Approximate Date of Commencement of Proposed Sale to the Public: As soon as practicable after the Registration Statement becomes effective.

If any of the securities being registered on this Form are to be offered on a delayed or continuous basis pursuant to rule 415 under the Securities Act of 1933 check the following box.

If this form is filed to register additional securities for an offering pursuant to Rule 462(b) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering.

If this form is a post-effective amendment filed pursuant to Rule 462(c) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering.

If this form is a post-effective amendment filed pursuant to Rule 462(d) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering.

If delivery of the prospectus is expected to be made pursuant to Rule 434, check the following box:

CALCULATION OF REGISTRATION FEE

Edgar Filing: COMPUTER SOFTWARE INNOVATIONS INC - Form SB-2

| Title of Each Class of Securities to be Registered | Amount to Be Registered (1) | Proposed Maximum Offering Price Per Share(2) | Proposed Maximum Aggregate Offering Price | Amount of Registration Fee(3) |
|---|--|---|--|--|
| Common Stock, par value \$0.001 per share | 15,518,208 shares | \$ 1.68 | \$ 26,070,590 | \$ 3,069 |

- (1) Represents the aggregate number of shares of our Common Stock that are initially issuable upon (a) conversion of the 7,217,736 shares of Series A Convertible Preferred Stock, (b) the exercise of Common Stock Purchase Warrants for the purchase of 7,217,736 shares, and (c) the issuance and conversion of up to 1,082,736 additional shares of Series A Convertible Preferred Stock as potential liquidated damages payable under the Registration Rights Agreement with the selling stockholder, subject in each case to adjustment in certain circumstances.
- (2) Pursuant to Rule 457(c), the offering price is based on the average of the (\$1.35) bid and asked (\$2.00) prices of one share of Common Stock, as reported on the OTC Bulletin Board on November 14, 2005, and has been established solely for the purpose of calculating the registration fee. The amount of common stock registered shall also be deemed, pursuant to Rule 416 under the Securities Act of 1933, as amended, to include additional shares issuable as a result of stock splits, stock dividends or similar transactions.
- (3) Pursuant to Rule 457(p) under the Securities Act of 1933, as amended, the amount of the registration fee is offset against the registration fee of \$8,071 previously paid with respect to the Form SB-2 of the registrant, Computer Software Innovations, Inc., filed with the Commission on March 28, 2005, SEC File Number 333-123626, and withdrawn by the registrant on September 30, 2005.

The registrant hereby amends this registration statement on such date or dates as may be necessary to delay its effective date until the registrant shall file a further amendment which specifically states that this registration statement shall thereafter become effective in accordance with Section 8(a) of the Securities Act of 1933 or until the registration statement shall become effective on such date as the Commission, acting pursuant to Section 8(a), may determine.

Table of Contents

The information in this prospectus is not complete and may be changed. The selling stockholder named in this prospectus may not sell these securities until the registration statement filed with the Securities and Exchange Commission is effective. This prospectus is not an offer to sell these securities and the selling stockholder named in this prospectus is not soliciting offers to buy these securities in any jurisdiction where the offer or sale is not permitted.

Subject to Completion dated November 18, 2005

PROSPECTUS

15,518,208 Shares

**COMPUTER SOFTWARE
INNOVATIONS, INC.**

Common Stock

Barron Partners LP, identified in this prospectus as the selling stockholder or Barron, is offering up to 15,518,208 shares of our common stock, \$0.001 par value per share. The shares of our common stock to be sold by the selling stockholder are or will be acquired upon conversion of the shares of our Series A Convertible Preferred Stock, the exercise of certain Common Stock Purchase warrants held by Barron, or the conversion of additional shares of our Series A Convertible Preferred Stock issuable as liquidated damages if we should fail to comply with obligations to register the shares underlying the preferred stock and the warrants pursuant to a registration rights agreement with the selling stockholder. We are not selling any shares of common stock under this prospectus and will not receive any proceeds from the sale of the shares by the selling stockholder. We will, however, receive proceeds from the sale of common stock pursuant to the exercise of warrants by Barron, absent a cashless exercise of the warrants.

The selling stockholder may sell all or any portion of the shares for its own account from time to time in one or more transactions through brokers or dealers at market prices then prevailing, in underwritten transactions at prices related to then-current market prices or in individually negotiated transactions at such prices as may be agreed upon.

We will pay all expenses in connection with the registration of the shares under the Securities Act of 1933, as amended, including the preparation of this prospectus.

Barron may be deemed an underwriter within the meaning of the Securities Act of 1933 of the shares it is offering.

Brokers or dealers effecting transactions in these shares should confirm that the shares are registered under applicable state law or that an exemption from registration is available.

Our common stock is traded in the over-the-counter market and quoted on the OTC Bulletin Board under the symbol CSWI.OB.

Investing in our common stock is speculative and involves a high degree of risk. You should read the Risk Factors section beginning on page 11 before buying shares of our common stock.

Neither the Securities and Exchange Commission nor any state securities commission or other regulatory body has approved or disapproved of the common stock or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The date of this prospectus is _____, 2005.

IMPORTANT NOTICE TO READERS

This prospectus is part of a registration statement we filed with the Securities and Exchange Commission, or SEC, using a shelf registration process. Under this shelf registration process, the selling stockholder may, from time to time, offer shares of our common stock owned by them issued upon conversion of the Series A Convertible Preferred Stock, the exercise of warrants, or the conversion of additional shares of Series A Convertible Preferred Stock issuable as liquidated damages if we should fail to comply with obligations to register the shares underlying the preferred stock and the warrants pursuant to a registration rights agreement with the selling stockholder. Each time the selling stockholder offers common stock under this prospectus, it is required to provide to potential purchasers a copy of this prospectus and, if applicable, a copy of a prospectus supplement. You should read both this prospectus and, if applicable, any prospectus supplement. See [Where You Can Find More Information](#) for more information.

You should rely only on the information contained in this prospectus. We have not authorized anyone to provide you with information different from the information contained in this prospectus. This document may be used only in jurisdictions where offers and sales of these securities are permitted.

In this prospectus, unless the context requires otherwise, (1) Computer Software Innovations, Inc., CSI, we, our, us and the Company refer to the combined business of Computer Software Innovations, Inc., a Delaware corporation formerly known as VerticalBuyer, Inc., and its subsidiary, CSI Technology Resources, Inc., a South Carolina corporation; (2) VerticalBuyer refers to the Company prior to the merger; (3) CSI South Carolina refers to Computer Software Innovations, Inc., a South Carolina corporation, prior to the merger; and (4) Barron Partners LP, Barron, or the Selling Stockholder refers to Barron Partners LP, the holder of Series A Convertible Preferred Stock and warrants to purchase common stock of the Company.

FORWARD-LOOKING AND CAUTIONARY STATEMENTS

Certain information contained in this prospectus includes forward-looking statements that involve substantial risk and uncertainties. Any statement in this prospectus and in the documents incorporated by reference into this prospectus that is not a statement of an historical fact constitutes a forward-looking statement. Among other things, these statements relate to our financial condition, results of operations and business. When used in this prospectus, these forward-looking statements are generally identified by the words or phrases may, expect, anticipate, plan, believe, seek, estimate, project or words of similar import. These forward-looking statements are not guarantees of future performance. These statements are based on management's expectations that involve a number of business risks, uncertainties and other factors that may cause the actual results, performance or achievements to differ materially from those expressed or implied by the forward-looking statements. Many factors are beyond our ability to control or predict. You are accordingly cautioned not to place undue reliance on such forward-looking statements, which speak only as of the date that we make them. We do not undertake to update any forward-looking statement that may be made from time to time by or on our behalf.

We have included risk factors and uncertainties that might cause differences between anticipated and actual future results in the Risk Factors section. We have attempted to identify, in context, some of the factors that we currently believe may cause actual future experience and results to differ from our current expectations regarding the relevant matter or subject area. The operations and results of our software and systems integration businesses also may be subject to the effects of other risks and uncertainties, including, but not limited to:

a reduction in anticipated sales;

an inability to perform customer contracts at anticipated cost levels;

our ability to otherwise meet the operating goals established by our business plan;

market acceptance of our new software, technology and services offerings;

an economic downturn; and

changes in the competitive market place and/or customer requirements.

PROSPECTUS SUMMARY

This summary contains basic information about us and this offering. Because it is a summary, it does not contain all of the information that you should consider before investing. You should read this entire prospectus carefully, including the section entitled Risk Factors, our financial statements and the notes thereto and the other documents we refer to in this prospectus for a more complete understanding of us and this offering before making an investment decision.

COMPUTER SOFTWARE INNOVATIONS, INC.

Overview

We develop software and provide hardware-based technology solutions. Our client base consists primarily of municipalities, school districts and local governments, although we continue to increase the products and services we provide to non-governmental entities.

Our internally developed software consists of fund accounting based financial management software and standard based lesson planning software. Our primary software product, fund accounting based financial management software, is developed for those entities which track expenditures and investments by fund, or by source and purpose of funding. Our fund accounting software is used primarily by public sector and not-for-profit entities. In September 2005, we acquired standard based lesson planning software. The software is designed to allow education professionals to create, monitor and document lesson plans and their compliance with a state's curriculum standards. Our internally developed software is sold and supported through our software applications segment.

Our technology solutions segment provides network system solutions to more than 200 organizations in South Carolina, North Carolina and Georgia. These solutions include, among other capabilities, planning, installation and management of computer, telephone, wireless, video conference, security monitoring and distance and classroom learning projects. The technology solutions segment also provides subsequent support and maintenance of equipment and systems. We have established associations with some of the largest vendors in the industry and others whom we believe offer innovative products.

History

Incorporated on September 24, 1999, we were previously known as VerticalBuyer, Inc. We ceased business operations of any kind in September 2001. Prior to assuming the business operations of Computer Software Innovations, Inc., a South Carolina corporation (CSI - South Carolina) in a merger consummated on February 11, 2005, we were an inactive public shell corporation.

In the first quarter of 2005, we concluded a series of recapitalization transactions. On January 31, 2005, a change in control of the Company occurred as a result of a purchase of a majority of our common stock by CSI - South Carolina. On February 11, 2005, CSI - South Carolina merged into us, and we issued preferred stock, common stock, warrants and certain subordinated notes. In connection with the merger, we changed our name to Computer Software Innovations, Inc.

Edgar Filing: COMPUTER SOFTWARE INNOVATIONS INC - Form SB-2

The merger of CSI South Carolina into us is accounted for as a reverse acquisition, with CSI South Carolina being designated for accounting purposes as the acquirer, and the surviving corporation, VerticalBuyer, Inc., being designated for accounting purposes as the acquiree. Under reverse acquisition accounting, the financial statements of the surviving corporation (VerticalBuyer) are the financial statements of the acquirer (CSI South Carolina). Accordingly, reported prior year financial results are those of CSI South Carolina.

Our current business operations are those of CSI South Carolina. CSI South Carolina was incorporated as a South Carolina corporation on January 20, 1990, and founded by Nancy K. Hedrick, our Chief Executive Officer and director; Beverly N. Hawkins, our Secretary and Vice President of Support Services; and Joe G. Black, our former interim Chief Financial Officer. Ms. Hedrick and Ms. Hawkins, with previous experience in the software industry, had developed an accounting system designed for local government and the kindergarten through high school education sector. They were joined in 1999 by Thomas P. Clinton, our Vice President of Sales and director; and William J. Buchanan, our Treasurer and Vice President of Engineering. Messrs. Clinton and Buchanan started our technology services business, to provide hardware network support to our software clients. The addition of the technology sector provided an additional revenue source from the existing software client base and new contacts. The result was an increase in annual revenues from approximately \$2 million in 1999 to approximately \$22 million in 2004.

Table of Contents

Business Strategy

In addition to our sales of software applications, technology solutions and related support and maintenance services, we provide technology consulting, including network and systems integration services, as a part of our solutions sales efforts. Network and systems integration involves combining different computer programs, processes and hardware so that they operate and communicate seamlessly as a tightly knit system. These services also generate a significant amount of revenue from the sale of computer hardware equipment. Our marketing strategy is to provide a suite of software products coupled with full service integration of the hardware solutions that support those products and other back-office functions.

By providing a client the ability to call one solution provider and circumvent the difficulties that often arise when dealing with multiple vendors, we believe we are able to achieve a competitive advantage in the marketplace. A strong referral base has been key to our success and we believe will continue to play a vital role in our growth.

We intend to methodically expand the geographic reach of our technology offerings from our primary client locations in South Carolina, North Carolina and Georgia to surrounding states over several years. Our technology offerings require hands-on implementation and support, which necessitates the recruitment of qualified personnel in an area of expansion to service our business. Investment in additional physical offices and other overhead may also be required.

In contrast, we are able to deliver software applications, demonstrations and training over the internet, and deliver support by internet or phone. Accordingly, for our software applications segment, we plan to expand our geographic reach to a national level more quickly. In expanding both our technology offerings and our software applications, we may accelerate expansion if we find complementary businesses in other regions that we are able to acquire.

We believe our markets contain a number of attractive acquisition candidates. We foresee expanding through acquisitions of one or more of the following types of technology organizations:

developers and resellers of complementary software, such as time and attendance, workflow management, tax appraisal and assessment, educational, court and law enforcement related;

organizations focused on providing products and solutions to commercial large corporate (Fortune 100) and small business accounts. Many of our current technology solutions translate to the corporate market, especially IP telephony, IP surveillance (sending voice calls and surveillance across the internet using internet protocol (IP), a standard method for capturing information in packets), video conferencing and network security;

consulting firms providing high level professional services. We believe this type of acquisition would enhance our offering of technology planning and project management; and

contractors who string cable used to connect computers and related devices to a network. We currently outsource these services.

Edgar Filing: COMPUTER SOFTWARE INNOVATIONS INC - Form SB-2

Our business strategy provides that we will examine the potential acquisition of companies and businesses within our industry. In determining a suitable acquisition candidate, we will analyze carefully a target's potential to add to and complement our product mix, expand our existing revenue base, improve our margins, expand our geographic coverage, strengthen our management team and, above all, improve stockholder returns. We are unable to predict the nature, size or timing of any acquisition. We can give no assurance that we will reach agreement or procure the financial resources necessary to fund any acquisition, or be able to successfully integrate or improve returns as a result of any such acquisition.

Since the February 2005 merger, we have pursued and entered into preliminary discussions with various acquisition candidates. However, we have not entered into agreements or understandings for any acquisitions which management deems material.

* * * *

Our corporate headquarters are located at 1661 East Main Street, Easley, South Carolina 29640, and our telephone number is (864) 855-3900. Our Internet address is www.csi-plus.com. The information contained on our website does not constitute a part of this prospectus.

Table of Contents

The Offering

| | |
|--|---|
| Securities Offered | A total of 15,518,208 shares of common stock, \$0.001 par value per share. |
| | |
| By the Selling Stockholder | |
| Common Stock Outstanding Before the Offering ⁽¹⁾⁽²⁾ | As of September 30, 2005, we had 2,631,786 shares of common stock outstanding. This included 2,526,904 shares held by executive officers and other affiliates of the Company. |
| Common Stock Outstanding After the Offering ⁽²⁾⁽³⁾ | 18,149,994 |
| Use of Proceeds | We will not receive any of the proceeds from the resale by the selling stockholder of the common stock in the offering. We will, however, receive proceeds from the sale of the common stock pursuant to the exercise of warrants by Barron, absent a cashless exercise of the warrants. Any proceeds we receive from the exercise of the warrants will be used to finance acquisitions and for general working capital purposes. |
| Registration | We filed the registration statement of which this prospectus is a part pursuant to a Registration Rights Agreement, dated February 11, 2005 and amended November 7, 2005, between the selling stockholder and us. Pursuant to the terms of the amended Registration Rights Agreement, we are required to use our best efforts to keep the registration effective until the earliest of the following has occurred: |
| Rights | <p style="padding-left: 40px;">all securities covered by the registration statement have been sold;</p> <p style="padding-left: 40px;">all securities covered by the registration statement become freely tradable without registration pursuant to Rule 144 under the Securities Act; or</p> <p style="padding-left: 40px;">until February 10, 2008.</p> <p>Our failure to meet the above requirements will subject us to liquidated damages in an amount equal to 2,472 shares of Series A Convertible Preferred Stock per day for each day that a registration statement is not in effect with respect to the securities offered, subject to certain exceptions.</p> |
| OTC Bulletin | CSWI.OB |
| Board Symbol | |
| Risk Factors | See Risk Factors beginning on page 11 and other information in this prospectus for a discussion of factors that you should carefully consider before deciding to invest in the shares of our common stock. |

-
- (1) The number of outstanding shares presented above does not include the shares of common stock offered by the selling stockholder under this prospectus, which shares will be acquired by the selling stockholder upon: (i) the conversion of the shares of Series A Convertible Preferred Stock, (ii) the exercise of warrants, and (iii) the conversion of additional shares of Series A Convertible Preferred Stock issuable as liquidated damages if we fail to comply with obligations to register the shares underlying the preferred stock and the warrants pursuant to the Registration Rights Agreement with the selling stockholder.
- (2) The total number of outstanding shares presented does not include 268,343 shares held by employees under immediately exercisable options and approximately 506,224 restricted shares of common stock which we anticipate awarding to certain outside directors and a consultant as compensation for their services.
- (3) This assumes that all shares of the preferred stock will be converted and the warrants will be exercised in full. It also assumes that the maximum number of shares of preferred stock (1,082,736) are issued as liquidated damages under the Registration Rights Agreement with the selling stockholder.

