**Forward-Looking Statements**

This Quarterly Report on Form 10-Q, other periodic reports filed by Regions Financial Corporation ( Regions ) under the Securities Exchange Act of 1934, as amended, and any other written or oral statements made by or on behalf of Regions may include forward-looking statements. The Private Securities Litigation Reform Act of 1995 (the Act ) provides a safe harbor for forward-looking statements which are identified as such and are accompanied by the identification of important factors that could cause actual results to differ materially from the forward-looking statements. For these statements, we, together with our subsidiaries, unless the context implies otherwise, claim the protection afforded by the safe harbor in the Act. Forward-looking statements are not based on historical information, but rather are related to future operations, strategies, financial results or other developments. Forward-looking statements are based on management's expectations as well as certain assumptions and estimates made by, and information available to, management at the time the statements are made. Those statements are based on general assumptions and are subject to various risks, uncertainties and other factors that may cause actual results to differ materially from the views, beliefs and projections expressed in such statements. These risks, uncertainties and other factors include, but are not limited to, those described below:

The Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act ) became law on July 21, 2010, and a number of legislative, regulatory and tax proposals remain pending. Additionally, the U.S. Treasury and federal banking regulators continue to implement, but are also beginning to wind down, a number of programs to address capital and liquidity in the banking system. Future and proposed rules, including those that are part of the Basel III process, could require banking institutions to increase levels of capital. All of the foregoing may have significant effects on Regions and the financial services industry, the exact nature and extent of which cannot be determined at this time.

Regions' ability to mitigate the impact of the Dodd-Frank Act on debit interchange fees through revenue enhancements and other revenue measures, which will depend on various factors, including the acceptance by customers of modified fee structures for Regions' products and services.

Possible additional loan losses, impairment of goodwill and other intangibles, and adjustment of valuation allowances on deferred tax assets and the impact on earnings and capital.

Possible changes in interest rates may increase funding costs and reduce earning asset yields, thus reducing margins. Increases in benchmark interest rates would also increase debt service requirements for customers whose terms include a variable interest rate, which may negatively impact the ability of borrowers to pay as contractually obligated.

Possible changes in general economic and business conditions in the United States in general and in the communities Regions serves in particular, including any prolonging or worsening of the current unfavorable economic conditions, including unemployment levels.

Possible changes in the creditworthiness of customers and the possible impairment of the collectability of loans.

Possible changes in trade, monetary and fiscal policies, laws and regulations, and other activities of governments, agencies, and similar organizations, may have an adverse effect on business.

Possible stresses in the financial and real estate markets, including possible continued deterioration in property values.

## Edgar Filing: REGIONS FINANCIAL CORP - Form 10-Q

Regions' ability to manage fluctuations in the value of assets and liabilities and off-balance sheet exposure so as to maintain sufficient capital and liquidity to support Regions' business.

Regions' ability to expand into new markets and to maintain profit margins in the face of competitive pressures.

**Table of Contents**

Regions' ability to develop competitive new products and services in a timely manner and the acceptance of such products and services by Regions' customers and potential customers.

Regions' ability to keep pace with technological changes.

Regions' ability to effectively manage credit risk, interest rate risk, market risk, operational risk, legal risk, liquidity risk, and regulatory and compliance risk.

Regions' ability to ensure adequate capitalization which is impacted by inherent uncertainties in forecasting credit losses.

The cost and other effects of material contingencies, including litigation contingencies, and any adverse judicial, administrative, or arbitral rulings or proceedings.

The effects of increased competition from both banks and non-banks.

The effects of geopolitical instability and risks such as terrorist attacks.

Possible changes in consumer and business spending and saving habits could affect Regions' ability to increase assets and to attract deposits.

The effects of weather and natural disasters such as floods, droughts, wind, tornadoes and hurricanes, and the effects of man-made disasters.

Possible downgrades in ratings issued by rating agencies.

Possible changes in the speed of loan prepayments by Regions' customers and loan origination or sales volumes.

Possible acceleration of prepayments on mortgage-backed securities due to low interest rates, and the related acceleration of premium amortization on those securities.

The effects of problems encountered by larger or similar financial institutions that adversely affect Regions or the banking industry generally.

Regions' ability to receive dividends from its subsidiaries.

The effects of the failure of any component of Regions' business infrastructure which is provided by a third party.

## Edgar Filing: REGIONS FINANCIAL CORP - Form 10-Q

Changes in accounting policies or procedures as may be required by the Financial Accounting Standards Board or other regulatory agencies.

With regard to the sale of Morgan Keegan, the possibility of business disruption following the transaction, reputational risks and the reaction of customers and counterparties to the transaction; and occurrences which could cause post-closing adjustments to the purchase price.

The effects of any damage to Regions' reputation resulting from developments related to any of the items identified above. The words believe, expect, anticipate, project, and similar expressions often signify forward-looking statements. You should not place undue reliance on any forward-looking statements, which speak only as of the date made. We assume no obligation to update or revise any forward-looking statements that are made from time to time.

See also the Forward-Looking Statements and Risk Factors sections of Regions' Annual Report on Form 10-K for the year ended December 31, 2011, as filed with the Securities and Exchange Commission.

**REGIONS FINANCIAL CORPORATION AND SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**(Unaudited)**

**Three Months Ended March 31, 2012 and 2011**

**NOTE 1 Basis of Presentation**

Regions Financial Corporation ( Regions or the Company ) provides a full range of banking and bank-related services to individual and corporate customers through its subsidiaries and branch offices located primarily in Alabama, Arkansas, Florida, Georgia, Illinois, Indiana, Iowa, Kentucky, Louisiana, Mississippi, Missouri, North Carolina, South Carolina, Tennessee, Texas and Virginia. The Company is subject to competition from other financial institutions, is subject to the regulations of certain government agencies and undergoes periodic examinations by those regulatory authorities.

The accounting and reporting policies of Regions and the methods of applying those policies that materially affect the consolidated financial statements conform with accounting principles generally accepted in the United States ( GAAP ) and with general financial services industry practices. The accompanying interim financial statements have been prepared in accordance with the instructions for Form 10-Q and, therefore, do not include all information and notes to the consolidated financial statements necessary for a complete presentation of financial position, results of operations, comprehensive income and cash flows in conformity with GAAP. In the opinion of management, all adjustments, consisting of normal and recurring items, necessary for the fair presentation of the consolidated financial statements have been included. These interim financial statements should be read in conjunction with the consolidated financial statements and notes thereto in Regions Form 10-K for the year ended December 31, 2011. Regions has evaluated all subsequent events for potential recognition and disclosure through the filing date of this Form 10-Q. See Note 16.

Beginning with first quarter 2012 financial reporting, as required by new accounting literature, Regions began presenting a separate consolidated statement of comprehensive income. Comprehensive income (loss) is the total of net income and all other non-owner changes in equity. Items are recognized as components of comprehensive income (loss) and are displayed net of tax in the consolidated statements of comprehensive income (loss). In the calculation of comprehensive income (loss), certain reclassification adjustments are made to avoid double-counting items that are displayed as part of net income (loss) for a period that also had been displayed as part of other comprehensive income (loss) in that period or earlier periods. The prior period is also shown for comparability.

On January 11, 2012, Regions entered into an agreement to sell Morgan Keegan & Company, Inc. ( Morgan Keegan ) and related affiliates. The transaction closed on April 2, 2012. See Note 2, Note 14 and Note 16 for further details. Results of operations for the entities being sold are presented separately as discontinued operations for all periods presented on the consolidated statements of operations because the pending sale met all of the criteria for reporting as discontinued operations at March 31, 2012. Other expenses related to the transaction are also included in discontinued operations. This presentation is consistent with the consolidated financial statements included in the 2011 Form 10-K.

Certain amounts in prior period financial statements have been reclassified to conform to the current period presentation. These reclassifications are immaterial and have no effect on net income, comprehensive income, total assets or stockholders' equity.

**NOTE 2 Discontinued Operations**

On January 11, 2012, Regions entered into a stock purchase agreement to sell Morgan Keegan and related affiliates to Raymond James Financial, Inc. ( Raymond James ). The transaction closed on April 2, 2012. Regions Investment Management, Inc. (formerly known as Morgan Asset Management, Inc.) and Regions Trust

**Table of Contents**

were not included in the sale. In connection with the closing, the Company and Raymond James agreed that in lieu of the \$250 million pre-closing dividend from Morgan Keegan to the Company as contemplated in the original agreement, the parties would increase the purchase price by the same amount. The total purchase price received by the Company was approximately \$1.2 billion.

The transaction purchase price is subject to post-closing adjustment based on the closing tangible book value of the entities being sold and retention of Morgan Keegan associates as of 90 days post-closing. Regions believes any adjustments to the sales price will not have a material impact to the consolidated financial statements. Regions has agreed to indemnify Raymond James for all litigation matters related to pre-closing activities. See Note 14 and Note 16 for related disclosure.

The following table represents the condensed results of operations for discontinued operations for the three months ended March 31:

	Three Months Ended March 31

Entities included with the sale of Morgan Keegan and related affiliates had approximately \$7 million and \$2 million in securities available for sale at March 31, 2012 and December 31, 2011, respectively, which are included in the tables above. Morgan Keegan and related affiliates had no securities held to maturity at March 31, 2012 or December 31, 2011.

Equity securities in the tables above included the following amortized cost related to Federal Reserve Bank stock and Federal Home Loan Bank ( FHLB ) stock. Shares in the Federal Reserve Bank and FHLB are accounted for at amortized cost, which approximates fair value.

	March 31 2012	December 31 2011
(In millions)		
Federal Reserve Bank	\$ 481	\$ 481
Federal Home Loan Bank	219	219

Securities with carrying values of \$14.4 billion and \$14.3 billion at March 31, 2012 and December 31, 2011, respectively, were pledged to secure public funds, trust deposits and certain borrowing arrangements.

**Table of Contents**

The amortized cost and estimated fair value of securities available for sale and securities held to maturity at March 31, 2012, by contractual maturity, are shown below. Expected maturities will differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

	Amortized Cost	Estimated Fair Value

**Table of Contents**

	Less Than Twelve Months		December 31, 2011 Twelve Months or More		Total	
	Estimated Fair Value	Gross Unrealized Losses	Estimated Fair Value	Gross Unrealized Losses	Estimated Fair Value	Gross Unrealized Losses
Mortgage-backed securities:						
Residential agency	\$ 1,778	\$ (7)	\$	\$	\$ 1,778	\$ (7)
All other securities	291	(9)	5	(2)	296	(11)
	\$ 2,069	\$ (16)	\$ 5	\$ (2)	\$ 2,074	\$ (18)

There was no gross unrealized loss on debt securities held to maturity at either March 31, 2012 or December 31, 2011.

For the securities included in the tables above, management does not believe any individual unrealized loss, which was comprised of 537 securities and 524 securities at March 31, 2012 and December 31, 2011, respectively, represented an other-than-temporary impairment as of those dates. The Company does not intend to sell, and it is not likely that the Company will be required to sell, the securities before the recovery of their amortized cost basis, which may be at maturity.

Proceeds from sale, gross realized gains and gross realized losses from continuing operations on sales of securities available for sale are shown in the table below. The cost of securities sold is based on the specific identification method.

	For the Three Months Ended March 31	
	2012	2011
	(In millions)	
Proceeds	\$ 1,398	\$ 2,419
Gross realized gains	12	82
Gross realized losses		
Net securities gains (losses)	\$ 12	\$ 82

The following table details net gains (losses) for trading account securities:

	Three Months Ended March 31	
	2012	2011
	(In millions)	
Total net gains (losses)	\$ 30	\$ 21
Unrealized portion	25	14

Included in the table above are amounts related to activities of Morgan Keegan of approximately \$25 million and \$15 million of total net gains for the three months ended March 31, 2012 and 2011, respectively. These amounts are included with results from discontinued operations.

**Table of Contents****NOTE 4 Loans and the Allowance for Credit Losses****LOANS**

The following table presents the distribution by loan segment and class of Regions' loan portfolio, net of unearned income:

	March 31 2012	December 31 2011
	(In millions, net of unearned income)	
Commercial and industrial	\$ 25,098	\$ 24,522
Commercial real estate mortgage owner occupied	10,931	11,166
Commercial real estate construction owner occupied	281	337
Total commercial	36,310	36,025
Commercial investor real estate mortgage	9,156	9,702
Commercial investor real estate construction	955	1,025
Total investor real estate	10,111	10,727
Residential first mortgage	13,611	13,784
Home equity	12,642	13,021
Indirect	1,938	1,848
Consumer credit card	939	987
Other consumer	1,169	1,202
Total consumer	30,299	30,842
	\$ 76,720	\$ 77,594

During the three months ended March 31, 2012 and 2011, Regions purchased approximately \$174 million and \$162 million, respectively, in indirect loans from a third party.

**ALLOWANCE FOR CREDIT LOSSES**

The allowance for credit losses represents management's estimate of credit losses inherent in the loan and credit commitment portfolios as of period-end. The allowance for credit losses consists of two components: the allowance for loan and lease losses and the reserve for unfunded credit commitments. Management's assessment of the appropriateness of the allowance for credit losses is based on a combination of both of these components. Regions determines its allowance for credit losses in accordance with applicable accounting literature as well as regulatory guidance related to receivables and contingencies. Binding unfunded credit commitments include items such as letters of credit, financial guarantees and binding unfunded loan commitments.

**CALCULATION OF ALLOWANCE FOR CREDIT LOSSES**

As part of the Company's ongoing efforts to enhance the allowance calculation, and in response to regulatory guidance issued during the first quarter of 2012, the home equity portfolio was segmented at a more granular level. Loss rates for home equity products are now developed based on lien position, status as a troubled debt restructuring (TDR), geography, past due status, and refreshed FICO scores for non-past due loans. The enhancement had the impact of reducing the component of the allowance for loan losses related to home equity loans by an estimate of approximately \$30 million.

