acted
on
or
relied
on
by
persons
who
are
not
relevant
persons.

Certain
statements
in
this
presentation
are
forward-looking
statements.

The
forward-looking
statements
include
statements
regarding
contribution
synergies,
future
cost
savings,
the
cost
and

timing of development projects, future production volumes, increases in production and infrastructure capacity, the identification and, without limitation, other statements typically containing words such as "intends", "expects", "anticipates", "targets", "plans". These statements speak only as at the date of this presentation. These statements are based on current expectations and beliefs and, by their nature, involve risks and uncertainties that could cause actual results, performance and achievements to differ materially from any expected future

by such forward-looking statements. The forward-looking statements are based on numerous assumptions regarding BHP Billiton in which BHP Billiton and Rio Tinto will operate in the future and such assumptions may or may not prove to be correct.

There are a number of factors that could cause actual results or performance to differ materially from those expressed or implied in the forward-looking statements.

Factors that could cause actual results or performance to differ materially from those described in the forward-looking statements include, but are not limited to, the following:

- the operations of the businesses of BHP Billiton and Rio Tinto and the ability to realise expected synergies from that combination, the presence of

a
competitive
proposal
in
relation
to
Rio
Tinto,
satisfaction
of
any
conditions
to
any
proposed
transaction,
including
the
receipt
of

Escondida
demonstrates the true value of Tier 1 assets
Tier 1 Assets

Tier 1 assets are large, long-life, low-cost and expandable resources that generate exportable commodities.

This means that they can deliver more value for longer. They are robust in the down-cycle.

But the real value of Tier 1 is revealed during times of high prices when they can be expanded as needed to meet increased demand

Sometimes several times

Staged development maximises return.

Page 19
Page 19
Conclusion
Strength, stability and growth

BHP Billiton's core strategy remains unchanged

BHP Billiton is focused on producing volumes from its low cost assets to take advantage of the strong market conditions

A combination of BHP Billiton and Rio Tinto can generate substantial additional value for shareholders
they are a natural fit

This combination unlocks a very material and unique pool of value:

More production, faster and lower cost; enhanced future growth options; traditional synergies

Quantifiable value; incremental EBITDA impact growing to estimated \$3.7B

The terms of the Rio Tinto offer reflect a good deal for both companies
shareholders

BHP Billiton on a standalone basis is an attractive business with a compelling growth profile

Transaction must be value accretive for all BHP shareholders
