CALCULATION OF REGISTRATION FEE

		Proposed		
		Maximum		
	Amount	Aggregate Price	Proposed	Amount Of
Title of Shares To Be Registered	To Be	Per Unit⁽¹⁾	Maximum	Registration
	Registered		Aggregate	Fee
			Offering Price⁽¹⁾	
Common Stock, \$0.001 par value, including preferred stock purchase rights	20,000,000	\$0.30	\$6,000,000	\$706.20

⁽¹⁾ The amount is based on the average of the high and low prices of ISCO International's common stock on the American Stock Exchange on October 28, 2005 and is used solely for the purpose of calculating the registration fee pursuant to Rule 457(c) under the Securities Act of 1933, as amended.

THE REGISTRANT HEREBY AMENDS THIS REGISTRATION STATEMENT ON SUCH DATE OR DATES AS MAY BE NECESSARY TO DELAY ITS EFFECTIVE DATE UNTIL THE REGISTRANT SHALL FILE A FURTHER AMENDMENT WHICH SPECIFICALLY STATES THAT THIS REGISTRATION STATEMENT SHALL THEREAFTER BECOME EFFECTIVE IN ACCORDANCE WITH SECTION 8(a) OF THE SECURITIES ACT OF 1933 OR UNTIL THE REGISTRATION STATEMENT SHALL BECOME EFFECTIVE ON SUCH DATE AS THE SECURITIES AND EXCHANGE COMMISSION, ACTING PURSUANT TO SAID SECTION 8(a), MAY DETERMINE.

Table of Contents

The information in this prospectus is not complete and may be changed. The selling stockholders may not sell these securities until the registration statement filed with the Securities and Exchange Commission is effective. This prospectus is not an offer to sell these securities and we are not soliciting an offer to buy these securities in any state where the offer or sale is not permitted.

Subject to Completion Preliminary Prospectus

dated October 31, 2005

PROSPECTUS

20,000,000 SHARES

ISCO INTERNATIONAL, INC.

COMMON STOCK

This prospectus relates to the resale of an aggregate of 20,000,000 shares of common stock that we issued and sold to the selling stockholders listed on page 10. The shares of our common stock covered by this prospectus were acquired by the selling stockholders in a private placement pursuant to a Securities Purchase Agreement dated July 25, 2005.

The selling stockholders, or their pledgees, donees, transferees or other successors-in-interest, may offer the common stock through public or private transactions, at prevailing market prices, at prices related to prevailing market prices or at privately negotiated prices. We will not receive any proceeds from the sale of any of these shares by either of the selling stockholders. Other than the selling commissions and fees and stock transfer taxes, and sale of the shares of common stock, we will pay all expenses of the registration.

Our common stock is listed on the American Stock Exchange under the symbol ISO. On October 28, 2005, the reported last sale price of our common stock on the American Stock Exchange was \$0.30 per share.

Our principal offices are located at 1001 Cambridge Drive, Elk Grove Village, Illinois 60007, our telephone number is (847) 391-9400.

INVESTING IN OUR COMMON STOCK INVOLVES RISKS. YOU SHOULD CAREFULLY CONSIDER THE RISK FACTORS BEGINNING ON PAGE 2 OF THIS PROSPECTUS BEFORE YOU DECIDE TO INVEST.

Neither the Securities and Exchange Commission nor any other regulatory body has approved or disapproved of these securities, or passed upon the adequacy or accuracy of this prospectus. Any representation to the contrary is a criminal offense.

The date of this prospectus is __ , 2005

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

Because we want to provide you with more meaningful and useful information, this prospectus contains, and incorporates by reference, certain forward-looking statements that reflect our current expectations regarding our future results of operations, performance and achievements. We have tried, wherever possible, to identify these forward-looking statements by using words such as anticipates, believes, estimates, expects, plans, intends and similar expressions. These statements reflect our current beliefs and are based on information currently available to us. Accordingly, these statements are subject to certain risks, uncertainties and contingencies, including the factors set forth under the caption Risk Factors, which could cause our actual results, performance or achievements for 2005 and beyond to differ materially from those expressed in, or implied by, any of these statements. You should not place undue reliance on any forward-looking statements. Except as otherwise required by federal securities laws, we undertake no obligation to release publicly the results of any revisions to any such forward-looking statements that may be made to reflect events or circumstances after the date of this prospectus or to reflect the occurrence of unanticipated events.

WHO WE ARE

Recent Events

We develop and sell solutions designed to optimize the RF (Radio Frequency) link within wireless networks. RF link, or Radio link, is the signal between the mobile device (e.g., mobile phone) and the base station (Link). Reverse link is the signal from the mobile device to the base station. Forward link is the signal from the base station to the mobile device. Our array of solutions includes its ANF product line (adaptive notch filter, ANF), the RF² product family (radio link radio frequency fidelity, RF²), services and other solutions, all focused on optimizing RF handling in order to improve system performance and integrate disparate technologies as required by operators. The wireless telecommunications industry continues to promote data services and consolidate with an increased requirement for disparate technologies to co-exist. These are trends that we look to take advantage of with our RF management products.

In 2002, we decided, and in 2003 we implemented a shift from manufacturing in-house to an outsourced manufacturing model wherein we supply raw materials to external parties and products are then completed. This system allows us to outsource procurement in the future if we choose to do so. Manufacturing partners then produce to specification with our personnel on hand to assist with quality control. Our products are designed for efficient production in this manner, emphasizing solid-state electronics over mechanical devices with moving parts. The decrease in cost associated with these developments, coupled with enhanced product functionality, has allowed us to realize consistently improved margins and significantly reduced overhead costs since 2002. Extensions of developed technology, based on substantial input from customers, have allowed us to launch the RF² product family and consider additional solutions while controlling total R&D cost.

During the first quarter of 2005, we were able to conclude the patent litigation appeal process, add John Thode as our President and CEO, and realize an overall increase in business activity from prior years as seen in increased revenues, product shipments, and the expansion of our portfolio of RF solutions. The second and third quarters of 2005 focused on new product development and release, the pursuit of new customers, and continued progress relative to prior years.

During the third quarter of 2005, we announced the introduction of two new product families in the pipeline based upon our core intellectual property. The first new product is based upon the same wireless telecommunications system knowledge and patents used to develop our ANF product. The second new product is a solution that integrates wireless technologies into a single pipe, allowing more customers per tower and designed to accommodate several wireless technology platforms, both cellular and non-cellular.

