**Table of Contents**

**Notes to Consolidated Financial Statements**

(Dollars in thousands, except per share amounts)

**Note A**

**Accounting Policies and Other Matters**

The accompanying unaudited consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information. Accordingly, they do not include all of the information and notes required by accounting principles generally accepted in the United States of America for complete financial statements.

In the opinion of management, the consolidated financial statements contain all material adjustments necessary to present fairly the financial position of First Citizens BancShares, Inc. as of and for each of the periods presented, and all such adjustments are of a normal recurring nature. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the period. Actual results could differ from those estimates.

These consolidated financial statements should be read in conjunction with the consolidated financial statements and notes included in the 2008 First Citizens BancShares, Inc. Form 10-K. Certain amounts for prior periods have been reclassified to conform with statement presentations for 2009. However, the reclassifications have no effect on shareholders' equity or net income as previously reported.

**Note B**

**Operating Segments**

BancShares conducts its banking operations through its two wholly-owned subsidiaries, FCB and ISB. Although FCB and ISB offer similar products and services to customers, each entity operates in distinct geographic markets and each entity operates under a separate charter. The financial results and trends of ISB reflect the impact of the de novo nature of its growth.

In the aggregate, FCB and its consolidated subsidiaries, which are integral to its branch operation, and ISB account for more than 90 percent of consolidated assets, revenues and net income. Other includes activities of the parent company and Neuse, Incorporated, a subsidiary that owns real property used in the banking operation.

The adjustments in the accompanying tables represent the elimination of the impact of certain inter-company transactions. The adjustments to interest income and interest expense neutralize the earnings and cost of inter-company borrowings. The adjustments to noninterest income and noninterest expense reflect the elimination of management fees and other service fees paid by one company to another within BancShares consolidated group.

**Table of Contents****Note C****Employee Benefits**

BancShares recognized pension expense totaling \$2,483 and \$1,666, respectively, in the three-month periods ended March 31, 2009 and 2008. Pension expense is included as a component of employee benefits expense.

Components of Net Periodic Benefit Cost	Three month periods ended March 31,	
	2009	2008
Service cost	\$ 2,613	\$ 5,457
Interest cost	4,283	9,087
Expected return on assets	(5,167)	(12,975)
Amortization of prior service cost	41	97
Amortization of net actuarial loss	713	
Total net periodic benefit cost	\$ 2,483	\$ 1,666

The increase in pension expense during 2009 resulted from a change in the assumed discount rate used to estimate benefit obligations, a reduction in the expected rate of return on plan assets and an increase in the estimated future rate of salary increases. The assumed discount rate for 2009 is 6.00 percent, the expected long-term rate of return on plan assets is 8.00 percent and the assumed rate of salary increases is 4.50 percent.

During the first quarter of 2009, BancShares contributed \$35,000 to the defined benefit plan.

**Note D****Fair Value Disclosures**

BancShares adopted the provisions of SFAS No. 157 *Fair Value Measurements* (Statement 157) and SFAS No. 159 *The Fair Value Option for Financial Assets and Liabilities* (Statement 159) on January 1, 2008.

Statement 157 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. Statement 157 does not require any new fair value measurements, but clarifies and standardizes some divergent practices that have emerged since prior guidance was issued. Statement 157 creates a three-level hierarchy under which individual fair value estimates are to be ranked based on the relative reliability of the inputs used in the valuation.

Statement 157 defines fair value as the price that would be received to sell an asset or transfer a liability in an orderly transaction between market participants at the measurement date. When determining the fair value measurements for assets and liabilities, BancShares considers the principal or most advantageous market in which those assets or liabilities are sold and considers assumptions that market participants would use when pricing those assets or liabilities. Fair values determined using level 1 inputs rely on active and observable markets to price identical assets or liabilities. In situations where identical assets and liabilities are not traded in active markets, fair values may be determined based on level 2 inputs, which exist when observable data exists for similar assets and liabilities. Fair values for assets and liabilities that are not actively traded in observable markets are based on level 3 inputs, which are considered to be unobservable.

Among BancShares' assets and liabilities, investment securities available for sale and an interest rate swap accounted for as a cash flow hedge are reported at their fair values on a recurring basis. Certain other assets are adjusted to their fair value on a nonrecurring basis, including loans held for sale, which are carried at the lower of cost or market, other real estate and goodwill and other intangible assets, which are periodically tested for impairment. Loans held for investment, deposits, short-term borrowings and long-term obligations are not reported at fair value.

**Table of Contents**

For assets and liabilities carried at fair value on a recurring basis, the following table provides fair value information as of March 31, 2009:

Description	Fair value	Fair value measurements using:		
		Quoted prices in active markets for identical assets and liabilities (Level 1 inputs)	Quoted prices for similar assets and liabilities (Level 2 inputs)	Significant unobservable inputs (Level 3 inputs)
<i>March 31, 2009</i>				
<u>Assets measured at fair value</u>				
Investment securities available for sale	\$ 3,319,025	\$ 3,216,587	\$ 97,430	\$ 5,008
<u>Liabilities measured at fair value</u>				
Cash flow hedge	10,038		10,038	
<i>December 31, 2008</i>				
<u>Assets measured at fair value</u>				
Investment securities available for sale	3,219,980	3,127,889	86,005	6,086
<u>Liabilities measured at fair value</u>				
Cash flow hedge	10,668		10,668	

Prices for US Treasury and Government agency securities are readily available in the active markets in which those securities are traded, and the resulting fair values are shown in the Level 1 input column. Prices for mortgage-backed securities and for state, county and municipal securities are obtained using the fair values of similar securities, and the resulting fair values are shown in the Level 2 input column. Prices for all other securities, which include a residual interest that was retained from a securitization transaction and other non-marketable investments, are determined based on various assumptions that are not observable. The fair values for these investment securities are shown in the Level 3 input column. With respect to the residual interest in the asset securitization, the assumed prepayment speed, discount rate and credit spread are not observable in the market due to illiquidity and the uniqueness of the underlying assets.

Under the terms of the existing cash flow hedge, BancShares pays a fixed payment to the counterparty in exchange for receipt of a variable payment that is determined based on the 3-month LIBOR rate. The fair value of the cash flow hedge is therefore based on projected LIBOR rates for the duration of the hedge, values that, while observable in the market, are subject to adjustment due to pricing considerations for the specific instrument.

For those investment securities available for sale with fair values that are determined by reliance on significant unobservable inputs, the following table identifies the factors causing the change in fair value during the first quarters of 2009 and 2008:

Description	Investment securities available for sale with fair values based on significant unobservable inputs	
	2009	2008
	(thousands)	
Beginning balance, January 1,	\$ 6,086	\$ 9,924
Total gains (losses), realized or unrealized:		
Included in earnings		
Included in other comprehensive income	266	411
Purchases, sales, issuances and settlements, net	(1,344)	(1,129)
Transfers in/out of Level 3		
Ending balance, March 31	\$ 5,008	\$ 9,206

**Table of Contents**

No gains or losses were reported for the three-month periods ended March 31, 2009 and 2008 that relate to fair values estimated based on significant unobservable inputs.

