Form 10-Q
November 04, 2011

UNITED STATES SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

Form 10-Q

(Mark One)

**QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934**

For the quarterly period ended September 30, 2011

or

**TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934**

For the transition period from _____ to _____

Commission File Number: 001-13251

SLM Corporation

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of

incorporation or organization)

300 Continental Drive, Newark, Delaware

(Address of principal executive offices)

52-2013874

(I.R.S. Employer

Identification No.)

19713

(Zip Code)

(302) 283-8000

Edgar Filing: SLM CORP - Form 10-Q

(Registrant's telephone number, including area code)

(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date:

Class	Outstanding at October 31, 2011
Voting common stock, \$.20 par value	508,736,576 shares

SLM CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Information at September 30, 2011 and for the three and nine months ended

September 30, 2011 and 2010 is unaudited)

(Dollars in millions, except per share amounts, unless otherwise noted)

1. Significant Accounting Policies

Basis of Presentation

The accompanying unaudited, consolidated financial statements of SLM Corporation (we, us, our, or the Company) have been prepared in accordance with generally accepted accounting principles in the United States of America (GAAP) for interim financial information. Accordingly, they do not include all of the information and footnotes required by GAAP for complete consolidated financial statements. The consolidated financial statements include the accounts of SLM Corporation and its majority-owned and controlled subsidiaries and those Variable Interest Entities (VIEs) for which we are the primary beneficiary, after eliminating the effects of intercompany accounts and transactions. In the opinion of management, all adjustments considered necessary for a fair statement of the results for the interim periods have been included. The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Actual results could differ from those estimates. Operating results for the three and nine months ended September 30, 2011 are not necessarily indicative of the results for the year ending December 31, 2011 or for any other period. These unaudited financial statements should be read in conjunction with the audited financial statements and related notes included in our Annual Report on Form 10-K for the year ended December 31, 2010 (the 2010 Form 10-K).

Reclassifications

Certain reclassifications have been made to the balances as of and for the three and nine months ended September 30, 2010 to be consistent with classifications adopted for 2011, and had no effect on net income, total assets, or total liabilities.

Recently Adopted Accounting Standards

Troubled Debt Restructuring

On July 1, 2011, we adopted Accounting Standards Update No. 2011-02, Receivables (Topic 310), A Creditor's Determination of Whether a Restructuring Is a Troubled Debt Restructuring. This new guidance clarifies when a loan restructuring constitutes a troubled debt restructuring (TDR). In applying the new guidance we have determined that certain Private Education Loans for which we have granted forbearance of greater than three months are classified as troubled debt restructurings. If a loan meets the criteria for troubled debt accounting then an allowance for loan loss is established which represents the present value of the expected losses discounted at the loan's previous effective interest rate. This accounting results in a higher allowance for loan losses than our previously established allowance for these loans as our previous allowance for these loans represented an estimate of charge-offs expected to occur over the next two years (two years being our loss confirmation period). The new accounting guidance was effective as of July 1, 2011 but was required to be applied retrospectively to January 1, 2011. This resulted in \$124 million of additional provision for loan losses in the third quarter of 2011 from approximately \$3.8 billion of student loans being classified as troubled debt restructurings. This new accounting guidance is only applied to certain borrowers who use their fourth or greater month of forbearance during the time period this new guidance is effective. This new accounting guidance has the effect of accelerating the recognition of expected losses related to our Private Education Loan portfolio. The increase in the provision for losses as a result of this new accounting guidance does not reflect a decrease in credit expectations of the portfolio or an increase in the expected life of loan losses related to this portfolio. We believe forbearance is an accepted and effective collections and risk management tool for private student loans. We plan to continue to use forbearance and as a result, we expect to have additional loans classified as troubled debt restructurings in the future (see Note 2, Allowance for Loan Losses, for a further discussion).

SLM CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(Information at September 30, 2011 and for the three and nine months ended

September 30, 2011 and 2010 is unaudited)

(Dollars in millions, except per share amounts, unless otherwise noted)

1. Significant Accounting Policies (Continued)

Recently Issued Accounting Standards

Testing Goodwill for Impairment

In September 2011, the FASB issued ASU No. 2011-08, Intangibles – Goodwill and Other (Topic 350), Testing Goodwill for Impairment. The objective of this new guidance is to simplify how we test goodwill for impairment. It does not change the amount of impairment recognized if goodwill is impaired. This new guidance permits us to first assess qualitative factors to determine whether it is more-likely-than-not that the fair value of a reporting unit, which is the same as or one level below a business segment, is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test described in Topic 350. The more-likely-than-not threshold is defined as having a likelihood of more than 50 percent. If this more-likely-than-not threshold is met, then we will complete a quantitative goodwill impairment analysis which consists of a comparison of the fair value of the reporting unit to our carrying value, including goodwill. If the carrying value of the reporting unit exceeds the fair value, a goodwill impairment analysis will be performed to measure the amount of impairment loss, if any.

This new guidance is effective for fiscal years beginning after December 15, 2011. Early adoption is permitted. We perform our annual test in the fourth quarter and intend to adopt the new guidance in the fourth quarter 2011. This new guidance will not have a material impact on our results of operations.

Presentation of Comprehensive Income

In June 2011, the FASB issued ASU No. 2011-05, Comprehensive Income (Topic 220), Presentation of Comprehensive Income. The objective of this new guidance is to improve the comparability, consistency, and transparency of financial reporting and to increase the prominence of items reported in other comprehensive income. The new guidance requires all non-owner changes in stockholders' equity be presented either in a single continuous statement of comprehensive income or in two separate but consecutive statements. The new guidance will be applied retrospectively for fiscal years, and interim periods within those years, beginning after December 15, 2011. As such, this new guidance will be effective for us in the first quarter 2012. The new guidance will not have an impact on our results of operations.

Fair Value Measurement and Disclosure Requirements

In May 2011, the FASB issued ASU No. 2011-04, Fair Value Measurement (Topic 820), Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs. These amendments (1) clarify the FASB's intent about the application of existing fair value measurement and disclosure requirements; and (2) change particular principles or requirements for measuring fair value or for disclosing information about fair value measurements. This new guidance is effective prospectively for interim and annual periods beginning after December 15, 2011 and is not expected to have a material impact on our fair value measurements.

2. Allowance for Loan Losses

Our provisions for loan losses represent the periodic expense of maintaining an allowance sufficient to absorb incurred losses, net of expected recoveries, in the held-for-investment loan portfolios. The evaluation of the provisions for student loan losses is inherently subjective as it

requires material estimates that may be

2. Allowance for Loan Losses (Continued)

susceptible to significant changes. We believe that the allowance for student loan losses is appropriate to cover probable losses incurred in the loan portfolios. We segregate our Private Education Loan portfolio into two classes of loans – traditional and non-traditional. Non-traditional loans are loans to (i) borrowers attending for-profit schools with an original Fair Isaac and Company (FICO) score of less than 670 and (ii) borrowers attending not-for-profit schools with an original FICO score of less than 640. The FICO score used in determining whether a loan is non-traditional is the greater of the borrower or co-borrower FICO score at origination. Traditional loans are defined as all other Private Education Loans that are not classified as non-traditional.

In determining the allowance for loan losses, we estimate the principal amount of loans that will default over the next two years (two years being the expected period between a loss event and default) and how much we will recover over time related to the defaulted amount. In the first quarter of 2011, we implemented a new model to estimate the Private Education Loan default amount. Both the prior model and new model are considered migration models . Our prior allowance model (in place through December 31, 2010) segmented the portfolio into categories of similar risk characteristics based on loan program type, school type, loan status, seasoning, underwriting criteria (credit scores) and the existence or absence of a cosigner using school type, credit scores, cosigner status, loan status and seasoning as the primary risk characteristics. Our new model uses these same primary risk characteristics but also further segments the portfolio by the number of months the loan is in its repayment period (seasoning). While our previous allowance process incorporated the impact of seasoning, the new model more directly incorporates this feature. Another change in the new allowance model relates to the historical period of experience that we use as a starting point for projecting future defaults. Our new model is based upon a seasonal average, adjusted to the most recent three to six months of actual collection experience as the starting point and applies expected macroeconomic changes and collection procedure changes to estimate expected losses caused by loss events incurred as of the balance sheet date. Our previous model primarily used a one year historical default experience period and did not include the ability to directly model an economic expectation or collection procedure change. In addition, the previous allowance process included qualitative adjustments for these factors. Our current model places a greater emphasis on the more recent default experience rather than the default experience for older historical periods, as we believe the recent default experience is more indicative of the probable losses incurred in the loan portfolio today. While the model we use as a part of the allowance for loan losses process changed in the first quarter, the overall process for calculating the appropriate amount of allowance for Private Education Loan loss as disclosed in the 2010 Form 10-K has not changed. We believe that the current model more accurately reflects recent borrower behavior, loan performance, and collection performance, as well as expectations about economic factors. There was no adjustment to our allowance for loan loss upon implementing this new default projection model in the first quarter of 2011.

In the third quarter of 2011, we recorded an additional \$124 million of provision for Private Education Loan losses to reflect the cumulative, year-to-date effect of adopting new accounting rules related to troubled debt restructurings (TDRs). For a complete discussion of the effect of these new rules on our provision for Private Education Loan losses see Note 1, Significant Accounting Policies Recently Adopted Accounting Standards Troubled Debt Restructurings .

In establishing the allowance for Private Education Loan losses for the third-quarter 2011, we considered several additional emerging environmental factors with respect to our Private Education Loan portfolio. In particular, we continue to see improving credit quality and continuing positive delinquency and charge-off trends in connection with this portfolio. Improving credit quality is seen in higher FICO scores and cosigner rates as well as a more seasoned portfolio compared to the year-ago quarter. The overall delinquency rate has declined to

2. Allowance for Loan Losses (Continued)

10.3 percent from 11.1 percent and the charge-off rate has declined to 3.7 percent from 5.4 percent compared to the year-ago quarter.

In contrast to these overall improvements in credit quality, delinquency and charge-off trends, Private Education Loans which defaulted between 2008 and 2011 for which we have previously charged off estimated losses have, to varying degrees, not met our recovery expectations to date and may continue not to do so. According to our policy, we have been charging off these periodic shortfalls in expected recoveries against our allowance for Private Education Loan losses and the related receivable for partially charged-off Private Education Loans and we will continue to do so. Differences in actual future recoveries on these defaulted loans could affect our receivable for partially charged-off Private Education Loans. We have increased our provision for Private Education Loan losses for the third quarter of 2011 in the amount of \$143 million to reflect these uncertainties. Continuing historically high unemployment rates may negatively affect future Private Education Loan default and recovery expectations over our estimated two-year loss confirmation period. Consequently, in accordance with our policy, we have also given consideration to these factors in projecting charge-offs for this period and establishing our allowance for Private Education Loan losses. We will continue to monitor defaults and recoveries in light of the continuing weak economy and high unemployment rates. For a more detailed discussion of our policy for determining the collectability of Private Education Loan and maintaining our allowance for Private Education Loan losses see Note 2, Significant Accounting Policies to our Consolidated Financial Statements contained in our Form 10-K for the fiscal year ended December 31, 2010.

Key Credit Quality Indicators

FFELP Loans are substantially guaranteed as to their principal and accrued interest in the event of default; therefore, the key credit quality indicator for this portfolio is loan status. The impact of changes in loan status is incorporated quarterly into the allowance for loan losses calculation. For Private Education Loans, the key credit quality indicators are school type, FICO scores, the existence of a cosigner, the loan status and loan seasoning. The school type/FICO score are assessed at origination and maintained through the traditional/non-traditional loan designation. The other Private Education Loan key quality indicators can change and are incorporated quarterly into the allowance for loan losses calculation. The following table highlights the principal balance (excluding the receivable for partially charged-off loans) of our Private Education Loan portfolio stratified by the key credit quality indicators.

(Dollars in millions)	Private Education Loans Credit Quality Indicators			
	September 30, 2011		December 31, 2010

Non-traditional loans, net	\$ 3,401		\$ 3,511	
Percentage of non-traditional loans in repayment		73.7%		71.8%
Delinquencies as a percentage of non-traditional loans in repayment		26.6%		27.4%
Loans in forbearance as a percentage of loans in repayment and forbearance		6.7%		6.1%
Loans in repayment greater than 12 months as a percentage of loans in repayment ⁽⁴⁾		62.3%		55.9%

(1) Loans for borrowers who may still be attending school or engaging in other permitted educational activities and are not yet required to make payments on the loans, e.g., residency periods for medical students or a grace period for bar exam preparation.

(2)

Edgar Filing: SLM CORP - Form 10-Q

Loans for borrowers who have requested extension of grace period generally during employment transition or who have temporarily ceased making payments due to hardship or other factors, consistent with established loan program servicing policies and procedures.

(3) The period of delinquency is based on the number of days scheduled payments are contractually past due.

(4) Based on number of months in an active repayment status for which a scheduled monthly payment was due.

Troubled Debt Restructurings

We modify the terms of loans for certain borrowers when we believe such modifications may increase the ability and willingness of a borrower to make payment and thus increase the ultimate overall amount collected on a loan. These modifications generally take the form of a forbearance, a temporary interest rate reduction or an extended repayment plan. For borrowers experiencing financial difficulty, certain Private Education Loans for which we have granted either a forbearance of greater than three months, an interest rate reduction or an extended repayment plan are classified as troubled debt restructurings. Forbearance provides borrowers the ability to defer payments for a period of time, but does not result in the forgiveness of any

(Dollars in millions, except per share amounts, unless otherwise noted)

2. Allowance for Loan Losses (Continued)

principal or interest. While in forbearance status, interest continues to accrue and is capitalized to principal when the loan re-enters repayment status. The recorded investment of loans granted a forbearance that were classified as troubled debt restructurings was \$3.8 billion at September 30, 2011. The recorded investment for troubled debt restructurings from loans granted interest rate reductions or extended repayment plans was \$0.6 billion and \$0.4 billion at September 30, 2011 and 2010, respectively.

At September 30, 2011 and December 31, 2010 all of our troubled debt restructurings loans had a related allowance recorded. The following table provides the recorded investment, unpaid principal balance and related allowance for our troubled debt restructuring loans for the periods ended September 30, 2011 and December 31, 2010.

(Dollars in millions)		Troubled Debt Restructuring Loans		
		Recorded Investment ⁽¹⁾	Unpaid Principal Balance	Related Allowance
September 30, 2011				
Private Education Loans	Traditional	\$ 3,507	\$ 3,552	\$ 435
Private Education Loans	Non-Traditional	925	933	183
Total		\$ 4,432	\$ 4,485	\$ 618

(Dollars in millions, except per share amounts, unless otherwise noted)

3. Borrowings (Continued)

We have \$5.1 billion in Private Education Loan securitization bonds outstanding at September 30, 2011, where we have the ability to call the bonds at a discount to par between the fourth quarter of 2011 and 2014. We have concluded that it is probable we will call these bonds at the call date at their respective discount to par. We consider it probable because we believe that these bonds can be refinanced at the call date at or lower than a breakeven cost of funds based on the call discount. As a result, we are accreting this call discount as a reduction to interest expense through the call date. If it becomes less than probable that we will call these bonds at a future date, it will result in our reversing this prior accretion as a cumulative catch-up adjustment. The \$3.4 billion asset-backed commercial paper facility completed in the fourth quarter of 2011 and discussed below will provide financing to call the outstanding bonds issued by SLM Private Education Loan Trust 2009-B (\$2.6 billion principal) and SLM Private Education Loan Trust 2009-C (\$1.0 billion principal) at their respective call prices of 93 percent and 94 percent of par. These bonds are callable in the fourth quarter of 2011 and the first quarter of 2012, respectively. We have accreted approximately \$258 million, cumulatively, and \$30 million and \$86 million in the three and nine months ended September 30, 2011 as a reduction of interest expense.

Transactions During the Nine Months Ended September 30, 2011

On June 30, 2011, we completed an \$825 million Private Education Loan ABS transaction at an all-in LIBOR equivalent cost of one-month LIBOR plus 1.89 percent. This issue has a weighted average life of 4.0 years and an initial overcollateralization on the AAA bonds of approximately 18 percent.

On May 26, 2011, we completed an \$821 million FFELP ABS transaction at an all-in LIBOR equivalent cost of one-month LIBOR plus 1.15 percent. This issue has a weighted average life of 5.8 years and an initial overcollateralization of approximately 3 percent.

On April 26, 2011, we completed a \$562 million Private Education Loan ABS transaction at an all-in LIBOR equivalent cost of one-month LIBOR plus 1.99 percent. This issue has a weighted average life of 3.8 years and an initial overcollateralization on the AAA bonds of approximately 21 percent.

On March 3, 2011, we issued an \$812 million FFELP ABS transaction at an all-in LIBOR equivalent cost of one-month LIBOR plus 1.14 percent. This issue has a weighted average life of 5.8 years and initial overcollateralization of approximately 3 percent.

On January 14, 2011, we issued a \$2 billion five-year 6.25 percent fixed rate unsecured bond. The bond was issued to yield 6.50 percent before underwriting fees. The rate on the bond was swapped from a fixed rate to a floating rate equal to an all-in cost of one-month LIBOR plus 4.46 percent. The proceeds of this bond were designated for general corporate purposes.

We also repurchase our outstanding unsecured debt in both open-market repurchases and public tender offers. Repurchasing debt helps us to better manage our short-term and long-term funding needs by utilizing current excess liquidity to reduce future obligations related to our unsecured borrowings at favorable pricing. During the first nine months of 2011, we repurchased \$894 million of debt and realized gains of \$38 million for the nine months ended September 30, 2011, compared with \$3.6 billion and \$199 million for the nine months ended September 30, 2010.

Recent Fourth-Quarter 2011 Transactions

Edgar Filing: SLM CORP - Form 10-Q

On October 5, 2011, the Company closed on a \$3.4 billion asset-backed commercial paper facility which matures in January 2014. This facility will provide, subject to certain conditions, the financing to call the 2009-B

4. Derivative Financial Instruments (Continued)

The above fair values include adjustments for counterparty credit risk for both when we are exposed to the counterparty, net of collateral postings, and when the counterparty is exposed to us, net of collateral postings. The net adjustments decreased the overall net asset position at September 30, 2011 and December 31, 2010 by \$173 million and \$72 million, respectively. In addition, the above fair values reflect adjustments for illiquid derivatives as indicated by a wide bid/ask spread in the interest rate indices to which the derivatives are indexed. These adjustments decreased the overall net asset position at September 30, 2011 and December 31, 2010 by \$112 million and \$129 million, respectively.