Table of Contents**SUMMARY FINANCIAL INFORMATION**

We have provided in the tables below our summary historical financial and operating data. The financial information for the years ended December 31, 2004 and December 31, 2003 has been derived from our audited consolidated financial statements. The financial information for the nine-month periods ended September 30, 2005 and September 30, 2004 has been derived from our unaudited consolidated financial statements and includes all adjustments, consisting of normal recurring items, which we consider necessary for a fair presentation of our financial position and results of operations. The interim results set forth below for the nine months ended September 30, 2005 and September 30, 2004 are not necessarily indicative of our financial condition or results of operation to be expected for any future period. The following presents certain non-GAAP financial measures. These measures are not calculated in accordance with accounting principles generally accepted in the United States or GAAP. We explain the measures and have reconciled them to the most directly comparable measures calculated and presented in accordance with GAAP under the heading "Non-GAAP Financial Measures" below. You should read the following financial information in conjunction with our consolidated financial statements and related notes, and the information under "Management's Discussion And Analysis Of Financial Condition And Results Of Operations" contained in this prospectus.

- (1) In the first quarter of 2005, we entered into a series of recapitalization transactions, including the merger of CSI South Carolina into us, the change of our name from VerticalBuyer, Inc. to Computer Software Innovations, Inc., and the issuance of preferred shares and warrants to Barron Partners LP. These transactions are described in detail in our unaudited consolidated financial statements as of September 30, 2005.
- (2) This is a non-GAAP financial measure. Please see Non-GAAP Financial Measures below for an explanation of this measure and a reconciliation of it to the most directly comparable measure calculated in accordance with GAAP.
- (3) Per share amounts have been restated to reflect the stock split, issuances and cancellations of common stock and for a fully diluted presentation, the redemption of options and issuance of preferred shares and warrants (in applicable periods) in connection with the Company's reverse merger transactions in February 2005.
- (4) These dividends represent dividends declared by CSI South Carolina to its five shareholders prior to the merger. These dividends are disclosed as those of the surviving company (formerly VerticalBuyer), because under reverse merger accounting the financial statements of the surviving corporation (VerticalBuyer) are the financial statements of the acquiror (CSI South Carolina). Prior to the dividends related to the merger transaction, it was not our policy to declare or pay dividends. The terms of our Series A Convertible Preferred Stock prohibit any dividends, and our agreements with our bank lender also contain dividend restrictions. At this time, we have no plans to pay dividends in the future, but rather intend to retain the earnings of the business for working capital and other investments in order to fund future growth, both internally and through acquisitions.
- (5) 9,747,560 shares are excluded from this calculation of fully-diluted shares outstanding as the effect would be anti-dilutive.

Non-GAAP Financial Measures

Pro Forma Net Income Before Special Items and Pro Forma Cash Flow From Operations Before Special Items. The pro forma net income before special items and Pro forma cash flow from operations before special items non-GAAP measures exclude one-time costs related to the series of recapitalization transactions detailed in our unaudited consolidated financial statements as of September 30, 2005. Pro forma net income before special items and pro forma cash flow from operations before special items are not measurements under GAAP and should not be considered as alternatives to net income as an indicator of operating performance, or cash flow from operations as a measure of cash flows from operating performance. We believe these measures allow investors to more easily compare our ongoing operations and financial performance from period to period. However, these measures are not as complete as GAAP net income and cash flows from operations. Consequently, investors should rely on GAAP net income and cash flows from operations. Also, past performance, including that reflected in these non-GAAP measures, is not intended to be an indicator of future performance. Additionally, we anticipate that we may engage in acquisitions in the future which may include additional costs similar to those costs relating to the recapitalization transactions which are excluded as special items for the purposes of calculating these non-GAAP measures.

A reconciliation of pro forma net income before special items to the net income financial statement line item reported under GAAP is provided below:

Segment Operating Income (loss)(Unaudited). Segment income is a footnote disclosure required under GAAP, which is to be reported in the same manner under which management evaluates the ongoing performance of each segment of the business. Items included in or excluded from management's evaluation are based on management's judgment and may differ from those used by and between other public companies and often do not tie to a specific GAAP financial statement line item. A reconciliation of segment income to the operating income financial statement line item reported under GAAP is provided, as segment income should not be considered as an alternative to operating income per GAAP as an indicator of financial performance and is not as complete as GAAP operating income. Consequently, investors should rely on the GAAP financial measure when evaluating our operating earnings.

A reconciliation of Segment operating income (loss) (unaudited) to Operating income per GAAP is presented below:

Per Share of Common Stock: Pro forma Shareholders' Equity and Warrant Liability. Subsequent to the date of our unaudited consolidated financial statements as of September 30, 2005, Barron and we entered into an amendment to the Registration Rights Agreement. The amendment modified the provision requiring the payment of cash liquidated damages for our failure to cause a registration statement registering the shares of our common stock underlying the preferred stock and warrants to become and remain effective. The cash liquidated damages provision was replaced with a provision requiring liquidated damages to be paid in a set number of unregistered shares of preferred stock, not tied to the market price of our common stock. In accordance with EITF 00-19, as of the Registration Rights Agreement amendment date of November 7, 2005, the financial instrument relating to the warrants and the temporary equity relating to the par value of preferred stock will be reclassified to permanent equity. The pro forma shareholder's equity and warrant liability, combined per share information, a non-GAAP measure, is presented as if the Company had completed those efforts by the end of the period of the unaudited consolidated financial statements as of September 30, 2005, and the financial instrument and temporary equity were reclassified to permanent equity. Management believes that this non-GAAP measure is useful in showing the significant impact of this subsequent event on our equity position. Per share of common stock: pro forma shareholders' equity and warrant liability is not a substitute for shareholders' equity as reported under GAAP, nor will it eliminate the loss (or gain) recorded on the warrants and reported in the net income and retained earnings of the Company up to the date of the amendment at which point the warrant liability's fair value as of that date will be reclassified to equity. The reader should consider all information contained in this prospectus and in our unaudited consolidated financial statements as of September 30, 2005 related to the liquidated damages provision and this subsequent event.

RISK FACTORS

Risk Factors Relating to Our Company

We depend on county and city governments and school districts for the sale of our products and services, and our revenues will be affected by governmental spending patterns.

Substantially all of our revenues are from sales of software and services to county and city governments and school districts. We expect that sales to public sector customers will continue to account for substantially all of our revenues in the future. Many of these contracts are subject to annual review and renewal by the local governments, and may be terminated at any time on short notice. Negative trends in governmental spending patterns or failure to appropriate funds for our contracts, whether due to budgetary constraints or otherwise, may have an adverse impact on sales revenues.

Because we must comply with governmental procurement regulations and undergo governmental approval processes, the sales cycle associated with our products is typically complex and lengthy. This puts us at risk of having to incur significant sales expenses with no assurance that a sale will be consummated and revenues received. Future regulations could increase the magnitude of this risk.

For each contract with a public sector customer, we are typically subject to a procurement process, which can include a competitive bid process and governmental acceptance reviews. The process is often onerous and can include a detailed written response addressing, among other things, the design of software that addresses customer-specified needs, the integration of our products with third-party products and product demonstrations. Future laws and regulations could increase the demands and costs of this process. There is a risk that we could expend significant funds and management resources in complying with the procurement and governmental review rules, only to ultimately fail to close the sale. The procurement process can also be subject to political influences, award protests initiated by unsuccessful bidders and changes in budgets or appropriations which are beyond our control. Reacting or responding to any such influences or protests may involve considerable expense and delay, and may result in termination, reduction or modification of the awarded contract. Our failure to consummate sales after incurring significant expenses to comply with lengthy procurement processes would reduce our profitability and adversely affect our financial condition.

Changes in governmental procurement regulations may increase our costs, and non-compliance could negatively impact our ability to compete.

Government organizations require compliance with various legal and other special considerations in the procurement process. The adoption of new or modified procurement regulations could harm us by increasing the costs of competing for sales or by impacting our ability to perform government contracts. Any violation, intentional or otherwise, of these regulations could result in fines and/or debarment from award of additional government contracts, which could negatively affect our profitability and harm our business reputation.

Compliance with procurement processes and regulations may require us to disclose trade secrets or other confidential business information, which may place us at a competitive disadvantage.

Edgar Filing: COMPUTER SOFTWARE INNOVATIONS INC - Form SB-2

We may, depending on the particular procurement, be required to disclose trade secrets and commercially sensitive information to the governmental entity making the procurement in order to place a bid or respond to a request for proposal. While mechanisms may be in place for protecting such information, disclosure could occur through a Freedom of Information Act release, thereby potentially compromising our confidential information.

Governmental contracts may contain terms not contained in typical private sector sales contracts that may be unfavorable to us.

Governmental contracts may contain terms that could adversely impact our sales revenues or increase our costs of doing business. Such terms may include profit limitations and rights of a particular governmental agency to terminate a contract for convenience or if funds are unavailable. We have never had a customer terminate a contract in this manner, although we can give no assurances this will not occur in the future. Also, in some cases we may be subject to liquidated damages for defective products and/or delays or interruptions caused by systems failures. Payments under some public sector contracts are subject to achieving implementation milestones and we could in the future have differences with customers as to whether milestones have been achieved.

Table of Contents

Modifying our software products to comply with existing and future governmental regulations may increase our operating costs and have a negative impact on our profitability.

From time to time, it may be necessary to revise and update our software products to comply with changes in laws relating to the subject matter with which our software deals. For, example we may have to revise our CSI Accounting *+Plus* software to comply with changes in reporting requirements. Examples of such changes include modifications for Form W-2, Form 1099 and various health and retirement reporting and payroll tax table updates. The extent of any required revisions will depend upon the nature of the change in law. It is possible that in some cases, the costs of compliance may be passed on to the customer, but in other cases, we may be forced to absorb some or all of the costs. Any absorption of compliance costs would have an adverse impact on profits.

If our customers do not renew their annual maintenance and support agreements for our products and services, or if they do not renew them on terms that are favorable to us, our business might suffer.

Most of our maintenance agreements are for a term of one year. As the end of the annual period approaches, we seek to renew the agreement with the customer. Maintenance renewals represented 9% of our total revenue for the 2004 fiscal year and 7% of our total revenue for the 2003 fiscal year. Due to this characteristic of our business, if our customers chose not to renew their maintenance and support agreements with us on terms beneficial to us, our business, operating results and financial condition could be harmed.

We derive a material portion of our revenue from the sale of our Accounting+Plus software. We believe that the use by our customers of our software also gives us a competitive advantage in our providing system integration services, including the sale of hardware, to these customers. Reduced acceptance of our Accounting+Plus software and upgrades of such software could have a direct and indirect adverse impact on our revenues.

We derive a material amount of our revenue from the sale of our Accounting+Plus software and related services, and revenue from this product and related services is expected to remain a material component of our revenue for the foreseeable future. For the 2004 and 2003 fiscal years, software sales and related revenues accounted for approximately 12.6% and 10.4% of our total revenues, respectively. Because we generally grant non-exclusive licenses to our products on a perpetual basis and deliver new versions and enhancements to customers who purchase annual maintenance and support, our future license, services and maintenance revenue are substantially dependent on sales to new customers. In addition, if demand for our Accounting+Plus software declines, we believe we would lose a competitive advantage in providing system integration services, and our technology segment revenues could also decline.

We encounter long sales cycles, particularly for our largest customers, which could have an adverse effect on the size, timing and predictability of our revenue and sales.

Potential customers, particularly large clients, generally commit significant resources to an evaluation of available software and require us to expend substantial time, effort and money educating them as to the value of our software and services. Sales of our core software products to these larger customers often require an extensive education and marketing effort.

We could expend significant funds and management resources during the sales cycle and ultimately fail to close the sale. Our core software product sales cycle averages approximately three months for sales to existing customers and from three to nine months for sales to new

Edgar Filing: COMPUTER SOFTWARE INNOVATIONS INC - Form SB-2

customers and large organizations. Our sales cycle for all of our products and services is subject to significant risks and delays over which we have little or no control, including:

our customers' budgetary constraints;

the timing of our clients' budget cycles and approval processes;

our clients' willingness to replace their current methods or software solutions;

our need to educate potential customers about the uses and benefits of our products and services;

Table of Contents

the timing and expiration of our clients' current outsourcing agreements for similar services; and

the governmental procurement risk described elsewhere in Risk Factors.

If we are unsuccessful in closing sales after expending significant funds and management resources or if we experience delays as discussed above, it could have a material adverse effect on the size, timing and predictability of our revenue.

We are dependent on strategic relationships with our vendors, and our business would be materially and adversely affected if we were to lose our existing, or fail to gain additional, strategic relationships.

The segment of our business that includes hardware sales and related support services is dependent upon the strong relationships that have been established with our vendors. We purchase equipment from these vendors and add our engineering services to provide a total solution to the customer. Without the vendor products, we would lose the margin on the hardware sale as well as the margin provided by our engineering services.

These relationships could be terminated if we fail to:

maintain adequate certified systems engineers (computer professionals who have passed a test indicating specialized knowledge in the design, planning and implementation of specific computer-based technology) and staff that can implement and support the vendors' products;

receive satisfactory feedback from our customers; or

pay for purchased equipment and services on a timely basis.

Our failure to compete successfully could cause our revenue or market share to decline.

Our market is fragmented, competitive and rapidly evolving, and there are limited barriers to entry for some aspects of this market. Our software applications segment has three primary sources of competition:

software developers offering integrated specialized products designed to address specific needs of governmental organizations;

custom-developed products created either internally or outsourced to custom service providers; and

software developers offering general products not designed to address specific needs of governmental organizations.

Our technology solutions segment is subject to competition by both regional and national technology solutions providers including those listed by VAR Business Magazine as the top 500 network integration companies in the United States.

The companies with which we compete, and other potential competitors, may have greater financial, technical and marketing resources and generate greater revenue and better name recognition than we do. If one or more of our competitors or potential competitors were to merge or form a strategic relationship with another of our competitors, the change in the competitive landscape could adversely affect our ability to compete effectively. For example, a large diversified software enterprise, such as Microsoft, Oracle or PeopleSoft, could decide to enter the market directly, including through acquisitions, or large hardware and technology solutions providers, such as IBM Global Services, EDS and Lockheed Martin IT could have a negative impact on our ability to compete in the technology solutions market.

Loss of significant clients could hurt our business by reducing our revenues and profitability.

Our success depends substantially upon retaining our significant clients. Generally, we may lose clients due to conversion to a competing service provider. We cannot guarantee that we will be able to retain long-term relationships or secure renewals of short-term relationships with our significant clients in the future. Our top ten clients constituted approximately 40% of our revenue for the 2004 and 2003 fiscal years. The loss of a significant portion or all of these clients would have a material adverse effect on our profitability and financial condition.

Table of Contents

We may not be able to manage our future growth efficiently or profitably.

We have experienced significant growth since our inception, and we anticipate that continued expansion will be required to address potential market opportunities. For example, we will need to expand the size of our sales and marketing, product development and general and administrative staff and operations, as well as our financial and accounting controls. There can be no assurance that our infrastructure will be sufficiently scalable to manage our projected growth. For instance, our anticipated growth will result in a significant increase in demands on our maintenance and support services professionals in order to maintain service quality. If we are unable to address sufficiently these additional demands on our operations, systems, procedures and resources, our profitability and growth might suffer.

Because competition for highly qualified personnel is intense, we may not be able to attract and retain the employees we need to support our planned growth.

To execute our plans for continuing growth, we will need to increase the size, and maintain the quality of, our sales force, software development staff and our professional services organization. To meet our objectives, we must attract and retain highly qualified personnel with specialized skill sets focused on the educational and local government market. Competition for qualified personnel can be intense, and we might not be successful in attracting and retaining them. The pool of qualified personnel with experience working with or selling to nonprofit organizations is limited overall and specifically in Easley, South Carolina, where our principal office is located. Our ability to maintain and expand our sales, product development and professional services teams will depend on our ability to recruit, train and retain top quality people with advanced skills who understand selling to, and the specific needs of, educational institutions and local governments. For these reasons, we have from time to time in the past experienced, and we expect to continue to experience in the future, difficulty in hiring and retaining highly skilled employees with appropriate qualifications for our business. In addition, it takes time for our new sales and services personnel to become productive, particularly with respect to obtaining and supporting major customer accounts. In particular, we plan to continue to increase the number of services personnel to attempt to meet the needs of our customers and potential new customers. In addition to hiring services personnel to meet our needs, we might also engage additional third-party consultants as contractors, which could have a negative impact on our earnings. If we are unable to hire or retain qualified personnel, if newly hired personnel fail to develop the necessary skills or if they reach productivity slower than anticipated, it would be more difficult for us to sell our products and services, and we could experience a shortfall in revenue or earnings, and not achieve our planned growth.