Except for the enhancement to home equity segmentation described above, during the first quarter of 2012 there were no changes in methodology for the calculation of the allowance for credit losses or policies for identification of non-accrual or for charge-offs. A detailed description of the Company's methodology is included in the consolidated financial statements included in the Annual Report on Form 10-K for the year ended December 31, 2011.

**Table of Contents****ROLLFORWARD OF ALLOWANCE FOR CREDIT LOSSES**

The following tables present analyses of the allowance for credit losses by portfolio segment for the three months ended March 31, 2012 and 2011. The total allowance for credit losses as of March 31, 2012 and 2011 is then disaggregated to detail the amounts derived through individual evaluation and the amounts calculated through collective evaluation. The allowance for credit losses related to individually evaluated loans includes reserves for non-accrual loans and leases equal to or greater than \$2.5 million. The allowance for credit losses related to collectively evaluated loans includes the remainder of the portfolio.

**PORTFOLIO SEGMENT RISK FACTORS**

The following describe the risk characteristics relevant to each of the portfolio segments.

*Commercial* The commercial loan portfolio segment includes commercial and industrial loans to commercial customers for use in normal business operations to finance working capital needs, equipment purchases or other expansion projects. Commercial also includes owner-occupied commercial real estate loans to operating businesses, which are loans for long-term financing of land and buildings, and are repaid by cash flow generated by business operations. Owner-occupied construction loans are made to commercial businesses for the development of land or construction of a building where the repayment is derived from revenues generated from the business of the borrower. Collection risk in this portfolio is driven by the creditworthiness of underlying borrowers, particularly cash flow from customers' business operations.

*Investor Real Estate* Loans for real estate development are repaid through cash flow related to the operation, sale or refinance of the property. This portfolio segment includes extensions of credit to real estate developers or investors where repayment is dependent on the sale of real estate or income generated from the real estate collateral. A portion of Regions' investor real estate portfolio segment is comprised of loans secured by residential product types (land, single-family and condominium loans) within Regions' markets. Additionally, these loans are made to finance income-producing properties such as apartment buildings, office and industrial buildings, and retail shopping centers. Loans in this portfolio segment are particularly sensitive to valuation of real estate.

*Consumer* The consumer loan portfolio segment includes residential first mortgage, home equity, indirect, consumer credit card, and other consumer loans. Residential first mortgage loans represent loans to consumers to finance a residence. These loans are typically financed over a 15 to 30 year term and, in most cases, are extended to borrowers to finance their primary residence. Home equity lending includes both home equity loans and lines

## **Table of Contents**

of credit. This type of lending, which is secured by a first or second mortgage on the borrower's residence, allows customers to borrow against the equity in their home. Real estate market values as of the time the loan or line is secured directly affect the amount of credit extended and, in addition, changes in these values impact the depth of potential losses. Indirect lending, which is lending initiated through third-party business partners, is largely comprised of loans made through automotive dealerships. Consumer credit card includes approximately 500,000 Regions branded consumer credit card accounts purchased late in the second quarter of 2011 from FIA Card Services. Other consumer loans include direct consumer installment loans, overdrafts and other revolving loans. Loans in this portfolio segment are sensitive to unemployment and other key consumer economic measures.

## **CREDIT QUALITY INDICATORS**

The following tables present credit quality indicators for the loan portfolio segments and classes, excluding loans held for sale, as of March 31, 2012 and December 31, 2011. Commercial and investor real estate loan classes are detailed by categories related to underlying credit quality and probability of default. These categories are utilized to develop the associated allowance for credit losses.

Pass includes obligations where the probability of default is considered low;

Special Mention includes obligations that have potential weakness which may, if not reversed or corrected, weaken the credit or inadequately protect the Company's position at some future date. Obligations in this category may also be subject to economic or market conditions which may, in the future, have an adverse effect on debt service ability;

Substandard Accrual includes obligations that exhibit a well-defined weakness which presently jeopardizes debt repayment, even though they are currently performing. These obligations are characterized by the distinct possibility that the Company may incur a loss in the future if these weaknesses are not corrected;

Non-accrual includes obligations where management has determined that full payment of principal and interest is in doubt. Substandard accrual and non-accrual loans are often collectively referred to as criticized. Special mention, substandard accrual, and non-accrual loans are often collectively referred to as criticized and classified.

**Table of Contents**

Classes in the consumer portfolio segment are disaggregated by accrual status. The associated allowance for credit losses is generally based on historical losses of the various classes adjusted for current economic conditions. For home equity products, loss rates are based on lien position, TDR status, geography, past due status, and refreshed FICO scores for current loans.

	Pass	Special Mention	March 31, 2012 Substandard Accrual (In millions)	Non-accrual	Total

- (1) Unpaid principal balance represents the contractual obligation due from the customer and includes the net book value plus charge-offs and payments applied.
- (2) Charge-offs and payments applied represents cumulative partial charge-offs taken, as well as interest payments received that have been applied against the outstanding principal balance.
- (3) Book value represents the unpaid principal balance less charge-offs and payments applied; it is shown before any allowance for loan losses.
- (4) Coverage % represents charge-offs and payments applied plus the related allowance as a percent of the unpaid principal balance.
- (5) Interest income recognized represents interest income on loans modified in a TDR, and are therefore considered impaired, which are on accruing status.

- (1) Unpaid principal balance represents the contractual obligation due from the customer and includes the net book value plus charge-offs and payments applied.
- (2) Charge-offs and payments applied represents cumulative partial charge-offs taken, as well as interest payments received that have been applied against the outstanding principal balance.
- (3) Book value represents the unpaid principal balance less charge-offs and payments applied; it is shown before any allowance for loan losses.
- (4) Coverage % represents charge-offs and payments applied plus the related allowance as a percent of the unpaid principal balance.
- (5) Interest income recognized represents interest income on loans modified in a TDR, and are therefore considered impaired, which are on accruing status.

In addition to the impaired loans detailed in the tables above, there were approximately \$249 million in non-performing loans classified as held for sale at March 31, 2012, compared to \$328 million at December 31, 2011. These loans are larger balance credits, primarily investor real estate, where management does not have the intent to hold the loans for the foreseeable future. The loans are carried at an amount approximating a price which will be recoverable through the loan sale market. During the three months ended March 31, 2012, approximately \$93 million in non-performing loans were transferred to held for sale; this amount is net of charge-offs of \$53 million recorded upon transfer. During the three months ended March 31, 2011, approximately \$188 million in non-performing loans were transferred to held for sale; this amount is net of charge-offs of \$105 million recorded upon transfer. At March 31, 2012 and December 31, 2011, non-accrual loans including loans held for sale totaled \$2.4 billion and \$2.7 billion, respectively.

---

**Table of Contents****TROUBLED DEBT RESTRUCTURINGS (TDRs)****Modification Activity: Commercial and Investor Real Estate Portfolio Segments**

Regions regularly modifies commercial and investor real estate loans in order to facilitate a workout strategy. Typical modifications include workout accommodations, such as renewals and forbearances. Regions' business strategy to keep loan maturities short, particularly in the investor real estate portfolio segment, in order to maintain leverage in negotiating with customers drove the renewal activity. Regions often increases or at least maintains the same interest rate, and often receives consideration in exchange for such modifications (e.g., principal paydowns, additional collateral, or additional guarantor support). However, these modifications are refutably considered by Regions to be concessions if the borrower could not access similar financing at market terms, even if Regions concludes that the borrower will ultimately pay all contractual amounts owed. Additionally, as another workout alternative, Regions periodically uses A/B note restructurings when the underlying assets (primarily investor real estate) have a stabilized level of cash flow. An appropriately underwritten A-note will allow for upgraded risk rating, with ultimate return to accrual status upon charge-off of the B-note, and a satisfactory period of performance of the A-note (generally, six months). Regions continues to report A-notes as TDRs, even if upgraded to accrual status. Also, for smaller-dollar commercial customers, Regions may periodically grant interest rate and other term concessions, similar to those under the Customer Assistance Program (CAP) program as described below.

**Modification Activity: Consumer Portfolio Segment**

Regions continues to work to meet the individual needs of consumer borrowers to stem foreclosure through the CAP. Regions designed the program to allow for customer-tailored modifications with the goal of keeping customers in their homes and avoiding foreclosure where possible. Modification may be offered to any borrower experiencing financial hardship regardless of the borrower's payment status. Under the CAP, Regions may offer a short-term deferral, a term extension, an interest rate reduction, a new loan product, or a combination of these options. For loans restructured under the CAP, Regions expects to collect the original contractually due principal. The gross original contractual interest may be collectible, depending on the terms modified. The length of the CAP modifications ranges from temporary payment deferrals of three months to term extensions for the life of the loan. All such modifications are considered TDRs regardless of the term if there is a concession to a borrower experiencing financial difficulty. Modified loans are subject to policies governing accrual/non-accrual evaluation consistent with all other loans of the same product type. Consumer loans are subject to objective accrual/non-accrual decisions. Under these policies, loans subject to the CAP are charged down to estimated value on or before the month in which the loan becomes 180 days past due. Beginning in the third quarter of 2011, home equity second liens are charged down to estimated value by the end of the month in which the loan becomes 120 days past due. If a partial charge-off is necessary as a result of this evaluation, the loan is placed on non-accrual at that time. Because the program was designed to evaluate potential CAP participants as early as possible in the life cycle of the troubled loan, many of the modifications are finalized without the borrower ever reaching 180 days past due, and with the loans having never been placed on non-accrual. Accordingly, given the positive impact of the restructuring on the likelihood of recovery of cash flows due under the modified terms, accrual status continues to be appropriate for these loans. None of the modified consumer loans listed in the following TDR disclosures were collateral-dependent at the time of modification. At March 31, 2012, approximately \$134 million in residential first mortgage TDRs were in excess of 180 days past due and are considered collateral-dependent. At March 31, 2012, approximately \$11 million in home equity first lien TDRs were in excess of 180 days past due and \$9 million in home equity second lien TDRs were in excess of 120 days past due and are considered collateral dependent.

Further discussion related to TDRs, including the impact of recently issued accounting literature, impact on allowance for loan losses, and designation of TDRs in periods subsequent to the modification is included in the Annual Report on Form 10-K for the year ended December 31, 2011.

**Table of Contents****Modifications Considered TDRs and Financial Impact**

The majority of Regions' 2012 commercial and investor real estate TDRs are the result of renewals where the only concession is that the interest rate at renewal is not considered to be a market rate. Consumer TDRs generally involve an interest rate concession. Accordingly, the financial impact of the modifications is best illustrated by the impact to the allowance calculation at the loan or pool level as a result of the loans being considered impaired due to their status as a TDR.

The following table presents loans by class modified in a TDR, and the financial impact of those modifications, for the period presented.

	Three Months Ended March 31, 2012		
	Number of Obligors	Recorded Investment	Financial Impact of Modifications Considered TDRs Increase in Allowance at Modification (Dollars in millions)
Commercial and industrial	199	\$ 151	\$ 1
Commercial real estate mortgage owner occupied	145	116	1
Commercial real estate construction owner occupied	6	4	
Total commercial	350	271	2
Commercial investor real estate mortgage	187	450	4
Commercial investor real estate construction	70	42	1
Total investor real estate	257	492	5
Residential first mortgage	352	67	8
Home equity	309	23	2
Indirect and other consumer	161	3	
Total consumer	822	93	10
	1,429	\$ 856	\$ 17

As described previously, the consumer modifications granted by Regions are rate concessions, and not forgiveness of principal. The majority of the commercial and investor real estate modifications are renewals where there is no reduction in interest rate or forgiveness of principal. Accordingly, Regions most often does not record a charge-off at the modification date. A limited number of modifications included above are A/B note restructurings, where the B-note is charged off. The total charge-offs recorded for all modifications for the three months ended March 31, 2012 were approximately \$5 million.

**Table of Contents****Defaulted TDRs**

The following table presents TDRs which defaulted during the three months ended March 31, 2012, and which were modified in the previous twelve months (i.e., the twelve months prior to the default). For purposes of this disclosure, default is defined as 90 days past due and still accruing for the consumer portfolio segment, and placement on non-accrual status for the commercial and investor real estate portfolio segments. Consideration of defaults in the calculation of the allowance for loan losses is described in detail in the consolidated financial statements included in the Annual Report on Form 10-K for the year ended December 31, 2011.

	<b>Three Months Ended March 31, 2012 (In millions)</b>
<b>Defaulted During the Period, Where Modified in a TDR Twelve Months Prior to Default</b>	
Commercial and industrial	\$ 36
Commercial real estate mortgage owner occupied	11
Commercial real estate construction owner occupied	1
<b>Total commercial</b>	<b>48</b>
Commercial investor real estate mortgage	60
Commercial investor real estate construction	7
<b>Total investor real estate</b>	<b>67</b>
Residential first mortgage	21
Home equity	6
<b>Total consumer</b>	<b>27</b>
	<b>\$ 142</b>

Commercial and investor real estate loans which were on non-accrual status at the time of the latest modification are not included in the default table above, as they are already considered to be in default at the time of the restructuring. At March 31, 2012, approximately \$181 million of commercial and investor real estate loans modified in a TDR during the three months ended March 31, 2012 were on non-accrual status. Approximately 2 percent of this amount was 90 days past due.

At March 31, 2012, Regions had restructured binding unfunded commitments totaling \$226 million where a concession was granted and the borrower was in financial difficulty.