Edgar Filing: ISCO INTERNATIONAL INC - Form S-3

To help finance development of these two and other new products, and for general working capital purposes, we sold an aggregate of 20 million shares of common stock to our largest two shareholders (including affiliates) for an aggregate of \$4.4 million. Additionally, those entities agreed to extend the maturity date of the existing line of credit they have extended to us, and which currently stands at approximately \$10 million in principal and interest, from April 2006 to August 2007. No warrants or other inducements were provided. The lenders agreed to waive their right for the debt to be repaid first with the new financing proceeds related to this transaction. Pursuant to the provisions of

-1-

Table of Contents

Section 16(b) of the Securities Exchange Act of 1934, as amended, or the Exchange Act, these entities also remitted to us approximately \$0.6 million in profits from sales our common stock during the six months preceding this financing.

During the third quarter of 2005, we also announced that we into three new distribution channel partnerships, including a partner to address China and certain Far East opportunities, a second partner for Latin America, and a third to address certain subcontracting opportunities within the US.

RISK FACTORS

You should carefully consider the risks described below, along with the other information contained or incorporated by reference in this prospectus, before making an investment decision. The risks described below are not the only ones facing our company. Additional risks not presently known to us or that we currently deem immaterial may also impair our business operations.

Our business, financial condition or results of operations could be materially adversely affected by any of these risks. The trading price of our common stock could decline due to any of these risks, and you may lose all or part of your investment.

This prospectus also contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the risks faced by us described below and elsewhere in this prospectus.

RISKS RELATED TO OUR BUSINESS

RISKS RELATED TO THE OPERATIONS AND FINANCING OF THE COMPANY

History of Losses Raises Doubts About Ability to Continue as a Going Concern

We were founded in October 1989 and through 1996 were engaged principally in research and development, product testing, manufacturing, marketing and sales activities. We have incurred net losses since inception. As of September 30, 2005, the accumulated deficit was approximately \$159 million. We have only recently begun to generate revenues from the sale of our ANF and RF² products. Accordingly, although we have had a successful first nine-months of 2005 and management has announced the expectation of continued improvement, it is nonetheless possible that we may continue to experience net losses and cannot be certain if or when we will become profitable.

These conditions raise substantial doubt about our ability to continue as a going concern. The accompanying consolidated financial statements have been prepared assuming we will continue as a going concern and do not include any adjustments relating to the recoverability of reported assets or liabilities should we be unable to continue as a going concern.

Future Capital Needs

To date, we have financed our operations primarily through public and private equity and debt financings, and in recent years through financings with affiliates of our two largest shareholders. Borrowings under our existing line of credit with these shareholders matures August 1, 2007. Excluding working capital that may be required in order to support potentially significant increases in sales volume and/or potential outlays that may be used to support new product development efforts as described below, we believe that, as our business is currently operated, we have sufficient funds to operate our business through 2006. However, if our product development and/or sales efforts expand at a substantially faster pace, or if customer orders increase to the point that we have to fund significantly more production, we may need additional financing to support such efforts. In such event, we will look into augmenting our existing capital position to evaluate potential short-term and long-term sources of capital whether from debt, equity, hybrid, or other methods.

Our continued existence may therefore be dependent upon our continued ability to raise funds through the issuance of our securities or borrowings, and our ability to acquire assets or satisfy liabilities by the issuance of stock. Management's plans in this regard are to obtain other debt and equity financing, if needed, until such time as our profitable operation and positive cash flow are achieved and maintained.

Table of Contents

Although management believes, based on the fact that it has raised funds through sales of common stock and from borrowings over the past several years, that it will be able to secure suitable additional financing for our operations, there can be no guarantee that such financing will continue to be available on reasonable terms, or at all. As a result, there is no assurance that we will be able to continue as a going concern.

The actual amount of future funding requirements will depend on many factors, including: the amount and timing of future revenues, the level of product marketing and sales efforts to support our commercialization plans, the magnitude of research and product development programs, the ability to improve or maintain product margins, acquisitions of other products or businesses, and the costs involved in protecting patents or other intellectual property.

Limited Experience in Manufacturing, Sales and Marketing and Dependence on Third Party Manufacturers

For us to be financially successful, we must either manufacture our products in substantial quantities, at acceptable costs and on a timely basis or enter into an outsourcing arrangement with a qualified manufacturer that will allow us the same. Currently, our manufacturing requirements are met by third party contract manufacturers. The efficient operation of our business will depend, in part, on our ability to have these and other companies manufacture our products in a timely manner, cost effectively and in sufficient volumes while maintaining the required quality. Any manufacturing disruption could impair our ability to fulfill orders and could cause us to lose customers.

In the event that we are unable to enter into a manufacturing arrangement on acceptable terms with a qualified manufacturer, we would have to produce the products in commercial quantities in our own. Although to date we have produced limited quantities of our products for commercial installations and for use in development and customer field trial programs, production of large quantities of our products at competitive costs presents a number of technological and engineering challenges. We may be unable to manufacture such products in sufficient volume. We have limited experience in manufacturing, and substantial costs and expenses may be incurred in connection with attempts to manufacture larger quantities of our products. We may be unable to make the transition to large-scale commercial production successfully.

Our sales and marketing experience to date is very limited. We will be required to further develop our marketing and sales force in order to effectively demonstrate the advantages of our products over other products. In addition, we recently entered into three separate arrangements with partners to market and distribute our products in Latin America, China and certain U.S. markets. We may elect to enter into other arrangements with third parties regarding the commercialization and marketing of our products. We will be substantially dependent upon the efforts of our existing partners and, if we enter into further agreements, others in deriving commercial benefit from our products. We may be unable to establish adequate sales and distribution capabilities under our existing or new arrangements, we may be unable to enter into future marketing arrangements or relationships with third parties on financially acceptable terms, and our existing partners or any other such third party may not be successful in marketing our products. There is no guarantee that our sales and marketing efforts will be successful.

Management of Growth

Growth may cause a significant strain on our management, operational, financial and other resources. The ability to manage growth effectively may require us to implement and improve our operational, financial, manufacturing and management information systems and expand, train, manage and motivate employees. These demands may require the addition of new management personnel and the development of additional expertise by management. Any increase in resources devoted to product development and marketing and sales efforts could have an adverse effect on financial performance in future fiscal quarters. If we were to grow substantially, we may have to expand current facilities, which could cause an additional strain on our management personnel and development resources. The failure of the management team to effectively manage growth could have a material adverse effect on our business, operating results and financial condition.