As a result of the relatively low margins associated with the sale of hardware, our technology solutions segment produces substantially lower gross margins than our software applications segment. Our overall gross profit margin may be adversely affected if revenues of our technology solutions segment rise as a percentage of total revenues. In turn, this could result in reduced net income.

For the fiscal years ended December 31, 2004 and 2003, our software applications segment reported gross margins of 65.5% and 59.1%, respectively. In contrast, our technology solutions segment for such periods reported gross margins of 22.5% and 24.3%. Accordingly, an increase in hardware and related sales in our technology solutions segment relative to software revenues in our software applications segment could harm our overall gross margin. A shift in our product mix toward lower margin products would adversely affect our overall profitability if increases in volume of lower margin products did not offset the effect of changes in product mix. A decline in margins may also be received negatively by investors. Since establishing our technology solutions business in 1999, we have seen a continual increase in the amount of hardware we have been able to sell. Hardware pricing is highly competitive and product life-cycles can be short. We have recently been able to benefit from identifying, selling and implementing new products (for example, IP telephony and classroom learning tools) with higher margins as a result of selling such products before what we believe to be the midpoint of their life-cycles. As market penetration and competition increase for these products, margins and sales of these products may decline. As current hardware based products mature, there can be no assurance that we will identify new products with equal margins or opportunities for greater volume to replace existing products.

Table of Contents

If our products fail to perform properly due to undetected errors or similar problems, or fail to comply with government regulations, our business could suffer, and we could become subject to product or general liability or errors and omissions claims. Such claims could be time-consuming and costly. Furthermore, any negligence or misconduct on the part of our consultants could result in financial or other damages to our customers, for which they may bring claims against us.

Complex software such as ours often contains undetected errors or bugs. Software errors are frequently found after introduction of new software or enhancements to existing software. We continually introduce new products and new versions of our products. If we detect any errors before we ship a product, we might have to delay product shipment for an extended period of time while we address the problem. We might not discover software errors that affect our new or current products or enhancements until after they are deployed, and we may need to provide enhancements to correct such errors. Therefore, it is possible that, despite testing by us, errors may occur in our software. These errors, as well as any negligence or misconduct on the part of our consultants, could result in:

harm to our reputation;

lost sales;

delays in commercial release of our software;

product liability, general liability or errors and omissions claims;

delays in, or loss of, market acceptance of our products;

license terminations or renegotiations; and

unexpected expenses and diversion of resources to remedy errors.

Furthermore, our customers may use our software together with products from other companies. As a result, when problems occur, it might be difficult to identify the source of the problem. Even when our software does not cause these problems, the existence of these errors might cause us to incur significant costs, divert the attention of our technical personnel from our product development efforts, impact our reputation and cause significant customer relations problems.

Our failure to obtain or integrate third-party technologies could delay the development of our software and increase our costs.

We intend to continue licensing technologies from third parties, including applications used in our research and development activities and technologies which are integrated into our products. These technologies may not continue to be available to us on commercially reasonable terms or at all. Our inability to obtain any of these licenses could delay product development until equivalent technology can be identified, licensed and integrated. This inability in turn would harm our business and operating results. Our use of third-party technologies exposes us to increased risks, including, but not limited to, risks associated with the integration of new technology into our products, the diversion of our resources from development of our own proprietary technology and our inability to generate revenue from licensed technology sufficient to offset associated acquisition and maintenance costs.

Our success depends on our ability to respond quickly to changing technology, and we believe that we must develop new software programs and services utilizing modern technology in order to maintain our competitive position and profitability.

The market for our products and services is characterized by rapid technological change, evolving industry standards in computer hardware and software technology, changes in customer requirements and frequent new product introductions and enhancements. The introduction of products embodying new technologies and the emergence of new industry standards can cause customers to delay their purchasing decisions and render existing products obsolete and unmarketable. The life cycles of our software products are difficult to estimate. As a result, our future success will depend, in part, upon our ability to continue to enhance existing products and to develop and introduce in a timely manner new products with technological developments that satisfy customer requirements and achieve market acceptance. We may not be able to successfully identify new product opportunities and develop and bring new products to market in a timely and cost-effective manner. In addition,

Table of Contents

products, capabilities or technologies developed by others could render our products or technologies obsolete or noncompetitive or shorten product life cycles. If we are unable to develop on a timely and cost-effective basis new software products or enhancements to existing products or if new products or enhancements do not achieve market acceptance, we may not be able to compete effectively or maintain or grow our revenues.

As a result of the complexities inherent in software development, and in particular development for multi-platform environments, and the broad functionality and performance demanded by our customers, major new product enhancements and new products can require long development and testing periods before they are released commercially. We have on occasion experienced delays in the scheduled introduction of new and enhanced products, and future delays could increase costs and delay revenues.

We have made significant investments in software development and our growth plans are premised in part on generating substantial revenue from new product introductions and future enhancements to existing products. New product introductions and enhancements involve significant risks. For example, delays in new product introductions and enhancements, or less-than-anticipated market acceptance, are possible and would have an adverse effect on our revenue and earnings. We cannot be certain that our new products or enhancements will meet customer performance needs or expectations when shipped or that they will be free of significant software defects or bugs. If they do not meet customer needs or expectations, for whatever reason, upgrading or enhancing these products could be costly and time consuming.

In addition, the selling price of software products tends to decline significantly over the life of the product. If we are unable to offset any reductions in the selling prices of our products by introducing new products at higher prices or by reducing our costs, our revenue, gross margin and operating results would be adversely affected.

Advances in technology can require retraining and additional certifications for existing personnel or hiring of more qualified personnel. The most significant portion of our investment in software development is related to labor. If our personnel are unable to keep up with changing technologies or we are unable to attract, hire, and retain personnel having the qualifications needed to engineer, manage and implement technological advances, our competitive position may erode, with an adverse effect on our revenues and profitability.

If the security of our software is breached, we could suffer significant costs and damage to our reputation.

Fundamental to the use of our products is the secure collection, storage and transmission of confidential information. Third parties may attempt to breach our security or that of our customers and their databases. We may be liable to our customers for any breach in such security, and any breach could harm our customers, our business and our reputation. Any imposition of liability, particularly liability that is not covered by insurance or is in excess of insurance coverage, could harm our reputation, our business and our operating results. Also, computers, including those that utilize our software, are vulnerable to computer viruses, physical or electronic break-ins and similar disruptions. Such disruptions could lead to interruptions, delays or loss, of data and we may be required to expend significant capital and other resources to protect further against security breaches or to rectify problems caused by any security breach.

Future acquisitions could prove difficult to integrate, disrupt our business, dilute stockholder value and strain our resources.

Pursuant to our strategic plan, we intend to acquire companies, products, services and/or technologies that we feel could complement or expand our existing business operations, augment our market coverage, enhance our technical capabilities, provide us with important customer contacts

or otherwise offer growth opportunities. Acquisitions and investments involve numerous risks, including:

improper valuation of the acquired business;

difficulties in integrating operations, corporate cultures, technologies, services, accounting and personnel;

difficulties in supporting and transitioning customers of acquired companies;

diversion of financial and management resources from existing operations;

Table of Contents

risks of entering new sectors of the educational and governmental market;

potential loss of key employees; and

inability to generate sufficient revenue to offset acquisition or investment costs.

Acquisitions also frequently result in recording of goodwill and other intangible assets, which are subject to potential impairments in the future that could harm our operating results. In addition, if we finance acquisitions by issuing equity securities or securities convertible into equity securities, our existing stockholders could be diluted, which, in turn, could affect the market price of our stock. Moreover, we might finance an acquisition with debt, resulting in higher leverage and interest costs. As a result, if we fail to evaluate and execute acquisitions or investments properly, we might not achieve the anticipated benefits of any such acquisition, and we may incur costs in excess of what we anticipate.

There can be no assurance suitable acquisition candidates will be available, that we will be able to purchase or profitably manage acquired companies, that future acquisitions will further the successful implementation of our overall strategy or that acquisitions ultimately will produce returns that justify the investment. In addition, we may compete for acquisition and expansion opportunities with companies that have significantly greater resources than we do.

Following our merger in February 2005, we have pursued and entered into preliminary discussions with various acquisition candidates. However, we have not entered into agreements or understandings for any acquisition which management deems material.

We currently do not have any pending or issued patents, but we rely upon trademark, copyright and trade secret laws to protect our proprietary intellectual property rights, which might not provide us with adequate protection. The loss or compromising of our rights in our intellectual property could adversely affect our competitive position and raise our costs.

Our success and ability to compete depend to a significant degree upon the protection of our software and other proprietary technology rights. We might not be successful in protecting our proprietary technology, and our proprietary rights might not provide us with a meaningful competitive advantage. To protect our proprietary technology, we rely on a combination of trademark, copyright and trade secret laws, as well as nondisclosure agreements. Each of these affords only limited protection. Moreover, we have no patent protection for Accounting+Plus software, which is one of our core products. Any inability to protect our intellectual property rights could seriously harm our competitive position, operating results and financial condition.

In addition, the laws of some foreign countries do not protect our proprietary rights in our products to the same extent as do the laws of the United States. Despite the measures taken by us, it may be possible for a third party to copy or otherwise obtain and use our proprietary technology and information without authorization. Policing unauthorized use of our products is difficult, and litigation could become necessary in the future to enforce our intellectual property rights. Any litigation could be time consuming and expensive to prosecute or resolve, result in substantial diversion of management attention and resources, and materially harm our business, financial condition and results of operations.

Claims that we infringe upon third parties' intellectual property rights could be costly to defend or settle.

Edgar Filing: COMPUTER SOFTWARE INNOVATIONS INC - Form SB-2

Litigation regarding intellectual property rights is not unusual in the software industry. We expect that software products and services may be increasingly subject to third-party infringement claims as the number of competitors in our industry segment grows and the functionality of products in different industry segments overlaps. We may from time to time encounter disputes over rights and obligations concerning intellectual property. Although we believe that our intellectual property rights are sufficient to allow us to market our software without incurring liability to third parties, third parties may nevertheless bring claims of infringement against us. Such claims may be with or without merit. Any litigation to defend against claims of infringement or invalidity could result in substantial costs and diversion of resources. Furthermore, a party making such a claim could secure a judgment that requires us to pay substantial damages. A judgment could also include an injunction or other court order that could prevent us from selling or servicing our software. Our business, results of operations and financial condition could be harmed if any of these events occurred.

In addition, we have agreed, and will likely agree in the future, to indemnify certain of our customers against certain claims that our software infringes upon the intellectual property rights of others. We could incur substantial costs in

Table of Contents

defending ourselves and our customers against infringement claims. In the event of a claim of infringement, we and our customers might be required to obtain one or more licenses from third parties. We, or our customers, might be unable to obtain necessary licenses from third parties at a reasonable cost, if at all. Defense of any lawsuit or failure to obtain any such required licenses could harm our business, operating results and financial condition.

Increasing government regulation of electronic commerce could reduce our revenues and increase our costs.

We are subject not only to regulations applicable to businesses generally but also to laws and regulations directly applicable to electronic commerce. We deliver marketing, shareholder and customer information, product demonstrations, new software and software updates, technical support and training over the internet. We also sell services whereby a customer may access and use our software to load and manage their organization's data over the internet. Although there are currently relatively few laws and regulations governing electronic commerce, state, federal and foreign governments may adopt laws and regulations applicable to our business. Any such legislation or regulation could increase our operating costs as we are forced to comply, or increase the operating costs to our customers. In any such event, customers may decide not to use our products and services. Any new laws or regulations in the following areas could cause us to incur new compliance expenses, or otherwise adversely affect our business:

user security and privacy;

the pricing and taxation of internet use or goods and services offered or provided via the internet;

the online distribution of specific material, content or services over the internet; and

the content of websites or other internet marketing abilities (e.g., do not call (do not contact) registry requirements).

A significant portion of our revenues stem from sales to schools receiving funding through the E-Rate Program. A loss of such funding could have a material adverse impact on our revenues and financial condition.

We participate in the E-Rate Program, a government program providing funding for telecommunications, internet access and internal connections for schools that have a very high free and reduced lunch rate count. Schools and school districts that have developed an approved technology plan may receive funds to implement the plan. Service providers may sell to such schools and districts through an open and competitive bidding process. We have received funding through the E-Rate program since 2001, routinely representing approximately 10% of our total revenues. The Schools and Libraries Division of the Universal Service Administrative Company, which administers the program, may conduct audits with respect to previous funding years. If the Schools and Libraries Division were to find that either we or the school to which we have made sales did not comply with the rules and regulations of the program, previous funding may have to be repaid and we could be barred from future bidding under the program. To date, we have not had to repay any money received in connection with the program, nor have we been cited for any material violation of program guidelines.

We received a subpoena from the United States Department of Justice on April 27, 2005, requesting our production of documents relating to the E-Rate Program. It is our understanding that similar inquiries have been directed to numerous other companies associated with the program. No allegations concerning impropriety by the Company have been made. However, the Antitrust Division's collection of information from the hundreds of subpoenas it has issued could result in further inquiry and possible antitrust and/or related allegations. Although we do not believe

that the investigation will impact our participation in the E-Rate Program, we can give no such assurances.

The requirements of being a public company might strain our resources and distract management.

As a public company, we are subject to a number of additional requirements, including the reporting requirements of the Securities Exchange Act of 1934, as amended, and the Sarbanes-Oxley Act of 2002. These requirements may place a strain on our systems and resources. The Securities Exchange Act requires, among other things, that we file annual, quarterly and current reports with respect to our business and financial condition. The Sarbanes-Oxley Act requires, among other things, that we maintain effective disclosure controls and procedures and internal controls for financial reporting. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal controls over financial reporting, significant resources and management oversight will be required. As a result, our management's attention might be

Table of Contents

diverted from other business concerns, which could have a material adverse effect on our business, financial condition, results of operations and cash flows. Also, we believe the requirements of being a public company may continue to increase our administrative costs. In particular, our efforts to comply with Section 404 of the Sarbanes-Oxley Act beginning with our fiscal 2007 Annual Report on Form 10-KSB, and the related regulations regarding our required assessment of our internal controls over financial reporting and our independent registered public accounting firm's audit of that assessment will require the commitment of significant financial and managerial resources. In addition, we might need to hire additional accounting and financial staff with appropriate public company experience and technical accounting knowledge. Our inability to do so in a timely fashion might adversely impact our compliance with Section 404. Any failure to comply with Section 404 as required may harm our financial position, reduce investor confidence, cause a decline in the market price for our common stock and subject us to costly litigation.

Failure to comply with certain standards has resulted in a conclusion that there was a significant deficiency in our internal controls as of March 31, June 30, and September 30, 2005.

In March 2005, the Public Company Accounting Oversight Board, or PCAOB, defined a significant deficiency as a deficiency that results in more than a remote likelihood that a misstatement of the financial statements that is more than inconsequential will not be prevented or detected, or that a company will be unable to comply with laws and regulations, which includes the timely filing of required reports with the Securities and Exchange Commission. As a result of this new standard, our management noted in our September 30, 2005 review a significant deficiency. Prior to February 11, 2005, we were a public shell with virtually no operations and had limited need for staff with highly technical accounting and public reporting expertise. In addition, CSI South Carolina was a private company and likewise had no need for staff with technical accounting and public reporting expertise. In the first quarter of 2005, we entered into a complex merger and resumed public reporting of significant operations. Due to the time required to source, attract, negotiate and hire personnel with the necessary experience, we remained for several months without sufficient public reporting or technical expertise to resolve non-routine or complex accounting matters and public reporting requirements such as we encountered in the merger with CSI South Carolina, Inc. It was not until May 6, 2005 that we hired a chief financial officer with prior public reporting experience who is accustomed to dealing with more complex accounting matters. As a result, we were unable to file our first and second quarterly reports on Form 10-QSB for 2005 by their initial due dates and were forced to utilize filing extensions, which we complied with. Also on August 22, 2005, we amended our first quarter Form 10-QSB to restate our financial statements for the period ended March 31, 2005. In addition, in our Form 10-QSB for the period ended September 30, 2005, we disclosed that as a result of certain reclassifications in the previously issued financial statements contained in our Annual Report on Form 10-KSB for the year ended December 31, 2004 and our Quarterly Reports on Form 10-QSB for the quarters ended June 30, 2005 and March 31, 2005 should not be relied upon and that we would restate these financial statements to make the necessary accounting corrections. Primarily, certain items recorded in selling, general and administrative costs, including certain salaries and expenses and the amortization of capitalized software development cost, should have been recorded as components of cost of sales. These adjustments do not affect net income or cash flows. As a result, we intend to amend our Annual Report on Form 10-KSB for the year ended December 31, 2004 and our Quarterly Reports on Form 10-QSB for the periods ended June 30, 2005 and March 31, 2005 to restate our financial statements to correct the errors in the period in which they originated.