**NOTE 5 Loan Servicing**

The fair value of mortgage servicing rights is calculated using various assumptions including future cash flows, market discount rates, expected prepayment rates, servicing costs and other factors. A significant change in prepayments of mortgages in the servicing portfolio could result in significant changes in the valuation adjustments, thus creating potential volatility in the carrying amount of mortgage servicing rights.

**Table of Contents**

The tables below present an analysis of mortgage servicing rights under the fair value measurement method:

	Three Months Ended March 31	
	2012	2011
(In millions)		
Carrying value, beginning of period	\$ 182	\$ 267
Additions	14	16
Increase (decrease) in fair value:		
Due to change in valuation inputs or assumptions	9	5
Other changes (1)	(6)	(6)
Carrying value, end of period	\$ 199	\$ 282

(1) Represents economic amortization associated with borrower repayments.

Data and assumptions used in the fair value calculation, as well as the valuation's sensitivity to rate fluctuations, related to mortgage servicing rights (excluding related derivative instruments) are as follows:

	March 31	
	2012	2011
(Dollars in millions)		
Unpaid principal balance	\$ 26,163	\$ 25,767
Weighted-average prepayment speed (CPR; percentage)	16.3%	12.2%
Estimated impact on fair value of a 10% increase	\$ (12)	\$ (14)
Estimated impact on fair value of a 20% increase	\$ (23)	\$ (27)
Option-adjusted spread (basis points)	1,171	633
Estimated impact on fair value of a 10% increase	\$ (6)	\$ (6)
Estimated impact on fair value of a 20% increase	\$ (13)	\$ (13)
Weighted-average coupon interest rate	5.2%	5.4%
Weighted-average remaining maturity (months)	279	283
Weighted-average servicing fee (basis points)	28.6	28.7

The sensitivity calculations above are hypothetical and should not be considered to be predictive of future performance. Changes in fair value based on adverse changes in assumptions generally cannot be extrapolated because the relationship of the change in assumption to the change in fair value may not be linear. Also, the effect of an adverse variation in a particular assumption on the fair value of the mortgage servicing rights is calculated without changing any other assumption, while in reality changes in one factor may result in changes in another, which may either magnify or counteract the effect of the change. The derivative instruments utilized by Regions would serve to reduce the estimated impacts to fair value included in the table above.

The following table presents servicing related fees, which includes contractually specified servicing fees, late fees and other ancillary income resulting from the servicing of mortgage loans:

	Three Months Ended March 31	
	2012	2011
(In millions)		
Servicing related fees and other ancillary income	\$ 21	\$ 21

Loans are sold in the secondary market with standard representations and warranties regarding certain characteristics such as the quality of the loan, the absence of fraud, the eligibility of the loan for sale and the future servicing associated with the loan. Regions may be required to repurchase these loans at par, or make-whole or indemnify the purchasers for losses incurred when representations and warranties are breached.

**Table of Contents**

Regions maintains a repurchase liability related to mortgage loans sold with representations and warranty provisions. This repurchase liability is reported as other liabilities on the consolidated balance sheets and reflects management's estimate of losses based on historical repurchase and loss trends, as well as other factors that may result in anticipated losses different from historical loss trends. Adjustments to this reserve are recorded in other non-interest expense on the consolidated statements of operations. The table below presents an analysis of Regions' repurchase liability related to mortgage loans sold with representations and warranty provisions:

	Three Months Ended March 31	
	2012	2011
	(In millions)	
Beginning balance	\$ 32	\$ 32
Additions/(reductions), net	9	7
Losses	(8)	(7)
Ending balance	\$ 33	\$ 32

During the first quarter of 2012 and 2011, settled repurchase claims were related to one of the following alleged breaches: 1) underwriting guideline violations; 2) misrepresentation of income, assets or employment; or 3) property valuation not supported. These claims stem primarily from the 2006-2008 vintages.

**NOTE 6 Goodwill**

Goodwill allocated to each reportable segment is presented as follows:

	March 31 2012	December 31 2011
	(In millions)	
Banking/Treasury	\$ 4,691	\$ 4,691
Insurance	125	125
	\$ 4,816	\$ 4,816

Regions evaluates each reporting unit's goodwill for impairment on an annual basis in the fourth quarter, or more often if events or circumstances indicate that there may be impairment. Adverse changes in the economic environment, declining operations, or other factors could result in a decline in the implied fair value of goodwill. A goodwill impairment test includes two steps. Step One, used to identify potential impairment, compares the estimated fair value of a reporting unit with its carrying amount, including goodwill. If the estimated fair value of a reporting unit exceeds its carrying amount, goodwill of the reporting unit is considered not impaired. If the carrying amount of a reporting unit exceeds its estimated fair value, the second step of the goodwill impairment test is performed to measure the amount of impairment loss, if any. Step Two of the goodwill impairment test compares the implied estimated fair value of reporting unit goodwill with the carrying amount of that goodwill. If the carrying amount of goodwill for that reporting unit exceeds the implied fair value of that unit's goodwill, an impairment loss is recognized in an amount equal to that excess.

During the first quarter of 2012, Regions assessed the indicators of goodwill impairment as of February 29, 2012, and through the date of the filing of the Quarterly Report on Form 10-Q for the quarter ended March 31, 2012. The indicators assessed included:

Recent operating performance,

Changes in market capitalization,

Regulatory actions and assessments,

31

**Table of Contents**

Changes in the business climate (including legislation, legal factors and competition),

Company-specific factors (including changes in key personnel, asset impairments, and business dispositions), and

Trends in the banking industry.

While the assessment of these indicators did not indicate impairment, Regions determined that quantitative testing of goodwill was required for all of Regions' reporting units for the March 31, 2012 interim period due to the shortfall between Regions' market capitalization and book value. The results of the interim test indicated that goodwill was not impaired as of the test date.

For purposes of performing Step One of the goodwill impairment test, Regions uses both the income and market approaches to value its reporting units. The income approach, which is the primary valuation approach, consists of discounting projected long-term future cash flows, which are derived from internal forecasts and economic expectations for the respective reporting units. The significant inputs to the income approach include expected future cash flows, the long-term target tangible equity to tangible assets ratio, and the discount rate.

Regions utilizes the capital asset pricing model ( CAPM ) in order to derive the base discount rate. The inputs to the CAPM include the 20-year risk-free rate, 5-year beta for a select peer set, and the market risk premium based on published data. Once the output of the CAPM is determined, a size premium is added (also based on a published source) as well as a company-specific risk premium, which is an estimate determined by the Company and meant to compensate for the risk inherent in the future cash flow projections and inherent differences (such as business model and market perception of risk) between Regions and the peer set.

Regions uses the public company method and the transaction method as the two market approaches. The public company method applies a value multiplier derived from each reporting unit's peer group to a financial metric of the reporting unit (e.g. last twelve months of earnings before interest, taxes and depreciation, tangible book value, etc.) and an implied control premium to the respective reporting unit. The control premium is evaluated and compared to similar financial services transactions considering the absolute and relative potential revenue synergies and cost savings. The transaction method applies a value multiplier to a financial metric of the reporting unit based on comparable observed purchase transactions in the financial services industry for the reporting unit (where available).

Regions uses the output from these approaches to determine the estimated fair value of each reporting unit. Listed in the tables below are assumptions used in estimating the fair value of each reporting unit for the March 31, 2012 interim period and the December 31, 2011 annual test. First quarter 2012 includes testing for only the Banking/Treasury and Insurance reporting units, as the goodwill impairment charge taken on the Investment Banking/Brokerage/Trust reporting unit in the fourth quarter of 2011 reduced the net carrying value of goodwill in that reporting unit to zero. The tables include the discount rate used in the income approach, the market multiplier used in the market approaches, and the public company method control premium applied to all reporting units.

<b>As of First Quarter 2012</b>	<b>Banking/ Treasury</b>	<b>Insurance</b>
Discount rate used in income approach	14%	11%
Public company method market multiplier (1)	1.1x	17.4x
Transaction method market multiplier (2)	1.4x	n/a

- (1) For the Banking/Treasury reporting unit, this multiplier is applied to tangible book value. For the Insurance reporting unit, this multiplier is applied to the last twelve months of net income. In addition to the multipliers, a 30 percent control premium is assumed for the Banking/Treasury reporting unit and for the Insurance reporting unit.
- (2) For the Banking/Treasury reporting unit, this multiplier is applied to tangible book value.

**Table of Contents**

As of Fourth Quarter 2011	Banking/ Treasury	Investment Banking/ Brokerage/Trust	Insurance
Discount rate used in income approach	15%	15%	11%
Public company method market multiplier (1)	0.7x	1.4x	13.0x
Transaction method market multiplier (2)	1.1x	1.5x	n/a

(1) For the Banking/Treasury and Investment Banking/Brokerage/Trust reporting units, these multipliers are applied to tangible book value. For the Insurance reporting unit, this multiplier is applied to the last twelve months of net income. In addition to the multipliers, a 55 percent control premium is assumed for the Banking/Treasury reporting unit. A 20 percent control premium is assumed for the Investment Banking/Brokerage/Trust reporting unit and a 30 percent control premium for the Insurance reporting unit.

(2) For the Banking/Treasury and Investment Banking/Brokerage/Trust reporting units, these multipliers are applied to tangible book value. Regions' capital plan, which was required under the Federal Reserve's Comprehensive Capital Analysis and Review (CCAR), was submitted in early January of 2012. The Federal Reserve responded with no objections to the capital actions set forth in the capital plan on March 13, 2012. Shortly thereafter, Regions issued and sold 152.9 million shares of its common stock, par value \$0.01 per share, at a price to the public of \$5.90 per share, a premium above the closing price. The Company received approximately \$875 million in net proceeds from the offering after underwriting discounts and commissions and other expenses. Additionally, in connection with the CCAR on March 13, 2012, the Federal Reserve disclosed its projections of pro-forma, post stress pre-provision income and losses and pro-forma, post stress capital ratios under the Federal Reserve's Supervisory Stress Scenario for the nineteen institutions, including Regions, that participated in the 2011 CCAR. Regions exceeded the minimum required capital level over the entire review period through year-end 2013. Regions also received an upgrade to its debt ratings from Standard & Poor's rating agency on March 15, 2012. These positive factors led to a reduction in the discount rate applied to the Banking/Treasury reporting unit in the first quarter of 2012.

The change in the public company market method control premium in the Banking/Treasury reporting unit from 55 percent in the fourth quarter 2011 to 30 percent in the first quarter 2012 reflects improved peer valuations which align with observable transactions.

**NOTE 7 Stockholders' Equity and Comprehensive Income (Loss)**

On March 19, 2012, the Company issued 152.9 million shares of common stock at \$5.90 per share, generating proceeds of approximately \$875 million, net of issuance costs.

On November 14, 2008, Regions completed the sale of 3.5 million shares of its Fixed Rate Cumulative Perpetual Preferred Stock, Series A, to the U.S. Treasury as part of the Capital Purchase Program (CPP). Under this agreement, Regions was required to pay the U.S. Treasury on a quarterly basis a 5 percent dividend, or \$175 million annually, for each of the first five years of the investment, and 9 percent thereafter or until redemption. As part of its purchase of the preferred securities, the U.S. Treasury also received a warrant to purchase 48.3 million shares of Regions' common stock at an exercise price of \$10.88 per share, subject to anti-dilution and other adjustments. Regions received \$3.5 billion from issuance of the Series A preferred shares and the warrant. The fair value allocation of the \$3.5 billion between the preferred shares and the warrant resulted in \$3.304 billion allocated to the preferred shares and \$196 million allocated to the warrant. Accrued dividends on the preferred shares reduced retained earnings by \$44 million during the first three months of 2012 compared to \$43 million for the same period in 2011. The unamortized discount on the preferred shares was \$71 million at March 31, 2012 and \$81 million at December 31, 2011. Discount accretion on the preferred shares reduced retained earnings by \$10 million and \$9 million during the first three months of 2012 and 2011, respectively.

**Table of Contents**

Both the preferred securities and the warrant are accounted for as components of Regions' regulatory Tier 1 capital. As discussed in Note 16, on April 4, 2012 Regions repurchased the Series A shares at par. In May of 2012, Regions repurchased the warrant for \$45 million.

At March 31, 2012, Regions had 23.1 million common shares available for repurchase through open market transactions under an existing share repurchase authorization. There were no treasury stock purchases through open market transactions during the first three months of 2012 or 2011. The Company's ability to repurchase its common stock was limited by the terms of the CPP mentioned above and is subject to review and approval currently by the Federal Reserve.

The Board of Directors declared a \$0.01 per share cash dividend for the first quarter of both 2012 and 2011.

**NOTE 8 Earnings (Loss) per Common Share**

The following table sets forth the computation of basic earnings (loss) per common share and diluted earnings (loss) per common share:

	<b>Three Months Ended March 31</b>	
	<b>2012</b>	<b>2011</b>
	<b>(In millions, except per share amounts)</b>	
<b>Numerator:</b>		
Income from continuing operations	\$ 239	\$ 50
Less: Preferred stock dividends and accretion	(54)	(52)
Income (loss) from continuing operations available to common shareholders	185	(2)
Income (loss) from discontinued operations, net of tax	(40)	19
Net income available to common shareholders	\$ 145	\$ 17
<b>Denominator:</b>		
Weighted-average common shares outstanding - basic	1,282	1,257
Potential common shares	1	2
Weighted-average common shares outstanding - diluted	1,283	1,259
<b>Earnings (loss) per common share from continuing operations (1):</b>		
Basic	\$ 0.14	\$ (0.00)
Diluted	0.14	(0.00)
<b>Earnings (loss) per common share from discontinued operations (1):</b>		
Basic	(0.03)	0.01
Diluted	(0.03)	0.01
<b>Earnings per common share (1):</b>		
Basic	0.11	0.01
Diluted	0.11	0.01

(1) Certain per share amounts may not appear to reconcile due to rounding.