RISKS RELATED TO THE COMPANY S COMMON STOCK AND CHARTER PROVISIONS

Volatility of Common Stock Price

The market price of our common stock, like that of many other high-technology companies, has fluctuated significantly and is likely to continue to fluctuate in the future. Since January 1, 1999 and through September 30, 2005, the closing price of our common stock has ranged from a low of \$0.10 per share to a high of \$39.00 per share, but our

Table of Contents

common stock has not traded above \$1.07 per share during 2004 or 2005. Announcements by us or others regarding the receipt of customer orders, quarterly variations in operating results, acquisitions or divestitures, additional equity or debt financings, results of customer field trials, scientific discoveries, technological innovations, litigation, product developments, patent or proprietary rights, government regulation and general market conditions affecting our customers may have a significant impact on the market price of the common stock. In addition, fluctuations in the price of our common stock could affect our ability to maintain the listing of our common stock on the American Stock Exchange.

Risk of Dilution

As September 30, 2005, we had outstanding options to purchase 9.0 million shares of common stock at a weighted average exercise price of \$0.38 per share (3.1 million of which have not yet vested) issued to employees, directors and consultants pursuant to the 2003 Equity Incentive Plan, or the 2003 Plan, and our predecessor 1993 Stock Option Plan, as amended, or the 1993 Plan, the merger agreement with Spectral Solutions, and individual agreements with management and directors. In order to attract and retain key personnel, we may issue additional securities, including stock options, in connection with or outside our employee benefit plans, or may lower the price of existing stock options. Further, to provide the 2003 Plan with an adequate amount of common stock and to keep our equity incentive compensation in line with that of other companies comparable to us, in October 2005, our Board of Directors approved amendments to the 2003 Plan, subject to approval by our stockholders, that would: (i) increase by 12,000,000 the number of shares of common stock available for grant under the 2003 Plan and (ii) make up to 5,000,000 shares allocated to the 1993 Plan but ultimately unused available for use under the 2003 Plan.

The exercise of options and warrants for common stock and the issuance of additional shares of common stock and/or rights to purchase common stock at prices below market value would be dilutive to existing stockholders and may have an adverse effect on the market value of the common stock.

Concentration of our Stock Ownership; Interests of Principal Stockholders

At the time of this filing, our two largest stockholders together control approximately 43% of the outstanding voting power. These stockholders are not affiliated with each other, however, if they chose to act together in the future, they could exert significant influence over all matters requiring stockholder approval, including the election of directors and approval of significant corporate transactions. In addition, this concentration of ownership may delay or prevent a change of control of us, even if a change may be in the best interests of our other stockholders.

Further, the interests of these principal stockholders may not always coincide with our interests or the interests of other stockholders.

Anti-Takeover Provisions

There exist certain arrangements which may be deemed to have a potential anti-takeover effect in that such provisions may delay, defer or prevent a change of control of us. In February 1996, the Board of Directors adopted a stockholders rights plan. In addition, our Certificate of Incorporation and By-Laws provide that (i) the Board of Directors has authority to issue series of our preferred stock with such voting rights and other powers as the Board of Directors may determine and (ii) prior specified notice must be given by a stockholder making nominations to the Board of Directors or raising business matters at stockholders meetings. The effect of the rights plan and the anti-takeover provisions in charter

Edgar Filing: ISCO INTERNATIONAL INC - Form S-3

documents may be to deter business combination transactions not approved by our Board of Directors, including acquisitions that may offer a premium over market price to some or all stockholders. Our Board of Directors has expressed the intent to allow this plan to expire by our terms during February 2006.

We may be unable to maintain our listing on the American Stock Exchange, which could cause our stock price to fall and decrease the liquidity of our common stock.

Our common stock is currently listed on the American Stock Exchange, which has financial, operating and corporate governance requirements for the continued listing of stock. While we believe that we currently meet these requirements, should we not meet these requirements or other requirements for continued listing, then our common stock may be delisted from the American Stock Exchange and the trading market for our common stock could decline, which could depress our stock price and adversely affect the liquidity of our common stock.

Table of Contents

TECHNOLOGY AND MARKET RISKS

We are dependent on wireless telecommunications.

The principal target market for our products is wireless telecommunications. The devotion of substantial resources to the wireless telecommunications market creates vulnerability to adverse changes in this market. Adverse developments in the wireless telecommunications market, which could come from a variety of sources, including future competition, new technologies or regulatory decisions, could affect the competitive position of wireless systems. Any adverse developments in the wireless telecommunications market may have a material adverse effect on our business, operating results and financial condition.

We are dependent on the enhancement of existing networks and the build-out of next generation networks, and the capital spending patterns of wireless network operators.

Increased sales of products is dependent on a number of factors, one of which is the build-out of third generation enabled wireless communications networks as well as enhancements of existing infrastructure. Building wireless networks is capital intensive, as is the process of upgrading existing equipment. Further, the capital spending patterns of wireless network operators is beyond management's control and depends on a variety of factors, including access to financing, the status of federal, local and foreign government regulation and deregulation, changing standards for wireless technology, the overall demand for wireless services, competitive pressures and general economic conditions. The build-out next generation enabled networks may take years to complete. The magnitude and timing of capital spending by these operators for constructing, rebuilding or upgrading their systems significantly impacts the demand for our products. Any decrease or delay in capital spending patterns in the wireless communication industry, whether because of a general business slowdown or a reevaluation of the prospective demand for wireless services, would delay the build-out of these networks and may significantly harm business prospects.

Our success depends on the market's acceptance of our products.

Despite recent increases in sales, our RF products, including our ANF and RF² products, have not been sold in very large quantities and a sufficient market may not develop for these products. Customers establish demanding specifications for performance, and although we believe we have met or exceeded these specifications to date, there is no guarantee that the wireless service providers will elect to use these solutions to solve their wireless network problems. Although we have received substantially higher orders from wireless operators for our products over the past year, there is no assurance that we will continue to receive orders from these customers.

Rapid technological change and future competitive technologies could negatively affect operations.

The field of telecommunications is characterized by rapidly advancing technology. Our success will depend in large part upon our ability to keep pace with advancing our high performance RF technology and efficient, readily available low cost materials technologies. Rapid changes have occurred, and are likely to continue to occur, in the development of wireless telecommunications. Development efforts may be rendered obsolete by the adoption of alternative solutions to current wireless operator problems or by technological advances made by others.