We are working with the new chief financial officer to enlist the resources necessary to assist in the handling of complex non-routine accounting issues and to meet public disclosure requirements in a timely fashion. Following consultation with the Company's Audit Committee and board of directors, the chief financial officer has received authority to engage outside accounting experts to support management in their review, interpretation, and implementation of significant changes in accounting and regulatory reporting requirements. The purpose is to provide outsourced augmentation of our internal resources on an as needed basis which management believes will be more cost effective than the direct hiring of full-time experts. Due to the Company's small size relative to other public companies served, and the limited availability of experienced resources in our business community, we have not yet engaged outside technical support. Accordingly, while we continue to pursue outside options, our chief financial officer is training existing personnel. We may augment our internal staff with more experienced personnel. If we are unsuccessful in securing outside technical support, the training and recruiting process may extend into 2006.

Table of Contents

We may discover and report additional weaknesses in our internal controls. Reporting deficiencies could harm our financial position, reduce investor confidence, cause a decline in the market price for our common stock and subject us to costly litigation.

Effective internal controls are necessary for us to provide reliable financial reports and effectively prevent fraud. If we cannot provide reliable financial reports or prevent fraud, our results of operations could be misstated and our reputation may be harmed. Historically, we may not have maintained a system of internal controls that was adequate for a public company, and in preparing the financial statements included in this prospectus we placed only limited reliance on our historical internal control structure. This limited reliance is not sufficient to meet the standards under Section 404 of the Sarbanes-Oxley Act, with which we must comply beginning with our fiscal 2007 Annual Report on Form 10-KSB. We have undertaken the task of documenting our controls in preparation for the additional review, evaluation and testing requirements under Section 404 under the direction of our chief financial officer, who has prior experience in this area. In this process we may identify and be required to report deficiencies in our internal controls, and we cannot assure you that the measures we have taken to date or these measures will ensure that we will be able to implement and maintain adequate controls over our financial processes and reporting. Any deficiencies or failures in internal controls could harm the financial position of our business, reduce investor confidence, cause a decline in the market price for our common stock, and subject us to costly litigation.

Our management has limited experience in managing a public company, which could hamper our ability to function effectively as a public company.

Our management team has historically operated our business as a privately-owned corporation. Except for our chief financial officer, hired May 6, 2005, the individuals who now constitute our management have never had responsibility for managing a publicly-traded company. In particular, management is inexperienced in utilizing sophisticated forecasting or long term historical analysis of data that may be used for projecting future operating and financial results with a significant degree of consistency and accuracy. Due to the limited number of our personnel with experience with publicly-traded companies, any unexpected departure of our chief financial officer could result in our inability to comply fully with accounting pronouncements and public filing requirements on a timely basis. If we are unable to comply, our financial condition could be adversely affected.

In addition, although we are in the process of updating our systems and processes to public company standards, such systems and processes in many aspects still reflect those of a non-public corporation. As a result, we cannot assure you that we will be able to execute our business strategy as a public company. You should be especially cautious in drawing conclusions about the ability of our management team to provide guidance or other forward looking information regarding our operating or financial results with a reasonable degree of consistency and accuracy.

The development and enhancement of our software requires significant capital expenditures that we may not be able to make if we were to experience significant revenue reductions. Our failure or delay in developing and enhancing our software could seriously erode our competitive position.

Software technology is characterized by rapid technological change and evolving industry standards that require continuous development and enhancements to our software applications. Significant resources, primarily in the form of salaries and benefits, are required to keep up with these changes. We are in the process of rewriting our software applications to take advantage of current technologies. If we were to experience significant revenue reductions, our ability to implement these changes could be delayed or eliminated, eroding our competitive position and adversely affecting our revenues and financial condition.

Our ability to raise capital in the future may be limited and our failure to raise capital when needed could prevent us from executing our growth strategy.

The timing and amount of our working capital and capital expenditure requirements may vary significantly depending on many factors, including:

market acceptance of our products and services;

the need to adapt to changing technologies and technical requirements;

Table of Contents

the existence of opportunities for expansion; and

access to and availability of sufficient management, technical, marketing and financial personnel.

If our capital resources are not sufficient to satisfy our liquidity needs, we may seek to sell additional equity or obtain other financing. We have not made arrangements to obtain additional financing. We may not be able to obtain additional financing, if required, in amounts or on terms acceptable to us, or at all.

We may not be able to repay both our bank credit facility which matures in March, 2006 and our subordinated notes which mature in May, 2006. Any failure to repay the credit facility or the notes, or in the alternative to secure a renewal or refinancing of the credit facility, would have a material adverse effect on our liquidity position and our ability to fund operations.

Our bank credit facility matures on March 17, 2006. Management believes that cash flow from operations may not be sufficient to repay both our \$3.0 million bank credit facility in full on such date and the subordinated promissory notes payable to shareholders in an aggregate amount of \$2.3 million which are due May 10, 2006. Management anticipates renewing the bank credit facility prior to its expiration date. In the alternative, we would attempt to refinance the credit facility with another lender. Although management currently believes that its existing lender will agree to a renewal of the facility, there can be no assurance that our bank will in fact agree to a renewal or that replacement financing could be procured by us on favorable terms. Without the existing credit facility or a replacement, management also believes that our ability to fund working capital and support additional sales growth could be adversely affected. If we were unable to repay the subordinated notes, there can be no assurance as to what adverse collection actions the subordinated noteholders might take, whether the noteholders would agree to an extension and on what terms, and the impact such a default might otherwise have on our other creditors and our financial condition.

Under certain circumstances, holders of warrants to purchase shares of our common stock may be able to exercise those warrants pursuant to a cashless exercise. A cashless exercise may adversely impact our business strategy.

The terms of the warrants held by Barron permit the cashless exercise of the warrants under certain circumstances. A cashless exercise would not result in capital inflow to the Company, which may hinder the implementation of our business strategy, one element of which is to expand through acquisition.

We depend on key management and may not be able to retain those executives or recruit additional qualified personnel.

We believe that our future success will be due, in part, to the continued services of our senior management team. This team historically has been and we anticipate for the foreseeable future will continue to be relatively small. Our company was built by the five former shareholders of CSI South Carolina who were largely responsible for our growth over the past 15 years. All of these founders of the Company now serve as our executive officers, with the exception of our former CFO, Joe G. Black, now retired. Each of the remaining four CSI South Carolina founders have garnered significant technical expertise in both our products and the requirements of our client base. They have also developed relationships with our clients that we believe are valuable. The four CSI South Carolina founders continue to manage specific areas of the business: sales, engineering, technical support and product development. They have been responsible for the technical development of our products and solutions and the creation of our business strategy. Because we are now a public company, we must also retain a chief financial officer with requisite technical expertise to handle the requirements of public company reporting and compliance. Our ability to implement our business plan is dependent on the retention of these executives who have specific, differentiated skills. Losing the services of one or more members of our management team could adversely affect our business and expansion plans.

Our certificate of incorporation limits the liability of our directors, which may bar stockholder actions and recovery against the directors for misconduct.

We have adopted provisions in our Amended and Restated Certificate of Incorporation that eliminate to the fullest extent permissible under Delaware law the liability of our directors for monetary damages for breach of fiduciary of duty as a director. While it may limit stockholder actions against the directors of the Company for various acts of malfeasance, the provision is designed to ensure the ability of our directors to exercise their best business judgment in managing the Company's affairs, subject to their continuing fiduciary duties of loyalty to the Company and its stockholders. Absent such a limitation, their judgment could be unreasonably impeded by exposure to potentially high personal costs or other uncertainties of litigation.

Table of Contents

Our certificate of incorporation and bylaws provide for the indemnification of management, which in certain circumstances could serve to circumvent the recovery by stockholders in legal actions.

Our Amended and Restated Certificate of Incorporation and Amended and Restated Bylaws, to the fullest extent permitted by Delaware law, provide, generally, that the Company will indemnify, including the advancement of expenses, any director, officer, employee or agent of the Company who is, or is threatened to be made, a party to any action, suit or proceeding by reason of the fact he was acting as a director, officer, employee or agent of the Company. Any advancement of expenses is subject to the indemnified person undertaking to repay any advanced expenses later deemed to be improper. Such indemnification would cover the cost of attorneys' fees as well as any judgment, fine or amount paid in settlement of such action provided that the indemnified party meets certain standards of conduct necessary for indemnification under applicable law and the provisions of the Amended and Restated Bylaws. Such indemnity may or may not be covered by officer and director liability insurance and could result in expense to the Company even if such person is not successful in the action. This provision is designed to protect such persons against the costs of litigation that may result from his or her actions on our behalf.

We are currently involved in legal proceedings which, if resolved against us, could have a negative impact on our financial position.

We are currently involved in a lawsuit with Integrated Tek Solutions, Inc. The suit arises out of a letter of intent between us and Yasup, LLC, a predecessor to Integrated Tek Solutions. The letter of intent related to a potential acquisition of CSI South Carolina's capital stock by Yasup, LLC. Besides the Company, several of our officers and directors are named individually in the suit, along with several other defendants. Integrated Tek Solutions seeks damages in the \$30 million to \$45 million range. We believe that the lawsuit is without merit. However, if Integrated Tek Solutions were to prevail in the matter, the payment of any damages to which we may be subject would have an adverse impact on our financial position.

Risk Factors Relating to Our Common Stock

Our quarterly financial results fluctuate and may be difficult to forecast. If our future results are below either any guidance we may issue or the expectations of public market analysts and investors, the price of our common stock may decline.

Our quarterly revenue and results of operations are difficult to forecast. We have experienced, and expect to continue to experience, fluctuations in revenue and operating results from quarter to quarter. As a result, we believe that quarter-to-quarter comparisons of our revenue and operating results are not necessarily meaningful and that such comparisons might not be accurate indicators of future performance. The reasons for these fluctuations include but are not limited to:

the size and timing of sales of our software, including the relatively long sales cycles associated with many of our large software sales;

budget and spending decisions by our customers;

market acceptance of new products we release;

the amount and timing of operating costs related to the expansion of our business, operations and infrastructure;

changes in our pricing policies or our competitors' pricing policies;

seasonality in our revenue;

general economic conditions; and

costs related to acquisitions of technologies or businesses.

Table of Contents

Certain of our costs and expenses are based on our expectations of future revenue and are, to a large extent, fixed in the short term. These include: our software development costs, certain other overhead costs in costs of sales and the majority of our general and administrative expenses. If revenue falls below our expectations in a quarter and we are not able to quickly reduce our expenses in response, our operating results for that quarter could be adversely affected. It is possible that in some future quarter our operating results may be below either any guidance we may issue or the expectations of public market analysts and investors and, as a result, the price of our common stock may fall.

Our common stock is currently a penny stock, and the market for it is limited. Accordingly, we cannot assure that an adequate market will develop for our common stock or what the market price of our common stock will be.

Our common stock is currently traded in the over-the-counter market and is quoted on the OTC Bulletin Board. As of the date of this prospectus, only approximately 104,882 shares were available for trading in the over-the-counter market. As a result, the liquidity of our common stock is limited, not only in the number of shares that are bought and sold, but also through delays in the timing of transactions and the lack of coverage by security analysts and the news media of our company.

In addition, because our stock is quoted on the OTC Bulletin Board, our common stock is subject to certain rules and regulations relating to a penny stock. A penny stock is generally defined as any equity security that has a price of less than \$5.00 per share and that is not listed or approved for listing on a national securities exchange or an automated quotation system sponsored by a registered national securities exchange. Being a penny stock generally means that any broker who wants to trade in our shares (other than with established customers and certain institutional investors) must comply with certain sales practice requirements, including delivery to the prospective purchaser of the penny stock a disclosure statement describing the penny stock market and associated risks. In addition, broker/dealers must take certain steps prior to selling a penny stock, which steps include:

obtaining financial and investment information from the investor;

obtaining a written suitability questionnaire and purchase agreement signed by the investor; and

providing the investor a written identification of the shares being offering and the quantity of the shares.

If these penny stock rules are not followed by the broker/dealer, the investor has no obligation to purchase the shares. The application of these comprehensive rules will make it more difficult for broker/dealers to sell our common stock, and as a practical matter, these requirements may mean that brokers will be less likely to make recommendations on our shares to their general customers. As a result, for as long as our common stock is quoted on the OTC Bulletin Board and subject to the penny stock rules, our stockholders may have difficulty selling their shares in the secondary trading market. In addition, prices per share of our common stock may be lower than might otherwise prevail if our common stock were quoted on the Nasdaq Stock Market or traded on a national securities exchange, such as the New York Stock Exchange or the American Stock Exchange. This lack of liquidity may also make it more difficult to raise capital in the future through the sale of equity securities.

The price of our common stock might be volatile.

Our stock price has been and may continue to be volatile, making an investment in our company risky. In the first quarter of 2005, the high quote was \$7.00 and the low was \$0.02. In the second quarter of 2005, the high quote was \$4.01 and the low was \$1.25. In the third quarter of

Edgar Filing: COMPUTER SOFTWARE INNOVATIONS INC - Form SB-2

2005, the high quote was \$2.25 and the low was \$1.25.

In recent years, technology stocks have experienced high levels of volatility and significant declines in value from their historic highs. The trading price of our common stock may fluctuate substantially. The price of the common stock that will prevail in the market might be higher or lower than the price you pay, depending on many factors, some of which are beyond our control and may not be related to our operating performance. The fluctuations could cause you to lose part or all of your investment in our shares of common stock. Those factors that could cause fluctuations in the trading price of our common stock include the following:

price and volume fluctuations in the overall stock market from time to time;

Table of Contents

significant volatility in the market price and trading volume of software and technology companies;

actual or anticipated changes in our earnings or fluctuations in our operating results or in the expectations of securities analysts;

economic conditions and trends in general and in the software and information technology industries;

major catastrophic events, including terrorist activities, which could reduce or divert funding from, and technology spending by, our core customer base of municipal governments and educational institutions;

changes in our pricing policies or the pricing policies of our customers;

changes in the estimation of the future size and growth of our market; or

departures of key personnel.

In the past, following periods of volatility in the market price of a company's securities, securities class action litigation has often been brought against that company. Due to the potential volatility of our stock price, we might be the target of securities litigation in the future. Securities litigation could result in substantial costs and divert management's attention and resources from our business.

The sale of common stock under the registration statement could encourage short sales by third parties.

If a significant number of shares are sold pursuant to the registration statement, the effect may be downward price pressure on shares of our common stock. Falling share prices may encourage short sales of our common stock, which may exacerbate the downward price pressure.

Holders of the Series A Convertible Preferred Stock have certain rights which are superior to those of the common stockholders. These rights may adversely affect the liquidity and value of your investment.

The superior rights of the preferred stock include:

If we are liquidated, our preferred stockholders have priority on the distribution of assets up to their original investment value of \$0.6986 per share. If any assets remain after the preferred stockholders receive their entitlement, then the remaining assets will be distributed on a pro rata basis to the common stockholders.

In the event of a change in control of our company or the occurrence of certain other transactions including, but not limited to, a tender offer, exchange offer or compulsory share exchange, holders of Series A Convertible Preferred Stock are entitled to treat such a transaction as a liquidation and recover their original investment in our company.

Edgar Filing: COMPUTER SOFTWARE INNOVATIONS INC - Form SB-2

While the preferred stock is outstanding, we are not permitted to pay dividends on our common stock. This restriction means we are unlikely to pay dividends to our common stockholders in the foreseeable future.

In the future, if we were to offer shares of common stock to the public for cash, the holder of Series A Convertible Preferred Stock and the five former shareholders of CSI South Carolina would have the right to participate pro rata in such an offering at 80% of the offering price. We do not currently contemplate such an offering.

The Certificate of Designation of Preferences, Rights and Limitations of Series A Convertible Preferred Stock permits the preferred stockholders to demand the return of their original investment under certain circumstances, which could hinder a stock transfer or business combination transaction beneficial to stockholders.

The preferred stockholders have the ability to elect to treat a change in control and certain other fundamental transactions as a liquidation and to be repaid their original investment under these circumstances. These transactions include a tender offer, an exchange offer, or a compulsory share exchange. The ability of the preferred stockholders to elect liquidation treatment could hinder or even prevent an acquisition transaction that might be beneficial to our common stockholders.

Table of Contents

The raising of additional capital in the future may dilute your ownership in our company.

We may need to raise additional funds through public or private debt or equity financings in order to:

take advantage of opportunities, including more rapid expansion;

acquire complementary businesses or technologies;

develop new services and products; or

respond to competitive pressures.