The effect from the assumed exercise of 39 million stock options for both the three months ended March 31, 2012 and 2011 was not included in the above computations of diluted earnings per common share because such amounts would have had an antidilutive effect on earnings per common share.

The weighted average common share balances above include the issuance of 152.9 million shares on March 19, 2012 as discussed in Note 7.

**Table of Contents****NOTE 9 Share-Based Payments**

Regions has long-term incentive compensation plans that permit the granting of incentive awards in the form of stock options, restricted stock, restricted stock awards and units, and/or stock appreciation rights. While Regions has the ability to issue stock appreciation rights, none have been issued to date. The terms of all awards issued under these plans are determined by the Compensation Committee of the Board of Directors; however, no awards may be granted after the tenth anniversary from the date the plans were initially approved by shareholders. Options and restricted stock usually vest based on employee service, generally within three years from the date of the grant. The contractual lives of options granted under these plans range from seven to ten years from the date of grant.

On May 13, 2010, the shareholders of the Company approved the Regions Financial Corporation 2010 Long-Term Incentive Plan ( 2010 LTIP ), which permits the Company to grant to employees and directors various forms of incentive compensation. These forms of incentive compensation are similar to the types of compensation approved in prior plans. The 2010 LTIP authorizes 100 million common share equivalents available for grant, where grants of options count as one share equivalent and grants of full value awards (e.g., shares of restricted stock and restricted stock units) count as 2.25 share equivalents. Unless otherwise determined by the Compensation Committee of the Board of Directors, grants of restricted stock and restricted stock units accrue dividends as they are declared by the Board of Directors, and the dividends are paid upon vesting of the award. The 2010 LTIP closed all prior long-term incentive plans to new grants, and, accordingly, prospective grants must be made under the 2010 LTIP or a successor plan. All existing grants under prior long-term incentive plans were unaffected by this amendment. The number of remaining share equivalents available for future issuance under the 2010 LTIP was approximately 83 million at March 31, 2012.

**STOCK OPTIONS**

No stock option grants were made during the first quarter of 2012. The following table details the activity related to stock options during the first three months of 2012 and 2011:

The following table details the activity related to stock options:

	Three Months Ended March 31					
	2012	Weighted-Average		2011	Weighted-Average	
	Number of Options	Exercise Price	Number of Options	Exercise Price		
Outstanding at beginning of period	46,351,349	\$ 23.62	54,999,626	\$ 24.41		
Granted			114,065	7.43		
Exercised	(177,892)	3.29	(18,442)	3.29		
Canceled/Forfeited	(3,931,244)	25.91	(5,911,560)	23.62		
Outstanding at end of period	42,242,213	\$ 23.50	49,183,689	\$ 24.47		
Exercisable at end of period	36,593,195	\$ 26.06	41,491,421	\$ 27.72		

**RESTRICTED STOCK AWARDS**

During the first three months of 2012 and 2011, Regions made restricted share grants that vest based upon a service condition. Dividend payments during the vesting period are deferred to the end of the vesting term. The fair value of these restricted shares was estimated based upon the fair value of the underlying shares on the date of the grant. The valuation was not adjusted for the deferral of dividends.

**Table of Contents**

The following table details the activity related to restricted share awards and units:

	Three Months Ended March 31			
	2012	2011		2011
	Number of Shares	Weighted-Average Grant Date Fair Value	Number of Shares	Weighted-Average Grant Date Fair Value
Non-vested at beginning of period	6,280,360	\$ 7.60	4,930,444	\$ 12.13
Granted	465,080	5.72	425,013	7.38
Vested	(16,437)	23.15	(1,079,779)	24.50
Forfeited	(137,615)	4.52	(6,817)	14.90
Non-vested at end of period	6,591,388	\$ 7.50	4,268,861	\$ 8.52

**NOTE 10 Pension and Other Postretirement Benefits**

Net periodic pension cost included the following components:

	For The Three Months Ended March 31	
	2012	2011
	(In millions)	
Service cost	\$ 11	\$ 10
Interest cost	22	23
Expected return on plan assets	(29)	(30)
Amortization of actuarial loss	17	11
Amortization of prior service cost	1	
	\$ 22	\$ 14

There was no material impact from other postretirement benefits on the consolidated financial statements for the three month periods ended March 31, 2012 or 2011.

**Table of Contents****NOTE 11 Derivative Financial Instruments and Hedging Activities**

The following tables present the notional and fair value of derivative instruments on a gross basis as of March 31:

	Notional Value	March 31, 2012		Liability Derivatives	
		Balance Sheet Location	Asset Derivatives Fair Value (In millions)	Balance Sheet Location	Fair Value
<b>Derivatives in fair value hedging relationships:</b>					
Interest rate swaps	\$ 5,661	Other assets	\$ 137	Other liabilities	\$ 1
<b>Forward commitments</b>					
<b>Derivatives in cash flow hedging relationships:</b>					
Interest rate swaps	11,500	Other assets	204	Other liabilities	
Total derivatives designated as hedging instruments	\$ 17,161		\$ 341		\$ 1
<b>Derivatives not designated as hedging instruments:</b>					
Interest rate swaps (1)	\$ 59,196	Other assets	\$ 2,061	Other liabilities	\$ 2,089
Interest rate options (2)	3,833	Other assets	44	Other liabilities	26
Interest rate futures and forward commitments	68,273	Other assets	13	Other liabilities	13
Other contracts	1,579	Other assets	53	Other liabilities	48
Total derivatives not designated as hedging instruments	\$ 132,881		\$ 2,171		\$ 2,176
Total derivatives	\$ 150,042		\$ 2,512		\$ 2,177

(1) Includes Morgan Keegan amounts of \$4.2 billion in notional value and \$382 million in other assets/other liabilities

(2) Includes Morgan Keegan amounts of \$364 million in notional value and \$21 million in other assets/other liabilities

**Table of Contents**

	December 31, 2011				
	Notional Value	Asset Derivatives		Liability Derivatives

(2) Includes Morgan Keegan amounts of \$364 million in notional value and \$23 million in other assets/other liabilities

**HEDGING DERIVATIVES**

Derivatives entered into to manage interest rate risk and facilitate asset/liability management strategies are designated as hedging derivatives. Derivative financial instruments that qualify in a hedging relationship are classified, based on the exposure being hedged, as either a fair value hedge or a cash flow hedge. The Company formally documents all hedging relationships between hedging instruments and hedged items, as well as its risk management objective and strategy for entering into various hedge transactions. The Company performs periodic assessments to determine whether the hedging relationship has been highly effective in offsetting changes in fair values or cash flows of hedged items and whether the relationship is expected to continue to be highly effective in the future.

When a hedge is terminated or hedge accounting is discontinued because the hedged item no longer meets the definition of a firm commitment, or because it is probable that the forecasted transaction will not occur by the end of the specified time period, the derivative will continue to be recorded in the consolidated balance sheet at its fair value, with changes in fair value recognized currently in other non-interest income. Any asset or liability that was recorded pursuant to recognition of the firm commitment is removed from the consolidated balance sheets and recognized currently in other non-interest expense. Gains and losses that were accumulated in other comprehensive income pursuant to the hedge of a forecasted transaction are recognized immediately in other non-interest expense.

---

**Table of Contents***FAIR VALUE HEDGES*

Fair value hedge relationships mitigate exposure to the change in fair value of an asset, liability or firm commitment. Under the fair value hedging model, gains or losses attributable to the change in fair value of the derivative instrument, as well as the gains and losses attributable to the change in fair value of the hedged item, are recognized in earnings in the period in which the change in fair value occurs. The corresponding adjustment to the hedged asset or liability is included in the basis of the hedged item, while the corresponding change in the fair value of the derivative instrument is recorded as an adjustment to other assets or other liabilities, as applicable. Hedge ineffectiveness exists to the extent that the changes in fair value of the derivative do not offset the changes in fair value of the hedged item and is recorded as other non-interest expense.

Regions enters into interest rate swap agreements to manage interest rate exposure on the Company's fixed-rate borrowings, which includes long-term debt and certificates of deposit. These agreements involve the receipt of fixed-rate amounts in exchange for floating-rate interest payments over the life of the agreements. Regions also enters into forward sale commitments to hedge changes in the fair value of available-for-sale securities.

*CASH FLOW HEDGES*

Cash flow hedge relationships mitigate exposure to the variability of future cash flows or other forecasted transactions. For cash flow hedge relationships, the effective portion of the gain or loss related to the derivative instrument is recognized as a component of other comprehensive income. Ineffectiveness is measured by comparing the change in fair value of the respective derivative instrument and the change in fair value of a perfectly effective hypothetical derivative instrument. Ineffectiveness will be recognized in earnings only if it results from an overhedge. The ineffective portion of the gain or loss related to the derivative instrument, if any, is recognized in earnings as other non-interest expense during the period of change. Amounts recorded in other comprehensive income are recognized in earnings in the periods during which the hedged item impacts earnings.

Regions enters into interest rate swap agreements to manage overall cash flow changes related to interest rate risk exposure on LIBOR-based loans. The agreements effectively modify the Company's exposure to interest rate risk by utilizing receive fixed/pay LIBOR interest rate swaps.

Regions issues long-term fixed-rate debt for various funding needs. Regions enters into receive LIBOR/pay fixed forward starting swaps to hedge risks of changes in the projected quarterly interest payments attributable to changes in the benchmark interest rate (LIBOR) during the time leading up to the probable issuance date of the new long term fixed-rate debt.

Regions enters into interest rate option contracts to protect cash flows through the maturity date of the hedging instrument on designated one-month LIBOR floating-rate loans from adverse extreme market interest rate changes. Regions purchases Eurodollar futures to hedge the variability in future cash flows based on forecasted resets of one-month LIBOR-based floating rate loans due to changes in the benchmark interest rate. Regions recognized an unrealized after-tax loss of \$43 million and an unrealized after-tax gain of \$17 million in accumulated other comprehensive income at March 31, 2012 and 2011, respectively, related to terminated cash flow hedges of loan and debt instruments which will be amortized into earnings in conjunction with the recognition of interest payments through 2017. Regions recognized a pre-tax loss of \$4 million and pre-tax income of \$9 million during the three months ended March 31, 2012 and 2011, respectively, related to the amortization of cash flow hedges of loan and debt instruments.

Regions expects to reclassify out of other comprehensive income and into earnings approximately \$54 million in pre-tax income due to the receipt or payment of interest payments on all cash flow hedges within the next twelve months. Included in this amount is \$18 million in pre-tax net losses related to the amortization of discontinued cash flow hedges. The maximum length of time over which Regions is hedging its exposure to the variability in future cash flows for forecasted transactions is approximately six years as of March 31, 2012.

**Table of Contents**

The following tables present the effect of derivative instruments on the statements of operations:

**Three Months Ended March 31, 2012**

Derivatives in Fair Value Hedging Relationships	Location of Gain(Loss)		Hedged Items in Fair Value Hedge Relationships	Amount of Gain(Loss) Recognized in Income on Related Hedged Item

**Table of Contents**

**DERIVATIVES NOT DESIGNATED AS HEDGING INSTRUMENTS**

The Company maintains a derivatives trading portfolio of interest rate swaps, option contracts, and futures and forward commitments used to meet the needs of its customers. The portfolio is used to generate trading profit and to help clients manage market risk. The Company is subject to the credit risk that a counterparty will fail to perform. The Company is also subject to market risk, which is evaluated by the Company and monitored by the asset/liability management process. Separate derivative contracts are entered into to reduce overall market exposure to pre-defined limits. The contracts in this portfolio do not qualify for hedge accounting and are marked-to-market through earnings and included in other assets and other liabilities.

In the normal course of business, Morgan Keegan enters into underwriting and forward and future commitments on U.S. Government and municipal securities. As of March 31, 2012 and 2011, the total notional amount related to forward and future commitments was approximately \$879 million and \$389 million, respectively. The brokerage subsidiary typically settles its position by entering into equal but opposite contracts and, as such, the contract amounts do not necessarily represent future cash requirements. Settlement of the transactions relating to such commitments is not expected to have a material effect on the subsidiary's financial position. Transactions involving future settlement give rise to market risk, which represents the potential loss that can be caused by a change in the market value of a particular financial instrument. The exposure to market risk is determined by a number of factors, including size, composition and diversification of positions held, the absolute and relative levels of interest rates, and market volatility.

Regions enters into interest rate lock commitments, which are commitments to originate mortgage loans whereby the interest rate on the loan is determined prior to funding and the customers have locked into that interest rate. At March 31, 2012 and 2011, Regions had \$993 million and \$464 million, respectively, in total notional amount of interest rate lock commitments. Regions manages market risk on interest rate lock commitments and mortgage loans held for sale with corresponding forward sale commitments, which are recorded at fair value with changes in fair value recorded in mortgage income. For both March 31, 2012 and 2011, Regions had \$1.5 billion in total notional amount related to these forward rate commitments.

Regions has elected to account for mortgage servicing rights at fair market value with any changes to fair value being recorded within mortgage income. Concurrent with the election to use the fair value measurement method, Regions began using various derivative instruments, in the form of forward rate commitments, futures contracts, swaps and swaptions to mitigate the statement of operations effect of changes in the fair value of its mortgage servicing rights. As of March 31, 2012 and 2011, the total notional amount related to these contracts was \$5.1 billion and \$1.5 billion, respectively.