BUSINESS RISKS

Dependence on a Limited Number of Customers

Sales to three of our customers accounted for 98% of our total revenues for the nine months ended September 30, 2005, and 94% and 98% of our total revenues for the fiscal years ended December 31, 2004 and 2003, respectively. During the nine months ended September 30, 2005 our top three customers were Verizon Wireless, First Cellular, and U.S. Cellular Corporation, and during 2004 our top three customers were Verizon Wireless, U.S. Cellular Corporation, and Pelephone Communications Ltd., respectively. In addition, a significant amount of our technical and managerial resources have been focused on working with these and a limited number of other operators and OEMs.

We expect that if our products achieve market acceptance, a limited number of wireless service providers and OEMs will account for a substantial portion of revenue during any period. Sales of many of our products depend in significant part upon the decision of prospective customers and current customers to adopt and expand their use of these products. Wireless service providers, wireless equipment OEMs and our other customers are significantly larger than,

Table of Contents

and are able to exert a high degree of influence over us. Customers' orders are affected by a variety of factors such as new product introductions, regulatory approvals, end user demand for wireless services, customer budgeting cycles, inventory levels, customer integration requirements, competitive conditions and general economic conditions. The failure to attract new customers would have a material adverse effect on our business, operating results and financial condition.

Lengthy Sales Cycles

Prior to selling products to customers, we may be required to undergo lengthy approval and purchase processes. Technical and business evaluation by potential customers can take up to a year or more for products based on new technologies. The length of the approval process is affected by a number of factors, including, among others, the complexity of the product involved, priorities of the customers, budgets and regulatory issues affecting customers. We may not obtain the necessary approvals or ensuing sales of such products may not occur. The length of customers' approval process or delays could make our quarterly revenues and earnings inconsistent and difficult to trend.

Intense competition, and increasing consolidation in our industry, could create stronger competitors and harm the business.

The wireless telecommunications equipment market is very competitive. Many of these companies have substantially greater financial resources, larger research and development staffs and greater manufacturing and marketing capabilities than us. Its products compete directly with products which embody existing and future competing commercial technologies. Other emerging wireless technologies, may also provide protection from RF interference and offer enhanced range to wireless communication service providers, potentially at lower prices and/or superior performance, and may therefore compete with our products. High performance RF solutions may not become a preferred technology to address the needs of wireless communication service providers. Failure of our products to improve performance sufficiently, reliably, or at an acceptable price or to achieve commercial acceptance or otherwise compete with existing and new technologies, would have a material adverse effect on our business, operating results and financial condition.

Dependence on Limited Sources of Supply

Certain parts and components used in our RF products are only available from a limited number of sources. Our reliance on these limited source suppliers exposes us to certain risks and uncertainties, including the possibility of a shortage or discontinuation of certain key components and reduced control over delivery schedules, manufacturing capabilities, quality and costs. Any reduced availability of such parts or components when required could materially impair the ability to manufacture and deliver products on a timely basis and result in the cancellation of orders, which could have a material adverse effect on the business, operating results and financial condition.

Further, the purchase of certain key components involves long lead times and, in the event of unanticipated increases in demand for our products, we may be unable to manufacture products in quantities sufficient to meet customers' demand in any particular period. We have few guaranteed supply arrangements with our limited source suppliers, do not maintain an extensive inventory of parts or components, and customarily purchase parts and components pursuant to actual or anticipated purchase orders placed from time to time in the ordinary course of business.

In addition, we produce substantially all of our products through third-party contract manufacturers. Like raw materials, the elimination of any of these entities or delays in the fulfillment process, for whatever reason, may impact our ability to fulfill customer orders on a timely basis and

Edgar Filing: ISCO INTERNATIONAL INC - Form S-3

may have a material adverse effect on our business, operating results, or financial condition.

To satisfy customer requirements, we may be required to stock certain long lead-time parts and/or finished product in anticipation of future orders, or otherwise commit funds toward future purchase. The failure of such orders to materialize as forecasted could limit resources available for other important purposes or accelerate the requirement for additional funds. In addition, such excess inventory could become obsolete, which would adversely affect financial performance. Business disruption, production shortfalls or financial difficulties of a limited source supplier could materially and adversely affect us by increasing product costs or reducing or eliminating the availability of such parts or components. In such events, the inability to develop alternative sources of supply quickly and on a cost-effective basis

Table of Contents

could materially impair the ability to manufacture and deliver products on a timely basis and could have a material adverse effect on our business, operating results and financial condition.

Dependence on Key Personnel

Our success will depend in large part upon our ability to attract and retain highly qualified management, engineering, manufacturing, marketing, sales and R&D personnel. Due to the specialized nature of our business, it may be difficult to locate and hire qualified personnel. The loss of services of one of our executive officers or other key personnel, or the failure to attract and retain other executive officers or key personnel, could have a material adverse effect on our business, operating results and financial condition.

Failure of products to perform properly might result in significant warranty expenses.

In general, our products carry a warranty of one or two years, limited to replacement of the product or refund of the cost of the product. In addition, we offer our customers extended warranties. Repeated or widespread quality problems could result in significant warranty expenses and/or the loss of customer confidence. The occurrence of such quality problems could have a material adverse effect on our business, operating results and financial condition.

LEGAL RISKS

Intellectual Property and Patents

Our success will depend in part on our ability to obtain patent protection for our products and processes, to preserve trade secrets and to operate without infringing upon the patent or other proprietary rights of others and without breaching or otherwise losing rights in the technology licenses upon which any of our products are based. We have internally applied for patents and acquired patent rights in connection with the purchase of the Adaptive Notch Filtering business unit of Lockheed Martin Canada. We believe there are a large number of patents and patent applications covering RF products and other products and technologies that we are pursuing. Accordingly, the patent positions of companies using RF technologies, including us, are uncertain and involve complex legal and factual questions. The patent applications filed by us or others may not result in issued patents or the scope and breadth of any claims allowed in any patents issued to us or others may not exclude competitors or provide competitive advantages. In addition, patents issued to us, our subsidiaries or others may not be held valid if subsequently challenged or others may claim rights in the patents and other proprietary technologies owned or licensed by us. Others may have developed or may in the future develop similar products or technologies without violating any of our proprietary rights. Furthermore, the loss of any license to technology that we might acquire in the future may have a material adverse effect on our business, operating results and financial condition.

Some of the patents and patent applications owned by us are subject to non-exclusive, royalty-free licenses held by various U.S. governmental units. These licenses permit these U.S. government units to select vendors other than us to produce products for the U.S. Government, which would otherwise infringe our patent rights that are subject to the royalty-free licenses. In addition, the U.S. Government has the right to require us to grant licenses (including exclusive licenses) under such patents and patent applications or other inventions to third parties in certain instances.