Certain financial assets and financial liabilities are carried at fair value on a nonrecurring basis. Loans held for sale are carried at the lower of aggregate cost or fair value and are therefore carried at fair value only when fair value is less than the asset cost. Certain impaired loans are also carried at fair value. For financial assets and financial liabilities carried at fair value on a nonrecurring basis, the following table provides fair value information as of March 31, 2009:

Description	Fair value measurements at March 31, 2009 using:			
	Fair value at March 31, 2009	Quoted prices in active markets for identical assets and liabilities (Level 1 inputs)	Quoted prices for similar assets and liabilities (Level 2 inputs)	Significant unobservable inputs (Level 3 inputs)
Loans held for sale	\$ 124,255	\$	\$	\$ 124,255
Impaired loans	24,219			24,219

The values of loans held for sale are based on prices observed for similar pools of loans, appraisals provide by third parties and prices determined based on terms of investor purchase commitments. The value of impaired loans is determined by either the collateral value or by the discounted present value of the expected cash flows.

Certain non-financial assets and non-financial liabilities are measured at fair value on a nonrecurring basis. Other assets includes certain foreclosed assets that are measured and reported at fair value using Level 2 inputs for observable market data or, if needed, Level 3 inputs for valuations based on non-observable criteria. During the quarter ended March 31, 2009, foreclosures of other real estate totaled \$11.8 million, all of which were valued using Level 2 inputs. In connection with the measurement and initial recognition of foreclosed assets, BancShares recognized charge-offs totaling \$6.0 million. No foreclosed assets were remeasured at fair value during the three months ended March 31, 2009.

Statement 159 allows an entity to elect to measure certain financial assets and liabilities at fair value with changes in fair value recognized in the income statement each period. The statement also requires additional disclosures to identify the effects of an entity's fair value election on its earnings. Upon the adoption of Statement 159, BancShares did not elect to report any assets and liabilities at fair value.

**Note E****Contingencies**

On May 24, 2004, FCB filed a lawsuit in the Circuit Court of Greenbrier County, West Virginia against a customer alleging default under a master lease on a piece of equipment, eight promissory notes and two leases. The borrower asserted a counterclaim against FCB alleging breach of lease, breach of fiduciary duty, breach of duty of good faith and fair dealing, and tortious interference with contractual relations. At trial, a jury returned a verdict against FCB and awarded a \$4.1 million judgment in favor of FCB's customer. If the jury verdict stands, the customer will be entitled to pre-judgment interest of approximately \$1.0 million and post-judgment interest at a rate of 8.25 percent. FCB filed a motion to set aside the judgment or, in the alternative, for a new trial, but the Court denied FCB's motion. FCB is appealing the Court's action to the West Virginia Supreme Court of Appeals. FCB has posted an acceptable bond and execution of the judgment is stayed pending the outcome of the appeal. FCB strenuously denies liability and is vigorously pursuing appeal of the jury's award.

BancShares and various subsidiaries have been named as defendants in various other legal actions arising from their normal business activities in which damages in various amounts are claimed. Although the amount of any ultimate liability with respect to those other matters cannot be determined, in the opinion of management, any such liability will not have a material effect on BancShares' consolidated financial statements.

**Table of Contents****Note F****Derivative Financial Instrument**

BancShares has a single financial instrument that is reported as a derivative, an interest rate swap that qualifies as a cash flow hedge under Statement of Financial Accounting Standards No. 133 Accounting for Derivative Instruments and Hedging Activities and Statement of Financial Accounting Standards No. 161 Disclosures about Derivative Instruments and Hedging Activities an Amendment of FASB Statement No. 133. The fair value of that derivative is included in other liabilities in the consolidated balance sheets and in the net change in other liabilities in the consolidated statements of cash flows.

The interest rate swap converts variable-rate exposure on outstanding debt to a fixed rate. The interest rate swap has a notional amount of \$115,000, representing the amount of the trust preferred capital securities issued during 2006, and has a term of five years, ending June 30, 2011. The swap has been designated as a cash flow hedge. The fixed interest cost that BancShares pays is 7.125 percent, while the interest rate swap counterparty pays BancShares a variable rate of 175 basis points above 3-month LIBOR, which is equal to the interest paid to the holders of the trust preferred capital securities. Settlement occurs quarterly.

	Notional amount	Estimated fair value of liability	Notional amount	Estimated fair value of liability
Interest rate swap on trust preferred capital securities	\$ 115,000	\$ 10,038	\$ 115,000	\$ 8,974

For cash flow hedges, the effective portion of the gain or loss due to changes in the fair value of the derivative hedging instrument is included in other comprehensive income, while the ineffective portion, representing the excess of the cumulative change in the fair value of the derivative over the cumulative change in expected future cash flows on the hedged transaction, is recorded in the consolidated income statement.

BancShares' interest rate swap has been fully effective since its inception. Therefore, changes in the fair value of the interest rate swap have had no impact on net income.

The following table discloses activity in accumulated other comprehensive income related to the interest rate swap during the three-month periods ended March 31, 2009 and 2008.

	2009	2008
Accumulated other comprehensive loss resulting from interest rate swap as of January 1	\$ (6,456)	\$ (3,240)
Other comprehensive income (loss) recognized during three-month period ended March 31	382	(2,191)

Accumulated other comprehensive loss resulting from interest rate swap as of January 1	\$ (6,074)	\$ (5,431)
--	------------	------------

Derivative contracts involve the risk of dealing with counterparties and their ability to meet contractual terms. BancShares monitors the credit risk of the interest rate swap counterparty.

### **Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

#### **INTRODUCTION**

Management's discussion and analysis of earnings and related financial data are presented to assist in understanding the financial condition and results of operations of First Citizens BancShares, Inc. and Subsidiaries (BancShares). This discussion and analysis should be read in conjunction with the unaudited Consolidated Financial Statements and related notes presented within this report. Intercompany accounts and transactions have been eliminated. Although certain amounts for prior years have been reclassified to conform to statement presentations for 2009, the reclassifications have no effect on shareholders' equity or net income as previously reported. Unless otherwise noted, the terms we, us and BancShares refer to the consolidated financial position and consolidated results of operations for BancShares.

#### **OVERVIEW**

BancShares is a financial holding company headquartered in Raleigh, North Carolina that offers full-service banking through two wholly-owned banking subsidiaries, First-Citizens Bank & Trust Company (FCB), a North Carolina-chartered bank, and IronStone Bank (ISB), a federally-chartered thrift institution. FCB operates branches in five states and has announced plans to open an office in Washington, D.C. ISB operates branches in urban areas of twelve states. Beyond the traditional branch network, we offer customer sales and service through telephone, online banking and our extensive ATM network.

BancShares' earnings and cash flows are primarily derived from the commercial banking activities conducted by its banking subsidiaries. We offer commercial and consumer loans, deposit and treasury services products, cardholder and merchant services, wealth management services as well as various other products and services typically offered by commercial banks. FCB and ISB gather deposits from retail and commercial customers. BancShares and its subsidiaries also secure funding through various non-deposit sources. We invest the liquidity generated from these funding sources in interest-earning assets such as loans and leases, investment securities and overnight investments. We also invest in the bank premises, furniture and equipment used to conduct the subsidiaries' commercial banking business.