**Table of Contents**

The following tables present the location and amount of gain or (loss) recognized in income on derivatives not designated as hedging instruments in the statement of operations for the three months ended March 31, 2012 and 2011, respectively:

Derivatives Not Designated as Hedging Instruments	Three Months Ended March 31	
	2012	2011
	(In millions)	
<b>Capital markets and investment income</b>		
Interest rate swaps	\$ 4	\$ 8
Other contracts	3	3
<b>Total capital markets and investment income</b>	7	11
<b>Mortgage income</b>		
Interest rate swaps	(3)	(5)
Interest rate options	5	(28)
Interest rate futures and forward commitments	16	2
<b>Total mortgage income</b>	18	(31)
	\$ 25	\$ (20)

Credit risk, defined as all positive exposures not collateralized with cash or other financial instruments, at March 31, 2012 and 2011, totaled approximately \$849 million and \$846 million, respectively. This amount represents the net credit risk on all trading and other derivative positions held by Regions.

**CREDIT DERIVATIVES**

Regions has both bought and sold credit protection in the form of participations on interest rate swaps (swap participations). These swap participations, which meet the definition of credit derivatives, were entered into in the ordinary course of business to serve the credit needs of customers. Credit derivatives, whereby Regions has purchased credit protection, entitle Regions to receive a payment from the counterparty when the customer fails to make payment on any amounts due to Regions upon early termination of the swap transaction and have maturities between 2012 and 2026. Credit derivatives whereby Regions has sold credit protection have maturities between 2012 and 2018. For contracts where Regions sold credit protection, Regions would be required to make payment to the counterparty when the customer fails to make payment on any amounts due to the counterparty upon early termination of the swap transaction. Regions bases the current status of the prepayment/performance risk on bought and sold credit derivatives on recently issued internal risk ratings consistent with the risk management practices of unfunded commitments.

Regions' maximum potential amount of future payments under these contracts as of March 31, 2012 was approximately \$34 million. This scenario would only occur if variable interest rates were at zero percent and all counterparties defaulted with zero recovery. The fair value of sold protection at March 31, 2012 and 2011 was immaterial. In transactions where Regions has sold credit protection, recourse to collateral associated with the original swap transaction is available to offset some or all of Regions' obligation.

**CONTINGENT FEATURES**

Certain of Regions' derivative instrument contracts with broker-dealers contain provisions allowing those broker-dealers to terminate the contracts in the event that Regions' and/or Regions Bank's credit ratings falls below specified ratings from certain major credit rating agencies. At March 31, 2012, Moody's credit ratings for Regions Financial Corporation and Regions Bank were below investment grade. As a result of these ratings, certain Regions Bank broker-dealer counterparties could have terminated these contracts at their discretion. In

## **Table of Contents**

lieu of terminating the contracts, Regions Bank and certain of its broker-dealer counterparties amended the contracts such that Regions Bank was required to post additional collateral in the cumulative amount of \$188 million to these counterparties as of March 31, 2012.

Some of these contracts with broker-dealers still contain credit-related termination provisions and/or credit-related provisions regarding the posting of collateral. At March 31, 2012, the net fair value of such contracts containing credit-related termination provisions that were in a liability position was \$289 million, for which Regions had posted collateral of \$401 million. At March 31, 2012, the net fair value of contracts that do not contain credit-related termination provisions that were in a liability position was \$234 million, for which Regions had posted collateral of \$236 million. Other derivative contracts with broker-dealers do not contain any credit-related provisions. These counterparties require complete overnight collateralization.

The aggregate fair value of all derivative instruments with any credit-risk-related contingent features that were in a liability position on March 31, 2012 and December 31, 2011, was \$377 million and \$425 million, respectively, for which Regions had posted collateral of \$490 million and \$531 million, respectively, in the normal course of business.

### **NOTE 12 Fair Value Measurements**

Fair value guidance establishes a framework for using fair value to measure assets and liabilities and defines fair value as the price that would be received to sell an asset or paid to transfer a liability (an exit price) as opposed to the price that would be paid to acquire the asset or received to assume the liability (an entry price). A fair value measure should reflect the assumptions that market participants would use in pricing the asset or liability, including the assumptions about the risk inherent in a particular valuation technique, the effect of a restriction on the sale or use of an asset and the risk of nonperformance. Required disclosures include stratification of balance sheet amounts measured at fair value based on inputs the Company uses to derive fair value measurements. These strata include:

Level 1 valuations, where the valuation is based on quoted market prices for identical assets or liabilities traded in active markets (which include exchanges and over-the-counter markets with sufficient volume),

Level 2 valuations, where the valuation is based on quoted market prices for similar instruments traded in active markets, quoted prices for identical or similar instruments in markets that are not active and model-based valuation techniques for which all significant assumptions are observable in the market, and

Level 3 valuations, where the valuation is generated from model-based techniques that use significant assumptions not observable in the market, but observable based on Company-specific data. These unobservable assumptions reflect the Company's own estimates for assumptions that market participants would use in pricing the asset or liability. Valuation techniques typically include option pricing models, discounted cash flow models and similar techniques, but may also include the use of market prices of assets or liabilities that are not directly comparable to the subject asset or liability.

See Note 1 Summary of Significant Accounting Policies to the consolidated financial statements of the 2011 Annual Report on Form 10-K for a description of valuation methodologies for assets and liabilities measured at fair value on a recurring and non-recurring basis. Regions rarely transfers assets and liabilities measured at fair value between Level 1 and Level 2 measurements. There were no such transfers during the three month periods ended March 31, 2012 and 2011. Trading account assets are periodically transferred into or out of Level 3 valuation based on management's conclusion regarding the best method of pricing for an individual security. Such transfers are accounted for as if they occur at the beginning of a reporting period.

**Table of Contents**

The following tables present assets and liabilities measured at fair value on a recurring basis and non-recurring basis as of March 31, 2012 and December 31, 2011:

	March 31, 2012				December 31, 2011			
	Level 1	Level 2	Level 3	Total Fair Value	Level 1	Level 2	Level 3	Total Fair Value
	(In millions)

**Table of Contents**

- (1) All trading account assets are related to Morgan Keegan (see Note 2 for further discussion regarding the sale of Morgan Keegan) with the exception of \$164 million and \$178 million of equity securities at March 31, 2012 and December 31, 2011, respectively, of which all are classified as Level 1 in the table.
- (2) Excludes Federal Reserve Bank and Federal Home Loan Bank Stock totaling \$481 million and \$219 million, respectively, at both March 31, 2012 and December 31, 2011.
- (3) At March 31, 2012, derivatives include approximately \$1.2 billion related to legally enforceable master netting agreements that allow the Company to settle positive and negative positions. Derivatives are also presented excluding cash collateral received of \$61 million and cash collateral posted of \$677 million with counterparties. At December 31, 2011, derivatives include approximately \$1.4 billion related to legally enforceable master netting agreements that allow the Company to settle positive and negative positions. Derivatives are also presented excluding cash collateral received of \$55 million and cash collateral posted of \$732 million with counterparties.
- (4) Derivative assets and liabilities both include \$382 million of interest rate swaps and \$21 million of interest rate options at March 31, 2012 and \$454 million of interest rate swaps and \$23 million of interest rate options at December 31, 2011 related to Morgan Keegan, all of which are classified as Level 2 in the table.
- (5) All trading account liabilities are related to Morgan Keegan at March 31, 2012 and December 31, 2011.

Assets and liabilities in all levels could result in volatile and material price fluctuations. Realized and unrealized gains and losses on Level 3 assets represent only a portion of the risk to market fluctuations in Regions' consolidated balance sheets. Further, trading account assets, trading account liabilities and derivatives included in Levels 1, 2 and 3 are used by the Asset and Liability Management Committee of the Company in a holistic approach to managing price fluctuation risks.

**Table of Contents**

The following tables illustrate a rollforward for all assets and (liabilities) measured at fair value on a recurring basis using significant unobservable inputs (Level 3) for the three months ended March 31, 2012 and 2011, respectively. The tables do not reflect the change in fair value attributable to any related economic hedges the Company used to mitigate the interest rate risk associated with these assets and (liabilities).

**Table of Contents**

The following table presents detailed information regarding assets and liabilities measured at fair value using significant unobservable inputs (Level 3) as of March 31, 2012. The table includes the valuation techniques and the significant unobservable inputs utilized. The range of each unobservable input as well as the weighted average within the range utilized at March 31, 2012 is included. Following the table is a description of the valuation technique and the sensitivity of the technique to changes in the significant unobservable input.

	Level 3 Fair Value (b)	Valuation Technique	March 31, 2012 Unobservable Input(s) (Dollars in millions)	Quantitative Range of Unobservable Inputs and (Weighted-Average)
<b>Recurring fair value measurements:</b>				
<u>Securities available for sale:</u>				
Obligations of states and political subdivisions	\$ 16	(c)	(c)	(c)
Mortgage-backed securities:				
Residential non-agency	\$ 15	Discounted cash flow	Spread to LIBOR	5.3% - 69.8% (18.1%)
			Weighted-average prepayment speed	
			(CPR; percentage)	12.2% - 22.1% (18.9%)
			Probability of default	0.2% - 1.2% (1.1%)
			Loss severity	35.0% - 100.0% (43.2%)
Other debt securities	\$ 3	Comparable quote	Evaluated quote on same issuer/comparable bond	99.5% (99.5%)
			Comparability adjustments	0.1% (0.1%)
Mortgage servicing rights (a)	\$ 199	Discounted cash flow	Weighted-average prepayment speed	
			(CPR; percentage)	0% - 65.6% (16.3%)
			Option-adjusted spread (basis points)	0 - 2,669 (1,171)
<u>Derivative assets</u>				
Interest rate options	\$ 18	Discounted cash flow	Weighted-average prepayment speed	
			(CPR; percentage)	0% - 65.6% (16.3%)
			Option-adjusted spread (basis points)	0 - 2,669 (1,171)
			Pull-through	22.6% - 98.8% (76.4%)
<b>Nonrecurring fair value measurements:</b>				
Loans held for sale	\$ 93	Multiple data points, including discount to appraised value of collateral based on recent market activity for sales of similar loans	Appraisal comparability adjustment (discount)	18.0% - 90.0% (45.4%)
Foreclosed property and other real estate	\$ 68	Discount to appraised value of property based on recent market activity for sales of similar properties	Appraisal comparability adjustment (discount)	7.0% - 93.4% (24.5%)

- (a) See Note 5 for additional disclosures related to assumptions used in the fair value calculation for mortgage servicing rights.
- (b) The data in the table above does not include \$241 million in trading assets and \$52 million in trading liabilities related to Morgan Keegan, which were valued using Level 3 measurements. As discussed in Note 2 and Note 16, the sale of Morgan Keegan, to Raymond James was closed on April 2, 2012. Accordingly, these assets and liabilities will be included in the calculation of the gain or loss on sale. Due to the closing of this transaction immediately following the close of the first quarter, the Level 3 detailed information is not considered relevant.
- (c) In April 2012, Regions sold these securities and received an amount approximating the fair value measurement at March 31, 2012. Due to this sale and the de-recognition of these assets following the close of the quarter, the Level 3 detailed information is not considered relevant.

## Table of Contents

### RECURRING FAIR VALUE MEASUREMENTS USING SIGNIFICANT UNOBSERVABLE INPUTS

#### Securities available for sale

*Mortgage backed securities: residential non-agency* The fair value reported in this category relates to retained interests in legacy securitizations. Significant unobservable inputs include the spread to LIBOR, constant prepayment rate, probability of default, and loss severity in the event of default. Significant increases in any of these inputs in isolation would result in significantly lower fair value measurement. Generally, a change in the assumption used for the probability of default is accompanied by a directionally similar change in the assumption used for loss severity and a directionally opposite change in the assumption used for prepayment rates.

*Other debt securities* Significant unobservable inputs include evaluated quotes on comparable bonds for the same issuer and management-determined comparability adjustments. Changes in the evaluated quote on comparable bonds would result in a directionally similar change in the fair value of the other debt securities.

#### Mortgage Servicing Rights

The significant unobservable inputs used in the fair value measurement of mortgage servicing rights are option adjusted spreads (OAS) and prepayment speeds. This method requires generating cash flow projections over multiple interest rate scenarios and discounting those cash flows at a risk adjusted rate. Additionally, the impact of prepayments and changes in the option adjusted spread are based on a variety of underlying inputs such as servicing costs. Increases or decreases to the underlying cash flow inputs will have a corresponding impact on the value of the MSR asset. See Note 5 for additional disclosures related to assumptions used in the fair value calculation for mortgage servicing rights.

#### Derivative assets

*Interest rate options* These instruments are interest rate lock agreements made in the normal course of originating residential mortgage loans. Significant unobservable inputs in the fair value measurement are OAS, prepayment speeds, and pull-through. The impact of OAS and prepayment speed inputs in the valuation of these derivative instruments are consistent with the MSR discussion above. Pull-through is an estimate of the number of interest rate lock commitments that will ultimately become funded loans. Increases or decreases in the pull-through assumption will have a corresponding impact on the value of these derivative assets.

### NON-RECURRING FAIR VALUE MEASUREMENTS USING SIGNIFICANT UNOBSERVABLE INPUTS

#### Loans held for sale

Loans held for sale are valued based on multiple data points indicating the fair value for each loan. The primary data point for non-performing investor real estate loans is a discount to the appraised value of the underlying collateral, which considers the return required by potential buyers of the loans. Management establishes this discount or comparability adjustment based on recent sales of loans secured by similar property types. As liquidity in the market increases or decreases, the comparability adjustment and the resulting asset valuation are impacted.

#### Foreclosed property and other real estate

Foreclosed property and other real estate are valued based on offered quotes as available. If no sales contract is pending for a specific property, management establishes a comparability adjustment to the appraised value based on historical activity considering proceeds for properties sold versus the corresponding appraised value. Increases or decreases in realization for properties sold impact the comparability adjustment for similar assets remaining on the balance sheet.