Edgar Filing: ISCO INTERNATIONAL INC - Form S-3

Older patent applications in the U.S. are currently maintained in secrecy until patents are issued. In foreign countries and for newer U.S. patent applications, this secrecy is maintained for a period of time after filing. Accordingly, publication of discoveries in the scientific literature or of patents themselves or laying open of patent applications in foreign countries or for newer U.S. patent applications tends to lag behind actual discoveries and filing of related patent applications. Due to this factor and the large number of patents and patent applications related to RF materials and technologies, and other products and technologies that we are pursuing, comprehensive patent searches and analyses associated with RF technologies and other products and technologies that we are pursuing are often impractical or not cost-effective. As a result, patent and literature searches cannot fully evaluate the patentability of the claims in our patent applications or whether materials or processes used by us for our planned products infringe or will infringe upon existing technologies described in U.S. patents or may infringe upon claims in patent applications made available in the future. Because of the volume of patents issued and patent applications filed relating to RF technologies and other products and technologies that we are pursuing, we believe there is a significant risk that current and potential competitors and other third-parties have filed or will file patent applications for, or have obtained or will obtain, patents or other proprietary rights relating to materials, products or processes used or proposed to be used by us. In any such case, to avoid infringement, we would have to either license such technologies or design around any such patents. We

Table of Contents

may be unable to obtain licenses to such technologies or, if obtainable, such licenses may not be available on terms acceptable to us or we may be unable to successfully design around these third-party patents.

Participation in litigation or patent office proceedings in the U.S. or other countries, which could result in substantial cost to and diversion of effort by us, may be necessary to enforce patents issued or licensed to us, to defend us against infringement claims made by others or to determine the ownership, scope or validity of the proprietary rights of the Company and others. The parties to such litigation may be larger, better capitalized than us and better able to support the cost of litigation. An adverse outcome in any such proceedings could subject us to significant liabilities to third parties, require us to seek licenses from third parties and/or require us to cease using certain technologies, any of which could have a material adverse effect on our business, operating results and financial condition.

Litigation

We have been subject to a number of lawsuits in the past, though none are active as of the date of this prospectus. If we are not successful in defending ourselves against whatever claims and charges may be made against us in the future there may be a material and adverse effect on our business, operating results and financial condition.

Government Regulations

Although we believe that our wireless telecommunications products themselves would not be subject to licensing by, or approval requirements of, the Federal Communications Commission, or FCC, the operation of base stations is subject to FCC licensing and the radio equipment into which our products would be incorporated is subject to FCC approval. Base stations and the equipment marketed for use therein must meet specified technical standards. The ability to sell our wireless telecommunications products is dependent on the ability of wireless base station equipment manufacturers and wireless base station operators to obtain and retain the necessary FCC approvals and licenses. In order for them to be acceptable to base station equipment manufacturers and to base station operators, the characteristics, quality and reliability of our base station products must enable them to meet FCC technical standards. We may be subject to similar regulations of the Canadian federal and provincial governments. Any failure to meet such standards or delays by base station equipment manufacturers and wireless base station operators in obtaining the necessary approvals or licenses could have a material adverse effect on our business, operating results and financial condition. In addition, certain RF filters are on the U.S. Department of Commerce's export regulation list. Therefore, exportation of such RF filters to certain countries may be restricted or subject to export licenses.

We are subject to governmental labor, safety and discrimination laws and regulations with substantial penalties for violations. In addition, employees and others may bring suit against us for perceived violations of such laws and regulations. Defense against such complaints could result in significant legal costs for us. Although we endeavor to comply with all applicable laws and regulations, we may be the subject of complaints in the future, which could have a material adverse effect on our business, operating results and financial condition.

Environmental Liability

Certain hazardous materials have been, and in the future may be, used in research, development and manufacturing operations, to the extent we undertake manufacturing operations in our own facilities. As a result, we are subject to stringent federal, state and local regulations governing the storage, use and disposal of such materials. It is possible that current or future laws and regulations could require us to make substantial

Edgar Filing: ISCO INTERNATIONAL INC - Form S-3

expenditures for preventive or remedial action, reduction of chemical exposure, or waste treatment or disposal. We believe we are in material compliance with all environmental regulations and to date have not had to incur significant expenditures for preventive or remedial action with respect to the use of hazardous materials. However, our operations, business or assets could be materially and adversely affected by the interpretation and enforcement of current or future environmental laws and regulations. In the event of an accident resulting in contamination or injury from these materials, we could be held liable for any damages that result. Furthermore, our previous, and any future, use and disposal of hazardous materials involves the risk that we could incur substantial expenditures for such preventive or remedial actions. The liability in the event of an accident or the costs of such actions could exceed available resources or otherwise have a material adverse effect on the business, results of operations and financial condition. We carry property and worker's compensation insurances in full force and effect through nationally known carriers that includes pollution cleanup or removal and medical claims for industrial incidents.

Table of Contents

RISKS RELATED TO ACQUISITIONS AND BUSINESS EXPANSION

Risks of Future Acquisitions

In the future, we may pursue acquisitions to obtain products, services and technologies that we believe will complement or enhance our current product or services offerings. At present, no agreements or other arrangements exist with respect to any such acquisition. An acquisition may not produce the revenue, earnings or business synergies as anticipated and may attach significant unforeseen liabilities, and an acquired product, service or technology might not perform as expected. If an acquisition is pursued, our management could spend a significant amount of time and effort in identifying and completing the acquisition and may be distracted from the operations of the business. In addition, management would probably have to devote a significant amount of resources toward integrating the acquired business with the existing business, and that integration may not be successful.

International Operations

We are in discussions and have agreements in place with companies in non-U.S. markets to form manufacturing, product development joint ventures and other marketing, distribution or consulting arrangements. For example, we have a relationship with a Canadian manufacturing firm for the production of our ANF product. In addition, we have recently entered into partnerships with distributors in Latin America and China and the Far East. We do not believe that the loss of this manufacturing partner or these distribution partners would significantly affect our operations. With regard to this manufacturing partner, there are many such entities that exist domestically, and our products were designed to be produced by any such entity, and not tied to one in particular. With regard to these distribution partners, there may be other entities who can market and distribute our products in these countries.

Nevertheless, we believe that non-U.S. markets could provide a substantial source of revenue in the future. However, there are certain risks applicable to doing business in foreign markets that are not applicable to companies doing business solely in the U.S. For example, we may be subject to risks related to fluctuations in the exchange rate between the U.S. dollar and foreign currencies in countries in which we do business. In addition, we may be subject to the additional laws and regulations of these foreign jurisdictions, some of which might be substantially more restrictive than similar U.S. ones. Foreign jurisdictions may also provide less patent protection than is available in the U.S., and we may be less able to protect our intellectual property from misappropriation and infringement in these foreign markets.

