs of approximately \$244,000 spent on research and development for new services. The increase in selling and administrative expenses principally reflects increased sales and administrative payroll and payroll related costs associated with annual salary increases and increased professional fees, including fees associated with Section 404 of the Sarbanes Oxley Act incurred in the three months ended September 30, 2007.

Provision for Income Taxes

The provision for income taxes in the three months ended September 30, 2007 and 2006 was principally comprised of foreign income taxes attributable to certain overseas subsidiaries which generated taxable income.

In assessing the realization of deferred tax assets, we consider whether it is more likely than not that all or some portion of our deferred tax assets will not be realized. Our ultimate realization of the deferred tax assets is dependent upon our generating future taxable income during the periods in which temporary differences are deductible and net operating losses are utilized. Based on a consideration of these factors, we have established a valuation allowance of approximately \$4.3 million at September 30, 2007.

Pursuant to an income tax audit by the Indian bureau of taxation, on March 27, 2006, one of our Indian subsidiaries received a tax assessment approximating \$399,000, including interest through September 30, 2007, for the fiscal tax year ended March 31, 2003. We disagree with the basis of the tax assessment, and have filed an appeal against the assessment, which we will fight vigorously. The Indian bureau of taxation has also completed an audit of our Indian subsidiary's income tax return for the fiscal tax year ended March 31, 2004. The ultimate outcome was favorable, and there was no tax assessment imposed for the fiscal tax year ended March 31, 2004. On March 20, 2007, the Indian bureau of taxation commenced an audit of our subsidiary's income tax return for the fiscal year ended 2005. We cannot determine the ultimate outcome at this time.

In addition we are subject to various tax audits and claims which arise in the ordinary course of business. We currently believe that the ultimate outcome of these audits and claims will not have a material adverse effect on our financial position or results of operations.

As a result of the IRS audit settlement mentioned above, we recognized approximately \$234,000 of previously unrecognized tax benefits in the third quarter of 2007. An additional \$208,000 of unrecognized tax benefits relating to uncertain income tax positions was provided in the third quarter of 2007. We are subject to various tax audits and claims which arise in the ordinary course of business. Management currently believes that the ultimate outcome of these audits and claims will not have a material adverse effect on our financial position or results of operations.

Our liability for net unrecognized tax benefits at September 30, 2007 and December 31, 2006 was approximately \$443,000 and \$481,000, respectively. This liability represents an accrual relating to uncertain income tax positions we have taken on our domestic and foreign tax returns. We report interest expense and penalties related to income tax liabilities as a component of our provision for income taxes. As of September 30, 2007 and December 31, 2006, we had accrued a liability for interest and penalties totaling approximately \$143,000 and \$138,000, respectively.

Furthermore we had unrecognized tax benefits of \$176,000 and \$167,000 as of September 30, 2007 and December 31, 2006, respectively, which, if recognized, would increase our net operating loss carryforward. This increase, if recognized, would not have an impact on our effective tax rate since the increase to our deferred tax assets would result in a corresponding increase to our valuation allowance.

Net Income / Loss

We recorded a net profit of \$2.1 million in the three months ended September 30, 2007 compared with a net loss of approximately \$2.2 million in the comparable period in 2006. The change was principally attributable to the increase in gross margin resulting from increased revenues.

Results of Operations

Nine Months Ended September 30, 2007 and 2006

Revenues

Revenues were \$47.2 million for the nine months ended September 30, 2007 compared to \$30.4 million for the similar period in 2006, an increase of 55%.

Revenues from content-related BPO services increased 65% to \$44.3 million for the nine months ended September 30, 2007 from \$26.8 million for the similar period in 2006. The \$17.5 million increase in revenues, which is principally attributable to one customer, reflects an \$11 million increase from recurring revenue and \$6.5 million from non-recurring project revenue. Furthermore, more than 60% of the total revenue increase is attributable to knowledge services.