Various external factors influence customer demand for our loan, lease and deposit products and ultimately affect the quality of our assets and our profitability. Recessionary economic conditions have caused higher rates of unemployment, and a growing inability for some businesses and consumers to meet their debt service obligations. In addition, real estate demand in many of our markets remains weak, resulting in a decline in real estate values that has adversely affected collateral values for certain of our loans. Further, the current and anticipated instability in alternative investment markets has influenced demand for our deposit and treasury services products.

Economic conditions during 2008 and early 2009 have had a significant impact on virtually all financial institutions in the United States, including BancShares. The widespread non-availability of capital has created significant disruptions, causing financial institutions to curtail growth and in some cases to seek merger partners under distressed conditions. As a result of the inter-connectivity of the global financial markets, the failure and acquisition of troubled entities have created challenges throughout the industry. In addition to the various actions announced by governmental agencies, it is likely that further regulatory actions will arise as the Federal government attempts to provide liquidity, stability and capital to strengthen the financial services sector.

As a result of costs arising from recent and projected failures of insured banks, the reserve level of the Federal Deposit Insurance Corporation's (FDIC) Deposit Insurance Fund (DIF) has declined to less than the amount mandated by the Federal Deposit Insurance Reform Act of 2005. The FDIC has a legally-imposed duty to adopt a plan to restore the DIF to a specific level, an amount that could require the payment of a material assessment by all insured banks. It is unclear at this time if or when such an assessment will be payable or whether alternative sources of funding will be found.

**Table of Contents**

In addition to the various regulatory efforts to stabilize the economic turbulence during 2008, ongoing management of monetary policy and interest rates by the Federal Reserve has significantly impacted the pricing of and demand for loan, deposit and treasury services products. During the fourth quarter of 2008, the Federal Reserve dropped the federal funds rate to near zero percent. The impact of these lower rates has had a significant adverse impact on our net interest income during 2009.

Financial institutions have typically focused their strategic and operating emphasis on maximizing profitability, and therefore have measured their relative success by reference to profitability measures such as return on average assets or return on average shareholders' equity. BancShares' return on average assets and return on average equity have historically compared unfavorably to the returns of similar-sized financial holding companies. We have consistently placed primary strategic emphasis upon balance sheet liquidity, asset quality and capital conservation, even when those priorities may be detrimental to short-term profitability. While we have not been immune from adverse influences arising from economic weaknesses and financial market disruptions, our long-standing focus on balance sheet strength has continued to serve us well.

Once economic conditions begin to improve, we believe that we will be positioned to resume favorable growth and profitability trends. We operate in diverse geographic markets and can increase our business volumes and profitability by offering competitive products and superior customer service. We continue to concentrate our marketing efforts on business owners, medical and other professionals and financially-active individuals. We seek to increase fee income in areas such as wealth management, cardholder and merchant services, insurance and treasury services. Leveraging on our investments in technology, we also focus on opportunities to generate income by providing various processing services to other banks.

**PERFORMANCE SUMMARY**

BancShares' consolidated net income during the first quarter of 2009 equaled \$8.7 million, a significant reduction from the \$32.4 million earned during the corresponding period of 2008. The annualized return on average assets amounted to 0.21 percent during the first quarter of 2009, compared to 0.80 percent during the same period of 2008. The annualized return on average equity was 2.44 percent during 2009, down from the 8.88 percent recorded in 2008. Net income per share during the first quarter of 2009 totaled \$0.83, compared to \$3.10 during the first quarter of 2008.

The \$23.7 million or 73.2 percent earnings decrease resulted primarily from the adverse impact of economic weakness and financial market disruptions which in turn caused the following unfavorable variances:

\$12.1 million or 14.5 percent reduction in noninterest income;

\$10.7 million or 7.3 percent increase in noninterest expense;

\$8.6 million or 85.0 percent increase in provision for credit losses

\$6.8 million or 5.5 percent reduction in net interest income;

**INTEREST-EARNING ASSETS**

Interest-earning assets include loans and leases, investment securities and overnight investments, all of which reflect varying interest rates based on the risk level and repricing characteristics of the underlying asset. Riskier investments typically carry a higher interest rate, but expose us to potentially increased levels of default.

We have historically focused on maintaining high asset quality, which results in a loan and lease portfolio subjected to strenuous underwriting and monitoring procedures. That focus on asset quality also influences the composition of our investment securities portfolio. At March 31, 2009, United States Treasury and government agency securities represent 90.2 percent of our investment securities portfolio; corporate bonds issued under the FDIC's Treasury Liquidity Guaranty Program represent 6.2 percent; and mortgage-backed securities represent 3.0 percent of the total portfolio. Overnight investments are selectively made with other financial institutions that are within our risk tolerance.

<b>Net loans and leases</b>	<b>\$ 11,459,762</b>	<b>\$ 11,561,716</b>	<b>\$ 11,474,689</b>	<b>\$ 11,168,622</b>	<b>\$ 10,888,346</b>

Changes in our interest-earning assets reflect the impact of liquidity generated by deposits and short-term borrowings, the majority of which arises from various treasury services products. The size of the investment securities portfolio changes principally based on trends among loans and leases, deposits and short-term borrowings. When inflows arising from deposit and treasury services products exceed loan and lease demand, we invest excess funds in the securities portfolio. Conversely, when loan demand exceeds growth in deposits and short-term borrowings, we allow overnight investments to decline and use proceeds from maturing securities to fund loan demand.

During the first quarter of 2009, interest-earning assets averaged \$15.37 billion, an increase of \$721.4 million or 4.9 percent from the first quarter of 2008. This increase primarily reflects growth in the loan and lease portfolio.

Loans and leases. At March 31, 2009 and 2008, loans and leases totaled \$11.62 billion and \$11.03 billion, respectively. The \$591.4 million or 5.4 percent growth from March 31, 2008 to March 31, 2009 resulted from growth within the commercial mortgage, revolving mortgage and commercial and industrial loan portfolios. Total loans and leases declined by \$98.0 million during the first quarter of 2009 versus December 31, 2008 as a result of soft demand for credit.

Commercial real estate loans totaled \$4.34 billion at March 31, 2009, representing 37.3 percent of total loans and leases. This balance represents an increase of \$282.6 million or 7.0 percent since March 31, 2008. Demand for loans secured by owner-occupied medical and professional facilities remained reasonably strong through December 31, 2008, but weakened during the first quarter of 2009. These loans are underwritten based primarily upon the cash flow from the operation of the business rather than the value of the real estate collateral.

At March 31, 2009, revolving mortgage loans totaled \$1.98 billion, representing 17.1 percent of total loans outstanding, an increase of \$463.1 million or 30.4 percent compared to March 31, 2008, resulting from robust origination of new credit lines during 2008 and attractive rates stimulating line utilization.

Commercial and industrial loans equaled \$1.86 billion or 16.0 percent of total loans and leases outstanding. These loans have increased \$135.2 million or 7.8 percent since March 31, 2008. Customer demand and expansion markets supported the growth of these loans throughout 2008.