USE OF PROCEEDS

We will not receive any proceeds from the sale by the selling stockholders of our common stock. The selling stockholders will receive all of the net proceeds from the sale of the shares.

SELLING STOCKHOLDERS

Edgar Filing: ISCO INTERNATIONAL INC - Form S-3

The 20,000,000 shares of our common stock registered for public resale pursuant to this prospectus and listed under the column "Number of Shares Being Offered" includes shares which we issued to the selling stockholders in a private placement in August 2005 to finance product development and general working capital purposes. Messrs. Dan Gropper and Mark Brodsky, both former directors of our company, provide management services to Elliott Associates, L.P. and Elliott International, L.P. Mr. Gropper served as a director on our board from April 2002 until December 2003. Mr. Mark Brodsky served as a director on our board from June 1998 until March 1999 and again from November 1999 until August 2003.

The shares listed under the column "Number of Shares Being Offered" represents the number of shares that may be sold by each selling stockholder pursuant to this prospectus. Pursuant to Rule 416 under the Securities Act, the registration statement of which this prospectus is a part also covers any additional shares of our common stock which become issuable in connection with such shares because of any stock dividend, stock split, recapitalization or other similar transaction effected without the receipt of consideration which results in an increase in the number of outstanding shares of our common stock.

We do not know when or in what amounts the selling stockholders may offer shares for sale. The selling stockholders may or may not sell all or any of the shares offered by this prospectus. We may amend or supplement this

Table of Contents

prospectus from time to time to update the disclosure set forth herein. Because the selling stockholders may offer all or some of the shares pursuant to this offering, and because there are currently no agreements, arrangements or understandings with respect to the sale of any of the shares that will be held by the selling stockholders after completion of the offering, we cannot estimate the number of the shares that will be held by the selling stockholders after completion of the offering. However, for purposes of this table, we have assumed that, after completion of the offering, none of the shares covered by this prospectus will be held by the selling stockholders.

The following table sets forth, to our knowledge, certain information regarding the beneficial ownership of the shares of common stock held by the selling stockholders as of the date hereof. Beneficial ownership is calculated based upon Securities and Exchange Commission requirements and is not necessarily indicative of beneficial ownership for any other purpose. Unless otherwise indicated below, the selling stockholders named in this table has sole voting and investment power with respect to all shares beneficially owned. The presentation is based on 183,018,703 shares of our common stock outstanding as of October 28, 2005:

Name of Selling Stockholders(1)	Shares Beneficially Owned Prior to Offering		Number of Shares Being Offered	Shares Beneficially Owned After Offering	
	Number	Percentage		Number	Percent
Elliott Associates, L.P.	15,357,168	8%	500,000	14,857,168	8%
Elliott International, L.P.	19,904,159	11%	9,500,000	10,404,159	6%
Grace Brothers, Ltd.	43,898,179	24%	10,000,000	33,898,179	19%

(1) Includes limited partners, donees and pledgees selling shares that are received from a named selling stockholder.

We prepared this table based on the information supplied to us by the selling stockholders named in the table.

Line of Credit Financing

During October 2002, we entered into an Uncommitted Line of Credit with our two largest shareholders, an affiliate of Elliott Associates, L.P. (Manchester Securities Corporation) and an affiliate of Grace Brothers, Ltd. (Alexander Finance, L.P.). This line provided that up to \$4 million to be borrowed by us, with \$1 million borrowed during October 2002 upon completion of the transaction. \$1 million was borrowed during November 2002 and a third borrowing of \$1 million occurred in March 2003. This line is uncommitted, such that each new borrowing under the facility is subject to the approval of the lenders.

Borrowings on this line bore an initial interest rate of 9.5% and collateralized by all our assets. Outstanding loans under this agreement are required to be repaid on a priority basis should we receive new funding from other sources. Additionally, the lenders were entitled to receive warrants to the extent funds are drawn down on the line. The warrants bore a strike price of \$0.20 per share of common stock and expire on April 15, 2004. The credit line was to mature and be due, including accrued interest thereon, on March 31, 2004. Warrants to purchase 10 million shares of common stock were issued in connection with the borrowings under the line of credit during the year ended December 31, 2002. No other warrants were issued in connection with March 2003 borrowing under the line of credit.

Edgar Filing: ISCO INTERNATIONAL INC - Form S-3

On October 24, 2003, we and the lenders amended the terms of the loan agreement to reflect: (i) an increase in the aggregate commitment of the lenders to from \$4,000,000 to \$6,000,000; (ii) the elimination of warrant issuances from future drawdowns; (iii) interest on future loans would bear interest at the rate of 14% per annum; (iv) that future loans mature on October 31, 2004; (v) and that future loans be subject to the discretion of the lenders. We borrowed \$1,000,000 from the line of credit agreement upon execution of the amendment. During February 2004, the lenders exercised all of their warrants, purchasing 10,000,000 shares of common stock. We received the \$2,000,000 aggregate strike price for the exercise of these warrants.

During July 2004, we and our lenders agreed to increase the aggregate loan commitments under the credit line from \$6,000,000 to \$6,500,000. Simultaneously, we drew the remaining \$1,500,000 of the financing.

Table of Contents

During November 2004, we and our lenders agreed to increase the line of credit to up to an additional \$2 million to an aggregate loan commitment of \$8,500,000, \$1 million of which was drawn immediately by us with the remaining \$1 million available to be drawn upon our request and subject to the approval of the lenders. The remaining \$1 million was subsequently drawn down in January 2005.

During February 2005, the consolidated credit line was extended until April 1, 2006. Interest during the extension period is to be charged at 9%.

During July 2005, in connection with the private placement, the lenders agreed to extend the maturity date of the credit line until August 1, 2007 and to waive the provision of the current loan agreement whereby they would be entitled to receive the proceeds of any issuance of capital stock to prepay the outstanding debt. Pursuant to the provisions of Section 16(b) of the Securities Exchange Act of 1934, as amended, or the Exchange Act, these entities also remitted approximately \$0.6 million in profits from sales of Company common stock during the six months preceding this financing.