**Table of Contents****FAIR VALUE OPTION**

Regions elected the fair value option for FNMA and FHLMC eligible thirty-year residential mortgage loans held for sale originated on or after January 1, 2008. Additionally, Regions elected the fair value option for FNMA and FHLMC eligible fifteen-year residential mortgage loans originated on or after November 22, 2010. These elections allow for a more effective offset of the changes in fair values of the loans and the derivative instruments used to economically hedge them without the burden of complying with the requirements for hedge accounting. Regions has not elected the fair value option for other loans held for sale primarily because they are not economically hedged using derivative instruments. Fair values of mortgage loans held for sale are based on traded market prices of similar assets where available and/or discounted cash flows at market interest rates, adjusted for securitization activities that include servicing values and market conditions, and are recorded in loans held for sale in the consolidated balance sheets.

The following table summarizes the difference between the aggregate fair value and the aggregate unpaid principal balance for mortgage loans held for sale measured at fair value:

	March 31, 2012			December 31, 2011		
	Aggregate Fair Value	Aggregate Unpaid Principal	Aggregate Fair Value Less Aggregate Unpaid Principal (In millions)	Aggregate Fair Value	Aggregate Unpaid Principal	Aggregate Fair Value Less Aggregate Unpaid Principal
Mortgage loans held for sale, at fair value	\$ 752	\$ 734	\$ 18	\$ 844	\$ 815	\$ 29

Interest income on mortgage loans held for sale is recognized based on contractual rates and is reflected in interest income on loans held for sale in the consolidated statements of operations. The following table details net gains (losses) resulting from changes in fair value of these loans which were recorded in mortgage income in the consolidated statements of operations during the three months ended March 31, 2012 and 2011, respectively. These changes in fair value are mostly offset by economic hedging activities. An immaterial portion of these amounts was attributable to changes in instrument-specific credit risk.

	Mortgage loans held for sale, at fair value Three Months Ended March 31	
	2012	2011
	(In millions)	
Net gains (losses) resulting from changes in fair value	\$ (10)	\$ 18

**FAIR VALUE OF FINANCIAL INSTRUMENTS**

For items measured at fair value on either a recurring or non-recurring basis, a description of the valuation methodology as well as within which strata of the fair value hierarchy the measurement falls is detailed in the consolidated financial statements included in the Annual Report on Form 10-K for the year ended December 31, 2011. For financial instruments whose fair values are estimated for disclosure purposes only, the following methods and assumptions were used:

**Cash and cash equivalents:** The carrying amounts reported in the consolidated balance sheets and cash flows approximate the estimated fair values. Because these amounts generally relate to either currency or highly liquid assets, these are considered a Level 1 valuation.

**Securities held to maturity:** The fair values of securities held to maturity are estimated in the same manner as the corresponding securities available for sale, which are measured at fair value on a recurring basis.

**Loans (excluding leases), net of unearned income and allowance for loan losses:** The fair values of loans, excluding leases, are estimated based on groupings of similar loans by type, interest rate, and borrower

**Table of Contents**

creditworthiness. Discounted future cash flow analyses are performed for the groupings incorporating assumptions of current and projected prepayment speeds and expected loss. Discount rates are determined using the Company's current origination rates on similar loans, adjusted for changes in current liquidity and credit spreads (if necessary). Because the current liquidity spreads are generally not observable in the market and the expected loss assumptions are based on the Company's experience, these are Level 3 valuations.

**Other interest-earning assets:** The carrying amounts reported in the consolidated balance sheets approximate the estimated fair values. While these instruments are not actively traded in the market, the majority of the inputs required to value them are actively quoted and can be validated through external sources. Accordingly, these are Level 2 valuations.

**Deposits:** The fair value of non-interest-bearing demand accounts, interest-bearing transaction accounts, savings accounts, money market accounts and certain other time deposit accounts is the amount payable on demand at the reporting date (i.e., the carrying amount). Fair values for certificates of deposit are estimated by using discounted cash flow analyses, based on market spreads to benchmark rates. These are Level 2 valuations.

**Short-term and long-term borrowings:** The carrying amounts of short-term borrowings reported in the consolidated balance sheets approximate the estimated fair values, and are considered Level 2 measurements as similar instruments are traded in active markets. The fair values of certain long-term borrowings are estimated using quoted market prices of identical instruments, and are considered Level 1 measurements. If identical instruments are not available, fair values are estimated using quoted market prices for similar instruments and are considered Level 2 valuations. Otherwise, valuations are based on current interest rates, liquidity and credit spreads and are considered Level 3 valuations.

**Loan commitments and letters of credit:** The estimated fair values for these off-balance sheet instruments are based on probabilities of funding to project future loan fundings, which are discounted using the loan methodology described above. The premiums/discounts are adjusted for the time value of money over the average remaining life of the commitments and the opportunity cost associated with regulatory requirements. Because the probabilities of funding and loan valuations are not observable in the market and considered company specific inputs, these are Level 3 valuations.

**Table of Contents**

The carrying amounts and estimated fair values, as well as the level within the fair value hierarchy, of the Company's financial instruments as of March 31, 2012 are as follows:

	Carrying Amount	Estimated Fair Value (1)	March 31, 2012		
			Level 1 (In millions)	Level 2	Level 3
<b>Financial assets:</b>					
Cash and cash equivalents	\$ 7,473	\$ 7,473	\$ 7,473	\$	\$
Trading account assets	1,127	1,127	490	396	241
Securities available for sale	27,177	27,177	167	26,976	34
Securities held to maturity	15	16	4	12	
Loans held for sale	1,054	1,054		787	267
Loans (excluding leases), net of unearned income and allowance for loan losses (2), (3)	72,614	65,120			65,120
Other interest-earning assets	1,054	1,054		1,054	
Derivatives, net	335	335		317	18
<b>Financial liabilities:</b>					
Deposits	97,138	97,618		97,618	
Short-term borrowings	2,908	2,908		2,908	
Long-term borrowings	7,196	6,896	5,475	240	1,181
Loan commitments and letters of credit	128	715			715

- (1) Estimated fair values are consistent with an exit price concept. The assumptions used to estimate the fair values are intended to approximate those that a market participant would use in a hypothetical orderly transaction. In estimating fair value, the Company makes adjustments for interest rates, market liquidity and credit spreads as appropriate.
- (2) The estimated fair value of portfolio loans assumes sale of the loans to a third-party financial investor. Accordingly, the value to the Company if the loans were held to maturity is not reflected in the fair value estimate. In the current whole loan market, financial investors are generally requiring a higher rate of return than the return inherent in loans if held to maturity. The fair value discount at March 31, 2012 was \$7.5 billion or 10.3 percent.
- (3) Excluded from this table is the lease carrying amount of \$1.6 billion at March 31, 2012.

**Table of Contents**

The carrying amounts and estimated fair values of the Company's financial instruments as of December 31, 2011 are as follows:

	December 31, 2011	
	Carrying Amount	Estimated Fair Value (1)
	(In millions)	
Financial assets:		
Cash and cash equivalents	\$ 7,245	\$ 7,245
Trading account assets	1,266	1,266
Securities available for sale	24,471	24,471
Securities held to maturity	16	17
Loans held for sale	1,193	1,193
Loans (excluding leases), net of unearned income and allowance for loan losses (2), (3)	73,284	65,224
Other interest-earning assets	1,085	1,085
Derivatives, net	339	339
Financial liabilities:		
Deposits	95,627	95,757
Short-term borrowings	3,067	3,067
Long-term borrowings	8,110	7,439
Loan commitments and letters of credit	117	756

- (1) Estimated fair values are consistent with an exit price concept. The assumptions used to estimate the fair values are intended to approximate those that a market participant would use in a hypothetical orderly transaction. In estimating fair value, the Company makes adjustments for interest rates, market liquidity and credit spreads as appropriate.
- (2) The estimated fair value of portfolio loans assumes sale of the loans to a third-party financial investor. Accordingly, the value to the Company if the loans were held to maturity is not reflected in the fair value estimate. In the current whole loan market, financial investors are generally requiring a higher rate of return than the return inherent in loans if held to maturity.
- (3) Excluded from this table is the lease carrying amount of \$1.6 billion at December 31, 2011.

**NOTE 13 Business Segment Information**

Regions' segment information is presented based on Regions' key segments of business. Each segment is a strategic business unit that serves specific needs of Regions' customers. The Company's primary segment is Banking/Treasury, which represents the Company's branch network, including consumer and commercial banking functions, and has separate management that is responsible for the operation of that business unit. This segment also includes the Company's Treasury function, including the Company's securities portfolio and other wholesale funding activities.

The Insurance segment includes all business associated with commercial insurance and credit life products sold to consumer customers.

The Investment Banking/Brokerage/Trust segment includes trust activities and all brokerage and investment activities associated with Morgan Keegan. As discussed in Note 2, in early 2012 Regions entered into an agreement to sell Morgan Keegan and related entities, which closed on April 2, 2012. The financial information related to these entities is shown in the tables below as discontinued operations, within the Investment Banking/Brokerage/Trust segment. The continuing operations information within this segment is primarily related to Regions' trust activities, which was not sold. See Note 2 and Note 16 for further details.

**Table of Contents**

The following tables present financial information for each reportable segment for the period indicated.

	Three Months Ended March 31, 2012					Total Company

Income tax expense (benefit)	(42)	5	8	17		(12)
Net income	\$ 31	\$ 7	\$ 12	\$ 19		\$ 69
Average assets	\$ 123,968	\$ 518	\$ 3,501	\$ 3,225		\$ 131,212

**NOTE 14 Commitments and Contingencies****COMMERCIAL COMMITMENTS**

Regions issues off-balance sheet financial instruments in connection with lending activities. The credit risk associated with these instruments is essentially the same as that involved in extending loans to customers and is subject to Regions' normal credit approval policies and procedures. Regions measures inherent risk associated with these instruments by recording a reserve for unfunded commitments based on an assessment of the likelihood that the guarantee will be funded and the creditworthiness of the customer or counterparty. Collateral is obtained based on management's assessment of the creditworthiness of the customer.

Credit risk associated with these instruments is represented by the contractual amounts indicated in the following table:

	March 31 2012	December 31 2011
	(In millions)	
Unused commitments to extend credit	\$ 36,030	\$ 37,872
Standby letters of credit	2,070	2,084
Commercial letters of credit	50	33
Liabilities associated with standby letters of credit	35	37
Assets associated with standby letters of credit	35	36

Reserve for unfunded credit commitments

---

**Table of Contents**

*Unused commitments to extend credit* To accommodate the financial needs of its customers, Regions makes commitments under various terms to lend funds to consumers, businesses and other entities. These commitments include (among others) credit card and other revolving credit agreements, term loan commitments and short-term borrowing agreements. Many of these loan commitments have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of these commitments are expected to expire without being funded, the total commitment amounts do not necessarily represent future liquidity requirements.

*Standby letters of credit* Standby letters of credit are also issued to customers which commit Regions to make payments on behalf of customers if certain specified future events occur. Regions has recourse against the customer for any amount required to be paid to a third party under a standby letter of credit. Historically, a large percentage of standby letters of credit expired without being funded. The contractual amount of standby letters of credit represents the maximum potential amount of future payments Regions could be required to make and represents Regions maximum credit risk.

*Commercial letters of credit* Commercial letters of credit are issued to facilitate foreign or domestic trade transactions for customers. As a general rule, drafts will be drawn when the goods underlying the transaction are in transit.

**LEGAL CONTINGENCIES**

Regions and its affiliates are subject to loss contingencies related to litigation and claims arising in the ordinary course of business. Regions evaluates these contingencies based on information currently available, including advice of counsel and assessment of available insurance coverage. Regions establishes accruals for litigation and claims when a loss contingency is considered probable and the related amount is reasonably estimable. Any accruals are periodically reviewed and may be adjusted as circumstances change. For certain matters, when able to do so, Regions also estimates loss contingencies for possible litigation and claims, whether or not there is an accrued probable loss. Where Regions is able to estimate such possible losses, Regions estimates that it is reasonably possible it could incur losses, in excess of amounts accrued, in an aggregate amount up to approximately \$250 million as of March 31, 2012, with it also being reasonably possible that Regions could incur no losses. The estimates included in this amount are based on analysis of currently available information and are subject to significant judgment and to change as new information becomes available. Due to the inherent unpredictability of outcomes of litigation and claims, any amounts accrued or included in this aggregate amount may not represent the ultimate loss to Regions and, therefore, ultimate losses may be significantly different than the amounts accrued or included in this aggregate amount. As discussed in Note 2, Regions has agreed to indemnify Raymond James for all pre-closing litigation and matters filed subsequent to the date Morgan Keegan was sold that relate to actions that occurred prior to closing. There is no cap on this indemnification. The majority of the legal contingencies included in the reasonably possible estimate disclosed above, as well as detailed below, will be covered by this indemnification. Refer to Note 16 for further discussion of this indemnification and the Company's estimate thereof.

Assessments of litigation and claims exposures are difficult due to many factors that involve inherent unpredictability. Those factors include the following: the varying stages of the proceedings, particularly in the early stages; unspecified damages; damages other than compensatory such as punitive damages; multiple defendants and jurisdictions; whether discovery has begun or not; and whether the claim involves a class-action. There are numerous factors that result in a greater degree of complexity in class-action lawsuits as compared to other types of litigation. Due to the many intricacies involved in class-action lawsuits at the early stages of these matters, obtaining clarity on a reasonable estimate is difficult which may call into question its reliability. As a result of some of these factors, Regions may be unable to estimate reasonably possible losses with respect to some of the matters disclosed below. The aggregated estimated amount provided above therefore may not include an estimate for every matter disclosed below.