## Table of Contents

Construction and land development loans totaled \$735.6 million or 6.3 percent of total loans at March 31, 2009, a decrease of \$82.2 million or 10.1 percent since March 31, 2008. Of the \$735.6 million outstanding as of March 31, 2009, \$97.1 million was in the Atlanta, Georgia and southwest Florida markets. Both of these market areas experienced significant reductions in real estate values during 2008. The majority of the remaining \$638.6 million of construction and land development loans are in North Carolina and Virginia where real estate values have declined more modestly.

Consumer loans totaled \$1.13 billion at March 31, 2009, down \$176.2 million or 13.5 percent from March 31, 2008. This decline results from our decision during 2008 to discontinue originations of sales finance loans through our dealer network.

Due to the generally weak demand for loans and widespread customer desire to deleverage, our projections for 2009 anticipate modest change in our loan portfolio. Loan projections are subject to change due to further economic deterioration or improvement and other external factors.

Investment securities. Investment securities available for sale equaled \$3.32 billion at March 31, 2009, compared to \$3.16 billion at March 31, 2008. The \$159.3 million or 5.0 percent increase resulted from growth in deposits and borrowings that was not absorbed by loan and lease growth. Available-for-sale securities are reported at their aggregate fair value, and unrealized gains and losses are included as a component of other comprehensive income, net of deferred taxes. Investment securities held to maturity totaled \$5.7 million at March 31, 2009, compared to \$7.2 million at March 31, 2008. Securities that are classified as held to maturity reflect BancShares' ability and positive intent to hold those investments until maturity.

Income on interest-earning assets. Interest income amounted to \$179.7 million during the first quarter of 2009, a \$37.3 million or 17.2 percent decrease from the first quarter of 2008. During the first quarter of 2009, the impact of lower asset yields more than offset the impact of balance sheet growth when compared to the same period of 2008. The taxable-equivalent yield on interest-earning assets equaled 4.76 percent for the first quarter of 2009, compared to 6.00 percent for the corresponding period of 2008.

Loan and lease interest income for the first quarter of 2009 equaled \$156.6 million, a decrease of \$20.6 million from the first quarter of 2008, the combined result of lower yields offset by favorable growth in average loan and lease balances. The taxable-equivalent yield was 5.45 percent during the first quarter of 2009, a 106 basis point reduction from the same period of 2008. The reduced yield resulted from new loans and leases originated at current market rates and repricing of outstanding variable-rate loans. Average loans and leases increased \$698.2 million or 6.4 percent from 2008 to 2009.

Interest income earned on the investment securities portfolio amounted to \$22.8 million during the first quarter of 2009 and \$35.7 million during the same period of 2008, a decrease of \$12.8 million or 35.9 percent. This decrease in income is the result of higher average volume more than offset by the impact of lower yields, caused by extraordinarily low market interest rates for all investment securities as well as our decision in 2008 to invest all available liquidity solely in U.S. Treasury securities. The taxable-equivalent yield declined 177 basis points from 4.72 percent in the first quarter of 2008 to 2.95 percent in the first quarter of 2009. Average investment securities increased \$102.5 million from \$3.14 billion during the first quarter of 2008 to \$3.25 billion during the first quarter of 2009. Due to continuing historically low interest rates, we anticipate the yield on investment securities will decline further during the remainder of 2009.

Interest income from overnight investments amounted to \$225,000 during the first quarter of 2009, a decrease of \$3.9 million from the \$4.1 million earned during the first quarter of 2008, the result of a 281 basis point yield reduction.

Average maturity assumes callable securities mature on their earliest call date; yields are based on amortized cost; yields related to securities that are exempt from federal and/or state income taxes are stated on a taxable-equivalent basis assuming statutory rates of 35.0% for federal income tax purposes and 6.9% for state income taxes for all periods.

---

**Table of Contents**

**INTEREST-BEARING LIABILITIES**

Interest-bearing liabilities include interest-bearing deposits as well as short-term borrowings and long-term obligations. Deposits represent our primary funding source, although we also utilize non-deposit borrowings to stabilize our liquidity base and to fulfill commercial customer demand for treasury services. Certain of our long-term borrowings currently qualify as capital under guidelines established by the Federal Reserve and other banking regulators.

Deposits. At March 31, 2009, total deposits equaled \$14.23 billion, an increase of \$1.00 billion or 7.6 percent over March 31, 2008 caused by a surge in the domestic savings rate, a flight to high quality banks and a desire by customers to seek safety from uncertain investment instruments. Average interest-bearing deposits were \$11.21 billion during the first quarter of 2009, an increase of \$693.9 million or 6.6 percent from the first quarter of 2008. Average money market accounts increased \$590.2 million or 19.3 percent from the first quarter of 2008 to the same period of 2009, as customers held available liquidity in flexible deposit accounts. During the first quarter of 2009, time deposits averaged \$5.55 billion, nearly unchanged from the first quarter of 2008.

Due to the ongoing industry-wide liquidity challenges that intensified during 2008 and our historic focus on maintaining a liquid balance sheet, we continue to focus on deposit attraction and retention as a key business objective. Our ability to satisfy customer loan demand could be constrained unless we are able to continue to generate new deposits at a reasonable cost.

Short-term borrowings At March 31, 2009, short-term borrowings totaled \$641.9 million compared to \$1.27 billion at March 31, 2008. For the quarters ended March 31, 2009 and 2008, short-term borrowings averaged \$656.6 million and \$1.32 billion, respectively. The \$663.9 million or 50.3 percent reduction in average short-term borrowings was the result of significantly reduced customer demand for treasury services due to very low market interest rates.

Long-term obligations. Long-term obligations equaled \$733.1 million at March 31, 2009, up \$123.7 million from March 31, 2008, the result of incremental long-term borrowings from the Federal Home Loan Bank of Atlanta originated during 2008.

Expense on interest-bearing liabilities. Interest expense amounted to \$63.8 million during the first quarter of 2009, a \$31.0 million or 32.7 percent decrease from the first quarter of 2008. The lower interest expense was the net result of lower rates and higher average volume. The rate on average interest-bearing liabilities equaled 2.06 percent during the first quarter of 2009, a 104 basis point decrease from the first quarter of 2008. Average interest-bearing liabilities increased \$287.3 million or 2.3 percent from first quarter of 2008 to the first quarter of 2009.

**NET INTEREST INCOME**

Net interest income totaled \$115.8 million during the first quarter of 2009, a decrease of \$6.3 million or 5.1 percent from the first quarter of 2008. The taxable-equivalent net yield on interest-earning assets equaled 3.09 percent for the first quarter of 2009, down 31 basis points from the 3.40 percent recorded for the first quarter of 2008. On a linked quarter basis, the taxable-equivalent net yield for the first quarter of 2009 declined by 19 basis points. Increased balance sheet liquidity arising from the material influx of deposits, rapid yield reductions of our investment securities portfolio, downward rate adjustments to the Equity Line portfolio, and the extremely low level of interest rates on deposits and borrowing products contributed to the net yield decline.