PLAN OF DISTRIBUTION

We agreed to register for public resale the shares of our common stock issued to the selling stockholders, or their pledgees, donees, transferees or other successors in interest in connection with the selling stockholders' acquisition of shares in the private placement and pursuant to the terms of the securities purchase agreement dated July 25, 2005. The registration statement of which this prospectus is a part has been filed with the Securities and Exchange Commission pursuant to the securities purchase agreement. We have agreed to use our best efforts to keep each such registration statement effective for a period of two years commencing on the effective date of the applicable registration statement, or a shorter period if all of such shares registered under the applicable registration statement have been sold or may be sold without volume restrictions pursuant to Rule 144 under the Securities Act prior to the expiration of the four-year period. The aggregate proceeds to the selling stockholders from the sale of shares offered pursuant to this prospectus will be the prices at which such securities are sold, less any commissions. The selling stockholders may choose to not sell any or all of the shares of our common stock offered pursuant to this prospectus.

The selling stockholders, or their pledgees, donees, transferees or other successors in interest, may, from time to time, sell all or a portion of the shares of our common stock at fixed prices that may be changed, at market prices prevailing at the time of sale, at prices related to such market prices or at negotiated prices. The selling stockholders may offer their shares of our common stock at various times in one or more of the following transactions:

in the over-the-counter market;

on any national securities exchange or market, if any, on which our common stock may be listed at the time of sale;

through block trades in which the broker or dealer so engaged will attempt to sell the shares as agent, but may position and resell a portion of the block as principal to facilitate the transaction;

through purchases by a broker or dealer as principal and resale by such broker or dealer for our account pursuant to this prospectus;

in ordinary brokerage transactions and transactions in which the broker solicits purchasers;

through options, swaps or derivatives;

in privately negotiated transactions;

in transactions to cover short sales;

through any other legally permissible method; and

through a combination of any such methods of sale.

The selling stockholders may also sell their shares of our common stock in accordance with Rule 144 under the Securities Act, rather than pursuant to this prospectus.

The selling stockholders may sell their shares of our common stock directly to purchasers or may use brokers, dealers, underwriters or agents to sell such shares. In effecting sales, brokers and dealers engaged by the selling stockholders may arrange for other brokers or dealers to participate. Brokers or dealers may receive commissions, discounts or concessions from a selling stockholder or, if any such broker-dealer acts as agent for the purchaser of such shares, from a purchaser in amounts to be negotiated. Such compensation may, but is not expected to, exceed that which

Table of Contents

is customary for the types of transactions involved. Broker-dealers may agree with a selling stockholder to sell a specified number of such shares at a stipulated price per share, and, to the extent such broker-dealer is unable to do so acting as agent for a selling stockholder, to purchase as principal any unsold shares at the price required to fulfill the broker-dealer commitment to the selling stockholders. Broker-dealers who acquire shares as principal may thereafter resell such shares from time to time in transactions, which may involve block transactions and sales to and through other broker-dealers, including transactions of the nature described above, in the over-the-counter market or otherwise at prices and on terms then prevailing at the time of sale, at prices then related to the then-current market price or in negotiated transactions. In connection with such resales, broker-dealers may pay to or receive from the purchasers of such shares commissions as described above.

The selling stockholders and any broker-dealers or agents that participate with the selling stockholders in sales of their shares of our common stock may be deemed to be underwriters within the meaning of the Securities Act in connection with such sales. In such event, any commissions received by such broker-dealers or agents and any profit on the resale of such shares purchased by them may be deemed to be underwriting commissions or discounts under the Securities Act.

From time to time the selling stockholders may engage in short sales, short sales against the box, puts and calls and other hedging transactions in our securities, and may sell and deliver their shares of our common stock in connection with such transactions or in settlement of securities loans. These transactions may be entered into with broker-dealers or other financial institutions. In addition, from time to time a selling stockholder may pledge our shares pursuant to the margin provisions of our customer agreements with our broker-dealer. Upon delivery of such shares or a default by a selling stockholder, the broker-dealer or financial institution may offer and sell such pledged shares from time to time.

We are required to pay all fees and expenses incident to the registration of the shares of our common stock, including fees and disbursements of counsel to the selling stockholders. We have agreed to indemnify the selling stockholders against certain losses, claims, damages and liabilities, including liabilities under the Securities Act. We have advised the selling stockholders that during such time as they may be engaged in a distribution of the shares of our common stock, they are required to comply with the anti-manipulative provisions of Regulation M under the Securities Exchange Act.

LEGAL MATTERS

The validity of the shares of our common stock offered by this prospectus will be passed upon for us by Pepper Hamilton LLP, Philadelphia, Pennsylvania.

EXPERTS

Our annual financial statements incorporated into this prospectus by reference to our annual report on Form 10-K, as amended, for the fiscal year ended December 31, 2004 have been audited by Grant Thornton LLP, independent public accountants, as indicated in their report with respect thereto and is included herein in reliance upon the authority of such firm as experts in accounting and auditing.

ADDITIONAL INFORMATION

Edgar Filing: ISCO INTERNATIONAL INC - Form S-3

This prospectus is part of a registration statement we have filed with the Securities and Exchange Commission. This prospectus does not contain all of the information contained in the registration statement or the exhibit to the registration statement. For further information about us, please see the complete registration statement. Summaries of agreements or other documents in this prospectus are not necessarily complete. Please refer to the exhibit to the registration statement for complete copies of these documents.

We are subject to the information requirements of the Exchange Act and file reports, proxy statements and other information with the Securities and Exchange Commission. You may read and copy such reports, proxy statements and other information, including the registration statements and all of their exhibit, at the Securities and Exchange Commission public reference room located at:

100 F Street, NE

Room 1580

Washington, D.C. 20549

Table of Contents

17. All documents filed by us with the Securities and Exchange Commission under Sections 13(a), 13(c), 14 or 15(d) of the Exchange Act after the date of the initial registration statement of which this prospectus is a part until the offering of common stock pursuant to this prospectus is complete (other than those portions of such documents described in paragraphs (i), (k) and (l) of Item 402 of Regulation S-K promulgated by the Security and Exchange Commission.

If you request, either orally or in writing, we will provide you with a copy of any or all documents which are incorporated by reference. We will provide such documents to you free of charge, but will not include any exhibit, unless those exhibits are incorporated by reference into the document. You should address written requests for documents to: Corporate Secretary, ISCO International, Inc., 1001 Cambridge Drive, Elk Gove Village, IL 60007, (847) 391-9400.

Our Web site is located at <http://www.iscointl.com>. Information contained in our Web site is not a part of this prospectus.