Hedge ineffectiveness reclassified to earnings ⁽¹⁾⁽⁴⁾			1	
Total change in stockholders' equity for unrealized gains (losses) on derivatives	\$ 9	\$ (1)	\$ 23	\$ (5)

⁽¹⁾ Amounts included in Realized gains (losses) on derivatives in the Impact of Derivatives on Consolidated Statements of Income table above.

⁽²⁾ Includes net settlement income/expense.

⁽³⁾ We expect to reclassify \$4 million of after-tax net losses from accumulated other comprehensive income to earnings during the next 12 months related to amortization of cash flow hedges that were hedging debt instruments that are outstanding as of the reporting date.

⁽⁴⁾ Recorded in Gains (losses) derivatives and hedging activities, net in the consolidated statements of income.

Collateral

Collateral held and pledged at September 30, 2011 and December 31, 2010 related to derivative exposures between us and our derivative counterparties are detailed in the following table:

(Dollars in millions)	September 30,	December 31,
	2011	2010
Collateral held:		
Cash (obligation to return cash collateral is recorded in short-term borrowings) ⁽¹⁾	\$ 1,284	\$ 886
Securities at fair value (not recorded in financial statements) ⁽²⁾	788	585
Total collateral held	\$ 2,072	\$ 1,471
Derivative asset at fair value including accrued interest	\$ 2,632	\$ 2,540

Edgar Filing: SLM CORP - Form 10-Q

Collateral pledged to others:

Cash (right to receive return of cash collateral is recorded in investments)	\$	1,294	\$	809
Securities at fair value (recorded in restricted investments) ⁽³⁾				36
Total collateral pledged	\$	1,294	\$	845
Derivative liability at fair value including accrued interest and premium receivable	\$	1,213	\$	747

⁽¹⁾ At September 30, 2011 and December 31, 2010, \$87 million and \$108 million, respectively, were held in restricted cash accounts.

⁽²⁾ We do not have the ability to sell or re-pledge these securities. As such, the securities are not recorded in the financial statements.

⁽³⁾ Counterparty has the right to sell or re-pledge securities.

SLM CORPORATION

(Dollars in millions, except per share amounts, unless otherwise noted)

4. Derivative Financial Instruments (Continued)

Our corporate derivatives contain credit contingent features. At our current unsecured credit rating, we have fully collateralized our corporate derivative liability position (including accrued interest and net of premiums receivable) of \$1,157 million with our counterparties as of the collateral call date. Further downgrades would not result in any additional collateral requirements, except to increase the frequency of collateral calls. Two counterparties have the right to terminate the contracts with further downgrades. We currently have a liability position with these derivative counterparties (including accrued interest and net of premiums receivable) of \$326 million and have posted \$342 million of collateral to these counterparties. If the credit contingent feature was triggered for these two counterparties and the counterparties exercised their right to terminate, we would not be required to deliver additional assets to settle the contracts as of the balance sheet date. Trust related derivatives do not contain credit contingent features related to our or the trusts' credit ratings.

5. Other Assets

The following table provides detail on our other assets at September 30, 2011 and December 31, 2010.

(Dollars in millions)	September 30, 2011		December 31, 2010	
	Ending Balance	% of Balance	Ending Balance	% of Balance
Accrued interest receivable	\$ 2,811	30%	\$ 2,927	33%
Derivatives at fair value	2,410	26	2,437	27
Income tax asset, net current and deferred	1,664	18	1,283	14
Accounts receivable - general	1,378	15	730	8
Benefit and insurance-related investments	468	5	462	5
Other loans, net	213	2	271	3
Fixed assets, net	220	2	291	4
Other	283	2	569	6
Total	\$ 9,447	100%	\$ 8,970	100%

The Derivatives at fair value line in the above table represents the fair value of our derivatives in a net asset position by counterparty, exclusive of accrued interest and collateral. At September 30, 2011 and December 31, 2010, these balances included \$2.8 billion and \$2.7 billion, respectively, of cross-currency interest rate swaps and interest rate swaps designated as fair value hedges that were offset by an increase in interest-bearing liabilities related to the hedged debt. As of September 30, 2011 and December 31, 2010, the cumulative mark-to-market adjustment to the hedged debt was \$(3.3) billion and \$(2.9) billion, respectively.

September 30, 2011 and 2010 is unaudited)

(Dollars in millions, except per share amounts, unless otherwise noted)

6. Stockholders Equity and Stock-Based Compensation

The following table summarizes our common share repurchases and issuances for the three and nine months ended September 30, 2011 and 2010.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2011	2010	2011	2010
Common stock repurchased ⁽¹⁾	9,460,512		19,054,115	
Average purchase price per share	\$ 15.25	\$	\$ 15.77	\$
Shares repurchased related to employee stock-based compensation plans ⁽²⁾	244,758	236,005	2,880,269	788,865
Average purchase price per share	\$ 15.40	\$ 12.20	\$ 15.82	\$ 13.82
Authority remaining at end of period for repurchases ⁽¹⁾		38,841,923		38,841,923
Common shares issued	288,291	215,962	3,722,349	1,567,770

⁽¹⁾ In April 2011 we authorized the repurchase of up to \$300 million of our common stock in open market transactions, and terminated the previous stock repurchase program which had authorized the repurchase of up to 342.5 million shares. As of September 30, 2011, we have utilized the entire authorized amount under this program. Average purchase price per share includes purchase commission costs.

⁽²⁾ Comprises shares withheld from stock option exercises and vesting of restricted stock for employees tax withholding obligations and shares tendered by employees to satisfy option exercise costs.

The closing price of our common stock on the New York Stock Exchange on September 30, 2011 was \$12.45.

In March 2011, we retired all 70 million shares of common stock held in treasury. This retirement decreased the balance in treasury stock by \$1.9 billion, with corresponding decreases of \$14 million in common stock and \$1.9 billion in additional paid-in capital. There was no impact to total equity from this transaction.

In the first quarter of 2011, we changed our stock-based compensation plans so that retirement eligible employees would not forfeit unvested stock-based compensation upon their retirement. This change had the effect of accelerating \$11 million of future stock-based compensation expenses associated with these unvested stock grants into the current period for those employees who are retirement eligible or who will become retirement eligible prior to the vesting date.

Dividend and Share Repurchase Program

On June 17, 2011 and September 16, 2011, we paid a quarterly dividend of \$.10 per share on our common stock, the first dividends paid since early 2007. In April 2011, we authorized the repurchase of up to \$300 million of outstanding common stock in open market transactions and terminated all previous authorizations. During the second and third quarters of 2011, we repurchased 19.1 million shares for an aggregate purchase price of \$300 million. With this action, we have fully utilized our share repurchase authorization.

7. Earnings (Loss) per Common Share

Basic earnings (loss) per common share (EPS) are calculated using the weighted average number of shares of common stock outstanding during each period. A reconciliation of the numerators and denominators of the basic and diluted EPS calculations follows for the three and nine months ended September 30, 2011 and 2010.

(Dollars and shares in millions, except per share data)	Three Months		Nine Months Ended	
	2011	2010	September 30, 2011	September 30, 2010
Numerator:				
Net income (loss) from continuing operations	\$ (70)	\$ (494)	\$ 89	\$ 98
Income (loss) from discontinued operations, net of tax expense (benefit)	23	(1)	33	(15)
Net income (loss)	(47)	(495)	122	83
Preferred stock dividends	5	19	13	56
Net income (loss) attributable to common stock	(52)	(514)	109	27
Adjusted for dividends of Series C Preferred Stock ⁽¹⁾				
Net income (loss) attributable to common stock for diluted EPS	\$ (52)	\$ (514)	\$ 109	\$ 27
Denominator:				
Weighted average shares used to compute basic EPS	511	485	520	485
Effect of dilutive securities:				
Dilutive effect of Series C Preferred Stock ⁽¹⁾				
Dilutive effect of stock options, non-vested deferred compensation and restricted stock, restricted stock units and Employee Stock Purchase Plan (ESPP ⁽²⁾)			6	1
Dilutive potential common shares ⁽³⁾			6	1
Weighted average shares used to compute diluted EPS	511	485	526	486
Basic earnings (loss) per common share:				
Continuing operations	\$ (.14)	\$ (1.06)	\$.15	\$.09
Discontinued operations	.04		.06	(.03)
Total	\$ (.10)	\$ (1.06)	\$.21	\$.06
Diluted earnings (loss) per common share:				
Continuing operations	\$ (.14)	\$ (1.06)	\$.15	\$.09
Discontinued operations	.04		.06	(.03)
Total	\$ (.10)	\$ (1.06)	\$.21	\$.06

Edgar Filing: SLM CORP - Form 10-Q

- (1) Our 7.25 percent mandatory convertible preferred stock Series C was issued on December 31, 2007. The Series C Preferred Stock was fully converted to common shares on December 15, 2010.
- (2) Includes the potential dilutive effect of additional common shares that are issuable upon exercise of outstanding stock options, non-vested deferred compensation and restricted stock, restricted stock units, and the outstanding commitment to issue shares under the ESPP, determined by the treasury stock method.
- (3) For the three months ended September 30, 2011 and 2010, stock options covering approximately 33 million and 38 million shares, respectively, and restricted stock of 3 million shares and 1 million shares, respectively, were outstanding but not included in the computation of diluted earnings per share because they were anti-dilutive. For the nine months ended September 30, 2011 and 2010, stock options covering approximately 13 million and 16 million shares, respectively, were outstanding but not included in the computation of diluted earnings per share because they were anti-dilutive.

(Dollars in millions, except per share amounts, unless otherwise noted)

8. Restructuring Activities

The following table summarizes the restructuring expenses incurred during the three and nine months ended September 30, 2011 and 2010 and cumulative restructuring expenses incurred through September 30, 2011 associated with our restructuring plans.

(Dollars in millions)	Three Months Ended September 30,		Nine Months Ended September 30,		Cumulative Expense ⁽¹⁾ as of September 30, 2011
	2011	2010	2011	2010	
Severance costs	\$	\$ 10	\$ 3	\$ 52	\$ 165
Lease and other contract termination costs				1	11
Exit and other costs	1		3		19
Total restructuring costs from continuing operations ⁽¹⁾	1	10	6	53	195
Total restructuring costs from discontinued operations	(1)	1	(1)	2	29
Total	\$	\$ 11	\$ 5	\$ 55	\$ 224

⁽¹⁾ Aggregate restructuring expenses from continuing operations incurred across our reportable segments are disclosed in Note 11, Segment Reporting. Since the fourth quarter of 2007 through September 30, 2011, severance costs were incurred in conjunction with aggregate completed and planned position eliminations across all of our reportable segments, ranging from senior executives to servicing center personnel.

The following table summarizes changes in the restructuring liability balance, which is included in other liabilities in the accompanying consolidated balance sheet.

(Dollars in millions)	Severance Costs	Lease and Other Contract Termination Costs	Exit and Other Costs	Total
Balance at December 31, 2009	\$ 9	\$ 4	\$	\$ 13
Net accruals from continuing operations	81	1	3	85

(Dollars in millions, except per share amounts, unless otherwise noted)

9. Fair Value Measurements

We use estimates of fair value in applying various accounting standards in our financial statements. We categorize our fair value estimates based on a hierarchical framework associated with three levels of price transparency utilized in measuring financial instruments at fair value. During the three and nine months ended September 30, 2011, there were no significant transfers of financial instruments between levels, or changes in our methodology or assumptions used to value our financial instruments. Please refer to Note 15, Fair Value Measurements in our 2010 Form 10-K for a full discussion.

The following tables summarize the valuation of our financial instruments that are marked-to-market on a recurring basis in the consolidated financial statements as of September 30, 2011 and December 31, 2010.

(Dollars in millions)	Fair Value Measurements on a Recurring Basis as of September 30, 2011				Fair Value Measurements on a Recurring Basis as of December 31, 2010

⁽¹⁾ Cash and investments includes available-for-sale investments that consist of investments that are primarily U.S. Treasury or U.S. agency securities whose cost basis is \$99 million and \$137 million at September 30, 2011 and December 31, 2010, respectively, versus a fair value of \$104 million and \$139 million at September 30, 2011 and December 31, 2010, respectively.

10. Commitments and Contingencies

Mark A. Arthur et al. v. Sallie Mae, Inc. As previously disclosed, this class action suit involves allegations made in U.S. District Court for the Western District of Washington that we contacted consumers on their cellular telephones via autodialer without their consent in violation of the Telephone Consumer Protection Act, 47 U.S.C. § 227 et seq. (TCPA). Each violation under the TCPA provides for \$500 in statutory damages (\$1,500 if a willful violation is shown). Plaintiffs are seeking statutory damages, damages for willful violations, attorneys fees, costs, and

Edgar Filing: SLM CORP - Form 10-Q

injunctive relief. We have denied vigorously all claims asserted against us, but previously agreed to a preliminary settlement of \$19.5 million to avoid the burden and expense of continued litigation. Subsequent to reaching this preliminary settlement, we filed submissions with the Court to advise that additional individuals were omitted from the original notice list of class members.

On October 7, 2011, we entered into an amended settlement agreement under which we agreed to increase the settlement fund to \$24.15 million and Class Plaintiffs have submitted a motion for preliminary approval of the amended settlement agreement with the Court. At September 30, 2011, we have \$24.15 million accrued related to this matter.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(Information at September 30, 2011 and for the three and nine months ended

September 30, 2011 and 2010 is unaudited)

(Dollars in millions, except per share amounts, unless otherwise noted)

10. Commitments and Contingencies (Continued)

In the ordinary course of business, we and our subsidiaries are defendants in or parties to pending and threatened legal actions and proceedings including actions brought on behalf of various classes of claimants. These actions and proceedings may be based on alleged violations of consumer protection, securities, employment and other laws. In certain of these actions and proceedings, claims for substantial monetary damage are asserted against us and our subsidiaries.

In the ordinary course of business, we and our subsidiaries are subject to regulatory examinations, information gathering requests, inquiries and investigations. In connection with formal and informal inquiries in these cases, we and our subsidiaries receive numerous requests, subpoenas and orders for documents, testimony and information in connection with various aspects of our regulated activities.

In view of the inherent difficulty of predicting the outcome of such litigation and regulatory matters, we cannot predict what the eventual outcome of the pending matters will be, what the timing or the ultimate resolution of these matters will be, or what the eventual loss, fines or penalties related to each pending matter may be.

We are required to establish reserves for litigation and regulatory matters where those matters present loss contingencies that are both probable and estimable. When loss contingencies are not both probable and estimable, we do not establish reserves.

Based on current knowledge, reserves have been established for certain litigation or regulatory matters where the loss is both probable and estimable. Based on current knowledge, management does not believe that loss contingencies, if any, arising from pending investigations, litigation or regulatory matters will have a material adverse effect on our consolidated financial position, liquidity, results of operations or cash flows.

11. Segment Reporting***FFELP Loans Segment***

Our FFELP Loans segment consists of our \$140.7 billion FFELP Loan portfolio as of September 30, 2011 and the underlying debt and capital funding the loans. We no longer originate FFELP Loans; however, we are actively seeking to acquire FFELP Loan portfolios.

The following table includes asset information for our FFELP Loans segment.

(Dollars in millions)	September 30, 2011	December 31, 2010
FFELP Loans, net	\$ 140,659	\$ 148,649
Cash and investments ⁽¹⁾	6,290	5,963
Other	4,806	3,911
Total assets	\$ 151,755	\$ 158,523

⁽¹⁾ Includes restricted cash and investments.

Consumer Lending Segment

We originate, acquire, finance and service Private Education Loans. The portfolio totaled \$36.2 billion at September 30, 2011. We also provide savings products, primarily in the form of retail deposits, to help customers save for a college education.

11. Segment Reporting (Continued)

The following table includes asset information for our Consumer Lending segment.

(Dollars in millions)	September 30, 2011	December 31, 2010
Private Education Loans, net	\$ 36,157	\$ 35,656
Cash and investments ⁽¹⁾	2,713	3,372
Other	3,727	4,004
 Total assets	 \$ 42,597	 \$ 43,032

⁽¹⁾ Includes restricted cash and investments.

Business Services Segment

In this segment we provide loan servicing to our FFELP Loans segment, ED and other third parties. We provide default aversion work and contingency collections on behalf of Guarantors, colleges, ED and other third parties. Through our Campus Solutions business we provide comprehensive financing and transaction processing solutions to college financial aid offices and students to streamline the financial aid process. Through Sallie Mae Insurance Services we offer directly to college students and higher education institutions tuition insurance, renters insurance and student health insurance. We also provide 529 college-savings plan account asset servicing and other transaction processing activities.

At September 30, 2011 and December 31, 2010, the Business Services segment had total assets of \$838 million and \$930 million, respectively.

Other Segment

The Other segment primarily consists of the financial results related to the repurchase of debt, the corporate liquidity portfolio and all overhead. We also include results from smaller wind-down and discontinued operations within this segment.

At September 30, 2011 and December 31, 2010, the Other segment had total assets of \$2.4 billion and \$2.8 billion, respectively.

Measure of Profitability

The tables below include the condensed operating results for each of our reportable segments. Management, including the chief operating decision makers, evaluates the Company on certain performance measures that we refer to as Core Earnings performance measures for each operating segment. We use Core Earnings to manage each business segment because Core Earnings reflect adjustments to GAAP financial results for two items, discussed below, that create significant volatility mostly due to timing factors generally beyond the control of management. Accordingly, we believe that Core Earnings provide management with a useful basis from which to better evaluate results from ongoing operations against the business plan or against results from prior periods. Consequently, we disclose this information as we believe it provides investors with additional information regarding the operational and performance indicators that are most closely assessed by

Edgar Filing: SLM CORP - Form 10-Q

management. The two items adjusted for in our Core Earnings presentations are: (1) our use of derivatives instruments to

(Dollars in millions, except per share amounts, unless otherwise noted)

11. Segment Reporting (Continued)

hedge our economic risks that do not qualify for hedge accounting treatment or do qualify for hedge accounting treatment but result in ineffectiveness and (2) the accounting for goodwill and acquired intangible assets. The tables presented below reflect Core Earnings operating measures reviewed and utilized by management to manage the business. Reconciliation of the Core Earnings segment totals to our consolidated operating results in accordance with GAAP is also included in the tables below.