Any additional capital raised through the sale of equity may dilute your ownership percentage in our company.

We could issue additional shares of common stock, which might dilute the book value of our common stock.

We have a total of 40,000,000 authorized shares of common stock, of which 2,631,786 shares were issued and outstanding as of November 10, 2005. Our board of directors has the authority, without action or vote of our stockholders in most cases, to issue all or a part of any authorized but unissued shares of our common stock. Such stock issuances may be made at a price that reflects a discount from the then-current trading price of our common stock. Of our 40,000,000 authorized shares, we have reserved for issuance 15,518,208 shares of common stock relating to outstanding warrants, options and convertible preferred stock. An additional 1,100,000 shares of our common stock are reserved for issuance under our 2005 Incentive Compensation Plan. Also, we anticipate that we may issue common stock in acquisitions we anticipate making pursuant to our business strategy. Any issuances relating to the foregoing would dilute your percentage ownership interests, which would have the effect of reducing your influence on matters on which our stockholders vote. They might also dilute the tangible book value per share of our common stock. In addition, the Series A Convertible Preferred stockholder and the five former shareholders of CSI South Carolina have the right, so long as any of the Series A Convertible Preferred stock is still outstanding, to participate in any funding by the Company (including a sale of common stock) on a pro rata basis at 80% of the offering price, which right if exercised might dilute our net tangible book value per share. Further, Barron has the right under certain circumstances to effect a cashless exercise of the warrants, which would dilute the tangible book value per share of our common stock.

Because we intend to retain any earnings to finance the development of our business, we may never pay cash dividends. Furthermore, the terms of both the Series A Convertible Preferred Stock and our bank loan documents currently prohibit the payment of cash dividends.

We have not paid cash dividends, except for the one-time cash dividend paid by CSI South Carolina, our predecessor, prior to the February 2005 merger and sale of preferred stock. Our bank loan documents now prohibit the payment of cash dividends, as do the terms of our Series A Convertible Preferred Stock. Regardless of these restrictions, we do not anticipate paying cash dividends on our common stock in the foreseeable future, but instead intend to retain any earnings to finance the development of our business.

Availability of significant amounts of common stock for sale in the future, or the perception that such sales could occur, could cause the market price of our common stock to drop.

There is a substantial number of shares of our common stock that may be issued and subsequently sold upon the exercise of the two common stock warrants and the conversion of Series A Convertible Preferred Stock held by Barron. The number of such shares totals 15,518,208 (including 1,082,736 shares issuable upon the conversion of preferred stock potentially issuable as liquidated damages under the Registration Rights Agreement). In addition, officers and other affiliates of our company hold 2,526,904 shares of common stock, which have not been registered under the Securities Act of 1933, as amended, and are accordingly subject to the resale restrictions under such Act and Rule 144 thereunder. Under the Preferred Stock Purchase Agreement with Barron, shares held by insiders of the Company may not be sold until February 10, 2007. There are also outstanding options to purchase approximately 268,343 shares of our common stock. Additionally, we may

Table of Contents

issue up to 1,100,000 shares of common stock pursuant to our 2005 Computer Software Innovations, Inc. Incentive Compensation Plan. It is anticipated that outside directors of the Company and a consultant will be awarded approximately 506,224 shares of restricted stock under the plan as compensation for their services. The sale of any or all of these shares could have an adverse impact on the price of our common stock, as could the sale or issuance of additional shares of common stock in the future in connection with acquisitions or otherwise.

The number of shares being offered pursuant to this registration is relatively large compared to the number of shares held by our management and our non-affiliated public shareholders. If one or more investors purchased a large number of shares in or subsequent to this offering, they may be able to effect a change of control of the Company.

As of November 10, 2005, our management held 2,021,524 shares of our outstanding common stock, representing approximately 76% of the total number of shares outstanding. Pursuant to this prospectus, Barron may sell up to 15,518,208 shares of common stock. Barron is prohibited from beneficially owning greater than 4.9% of our shares (except under limited circumstances involving significant acquisition transactions). However, an investor could acquire a significant number of shares in or subsequent to this offering and effect a change in control of us, including replacing our current management. Such an event might generate uncertainty and a loss of investor confidence.

Insiders currently hold a significant percentage of our stock and could limit your ability to influence the outcome of key transactions, including a change of control, which could adversely affect the market price of our stock.

As of the date of this prospectus, approximately 96% or 2,526,904 shares of our common stock are held by the former CSI South Carolina shareholders, four of whom are currently executive officers. Non-executive officers of the Company also hold options to purchase approximately 268,343 shares. Further, it is anticipated that our three independent directors and a consultant may be awarded up to an estimated 506,224 shares of restricted stock under our 2005 Incentive Compensation Plan, which plan provides for the award of a total of 1,100,000 shares to employees, directors and consultants. All of these facts have the potential of solidifying control of the Company with insiders, and would likely limit the ability of any minority stockholders to influence the outcome of key decisions, including elections of directors.

USE OF PROCEEDS

We will not receive any proceeds from the sale by the selling stockholder of the common stock offered by this prospectus. We will, however, receive proceeds of the sale of common stock pursuant to the exercise of the warrants by Barron, absent a cashless exercise of the warrants. Any proceeds we receive from the exercise of the warrants will be used to finance acquisitions and for general working capital purposes.

THE SELLING STOCKHOLDER

Barron Partners LP

The selling stockholder is Barron Partners LP. We believe that Barron is or at the time of sale will be the sole record and beneficial owner of the shares of common stock it will be offering. The common stock to be offered by Barron will be acquired upon conversion of the shares of our

Edgar Filing: COMPUTER SOFTWARE INNOVATIONS INC - Form SB-2

Series A Convertible Preferred Stock or the exercise of the warrants. In connection with the issuance of the Series A Convertible Preferred Stock and the warrants, Barron was granted registration rights under a Registration Rights Agreement covering the shares of our common stock underlying the preferred stock and warrants.

Barron is a private investment partnership that specializes in investing in micro-cap public companies. It is not a registered broker-dealer nor is it affiliated with a broker-dealer. Its investment in the Company is solely for investment purposes for its own account.

Barron's address is 730 Fifth Avenue, 9th Floor, New York, NY 20019. The general partner of Barron is Barron Capital Advisors, LLC. Andrew Barron Worden serves as the Managing Member of Barron Capital Advisors, LLC. In such capacity, he possesses voting and dispositive control over Barron Partners LP.

Table of Contents**Share Ownership**

Barron currently owns 7,217,736 shares of our Series A Convertible Preferred Stock, which represents 100% of our issued and outstanding shares of preferred stock. The preferred stock was purchased at a price of \$0.6986 per share. Barron also may receive up to 1,082,736 shares of Series A Convertible Preferred Stock if the liquidated damages provisions of the Registration Rights Agreement between Barron and us are triggered. The preferred stock owned by Barron is convertible into common stock on a one for one basis. Additionally, Barron holds warrants to purchase 7,217,736 shares of our common stock. Half of the warrant shares are exercisable at a price of \$1.3972 and the other half at a price of \$2.0958 per share. Pursuant to the terms of the warrants and the Certificate of Designation governing the preferred stock, Barron is restricted from converting the preferred stock or the warrants if such conversion would result in Barron beneficially owning more than 4.9% of our outstanding common stock.

The table below sets forth the number and percentage of shares of common stock beneficially owned by Barron before and after completion of the offering pursuant to this prospectus.

| Selling Stockholder | Shares Beneficially | Percentage of | Maximum | Percentage of |
|------------------------|-------------------------|--------------------------------|---------------------------|-------------------------------|
| | Owned Before | Outstanding | Number of | Outstanding |
| | Offering ⁽¹⁾ | Shares | Shares to be Sold | Shares |
| | | Beneficially | in the Offering | Beneficially |
| | | Owned | | Owned |
| | | Before Offering ⁽¹⁾ | | After Offering ⁽¹⁾ |
| Barron Partners LP | 135,601 ⁽²⁾ | 4.9% ⁽²⁾ | 15,518,208 ⁽³⁾ | - 0 - |

- (1) Beneficial ownership has been determined in accordance with the provisions of Rule 13d-3 under the Securities Exchange Act of 1934, as amended, under which, in general, a person is deemed to be a beneficial owner of a security if he has or shares the power to vote or direct the voting of the security or the power to dispose or direct the disposition of the security, or if he has the right to acquire beneficial ownership of the security within 60 days.
- (2) Based on 2,631,786 shares of common stock outstanding on November 10, 2005, and assumes the conversion of shares of preferred stock and/or the exercise of warrants to the maximum extent permitted by the Certificate of Designation and the warrants.
- (3) Assumes that all shares of the preferred stock will be converted, and the warrants will be exercised in full. It also assumes that the maximum number of shares of preferred stock (1,082,736) are issued as liquidated damages under the Registration Rights Agreement with Barron.

Relationship With the Company and Affiliates

During the negotiations of the final merger agreement, management asked Barron for help in identifying possible independent directors. Barron introduced to management Anthony H. Sobel, Shaya Phillips and Thomas V. Butta. The Company conducted research and interviewed candidates, and ultimately elected Messrs. Sobel, Phillips and Butta to the board with CSI - South Carolina acting by written consent as majority shareholder.

Mr. Sobel is a co-investor in Montana Metal Products with Robert F. Steel, a consultant to us who is also an investor in Barron. Mr. Butta is President and Vice Chairman of the board of directors of a21, Inc., a concern in which Barron has invested. Mr. Phillips was previously employed as Chief Operating Officer and Chief Technology Officer of Global Broadband, Inc. a concern in which Barron years earlier held an

Edgar Filing: COMPUTER SOFTWARE INNOVATIONS INC - Form SB-2

investment. Mr. Phillips has consulted on a limited basis for Barron with respect to technology investments. Otherwise, Messrs. Sobel, Butta and Phillips had no business or family relationships with Barron or its affiliates. In connection with the merger agreement between VerticalBuyer and CSI South Carolina, Ms. Hedrick and Thomas P. Clinton, a former shareholder of CSI South Carolina, were appointed to the board of directors.

Except as disclosed above, neither Barron nor any of its affiliates has held any position or office with, has been employed by, or otherwise has had a material relationship with us during the three years prior to the date of this prospectus.

Table of Contents

PLAN OF DISTRIBUTION

This prospectus covers up to 15,518,208 shares of our common stock issuable to the selling stockholder upon (i) conversion of the 7,217,736 shares of Series A Convertible Preferred Stock, (ii) the exercise of warrants for the purchase of 7,217,736 shares, and (iii) conversion of up to 1,082,736 additional shares of Series A Convertible Preferred Stock issuable as liquidated damages if we fail to comply with obligations to register the shares underlying the preferred stock and the warrants pursuant to the Registration Rights Agreement with the selling stockholder. We will not receive any of the proceeds of the sale of the common stock offered by this prospectus. However, we will receive the proceeds from the sale of common stock to Barron pursuant to the exercise of its warrants, absent a cashless exercise.

The common stock may be sold from time to time to purchasers:

directly by the selling stockholder; or

through broker-dealers or agents who may receive compensation in the form of discounts, concessions or commissions from the selling stockholder or the purchasers of the common stock.

The term *selling stockholder* includes donees, pledgees, transferees or other successors-in-interest selling shares received after the date of this prospectus from the selling stockholder as a gift, pledge, partnership distribution or other non-sale related transfer. The selling stockholder will act independently of us in making decisions with respect to the timing, manner and size of each sale.

The selling stockholder and any broker-dealers or agents who participate in the distribution of the common stock may be deemed to be *underwriters* within the meaning of the Securities Act. As a result, any profits on the sale of the common stock by the selling stockholder and any discounts, commissions or concessions received by any such broker-dealers or agents may be deemed to be underwriting discounts and commissions under the Securities Act. If the selling stockholder were deemed to be an underwriter, the selling stockholder may be subject to statutory liabilities including, but not limited to, those of Sections 11, 12 and 17 of the Securities Act and Rule 10b-5 under the Exchange Act.

Barron has no material relationship with us other than in its capacity as a holder of our preferred stock, warrants and certain subordinated debt, all acquired in the merger and other related transactions consummated in February 2005. Barron has no right to designate or nominate a member or members of our board of directors. At the request of CSI - South Carolina, Barron did make director introductions. This is discussed in more detail under *Description of Business C. History and Development of CSI - South Carolina Initial Development*.

Barron is under no obligation to convert its preferred stock or warrants into common stock of CSI. There is no arrangement in place whereby Barron may purchase additional shares in connection with this offering.

If the underlying common stock is sold through broker-dealers or agents, the selling stockholder will be responsible for broker-dealers' and agents' commissions.

The common stock may be sold in one or more transactions at:

fixed prices;

prevailing market prices at the time of sale;

prices related to the prevailing market prices;

varying prices determined at the time of sale; or

negotiated prices.

These sales may be effected in transactions:

Table of Contents

on any national securities exchange or quotation service on which the common stock may be listed or quoted at the time of the sale, including the OTC Bulletin Board;

in the over-the-counter market;

other than on such exchanges or services or in the over-the-counter market; or

through the writing of options, whether the options are listed on an options exchange or otherwise.

These transactions may include block transactions or crosses. Crosses are transactions in which the same broker acts as an agent on both sides of the transaction.

In connection with the sales of the common stock or otherwise, the selling stockholder may enter into hedging transactions with broker-dealers or other financial institutions. These broker-dealers may in turn engage in short sales of the common stock in the course of hedging their positions. The selling stockholder may also sell the common stock short and deliver the common stock to close out short positions, or loan or pledge the underlying common stock to broker-dealers that, in turn, may sell the common stock.

To our knowledge, there are currently no plans, arrangements or understandings between the selling stockholder and any underwriter, broker-dealer or agent regarding the sale of the common stock by the selling stockholder. The selling stockholder may decide not to sell all or a portion of the common stock offered by it pursuant to this prospectus. In addition, the selling stockholder may transfer, devise or give the common stock by other means not described in this prospectus. Any common stock covered by this prospectus that qualifies for sale pursuant to Rule 144 or Rule 144A under the Securities Act, or Regulation S under the Securities Act, may be sold under Rule 144 or Rule 144A or Regulation S rather than pursuant to this prospectus.

Under the securities laws of certain states, the shares of common stock may be sold in such states only through registered or licensed brokers or dealers. In addition, in certain states the shares of common stock may not be sold unless the shares have been registered or qualified for sale in such state or an exemption from registration or qualification is available and is properly met.

The aggregate proceeds to the selling stockholder from the sale of the common stock offered pursuant to this prospectus will be the purchase price of such common stock less discounts and commissions, if any. The selling stockholder reserves the right to accept and, together with its agents from time to time, reject, in whole or part, any proposed purchase of common stock to be made directly or through its agents.

Our common stock is traded in the over-the-counter market and is quoted on the OTC Bulletin Board under the symbol CSWI.OB.

The selling stockholder and any other persons participating in the distribution of the common stock will be subject to the Exchange Act and the rules and regulations thereunder. The Exchange Act rules include, without limitation, Regulation M, which may limit the timing of purchases and sales of the common stock by the selling stockholder and any such other person. In addition, Regulation M of the Exchange Act may restrict the ability of any person engaged in the distribution of the common stock to engage in market-making activities with respect to the common stock being distributed for a period of up to five business days prior to the commencement of such distribution. This may affect the marketability

Edgar Filing: COMPUTER SOFTWARE INNOVATIONS INC - Form SB-2

of the common stock and the ability to engage in market-making activities with respect to the common stock.

To the extent required, this prospectus may be amended or supplemented from time to time to describe a specific plan of distribution. Also, if required with respect to a particular offering of the common stock, the name of the selling stockholder, the number of shares being offered and the terms of the offering, including the purchase price and public offering prices, the names of any agent, dealer or underwriter, and any applicable commissions or discounts related to the particular offer will be set forth in an accompanying prospectus supplement or, if appropriate, a post-effective amendment to the registration statement of which this prospectus is a part.

Under the Registration Rights Agreement entered into with the selling stockholder, we are required to maintain the effectiveness of the registration statement until the earliest to occur of thirty-six (36) months after the date of the Registration

Table of Contents

Rights Agreement, or February 10, 2008, such time as all of the shares of common stock to be offered pursuant to the registration statement have been sold, or all securities covered by the registration statement become freely tradable without registration pursuant to Rule 144 under the Securities Act. We are permitted to prohibit offers and sales of securities pursuant to this prospectus under certain circumstances relating to pending corporate developments, public filings with the SEC and other material events for a period not to exceed forty-five (45) days in any 12-month period. The Company is also permitted to suspend the use of the effectiveness of the registration statement for up to ten (10) additional days each year. We also agreed to pay liquidated damages to the selling stockholder in the form of additional shares of preferred stock if the registration statement is not timely filed or made effective or if the prospectus is unavailable for periods in excess of those permitted.