While the final outcome of litigation and claims exposures is inherently unpredictable, management is currently of the opinion that the outcome of pending and threatened litigation would not have a material effect on

---

**Table of Contents**

Regions' business, consolidated financial position, results of operations or cash flows as a whole. However, in the event of unexpected future developments, it is reasonably possible that an adverse outcome in any of the matters discussed below could be material to Regions' business, consolidated financial position, results of operations or cash flows for any particular reporting period of occurrence.

Beginning in December 2007, Regions and certain of its affiliates have been named in class-action lawsuits filed in federal and state courts on behalf of investors who purchased shares of certain Regions Morgan Keegan Select Funds (the "Funds") and shareholders of Regions. The Funds were formerly managed by Regions Investment Management, Inc. ("Regions Investment Management"). Regions Investment Management no longer manages these Funds, which were transferred to Hyperion Brookfield Asset Management in 2008. Certain of the Funds have since been terminated by Hyperion. The complaints contain various allegations, including claims that the Funds and the defendants misrepresented or failed to disclose material facts relating to the activities of the Funds. Plaintiffs have requested equitable relief and unspecified monetary damages. These cases are in various stages and no classes have been certified. Settlement discussions are ongoing in certain cases. Certain of the shareholders in these Funds and other interested parties have entered into arbitration proceedings and individual civil claims, in lieu of participating in the class actions. These lawsuits and proceedings are subject to the indemnification agreement with Raymond James Financial, Inc. discussed in Note 16 "Subsequent Events".

In July 2009, the Securities and Exchange Commission ("SEC") filed a complaint in U.S. District Court for the Northern District of Georgia against Morgan Keegan alleging violations of the federal securities laws in connection with auction rate securities ("ARS") that Morgan Keegan underwrote, marketed and sold. The SEC sought an injunction against Morgan Keegan for violations of the antifraud provisions of the federal securities laws, as well as disgorgement, financial penalties and other equitable relief for customers, including repurchase by Morgan Keegan of all ARS that it sold prior to March 20, 2008. Beginning in February 2009, Morgan Keegan commenced a voluntary program to repurchase ARS that it underwrote and sold to the firm's customers, and extended that repurchase program on October 1, 2009 to include ARS that were sold by Morgan Keegan to its customers but were underwritten by other firms. On June 29, 2011, Morgan Keegan announced the final phase of the repurchase program to include ARS issued by Jefferson County, Alabama that were sold by Morgan Keegan to its customers. As of March 31, 2012, customers of Morgan Keegan owned approximately \$25 thousand of Jefferson County ARS and approximately \$225 thousand of other ARS, while Morgan Keegan held approximately \$124 million of ARS on its balance sheet. On June 28, 2011, the Court issued a summary judgment in favor of Morgan Keegan in this case. The SEC has appealed that judgment. On May 2, 2012 the Eleventh Circuit granted the SEC's appeal and remanded the case to the District Court. Previously on July 21, 2009, the Alabama Securities Commission issued a "Show Cause" order to Morgan Keegan arising out of the ARS matter that is the subject of the SEC complaint described above. The order requires Morgan Keegan to show cause why its registration as a broker-dealer should not be suspended or revoked in the State of Alabama and also why it should not be subject to disgorgement, repurchasing all ARS sold to Alabama residents and payment of costs and penalties. These matters are subject to the indemnification agreement with Raymond James Financial, Inc. discussed in Note 16 "Subsequent Events".

In April 2009, Regions, Regions Financing Trust III (the "Trust") and certain of Regions' current and former directors, were named in a purported class-action lawsuit filed in the U.S. District Court for the Southern District of New York on behalf of the purchasers of trust preferred securities offered by the Trust. The complaint alleges that defendants made statements in Regions' registration statement, prospectus and year-end filings which were materially false and misleading, and seeks equitable relief and unspecified monetary damages. On May 10, 2010, the trial court dismissed all claims against all defendants in this case. On August 23, 2011, the Second Circuit Court of Appeals affirmed the dismissal. On September 6, 2011, the plaintiffs moved for a rehearing, but that motion was denied on October 17, 2011. The judgment dismissing the case is now final.

In October 2010, a purported class-action lawsuit was filed by Regions' stockholders in the U.S. District Court for the Northern District of Alabama against Regions and certain former officers of Regions. The lawsuit alleges violations of the federal securities laws, including allegations that statements that were materially false and misleading were included in filings made with the SEC. The plaintiffs have requested equitable relief and

## **Table of Contents**

unspecified monetary damages. On June 7, 2011, the trial court denied Regions' motion to dismiss this lawsuit. This case is still early in its development and no class has been certified.

Regions has received inquiries and subpoenas from government authorities primarily concerning accounting matters from 2009 and earlier periods that also have been the subject of the civil litigation mentioned above. Regions is cooperating in providing responses to these inquiries and subpoenas. In addition, the Board of Directors is conducting investigations regarding certain of the matters raised in these inquiries and subpoenas.

In December 2009, Regions and certain current and former directors and officers were named in a consolidated shareholder derivative action filed in Jefferson County, Alabama. The complaint alleges mismanagement, waste of corporate assets, breach of fiduciary duty and unjust enrichment relating to bonuses and other benefits received by executive management. Plaintiffs have requested equitable relief and unspecified monetary damages. A motion to dismiss all claims is pending.

In September 2009, Regions was named as a defendant in a purported class-action lawsuit filed by customers of Regions Bank in the U.S. District Court for the Northern District of Georgia challenging the manner in which non-sufficient funds and overdraft fees were charged and the policies related to posting order. The case was transferred to multidistrict litigation in the U.S. District Court for the Southern District of Florida, and in May 2010 an order to compel arbitration was denied. Regions appealed the denial and on April 29, 2011, the Eleventh Circuit Court of Appeals vacated the denial and remanded the case to the district court for reconsideration of Regions' motion to compel arbitration. On September 1, 2011, the trial court again denied Regions' motion to compel arbitration. Regions again appealed the denial to the Eleventh Circuit, which on March 5, 2012 granted the motion and ordered that the case be dismissed. Plaintiffs filed a motion for rehearing by the full court of appeals, which was denied on April 30, 2012. Another purported class action alleging these claims was filed in the U.S. District Court for the Northern District of Georgia in January 2012. The case is still early in its development and no class has been certified. Plaintiffs in these cases have requested equitable relief and unspecified monetary damages.

### **NOTE 15 Recent Accounting Pronouncements**

In October 2010, the FASB issued guidance addressing the diversity in practice regarding which costs related to the acquisition or renewal of insurance contracts qualify as deferred acquisition costs for insurance entities. This update amends guidance related to financial services by requiring that costs incurred with the acquisition and renewal of insurance contracts be capitalized as deferred acquisition costs. Incremental direct costs, portions of employees' compensation associated with time spent acquiring contracts, and other costs directly relating to the advertising, underwriting, issuing and processing of insurance policies are costs that should be capitalized to the extent that they would not have otherwise been incurred had the contracts not been successfully acquired. The amended guidance is effective for fiscal years, and for interim periods within those fiscal years, beginning after December 15, 2011. Regions adopted this guidance beginning with first quarter 2012 financial reporting. The guidance did not have a material impact upon adoption.

In January 2011, the FASB issued accounting guidance temporarily deferring the effective date for when public-entity creditors are required to provide new disclosures, which were addressed in previously issued guidance regarding receivables, for TDRs. The deferred effective date coincides with the effective date for the clarified guidance about what constitutes a TDR for creditors, which was issued in April 2011 by the FASB. Regions applied the clarified definition to all loans modified after January 1, 2011, and reported any newly identified TDRs beginning with the September 30, 2011 financial reporting. The adoption of the standard did not materially impact the overall level of the allowance for loan losses. The guidance also required new disclosures for TDRs, which were also implemented prospectively, beginning with September 30, 2011 financial reporting. See Note 4 for the newly-required disclosures.

In April 2011, the FASB issued accounting guidance to reconsider effective control for repurchase agreements. The guidance will simplify the accounting for financial assets transferred under repurchase

## **Table of Contents**

agreements and similar arrangements, and will increase the number of transfers to be accounted for as secured borrowings, as opposed to sales. The amended guidance is effective prospectively for new transfers and existing transactions modified as of the first interim or annual period beginning on or after December 15, 2011. Regions periodically accesses funding markets through sales of securities with agreements to repurchase. Repurchase agreements are also offered through a commercial banking sweep product as a short-term investment opportunity for customers. All such arrangements are considered typical of the banking and brokerage industries and are accounted for as borrowings. Regions adopted this guidance beginning with first quarter 2012 financial reporting; there was no material impact upon adoption.

In May 2011, the FASB issued new guidance to create a uniform framework for applying fair value measurement principles for companies around the world. The new guidance eliminates differences between GAAP and International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board. New disclosures required by the guidance include: quantitative information about the significant unobservable inputs used for Level 3 measurements; a qualitative discussion about the sensitivity of recurring Level 3 measurements to changes in the unobservable inputs disclosed, including the interrelationship between inputs; and a description of the company's valuation processes. This guidance is effective for interim and annual periods beginning after December 15, 2011. Regions adopted this guidance beginning with first quarter 2012 financial reporting. See Note 12 for the newly-required disclosures.

In June 2011, the FASB issued new guidance amending disclosure requirements for the presentation of comprehensive income. The guidance eliminates the option to present components of other comprehensive income (OCI) as part of the statement of changes in shareholders' equity. All changes in OCI will be presented either in a single continuous statement of comprehensive income or in two separate but consecutive financial statements. The guidance does not change the items that must be reported in OCI. This guidance is effective for fiscal years and interim reporting periods within those years beginning after December 15, 2011. Regions adopted this new guidance with first quarter 2012 financial reporting. In January 2012, the FASB issued accounting guidance that indefinitely defers the effective date of certain provisions concerning the presentation of comprehensive income. The guidance indefinitely defers the requirement to present reclassification adjustments by component in both the statement where net income is presented and the statement where other comprehensive income is presented. See the consolidated statements of comprehensive income for further details.

In September 2011, the FASB issued accounting guidance related to goodwill impairment testing. The guidance allows entities to elect to first perform qualitative tests to determine the likelihood that the entity's fair value is less than its carrying value. If it is determined that it is more likely that the fair value of a reporting entity is less than its carrying amount, the entity would then perform the first step of the goodwill impairment test. The guidance refers to several factors to consider when performing the qualitative analysis, including: macroeconomic factors, industry factors, and entity-specific factors. The guidance is effective prospectively for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. The amended guidance did not have a material impact upon adoption.

In December 2011, the FASB issued new accounting guidance that eliminates offsetting of financial instruments disclosure differences between GAAP and IFRS. New disclosures will be required for recognized financial instruments, such as derivatives, repurchase agreements, and reverse repurchase agreements, that are either (1) offset on the balance sheet in accordance with the FASB's offsetting guidance or (2) subject to an enforceable master netting arrangement or similar agreement, regardless of whether they are offset in accordance with the FASB's offsetting guidance. The objective of the new disclosure requirements is to enable users of the financial statements to evaluate the effect or potential effect of netting arrangements on an entity's financial position, including the effect or potential effect of rights of setoff associated with certain financial instruments and derivative instruments. This amended guidance will be applied retrospectively and is effective for fiscal years, and interim periods within those years, beginning on or after January 1, 2013. The adoption of this guidance, which involves disclosure only, will not impact Regions' consolidated financial position, results of operations, or cash flows.

**Table of Contents**

**NOTE 16 Subsequent Events**

As discussed in Note 2, on April 2, 2012, Regions closed the sale of Morgan Keegan & Company, Inc. and related affiliates to Raymond James Financial Inc. Regions Investment Management (formerly known as Morgan Asset Management) and Regions Trust were not included in the sale. The transaction purchase price is subject to post-closing adjustment based on the closing tangible book value of the entities being sold and retention of Morgan Keegan associates as of 90 days post-closing. Regions believes adjustments to the sales price will not have a material impact to the consolidated financial statements. Any such adjustments will be recorded as an adjustment to the gain or loss on sale, a component of discontinued operations. In connection with the sale, Regions agreed to indemnify Raymond James for all litigation matters related to pre-closing activities. Losses under the indemnification include legal and other expenses, such as costs for judgments, settlements and awards associated with the defense and resolution of litigation related to pre-closing activities. In accounting for the indemnification, Regions will be required to estimate the fair value of the obligation, which includes costs to defend. Regions currently estimates the net impact of the indemnification to its liabilities on the consolidated balance sheet at the time of closing to be an increase of between \$200 million and \$250 million. The gain or loss on sale of the transaction will be recorded in the second quarter of 2012, and will be impacted by the potential adjustments referenced above, finalization of the indemnification liability, and finalization of elections for income tax purposes by Raymond James and Regions subsequent to the closing of the sale. The gain or loss will be presented within discontinued operations and will have no impact on results of continuing operations or cash flows. Regions does not expect the gain or loss to have a material impact on the Company's financial position or regulatory capital.

The net proceeds from the Morgan Keegan sale discussed above, the common stock issuance discussed in Note 7 and other available funds (including a dividend of \$500 million from Regions Bank) were used on April 4, 2012 to repurchase all 3.5 million shares of the Series A preferred stock issued to the U.S. Treasury Department under the CPP. Therefore, during the second quarter of 2012 Regions derecognized the carrying value of the Series A shares in the amount of approximately \$3.4 billion, and recorded a reduction of earnings amounting to \$70 million related to the unaccreted discount. The total reduction to shareholders' equity was \$3.5 billion. At March 31, 2012, the U.S. Treasury Department continued to hold a warrant to purchase 48.3 million common shares at \$10.88 per share. In early May of 2012, Regions repurchased the warrant from the U.S. Treasury Department for \$45 million. The transaction reduced additional paid-in capital within stockholders' equity by \$45 million. The warrant repurchase did not impact results of operations.