Our Core Earnings performance measures are not defined terms within GAAP and may not be comparable to similarly titled measures reported by other companies. Unlike financial accounting, there is no comprehensive, authoritative guidance for management reporting. The management reporting process measures the performance of the operating segments based on the management structure of the Company and is not necessarily comparable with similar information for any other financial institution. Our operating segments are defined by the products and services they offer or the types of customers they serve, and they reflect the manner in which financial information is currently evaluated by management. Intersegment revenues and expenses are netted within the appropriate financial statement line items consistent with the income statement presentation provided to management. Changes in management structure or allocation methodologies and procedures may result in changes in reported segment financial information.

11. Segment Reporting (Continued)

Summary of Core Earnings Adjustments to GAAP

The two adjustments required to reconcile from our Core Earnings results to our GAAP results of operations relate to differing treatments for: (1) our use of derivatives instruments to hedge our economic risks that do not qualify for hedge accounting treatment or do qualify for hedge accounting treatment but result in ineffectiveness and (2) the accounting for goodwill and acquired intangible assets. The following table reflects aggregate adjustments associated with these areas for the three and nine months ended September 30, 2011 and 2010.

(Dollars in millions)	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2011	2010	2011	2010
Core Earnings adjustments to GAAP:				
Net impact of derivative accounting ⁽¹⁾	\$ (371)	\$ (269)	\$ (917)	\$ 9
Net impact of acquired intangibles ⁽²⁾	(6)	(670)	(18)	(689)
Net tax effect ⁽³⁾	142	242	349	136
Total Core Earnings adjustments to GAAP	\$ (235)	\$ (697)	\$ (586)	\$ (544)

⁽¹⁾ **Derivative accounting:** Core Earnings exclude periodic unrealized gains and losses that are caused by the mark-to-market derivative valuations on derivatives that do not qualify for hedge accounting treatment under GAAP and periodic unrealized gains and losses that are a result of ineffectiveness recognized related to effective hedges. These unrealized gains and losses occur in our FFELP Loans, Consumer Lending and Other business segments. Under GAAP, for derivatives that are held to maturity, the cumulative net unrealized gain or loss at the time of maturity will equal \$0 except for Floor Income Contracts where the cumulative unrealized gain will equal the amount for which we sold the contract. In our Core Earnings presentation, we recognized the economic effect of these hedges, which generally results in any net settlement cash paid or received being recognized ratably as an interest expense or revenue over the hedged item's life.

⁽²⁾ **Goodwill and Acquired Intangibles:** We exclude goodwill and intangible impairment and amortization of acquired intangibles.

⁽³⁾ **Net Tax Effect:** Such tax effect is based upon our Core Earnings effective tax rate for the year.

12. Discontinued Operations

Our Purchased Paper businesses are presented in discontinued operations for the current and prior periods. In the fourth quarter of 2010, we began actively marketing our Purchased Paper Non-Mortgage business for sale and concluded it was probable this business would be sold within one year at which time we would exit the business. The Purchased Paper Non-Mortgage business comprises operations and cash flows that can be clearly distinguished operationally and for financial reporting purposes from the rest of the Company. As a result, we have classified the business as held-for-sale, and, as such, the results of operations of this business were required to be presented in discontinued operations

Edgar Filing: SLM CORP - Form 10-Q

beginning in the fourth quarter of 2010. In connection with this classification, we are required to carry this business at the lower of fair value or historical cost basis. We sold the Purchased Paper Non-Mortgage business in the third quarter of 2011 which resulted in a \$35 million gain.

SLM CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(Information at September 30, 2011 and for the three and nine months ended

September 30, 2011 and 2010 is unaudited)

(Dollars in millions, except per share amounts, unless otherwise noted)

12. Discontinued Operations (Continued)

The following table summarizes the discontinued assets and liabilities at September 30, 2011 and December 31, 2010, respectively.

(Dollars in millions)	September 30, 2011	December 31, 2010
Assets:		
Cash and cash equivalents	\$ 5	\$ 4
Other assets	83	177
Assets of discontinued operations	\$ 88	\$ 181
Liabilities:		
Liabilities of discontinued operations	\$ 17	\$ 6

At September 30, 2011, other assets of our discontinued operations consist primarily of a tax asset that will be realized in the fourth quarter of 2011 when the tax loss for the sale of our Purchased Paper Non-Mortgage business is utilized on our consolidated income tax return. Liabilities of our discontinued operations consist primarily of sale related liabilities and restructuring liabilities related to severance and contract termination costs.

At December 31, 2010, other assets of our discontinued operations consist primarily of the Purchased Paper Non-Mortgage loan portfolio and a deferred tax asset for intangibles that will be realized when the tax loss for the sale of our Purchased Paper Non-Mortgage business is utilized on our consolidated income tax return. Liabilities of our discontinued operations consist primarily of restructuring liabilities related to severance and contract termination costs.

The following table summarizes the discontinued operations for the three and nine months ended September 30, 2011 and 2010.

(Dollars in millions)	Three Months Ended September 30, 2011		Nine Months Ended September 30, 2010	
Discontinued operations:				
Income (loss) from discontinued operations before income taxes	\$ 37	\$ (1)	\$ 52	\$ (21)
Income tax expense (benefit)	14		19	(6)
Income (loss) from discontinued operations, net of taxes	\$ 23	\$ (1)	\$ 33	\$ (15)

Income from discontinued operations in the three and nine months ended September 30, 2011 increased primarily due to the sale of our Purchased Paper Non-Mortgage portfolio resulting in a \$35 million gain in the third quarter.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis should be read in conjunction with our Consolidated Financial Statements and related Notes included elsewhere in this Quarterly Report on Form 10-Q.

This report contains forward-looking statements and information based on management's current expectations as of the date of this document. Statements that are not historical facts, including statements about the company's beliefs or expectations and statements that assume or are dependent upon future events, are forward-looking statements. Forward-looking statements are subject to risks, uncertainties, assumptions and other factors that may cause actual results to be materially different from those reflected in such forward-looking statements. These factors include, among others, the risks and uncertainties set forth in Item 1A Risk Factors and elsewhere in the company's Annual Report on Form 10-K for the year ended Dec. 31, 2010, the company's Quarterly Report on Form 10-Q for the quarter ended June 30, 2011, and subsequent filings with the SEC; increases in financing costs; limits on liquidity; increases in costs associated with compliance with laws and regulations; changes in accounting standards and the impact of related changes in significant accounting estimates; any adverse outcomes in any significant litigation to which the company is a party; credit risk associated with the company's exposure to third parties, including counterparties to the company's derivative transactions; and changes in the terms of student loans and the educational credit marketplace (including changes resulting from new laws and the implementation of existing laws). The company could also be affected by, among other things: changes in its funding costs and availability; reductions to its credit ratings or the credit ratings of the United States of America; failures of its operating systems or infrastructure, including those of third-party vendors; damage to its reputation; failures to successfully implement cost-cutting and restructuring initiatives and adverse effects of such initiatives on its business; changes in the demand for educational financing or in financing preferences of lenders, educational institutions, students and their families; changes in law and regulations with respect to the student lending business and financial institutions generally; increased competition from banks and other consumer lenders; the creditworthiness of its customers; changes in the general interest rate environment, including the rate relationships among relevant money-market instruments and those of its earning assets vs. its funding arrangements; changes in general economic conditions; and changes in the demand for debt management services. The preparation of the company's consolidated financial statements also requires management to make certain estimates and assumptions including estimates and assumptions about future events. These estimates or assumptions may prove to be incorrect. All forward-looking statements contained in this report are qualified by these cautionary statements and are made only as of the date of this document. The company does not undertake any obligation to update or revise these forward-looking statements to conform the statement to actual results or changes in its expectations.

Definitions for capitalized terms used in this document can be found in the Glossary at the end of this document.

Certain reclassifications have been made to the balances as of and for the three and nine months ended September 30, 2010 to be consistent with classifications adopted for 2011, and had no effect on net income, total assets, or total liabilities.

Through this discussion and analysis, we intend to provide the reader with some narrative context for how our management views our consolidated financial statements, additional context within which to assess our operating results, and information on the quality and variability of our earnings, liquidity and cash flows.

⁽¹⁾ Core Earnings are non-GAAP financial measures and do not represent a comprehensive basis of accounting. For a greater explanation of Core Earnings, see the section titled Core Earnings Definition and Limitations and subsequent sections.

⁽²⁾ Preferred dividends of \$15 million and \$44 million, applicable to our convertible Series C Preferred Stock, were added back to the numerator in the three and nine months ended September 30, 2010, respectively, in computing diluted earnings per share, as the Series C Preferred Stock was dilutive on a Core Earnings basis. The Series C Preferred Stock was fully converted to common shares on December 15, 2010.

Overview

Our primary business is to help students and families save, plan and pay for college. As part of this, we originate, service and collect loans made to students and/or their parents to finance the cost of their education. We provide funding, delivery and servicing support for education loans in the United States, through our non-federally guaranteed Private Education Loan programs and as a servicer and collector of loans for the U.S. Department of Education (ED). In addition we are the largest holder, servicer and collector of loans made under the Federal Family Education Loan Program (FFELP), a program that was discontinued in 2010.

We have used internal growth and strategic acquisitions to attain our leadership position in the education finance market. The core of our marketing strategy is to generate student loan originations by promoting our products on campus through the financial aid office and through direct marketing to students and their parents. These sales and marketing efforts are supported by the largest and most diversified servicing capabilities in the industry.

We earn fee income by providing student loan-related services including student loan servicing, loan default aversion and defaulted loan collections, transaction processing capabilities and information technology to educational institutions, and 529 college-savings plan program management services and a consumer savings network.

We monitor and assess our ongoing operations and results based on the following four reportable segments:

FFELP Loans segment This segment consists of our \$140.7 billion and \$148.7 billion FFELP Loan portfolio and the underlying debt and capital funding the loans as of September 30, 2011 and December 31, 2010, respectively. We no longer originate FFELP Loans;

Edgar Filing: SLM CORP - Form 10-Q

however, we are actively seeking to acquire, and have acquired, FFELP Loan portfolios. The portfolio has a weighted average remaining life of 7.7 years.

Consumer Lending segment We originate, acquire, finance and service Private Education Loans. The portfolio totaled \$36.2 billion and \$35.7 billion at September 30, 2011 and December 31, 2010, respectively. We also provide savings products, primarily in the form of retail deposits, to help customers save for a college education.

Business Services segment In this segment we provide loan servicing to our FFELP Loans segment, ED and other third parties. We provide default aversion work and contingency collections on behalf of Guarantors, colleges, ED and other third parties. Through our Campus Solutions business we provide comprehensive financing and transaction processing solutions to college financial aid offices and students to streamline the financial aid process. Through Sallie Mae Insurance Services we offer directly to college students and higher education institutions, tuition insurance, renters insurance, and student health insurance. We also provide 529 college-savings plan account asset servicing and other transaction processing activities.

Other segment This segment primarily consists of the financial results related to the repurchase of debt, the corporate liquidity portfolio and all overhead. We also include results from smaller wind-down and discontinued operations within this segment.

Key Financial Measures

Our operating results are primarily driven by interest income from our student loan portfolios, provision for loan losses, financing costs, costs necessary to generate new assets, the revenues and expenses generated by our service businesses, and gains and losses on loan sales, debt repurchases and derivatives. We manage and assess the performance of each business segment separately as each is focused on different customer bases and derives its revenue from different activities and services. A brief summary of our key financial measures (net interest income; provision for loan losses; charge-offs and delinquencies; servicing and contingency revenues; other income (loss); operating expenses; and Core Earnings) can be found in Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operations in our 2010 Form 10-K.

First Nine Months of 2011 Summary of Results

We continue to operate in a challenging macroeconomic environment marked by high unemployment and uncertainty. On July 1, 2010, the Health Care and Education Reconciliation Act of 2010 (HCERA), which included the SAFRA Act, eliminated FFELP Loan originations, a major source of our net income. All federal loans to students are now made through the Direct Student Loan Program (DSLP) and as discussed above, we no longer originate FFELP Loans. In addition, on July 21, 2010, President Obama signed into law the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act) that represents a comprehensive change to banking laws, imposing significant new regulation on almost every aspect of the U.S. financial services industry. A discussion of HCERA and the Dodd-Frank Act can be found in Item 1 Business and in Item 1A Risk Factors in our 2010 Form 10-K.

In this environment, we were able to achieve significant accomplishments during the first nine months of 2011 as discussed below.

We report financial results on a GAAP basis and also present certain Core Earnings performance measures. Our management, equity investors, credit rating agencies and debt capital providers use these Core Earnings measures to monitor our business performance. See Core Earnings Definition and Limitations for a further discussion and a complete reconciliation between GAAP net income and Core Earnings.

GAAP third quarter 2011 net loss was \$47 million (\$.10 diluted loss per share), versus net loss of \$495 million (\$1.06 diluted loss per share) in the same quarter last year. We manage our business segments on a Core Earnings basis. The primary difference between our Core Earnings and GAAP results for the third quarter of 2011 is a \$371 million unrealized, mark-to-market loss on certain derivative contracts recognized in GAAP but not in Core Earnings results. The primary difference between Core Earnings and GAAP in the year-ago quarter was a mark-to-market loss on certain derivative contracts of \$269 million and a \$660 million impairment of goodwill and intangibles in the year-ago quarter.

Core Earnings were \$188 million (\$.36 diluted earnings per share) for the third quarter 2011, compared with \$202 million (\$.37 diluted earnings per share) for the year-ago period. Improved loan loss provision and operating expenses and the gain on the sale of our Purchased Paper Non-Mortgage business more than offset lower debt repurchase gains.

Both GAAP and Core Earnings third-quarter 2011 results included the following: an additional \$124 million of provision for Private Education Loan losses attributable to the adoption of recent accounting guidance for troubled debt restructurings, and a \$35 million gain on the sale of the Company's discontinued Purchased Paper Non-Mortgage business.

During the first nine months of 2011, we raised \$2 billion of unsecured debt and issued \$1.6 billion of FFELP asset-backed securities and \$1.4 billion of Private Education Loan securities. We also repurchased \$894 million of debt and realized Core Earnings gains of \$64 million for the nine months ended September 30, 2011, compared with \$3.6 billion and \$199 million in the nine months ended September 30, 2010.

During the second and third quarters of 2011, we paid \$300 million to repurchase 19.1 million common shares on the open market as part of our previously announced \$300 million share repurchase program authorization. We have fully utilized this authorization. We declared and paid a \$.10 per share dividend during the second and third quarters of 2011.

Effective March 31, 2011, we completed the relocation of our headquarters to Newark, Delaware from Reston, Virginia.

2011 Management Objectives

In 2011 we have set out five major goals to create shareholder value. They are: (1) Reduce our operating expenses; (2) Maximize cash flows from FFELP Loans; (3) Prudently grow Consumer Lending segment assets and revenue; (4) Increase Business Services segment revenue; and (5) Reinstate dividends and/or share repurchases. Here is how we plan to achieve these objectives and the progress we have made to date.

Reduce Operating Expenses

The elimination of FFELP by HCERA greatly reduced the scope of our historical revenue generating capabilities. In 2010 we originated \$14 billion of loans, 84 percent of them FFELP Loans; in 2011 we expect to originate \$2.7 billion of new loans, all of them Private Education Loans. Our FFELP related revenues will decline over the coming years. As a result, we must effectively match our cost structure to our ongoing business. We have set a goal of getting to a quarterly operating expense of \$250 million in the fourth quarter 2011 and are on track to achieve this goal. Operating expenses were \$285 million in the third quarter of 2011. Operating expenses in the third quarter of 2011 included \$15 million related to the pending termination of our defined benefit retirement plan and \$8 million of servicing costs related to the \$25 billion student loan portfolio acquisition at the end of last year. We completed conversion of the acquired portfolio to our loan servicing system in October 2011 and expect these servicing costs to decline as a result. These charges notwithstanding, we expect to achieve our quarterly operating expense target of \$250 million in the fourth quarter of 2011.

Maximize Cash Flows from FFELP Loans

We have a \$140.7 billion portfolio of FFELP Loans that is expected to generate significant amounts of cash flow and earnings in the coming years. We plan to reduce related costs, minimize income volatility and opportunistically purchase additional FFELP Loan portfolios such as the portfolio we purchased at the end of 2010. During the first nine months of 2011 we acquired \$1.5 billion of FFELP loans and expect to purchase additional FFELP loans in the future.

Prudently Grow Consumer Lending Segment Assets and Revenue

Successfully growing Private Education Loan lending, which is designed to supplement federal financial aid, is the key component of our long-term plan to grow shareholder value. We must originate increasing numbers of high quality Private Education Loans, increase net interest margins and further reduce charge-offs and provision for loan losses. Originations were 29 percent higher in the third quarter of 2011 compared with the year-ago quarter. Charge-offs decreased to 3.7 percent of loans in repayment from 5.4 percent in the year-ago quarter.

Increase Business Services Segment Revenue

Our Business Services segment comprises several businesses with customers related to FFELP that will experience revenue declines and several businesses with customers that provide growth opportunities. Our growth businesses are ED servicing, ED collections, other school-based asset type servicing and collections, Campus Solutions, Sallie Mae Insurance Services, transaction processing and 529 college-savings plan account asset servicing.

Our allocation of new customer loans awarded for servicing under our ED Servicing Contract recently increased from 22 percent to 26 percent for the current contract year ending August 15, 2012. The increase was driven primarily by our top ranking for default prevention performance results. We are servicing approximately 3.4 million accounts under the ED Servicing Contract as of September 30, 2011. We can continue to expand our market share on the next contract year under the ED Servicing Contract by having a better performance ranking than the three other servicing companies. We expect that this volume will also grow organically as more loans are originated under DSLP. Our goal is to further expand our market share and broaden the services we provide to ED and other third-party servicing clients.