A net short-term liability-sensitive balance sheet such as that maintained by BancShares would typically provide improved net interest income following reductions in interest rates such as those implemented by the Federal Reserve during 2008. However, the inability to adjust deposit rates despite the reductions we are experiencing in the yield on interest-earning assets have caused serious compression in our net yield on interest-earning assets.

Average loan and lease balances include nonaccrual loans and leases. Yields related to loans, leases and securities exempt from both federal and state income taxes, federal income taxes only, or state income taxes only are stated on a taxable-equivalent basis assuming a statutory federal income tax rate of 35% and state income tax rate of 6.90% for each period.

The taxable-equivalent adjustment was \$1,420 for 2009 and \$1,853 for 2008.

---

**Table of Contents**

**NONINTEREST INCOME**

Growth of noninterest income is essential to our ability to sustain adequate profitability levels. The primary sources of noninterest income are cardholder and merchant services income, service charges on deposit accounts, revenues derived from wealth management services and fees from processing services. We also recorded a significant securities gain in 2008.

During the first three months of 2009, noninterest income amounted to \$71.5 million, compared to \$84.2 million during the same period of 2008. Of the \$12.6 million or 15.0 percent decrease in noninterest income, \$8.1 million resulted from a first quarter 2008 securities gain recognized in conjunction with our investment in Visa, Inc. Noninterest income reductions were also recorded in cardholder and merchant services income, service charges on deposit accounts and fees from wealth management services, all of which were substantially driven by the slowdown in the economy.

Cardholder and merchant services generated \$21.5 million during the first quarter of 2009, a decrease of \$1.6 million or 6.8 percent compared to the first quarter of 2008. This decrease resulted from a reduction in the number of transactions processed that resulted in lower merchant discount and cardholder interchange income. The transaction volume shrinkage is primarily due to weakness in consumer spending.

Service charges on deposit accounts generated \$17.9 million and \$20.0 million for the first quarter of 2009 and 2008, respectively. The \$2.1 million or 10.7 percent decrease was caused by lower retail service charge income due to continued growth of free checking products and reduced levels of bad check charges.

Fees from wealth management services amounted to \$10.8 million during the first quarter of 2009, compared to \$13.2 million during the first quarter of 2008. The \$2.4 million or 18.3 percent decrease was due to reduced fees arising from lower asset values and a decline in transactions in our broker-dealer operation.

Mortgage income increased from \$2.0 million in the first three months of 2008 to \$3.5 million in the first three months of 2009. This \$1.5 million or 73.5 percent increase was the result of higher servicing income and loan originations due principally to high loan refinance activity.

Fees from processing services, which relate to check processing and other industry-specific services provided to other financial institutions, increased \$597,000 or 6.8 percent from \$8.8 million in the first quarter of 2008 to \$9.4 million in the first quarter of 2009. This higher revenue was the combined result of continued growth in business volumes generated by client banks and additional customers.

**NONINTEREST EXPENSE**

The primary components of noninterest expense are salaries and related employee benefits, occupancy costs for branch offices and support facilities, and equipment and software costs related to branch offices and technology. Noninterest expense equaled \$156.3 million for the first three months of 2009, a \$10.7 million or 7.3 percent increase over the \$145.6 million recorded during the same period of 2008.

Salaries and wages increased \$2.8 million or 4.4 percent during the first quarter of 2009 when compared to the same period of 2008. The increase resulted from 2008 merit increases, headcount growth in expansion markets and various support areas and higher mortgage incentives. Employee benefits expense totaled \$17.3 million for the first three months of 2009, a decrease of \$864,000. The 4.8 percent decrease is the net impact of lower executive retirement costs and higher health and pension costs.

Equipment expense increased \$763,000 or 5.5 percent for 2009 caused primarily by higher software-related costs.

Other expenses increased \$8.0 million or 22.6 percent during the first quarter of 2009 when compared to the first quarter of 2008, which included a \$3.3 million credit resulting from the reversal of an accrual established during 2007 for litigation matters resulting from our Visa member bank status. Also contributing to the current year increase were \$3.5 million in higher FDIC insurance premiums, an increase of \$1.4 million in foreclosure-related expenses, and higher non-credit losses of \$1.1 million. Cost reductions were noted in travel, education, customer entertainment, consulting and sponsorships as we endeavored to reduce discretionary costs where possible.

**Table of Contents****INCOME TAXES**

BancShares continually monitors and evaluates the potential impact of current events on the estimates used to establish income tax expenses and income tax liabilities. On a periodic basis, we evaluate our income tax positions based on current tax law, positions taken by various tax auditors within the jurisdictions that BancShares is required to file income tax returns as well as potential or pending audits or assessments by such tax auditors.

Income tax expense amounted to \$3.6 million during the three months ended March 31, 2009, compared to \$18.1 million during the same period of 2008. The 80.0 percent decrease in income tax expense was the direct result of the significant drop in pre-tax earnings. The effective tax rates for these periods equaled 29.5 percent and 35.9 percent, respectively. During 2009, the favorable impact of various permanent differences remained largely unchanged while pretax income declined, resulting in a reduction in the effective tax rate.

**Capital Adequacy**

	Actual		Minimum requirement		Well-capitalized requirement	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
	(dollars in thousands)					
<i>March 31, 2009</i>						
Tier 1 risk-based capital	\$ 1,655,957	13.29%	\$ 498,517	4.00%	\$ 623,146	5.00%
Total risk-based capital	1,940,062	15.57%	997,034	8.00%	1,246,292	10.00%

Tier 1 leverage capital	1,587,221	9.80%	486,017	3.00%	972,033	6.00%

**SHAREHOLDERS EQUITY AND CAPITAL ADEQUACY**

We continually monitor the capital levels and ratios for BancShares and the subsidiary banks to ensure that they comfortably exceed the minimum requirements imposed by their respective regulatory authorities and to ensure that the subsidiary banks' capital is appropriate given each bank's growth projection and risk profile. Failure to meet certain capital requirements may result in actions by regulatory agencies that could have a material effect on the financial statements. Table 5 provides information on capital adequacy for BancShares as of March 31, 2009 and 2008.

BancShares continues to exceed minimum capital standards and the banking subsidiaries remain well-capitalized. Due to the adequacy of our capital levels, we did not apply for TARP funding under the TARP Capital Purchase Program. The sustained growth and operating losses of ISB has required BancShares to infuse significant amounts of capital into ISB to support its expanding balance sheet. Since ISB was formed in 1997, BancShares has provided \$359.3 million in capital. BancShares' prospective capacity to provide capital to support the future growth and expansion of ISB is highly dependent upon FCB's ability to return capital through dividends to BancShares. Dividends from FCB to BancShares provide the sole source for capital infusions into ISB. These dividends also fund BancShares' payment of shareholder dividends and interest payments on a portion of its long-term obligations.

---

**Table of Contents**

**RISK MANAGEMENT**

In the normal course of business, BancShares is exposed to various risks. To manage the major risks that are inherent in the operation of a financial holding company and to provide reasonable assurance that our long-term business objectives will be attained, various policies and risk management processes identify, monitor and manage risk within acceptable tolerances. Management continually refines and enhances its risk management policies and procedures to maintain effective risk management programs and processes.

