**Impact of constant exchange rates**

The Group has historically used constant exchange rates to compare period-to-period changes in certain financial data. This is referred to as 'at constant exchange rates' throughout this release. The Group considers this to be a useful measure for

analyzing

and explaining changes and trends in the Group's results. The impact of the re-calculation of sales at constant exchange rates, including a reconciliation to the Group's GAAP sales, is shown below.
