UMC announced its unconsolidated operating results for the first quarter of 2005

1. Date of the investor/press conference: 2005/04/27
2. Location of the investor/press conference: B3 Yong Le Room, The Westin Taipei, 133 Nanking East Road, Sec. 3, Taipei
3. Financial and business related information:

United Microelectronics Corporation (NYSE: UMC; TSE: 2303) (UMC or the Company) today announced its unconsolidated operating results for the first quarter of 2005. Year-over-year revenue decreased by 19.9 % to NT\$20.29 billion from NT\$25.33 billion, and a 28.1% QoQ decrease from NT\$28.23 billion in 4Q04. The net income is NT\$1.52 billion, increase 14.0% from NT\$1.33 billion in 4Q04. The EPS for the first quarter in 2005 was NT\$0.09.

Wafer shipments in the first quarter were 564 thousand 8-inch equivalent wafers (including UMCi), and utilization rate was 63%. The percentage of revenue from 90nm in the first quarter was 7%. Revenue from the consumer segment increased as percent of total revenue to 26% in 1Q05. On April 1, 2005 we fully transferred all of UMCi s capacity to our Singapore branch and renamed UMCi s 12-inch fab as Fab 12i.

The first quarter was a challenging period for UMC. Our results reflected the anticipated soft demand caused by the industry-wide inventory correction. UMC s revenue totaled NT\$20.29 billion in 1Q05, a 28.1% quarter-over-quarter decrease from 4Q04. At the same time, the gross margin for the quarter decreased to 15.1% from 23.0% in 4Q04, said UMC CEO Dr. Jackson Hu.

Dr. Hu continued, Over the course of the first quarter, we believe some of our customers have streamlined their inventories, especially in the consumer sector. Heading into the second quarter, we foresee a mild recovery in shipment volumes, which is a very positive sign for our business and leads us to believe that we have hit the bottom of the cycle.

We are most excited about the progress we have made with our 90nm processes. More than a dozen customers have selected UMC for 90nm process technology and we currently have over 50 products taped-out. Of these, some have already moved into mass production.

We also believe that we are leading in the development of further generation technologies such as 80nm, 65nm and 45nm processes. Though we had some setbacks with the 0.13um generation that slowed our growth, our decision to develop 90nm technology in-house has already given us an excellent start, especially with the successful ramp-up of 90nm volume production for communication customers. In addition to this, we are aggressively increasing our exposure to the computer and consumer sectors for 90nm products. The design-wins that we have had so far in 2005 for 90nm and 0.13um processes have come from all major applications and will help UMC close the gap in market share that widened due to the challenges we encountered for 0.13um.

Edgar Filing: UNITED MICROELECTRONICS CORP - Form 6-K

In the short term, we expect our operating results to continue to be affected by the inventory correction and typical seasonality. However, we are confident that we will see noticeable improvements generated by our success with 90nm production and believe it will start to have a large impact on our profit in the next year or two.