Campus Solutions is a business line that we expect to grow by expanding our product offerings and leveraging our deep relationships with colleges and universities. In the first quarter, we announced a Sallie Mae Bank No-Fee Student Checking Account with Debit as an enhanced refund disbursement choice for schools and students to help higher education institutions rapidly process financial aid and tuition refunds. This new option complements existing refund disbursement choices that include electronic deposit to the bank account of the student's choice, debit card or a check. We have added 35 new refund disbursement clients in 2011.

Assets under management in 529 college-savings plans total \$34.5 billion and have been growing at a rate of 22 percent over the last three years. We recently were selected to continue as the program manager for New York's 529 College Savings Program under a seven-year contract, which is currently being negotiated. New York has the largest direct 529 plan in the country. Our goal is to service additional 529 plans.

We launched Sallie Mae Insurance Services in the prior quarter, which offers directly to college students and higher education institutions tuition insurance, renters insurance and student health insurance.

We completed the acquisition of SC Services & Associates, Inc., a provider of collections services to local governments and courts. This acquisition will enhance and complement our other contingency collection businesses.

Reinstate Dividends and/or Share Repurchases

Our objective was to begin either paying dividends or repurchasing shares, or a combination of both, by the second half of 2011. On June 17, 2011 and September 16, 2011, we paid a quarterly dividend of \$.10 per share on our common stock, the first dividends paid since early 2007. In April 2011, we authorized the repurchase of up to \$300 million of outstanding common stock in open-market transactions and terminated all previous authorizations. During the second and third quarters of 2011, we paid \$300 million to repurchase 19.1 million common shares on the open market. We have now fully utilized the share repurchase program authorization.

RESULTS OF OPERATIONS

We present the results of operations below first on a consolidated basis in accordance with GAAP. Following our discussion of consolidated earnings results on a GAAP basis, we present our results on a segment basis. We have four business segments: FFELP Loans, Consumer Lending, Business Services and Other. Since these segments operate in distinct business environments and we manage and evaluate the financial performance of these segments using non-GAAP financial measures, these segments are presented on a Core Earnings basis (see Core Earnings Definition and Limitations).

Consolidated Earnings Summary GAAP-basis

Three Months Ended September 30, 2011 Compared with Three Months Ended September 30, 2010

For the three months ended September 30, 2011 and 2010, net loss was \$47 million, or \$.10 diluted loss per common share, and \$495 million, or \$1.06 diluted loss per common share, respectively. The decrease in net loss was primarily due to \$660 million of goodwill and intangible asset impairment charges, which were partially non-tax deductible, recorded in the third quarter of 2010. This was partially offset by a \$136 million increase in net losses on derivative and hedging activities and \$124 million of additional provision for loan losses in connection with adopting new accounting guidance in the third quarter of 2011 related to troubled debt restructurings (TDRs).

The primary contributors to each of the identified drivers of changes in net income for the current quarter compared with the year-ago quarter are as follows:

Net interest income increased by \$13 million primarily as a result of incremental net interest income from the acquisition of \$25 billion of securitized loans on December 31, 2010, which was partially offset by higher funding costs.

Provisions for loan losses increased by \$51 million as a result of \$124 million of additional provision related to the implementation of new accounting guidance for TDRs (see Consumer Lending Segment Private Education Loans Provision for Loan Losses and Charge-offs for a further discussion). Excluding the impact of this new accounting guidance, provisions for loan losses would have decreased by \$73 million as a result of overall improvements in credit quality and delinquency and charge-off trends.

Net losses on derivatives and hedging activities increased by \$136 million. The primary factors affecting the change in losses were interest rate and foreign currency fluctuations, which primarily affected the valuations of our Floor Income Contracts, basis swaps and foreign currency hedges during the period. Valuations of derivative instruments vary based upon many factors including changes in interest rates, credit risk, foreign currency fluctuations and other market factors. As a result, net gains and losses on derivatives and hedging activities may vary significantly in future periods.

Gains on debt repurchases decreased \$18 million year-over-year as we repurchased less debt in the current period. Debt repurchase activity will fluctuate based on market fundamentals and our liability management strategy.

Operating expenses decreased \$17 million primarily due to our ongoing cost savings initiative. The third quarter of 2011, which is typically our seasonal peak, included \$8 million of third-party servicing expenses related to the \$25 billion loan portfolio acquisition on December 31, 2010 and \$15 million of expense related to the pending termination of our defined benefit pension plan. The third quarter of 2010 included \$7 million of litigation contingency expenses.

Restructuring expenses decreased \$9 million primarily as a result of the substantial completion of our plan for restructuring which we initiated during 2010 in response to legislation ending FFELP. Restructuring our operations in response to the elimination of FFELP required us to significantly reduce our operations and related operating costs associated with the origination of FFELP Loans. Restructuring expenses associated with continuing operations under this plan were \$1 million in the third quarter of 2011 and \$10 million in the third quarter of 2010. We currently expect to incur an estimated \$5 million of additional restructuring costs through 2012. The majority of these expenses will be severance costs.

The effective tax rates for the third quarters of 2011 and 2010 were 40 percent and 20 percent, respectively. The change was primarily driven by non-tax deductible goodwill impairments recorded in the third quarter of 2010.

Net income from discontinued operations increased \$24 million primarily due to the sale of our Purchased Paper Non-Mortgage portfolio resulting in a \$35 million gain in the third quarter. Our Purchased Paper businesses are presented as discontinued operations

for the current and prior periods.

Nine Months Ended September 30, 2011 Compared with Nine Months Ended September 30, 2010

For the nine months ended September 30, 2011 and 2010, net income was \$122 million, or \$.21 diluted earnings per common share, and \$83 million, or \$.06 diluted earnings per common share, respectively. The increase in net income for the nine months ended September 30, 2011 as compared with the prior year period was primarily due to \$660 million of goodwill and intangible asset impairment charges, which were partially non-tax deductible, recorded in the year-ago period and a \$96 million decrease in the provisions for loan losses. This was partially offset by a \$900 million increase in net losses on derivative and hedging activities and a \$161 million decrease in gains on debt repurchases.

The primary contributors to each of the identified drivers of changes in net income for the current nine-month period compared with the year-ago nine-month period are as follows:

Net interest income increased by \$29 million primarily the result of incremental net interest income from the acquisition of \$25 billion of securitized student loans on December 31, 2010, which was partially offset by higher funding costs.

Provisions for loan losses decreased by \$96 million. Excluding the effect of the \$124 million of additional provision related to the implementation of new accounting guidance for TDRs (see Consumer Lending Segment Private Education Loans Provision for Loan Losses and Charge-offs for further discussion), the provision for loan losses would have decreased by \$220 million as a result of overall improvements in credit quality and delinquency and charge-off trends.

Net losses on derivatives and hedging activities increased by \$900 million primarily due to interest rate and foreign currency fluctuations, which primarily affected the valuations of our Floor Income Contracts, basis swaps and foreign currency hedges during the period. Valuations of derivative instruments vary based upon many factors including changes in interest rates, credit risk, foreign currency fluctuations and other market factors. As a result, net gains and losses on derivatives and hedging activities may vary significantly in future periods.

Servicing revenue decreased by \$28 million primarily due to 2010 legislation that eliminated the origination of new FFELP Loans, thereby eliminating Guarantor issuance fees on new FFELP Loans. Outstanding FFELP Loans on which we earn additional fees also declined.

Gains on debt repurchases decreased \$161 million as we repurchased less debt in the current period. Debt repurchase activity will fluctuate based on market fundamentals and our liability management strategy.

Other income increased by \$18 million primarily due to an increase in foreign currency translation gains. The foreign currency translation gains relate to a portion of our foreign currency denominated debt that does not receive hedge accounting treatment. These gains were partially offset by the losses on derivative and hedging activities, net line item on the income statement related to the derivatives used to economically hedge these debt instruments.

Operating expenses decreased \$42 million primarily as a result of our cost saving initiative. The first nine months of 2011 included \$33 million of third-party servicing expenses related to the \$25 billion loan portfolio acquisition on December 31, 2010, \$12 million of litigation contingency expenses, \$11 million from the acceleration of stock compensation and \$15 million of expense related to the pending termination of our defined benefit pension plan. The first nine months of 2010 included \$9 million of restructuring related impairments and \$30 million of litigation contingency expenses.

Restructuring expenses decreased \$47 million primarily the result of the substantial completion of our plan for restructuring the Company initiated during 2010 in response to legislation ending FFELP.

Edgar Filing: SLM CORP - Form 10-Q

The effective tax rates for the nine months ended September 30, 2011 and 2010 were 33 percent and 70 percent, respectively. The change was primarily driven by the impact of non-tax deductible goodwill impairments recorded in the first nine months of 2010.

Net income from discontinued operations for the nine months ended September 30, 2011 was \$33 million compared with a net loss from discontinued operations of \$15 million for the nine months ended September 30, 2010. The change was primarily driven by a \$35 million gain realized from the sale of our Purchased Paper Non-Mortgage portfolio in the third quarter of 2011 and higher than expected collections during the first nine months of 2011.

Core Earnings Definition and Limitations

We prepare financial statements in accordance with GAAP; however, we also evaluate our business segments on a basis that differs from GAAP. We refer to this different basis of presentation as Core Earnings. We provide this Core Earnings basis of presentation on a consolidated basis for each business segment because this is what we internally review when making management decisions regarding our performance and how we allocate resources. We also refer to this information in our presentations with credit rating agencies, lenders and investors. Because our Core Earnings basis of presentation corresponds to our segment financial presentations, we are required by GAAP to provide Core Earnings disclosure in the notes to our consolidated financial statements for our business segments.

Core Earnings are not a substitute for reported results under GAAP. We use Core Earnings to manage each business segment because Core Earnings reflect adjustments to GAAP financial results for two items, discussed below, that create significant volatility mostly due to timing factors generally beyond the control of management. Accordingly, we believe that Core Earnings provide management with a useful basis from which to better evaluate results from ongoing operations against the business plan or against results from prior periods. Consequently, we disclose this information as we believe it provides investors with additional information regarding the operational and performance indicators that are most closely assessed by management. The two items adjusted for in our Core Earnings presentations are: (1) our use of derivatives instruments to hedge our economic risks that do not qualify for hedge accounting treatment or do qualify for hedge accounting treatment but result in ineffectiveness and (2) the accounting for goodwill and acquired intangible assets.

While GAAP provides a uniform, comprehensive basis of accounting, for the reasons described above, our Core Earnings basis of presentation does not. Core Earnings are subject to certain general and specific limitations that investors should carefully consider. For example, there is no comprehensive, authoritative guidance for management reporting. Our Core Earnings are not defined terms within GAAP and may not be comparable to similarly titled measures reported by other companies. Accordingly, our Core Earnings presentation does not represent a comprehensive basis of accounting. Investors, therefore, may not be able to compare our performance with that of other financial services companies based upon Core Earnings. Core Earnings results are only meant to supplement GAAP results by providing additional information regarding the operational and performance indicators that are most closely used by management, our board of directors, rating agencies, lenders and investors to assess performance.

Specific adjustments that management makes to GAAP results to derive our Core Earnings basis of presentation are described in detail in the section entitled Differences between Core Earnings and GAAP below.

Edgar Filing: SLM CORP - Form 10-Q

The following tables show Core Earnings for each business segment and our business as a whole along with the adjustments made to the income/expense items to reconcile the amounts to our reported GAAP results as required by GAAP and reported in Note 11, Segment Reporting.

(Dollars in millions)	Three Months Ended September 30, 2011						Core Earnings	Adjustments ⁽²⁾	Total GAAP

Differences between Core Earnings and GAAP

The two adjustments required to reconcile from our Core Earnings results to our GAAP results of operations relate to differing treatments for: (1) our use of derivatives instruments to hedge our economic risks that do not qualify for hedge accounting treatment or do qualify for hedge accounting treatment but result in ineffectiveness and (2) the accounting for goodwill and acquired intangible assets. The following table reflects aggregate adjustments associated with these areas for the three and nine months ended September 30, 2011 and 2010.

(Dollars in millions)	Three Months		Nine Months	
	Ended September 30, 2011	Ended September 30, 2010	Ended September 30, 2011	Ended September 30, 2010
Core Earnings adjustments to GAAP:				
Net impact of derivative accounting	\$ (371)	\$ (269)	\$ (917)	\$ 9
Net impact of goodwill and acquired intangibles	(6)	(670)	(18)	(689)
Net income tax effect	142	242	349	136
Total Core Earnings adjustments to GAAP	\$ (235)	\$ (697)	\$ (586)	\$ (544)

1) **Derivative Accounting:** Core Earnings exclude periodic unrealized gains and losses that are caused primarily by the mark-to-market valuations on derivatives that do not qualify for hedge accounting treatment under GAAP. To a lesser extent, these periodic unrealized gains and losses are also a result of ineffectiveness recognized related to effective hedges. These unrealized gains and losses occur in our FFELP Loans, Consumer Lending and Other business segments. Under GAAP, for our derivatives that are held to maturity, the cumulative net unrealized gain or loss over the life of the contract will equal \$0 except for Floor Income Contracts where the cumulative unrealized gain will equal the amount for which we sold the contract. In our Core Earnings presentation, we recognize the economic effect of these hedges, which generally results in any net settlement cash paid or received being recognized ratably as an interest expense or revenue over the hedged item's life.

The accounting for derivatives requires that changes in the fair value of derivative instruments be recognized currently in earnings, with no fair value adjustment of the hedged item, unless specific hedge accounting criteria are met. We believe that our derivatives are effective economic hedges, and as such, are a critical element of our interest rate and foreign currency risk management strategy. However, some of our derivatives, primarily Floor Income Contracts and certain basis swaps, do not qualify for hedge accounting treatment and the stand-alone derivative must be marked-to-market in the income statement with no consideration for the corresponding change in fair value of the hedged item. These gains and losses recorded in Gains (losses) on derivative and hedging activities, net are primarily caused by interest rate and foreign currency exchange rate volatility and changing credit spreads during the period as well as the volume and term of derivatives not receiving hedge accounting treatment.

Our Floor Income Contracts are written options that must meet more stringent requirements than other hedging relationships to achieve hedge effectiveness. Specifically, our Floor Income Contracts do not qualify for hedge accounting treatment because the pay down of principal of the student loans underlying the Floor Income embedded in those student loans does not exactly match the change in the notional amount of our written Floor Income Contracts. Under derivatives accounting treatment, the upfront payment is deemed a liability and changes in fair value are recorded through income throughout the life of the contract. The change in the value of Floor Income Contracts is primarily caused by changing interest rates that cause the amount of Floor Income earned on the underlying student loans and paid to the counterparties to vary. This is economically offset by the change in value of the student loan portfolio earning Floor Income but that offsetting change in value is not recognized. We believe the Floor Income Contracts are economic hedges because they effectively fix the amount of Floor Income earned over the contract period, thus eliminating the timing and uncertainty that changes in interest rates can have on Floor Income for that period. Therefore, for purposes of Core Earnings, we have removed the unrealized gains and losses related to these contracts and added back the amortization of the net premiums received on the Floor Income Contracts. The amortization of the net premiums received on the Floor Income

Contracts for Core Earnings is reflected in student loan interest income. Under GAAP accounting, the premium received on the Floor Income Contracts is recorded as revenue in the gains (losses) on derivatives and hedging activities, net line item by the end of the contracts life.

Basis swaps are used to convert floating rate debt from one floating interest rate index to another to better match the interest rate characteristics of the assets financed by that debt. We primarily use basis swaps to hedge our student loan assets that are primarily indexed to a commercial paper, Prime or Treasury bill index. In addition, we use basis swaps to convert debt indexed to the Consumer Price Index to three-month LIBOR debt. The accounting for derivatives requires that when using basis swaps, the change in the cash flows of the hedge effectively offset both the change in the cash flows of the asset and the change in the cash flows of the liability. Our basis swaps hedge variable interest rate risk; however, they generally do not meet this effectiveness test because the index of the swap does not exactly match the index of the hedged assets as required for hedge accounting treatment. Additionally, some of our FFELP Loans can earn at either a variable or a fixed interest rate depending on market interest rates and therefore swaps written on the FFELP Loans do not meet the criteria for hedge accounting treatment. As a result, under GAAP, these swaps are recorded at fair value with changes in fair value reflected currently in the income statement.

The table below quantifies the adjustments for derivative accounting on our net income for the three and nine months ended September 30, 2011 and 2010.

(Dollars in millions)	Three Months Ended September 30,		Nine Months Ended September 30,	
	2011	2010	2011	2010
Core Earnings derivative adjustments:				
Gains (losses) on derivative and hedging activities, net, included in other income ⁽¹⁾	\$ (480)	\$ (344)	\$ (1,231)	\$ (331)
Plus: Realized losses on derivative and hedging activities, net ⁽¹⁾	228	182	598	613
Unrealized gains (losses) on derivative and hedging activities, net	(252)	(162)	(633)	282

Total net impact derivative accounting⁽²⁾	\$ (371)	\$ (269)	\$ (917)	\$ 9

⁽¹⁾ See *Reclassification of Realized Gains (Losses) on Derivative and Hedging Activities* below for a detailed breakdown of the components of realized losses on derivative and hedging activities.

⁽²⁾ Negative amounts are subtracted from Core Earnings net income to arrive at GAAP net income and positive amounts are added to Core Earnings net income to arrive at GAAP net income.

Reclassification of Realized Gains (Losses) on Derivative and Hedging Activities

The accounting for derivative instruments requires net settlement income/expense on derivatives and realized gains/losses related to derivative dispositions (collectively referred to as realized gains (losses) on derivative and hedging activities) that do not qualify as hedges to be recorded in a separate income statement line item below net interest income. Under our Core Earnings presentation, these gains and losses are reclassified to the income statement line item of the economically hedged item. For our Core Earnings net interest margin, this would primarily include: (a) reclassifying the net settlement amounts related to our Floor Income Contracts to student loan interest income and (b) reclassifying the net settlement amounts related to certain of our basis swaps to debt interest expense. The table below summarizes the realized losses on derivative and hedging activities and the associated reclassification on a Core Earnings basis for the three and nine months ended September 30, 2011 and 2010.