Revenues from content-related IT professional services decreased by 19%, to \$2.9 million for the nine months ended September 30, 2007, from \$3.6 million for the similar period in 2006. Although there were revenues derived from new projects that started during the second quarter of 2007, there were also decreases due to the completion in 2007 of several IT professional services projects.

One client accounted for 30% of our total revenues for the nine months ended September 30, 2007. Another client accounted for 17% and 28% of our total revenues for the nine months ended September 30, 2007 and 2006, respectively. Two other clients accounted for 12% and 10% of our revenue for the nine months ended September 30, 2006. No other client accounted for 10% or more of our total revenues for these periods. Further, for each of the nine months ended September 30, 2007 and 2006, revenues to non-US clients accounted for 23% and 36% respectively, of the Company's revenues.

For the nine months ended September 30, 2007, approximately 62% of our revenue was recurring and 38% was non-recurring, compared with 60% and 40%, respectively, for the nine months ended September 30, 2006. All recurring revenues are from content-related BPO services segment.

Direct Operating Costs

Direct operating costs were \$34.5 million and \$25.7 million for the nine months ended September 30, 2007 and 2006, respectively, an increase of 34%. Direct operating costs as a percentage of revenues for the nine months ended September 30, 2007 and 2006, were 73% and 85% respectively.

Direct operating costs for content-related BPO services were \$30.7 million and \$22.8 million in the nine months ended September 30, 2007 and 2006, respectively, an increase of 35%. Direct operating costs of content-related BPO services as a percentage of revenues from content related BPO services were 69% and 85% for the nine months ended September 30, 2007 and 2006, respectively. The increase in direct operating costs of content-related BPO services was principally attributable to increases in variable labor and other operating costs in support of higher revenue volume. The direct operating expenses as a percentage of revenues for our content-related BPO services segment were lower in the nine months ended September 30, 2007 than in the comparable 2006 period, principally due to decreased variable costs as a percent of revenues, and increased operating leverage resulting from the increase in revenues with no significant increase in fixed costs. These favorable results were offset in part by a \$1.7 million increase in direct operating costs resulting from a weakened US dollar against the Philippine peso and Indian rupee.

Direct operating costs for content-related IT professional services were \$3.8 million and \$2.9 million for the nine months ended September 30, 2007 and 2006, respectively, an increase of 31%. Direct operating costs for content-related IT professional services as a percentage of revenues from content-related IT professional services were 131% and 81% for the nine months ended September 30, 2007 and 2006, respectively. The increase in direct operating costs of content-related IT professional services as a percentage of revenues was primarily attributable to decreased revenues brought about by two projects completed in the second quarter of 2007 and not replaced, without any corresponding decrease in fixed costs.

Selling and Administrative Expenses

Selling and administrative expenses were \$10.5 million and \$10.9 million for the nine months ended September 30, 2007 and 2006, respectively, a decrease of 4%. Selling and administrative expenses as a percentage of revenues were 22% and 36% for the nine months ended September 30, 2007 and 2006, respectively. The lower percentage reflects sustained operating cost levels on a higher revenue base.

Selling and administrative expenses for the nine months ended September 30, 2006 includes approximately \$246,000 received as an inducement to terminate our Dallas office lease prior to its contractual expiration date, accrued severance costs of approximately \$275,000 related to the termination of an executive's employment and approximately \$800,000 on research and development for new services. After excluding the effect of these non-recurring adjustments, the resulting increase in selling and administrative expenses principally reflects increased sales and administrative payroll and payroll related costs associated with annual salary increases and increased professional fees, including fees associated with Section 404 of the Sarbanes Oxley Act, incurred in the nine months ended September 30, 2007.

Provision for (Benefit from) Income Taxes

The provision for income taxes in the nine months ended September 30, 2007 and 2006 was principally comprised of foreign income taxes attributable to certain overseas subsidiaries which generated taxable income.