Under the Registration Rights Agreement, as amended, we and the selling stockholder have each agreed to indemnify the other against certain liabilities, including certain liabilities under the Securities Act, or that the other will be entitled to contribution in connection with these liabilities. The selling stockholder may indemnify any broker-dealer that participates in transactions involving the sale of the shares against certain liabilities, including liabilities under the Securities Act.

Pursuant to the requirements of the Registration Rights Agreement, we are paying all registration expenses in connection with the registration statement of which this prospectus is a part, exclusive of all underwriting discounts and commissions and transfer taxes, if any, and documentary stamp taxes, if any, relating to the disposition of the selling stockholder's shares. All excluded expenses would be for the account of the selling stockholder. We estimate that the expenses of the offering to be borne by us will be approximately \$301,069. These consist of the following:

| | |
|---|------------|
| Securities and Exchange Commission Registration Fee | \$ 3,069* |
| Printing Expenses | 10,000 |
| Accounting Fees and Expenses | 30,000 |
| Legal Fees and Expenses | 225,000 |
| Blue Sky Fees and Expenses | 25,000 |
| Transfer Agent Fees | 3,000 |
| Miscellaneous Expenses | 5,000 |
| | <hr/> |
| Total | \$ 301,069 |
| | <hr/> |

* Represents actual expenses. All other expenses are estimates.

In addition, we have purchased and maintain insurance for our directors and officers in order to indemnify them against certain liabilities that they may incur as a director or officer of the Company, including liabilities that they may incur relating to the offering. The premiums that we pay in connection with such insurance total approximately \$53,000 per year.

DILUTION

Effect of Offering on Net Tangible Book Value Per Share

This offering is for sales of shares by the selling stockholder on a continuous or delayed basis in the future. Sales of common stock by the selling stockholder will not result in a change to the net tangible book value per share before or after the distribution of shares by the selling stockholder. There will be no change in the net book value per share attributable to cash payments made by the purchasers of the shares being

offered. Prospective investors should be aware, however, that the market price of our shares may not bear any relationship to net tangible book value per share.

Price Per Share Paid by Selling Stockholder and Former CSI South Carolina Shareholders

In the merger and related transactions, Barron invested in Series A Convertible Preferred Stock of the Company at a price of \$0.6986 per share. The preferred stock is initially convertible into common stock on a one for one basis. In the merger, we issued to the former shareholders of CSI South Carolina shares of common stock with a substantially identical effective price per share as the price paid by Barron for the preferred stock. Additionally, we issued the warrants to Barron, which will permit it to purchase an aggregate of 7,217,736 shares of our common stock. One of the warrants to purchase half of the aggregate shares has an exercise price of \$1.3972 per share and the second warrant is exercisable at \$2.0958 per share.

Table of Contents

The warrants may be exercised on a cashless basis after February 11, 2006 in the absence of an effective registration statement covering the shares underlying the warrants.

MARKET FOR STOCK

Our common stock is traded in the over the counter market and is quoted on the OTC Bulletin Board. The earliest quote available during the past two years was October 20, 2004. The high and low quotes for such date through October 4, 2005 are set forth in the chart below. The source of this information is the Finance page of www.yahoo.com. The quotations reflect inter-dealer prices, without retail mark-up, mark-down or commission, and may not represent actual transactions.

Range of Common Stock Prices (\$)

| | <u>High</u> | <u>Low</u> |
|--|---------------------|---------------------|
| 2004 | | |
| 4 th Quarter | | |
| (October 20, 2004 – December 31, 2004) | 3.20 ⁽¹⁾ | 0.80 ⁽¹⁾ |
| 2005 | | |
| 1 st Quarter | 7.00 | 0.80 ⁽¹⁾ |
| 2 nd Quarter | 4.01 | 1.25 |
| 3 rd Quarter | 2.25 | 1.25 |
| 4 th Quarter | | |
| (through November 11, 2005) | 2.25 | 1.31 |

⁽¹⁾ Quotes reflect prices of VerticalBuyer prior to the merger with CSI – South Carolina on February 11, 2005, adjusted for the 40 to 1 stock split effected on that date.

Source: <http://finance.yahoo.com>.

As of November 10, 2005 there were 2,631,786 shares of common stock outstanding and 118 stockholders of record, and 7,217,736 shares of Series A Convertible Preferred Stock outstanding with one preferred stockholder of record. See – Description of Securities.

DIVIDEND POLICY

We have paid no cash dividends during the past two fiscal years, except for the dividends payable by CSI – South Carolina in February 2005 relating to the reverse merger. For a discussion of the merger related dividends, see – Description of Business – E. The Merger and Recapitalization and – Management’s Discussion and Analysis of Financial Condition and Results of Operation – B. Reverse Merger and Investment by Barron Partners LP.

No dividends may be paid with respect to the Series A Convertible Preferred Stock and, pursuant to the Preferred Stock Purchase Agreement, no dividends may be paid on our common stock while any Series A Convertible Preferred Stock is outstanding. Also, our agreements with our bank lender prohibit any dividend which would, upon payment, result in a default under our financial covenants. Furthermore, even if these dividend restrictions were to be no longer effective, we have no plans to pay dividends in the foreseeable future. Instead, we intend to retain the earnings of our business for working capital and other investments in order to fund future growth.

DESCRIPTION OF BUSINESS

A. Introduction

Unless the context requires otherwise, (1) Computer Software Innovations, Inc., CSI, we, our, us and the Company refer to the combined business of Computer Software Innovations, Inc., a Delaware corporation formerly known as VerticalBuyer, Inc., and its subsidiary, CSI Technology Resources, Inc., a South Carolina corporation; (2) VerticalBuyer refers to the Company prior to the merger; and (3) CSI South Carolina refers to Computer Software Innovations, Inc., a South Carolina corporation, prior to the merger.

Table of Contents

We develop software and provide hardware-based technology solutions. Our internally developed software consists of fund accounting based financial management software and standards-based lesson planning software. Our primary software product, fund accounting based financial management software, is developed for those entities that track expenditures and investments by fund, or by source and purpose of the funding. Our fund accounting software is used primarily by public sector and not-for-profit entities. In September 2005, we acquired standards-based lesson planning software. The software is designed to allow teachers to create lesson plans that are tied to a state's curriculum standards. These lesson plans may be reviewed by administrators and a report generated to determine the standards that have been met or need to be met. We also provide a wide range of technology solutions, including hardware and design, engineering, installation, training and ongoing support and maintenance. Our solutions include computers, networking, security, IP telephony and distance learning and video communication.

Our operations are those of our predecessor, Computer Software Innovations, Inc., a South Carolina corporation organized in 1990. The history and development of CSI South Carolina is described in C. History and Development of CSI South Carolina. Our current business operations are described in B. Overview and elsewhere in this Description of Business.

Prior to February 10, 2005, the Company was known as VerticalBuyer, Inc. Prior to our merger with CSI South Carolina on February 11, 2005, we were a public shell corporation, having conducted no business operations since September 2001. A brief history of VerticalBuyer, Inc. is presented in S. VerticalBuyer, Inc.

In the first quarter of 2005, we concluded a series of recapitalization transactions. On January 31, 2005, a change in control of the Company occurred as a result of the purchase of a majority of our common stock by CSI South Carolina. On February 11, 2005, CSI South Carolina merged into us, and we issued preferred stock, common stock, warrants and certain subordinated notes. In connection with the merger, we changed our name to Computer Software Innovations, Inc. We refer to the Company prior to the merger as VerticalBuyer.

The merger of CSI South Carolina into us is accounted for as a reverse acquisition, with CSI South Carolina being designated for accounting purposes as the acquirer, and the surviving corporation, VerticalBuyer, Inc., being designated for accounting purposes as the acquiree. Under reverse acquisition accounting, the financial statements of the surviving corporation (VerticalBuyer) are the financial statements of the acquirer (CSI South Carolina). Accordingly, reported prior year financial results are those of CSI South Carolina, not VerticalBuyer. The activities of VerticalBuyer are included only from the date of the transaction forward. Shareholders' equity of CSI-South Carolina, after giving effect for differences in par value, has been carried forward after the acquisition, and prior year per share amounts have been restated to account for the additional stock issued as a result of the merger.

The merger and related transactions are described in E. The Merger and Recapitalization, and under Management's Discussion and Analysis of Financial Condition and Results of Operations B. Reverse Merger and Investment by Barron Partners LP.

Our principal executive offices are located at 1661 East Main Street, Easley, South Carolina 29640. Our telephone number at that location is (864) 855-3900.

We maintain an Internet website at www.csi-plus.com. Certain pertinent information about our business, products and services and recent developments is posted on our website. The information on our website does not constitute a part of this prospectus.

Edgar Filing: COMPUTER SOFTWARE INNOVATIONS INC - Form SB-2

We are subject to the information requirements of the Securities Exchange Act of 1934, as amended, and we file annual, quarterly and current reports and other information with the Securities and Exchange Commission (SEC). You may read and copy any document that we file at the SEC s public reference room facility located at 100 F Street, N.E., Washington, D.C. 20549. Please call the SEC at 1-800-SEC-0330 for further information on the public reference room. The SEC maintains an Internet site at <http://www.sec.gov> that contains reports and other information regarding issuers, including us, that file documents with the SEC electronically through the SEC s electronic data gathering, analysis and retrieval system known as EDGAR.

Table of Contents

We are not required to deliver an annual report to security holders and we do not plan to send such a report to our security holders. However, as described immediately above, our Annual Report on Form 10-KSB and other filings are available from the SEC.

Our common stock is traded in the over-the-counter market under the symbol CSWI.OB. Trade information is reported on the OTC Bulletin Board.

B. Overview

We develop software and provide hardware-based technology solutions. Our internally developed software is sold and supported through our software applications segment. We monitor our business as two segments, but take advantage of cross-selling and integration opportunities. We provide hardware-based technology solutions through our technology solutions segment. By strategically combining our fund accounting software with our ability to integrate computer and other hardware, we have been successful in providing a variety of technological solutions to over 300 clients located in South Carolina, North Carolina and Georgia. We are pursuing a national presence with a primary, initial focus on the southeast region of the United States.

Software Applications Segment

Our software applications segment develops accounting and administrative software applications that are designed for organizations that employ fund accounting. These organizations include our primary target market: municipalities, school districts and local governments. Our software provides a wide range of functionality to handle public sector and not-for-profit accounting requirements including receipt and tracking of funds, application of purchases, payables, investments and expenditures by fund, and production of financial and informational reports. The software is written in modules which can be sold separately or as a fully-integrated package so that information keyed in one module will be updated electronically into other modules to minimize keying and improve productivity. In addition to the modules covering general accounting functions, specialty modules are also available. The software modules include:

General (or Fund) Ledger;

Accounts Payable;

Purchasing;

Payroll;

Personnel;

Employee Absence/Substitutes;

Inventory;

Utility Billing; and

Other specialty modules designed for government markets.

More detailed information concerning the modules noted above and additional specialty modules is presented in G. Product and Services.

We also provide standards-based lesson planning software. This software is designed to allow teachers to create lesson plans that tie to a state's curriculum standards. Lesson plans may then be reviewed by school administrators and reports generated to determine if standards have been met. Additional information concerning the standards based learning planning software presented in G. Product and Services.

Our software applications segment includes a staff of software developers, implementers, trainers, sales personnel and applications support specialists focused primarily on the development, sales, deployment and support of our in-house software products. From time-to-time, our applications support specialists also provide support for the technology solutions segment.

Table of Contents

Revenues from sales and support of software products developed for resale, coupled with some related hardware sales, (also referred to as software and related services), produce higher margins than our technology solutions segment. Revenues from hardware sales and integration services of our technology solutions segment (also referred to as hardware sales and related services) are generally at lower margins, due to the high volume of hardware, traditionally low margin products, compared to the amount of services and software sold by this segment.

Technology Solutions Segment

Our technology solutions segment has a staff of certified systems engineers capable of providing a broad range of technology solutions to our clients. Certified systems engineers are computer professionals who have passed a test indicating specialized knowledge in the design, planning and implementation of specific computer based technology. These solutions can include, among other capabilities, planning, installation and management of computer, telephone, wireless, video conference, security monitoring and distance and classroom learning projects. Through this segment we also provide subsequent support and maintenance of equipment and systems.

In addition, we provide network integration solutions as a value added reseller (selling equipment purchased from vendors to which we have added our engineering services) of computer hardware and engineering services. These technologies include, but are not limited to:

technology planning (developing plans to purchase or upgrade computers, telephone equipment, cabling and software);

hardware/software sales and installation;

system and network integration (combining different computer programs, processes and hardware such that they operate and communicate seamlessly as a tight-knit system.);

wide area networking (linking a group of two or more computer systems over a large geographic area, usually by telephone lines or the internet);

wireless networking (linking a group of two or more computer systems by radio waves);

IP Telephony and IP Surveillance (sending voice calls and surveillance across the internet using internet protocol (IP), a standard method for capturing information in packets);

project management (overseeing installation of computers, telephone equipment, cabling and software);

support and maintenance (using Novell, Microsoft, Cisco and Citrix certified engineers and other personnel to fix problems);

system monitoring (proactively monitoring computers and software to detect problems); and

education technologies, including distance learning and classroom learning tools.

In addition to our engineers, our technology solutions segment includes a staff of sales persons, project managers and product specialists. Our technology solutions segment also purchases and resells products from a variety of manufacturers such as Hewlett Packard, Cisco, Microsoft, Novell, Promethean, Tandberg and DIVR, and supports the software applications segment.

Currently our business efforts are focused on the two key operating segments: internally developed software applications and related service and support (our software applications segment), and other technology solutions and related service and support (our technology solutions segment). Subsequent to December 31, 2004, the Company began reporting separately for these two operating segments. Prior-year amounts have been reclassified to conform to the current period presentation.

Table of Contents

The chart below shows revenues by business segment for the nine month periods ended September 30, 2005 and 2004, and the years ended December 31, 2004 and 2003.

C. History and Development of CSI South Carolina**Initial Development**

Our current business operations are those of CSI South Carolina. CSI South Carolina was incorporated as a South Carolina corporation on January 20, 1990, and founded by Joe G. Black, our former interim Chief Financial Officer; Nancy K. Hedrick, our Chief Executive Officer and Director; and Beverly N. Hawkins, our Secretary and Vice President of Support Services. Ms. Hedrick and Ms. Hawkins had worked for Data Management, Inc., and developed an accounting system designed for the local government and the kindergarten through high school (K-12) education sector. Mr. Black, recognizing the value of the software targeted at a potentially attractive niche market, teamed up with Ms. Hedrick and Ms. Hawkins. The marketing of the accounting software and supporting the developing client base was the core business of CSI South Carolina from its incorporation until 1999. Beginning with a small, established client base, CSI South Carolina was profitable near inception. During this nine year period, it grew from the original two employees (Ms. Hedrick and Ms. Hawkins), fifteen clients and modest revenues to approximately thirteen employees, a client base of more than 70 customers, and revenues of more than a million dollars.

In early 1999, the original principals were joined by Thomas P. Clinton, our Vice President of Sales and Director; and William J. Buchanan, our Treasurer and Vice President of Engineering. Messrs. Buchanan and Clinton had been employees of another value added reseller and for many years had worked closely with CSI South Carolina to provide hardware network support to its clients. When their former employer began to de-emphasize the K-12 education market, Messrs. Buchanan and Clinton elected to join CSI South Carolina. CSI Technology Resources, Inc.

Edgar Filing: COMPUTER SOFTWARE INNOVATIONS INC - Form SB-2

was formed as a wholly-owned subsidiary of CSI South Carolina to be a value added reseller of computer hardware and network integration services. A value added reseller is a business that resells computers and other technology hardware or software coupled with value adding solutions such as installation services, software, customization and project management.

The addition of the technology sector provided an additional revenue source from the existing client base and new contacts. The result was an increase in revenues from approximately \$2 million in 1999 to revenues of approximately \$22 million for the fiscal year ended 2004.

Table of Contents

By 2000, CSI Technology Resources, Inc. ceased to operate or be accounted for as a separate organization. Accordingly, Ms. Hedrick, Ms. Hawkins and Messrs. Black, Clinton and Buchanan became equal shareholders in CSI South Carolina. Each principal managed a specific area of the business (i.e., sales, technical support services, product development, engineering and administration-finance). The business has continued to operate in a similar manner following its reverse merger with VerticalBuyer.

Events Leading Up to 2005 Restructuring

In 2001, Joe Black, one of the owners and the Chief Financial Officer of CSI South Carolina at the time, announced to the other four owners that he expected to retire within three years. He also indicated that he might want to cash out all or a portion of his interest in CSI South Carolina at the time of his retirement. The five owners of CSI South Carolina began to plan for the approaching retirement of Mr. Black and for the possible disposition of his shares of stock in connection with his retirement. The owners decided to look for financing and considered the possibility of selling stock from each owner in CSI South Carolina to an investor, as well as positioning CSI South Carolina for growth. CSI South Carolina interviewed a few investment banking firms in 2001 and 2002, including The Geneva Companies, Inc. (Geneva), an affiliate of Citigroup, Inc. Management selected Geneva and engaged it to advise CSI South Carolina and the five principals on valuation and financing strategies. Geneva directed the process of locating potential strategic or financial partners for CSI South Carolina.