(Dollars in millions)	Three Months		Nine Months	
	Ended September 30,		Ended September 30,	
	2011	2010	2011	2010
Reclassification of realized gains (losses) on derivative and hedging activities:

Premium amortization	(.14)	(.16)	(.15)	(.18)
Core Earnings basis FFELP student loan net yield	1.99	2.01	2.01	1.94
Core Earnings basis FFELP student loan cost of funds	(.96)	(.97)	(.96)	(.94)
Core Earnings basis FFELP student loan spread	1.03	1.04	1.05	1.00
Core Earnings basis FFELP other asset spread impact	(.06)	(.10)	(.07)	(.09)
Core Earnings basis FFELP Loans net interest margin ⁽¹⁾	.97%	.94%	.98%	.91%
Core Earnings basis FFELP Loans net interest margin ⁽¹⁾	.97%	.94%	.98%	.91%
Adjustment for GAAP accounting treatment	.38	.25	.35	.33
GAAP-basis FFELP Loans net interest margin ⁽¹⁾	1.35%	1.19%	1.33%	1.24%

⁽¹⁾ The average balances of our FFELP interest-earning assets for the respective periods are:

(Dollars in millions)

FFELP Loans	\$ 141,848	\$ 147,822	\$ 144,389	\$ 146,937
Other interest-earning assets	4,784	5,522	4,927	5,610
Total FFELP Core Earnings basis interest-earning assets	\$ 146,632	\$ 153,344	\$ 149,316	\$ 152,547

The increase in the Core Earnings basis FFELP Loans net interest margin of 7 basis points for the nine months ended September 30, 2011 compared with the nine months ended September 30, 2010 was primarily the result of an increase in Floor Income due to lower interest rates.

As of September 30, 2011, our FFELP Loan portfolio totaled approximately \$140.7 billion, comprised of \$51.7 billion of FFELP Stafford and \$89.0 billion of FFELP Consolidation Loans. The weighted-average life of these portfolios is 5.0 years and 9.2 years, respectively, assuming a Constant Prepayment Rate (CPR) of 5 percent and 3 percent, respectively.

Floor Income

The following table analyzes the ability of the FFELP Loans in our portfolio to earn Floor Income after September 30, 2011 and 2010, based on interest rates as of those dates.

(Dollars in billions)	September 30, 2011			September 30, 2010		
	Fixed	Variable	Total	Fixed	Variable	Total
	Borrower Rate	Borrower Rate		Borrower Rate	Borrower Rate	
Student loans eligible to earn Floor Income	\$ 120.1	\$ 18.3	\$ 138.4	\$ 125.1	\$ 18.3	\$ 143.4
Less: post-March 31, 2006 disbursed loans required to rebate Floor Income	(63.6)	(1.2)	(64.8)	(74.7)	(1.1)	(75.8)
Less: economically hedged Floor Income Contracts	(41.5)		(41.5)	(39.2)		(39.2)
Student loans eligible to earn Floor Income	\$ 15.0	\$ 17.1	\$ 32.1	\$ 11.2	\$ 17.2	\$ 28.4
Student loans earning Floor Income	\$ 15.0	\$ 2.6	\$ 17.6	\$ 11.1	\$ 2.7	\$ 13.8

We have sold Floor Income Contracts to hedge the potential Floor Income from specifically identified pools of FFELP Consolidation Loans that are eligible to earn Floor Income.

The following table presents a projection of the average balance of FFELP Consolidation Loans for which Fixed Rate Floor Income has been economically hedged through Floor Income Contracts for the period October 1, 2011 to June 30, 2016. The hedges related to these loans do not qualify as effective hedges.

(Dollars in billions)	October 1, 2011 to					
	December 31, 2011	2012	2013	2014	2015	2016
Average balance of FFELP Consolidation Loans whose Floor Income is economically hedged	\$ 41.5	\$ 38.3	\$ 32.6	\$ 28.3	\$ 27.2	\$ 10.4

FFELP Loans Provision for Loan Losses and Charge-Offs

The following table summarizes the total FFELP Loan provision for loan losses and charge-offs for the three and nine months September 30, 2011 and 2010.

(Dollars in millions)	Three Months Ended September 30,		Nine Months Ended September 30,	
	2011	2010	2011	2010
FFELP Loan provision for loan losses	\$ 21	\$ 25	\$ 67	\$ 76
FFELP Loan charge-offs	18	21	59	67

Operating Expenses FFELP Loans Segment

Operating expenses for our FFELP Loans segment primarily include the contractual rates we pay to service loans in term asset-backed securitization trusts or a similar rate if a loan is not in a term financing facility (which are presented as an intercompany charge from the Business Services segment who services the loans), the fees we pay for third-party loan servicing and costs incurred to acquire loans. The increases in operating expenses in the three and nine months ended September 30, 2011 compared with the three and nine months ended September 30, 2010 were primarily the result of the increase in servicing costs related to the \$25 billion loan portfolio acquisition on December 31, 2010. Operating expenses, excluding restructuring-related asset impairments, were 52 basis points and 49 basis points of average FFELP Loans in the quarters ended September 30, 2011 and 2010, respectively, and 53 basis points and 50 basis points for the nine months ended September 30, 2011 and 2010, respectively.

Consumer Lending Segment

The following table includes Core Earnings results for our Consumer Lending segment.

(Dollars in millions)	Three Months Ended September 30,		% Increase (Decrease) 2011 vs. 2010	Nine Months Ended September 30,		% Increase (Decrease) 2011 vs. 2010
	2011	2010		2011	2010	
Core Earnings interest income:						
Private Education Loans	\$ 609	\$ 611	%	\$ 1,813	\$ 1,751	4%
Cash and investments	2	4	(50)	7	11	(36)
Total Core Earnings interest income	611	615	(1)	1,820	1,762	3
Total Core Earnings interest expense	204	206	(1)	603	562	7
Net Core Earnings interest income	407	409		1,217	1,200	1
Less: provisions for loan losses	384	330	16	924	1,004	(8)

Direct operating expenses	82	99	(17)	237	265	(11)
Restructuring expenses		2	(100)	2	5	(60)
Total expenses	82	101	(19)	239	270	(11)
Income (loss) from continuing operations, before income tax expense (benefit)	(43)	(5)	760	102	(17)	700
Income tax expense (benefit)	(16)	(2)	700	37	(6)	717
Core Earnings (loss)	\$ (27)	\$ (3)	800%	\$ 65	\$ (11)	691%

Core Earnings loss was \$27 million for the three months ended September 30, 2011, compared with a net loss of \$3 million in the year-ago period. We recorded an additional \$124 million of provision for Private Education Loan losses in the third quarter of 2011 attributable to the adoption of new accounting guidance for TDRs. The adoption of this new accounting guidance resulted in the increase in Core Earnings loss in the third quarter of 2011 versus the year-ago quarter.

Highlights vs. third-quarter 2010 included:

Loan originations increased to \$1.1 billion, up 29 percent from \$835 million.

The portfolio, net of loan loss allowance, totaled \$36.2 billion at September 30, 2011, compared with \$35.5 billion at September 30, 2010.

Net interest margin, before loan loss provision, improved to 4.0 percent, up from 3.9 percent.

TDR adoption increased the provision for loan losses to \$384 million, compared with \$330 million a year ago.

Edgar Filing: SLM CORP - Form 10-Q

Delinquencies of 90 days or more (as a percentage of loans in repayment) improved to 5.0 percent, compared with 5.7 percent.

The annual charge-off rate (as a percentage of loans in repayment) improved to 3.7 percent, compared with 5.4 percent.

Consumer Lending Net Interest Margin

The following table shows the Consumer Lending Core Earnings net interest margin along with reconciliation to the GAAP-basis Consumer Lending net interest margin before provision for loan losses.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2011	2010	2011	2010
Core Earnings basis Private Education Student Loan yield	6.39%	6.27%	6.34%	6.10%
Discount amortization	.18	.40	.24	.32
Core Earnings basis Private Education Loan net yield	6.57	6.67	6.58	6.42
Core Earnings basis Private Education Loan cost of funds	(2.00)	(1.94)	(2.00)	(1.78)
Core Earnings basis Private Education Loan spread	4.57	4.73	4.58	4.64
Core Earnings basis other asset spread impact	(.54)	(.86)	(.52)	(.81)
Core Earnings basis Consumer Lending net interest margin ⁽¹⁾	4.03%	3.87%	4.06%	3.83%
Core Earnings basis Consumer Lending net interest margin ⁽¹⁾	4.03%	3.87%	4.06%	3.83%
Adjustment for GAAP accounting treatment	(.09)	.01	(.06)	.02
GAAP-basis Consumer Lending net interest margin ⁽¹⁾	3.94%	3.88%	4.00%	3.85%

⁽¹⁾ The average balances of our Consumer Lending interest-earning assets for the respective periods are:

(Dollars in millions)

Private Education Loans	\$ 36,772	\$ 36,317	\$ 36,853	\$ 36,487
Other interest-earning assets	3,280	5,541	3,183	5,375
Total Consumer Lending Core Earnings basis interest-earning assets	\$ 40,052	\$ 41,858	\$ 40,036	\$ 41,862

The increase in the Core Earnings basis Consumer Lending net interest margin over both the year-ago quarter and nine month period was primarily the result of a benefit from the decline in the average balance of our other asset portfolio, which more than offset the effect of the lower discount amortization due to lower prepayment speeds. The size of the other asset portfolio, which is primarily securitization trust restricted cash and cash held at Sallie Mae Bank (the Bank), has decreased significantly. This other asset portfolio earns a negative yield and as a result, when its relative weighting decreases compared to the Private Education Loan portfolio, the overall net interest margin increases.

Private Education Loans Provision for Loan Losses and Charge-Offs

The following tables summarize the total Private Education Loans provision for loan losses and charge-offs for the quarters ended September 30, 2011 and 2010 and for the nine months ended September 30, 2011 and 2010.

(Dollars in millions)	Three Months Ended		Nine Months Ended	
	September 30, 2011	September 30, 2010	September 30, 2011	September 30, 2010
Provision for Private Education Loan losses:				
Provision for losses, excluding the impact of new TDR accounting guidance implemented in third-quarter 2011	\$ 260	\$ 330	\$ 800	\$ 1,004
Provision for losses related to new TDR accounting guidance implemented in third-quarter 2011	124		124	
Total provision for Private Education Loan losses	\$ 384	\$ 330	\$ 924	\$ 1,004
Private Education Loan charge-offs	\$ 272	\$ 348	\$ 809	\$ 968

We recorded an additional \$124 million of provision for Private Education Loan losses in the third quarter of 2011 to reflect the cumulative, year-to-date effect of adopting new accounting rules related to TDRs. For a complete discussion of the effect of these new rules on our provision for Private Education Loan losses, see Critical Accounting Policies and Estimates Recently Adopted Accounting Standards Troubled Debt Restructurings .

In establishing the allowance for Private Education Loan losses for the third quarter of 2011, we considered several additional emerging environmental factors with respect to our Private Education Loan portfolio. In particular, we continue to see improving credit quality and continuing positive delinquency and charge-off trends in connection with this portfolio. Improving credit quality is seen in higher FICO scores and cosigner rates as well as a more seasoned portfolio compared to the year-ago quarter. The overall delinquency rate has declined to 10.3 percent from 11.1 percent and the charge-off rate has declined to 3.7 percent from 5.4 percent compared to the year-ago quarter.

In contrast to these overall improvements in credit quality, delinquency and charge-off trends, Private Education Loans which defaulted between 2008 and 2011 for which we have previously charged off estimated losses have, to varying degrees, not met our recovery expectations to date and may continue not to do so. According to our policy, we have been charging off these periodic shortfalls in expected recoveries against our allowance for Private Education Loan losses and the related receivable for partially charged-off Private Education Loans and we will continue to do so. Differences in actual future recoveries on these defaulted loans could affect our receivable for partially charged-off Private Education Loans. We have increased our provision for Private Education Loan losses in the third quarter of 2011 in the amount of \$143 million to reflect these uncertainties. Continuing historically high unemployment rates may negatively affect future Private Education Loan default and recovery expectations over our estimated two-year loss confirmation period. Consequently, in accordance with our policy, we have also given consideration to these factors in projecting charge-offs for this period and establishing our allowance for Private Education Loan losses. We will continue to monitor defaults and recoveries in light of the continuing weak economy and high unemployment rates. For a more detailed discussion of our policy for determining the collectability of Private Education Loans and maintaining our allowance for Private Education Loan losses, see Note 2, Significant Accounting Policies to our Consolidated Financial Statements contained in our Form 10-K for the fiscal year ended December 31, 2010.

Operating Expenses Consumer Lending Segment

Operating expenses for our Consumer Lending segment include costs incurred to originate Private Education Loans and to service and collect on our Private Education Loan portfolio. The decreases in operating expenses in the three and nine months ended September 30, 2011 compared with the three and nine months ended September 30, 2010 were primarily the result of our cost cutting initiatives. Operating expenses, excluding restructuring-related asset impairments, were 88 basis points and 108 basis points of average Private Education Loans in the quarters ended September 30, 2011 and 2010, respectively, and 86 basis points and 97 basis points of average Private Education Loans in the nine months ended September 30, 2011 and 2010, respectively.

Business Services Segment

The following tables include Core Earnings results for our Business Services segment.

(Dollars in millions)	Three Months Ended		%	Nine Months Ended		%

Core Earnings	\$ 139	\$ 131	6%	\$ 410	\$ 398	3%

Our Business Services segment earns intercompany loan servicing fees from servicing the FFELP Loans in our FFELP Loans segment. The average balance of this portfolio was \$140 billion and \$133 billion for the quarters ended September 30, 2011 and 2010 and \$142 billion and \$133 billion for the nine months ended September 30, 2011 and 2010, respectively. The increase in intercompany loan servicing revenue from the year-ago periods is primarily the result of the acquisition of the \$25 billion FFELP Loan portfolio on December 31, 2010 which was partially offset by the amortization of the underlying portfolio as well as the FFELP Loans sold to ED as part of the Participation Program in 2010.

We are servicing approximately 3.4 million accounts under the ED Servicing Contract as of September 30, 2011. Third-party loan servicing fees in the third quarter of 2011 and the third quarter of 2010 included \$16 million and \$10 million, respectively, of servicing revenue related to the ED Servicing Contract. Our allocation of loans awarded for servicing under the ED contract increased from 22 percent to 26 percent for the contract year ending August 2012. The increase was driven primarily by our top ranking for default prevention performance results.

The decrease in Guarantor servicing revenue compared with the year-ago quarter and nine-month period was primarily due to 2010 legislation that eliminated the origination of new FFELP Loans, thereby eliminating Guarantor issuance fees on new FFELP Loans. Outstanding FFELP Loans on which we earn additional fees also declined.

Other servicing revenue includes account asset servicing revenue and Campus Solutions revenue. Account asset servicing revenue represents fees earned on program management, transfer and servicing agent services and administration services for our various 529 college-savings plans. Assets under administration in our 529 college-savings plans totaled \$34.5 billion as of September 30, 2011, a 28 percent increase from the year-ago quarter. Campus Solutions revenue is earned from our Campus Solutions business whose services include comprehensive financing and transaction processing solutions that we provide to college financial aid offices and students to streamline the financial aid process.

The following table presents the outstanding inventory of contingent collections receivables that our Business Services segment will collect on behalf of others.

(Dollars in millions)	September 30, 2011	September 30, 2010
Student loans	\$ 10,839	\$ 9,781
Other	2,133	1,648
Total	\$ 12,972	\$ 11,429

Other Business Services revenue is primarily transaction fees that are earned in conjunction with our rewards program from participating companies based on member purchase activity, either online or in stores, depending on the contractual arrangement with the participating company. Typically, a percentage of the purchase price of the consumer members' eligible purchases with participating companies is set aside in an account maintained by us on behalf of our members.

Revenues related to services performed on FFELP Loans accounted for 78 percent of total segment revenues for both of the quarters ended September 30, 2011 and 2010, respectively, and 78 percent and 79 percent for the nine months ended September 30, 2011 and 2010, respectively.

On September 1, 2011, we completed the acquisition of SC Services & Associates, Inc., a provider of collections services to local governments and courts. This acquisition will enhance and complement our other contingency collection businesses.

Operating Expenses Business Services Segment

Operating expenses for the three and nine months ended September 30, 2011 decreased from the three and nine months ended September 30, 2010 primarily as a result of our cost cutting initiatives. Included in operating expenses for the first nine months of 2011 is approximately \$33 million in third-party servicing costs associated with our acquisition of \$25 billion in loans at the end of 2010. During the third quarter 2011 we began transitioning these loans to our own servicing platform and completed the transfer in October 2011. With the portfolio fully transitioned, the future servicing costs associated with these loans will decline significantly.

Other Segment

Purchased Paper Business

Our Purchased Paper businesses are presented as discontinued operations for the current and prior periods (see Consolidated Earnings Summary GAAP-basis for a further discussion). We sold our Purchased Paper Non-Mortgage business, resulting in a \$35 million gain, in the third quarter of 2011.

Gains on Debt Repurchases

We began repurchasing our outstanding debt in the second quarter of 2008. We repurchased \$9 million and \$882 million face amount of our senior unsecured notes for the quarters ended September 30, 2011 and 2010, respectively, and \$894 million and \$3.6 billion for the nine months ended September 30, 2011 and 2010, respectively.

Overhead

Corporate overhead is comprised of costs related to executive management, the board of directors, accounting, finance, legal, human resources and stock compensation expense. Unallocated information technology costs are related to infrastructure and operations.

The increase in corporate overhead for the three-month period ended September 30, 2011 compared with the three-month period ended September 30, 2010 was primarily the result of \$15 million of additional expense related to the anticipated termination of our defined benefit pension plan due to changes in estimates related to the employee termination benefits as well as changes in interest rates.