In assessing the realization of deferred tax assets, we consider whether it is more likely than not that all or some portion of our deferred tax assets will not be realized. Our ultimate realization of the deferred tax assets is dependent upon our generating future taxable income during the periods in which temporary differences are deductible and net operating losses are utilized. Based on a consideration of these factors, we have established a valuation allowance of approximately \$4.3 million at September 30, 2007.

Pursuant to an income tax audit by the Indian bureau of taxation, on March 27, 2006, one of our Indian subsidiaries received a tax assessment approximating \$399,000, including interest through September 30, 2007, for the fiscal tax year ended March 31, 2003. We disagree with the basis of the tax assessment, and have filed an appeal against the assessment, which we will fight vigorously. The Indian bureau of taxation has also completed an audit of our Indian subsidiary's income tax return for the fiscal tax year ended March 31, 2004. The ultimate outcome was favorable, and there was no tax assessment imposed for the fiscal tax year ended March 31, 2004. On March 20, 2007, the Indian bureau of taxation commenced an audit of our subsidiary's income tax return for the fiscal year ended 2005. We cannot determine the ultimate outcome at this time.

In addition we are subject to various tax audits and claims which arise in the ordinary course of business. We currently believe that the ultimate outcome of these audits and claims will not have a material adverse effect on our financial position or results of operations.

As a result of the IRS audit settlement mentioned above, we recognized approximately \$234,000 of previously unrecognized tax benefits in the nine months ended September 30, 2007. An additional \$208,000 of unrecognized tax benefits relating to uncertain income tax positions was provided in the nine months ended September 30, 2007. We are subject to various tax audits and claims which arise in the ordinary course of business. Management currently believes that the ultimate outcome of these audits and claims will not have a material adverse effect on our financial position or results of operations.

Our liability for net unrecognized tax benefits at September 30, 2007 and December 31, 2006 was approximately \$443,000 and \$481,000, respectively. This liability represents an accrual relating to uncertain income tax positions we have taken on our domestic and foreign tax returns. We report interest expense and penalties related to income tax liabilities as a component of our provision for income taxes. As of September 30, 2007 and December 31, 2006, we had accrued a liability for interest and penalties totaling approximately \$143,000 and \$138,000, respectively.

Furthermore we had unrecognized tax benefits of \$176,000 and \$167,000 as of September 30, 2007 and December 31, 2006, respectively, which, if recognized, would increase our net operating loss carry forward. This increase, if recognized, would not have an impact on our effective tax rate since the increase to our deferred tax assets would result in a corresponding increase to our valuation allowance.

Net Income / Loss

We recorded a net profit of \$2.3 million in the nine months ended September 30, 2007 compared with a net loss of approximately \$6.5 million in the comparable period in 2006. The change was principally attributable to the increase in gross margin resulting from increased revenues and lower selling and administrative expenses.

Liquidity and Capital Resources

Selected measures of liquidity and capital resources, expressed in thousands are as follows:

	September 30, 2007	December 31, 2006
Cash and Cash Equivalents	\$ 12,133	\$ 13,597
Working Capital	13,663	13,632

Net Cash Provided By (Used In) Operating Activities

Net cash provided by operating activities was \$1.8 million for the nine months ended September 30, 2007 compared to \$2.1 million used in operating activities for the nine months ended September 30, 2006, an increase of approximately \$3.9 million. The \$3.9 million increase in net cash provided by operating activities is principally due to an \$8.8 million increase in net income, a \$1.5 million decrease in other net operating assets and liabilities, offset by a \$6.1 million increase in accounts receivable. The \$1.5 million decrease in other net operating assets and liabilities resulted primarily from payments of minimum withholding taxes on the net settlement of stock options exercised by the Chairman and CEO.

Accounts receivable totaled approximately \$11.3 million at September 30, 2007, representing approximately 55 days of sales outstanding compared to \$6.5 million, or 56 days, at December 31, 2006.

A significant amount of our revenues are derived from clients in the publishing industry. Accordingly, our accounts receivable generally include significant amounts due from such clients. In addition, as of September 30, 2007, approximately 19% of our accounts receivable was from foreign (principally European) clients, and 52% of accounts receivable was due from two clients.