We undertake no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise. You are advised, however, to consult any further disclosures we make on related subjects in our 10-Q, 8-K and 10-K reports to the SEC. Also note that we provide a cautionary discussion of risks and uncertainties relevant to our business in the Risk Factors section of this prospectus. These are factors that we think could cause our actual results to differ materially from expected results. Other factors besides those listed here could also adversely affect us. This discussion is provided as permitted by the Private Securities Litigation Reform Act of 1995.

Table of Contents**Part II****Information Not Required In Prospectus****Item 14. Other Expenses of Issuance and Distribution**

The following table sets forth the various expenses in connection with the sale and distribution of the securities being registered. All of the amounts shown are estimates except the Securities and Exchange Commission registration fee.

SEC registration fee	\$ 706.20
Printing fees	1,000
Legal fees and expenses	15,500
Accounting fees and expenses	2,000
Miscellaneous fees and expenses	
TOTAL	\$ 19,206.20

Item 15. Indemnification of Directors and Officers

Section 145 of the Delaware General Corporation Law (Section 145) permits a corporation to indemnify any person who was or is a party or is threatened to be made a party to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative, by reason of the fact that he is or was a director, officer or agent of the corporation or another enterprise if serving at the request of the corporation. Depending on the character of the proceeding, a corporation may indemnify against expenses (including attorneys' fees), judgments, fines and amounts paid in settlement actually and reasonably incurred in connection with such action, suit or proceeding if the person indemnified acted in good faith and, in respect to any criminal action or proceeding, had no reasonable cause to believe his conduct was unlawful. In the case of an action by or in the right of the corporation, no indemnification may be made with respect to any claim, issue or matter as to which such person shall have been adjudged to be liable to the corporation unless and only to the extent that the Court of Chancery or the court in which such action or suit was brought shall determine that, despite the adjudication of liability, such person is fairly and reasonably entitled to indemnity for such expenses which the court shall deem proper. Section 145 further provides that to the extent a director, officer, employee or agent of a corporation has been successful in the defense of any action, suit or proceeding referred to above, or in the defense of any claim, issue or matter therein, he shall be indemnified against expenses (including attorneys' fees) actually and reasonably incurred by him in connection therewith.

Article 9 of our Certificate of Incorporation provides that we shall indemnify our directors to the full extent permitted by the General Corporation Law of the State of Delaware and may indemnify our officers and employees to such extent, except that we shall not be obligated to indemnify any such person (1) with respect to proceedings, claims or actions initiated or brought voluntarily by any such person and not by way of defense, or (2) for any amounts paid in settlement of an action indemnified against by us without our prior written consent. We have entered into indemnity agreements with each of our directors and officers, including directors of our wholly owned subsidiaries. These agreements may require us, among other things, to indemnify such directors and officers against certain liabilities that may arise by reason of their status or service as directors or officers, as the case may be, to advance expenses to them as they are incurred, provided that they undertake to repay the amount advanced if we are ultimately determined by a court that they are not entitled to indemnification and to obtain directors' and officers' liability insurance if available on reasonable terms.

Edgar Filing: ISCO INTERNATIONAL INC - Form S-3

In addition, Article 8 of our Certificate of Incorporation provides that a director of us shall not be personally liable to us or our stockholders for monetary damages for breach of his or her fiduciary duty as a director, except for liability (1) for any breach of the director's duty of loyalty to us or our stockholders, (2) for acts or omissions not in good faith or which involve intentional misconduct or a knowing violation of law, (3) for willful or negligent conduct in paying dividends or repurchasing stock out of other than lawfully available funds or (4) for any transaction from which the director derives an improper personal benefit.

We have obtained a directors' and officers' liability insurance policy which entitles us to be reimbursed for certain indemnity payments we are required or permitted to make to our directors and officers.

Table of Contents**Item 16. List of Exhibits**

The exhibits filed as part of this registration statement are as follows:

<u>Exhibit</u>	<u>Description</u>
5.1*	Opinion of Pepper Hamilton LLP regarding legality of certain of the securities being registered.
10.1 (1)	Securities Purchase Agreement with Selling Securityholders dated July 25, 2005.
23.1*	Consent of Grant Thornton LLP.
23.2*	Consent of Pepper Hamilton LLP (included in our Opinion filed as Exhibit 5.1 hereto).
24.1*	Powers of Attorney (included on signature page).

* Filed herewith.

(1) Incorporated by reference to the Current Report on Form 8-K filed on July 26, 2005.

Item 17. Undertakings

(a) The undersigned registrant hereby undertakes:

(1) To file, during any period in which offers or sales are being made, a post-effective amendment to this Registration Statement to:

- (i) To include any prospectus required by Section 10(a)(3) of the Securities Act;
- (ii) To reflect in the prospectus any facts or events arising after the effective date of the Registration Statement which, individually or in the aggregate, represent a fundamental change in the information set forth in the Registration Statement. Notwithstanding the foregoing, any increases or decreases in volume of securities offered (if the total dollar value of securities offered would not exceed that which was registered) and any deviation from the low or high end of the estimated maximum offering range may be reflected in the form of prospectus filed with the Commission pursuant to Rule 424(b) if, in the aggregate, the changes in volume and price represent no more than a 20% change in the maximum aggregate offering price set forth in the Calculation of Registration Fee table in the effective registration statement; and
- (iii) To include any additional or changed material information with respect to the plan of distribution not previously disclosed in the Registration Statement or any material change to such information in the Registration Statement;

provided, however, that paragraphs (a)(1)(i) and (a)(1)(ii) do not apply if the information required to be included in a post-effective amendment by those clauses is contained in periodic reports filed with or furnished to the Commission by the Registrant pursuant to Section 13 or Section 15(d) of the Exchange Act that are incorporated by reference in this Registration Statement.

(2) That, for the purpose of determining any liability under the Securities Act of 1933, each such post-effective amendment shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial *bona fide* offering thereof.

(3) To remove from registration by means of a post-effective amendment any of the securities being registered which remain unsold at the termination of the offering.

(b) Insofar as indemnification for liabilities arising under the Securities Act may be permitted to directors, officers and controlling persons of the registrant pursuant to the provisions described in Item 15 above, or

Table of Contents

otherwise, the registrant has been advised that in the opinion of the Securities and Exchange Commission such indemnification is against public policy as expressed in the Securities Act and is, therefore, unenforceable. In the event that a claim for indemnification against such liabilities (other than the payment by the Registrant of expenses incurred or paid by a director, officer or controlling person of the Registrant in the successful defense of any action, suit or proceeding) is asserted by such director, officer or controlling person in connection with the securities being registered, the Registrant will, unless in the opinion of our counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by we are against public policy as expressed in the Securities Act and will be governed by the final adjudication of such issue.