The most prominent risk exposures are credit, interest rate and liquidity risk. Credit risk is the risk of not collecting the amount of a loan or investment when it is contractually due. Interest rate risk is the potential reduction of net interest income as a result of changes in market interest rates. Liquidity risk is the possible inability to fund obligations to depositors, creditors, investors or borrowers.

*Credit risk.* BancShares manages and monitors extensions of credit and the quality of the loan and lease portfolio through rigorous initial underwriting processes and periodic ongoing reviews. Underwriting standards reflect credit policies and procedures through our highly centralized credit decision process. We maintain a credit review function that conducts independent risk reviews and analyses for the purpose of ensuring compliance with credit policies and to monitor asset quality trends. The independent risk reviews include portfolio analysis by geographic location and horizontal reviews across industry sectors within the banking subsidiaries. We strive to identify potential credit problems as early as possible, to take charge-offs or write-downs as appropriate and to maintain adequate allowances for credit losses that are inherent in the loan and lease portfolio. The maintenance of excellent asset quality is one of our key performance measures.

We maintain a well-diversified loan and lease portfolio and seek to avoid the risk associated with large concentrations within specific geographic areas or industries. Our continuing expansion has allowed us to mitigate our historic exposure to geographic risk concentration in North Carolina and Virginia.

We have historically carried a significant concentration of real estate-secured loans, although our underwriting policies principally rely on adequate borrower cash flow rather than underlying collateral values. When we do rely on underlying real property values, we favor financing secured by owner-occupied real property and as a result a large percentage of our real-estate secured loans are owner-occupied. At March 31, 2009, loans secured by real estate totaled \$8.20 billion or 70.5 percent of total loans and leases compared to \$7.57 billion or 68.6 percent at March 31, 2008.

In recent years, we have sought opportunities to provide financial services to businesses associated with and professionals within the medical community. Due to strong loan growth within this industry, our loans and leases to borrowers in medical, dental or related fields totaled \$2.78 billion as of March 31, 2009, which represents 23.9 percent of loans and leases outstanding, compared to \$2.36 billion or 21.4 percent of loans and leases at March 31, 2008. No other industry represented more than 10 percent of total loans and leases outstanding at March 31, 2009.

Nonperforming assets include nonaccrual loans and leases, other real estate and restructured loans. At March 31, 2009, BancShares nonperforming assets amounted to \$98.8 million or 0.85 percent of loans and leases plus foreclosed properties, compared to \$43.2 million or 0.39 percent at March 31, 2008.

The \$55.5 million surge in nonperforming assets was primarily due to deterioration of our residential construction loans located in the counties surrounding Atlanta, Georgia, and in southwest Florida. Both markets have experienced significant over-development that has resulted in extremely weak sales of new residential units and significant declines in property values. As of March 31, 2009, \$22.0 million and \$34.2 million of other real estate and nonaccrual loans, respectively, relate to the Atlanta, Georgia and southwest Florida markets. All of the \$3.1 million of restructured loans relate to these markets. Thus, \$56.2 million of the \$98.8 million total nonperforming assets arose from the residential construction loan portfolio in Atlanta, Georgia and southwest Florida.

Our exposure to subprime loans is limited to programs we initiated to provide financing for affordable housing in connection with our ongoing efforts to comply with the Community Reinvestment Act. The carrying value of these loans as of March 31, 2009 was \$3.7 million.

Accruing loans and leases 90 days or more past due	\$ 20,327	\$ 22,459	\$ 20,902	\$ 10,885	\$ 7,569
<b>Ratios</b>					
Net charge-offs (annualized) to average total loans and leases	0.49%	0.63%	0.40%	0.38%	0.19
Percent of loans and leases at period-end:					
Allowance for loan and lease losses	1.39	1.34	1.32	1.28	1.28
Reserve for unfunded commitments	0.07	0.06	0.07	0.07	0.07
Allowance for credit losses	1.46	1.41	1.38	1.34	1.35
Nonperforming assets to total loans and leases plus other real estate	0.85	0.61	0.53	0.42	0.39

Residential construction loans in these markets as of March 31, 2009 equaled \$97.1 million. Of that total, \$34.2 million are currently classified as nonperforming, and \$51.7 million were identified as potential problem loans due to concerns about borrowers' abilities to comply with existing loan repayment terms. We continue to closely monitor past due and problem accounts to identify any loans and leases that should be classified as impaired or non-accrual.

## **Table of Contents**

At March 31, 2009, the allowance for credit losses totaled \$169.5 million or 1.46 percent of total loans and leases, up \$20.4 million from March 31, 2008 when the coverage ratio equaled 1.35 percent. The allowance for credit losses includes the allowance for loan and lease losses and the reserve for unfunded commitments. We continuously analyze the growth and risk characteristics of the loan and lease portfolio under current economic conditions in order to evaluate the adequacy of the allowance. Such factors as the financial condition of borrowers, fair market value of collateral and other considerations are recognized in estimating probable credit losses.

Management considers the allowance adequate to absorb estimated probable losses that relate to loans and leases outstanding at March 31, 2009, although future additions may be necessary based on changes in economic conditions and other factors. In addition, various regulatory agencies, as an integral part of their examination process, periodically review the allowance for credit losses. Such agencies may require adjustments to the allowance based on information available to them at the time of their examination.

The provision for credit losses recorded during the first quarter of 2009 equaled \$18.7 million, compared to \$10.1 million during the first quarter of 2008. The \$8.6 million increase resulted from higher net charge-offs and provisions in the residential construction loan portfolio as well as certain consumer loan portfolios. Net charge-offs during the first quarter of 2009 equaled \$14.0 million compared to \$5.3 million during the first quarter of 2008. Charge-offs increased in all loan categories, including a \$2.2 million increase in charge-offs on residential construction loans and a \$1.3 million increase in charge-offs related to unsecured revolving loans. On an annualized basis, net charge-offs represent 0.49 percent of average loans and leases during the first quarter of 2009 compared to 0.19 percent in the first quarter of 2008.

*Interest rate risk.* Interest rate risk results principally from assets and liabilities maturing or repricing at different points in time, from assets and liabilities repricing at the same point in time but in different amounts and from short-term and long-term interest rates changing in different magnitudes, an event frequently described by the resulting impact on the shape of the yield curve. Market interest rates also have an impact on the interest rate and repricing characteristics of loans and leases that are originated as well as the rate characteristics of our interest-bearing liabilities.

During 2006, we entered into an interest rate swap to synthetically convert the variable rate on \$115.0 million of trust preferred capital securities to a fixed rate of 7.125 percent for a period of five years.

We assess our interest rate risk by simulating future amounts of net interest income under various interest rate scenarios and comparing those results to forecasted net interest income assuming stable rates. These simulations indicate that net interest income will vary by no more than 3 percent when interest rates rise or decline by 200 basis points. We also utilize the market value of equity as a tool in measuring and managing interest rate risk. The market value of equity is estimated to range from 6.4 percent to 8.3 percent when interest rates move 200 basis points in either direction.