Net Cash Used in Investing Activities

For the nine months ended September 30, 2007, we spent cash approximating \$2.9 million for capital expenditures compared to approximately \$2.1 million for the nine months ended September 30, 2006. Capital spending in 2007 related principally to normal technology equipment and facility upgrades. Capital spending in the nine months ended September 30, 2006 related principally to normal ongoing technology equipment improvements. During the next twelve months, we anticipate that capital expenditures for ongoing technology, hardware, equipment and infrastructure upgrades will approximate \$3.0 to \$4.0 million, a portion of which we may finance.

During the nine months ended September 30, 2007, we financed the acquisition of certain computer and communications equipment approximating \$819,000, while for the nine months ended September 30, 2006, we purchased software licenses totaling approximately \$164,000.

Net Cash (Used In) Provided by Financing Activities

Proceeds from the exercise of stock options were \$194,000 for the nine months ended September 30, 2007, compared to \$356,000 for the nine months ended September 30, 2006. Payments of long-term obligations approximated \$525,000 and \$586,000 for the nine months ended September 30, 2007 and 2006, respectively.

Availability of Funds

We have an uncommitted line of credit of \$5 million which expires on May 31, 2008. Under the terms of the agreement, any amounts drawn against this facility must be secured by a certificate of deposit of an equal amount. Additionally, any amounts drawn will bear interest at the bank's alternate base rate plus ½% or LIBOR plus 3%. We have no outstanding obligations under this credit line.

We believe that existing cash and internally generated funds will be sufficient for our reasonably anticipated working capital and capital expenditure requirements during the next 12 months. We fund our foreign expenditures from our U.S. corporate headquarters on an as-needed basis.

Inflation, Seasonality and Prevailing Economic Conditions

To date, inflation has not had a significant impact on our operations. We generally perform work for our clients under project-specific contracts, requirements-based contracts or long-term contracts. Contracts are typically subject to various termination provisions.

Our quarterly operating results are also subject to seasonal fluctuations. Our fourth and first quarters include the months of December and January, when billable services activity by professional staff, as well as engagement decisions by clients, may be reduced due to client budget planning cycles. In addition, demand for our services may be lower in the fourth quarter due to reduced activity during the holiday season and fewer working days during this period.

Critical Accounting Policies and Estimates

There were no material changes during the nine months ended September 30, 2007 to our critical accounting policies as reported in our Annual Report on Form 10-K for the year ended December 31, 2006.

Significant New Accounting Pronouncements Not Yet Adopted

In February 2007, FASB issued Statement of Financial Accounting Standards ("SFAS") No. 159, The Fair Value Option for Financial Assets and Financial Liabilities Including an Amendment of FASB Statement No. 115 ("SFAS 159"). SFAS 159 permits entities to choose to measure many financial instruments and certain other items at fair value. SFAS 159 is effective for fiscal years beginning after November 15, 2007. We are currently evaluating the impact of adopting SFAS 159 on our financial statements.

In September 2006, FASB issued SFAS No. 157, Fair Value Measurements (“SFAS 157”). SFAS 157 establishes a common definition for fair value under accounting principles generally accepted in the United States of America (“GAAP”), establishes a framework for measuring fair value and expands disclosure requirements about such fair value measurements. SFAS 157 is effective for fiscal years beginning after November 15, 2007. We are currently evaluating the impact of adopting SFAS 157 on our financial statements.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

We are exposed to interest rate change market risk with respect to our credit line with a financial institution which is priced based on the bank’s alternate base rate (7.75% at September 30, 2007) plus ½% or LIBOR (5.125% at September 30, 2007) plus 3%. We have no outstanding obligations under our credit line. To the extent we utilize all or a portion of this line of credit, changes in the interest rate will have a positive or negative effect on our interest expense.

We have operations in foreign countries. While we are exposed to foreign currency fluctuations, we presently have no financial instruments in foreign currency and do not maintain significant funds in foreign currency beyond those necessary for operations.