CSI South Carolina spoke with several interested parties from 2003 into 2004, but no firm prospects emerged until early 2004. Ultimately, CSI South Carolina and its owners signed a letter of intent on May 10, 2004 to sell the stock of CSI South Carolina to Yasup, LLC of New York, New York, which CSI South Carolina management believed to be affiliated with a larger company in CSI South Carolina's industry. Pursuant to the letter of intent, CSI South Carolina began providing information and materials concerning its business to Yasup, LLC. Subsequently, on July 19, 2004, CSI South Carolina and its owners signed a revised letter of intent with Yasup, LLC for the sale of CSI South Carolina. This letter of intent provided that it would terminate if a definitive agreement was not executed within 90 days, or by October 17, 2004.

Over the next several months, the owners of CSI South Carolina negotiated with Yasup, LLC concerning the acquisition. During these negotiations, Yasup, LLC indicated that several companies had evaluated possible financing for the acquisition, but none committed funds. Ultimately, the parties could not come to terms by the termination date of the letter of intent or afterwards, and the proposed acquisition was abandoned.

Through its financial adviser, Liberty Company, LLC (Liberty), Barron Partners LP became aware that CSI South Carolina was seeking to restructure. After the July 19, 2004 letter of intent with Yasup, LLC had terminated, Barron approached the owners of CSI South Carolina through Geneva about financing possibilities. On December 2, 2004, CSI South Carolina and Barron executed a letter of intent by which Barron proposed to buy common stock from the CSI South Carolina owners and acquire other rights in CSI South Carolina (or another company into which CSI South Carolina would merge) after the transaction.

Barron is a micro-cap fund, limited by its organizational documents to investments in companies that are public entities, so the transaction required the merger of CSI South Carolina into a public company that was already reporting to the SEC prior to the investment by Barron. In order to accomplish this, Barron and CSI South Carolina determined that the most effective alternative was for CSI South Carolina to merge into a publicly held inactive shell corporation. In addition, our shareholders believed that converting CSI South Carolina into a publicly held entity would provide the Company in the long term with access to public capital markets that could provide funds for future strategic growth. A public market for the Company's stock would also provide the five shareholders with liquidity for their equity investment in the recapitalized Company.

Edgar Filing: COMPUTER SOFTWARE INNOVATIONS INC - Form SB-2

Barron searched for a publicly held inactive shell corporation, eventually identifying VerticalBuyer, Inc., a Delaware corporation, 77% of the common stock of which was held by Maximum Ventures, Inc. (Maximum Ventures), a New York corporation. VerticalBuyer, which is described in more detail under S. VerticalBuyer, Inc. below, had formerly been engaged in the development of internet sites and had ceased all operations in September 2001. Maximum Ventures purchased its interest in VerticalBuyer on March 12, 2004.

Table of Contents

CSI South Carolina and Barron originally envisioned that Barron would acquire the inactive shell corporation required to facilitate the contemplated investment by Barron. In December 2004, Barron entered into negotiations with Maximum Ventures for the shares held by it in VerticalBuyer, and advanced \$50,000 as an advisory fee, to be credited against the purchase price. However, subsequent to these initial negotiations by Barron with Maximum Ventures, Barron was advised that its organizational documents would not permit it to acquire a corporation with substantially no assets. Accordingly, CSI South Carolina and Barron agreed that CSI South Carolina would acquire a controlling interest in VerticalBuyer.

In December 2004 and January 2005, CSI South Carolina performed legal and financial due diligence on VerticalBuyer, completed negotiations with Maximum Ventures for the purchase of its stockholdings in the inactive corporation and finalized a stock purchase agreement. On January 28, 2005, CSI South Carolina and Barron entered into a second amendment to their letter of intent. In addition to extending Barron's exclusive due diligence period until February 28, 2005, CSI South Carolina also agreed that it would not sell or otherwise dispose of any of the shares of VerticalBuyer's common stock it was to purchase without the prior written consent of Barron, other than as a part of the transactions contemplated by the letter of intent. In addition, Barron agreed to purchase from CSI South Carolina all of such VerticalBuyer stock, at the same price at which it was to be purchased from Maximum Ventures, in the event that the closing of the transactions contemplated by the letter of intent were not consummated by February 28, 2005. The parties contemplated that any exercise of such right by Barron would have been accomplished through an assignee of Barron.

On January 31, 2005, CSI South Carolina and Maximum Ventures entered into a stock purchase agreement and CSI South Carolina concurrently purchased all of the 13,950,000 shares of the common stock of VerticalBuyer from Maximum Ventures. CSI South Carolina's acquisition of a majority interest in VerticalBuyer from Maximum Ventures is described in more detail under E. The Merger and Recapitalization Description of Merger and Related Investment Transactions Purchase of Majority Interest of VerticalBuyer by CSI South Carolina.

Upon the consummation of the stock purchase transaction with Maximum Ventures, VerticalBuyer became a 77% owned subsidiary of CSI South Carolina. Officers of CSI South Carolina were appointed as officers of VerticalBuyer as follows: Nancy K. Hedrick, President and CEO; Joe G. Black, Interim CFO; William J. Buchanan, Treasurer; and Beverly N. Hawkins, Secretary. Effective upon the closing of the Maximum Ventures transaction, the following persons, who had no previous association with VerticalBuyer or CSI South Carolina, were appointed to the board of directors: Anthony H. Sobel, Thomas V. Butta and Shaya Phillips. Prior to Barron, CSI South Carolina or VerticalBuyer entering into any definitive agreements, the management of CSI South Carolina was having difficulty in identifying and securing independent director candidates that it thought would add value to the Company. Accordingly, management solicited advice from Barron regarding potential independent director candidates. Barron introduced Messrs. Sobel, Butta and Phillips. Mr. Sobel, who had no prior business or investment ties to Barron, has experience in the management and financing of emerging enterprises. Mr. Sobel is the chief executive officer of Montana Metal Products. Robert F. Steel, a consultant to us who is also an investor in Barron, is an investor with Mr. Sobel in Montana Metal Products. Messrs. Butta and Phillips were introduced to CSI South Carolina because of their experience in intellectual property-based businesses. Mr. Butta is President and Vice Chairman of the board of directors of a21, Inc., a concern in which Barron invested. Mr. Phillips previously served as chief operating officer and chief technology officer of Global Broadband, Inc., a concern in which Barron years earlier had invested. Mr. Phillips has consulted on a limited basis for Barron with respect to technology investments.

On February 10, 2005, CSI South Carolina and VerticalBuyer, its then 77% owned subsidiary, entered into the Agreement and Plan of Merger. The agreement provided that CSI South Carolina would merge into VerticalBuyer, with VerticalBuyer being the surviving corporation. As a result, CSI South Carolina would in effect become a publicly held company reporting to the SEC. Also on February 10, 2005, CSI South Carolina and Barron entered into definitive agreements for a preferred stock investment in VerticalBuyer following its merger with CSI South Carolina. The merger and other transactions contemplated by the Barron letter of intent and definitive agreements were consummated February 11, 2005 and are described in more detail in E. The Merger and Recapitalization below.

D. Subsidiaries

Our consolidated financial statements continue to include CSI Technology Resources, Inc. as a wholly-owned subsidiary. However, this subsidiary no longer has any significant operations or separate accounting. Its former operations are now accounted for within CSI, except that CSI Technology Resources, Inc. is still named in certain contracts. At a future date, these contracts may be transferred to the parent and the subsidiary deactivated, subject to a review of any tax and legal consequences.

We have no other subsidiaries.

Table of Contents

E. The Merger and Recapitalization

Incorporated in Delaware on September 24, 1999, we were previously known as VerticalBuyer, Inc. We ceased business operations of any kind in September 2001. Prior to assuming the business operations of CSI South Carolina in the February 2005 merger, VerticalBuyer was an inactive shell corporation without material assets or liabilities. The prior operations of VerticalBuyer are discussed in S. VerticalBuyer, Inc.

In the first quarter of 2005, the Company completed a series of recapitalization transactions which began January 31, 2005 with a change in control due to the purchase of a majority of our common stock by CSI South Carolina. These culminated on February 11, 2005 with the merger of CSI South Carolina into VerticalBuyer, our issuance of preferred stock, common stock, common stock warrants and certain subordinated notes, and the change of our name to Computer Software Innovations, Inc. We refer to the Company prior to such merger as VerticalBuyer.

Merger Accounting

The merger was accomplished through an exchange of equity interests.

Under Statement of Financial Accounting Standards (SFAS) No. 141 Business Combinations, the merger of CSI South Carolina into VerticalBuyer was considered to be a reverse acquisition, whereby CSI South Carolina is considered to be the acquirer. Accordingly, the assets and liabilities of CSI South Carolina continued to be recorded at their actual cost. VerticalBuyer had no assets or liabilities at the time of acquisition. Under reverse acquisition accounting, the financial statements of the surviving corporation (VerticalBuyer) are the financial statements of the acquirer (CSI South Carolina). Costs associated with the reverse acquisition are required to be expensed as incurred. Shares issued in the transaction are shown in our financial statements as outstanding for all periods presented and the activities of the surviving company (VerticalBuyer) are included only from the date of the transaction forward. Shareholders equity of CSI South Carolina, after giving effect for differences in par value, has been carried forward after the acquisition.

The accounting treatment for the merger is discussed in more detail in Management s Discussion and Analysis of Financial Condition and Results of Operations B. Reverse Merger and Investment by Barron Partners LP and in Note 2, Acquisition and Merger to our unaudited consolidated financial statements as of September 30, 2005.

Summary of Merger and Related Investment Transactions

The significant merger related activity, on a cash basis, in the order it occurred is as follows:

| | |
|--|-----------------------------|
| Purchase of majority interest in VerticalBuyer shell company by CSI South Carolina | \$ (415,024) ⁽¹⁾ |
| CSI South Carolina s redemption of options | (899,144) |
| Initial cash payment of portion of CSI - South Carolina \$3,460,000 dividends declared to shareholders | (960,000) |
| Proceeds from sale of warrants in merger | 5,042,250 |
| Proceeds from issuance of subordinated note to Barron | 1,875,200 |

Edgar Filing: COMPUTER SOFTWARE INNOVATIONS INC - Form SB-2

| | |
|---|----------------|
| Payment of remaining outstanding dividends declared, from warrant proceeds | (2,500,000) |
| Payment on one of the two sets of subordinated notes issued to shareholders in connection with merger | (3,624,800) |
| Payment of debt issuance costs for \$3,000,000 revolving credit facility | (83,800) |
| Initial borrowings under revolving credit facility | 1,500,000 |
| Payment on second set of shareholder notes and Barron's note from loan proceeds | (1,500,000) |
| | <hr/> |
| Net effect of merger transactions on cash, and cash used for financing activities | \$ (1,565,318) |

- ⁽¹⁾ Consists of \$450,000 aggregate agreed-upon purchase price (including approximately \$5,000 used to satisfy outstanding liabilities of VerticalBuyer) and an additional \$20,000 paid to Maximum Ventures to offset its legal and accounting expenses, net of the \$50,000 contribution by Barron and a \$5,000 allowance to help defray our legal and professional expenses.

Table of Contents

In addition to the cash used for financing activities related to the merger, the Company incurred approximately \$700,000 in legal and professional fees, which were expensed.

The above transactions are described in more detail below under [Description of Merger and Related Investment Transactions](#). Our financial analysis of these transactions is discussed in [Management's Discussion and Analysis of Financial Condition and Results of Operations](#).

Description of Merger and Related Investment Transactions

Purchase of Majority Interest of VerticalBuyer by CSI - South Carolina

On January 31, 2005, CSI - South Carolina purchased 13,950,000 shares of the common stock, \$0.001 par value, of VerticalBuyer from Maximum Ventures pursuant to a Stock Purchase Agreement. The shares purchased by CSI - South Carolina represented approximately 77% of VerticalBuyer's outstanding common stock. The purchase price was \$450,000, with approximately \$53,000 of that amount going to satisfy the outstanding liabilities of VerticalBuyer at that time. CSI - South Carolina also reimbursed Maximum Ventures for legal expenses of \$20,000. The purchase price was reduced by a \$5,000 allowance from Maximum Ventures to defray a portion of the estimated costs of preparation of tax returns for 2001, 2002, 2003 and 2004 and accountant fees for the upcoming 2004 audit. CSI - South Carolina also received credit for the \$50,000 pre-paid advisory fee previously paid by Barron to Maximum Ventures as earnest money. As a part of its preferred stock investment in the Company, Barron contributed the \$50,000 prepayment for the Company's benefit to help defray transaction legal expenses. There were no finder's fees or other monetary consideration paid in connection with the Stock Purchase Agreement and the purchase of the VerticalBuyer shares.

The purpose of the purchase of the VerticalBuyer shares was the procurement of a publicly held inactive shell corporation into which CSI - South Carolina could merge and itself become a publicly held corporation reporting to the SEC. The reasons for utilizing a shell corporation are described in more detail under [C. History and Development of CSI - South Carolina - Events Leading Up to 2005 Restructuring](#).

In connection with CSI - South Carolina's purchase of the VerticalBuyer shares owned by Maximum Ventures, Mr. Abraham Mirman resigned as president, CEO and sole director of VerticalBuyer and Mr. Chris Kern resigned as its CFO. Messrs. Mirman and Kern also served as president and vice president, respectively, of Maximum Ventures. Anthony H. Sobel, Thomas V. Butta and Shaya Phillips were appointed as directors of VerticalBuyer. The board of directors appointed new officers of VerticalBuyer, who were also officers of CSI - South Carolina. These were Nancy K. Hedrick, President and CEO; Joe G. Black, interim CFO; Beverly N. Hawkins, Secretary; and William J. Buchanan, Treasurer. The officer and director appointments were ratified by CSI - South Carolina, as majority shareholder, acting by written consent on January 31, 2005.

Pursuant to a Stock Purchase Agreement between CSI - South Carolina and Maximum Ventures dated January 31, 2005, CSI - South Carolina and Maximum Ventures made certain representations and warranties, including representations and warranties by Maximum Ventures with respect to VerticalBuyer. In particular, Maximum Ventures made representations and warranties with respect to: (1) VerticalBuyer's due organization, valid existence and good standing under Delaware law; (2) the authorized and outstanding common and preferred stock of VerticalBuyer; (3) the absence of any outstanding options, warrants or convertible securities; (4) the absence of any obligation to file a registration statement with respect to common or preferred shares of VerticalBuyer; (5) the absence of any legal proceedings pending or threatened against VerticalBuyer or any of its properties or any of its officers or directors; (6) all tax returns being properly filed, except for income tax returns for years 2001 through 2004; (7) VerticalBuyer being current in its reporting obligations under the Securities Exchange Act of 1934; (8) the absence of any liens or encumbrances on the common stock to be transferred pursuant to the Stock Purchase Agreement, except for certain restrictions on transfer; (9) Maximum Ventures having the legal right to consummate the transactions contemplated by the Stock Purchase Agreement;

Edgar Filing: COMPUTER SOFTWARE INNOVATIONS INC - Form SB-2

(10) VerticalBuyer's compliance with, and absence of any violation by it of, laws and regulations; (11) the identity of the director, officers and employees of VerticalBuyer; (12) the identity of all existing creditors and claims (totaling approximately \$53,000); (13) the accuracy of the books and records; (14) the exemption from the registration requirements of the Securities Act of 1933 for the stock sale; and (15) the absence, to Maximum Venture's knowledge, of any material misstatement or of a material fact or omission to state a material fact contained in VerticalBuyer's filings with the SEC, and the absence of any material adverse change from the facts set forth in VerticalBuyer's Form 10-KSB for the fiscal year ended December 31, 2003. The filing deficiency with respect to income tax returns VerticalBuyer failed to file between 2001 and 2004 has been remedied. In view of VerticalBuyer having ceased operations during this period and reporting no income, the cost of remediating these filing deficiencies was not material.

Table of Contents

The parties also agreed to indemnify each other generally for any breaches of any of their respective representations, warranties and covenants. In the case of Maximum Ventures, indemnification liability is capped at \$450,000. CSI South Carolina and Maximum Ventures also gave further assurances that they would cooperate in the future to carry out the purposes of the Stock Purchase Agreement, including the preparation and filing of future reports of VerticalBuyer with the SEC.