*Liquidity risk.* Liquidity risk results from the mismatching of asset and liability cash flows and the potential inability to secure adequate amounts of funding from traditional sources of liquidity. BancShares manages this risk by structuring its balance sheet prudently and by maintaining various borrowing resources to fund potential cash needs. BancShares has historically maintained a strong focus on liquidity, and we have traditionally relied on our deposit base as our primary liquidity source. Short-term borrowings resulting from commercial treasury customers have also emerged as an important source of liquidity in recent years, although some of those borrowings must be collateralized thereby potentially restricting the use of the resulting liquidity. Through our deposit and treasury services pricing strategies, we have the ability to stimulate or curtail liability growth.

We attribute growth in deposits during 2009 and 2008 to a surge in the domestic savings rate, a flight to high quality banks such as BancShares, and a desire by customers to seek safety from uncertain investment instruments. While deposits have continued to grow despite falling interest rates, lower rates have caused a significant reduction in the balances of master notes and overnight repurchase obligations.

---

**Table of Contents**

We utilize borrowings from the Federal Home Loan Bank of Atlanta as an alternative source of liquidity, and to assist in matching the maturities of longer dated interest-earning assets. At March 31, 2009, we had sufficient collateral pledged to provide access to \$1.25 billion of additional borrowings. Additionally, we maintain federal funds lines of credit and other borrowing facilities. At March 31, 2009, BancShares had access to \$500.0 million in unsecured borrowings through its various sources.

Once we have satisfied our loan demand and other funding needs, residual liquidity is invested in overnight investments and investment securities available for sale. Net of amounts pledged for various purposes, the amount of such immediately available balance sheet liquidity amounted to \$1.86 billion at March 31, 2009 compared to \$813 million at March 31, 2008.

**SEGMENT REPORTING**

BancShares conducts its banking operations through its two banking subsidiaries, FCB and ISB. Although FCB and ISB offer similar products and services to customers, each entity operates in distinct geographic markets and has separate management groups. We monitor growth and financial results in these institutions separately and, within each institution, by geographic segregation.

Although FCB has grown through acquisition in certain of its markets, throughout its history the majority of its expansion has been accomplished on a de novo basis. Because of its size, the costs associated with FCB's current rate of expansion are not material to its financial performance. Since ISB began operation in 1997, it has followed a similar business model for growth and expansion. However, due to the rapid pace of its growth and the number of branch offices that have not attained sufficient size to achieve profitability, the financial results and trends of ISB have been significantly affected by its growth and expansion. Each new market ISB enters creates additional operating costs that are typically not fully offset by operating revenues until three to four years of operation. Losses incurred since ISB's inception total \$70.3 million, due not only to the rapid rate of expansion but also to large credit costs incurred during the last several years.

IronStone Bank. At March 31, 2009, ISB operated 55 facilities in twelve states. ISB's total assets equaled \$2.64 billion at March 31, 2009 compared to \$2.66 billion at March 31, 2008, a decrease of \$17.5 million or 0.7 percent. ISB recorded a net loss of \$6.7 million during the first quarter of 2009, compared to net loss of \$4.6 million during the same period of 2008. This represents an unfavorable variance of \$2.1 million. We expect ISB will operate at a loss throughout 2009.

Net interest income increased \$1.7 million during the first quarter of 2009, the result of an improved net yield on interest-earning assets. The provision for credit losses increased \$3.4 million during the first quarter of 2009 due to higher net charge-offs and provisions in the residential construction loan portfolio. Net charge-offs increased from \$1.8 million in the first quarter of 2008 to \$6.1 million in the first quarter of 2009. On an annualized basis, the ratio of current quarter net charge-offs to average loans and leases outstanding equaled 1.12 percent, compared to 0.34 percent in the prior year.

ISB's noninterest income decreased \$53,000 or 1.6 percent during the first quarter of 2009. Noninterest expense increased \$1.5 million or 7.1 percent during the first quarter of 2009, versus the same period of 2008. Salary expense decreased \$137,000 or 1.5 percent due to workforce reductions. Occupancy expense was also down by \$158,000 or 3.9 percent due to three branches that were closed during the fourth quarter of 2008. Other expense equaled \$7.7 million during the first quarter of 2009 compared to \$5.8 million during the first quarter of 2008 primarily due to higher foreclosure-related expenses and FDIC insurance expense.

First-Citizens Bank & Trust Company. At March 31, 2009, FCB operated 347 branches in five states. FCB's total assets increased from \$13.93 billion at March 31, 2008 to \$14.41 billion at March 31, 2009, an increase of \$476.6 million or 3.4 percent. FCB recorded net income of \$18.0 million during the first quarter of 2009 compared to \$39.1 million during the same period of 2008. This represents a \$21.2 million or 54.1 percent decrease in net income caused by reduced net interest and noninterest income and higher provision for credit losses and noninterest expense. FCB's net interest income decreased \$7.2 million or 6.6 percent during 2009, due to a lower net yield on interest-earning assets.

---

## **Table of Contents**

The provision for credit losses increased \$5.2 million due to higher net charge offs, which increased by \$4.4 million. FCB's ratio of net charge-offs to average loans and leases equaled 0.34 percent for the first quarter of 2009 compared to 0.16 percent for the same period of 2008. FCB's noninterest income decreased \$12.6 million or 15.1 percent during the first quarter of 2009, primarily the result of the nonrecurring gain from the sale of stock recorded last year. Reductions were noted in wealth advisory services, deposit service charges and cardholder and merchant service income. Improvements were noted in fees from processing services, ATM income and mortgage income. Noninterest expense increased \$9.3 million or 7.4 percent during 2009, caused principally by higher personnel, equipment and FDIC insurance expense.

## **GOODWILL IMPAIRMENT**

Under the provisions of Statement of Financial Accounting Standards No. 142 Goodwill and Other Intangible Assets (Statement 142), we are required to perform an impairment test each year to determine if goodwill is impaired. Since we adopted Statement 142, the annual impairment tests, which we conduct as of July 31 each year, have not indicated impairment exists.

Statement 142 also requires goodwill be tested for impairment as a result of certain other events including significant adverse change in the business climate and the loss of key personnel. Due to the significant economic problems that began in 2008 and have continued into 2009 and the retirement of our former Chairman of the Board, Lewis R. Holding, we performed an impairment test of our goodwill during the first quarter of 2009.

Statement 142 provides a two-step method to evaluate and calculate impairment. Step one requires estimation of each reporting unit's fair value. If the fair value exceeds the carrying value, no further testing is required. If the carrying value exceeds the fair value, we are required to determine whether an impairment must be recorded and, if so, the amount of the impairment charge.

Based on the results of step one testing, there was no evidence of impairment for FCB's \$101.8 million of goodwill; however, the test indicated that an impairment of ISB's \$793,000 goodwill was possible. The evaluation of ISB impairment performed in step two included the preparation of a balance sheet for ISB at fair value to determine whether there was implied impairment of ISB's goodwill. Based on the first quarter fair value estimates, the carrying value of ISB goodwill was not impaired. Therefore, no impairment of goodwill was recorded during the first quarter of 2009.