Item 4. Controls and Procedures

An evaluation has been carried out under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and the operation of our “disclosure controls and procedures” (as such term is defined in Rules 13a-15(e) under the Securities Exchange Act of 1934) as of September 30, 2007 (“Evaluation Date”). Based on such evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that, as of the Evaluation Date, the disclosure controls and procedures are reasonably designed and effective to ensure that (i) information required to be disclosed by us in the reports we file or submit under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms, and (ii) such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

There were no changes in our internal controls over financial reporting in connection with the evaluation required by paragraph (d) of Rules 13a-15 or 15d-15 under the Exchange Act that occurred during our last fiscal quarter that materially affected or are reasonably likely to materially affect the internal controls over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal proceedings

In connection with the cessation of operations in 2002 at certain Philippine subsidiaries, and the failure in 2001 to arrive at agreeable terms for a collective bargaining agreement with one of these subsidiaries, certain former employees and the Innodata Employee Association (IDEA) filed various actions against subsidiaries of Innodata Isogen, Inc., and also purportedly against Innodata Isogen, Inc. and certain of the Company's officers and directors. The Supreme Court of the Republic of the Philippines, Manila (Case No. G.R. No. 178603-04 Innodata Philippines, Inc. vs. Innodata Employees Association, et al. 10 September 2007) has refused to review a decision in these actions by a lower appellate court (Court Of Appeals of the Republic of the Philippines in Manila, Case Nos. CA-G.R. SP No. 93295 Innodata Employees Association (IDEA), Eleanor Tolentino, et al. vs. Innodata Philippines, Inc., et al., and CA-G.R. SP No. 90538 Innodata Philippines, Inc. vs. Honorable Acting Secretary Manuel G. Imson, et al 28 June 2007) against one of these subsidiaries in the Philippines that is inactive and has no material assets, and purportedly also against Innodata Isogen, Inc., that orders the reinstatement of certain former employees to their former positions and payment of back wages and benefits that aggregate approximately \$6.5 million. The Philippine subsidiary has filed a motion with the Supreme Court to reconsider the refusal of the Supreme Court to review the decision of the lower appellate court. All other Company affiliates were found by the lower appellate court to have no liability. Based on consultation with legal counsel, the Company believes that should the order of the lower appellate court be upheld, recovery against Innodata Isogen, Inc. would nevertheless be unlikely.

The Company is also subject to various legal proceedings and claims which arise in the ordinary course of business.

While management currently believes that the ultimate outcome of these proceedings will not have a material adverse effect on the Company's financial position or overall trends in results of operations, litigation is subject to inherent uncertainties. Substantial recovery against the Company in the above referenced Philippines actions could have a material adverse impact on the Company, and unfavorable rulings or recoveries in the other proceedings could have a material adverse impact on the operating results of the period in which the ruling or recovery occurs.

Items 1A, 3, 4 and 5 are not applicable and have been omitted.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

On September 12, 2007, the Company's Chairman and CEO (the "CEO") exercised 1,139,160 stock options at a total exercise price of \$882,844. The CEO paid the exercise price by surrendering to the Company 229,310 of the shares of common stock he would have otherwise received on the option exercise. In addition, the CEO surrendered 395,695 shares to the Company in consideration of the payment by the Company on his behalf of \$1,523,426 of the Company's minimum withholding tax requirement payable in respect of the option exercise. Because the payment value attributable to the surrendered shares upon settlement does not exceed the fair value of the option, no compensation cost was recognized at the date of settlement. In connection with this transaction, the Company issued a net total of 514,155 shares of common stock to the CEO.

Item 6. (a) Exhibits.

31.1 Certificate of Chief Executive Officer pursuant to Section 302 of the Sarbanes Oxley Act of 2002.

31.2 Certificate of Chief Financial Officer pursuant to Section 302 of the Sarbanes Oxley Act of 2002.

32.1 Certification of Chief Executive Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

32.2 Certification of Chief Financial Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