The increase in corporate overhead for the nine-month period ended September 30, 2011 compared with the nine-month period ended September 30, 2010, was primarily the result of a change in the terms of our stock compensation plans, additional expense related to the anticipated termination of our defined benefit pension plan, and restructuring-related consulting expenses incurred in the first half of 2011. In the first quarter of 2011, we changed our stock compensation plans so that retirement eligible employees would not forfeit unvested stock compensation upon their retirement. This change had the effect of accelerating the future stock compensation expenses associated with these unvested stock grants into the current period for those retirement-eligible employees.

Financial Condition

This section provides additional information regarding the changes related to our loan portfolio assets and related liabilities as well as credit performance indicators related to our loan portfolio.

Subsequent to the adoption of the new consolidation accounting guidance on January 1, 2010, our GAAP and Core Earnings loan portfolios are identical, as all of our securitization trusts are treated as on-balance sheet for GAAP now. Hence, in referencing the total loan portfolio, ending and average loan balances, provision for loan losses and charge-offs, we no longer distinguish between the two as they are the same, unless otherwise noted.

Average Balance Sheets GAAP

The following table reflects the rates earned on interest-earning assets and paid on interest-bearing liabilities for the three and nine months ended September 30, 2011 and 2010. This table reflects our net interest margin on a consolidated basis.

Rate/Volume Analysis GAAP

The following rate/volume analysis shows the relative contribution of changes in interest rates and asset volumes.

(Dollars in millions)	Increase (Decrease)	Change Due To ⁽¹⁾	
		Rate	Volume
Three Months Ended September 30, 2011 vs. 2010			
Interest income	\$ (35)	\$ 22	\$ (57)
Interest expense	(48)	(19)	(29)
Net interest income	\$ 13	\$ 46	\$ (33)
Nine Months Ended September 30, 2011 vs. 2010			
Interest income	\$ 67	\$ 163	\$ (96)
Interest expense	38	90	(52)
Net interest income	\$ 29	\$ 86	\$ (57)

⁽¹⁾ Changes in income and expense due to both rate and volume have been allocated in proportion to the relationship of the absolute dollar amounts of the change in each. The changes in income and expense are calculated independently for each line in the table. The totals for the rate and volume columns are not the sum of the individual lines.

Loans in forbearance as a percentage of loans in repayment and forbearance	4.3%	6.7%	4.5%	4.1%	6.1%	4.3%
Loans that entered repayment during the period ⁽²⁾	\$ 843	\$ 46	\$ 889	\$ 1,071	\$ 83	\$ 1,154
Percentage of Private Education Loans with a cosigner	65%	29%	61%	63%	28%	59%
Average FICO at origination	726	624	717	725	623	715

⁽¹⁾ Ending total loans represents gross Private Education Loans, plus the receivable for partially charged-off loans.

⁽²⁾ Includes loans that are required to make a payment for the first time.

As part of concluding on the adequacy of the allowance for loan loss, we review key allowance and loan metrics. The most significant of these metrics considered are the allowance coverage of charge-offs ratio; the allowance as a percentage of total loans and of loans in repayment; and delinquency and forbearance percentages.

Use of Forbearance as a Private Education Loan Collection Tool

Forbearance involves granting the borrower a temporary cessation of payments (or temporary acceptance of smaller than scheduled payments) for a specified period of time. Using forbearance extends the original term of the loan. Forbearance does not grant any reduction in the total repayment obligation (principal or interest). While in forbearance status, interest continues to accrue and is capitalized to principal when the loan re-enters repayment status. Our forbearance policies include limits on the number of forbearance months granted consecutively and the total number of forbearance months granted over the life of the loan. In some instances, we require good-faith payments before granting forbearance. Exceptions to forbearance policies are permitted when such exceptions are judged to increase the likelihood of collection of the loan. Forbearance as a collection tool is used most effectively when applied based on a borrower's unique situation, including historical information and judgments. We leverage updated borrower information and other decision support tools to best determine who will be granted forbearance based on our expectations as to a borrower's ability and willingness to repay their obligation. This strategy is aimed at mitigating the overall risk of the portfolio as well as encouraging cash resolution of delinquent loans.

Forbearance may be granted to borrowers who are exiting their grace period to provide additional time to obtain employment and income to support their obligations, or to current borrowers who are faced with a hardship and request forbearance time to provide temporary payment relief. In these circumstances, a borrower's loan is placed into a forbearance status in limited monthly increments and is reflected in the forbearance status at month-end during this time. At the end of their granted forbearance period, the borrower will enter repayment status as current and is expected to begin making their scheduled monthly payments on a go-forward basis.

Forbearance may also be granted to borrowers who are delinquent in their payments. In these circumstances, the forbearance cures the delinquency and the borrower is returned to a current repayment status. In more limited instances, delinquent borrowers will also be granted additional forbearance time.

The table below reflects the historical effectiveness of using forbearance. Our experience has shown that three years after being granted forbearance for the first time, 66 percent of the loans are current, paid in full, or receiving an in-school grace or deferment, and 19 percent have defaulted. The default experience associated with loans which utilize forbearance is considered in our allowance for loan losses. Since 2009, we have reduced the amount of time a loan will spend in forbearance, thereby increasing our ongoing contact with the borrower to encourage consistent repayment behavior once the loan is returned to a current repayment status. As a result, the balance of loans in a forbearance status as of month-end has decreased since 2008. The monthly average number of loans granted forbearance as a percentage of loans in repayment and forbearance increased to 5.3 percent in the third quarter of 2011 compared with the year-ago quarter of 5.1 percent. As of September 30, 2011, 3.0 percent of loans in current status were delinquent as of the end of the prior month, but were granted a forbearance that made them current as of September 30, 2011 (borrowers made payments on approximately 21 percent of these loans immediately prior to being granted forbearance).

Tracking by First Time in Forbearance Compared to All Loans Entering Repayment

	Status distribution 36 months after being granted forbearance for the first time	Status distribution 36 months after entering repayment (all loans)	Status distribution 36 months after entering repayment for loans never entering forbearance
In-school/grace/deferment	9.5%	8.7%	4.5%
Current	49.5	57.5	65.1
Delinquent 31-60 days	3.1	2.0	0.4
Delinquent 61-90 days	1.9	1.1	0.2
Delinquent greater than 90 days	4.8	2.7	0.3
Forbearance	4.4	3.4	
Defaulted	19.4	10.4	5.5
Paid	7.4	14.2	24.0
Total	100%	100%	100%

Edgar Filing: SLM CORP - Form 10-Q

The tables below show the composition and status of the Private Education Loan portfolio aged by number of months in active repayment status (months for which a scheduled monthly payment was due). As indicated in the tables, the percentage of loans in forbearance status decreases the longer the loans have been in active repayment status. At September 30, 2011, loans in forbearance status as a percentage of loans in repayment and forbearance were 6.6 percent for loans that have been in active repayment status for less than 25 months. The percentage drops to 1.4 percent for loans that have been in active repayment status for more than 48 months. Approximately 80 percent of our Private Education Loans in forbearance status has been in active repayment status less than 25 months.

(Dollars in millions)	Monthly Scheduled Payments Due					More than 48	Not Yet in Repayment	Total

Receivable for Partially Charged-Off Private Education Loans

At the end of each month, for loans that are 212 days past due, we charge off the estimated loss of a defaulted loan balance. Actual recoveries are applied against the remaining loan balance that was not charged off. We refer to this remaining loan balance as the receivable for partially charged-off loans. If actual periodic recoveries are less than expected, the difference is immediately charged off through the allowance for loan losses with an offsetting reduction in the receivable for partially charged-off Private Education Loans. If actual periodic recoveries are greater than expected, they will be reflected as a recovery through the allowance for Private Education Loan losses once the cumulative recovery amount exceeds the cumulative amount originally expected to be recovered. There was \$143 million in provision for Private Education Loan losses recorded in the third quarter of 2011 to reflect possible additional future charge-offs related to the receivable for partially charged-off Private Education Loans (see Consumer Lending Segment Private Education Loans Provision for Loan Losses and Charge-Offs for a further discussion).

The following table summarizes the activity in the receivable for partially charged-off Private Education Loans for the three and nine months ended September 30, 2011, and 2010.

(Dollars in millions)	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2011	2010	2011	2010
Receivable at beginning of period GAAP-basis	\$ 1,140	\$ 888	\$ 1,039	\$ 499
Consolidation of off-balance sheet trusts ⁽¹⁾				229
Receivable at beginning of period	1,140	888	1,039	728
Expected future recoveries of current period defaults ⁽²⁾	100	126	292	348
Recoveries ⁽³⁾	(39)	(29)	(115)	(78)
Charge-offs ⁽⁴⁾	(9)	(6)	(24)	(19)
Receivable at end of period	\$ 1,192	\$ 979	\$ 1,192	\$ 979

⁽¹⁾ Upon the adoption of the new consolidation accounting guidance on January 1, 2010, we consolidated all of our off-balance sheet securitization trusts.

⁽²⁾ Remaining loan balance expected to be collected from contractual loan balances partially charged-off during the period. This is the difference between the defaulted loan balance and the amount of the defaulted loan balance that was charged off.

⁽³⁾ Current period cash collections of amounts originally expected to be recovered.

Edgar Filing: SLM CORP - Form 10-Q

(4) Represents the current period recovery shortfall the difference between what was expected to be collected and what was actually collected.

Private Education Loan Repayment Options

Certain loan programs allow borrowers to select from a variety of repayment options depending on their loan type and their enrollment/loan status, which include the ability to extend their repayment term or change their monthly payment. The chart below provides the optional repayment offerings in addition to the standard level principal and interest payments as of September 30, 2011.

(Dollars in millions)	Loan Program				Total
	Signature and Other	Smart Option	Career Training		
\$ in Repayment	\$23,057	\$4,006	\$1,859		\$28,922
\$ in Total	31,626	4,421	1,928		37,975
Payment method by enrollment status:					
In-school/Grace		Deferred ⁽¹⁾ ,			
	Deferred ⁽¹⁾	Interest-only or fixed \$25/month	Interest-only or fixed \$25/month		
Repayment	Level principal and interest or graduated	Level principal and interest	Level principal and interest		

⁽¹⁾ Deferred includes loans for which no payments are required and interest charges are capitalized into the loan balance.

The graduated repayment program that is part of Signature and Other Loans includes an interest-only payment feature that may be selected at the option of the borrower. Borrowers elect to participate in this program at the time they enter repayment following their grace period. This program is available to borrowers in repayment, after their grace period, who would like a temporary lower payment from the required principal and interest payment amount. Borrowers participating in this program pay monthly interest with no amortization of their principal balance for up to 48 payments after entering repayment (dependent on the loan product type). The maturity date of the loan is not extended when a borrower participates in this program. As of September 30, 2011 and 2010, borrowers in repayment owing approximately \$7.0 billion (24 percent of loans in repayment) and \$7.2 billion (28 percent of loans in repayment), respectively, were enrolled in the interest-only program. Of these amounts, 12 percent and 13 percent were non-traditional loans as of September 30, 2011 and 2010, respectively.

Liquidity and Capital Resources

Recent market volatility has elevated the potential cost of capital markets issuance. Regardless, we continue to expect to fund our ongoing liquidity needs, including the origination of new Private Education Loans and the repayment of \$3.6 billion of senior unsecured notes maturing in the next twelve months, primarily through our current cash and investment position and the collection of additional bank deposits, the very predictable operating cash flows provided by earnings and repayment of principal on unencumbered student loan assets, and distributions from our securitization trusts (including servicing fees which are priority payments within the trusts). We may also draw down on FFELP ABCP Facilities and the facility with the Federal Home Loan Bank in Des Moines (the FHLB-DM Facility); and we may also issue term ABS and unsecured debt.

Currently, new Private Education Loan originations are initially funded through deposits and subsequently securitized to term on a programmatic basis. We have \$1.1 billion of cash at the Bank as of September 30, 2011 available to fund future originations.

Sources of Liquidity and Available Capacity

The following tables detail our main sources of primary liquidity and our main sources of secondary liquidity (unused secured credit facilities contingent upon obtaining eligible collateral) outstanding at September 30, 2011 and December 31, 2010 and the average balances for the three and nine months ended September 30, 2011 and 2010.

(Dollars in millions)	September 30, 2011	As of December 31, 2010
Sources of primary liquidity:		
Unrestricted cash and liquid investments:		
Cash and cash equivalents	\$ 3,523	\$ 4,342
Investments	76	85
Total unrestricted cash and liquid investments⁽¹⁾	\$ 3,599	\$ 4,427
Unencumbered FFELP Loans	\$ 1,005	\$ 1,441
Sources of secondary liquidity contingent on obtaining eligible collateral:		
Unused secured credit facilities: FFELP ABCP Facilities and FHLB-DM Facility ⁽²⁾	\$ 10,972	\$ 12,601

⁽¹⁾ At September 30, 2011 and December 31, 2010, ending balances include \$1.1 billion and \$2.0 billion, respectively, of cash and liquid investments at the Bank. This cash will be used primarily to originate or acquire student loans.

⁽²⁾ Current borrowing capacity under the FFELP ABCP Facilities and FHLB-DM Facility is determined based on qualifying collateral from the unencumbered FFELP Loans reported in primary liquidity above. Additional borrowing capacity would primarily be used to fund FFELP Loan portfolio acquisitions and to refinance FFELP Loans used as collateral in the ED Conduit Program Facility. The total amount we can borrow is contingent upon obtaining eligible collateral. If we use our unencumbered FFELP Loans as collateral to borrow against these facilities, the remaining amount we could borrow is reduced accordingly.

(Dollars in millions)	Average Balances Three Months Ended		Average Balances Nine Months Ended	
	September 30,		September 30,	
	2011	2010	2011	2010
Sources of primary liquidity:				
Unrestricted cash and liquid investments:				
Cash and cash equivalents	\$ 4,025	\$ 6,127	\$ 3,886	\$ 6,150
Investments	130	85	103	96
Total unrestricted cash and liquid investments⁽¹⁾	\$ 4,155	\$ 6,212	\$ 3,989	\$ 6,246
Unused bank lines of credit	\$	\$ 1,590	\$	\$ 2,451
Unencumbered FFELP Loans	\$ 873	\$ 1,753	\$ 1,571	\$ 1,978
Sources of secondary liquidity contingent on obtaining eligible collateral:				
Unused secured credit facilities: FFELP ABCP Facilities and FHLB-DM Facility ⁽²⁾	\$ 10,867	\$ 13,953	\$ 11,436	\$ 12,647

⁽¹⁾ For the three months ended September 30, 2011 and 2010, average balances include \$1.4 billion and \$2.7 billion, respectively, of cash and liquid investments at the Bank. For the nine months ended September 30, 2011 and 2010, average balances include \$1.3 billion and \$2.5 billion, respectively, of cash and liquid investments at the Bank.

⁽²⁾ Current borrowing capacity under the FFELP ABCP Facilities and FHLB-DM Facility is determined based on qualifying collateral from the unencumbered FFELP Loans reported in primary liquidity above. Additional borrowing capacity would primarily be used to fund FFELP Loan portfolio acquisitions and to refinance FFELP Loans used as collateral in the ED Conduit Program Facility. The total amount we can borrow is contingent upon obtaining eligible collateral. If we use our unencumbered FFELP Loans as collateral to borrow against these facilities, the remaining amount we could borrow is reduced accordingly.

In addition to the assets listed in the table above, we hold a number of other unencumbered assets, consisting primarily of Private Education Loans and other assets. At September 30, 2011, we had a total of \$21.7 billion of unencumbered assets (which includes the assets that comprise our primary liquidity and are available to serve as collateral for our secondary liquidity), excluding goodwill and acquired intangibles. Total student loans, net, comprised \$12.0 billion of our unencumbered assets of which \$11.0 billion and \$1.0 billion related to Private Education Loans, net and FFELP Loans, net, respectively.

For a discussion of our various sources of liquidity, such as the ED Conduit Program, the Sallie Mae Bank, our continued access to the ABS market, our asset-based financing facilities, the lending agreement we entered into with the FHLB-DM and our issuance of unsecured debt, see Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources to our 2010 Form 10-K.

The following table reconciles encumbered and unencumbered assets and their net impact on total tangible equity.

(Dollars in billions)	September 30, 2011	December 31, 2010
Net assets of consolidated variable interest entities (encumbered assets)	\$ 12.7	\$ 13.1
Tangible unencumbered assets ⁽¹⁾	21.7	22.3
Unsecured borrowings	(25.5)	(26.9)
Mark-to-market on unsecured hedged debt ⁽²⁾	(2.0)	(1.4)
Other liabilities, net	(2.6)	(2.6)
 Total tangible equity	 \$ 4.3	 \$ 4.5

⁽¹⁾ Excludes goodwill and acquired intangible assets.

⁽²⁾ At September 30, 2011 and December 31, 2010, there were \$1.7 billion and \$1.4 billion, respectively, of net gains on derivatives hedging this debt in unencumbered assets, which partially offset these losses.

Transactions During the Third-Quarter 2011

We repurchase our outstanding unsecured debt in both open-market repurchases and public tender offers. Repurchasing debt helps us to better manage our short-term and long-term funding needs by utilizing current excess liquidity to reduce future obligations related to our unsecured borrowings at favorable pricing. In the third quarter of 2011, we repurchased \$9 million face amount of our senior unsecured notes in the aggregate, with maturity dates from 2011.

In the third-quarter 2011, we paid \$144 million to repurchase 9.5 million common shares on the open market as part of our previously announced \$300 million share repurchase program authorization. We have fully utilized this authorization, acquiring a total amount of 19.1 million shares for \$300 million. We declared and paid a \$.10 per share dividend during the third quarter of 2011.

Recent Fourth-Quarter 2011 Transactions

On October 5, 2011, the Company closed on a \$3.4 billion asset-backed commercial paper facility which matures in January 2014. This facility will provide, subject to certain conditions, the financing to call the 2009-B and 2009-C Private Education Loan trust securities. The securities are first callable in November 2011 and January 2012, respectively. The cost of borrowing under the facility is expected to be commercial paper issuance cost plus 1.10 percent, excluding up-front commitment and unused fees.