As of March 31, 2009, the market price of our common stock continued to trade below book value. If this situation persists or worsens, subsequent goodwill impairment tests may indicate that impairment exists. A write-off of impaired goodwill could have a significant impact on our consolidated income statement.

## **LEGAL PROCEEDINGS**

On May 24, 2004, FCB filed a lawsuit in the Circuit Court of Greenbrier County, West Virginia against a customer alleging default under a master lease on a piece of equipment, eight promissory notes and two leases. The borrower asserted a counterclaim against FCB alleging breach of lease, breach of fiduciary duty, breach of duty of good faith and fair dealing, and tortious interference with contractual relations. At trial, a jury returned a verdict against FCB and awarded a \$4.1 million judgment in favor of FCB's customer. If the jury verdict stands, the customer will be entitled to pre-judgment interest of approximately \$1.0 million and post-judgment interest at a rate of 8.25 percent. FCB filed a motion to set aside the judgment or, in the alternative, for a new trial, but the Court denied FCB's motion. FCB is appealing the Court's action to the West Virginia Supreme Court of Appeals. FCB has posted an acceptable bond and execution of the judgment is stayed pending the outcome of the appeal. FCB strenuously denies liability and is vigorously pursuing appeal of the jury's award.

BancShares and various subsidiaries have been named as defendants in various other legal actions arising from our normal business activities in which damages in various amounts are claimed. Although the amount of any ultimate liability with respect to those other matters cannot be determined, in the opinion of management, any such liability will not have a material effect on BancShares' consolidated financial statements.

### **CURRENT ACCOUNTING AND REGULATORY ISSUES**

In March 2008, the FASB issued SFAS No. 161 *Disclosures about Derivative Instruments and Hedging Activities* (Statement 161). Statement 161 requires enhanced disclosures about how and why derivative instruments are used, how derivative instruments and related hedged items are accounted for under Statement 133 and how derivative instruments and related hedged items affect the balance sheet, income statement and statement of cash flows. Statement 161, which we adopted on January 1, 2009, resulted in expanded disclosures but had no material impact on financial condition, results of operations or liquidity.

Three FASB Staff Positions (FSPs) have been issued that are effective June 30, 2009 for BancShares. FSP FAS 107-1 and APB 28-1 *Interim Disclosures about Fair Value of Financial Instruments* requires fair value disclosures about financial instruments in interim financial statements as well as disclosures about estimation methods and disclosure of changes in method from prior periods. FSP FAS 115-2 and FAS 124-2 *Recognition and Presentation of Other-Than-Temporary Impairments* (OTTI FSP) creates a new model for evaluating OTTI in debt securities. The OTTI FSP requires an entity to record an OTTI charge if it intends to sell a debt instrument or if it can not assert it is more likely than not that it will not have to sell the security before recovery. If the entity does not intend to sell the security but does not expect to recover the amortized cost basis, the amount of the impairment that results from issuer credit will be reported in earnings and the remaining impairment related to liquidity will be reflected in other comprehensive income. FSP FAS 157-4 *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly* requires companies, as they are estimating fair values for assets and liabilities that are subject to fair value measurement, to consider various factors to determine whether there has been a significant decrease in the volume and level of activity compared to normal market activity and to consider whether an observed transaction was not orderly based on the weight of available evidence. Implementation of the three FSPs is not expected to have a material impact on the consolidated financial statements.

In response to the challenges facing the financial services sector, several regulatory and governmental actions have been enacted including The Emergency Economic Stabilization Act, the TARP Capital Purchase Program and the Temporary Liquidity Guarantee Program (TLGP). Based on the expectation that our current capital levels will be adequate to sustain our growth for the foreseeable future, we did not apply to participate in the TARP Capital Purchase Program. Further, we waived the right to participate in the TLGP guarantee of unsecured debt. However, we did elect to participate in the TLGP's enhanced deposit insurance program.

Although it is likely that further regulatory actions will arise as the Federal government attempts to address the economic situation, management is not aware of any further recommendations by regulatory authorities that, if implemented, would have or would be reasonably likely to have a material effect on liquidity, capital ratios or results of operations.

**FORWARD-LOOKING STATEMENTS**

Statements in this Report and exhibits relating to plans, strategies, economic performance and trends, projections of results of specific activities or investments, expectations or beliefs about future events or results, and other statements that are not descriptions of historical facts, may be forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934.

Forward-looking information is inherently subject to risks and uncertainties, and actual results could differ materially from those currently anticipated due to a number of factors, which include, but are not limited to, factors discussed in our Annual Report on Form 10-K and in other documents filed by us from time to time with the Securities and Exchange Commission.

Forward-looking statements may be identified by terms such as may, will, should, could, expects, plans, intends, anticipates, believe, predicts, forecasts, projects, potential or continue, or similar terms or the negative of these terms, or other statements concerning opinions or judgments of BancShares management about future events.

Factors that could influence the accuracy of those forward-looking statements include, but are not limited to, the financial success or changing strategies of our customers, customer acceptance of our services, products and fee structure, the competitive nature of the financial services industry, our ability to compete effectively against other financial institutions in our banking markets, actions of government regulators, the level of market interest rates and our ability to manage our interest rate risk, changes in general economic conditions that affect our loan and lease portfolio, the abilities of our borrowers to repay their loans and leases, the values of real estate and other collateral, and other developments or changes in our business that we do not expect.

Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements. We have no obligation to update these forward-looking statements.

**Table of Contents**

**Item 3. Quantitative and Qualitative Disclosures about Market Risk**

Market risk is the potential economic loss resulting from changes in market prices and interest rates. This risk can either result in diminished current fair values of financial instruments or reduced net interest income in future periods. As of March 31, 2009, BancShares' market risk profile has not changed significantly from December 31, 2008. Changes in fair value that result from movement in market rates cannot be predicted with any degree of certainty. Therefore, the impact that future changes in market rates will have on the fair values of financial instruments is uncertain.

**Item 4. Controls and Procedures**

BancShares' management, with the participation of its Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the design and operation of BancShares' disclosure controls and procedures in accordance with Rule 13a-15 of the Securities Exchange Act of 1934 (Exchange Act). Based on their evaluation, the Chief Executive Officer and Chief Financial Officer concluded that, as of the end of the period covered by this report, BancShares' disclosure controls and procedures were effective in enabling it to record, process, summarize and report in a timely manner the information required to be disclosed in reports it files under the Exchange Act.

No change in BancShares' internal control over financial reporting occurred during the first quarter of 2009 that had materially affected, or is reasonably likely to materially affect, BancShares' internal control over financial reporting.

PART II

**Item 1A. Risk Factors**

Certain risk factors that might make an investment in our common stock speculative or risky are discussed in the 2008 Form 10-K in Part I Item 1A and in Part II Item 7 under the caption *Risk Management Credit Risk*.

**Item 6. Exhibits**

- 31.1 Certification of Chief Executive Officer
- 31.2 Certification of Chief Financial Officer
- 32.1 Certifications of Chief Executive Officer
- 32.2 Certifications of Chief Financial Officer
