**Item 7.01 Regulation FD Disclosure.**

Cascade Corporation is scheduled to make a presentation at an investor conference January 12, 2011. The slide show for the presentation is attached to this report as Exhibit 99.1.

Management's presentation includes information regarding recent business activity in the lift truck industry. During the company's Fiscal 2011 third quarter earnings call, management indicated, in response to inquiries, that industry order levels in the fourth quarter were expected to remain consistent with third quarter levels. Management will refer in its presentation to recent information on order rates in certain regional industry segments that suggests its earlier estimates may have been conservative. Management now believes business activity in the fourth quarter may be somewhat higher than in the third quarter. Management cautions that information as to these trends is preliminary and subject to change, that the trends may not continue into the future, and that the company's financial results do not directly correlate with overall industry trends.

**Forward-looking statements**

This report and accompanying slide presentation contain forward-looking statements made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Readers are cautioned that a number of factors could cause our actual results to differ materially from those expressed or implied by forward-looking information. These factors include, among others, factors related to changing demand for materials handling products and construction equipment, the cyclical and uncertain nature of the materials handling and construction equipment industries, general economic conditions, and performance of our manufacturing facilities. Additional considerations and important risk factors are described in our reports on Form 10-K and 10-Q and other filings with the Securities and Exchange Commission.