Counterparty Exposure

Counterparty exposure related to financial instruments arises from the risk that a lending, investment or derivative counterparty will not be able to meet its obligations to us. Risks associated with our lending portfolio are discussed in Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations Financial Condition FFELP Loan Portfolio Performance and Consumer Lending Portfolio Performance.

Our investment portfolio is composed of very short-term securities issued by highly rated issuers limiting our counterparty exposure. Additionally, our investing activity is governed by Board approved limits on the amount that is allowed to be invested with any one issuer based on the credit rating of the issuer, further minimizing our counterparty exposure. Counterparty credit risk is considered when valuing investments and assessing impairment.

Related to derivative transactions, protection against counterparty risk is generally provided by International Swaps and Derivatives Association, Inc. (ISDA) Credit Support Annexes (CSAs). CSAs require a counterparty to post collateral if a potential default would expose the other party to a loss. All derivative contracts entered into by SLM Corporation and the Bank are covered under such agreements and require collateral to be exchanged based on the net fair value of derivatives with each counterparty. Our securitization trusts require collateral in all cases if the counterparty's credit rating is withdrawn or downgraded below a certain level. Additionally, securitizations involving foreign currency notes issued after November 2005 also require the counterparty to post collateral to the trust based on the fair value of the derivative, regardless of credit rating. The trusts are not required to post collateral to the counterparties. In all cases, our exposure is limited to the value of the derivative contracts in a gain position net of any collateral we are holding. We consider counterparties' credit risk when determining the fair value of derivative positions on our exposure net of collateral.

We have liquidity exposure related to collateral movements between us and our derivative counterparties. Movements in the value of the derivatives, which are primarily affected by changes in interest rate and foreign exchange rates, may require us to return cash collateral held or may require us to access primary liquidity to post collateral to counterparties. If our credit ratings are downgraded from current levels, we may be required to segregate unrestricted cash collateral into restricted accounts.

The table below highlights exposure related to our derivative counterparties at September 30, 2011.

(Dollars in millions)	SLM Corporation and Sallie Mae Bank Contracts	Securitization Trust Contracts
Exposure, net of collateral	\$ 180	\$ 988
Percent of exposure to counterparties with credit ratings below S&P AA- or Moody's Aa3	66%	25%
Percent of exposure to counterparties with credit ratings below S&P A- or Moody's A3	0%	1%

Core Earnings Basis Borrowings

The following tables present the ending balances of our Core Earnings basis borrowings at September 30, 2011 and December 31, 2010, and average balances and average interest rates of our Core Earnings basis borrowings for the three and nine months ended September 30, 2011 and 2010. The average interest rates include derivatives that are economically hedging the underlying debt but do not qualify for hedge accounting treatment. (See Core Earnings Definition and Limitations Differences between Core Earnings and GAAP Reclassification of Realized Gains (Losses) on Derivative and Hedging Activities of this Item 2.)

Ending Balances

(Dollars in millions)	September 30, 2011			December 31, 2010		
	Short Term	Long Term	Total	Short Term	Long Term	Total
<i>Unsecured borrowings:</i>						
Senior unsecured debt	\$ 3,553	\$ 15,543	\$ 19,096	\$ 4,361	\$ 15,742	\$ 20,103

(1) Other primarily consists of the obligation to return cash collateral held related to derivatives exposures.

(2) Relates to the acquisition of \$25 billion of student loans at the end of 2010.

Critical Accounting Policies and Estimates

Management's Discussion and Analysis of Financial Condition and Results of Operations addresses our consolidated financial statements, which have been prepared in accordance with generally accepted accounting principles in the United States of America. A discussion of our critical accounting policies, which include allowance for loan losses, premium and discount amortization related to our loan portfolio, fair value measurement, transfers of financial assets and the VIE consolidation model, derivative accounting and goodwill and intangible assets can be found in our Annual Report on Form 10-K for the year ended December 31, 2010. There were no significant changes to these critical accounting policies during the first nine months of 2011 except, related to Private Education Loan allowance for loan losses, (1) we implemented a new model used to estimate defaults as discussed below and (2) we adopted new accounting guidance related to troubled debt restructurings (TDRs).

In determining the allowance for loan losses, we estimate the principal amount of loans that will default over the next two years (two years being the expected period between a loss event and default) and how much we will recover over time related to the defaulted amount. In the first quarter of 2011, we implemented a new model to estimate the Private Education Loan default amount. Both the prior model and new model are considered migration models. Our prior allowance model (in place through December 31, 2010) segmented the portfolio into categories of similar risk characteristics based on loan program type, school type, loan status, seasoning, underwriting criteria (credit scores) and the existence or absence of a cosigner using school type, credit scores, cosigner status, loan status and seasoning as the primary risk characteristics. Our new model uses these same primary risk characteristics but also further segments the portfolio by the number of months the loan is in its repayment period (seasoning). While our previous allowance process incorporated the impact of seasoning, the new model more directly incorporates this feature. Another change in the new allowance model relates to the historical period of experience that we use as a starting point

for projecting future defaults. Our new model is based upon a seasonal average, adjusted to the most recent three to six months of actual collection experience as the starting point and applies expected macroeconomic changes and collection procedure changes to estimate expected losses caused by loss events incurred as of the balance sheet date. Our previous model primarily used a one year historical default experience period and did not include the ability to directly model an economic expectation or collection procedure change. In addition, the previous allowance process included qualitative adjustments for these factors. Our current model places a greater emphasis on the more recent default experience rather than the default experience for older historical periods, as we believe the recent default experience is more indicative of the probable losses incurred in the loan portfolio today. While the model we use as a part of the allowance for loan losses process changed in the first quarter, the overall process for calculating the appropriate amount of allowance for Private Education Loan loss as disclosed in the 2010 Form 10-K has not changed. We believe that the current model more accurately reflects recent borrower behavior, loan performance, and collection performance, as well as expectations about economic factors. There was no adjustment to our allowance for loan loss upon implementing this new default projection model in the first quarter of 2011.

Recently Adopted Accounting Standards

Troubled Debt Restructurings

On July 1, 2011, we adopted Accounting Standards Update No. 2011-02, Receivables (Topic 310), A Creditor's Determination of Whether a Restructuring Is a Troubled Debt Restructuring. This new guidance clarifies when a loan restructuring constitutes a troubled debt restructuring. In applying the new guidance we have determined that certain Private Education Loans for which we have granted forbearance of greater than three months are classified as troubled debt restructurings. If a loan meets the criteria for troubled debt accounting then an allowance for loan loss is established which represents the present value of the losses that are expected to occur over the remaining life of the loan. This accounting results in a higher allowance for loan losses than our previously established allowance for these loans as our previous allowance for these loans represented an estimate of charge-offs expected to occur over the next two years (two years being our loss confirmation period). The new accounting guidance was effective as of July 1, 2011 but was required to be applied retrospectively to January 1, 2011. This resulted in \$124 million of additional provision for loan losses in the third quarter of 2011 from approximately \$3.8 billion of student loans being classified as troubled debt restructurings. This new accounting guidance is only applied to certain borrowers who use their fourth or greater month of forbearance during the time period this new guidance is effective. This new accounting guidance has the effect of accelerating the recognition of expected losses related to our Private Education Loan portfolio. The increase in the provision for losses as a result of this new accounting guidance does not reflect a decrease in credit expectations of the portfolio or an increase in the expected life of loan losses related to this portfolio. We believe forbearance is an accepted and effective collections and risk management tool for private student loans. We plan to continue to use forbearance and as a result, we expect to have additional loans classified as troubled debt restructurings in the future (see Financial Condition Consumer Lending Portfolio Performance Allowance for Private Education Loan Losses for a further discussion on the use of forbearance as a collection tool).

Recently Issued Accounting Standards

Testing Goodwill for Impairment

In September 2011, the FASB issued ASU No. 2011-08, Intangibles - Goodwill and Other (Topic 350), Testing Goodwill for Impairment. The objective of this new guidance is to simplify how we test goodwill for impairment. It does not change the amount of impairment recognized if goodwill is impaired. This new guidance permits us to first assess qualitative factors to determine whether it is more-likely-than-not that the fair value of a reporting unit, which is the same as or one level below a business segment, is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test described in Topic 350. The more-likely-than-not threshold is defined as having a likelihood of more than 50 percent. If this more-likely-than-not threshold is met, then we will complete a quantitative goodwill impairment analysis which consists of a comparison of the fair value of the reporting unit to our carrying value, including goodwill. If the carrying value of the reporting unit exceeds the fair value, a goodwill impairment analysis will be performed to measure the amount of impairment loss, if any.

This new guidance is effective for fiscal years beginning after December 15, 2011. Early adoption is permitted, including for annual and interim goodwill impairment tests performed as of a date before September 15, 2011, if an entity's financial statements for the most recent annual or interim period have not yet been issued. We perform our annual test in the fourth quarter and intend to adopt the new guidance in the fourth quarter 2011. This new guidance will not have a material impact on our results of operations.

Presentation of Comprehensive Income

In June 2011, the FASB issued ASU No. 2011-05, Comprehensive Income (Topic 220), Presentation of Comprehensive Income. The objective of this new guidance is to improve the comparability, consistency, and transparency of financial reporting and to increase the prominence of items reported in other comprehensive income. The new guidance requires all non-owner changes in stockholders' equity be presented either in a single continuous statement of comprehensive income or in two separate but consecutive statements. The new guidance will be applied retrospectively for fiscal years, and interim periods within those years, beginning after December 15, 2011. As such, this new guidance will be effective for us in the first quarter 2012. The new guidance will not have an impact on our results of operations.

Fair Value Measurement and Disclosure Requirements

In May 2011, the FASB issued ASU No. 2011-04, Fair Value Measurement (Topic 820), Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs. These amendments (1) clarify the FASB's intent about the application of existing fair value measurement and disclosure requirements; and (2) change particular principles or requirements for measuring fair value or for disclosing information about fair value measurements. This new guidance is effective prospectively for interim and annual periods beginning after December 15, 2011 and is not expected to have a material impact on our fair value measurements.

Item 3. Quantitative and Qualitative Disclosures about Market Risk **Interest Rate Sensitivity Analysis**

Our interest rate risk management seeks to limit the impact of short-term movements in interest rates on our results of operations and financial position. The following tables summarize the effect on earnings for the three and nine months ended September 30, 2011 and 2010 and the effect on fair values at September 30, 2011 and December 31, 2010, based upon a sensitivity analysis performed by management assuming a hypothetical increase in market interest rates of 100 basis points and 300 basis points while funding spreads remain constant. Additionally, as it relates to the effect on earnings, a sensitivity analysis was performed assuming the funding index increases 25 basis points while holding the asset index constant, if the funding index is different than the asset index.

	Three Months Ended September 30, 2011

A primary objective in our funding is to minimize our sensitivity to changing interest rates by generally funding our floating rate student loan portfolio with floating rate debt. However, due to the ability of some FFELP loans to earn Floor Income, we can have a fixed versus floating mismatch in funding if the student loan earns at the fixed borrower rate and the funding remains floating. In addition, we can have a mismatch in the index (including the frequency of reset) of floating rate debt versus floating rate assets.

During the three and nine months ended September 30, 2011 and 2010, certain FFELP Loans were earning Floor Income and we locked in a portion of that Floor Income through the use of Floor Income Contracts. The result of these hedging transactions was to convert a portion of the fixed rate nature of student loans to variable rate, and to fix the relative spread between the student loan asset rate and the variable rate liability.

In the preceding tables, under the scenario where interest rates increase 100 and 300 basis points, the change in pre-tax net income before the unrealized gains (losses) on derivative and hedging activities is primarily due to the impact of (i) our unhedged loans being in a fixed-rate mode due to Floor Income, while being funded with variable debt in low interest rate environments; and (ii) a portion of our variable assets being funded with fixed rate liabilities and equity. Item (i) will generally cause income to decrease when interest rates increase from a low interest rate environment, whereas item (ii) will generally offset this decrease. In the three and nine months ended September 30, 2011, item (i) had a greater impact compared to the three and nine months ended September 30, 2010 due to a larger amount of unhedged Floor Income in the current year period. The increase in unrealized gains (losses) on derivatives and hedging activities in both scenarios is primarily related to Floor Income Contracts that do not qualify for GAAP hedge accounting treatment and therefore are not offset by any mark-to-market of the economically hedged Floor Income.

Under the scenario in the tables above labeled Asset and Funding Index Mismatches, the main driver of the decrease in pre-tax income before unrealized gains (losses) on derivative and hedging activities is the result of LIBOR-based debt funding commercial paper-indexed assets. See Asset and Liability Funding Gap of this Item 3 for a further discussion. Increasing the spread between indices will also impact the unrealized gains (losses) on derivatives and hedging activities as it relates to basis swaps that hedge the mismatch between the asset and funding indices.

In addition to interest rate risk addressed in the preceding tables, we are also exposed to risks related to foreign currency exchange rates. Foreign currency exchange risk is primarily the result of foreign currency denominated debt issued by us. As it relates to our corporate unsecured and securitization debt programs used to fund our business, our policy is to use cross currency interest rate swaps to swap all foreign currency denominated debt payments (fixed and floating) to U.S. dollar LIBOR using a fixed exchange rate. In the tables

above, there would be an immaterial impact on earnings if exchange rates were to decrease or increase, due to the terms of the hedging instrument and hedged items matching. The balance sheet interest bearing liabilities would be affected by a change in exchange rates; however, the change would be materially offset by the cross currency interest rate swaps in other assets or other liabilities. In the current economic environment, volatility in the spread between spot and forward foreign exchange rates has resulted in material mark-to-market impacts to current-period earnings which have not been factored into the above analysis. The earnings impact is noncash, and at maturity of the instruments the cumulative mark-to-market impact will be zero.

Asset and Liability Funding Gap

The tables below present our assets and liabilities (funding) arranged by underlying indices as of September 30, 2011. In the following GAAP presentation, the funding gap only includes derivatives that qualify as effective hedges (those derivatives which are reflected in net interest margin, as opposed to those reflected in the gains (losses) on derivatives and hedging activities, net line on the consolidated statements of income). The difference between the asset and the funding is the funding gap for the specified index. This represents our exposure to interest rate risk in the form of basis risk and repricing risk, which is the risk that the different indices may reset at different frequencies or may not move in the same direction or at the same magnitude.

Management analyzes interest rate risk and in doing so includes all derivatives that are economically hedging our debt whether they qualify as effective hedges or not (Core Earnings basis). Accordingly, we are also presenting the asset and liability funding gap on a Core Earnings basis in the table that follows the GAAP presentation.

GAAP-Basis

Index	Frequency of Variable Resets	Assets	Funding ⁽¹⁾	Funding Gap
(Dollars in billions)				
3-month Commercial paper	daily	\$ 132.0	\$	\$ 132.0
3-month Treasury bill	weekly	7.7		7.7
Prime	annual	.8		.8
Prime	quarterly	5.0		5.0
Prime	monthly	22.0		22.0
Prime	daily		2.8	(2.8)
PLUS Index	annual	.5		.5
3-month LIBOR	daily			
3-month LIBOR	quarterly		123.8	(123.8)
1-month LIBOR	monthly	9.3	18.3	(9.0)
CMT/CPI Index	monthly/quarterly		1.6	(1.6)
Non-Discrete reset ⁽²⁾	monthly		32.2	(32.2)
Non-Discrete reset ⁽³⁾	daily/weekly	10.6	3.2	7.4
Fixed Rate ⁽⁴⁾		9.6	15.6	(6.0)
Total		\$ 197.5	\$ 197.5	\$

(1) Funding includes all derivatives that qualify as hedges.

(2) Funding consists of auction rate securities, the ABCP Facilities, the ED Conduit Program Facility and FHLB DM Facility.

(3) Assets include restricted and unrestricted cash equivalents and other overnight type instruments. Funding includes retail and other deposits and the obligation to return cash collateral held related to derivatives exposures.

(4)

Edgar Filing: SLM CORP - Form 10-Q

Assets include receivables and other assets (including goodwill and acquired intangibles). Funding includes other liabilities and stockholders' equity (excluding series B Preferred Stock).

The Funding Gaps in the above table are primarily interest rate mismatches in short-term indices between our assets and liabilities. We address a portion of this issue through the use of basis swaps that convert quarterly

reset 3-month LIBOR to other indices that are more correlated to our asset indices. These basis swaps do not qualify as effective hedges and as a result the effect on the funding index is not included in our interest margin and is therefore excluded from the GAAP presentation.

Core Earnings Basis

Index (Dollars in billions)	Frequency of Variable Resets	Assets	Funding ⁽¹⁾	Funding Gap
3-month Commercial paper	daily	\$ 132.0	\$	\$ 132.0
3-month Treasury bill	weekly	7.7	2.0	5.7
Prime	annual	.8		.8
Prime	quarterly	5.0	1.5	3.5
Prime	monthly	22.0	5.5	16.5
Prime	daily		2.8	(2.8)
PLUS Index	annual	.5		.5
3-month LIBOR	daily		30.5	(30.5)
3-month LIBOR	quarterly		71.3	(71.3)
1-month LIBOR	monthly	9.3	26.2	(16.9)
1-month LIBOR	daily		8.0	(8.0)
Non-Discrete reset ⁽²⁾	monthly		32.2	(32.2)
Non-Discrete reset ⁽³⁾	daily/weekly	10.6	3.2	7.4
Fixed Rate ⁽⁴⁾		6.5	11.2	(4.7)
Total		\$ 194.4	\$ 194.4	\$

⁽¹⁾ Funding includes all derivatives that management considers economic hedges of interest rate risk and reflects how we internally manage our interest rate exposure.

⁽²⁾ Funding consists of auction rate securities, the ABCP Facilities, the ED Conduit Program Facility and FHLB DM Facility.

⁽³⁾ Assets include restricted and unrestricted cash equivalents and other overnight type instruments. Funding includes retail and other deposits and the obligation to return cash collateral held related to derivatives exposures.

⁽⁴⁾ Assets include receivables and other assets (including goodwill and acquired intangibles). Funding includes other liabilities and stockholders' equity (excluding series B Preferred Stock).