Reverse Stock Split

On January 31, 2005, the board of directors of VerticalBuyer approved a reverse stock split in order to facilitate a potential merger with CSI South Carolina. In the reverse stock split, every 40 shares of VerticalBuyer's common stock issued and outstanding on the record date, February 10, 2005, were converted and combined into one share of post-split shares. The reverse split was effected pursuant to an amendment to our certificate of incorporation and was paid on February 11, 2005. No fractional shares were issued nor any cash paid in lieu thereof. Rather, all fractional shares were rounded up to the next highest number of post-split shares and the same issued to any beneficial holder of such pre-split shares which would have resulted in fractional shares. Accordingly, each beneficial holder of our common stock received at least one post-split share and no shareholders were eliminated. Pursuant to the amendment to our certificate of incorporation effecting the reverse stock split, the number of authorized and preferred shares remained unchanged at 50,000,000 and 5,000,000, respectively. Continental Stock Transfer & Trust Company, New York, New York, our transfer agent, served as exchange agent for the reverse split.

On January 31, 2005, following the board's approval of the reverse stock split, CSI South Carolina, acting as majority shareholder, approved by written consent the reverse split and the related amendment to our certificate of incorporation.

Par Value

In connection with the January 31, 2005 approval of the reverse stock split, the board of directors of VerticalBuyer also approved the elimination of par value of all shares of our authorized common and preferred stock. Such change was likewise approved on January 31, 2004 by CSI South Carolina, as majority stockholder acting by written consent. Subsequently, on February 9, 2005, the board decided it was in the best interest of VerticalBuyer and more economical to retain par value of \$0.001 for all of our authorized common and preferred stock. This decision was made prior to the filing of the amendment to our certificate of incorporation and accordingly, the par value of our common and preferred stock has not changed. CSI South Carolina as majority stockholder acting by written consent, also approved the subsequent retention of par value on February 9, 2005.

Name Change

On February 4, 2005, the board of directors of VerticalBuyer approved the change of our name from VerticalBuyer, Inc. to Computer Software Innovations, Inc. The board also approved an amendment to our certificate of incorporation effecting such change. Following the board's approval of the name change on February 4, 2005, CSI South Carolina, acting as majority stockholder by written consent, also approved the name change.

The change of our name to Computer Software Innovations, Inc. became effective on February 10, 2005, concurrently with the reverse stock split, upon the filing of an amendment to our certificate of incorporation.

CSI South Carolina Redemption of Options

Prior to the merger on February 9, 2005, CSI South Carolina redeemed stock options for 6,234 (738,195, as restated in our consolidated financial statements) shares of its common stock in exchange for \$899,144 cash. Under CSI South Carolina's stock option plan, certain non-executive employees had been granted stock options for an aggregate of 9,000 (1,065,746, as restated in our consolidated financial statements) shares of CSI South Carolina common stock. The redeemed options represented 73.34% of then outstanding options for 8,500 (1,006,538, as restated in our consolidated financial statements) shares. Pursuant to the plan, the option holders retained the remaining portion of their options. In connection with the merger, the surviving corporation assumed such options, which after the merger became exercisable for

Table of Contents

shares of common stock of the surviving corporation at the share ratio applicable to shares of CSI South Carolina common stock cancelled in the merger. Following the merger, the remaining options were exercisable for 268,343 shares of the Company's common stock.

The redemption by CSI South Carolina of the options was contemplated by the parties to the Merger Agreement between CSI South Carolina and VerticalBuyer, and the preferred stock purchase agreement between Barron and the Company relating to Barron's preferred stock investment in the merged Company. The option redemption was a condition to both agreements. The purpose of the redemption was to permit the option holders, consisting of non-executive employees of CSI South Carolina whom management believed to have contributed to the success of that company, to participate with the five shareholders in the cash consideration received by the shareholders in the merger.

For additional discussion of the redemption of the CSI South Carolina options and other option plans of the Company, see Management's Discussion and Analysis of Financial Condition and Results of Operation B. Reverse Merger and Investment by Barron Partners LP Summary of Merger.

CSI South Carolina Dividends

Prior to the merger on February 11, 2005, CSI South Carolina declared dividends to its five shareholders totaling \$3,460,000. Those shareholders were: Nancy K. Hedrick, Joe G. Black, Beverly N. Hawkins, Thomas P. Clinton and William J. Buchanan. Of this amount, \$960,000 was paid in cash and \$2.5 million recorded as subordinated dividend notes payable to each shareholder. These notes were repaid immediately following the merger from the proceeds of the issuance of the preferred stock and the approximately \$1.9 million subordinated loan from Barron.

The dividends were contemplated by the parties to the Merger Agreement (CSI South Carolina and VerticalBuyer) and the Preferred Stock Purchase Agreement (Barron and VerticalBuyer), and were conditions in such agreements to the consummation of the merger and Barron's preferred stock investment. The dividends resulted from the desire of the five shareholders of CSI South Carolina to withdraw a substantial amount of cash which had accumulated in CSI South Carolina prior to the sale of their stock in the merger.

The Merger

At a meeting on February 4, 2005, the board of directors of VerticalBuyer considered and approved the potential merger of CSI South Carolina into VerticalBuyer and a related merger agreement. The board had previously discussed such merger at its January 31, 2005 meeting and in meetings with legal and other advisors.

On February 10, 2005, VerticalBuyer and CSI South Carolina executed the Agreement and Plan of Merger. On February 11, 2005, CSI South Carolina merged into VerticalBuyer, with VerticalBuyer continuing as the surviving corporation. In the merger, the former stockholders of CSI South Carolina received, in exchange for their shares of CSI South Carolina common stock, two sets of notes totaling \$3,624,800 and \$1,875,200, respectively, and 2,526,904 shares of our common stock. Such consideration was in addition to the pre-merger dividend by CSI South Carolina. The set of notes totaling \$3,624,800 was repaid to the former CSI South Carolina shareholders immediately following the merger from the proceeds of the preferred stock and the \$1,875,200 subordinated note issued to Barron, as described under Sale of Preferred Stock and Warrants below. Subordinated notes payable to the former shareholders of CSI South Carolina totaling \$1,875,200 remained outstanding following the merger. Amounts outstanding under these notes totaled \$1,125,200 as of September 30, 2005. The terms of the

Edgar Filing: COMPUTER SOFTWARE INNOVATIONS INC - Form SB-2

subordinated notes are described more fully under Subordinated Notes below.

The shares of the common stock of VerticalBuyer previously held by CSI South Carolina, representing approximately 77% of VerticalBuyer's issued and outstanding capital stock, were cancelled in the merger. The remaining shareholders of VerticalBuyer retained their existing shares, subject to the 40 to 1 reverse stock split. Such minority shareholders had appraisal rights as provided in accordance with Delaware law, whereby they could elect to have their shares repurchased by the surviving corporation. No minority stockholders elected to exercise their appraisal rights.

As a result of the reverse stock split and merger, immediately following the merger the Company had approximately 2.6 million shares of common stock outstanding. As a result of the issuance of the preferred stock and warrants (discussed in Sale of Preferred Stock and Warrants below), on a diluted basis, assuming the conversion of the preferred stock and exercise of outstanding warrants and options, approximately 17.3 million shares of common stock were outstanding.

Table of Contents

Pursuant to the Agreement and Plan of Merger, a new board of directors was constituted and new officers appointed. See [Management](#) for information on our officers and directors.

In accordance with the Agreement and Plan of Merger, upon the consummation of the merger, the certificate of incorporation and the bylaws of the Company were each amended and restated. The rights of security holders of the Company contained in the Amended and Restated Certificate of Incorporation and Amended and Restated Bylaws are discussed in [Description of Securities](#). Information relating to certain participants in the merger and related transactions is discussed in [Certain Relationships and Related Transactions](#).

Sale of Preferred Stock and Warrants

At its meeting on February 4, 2005, VerticalBuyer's board, in connection with the merger, approved the issuance and sale of shares of its preferred stock and common stock warrants to Barron in exchange for the payment of \$5,042,250 pursuant to the terms of a Preferred Stock Purchase Agreement. Pursuant to the agreement, Barron also agreed to lend an additional \$1.9 million, in the form of a subordinated note on the same terms as the subordinated notes payable to the former CSI South Carolina shareholders in the merger. Later, on February 4, 2005, CSI South Carolina, acting as majority shareholder by written consent, ratified the board's approval of the transactions with Barron.

On February 10, 2005, VerticalBuyer entered into the Preferred Stock Purchase Agreement with Barron. Pursuant to the agreement, on February 11, 2005, immediately following the consummation of the merger, we issued to Barron 7,217,736 shares of our newly created Series A Convertible Preferred Stock in exchange for the payment of \$5,042,250. Barron was also issued two warrants to purchase in the aggregate 7,217,736 shares of our common stock. The preferred stock is convertible into common stock on a one-for-one basis. The exercise prices of the warrants are \$1.3972 and \$2.0958 per share. Each warrant is exercisable for half of the total warrant shares. The terms and conditions of the warrants are identical except with respect to exercise price.

Both the conversion of the preferred stock and the exercise of the warrants are subject to restrictions on ownership that limit Barron's beneficial ownership of our common stock. Initially, Barron was generally prohibited from beneficially owning greater than 4.99% of our common stock, and such restriction could be waived by Barron upon 61 days prior notice. It was the intention of the Company and Barron that the preferred stockholder never acquire greater than 4.99% of the Company's common stock and never be deemed an affiliate or control person under federal securities laws. To avoid doubt following conferences with the staff of the SEC, the parties agreed to remove the 61 days waiver provision and to impose a non-waivable beneficial ownership cap of 4.9%. These agreements were implemented on November 7, 2005. Pursuant to the terms of the Certificate of Designation governing the preferred stock and the warrants, the ownership cap may not be amended or waived without the approval of the common stockholders of the Company, excluding for such vote all shares held by the holders of preferred stock and warrants (including Barron) and any directors, officers or other affiliates of the Company.

The warrants may be exercised on a cashless basis. In such event, we would receive no proceeds from their exercise. However, a warrant holder (including Barron) may not effect a cashless exercise prior to February 11, 2006. Also, so long as we maintain our effective registration statement for the shares underlying the warrants, a warrant holder is prohibited from utilizing a cashless exercise.

The terms of the Series A Convertible Preferred Stock are contained in the Certificate of Designation of Preferences, Rights and Limitations of Series A Convertible Preferred Stock, which is part of our charter and filed with the Secretary of State of Delaware. Disclosure on the provisions of the Certificate of Designation is contained in [Certificate of Designation](#) and [Description of Securities Preferred Stock](#). The holder of the preferred stock also possesses rights pursuant to the Preferred Stock Purchase Agreement, which is discussed in [Preferred Stock Purchase Agreement](#) below.

Other provisions of the warrants are discussed in Warrants below and under Description of Securities Warrants.

Registration Rights Agreement

In conjunction with the Preferred Stock Purchase Agreement, the Company also entered into a Registration Rights Agreement with Barron on February 10, 2005, whereby we agreed to register the shares of common stock underlying the

Table of Contents

preferred stock and warrants to be sold to Barron. Under the initial terms of the Registration Rights Agreement, the Company was obligated to file, within 45 days following the execution of the Registration Rights Agreement, a registration statement covering the resale of the shares. The agreement also obligated us to use our best efforts to cause the registration statement to be declared effective by the SEC within 120 days following the closing date of the registration rights agreement (February 11, 2005) or generally such earlier date as permitted by the SEC. Barron may also demand the registration of all or part of such shares on a one-time basis and, pursuant to piggy-back rights, may require us (subject to carveback by a managing underwriter) to include such shares in certain registration statements we may file. We are obligated to pay all expenses in connection with the registration of the shares and may be liable for liquidated damages in the event the registration of shares is not effected pursuant to the agreement.

Under the terms of the initial Registration Rights Agreement, liquidated damages would be triggered if we failed (i) to file the registration statement within 45 days from February 11, 2005, (ii) to cause such registration statement to become effective within 120 days from February 10, 2005, or (iii) to maintain the effectiveness of the registration statement. These requirements are subject to certain allowances: 45 Amendment Days during any 12-month period to allow the Company to file post-effective amendments to reflect a fundamental change in the information set forth in the registration statement, and Black-out Periods of not more than ten trading days per year in our discretion, during which liquidated damages would not be paid.

Under the initial terms of the Registration Rights Agreement with Barron, the liquidated damages were payable in cash at a rate of 25% per annum on Barron's initial preferred stock and warrant investment of \$5,042,250. Because the liquidated damages were payable in cash, under EITF 00-19 Accounting for Derivative Financial Instruments Indexed to and Potentially Settled in a Company's Own Stock a potential obligation (referred to under EITF 00-19 as a derivative financial instrument) existed until the registration became effective. Accordingly, the entire proceeds of the preferred stock issuance except for the par value were allocated to the warrants and recorded as a liability on the September 30, 2005 balance sheet. As a result of this treatment, our net shareholders' equity as of September 30, 2005 was reported as a deficit of \$7.1 million. Additional information on this accounting treatment is presented in Note 6, Financial Instrument (Related to Warrants) to our unaudited consolidated financial statements as of September 30, 2005.

It was not the intent of either CSI or Barron that the Registration Rights Agreement result in the majority of the proceeds from the preferred stock and warrant issuance being recorded as a liability rather than equity. In response, on November 7, 2005, CSI and Barron entered into an amendment to the Registration Rights Agreement that eliminated cash liquidated damages and replaced them with liquidated damages in the form of additional shares of Series A Convertible Preferred Stock. Pursuant to the amendment, 2,472 shares of preferred stock will be issued to Barron for each day when liquidated damages are triggered. The maximum number of shares that could be issued is 1,082,736. The amendment also resolved a conflict in the initial Registration Rights Agreement whereby some time periods for registration and liquidated damages were determined with respect to the date of the agreement (February 10, 2005) while others utilized the closing date of the agreement (February 11, 2005). Under the amended agreement, all such periods are determined in relation to February 11, 2005.

Prior to the execution of the amendment, Barron agreed to waive any liquidated damages through November 30, 2005 pursuant to a waiver dated September 30, 2005. In exchange, during the fourth quarter of 2005 we paid Barron \$50,000 and agreed to cause the registration statement to become effective under the Registration Rights Agreement on or before November 30, 2005. We would again be subject to the payment of liquidated damages, in the form of 2,472 preferred shares per day, if we do not cause the registration statement to become effective on or before such date or, subject to allowances for Amendment Days or Black-out Periods, maintain the effectiveness of the registration statement after such date.

Subordinated Notes

Edgar Filing: COMPUTER SOFTWARE INNOVATIONS INC - Form SB-2

On February 11, 2005, the Company also issued six subordinated promissory notes payable, respectively, to Barron and the five former shareholders of CSI - South Carolina: Nancy K. Hedrick, Joe G. Black, Beverly N. Hawkins, Thomas P. Clinton and William J. Buchanan. The five notes payable to the former CSI - South Carolina shareholders were issued pursuant to the Agreement and Plan of Merger and constituted a portion of the shareholders' consideration in the merger. The note payable to Barron, issued pursuant to the Preferred Stock Purchase Agreement, evidences a subordinated loan to the Company in connection with Barron's investment in the preferred stock. All such notes rank equally in right of payment in the event of bankruptcy or liquidation of the Company, or similar events, and are subordinated in right of payment to all other non-subordinated debt of the Company. Payments of principal and interest may be paid as agreed under such subordinated notes, so long as, generally, we are not in default under any of our senior indebtedness.

Table of Contents

The Barron note provides that the Company will repay to Barron \$1,875,200, with interest accruing at an annual rate of the prime rate plus 2%. We must pay the principal on the note in full on or before May 10, 2006. Any past due and unpaid amounts bear interest at the rate of 15% per annum until paid in full. At September 30, 2005, \$1,125,200 was outstanding under the Barron subordinated note.

The aggregate principal sum borrowed under the notes payable to the five former shareholders of CSI South Carolina is \$1,875,200, or \$375,040 per individual. Other than the principal amount borrowed, the terms of the notes are substantially identical to the note payable to Barron. On September 30, 2005, the aggregate outstanding balance on the five shareholder subordinated notes was \$1,125,200.

We anticipate repaying the subordinated notes from draws on our bank credit facility and cash generated by operations. The repayment of the subordinated notes is discussed further in Management's Discussion and Analysis of Financial Condition and Results of Operations G. Liquidity and Capital Resources.

Preferred Stock Purchase Agreement

Barron invested in our preferred stock and warrants pursuant to the Preferred Stock Purchase Agreement. It contains certain rights of the holders of the preferred stock and certain limitations on us in addition to those contained in the Certificate of Designation. In addition to the customary representations, warranties and other provisions, the Preferred Stock Purchase Agreement:

required Barron, as the investor in the preferred stock, to make a subordinated loan to the Company in the amount of approximately \$1.9 million. Barron's loan was funded with cash at closing and was substantially utilized to fund the merger consideration;

required the five former shareholders of CSI South Carolina, collectively, to make subordinated loans totaling approximately \$1.9 million. The loans by the former CSI South Carolina shareholders were funded by merger consideration which otherwise would have been payable in cash;