We use interest rate swaps and other derivatives to achieve our risk management objectives. Our asset liability management strategy is to match assets with debt (in combination with derivatives) that have the same underlying index and reset frequency or when economical, have interest rate characteristics that we believe are highly correlated. For example, a large portion of our daily reset 3-month commercial paper indexed assets are funded with liabilities indexed to LIBOR. The use of funding with index types and reset frequencies that are different from our assets exposes us to interest rate risk in the form of basis and repricing risk. This could result in our cost of funds not moving in the same direction or with the same magnitude as the yield on our assets. While we believe this risk is low, as all of these indices are short-term with rate movements that are highly correlated over a long period of time, market disruptions can lead to a temporary divergence between indices resulting in a negative impact to our earnings.

Weighted Average Life

The following table reflects the weighted average life for our earning assets and liabilities at September 30, 2011.

(Averages in Years)	Weighted Average Life
Earning assets	
Student loans	7.6
Other loans	6.3
Cash and investments	.1
Total earning assets	7.2
Borrowings	
Short-term borrowings	.3
Long-term borrowings	7.0
Total borrowings	5.9

Item 4. Controls and Procedures***Disclosure Controls and Procedures***

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) as of September 30, 2011. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer, concluded that, as of September 30, 2011, our disclosure controls and procedures were effective to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is (a) recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and (b) accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

No change in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) occurred during the fiscal quarter ended September 30, 2011 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

We and our subsidiaries and affiliates also are subject to various claims, lawsuits and other actions that arise in the normal course of business. Most of these matters are claims by borrowers disputing the manner in which their loans have been processed or the accuracy of our reports to credit bureaus. In addition, our collections subsidiaries are routinely named in individual plaintiff or class action lawsuits in which the plaintiffs allege that those subsidiaries have violated a federal or state law in the process of collecting their accounts. We believe that these claims, lawsuits and other actions will not have a material adverse effect on our business, financial condition or results of operations. Finally, from time to time, we and our subsidiaries and affiliates receive information and document requests from state attorneys general, legislative committees and administrative agencies concerning certain business practices. Our practice has been and continues to be to cooperate with these bodies and to be responsive to any such requests.

Rodriguez v. SLM Corporation et al. As previously disclosed, on December 17, 2007, plaintiffs filed a complaint against us in the U.S. District Court for the District of Connecticut alleging that we engaged in underwriting practices which, among other things, resulted in certain applicants for student loans being directed into substandard and expensive loans on the basis of race. The complaint did not identify the relief plaintiffs sought. On June 20, 2011, we agreed to settle this case and denied all allegations of wrongdoing and liability. We entered into the settlement to avoid the burden, expense, risk and uncertainty of litigation. On October 17, 2011, the Court provided final approval of the settlement. We do not expect the settlement to have a material impact on our financial position or our business.

U.S. ex rel. Batiste v. SLM Corporation, et al. As previously disclosed, on July 15, 2009, the U.S. District Court for the District of Columbia unsealed the *qui tam* False Claims Act complaint of relator Sheldon Batiste, a former employee of SLM Financial Corporation. The First Amended Complaint alleges that we violated the False Claims Act by our systemic failure to service loans and abide by forbearance regulations and our receipt of U.S. subsidies to which it was not entitled through the federally guaranteed student loan program, FFELP. No amount in controversy is specified, but the relator seeks treble actual damages, as well as civil monetary penalties on each of its claims. Defendants filed their Motion to Dismiss on September 21, 2009. On September 24, 2010, the U.S. District Court for the District of Columbia granted our Motion to Dismiss in its entirety. On October 25, 2010, Plaintiff/Relator filed a Notice of Appeal with the U.S. Court of Appeals for the District of Columbia Circuit. On November 4, 2011, the U.S. Court of Appeals for the District of Columbia Circuit affirmed the U.S. District Court's dismissal of the complaint.

For a description of these items and other litigation to which we are a party, see our 2010 Form 10-K and subsequent filings with the SEC.

Item 1A. Risk Factors

There have been no material changes from the risk factors previously disclosed in our Annual Report on Form 10-K for the year ended December 31, 2010 and in our Quarterly Report on Form 10-Q for the quarter ended June 30, 2011.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds*Share Repurchases*

The following table provides information relating to our purchase of shares of our common stock in the three months ended September 30, 2011.

(Dollars and common shares in millions) Period:	Total Number of Shares Purchased ⁽¹⁾	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs ⁽²⁾	Approximate Dollar Value of Shares That May Yet Be Purchased Under Publicly Announced Plans or Programs ⁽²⁾
July 1 July 31, 2011	5.1	\$ 16.26	4.9	\$ 79.8
August 1 August 31, 2011	4.6	14.18	4.6	64.3
September 1 September 30, 2011				
Total third-quarter 2011	9.7	\$ 15.26	9.5	

(1) The total number of shares purchased includes: (i) shares purchased under the stock repurchase program discussed below, and (ii) shares of our common stock tendered to us to satisfy the exercise price in connection with cashless exercise of stock options, and tax withholding obligations in connection with exercise of stock options and vesting of restricted stock and restricted stock units.

(2) In April 2011, our board of directors authorized us to purchase up to \$300 million of shares of our common stock in open market transactions, and terminated all previous authorizations. As of September 30, 2011, we have fully utilized this authorization.

The closing price of our common stock on the New York Stock Exchange on September 30, 2011 was \$12.45.

Item 3. Defaults upon Senior Securities

Nothing to report.

Item 4. (Removed and Reserved).**Item 5. Other Information**

Nothing to report.

Item 6. Exhibits

The following exhibits are furnished or filed, as applicable:

Edgar Filing: SLM CORP - Form 10-Q

- 10.1 Form of SLM Corporation Executive Severance for Senior Officers
- 10.2 Form of SLM Corporation Change in Control Severance Plan for Senior Officer

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, as amended, the Registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.

SLM CORPORATION

(Registrant)

By: /s/ JONATHAN C. CLARK
Jonathan C. Clark

Executive Vice President and Chief Financial Officer

(Principal Financial and Accounting Officer)

Date: November 4, 2011

GLOSSARY

Listed below are definitions of key terms that are used throughout this document. See also APPENDIX A, FEDERAL FAMILY EDUCATION LOAN PROGRAM, included in SLM Corporation's (the Company's) 2010 Annual Report on Form 10-K, filed with the Securities and Exchange Commission (SEC) on February 28, 2011, for a further discussion of the FFELP.

Consolidation Loan Rebate Fee All holders of FFELP Consolidation Loans are required to pay to the U.S. Department of Education (ED) an annual 105 basis point Consolidation Loan Rebate Fee on all outstanding principal and accrued interest balances of FFELP Consolidation Loans purchased or originated after October 1, 1993, except for loans for which consolidation applications were received between October 1, 1998 and January 31, 1999, where the Consolidation Loan Rebate Fee is 62 basis points.

Constant Prepayment Rate (CPR) A variable in life-of-loan estimates that measures the rate at which loans in the portfolio prepay before their stated maturity. The CPR is directly correlated to the average life of the portfolio. CPR equals the percentage of loans that prepay annually as a percentage of the beginning of period balance.

Core Earnings We prepare financial statements in accordance with generally accepted accounting principles in the United States of America (GAAP). In addition to evaluating our GAAP-based financial information, management evaluates the business segments on a basis that, as allowed under the Financial Accounting Standards Board's (FASB) Accounting Standards Codification (ASC) 280, Segment Reporting, differs from GAAP. We refer to management's basis of evaluating its segment results as Core Earnings presentations for each business segment and refer to these performance measures in our presentations with equity investors, credit rating agencies and debt capital providers. While Core Earnings results are not a substitute for reported results under GAAP, we rely on Core Earnings performance measures in operating each business segment because we believe these measures provide additional information regarding the operational and performance indicators that are most closely assessed by management.

Core Earnings performance measures are the primary financial performance measures used by management to evaluate performance and to allocate resources. Accordingly, financial information is reported to management on a Core Earnings basis by reportable segment, as these are the measures used regularly by our chief operating decision makers. Core Earnings performance measures are used in developing our financial plans, tracking results, and establishing corporate performance targets and incentive compensation. Management believes this information provides additional insight into the financial performance of our core business activities. Core Earnings performance measures are not defined terms within GAAP and may not be comparable to similarly titled measures reported by other companies. Our Core Earnings presentation does not represent another comprehensive basis of accounting.

See Note 11, Segment Reporting to our Consolidated Financial Statements in this Form 10-Q and Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations Core Earnings Definition and Limitations Differences between Core Earnings and GAAP for further discussion of the differences between Core Earnings and GAAP, as well as reconciliations between Core Earnings and GAAP.

Direct Lending; Direct Loans Educational loans provided by the DSLP (see definition, below) to students and parent borrowers directly through ED (see definition below) rather than through a bank or other lender.

DSLP The William D. Ford Federal Direct Loan Program.

ED The U.S. Department of Education.

Exceptional Performer The exceptional performer designation is determined by ED in recognition of a servicer meeting certain performance standards set by ED in servicing FFELP Loans. Upon receiving the designation, the servicer receives reimbursement on default claims higher than the legislated Risk Sharing levels on federally guaranteed student loans for all loans serviced for a period of at least 270 days before the date of

default. The servicer is entitled to receive this benefit as long as it remains in compliance with the required servicing standards, which are assessed on an annual and quarterly basis through compliance audits and other criteria. The annual assessment is in part based upon subjective factors which alone may form the basis for an ED determination to withdraw the designation. If the designation is withdrawn, Risk Sharing may be applied retroactively to the date of the occurrence that resulted in noncompliance. The CCRAA eliminated the EP designation effective October 1, 2007. See also Appendix A Federal Family Education Loan Program.

FFELP The Federal Family Education Loan Program, formerly the Guaranteed Student Loan Program.

FFELP Consolidation Loans Under the FFELP, borrowers with multiple eligible student loans may consolidate them into a single student loan with one lender at a fixed rate for the life of the loan. The new loan is considered a FFELP Consolidation Loan. Typically a borrower may consolidate his student loans only once unless the borrower has another eligible loan to consolidate with the existing FFELP Consolidation Loan. The borrower rate on a FFELP Consolidation Loan is fixed for the term of the loan and is set by the weighted average interest rate of the loans being consolidated, rounded up to the nearest 1/8th of a percent, not to exceed 8.25 percent. In low interest rate environments, FFELP Consolidation Loans provide an attractive refinancing opportunity to certain borrowers because they allow borrowers to consolidate variable rate loans into a long-term fixed rate loan. Holders of FFELP Consolidation Loans are eligible to earn interest under the Special Allowance Payment (SAP) formula. In April 2008, we suspended originating new FFELP Consolidation Loans.

FFELP Stafford and Other Student Loans Education loans to students or parents of students that are guaranteed or reinsured under the FFELP. The loans are primarily Stafford loans but also include PLUS and HEAL loans.

Fixed Rate Floor Income Fixed Rate Floor Income is Floor Income associated with student loans with borrower rates that are fixed to term (primarily FFELP Consolidation Loans and Stafford Loans originated on or after July 1, 2006).

Floor Income FFELP Loans generally earn interest at the higher of either the borrower rate, which is fixed over a period of time, or a floating rate based on the SAP formula. We generally finance our student loan portfolio with floating rate debt whose interest is matched closely to the floating nature of the applicable SAP formula. If interest rates decline to a level at which the borrower rate exceeds the SAP formula rate, we continue to earn interest on the loan at the fixed borrower rate while the floating rate interest on our debt continues to decline. In these interest rate environments, we refer to the additional spread it earns between the fixed borrower rate and the SAP formula rate as Floor Income. Depending on the type of student loan and when it was originated, the borrower rate is either fixed to term or is reset to a market rate each July 1. As a result, for loans where the borrower rate is fixed to term, we may earn Floor Income for an extended period of time, and for those loans where the borrower interest rate is reset annually on July 1, we may earn Floor Income to the next reset date. In accordance with legislation enacted in 2006, lenders are required to rebate Floor Income to ED for all FFELP Loans disbursed on or after April 1, 2006.

The following example shows the mechanics of Floor Income for a typical fixed rate FFELP Consolidation Loan (with a commercial paper-based SAP spread of 2.64 percent):

Fixed Borrower Rate	7.25%
SAP Spread over Commercial Paper Rate	(2.64)%
Floor Strike Rate ⁽¹⁾	4.61%

⁽¹⁾ The interest rate at which the underlying index (Treasury bill or commercial paper) plus the fixed SAP spread equals the fixed borrower rate. Floor Income is earned anytime the interest rate of the underlying index declines below this rate.

Based on this example, if the quarterly average commercial paper rate is over 4.61 percent, the holder of the student loan will earn at a floating rate based on the SAP formula, which in this example is a fixed spread to commercial paper of 2.64 percent. On the other hand, if the quarterly average commercial paper rate is below 4.61 percent, the SAP formula will produce a rate below the fixed borrower rate of 7.25 percent and the loan holder earns at the borrower rate of 7.25 percent.

Graphic Depiction of Floor Income:

Floor Income Contracts We enter into contracts with counterparties under which, in exchange for an upfront fee representing the present value of the Floor Income that we expect to earn on a notional amount of underlying student loans being economically hedged, we will pay the counterparties the Floor Income earned on that notional amount over the life of the Floor Income Contract. Specifically, we agree to pay the counterparty the difference, if positive, between the fixed borrower rate less the SAP (see definition below) spread and the average of the applicable interest rate index on that notional amount, regardless of the actual balance of underlying student loans, over the life of the contract. The contracts generally do not extend over the life of the underlying student loans. This contract effectively locks in the amount of Floor Income we will earn over the period of the contract. Floor Income Contracts are not considered effective hedges under ASC 815, Derivatives and Hedging, and each quarter we must record the change in fair value of these contracts through income.

Gross Floor Income Floor Income earned before payments on Floor Income Contracts.

Guarantor(s) State agencies or non-profit companies that guarantee (or insure) FFELP Loans made by eligible lenders under The Higher Education Act of 1965 (HEA), as amended.

Private Education Loans Education loans to students or parents of students that are not guaranteed under the FFELP. Private Education Loans include loans for higher education (undergraduate and graduate degrees) and for alternative education, such as career training, private kindergarten through secondary education schools and tutorial schools. Higher education loans have repayment terms similar to FFELP Loans, whereby repayments begin after the borrower leaves school. Our higher education Private Education Loans are not dischargeable in bankruptcy, except in certain limited circumstances. Repayment for alternative education generally begins immediately.

In the context of our Private Education Loan business, we use the term non-traditional loans to describe education loans made to certain borrowers that have or are expected to have a high default rate as a result of a number of factors, including having a lower tier credit rating, low program completion and graduation rates or, where the borrower is expected to graduate, a low expected income relative to the borrower's cost of attendance. Non-traditional loans are loans to borrowers attending for-profit schools with an original FICO score of less than

670 and borrowers attending not-for-profit schools with an original FICO score of less than 640. The FICO score used in determining whether a loan is non-traditional is the greater of the borrower or co-borrower FICO score at origination.

Repayment Borrower Benefits Financial incentives offered to borrowers based on pre-determined qualifying factors, which are generally tied directly to making on-time monthly payments. The impact of Repayment Borrower Benefits is dependent on the estimate of the number of borrowers who will eventually qualify for these benefits and the amount of the financial benefit offered to the borrower. We occasionally change Repayment Borrower Benefits programs in both amount and qualification factors. These programmatic changes must be reflected in the estimate of the Repayment Borrower Benefits discount when made.

Residual Interest When we securitize student loans, we retain the right to receive cash flows from the student loans sold to trusts that we sponsor in excess of amounts needed to pay servicing, derivative costs (if any), other fees, and the principal and interest on the bonds backed by the student loans. The Residual Interest, which may also include reserve and other cash accounts, is the present value of these future expected cash flows, which includes the present value of any Embedded Fixed Rate Floor Income described above. We value the Residual Interest at the time of sale of the student loans to the trust and as of the end of each subsequent quarter.

Retained Interest The Retained Interest includes the Residual Interest (defined above) and servicing rights (as we retain the servicing responsibilities) for our securitization transactions accounted for as sales.

Risk Sharing When a FFELP loan first disbursed on and after July 1, 2006 defaults, the federal government guarantees 97 percent of the principal balance plus accrued interest (98 percent on loans disbursed before July 1, 2006) and the holder of the loan is at risk for the remaining amount not guaranteed as a Risk Sharing loss on the loan. FFELP Loans originated after October 1, 1993 are subject to Risk Sharing on loan default claim payments unless the default results from the borrower's death, disability or bankruptcy. FFELP Loans serviced by a servicer that has Exceptional Performer designation from ED were subject to one-percent Risk Sharing for claims filed on or after July 1, 2006 and before October 1, 2007. The CCRAA reduces default insurance to 95 percent of the unpaid principal and accrued interest for loans first disbursed on or after October 1, 2012.

Special Allowance Payment (SAP) FFELP Loans disbursed prior to April 1, 2006 (with the exception of certain PLUS and SLS loans discussed below) generally earn interest at the greater of the borrower rate or a floating rate determined by reference to the average of the applicable floating rates (91-day Treasury bill rate or commercial paper) in a calendar quarter, plus a fixed spread that is dependent upon when the loan was originated and the loan's repayment status. If the resulting floating rate exceeds the borrower rate, ED pays the difference directly to us. This payment is referred to as the Special Allowance Payment or SAP and the formula used to determine the floating rate is the SAP formula. We refer to the fixed spread to the underlying index as the SAP spread. For loans disbursed after April 1, 2006, FFELP Loans effectively only earn at the SAP rate, as the excess interest earned when the borrower rate exceeds the SAP rate (Floor Income) must be refunded to ED.

Variable rate PLUS Loans and SLS Loans earn SAP only if the variable rate, which is reset annually, exceeds the applicable maximum borrower rate. For PLUS loans disbursed on or after January 1, 2000, this limitation on SAP was repealed effective April 1, 2006.

Variable Rate Floor Income Variable Rate Floor Income is Floor Income that is earned only through the next date at which the borrower interest rate is reset to a market rate. For FFELP Stafford loans whose borrower interest rate resets annually on July 1, we may earn Floor Income or Embedded Floor Income based on a calculation of the difference between the borrower rate and the then current interest rate.