### **Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

#### **INTRODUCTION**

The following discussion and analysis is part of Regions Financial Corporation's (Regions or the Company) Quarterly Report on Form 10-Q to the Securities and Exchange Commission (SEC) and updates Regions' Form 10-K for the year ended December 31, 2011, which was previously filed with the SEC. This financial information is presented to aid in understanding Regions' financial position and results of operations and should be read together with the financial information contained in the Form 10-K. Certain prior period amounts presented in this discussion and analysis have been reclassified to conform to current period classifications, except as otherwise noted. The emphasis of this discussion will be on the three months ended March 31, 2012 compared to the three months ended March 31, 2011 for the statement of operations. For the balance sheet, the emphasis of this discussion will be the balances as of March 31, 2012 compared to December 31, 2011.

This discussion and analysis contains statements that may be considered forward-looking statements as defined in the Private Securities Litigation Reform Act of 1995. See pages 3 and 4 for additional information regarding forward-looking statements.

#### **CORPORATE PROFILE**

Regions is a financial holding company headquartered in Birmingham, Alabama, which operates throughout the South, Midwest and Texas. Regions provides traditional commercial, retail and mortgage banking services, as well as other financial services in the fields of asset management, trust, insurance and other specialty financing.

Regions conducts its banking operations through Regions Bank, an Alabama chartered commercial bank that is a member of the Federal Reserve System. At March 31, 2012, Regions operated 1,722 total branch outlets in Alabama, Arkansas, Florida, Georgia, Illinois, Indiana, Iowa, Kentucky, Louisiana, Mississippi, Missouri, North Carolina, South Carolina, Tennessee, Texas and Virginia. Regions provides full-line insurance brokerage services primarily through Regions Insurance, Inc.

On January 11, 2012, Regions entered into a stock purchase agreement to sell Morgan Keegan & Company, Inc. and related affiliates to Raymond James Financial, Inc. The sale was closed on April 2, 2012. Regions Investment Management and Regions Trust were not included in this sale. See Note 2 and Note 16 to the consolidated financial statements for further discussion.

Regions' profitability, like that of many other financial institutions, is dependent on its ability to generate revenue from net interest income and non-interest income sources. Net interest income is the difference between the interest income Regions receives on interest-earning assets, such as loans and securities, and the interest expense Regions pays on interest-bearing liabilities, principally deposits and borrowings. Regions' net interest income is impacted by the size and mix of its balance sheet components and the interest rate spread between interest earned on its assets and interest paid on its liabilities. Non-interest income includes fees from service charges on deposit accounts, capital markets and trust activities, mortgage servicing and secondary marketing, insurance activities, and other customer services which Regions provides. Results of operations are also affected by the provision for loan losses and non-interest expenses, such as salaries and employee benefits, occupancy, professional fees, Federal Deposit Insurance Corporation (FDIC) insurance, other real estate owned and other operating expenses, as well as income taxes.

Economic conditions, competition, new legislation and related rules impacting regulation of the financial services industry, and the monetary and fiscal policies of the Federal government significantly affect most financial institutions, including Regions. Lending and deposit activities and fee income generation are influenced by levels of business spending and investment, consumer income, consumer spending and savings, capital market activities, and competition among financial institutions, as well as customer preferences, interest rate conditions and prevailing market rates on competing products in Regions' market areas.

---

**Table of Contents**

Regions' business strategy has been and continues to be focused on providing a competitive mix of products and services, delivering quality customer service and maintaining multiple distribution channels, including a branch distribution network with offices in convenient locations.

**FIRST QUARTER HIGHLIGHTS**

Regions reported net income available to common shareholders of \$145 million, or \$0.11 per diluted share, in the first quarter of 2012 compared to net income available to common shareholders of \$17 million, or \$0.01 per diluted share, in the first quarter of 2011. Regions reported net income from continuing operations available to common shareholders of \$185 million, or \$0.14 per diluted share, in the first quarter of 2012 compared to a net loss from continuing operations available to common shareholders of \$2 million, or \$0.00 per diluted share, in the first quarter of 2011. A decline in the first quarter 2012 provision for loan losses was the primary driver of the improvement in results from continuing operations from the prior year period.

Net charge-offs totaled \$332 million, or an annualized 1.73 percent of average loans, in the first quarter of 2012, compared to \$481 million, or an annualized 2.37 percent for the first quarter of 2011. Net charge-offs were lower across all major loan categories when comparing the 2012 period to the prior year period, except for the consumer credit card portfolio which was purchased in the second quarter of 2011.

The provision for loan losses totaled \$117 million in the first quarter of 2012 compared to \$482 million during the first quarter of 2011. Credit metrics, including non-accrual, criticized and classified loan balances, showed continued improving trends.

The allowance for loan losses at March 31, 2012 was 3.30 percent of total loans, net of unearned income, compared to 3.54 percent at December 31, 2011. Total non-performing assets were \$2.6 billion at March 31, 2012, compared to \$3.0 billion at December 31, 2011.

For the first quarter of 2012, net interest income (taxable-equivalent basis) from continuing operations totaled \$839 million compared to \$864 million in the first quarter of 2011. The net interest margin (taxable-equivalent basis) was 3.09 percent in both the first quarter of 2012 and the first quarter of 2011. Overall declines in loan balances and average earning assets were offset by continued improvements in deposit costs, which were 37 basis points for the first quarter of 2012, as compared to 59 basis points for the first quarter of 2011.

Non-interest income from continuing operations for the first quarter of 2012 was \$524 million, compared to \$580 million for the first quarter of 2011. The 2011 period included \$82 million in securities gains, compared to \$12 million for the 2012 period. Additionally, service charges on deposit accounts decreased \$33 million from the first quarter of 2011 compared to the corresponding 2012 period, reflecting the impact of recently-enacted debit card legislation and the impact of Regulation E. These decreases were partially offset by a \$32 million increase in mortgage income, as customers took advantage of the opportunity to refinance under the extended Home Affordable Refinance Program, or HARP II. Additionally, the 2012 quarter included a \$7 million gain from leveraged lease terminations, which also partially offset the year-over-year decrease.

Total non-interest expense from continuing operations was \$913 million in the first quarter of 2012, a \$19 million decrease from the first quarter of 2011. Lower professional and legal expenses and lower other real estate owned expense drove the decrease. These decreases were partially offset by higher salaries and employee benefits expense, reflecting higher pension costs.

Additionally, during the first quarter of 2012, the Company completed a common stock offering, which resulted in proceeds of \$875 million, net of issuance costs. Subsequent to the end of the quarter, the Company completed the previously-announced sale of Morgan Keegan & Company, Inc. and related affiliates to Raymond James Financial, Inc. Also, subsequent to the end of the quarter, the Company retired the \$3.5 billion of Series A preferred stock previously issued to the U.S. Treasury. At March 31, 2012, the U.S. Treasury Department

**Table of Contents**

continued to hold a warrant to purchase 48.3 million common shares at \$10.88 per share. In early May of 2012, Regions repurchased the warrant from the U.S. Treasury Department for \$45 million. The transaction reduced additional paid-in capital within stockholders' equity by \$45 million. The warrant repurchase did not impact results of operations.

A discussion of activity within discontinued operations is included at the end of the Management's Discussion and Analysis section of this report.

**TOTAL ASSETS**

Regions' total assets at March 31, 2012 were \$128.3 billion, compared to \$127.1 billion at December 31, 2011. The increase in total assets from year-end 2011 resulted mainly from increases in securities available for sale and interest-bearing deposits in other banks related to excess liquidity. The increase was partially offset by decreases in the loan portfolio, primarily due to runoff in investor real estate loans. A decrease in other assets, driven by settlements of securities sales, also contributed to the decrease.

**SECURITIES**

The following table details the carrying values of securities, including both available for sale and held to maturity:

**Table 1 Securities**

	March 31 2012	December 31 2011
	(In millions)	
U.S. Treasury securities	\$ 51	\$ 102
Federal agency securities	342	150
Obligations of states and political subdivisions	31	36
Mortgage-backed securities		
Residential agency	23,464	22,184
Residential non-agency	15	16
Commercial agency	435	326
Commercial non-agency	491	321
Corporate and other debt securities	1,543	537
Equity securities	820	815
	\$ 27,192	\$ 24,487

Securities totaled \$27.2 billion at March 31, 2012, an increase of \$2.7 billion from year-end 2011 levels. During the first quarter of 2012, Regions received proceeds of approximately \$1.4 billion primarily from sales of available for sale agency mortgage-backed securities. Proceeds from these sales were reinvested in similar securities. Additionally, during the first quarter of 2012, Regions added approximately \$2.2 billion of residential agency mortgage-backed securities and \$1.0 billion of high quality investment grade corporate bonds. The net purchases of agency mortgage-backed securities are an offset to the Company's strategy to sell the majority of agency eligible residential first mortgages at origination, and the corporate bonds increase diversification in the portfolio with an attractive risk and return profile.

Securities available for sale, which comprise nearly all of the securities portfolio, are an important tool used to manage interest rate sensitivity and provide a primary source of liquidity for the Company (see MARKET RISK INTEREST RATE RISK and LIQUIDITY).

**Table of Contents****LOANS**

At March 31, 2012, loans represented 68 percent of Regions' interest-earning assets compared to 70 percent at December 31, 2011. The following table presents the distribution by loan portfolio segment and class of Regions' loan portfolio, net of unearned income:

**Table 2 Loan Portfolio**

	March 31 2012	December 31 2011
	(In millions, net of unearned income)	
Commercial and industrial	\$ 25,098	\$ 24,522
Commercial real estate mortgage owner occupied	10,931	11,166
Commercial real estate construction owner occupied	281	337
Total commercial	36,310	36,025
Commercial investor real estate mortgage	9,156	9,702
Commercial investor real estate construction	955	1,025
Total investor real estate	10,111	10,727
Residential first mortgage	13,611	13,784
Home equity	12,642	13,021
Indirect	1,938	1,848
Consumer credit card	939	987
Other consumer	1,169	1,202
Total consumer	30,299	30,842
	\$ 76,720	\$ 77,594

Loans, net of unearned income, totaled \$76.7 billion at March 31, 2012, a decrease of \$874 million from year-end 2011 levels. Continued runoff of balances related to investor real estate and home equity products was the primary contributor to the decrease, as well as decreases across most categories of consumer loans. The decrease was partially offset by an increase in commercial and industrial loans.

*Commercial* The commercial portfolio segment includes commercial and industrial loans to commercial customers for use in normal business operations to finance working capital needs, equipment purchases and other expansion projects. Commercial also includes owner-occupied commercial real estate loans to operating businesses, which are loans for long-term financing of land and buildings, and are repaid by cash flow generated by business operations. Owner-occupied construction loans are made to commercial businesses for the development of land or construction of a building where the repayment is derived from revenues generated from the business of the borrower.

*Investor Real Estate* Loans for real estate development are repaid through cash flow related to the operation, sale or refinance of the property. This portfolio segment includes extensions of credit to real estate developers or investors where repayment is dependent on the sale of real estate or income generated from the real estate collateral. A portion of Regions' investor real estate portfolio segment is comprised of loans secured by residential product types (land, single-family and condominium loans) within Regions' markets. Additionally, this category includes loans made to finance income-producing properties such as apartment buildings, office and industrial buildings, and retail shopping centers.

*Residential First Mortgage* Residential first mortgage loans represent loans to consumers to finance a residence. These loans are typically financed over a 15 to 30 year term and, in most cases, are extended to borrowers to finance their primary residence.

**Table of Contents**

*Home Equity* Home equity lending includes both home equity loans and lines of credit. This type of lending, which is secured by a first or second mortgage on the borrower's residence, allows customers to borrow against the equity in their home. Substantially all of this portfolio was originated through Regions' branch network.

*Indirect* Indirect lending, which is lending initiated through third-party business partners, is largely comprised of loans made through automotive dealerships. Beginning in late 2010, the Company re-entered the indirect auto lending business.

*Consumer Credit Card* During the second quarter of 2011, Regions completed the purchase of approximately 500,000 existing Regions-branded consumer credit card accounts from FIA Card Services. The products are primarily open-ended variable interest rate consumer credit card loans.

*Other Consumer* Other consumer loans include direct consumer installment loans, overdrafts and other revolving loans.

**CREDIT QUALITY**

Weak economic conditions, including declining property values and high levels of unemployment, have impacted the credit quality of Regions loan portfolio. Certain of Regions' loans have been particularly vulnerable to these environmental factors, mainly investor real estate loans and home equity products (particularly Florida second lien). These loan types have a higher risk of non-collection than other loans. The following sections provide further detail on these portfolios.

**INVESTOR REAL ESTATE**

The following table presents the portions of the investor real estate portfolio segment as of March 31, 2012:

**Table 3 Investor Real Estate Analysis**

	Mortgage	Construction	Total	Percent of Total on Non-accrual Status
	(Dollars in billions)			
Multi-family	\$ 2.2	\$ 0.2	\$ 2.4	0.6%

- (1) Geographic Region represents the area in which the underlying collateral is located.
- (2) Central Region includes Alabama, Georgia, and South Carolina.
- (3) Midsouth Region includes Iowa, Illinois, Indiana, Kentucky, Missouri, North Carolina, Tennessee, and Virginia.
- (4) Southwest Region includes Arkansas, Louisiana, Mississippi, and Texas.

**HOME EQUITY**

The home equity portfolio totaled \$12.6 billion at March 31, 2012 as compared to \$13.0 billion at December 31, 2011. Substantially all of this portfolio was originated through Regions' branch network. Losses in this portfolio generally track overall economic conditions. The main source of economic stress has been in Florida, where residential property values have declined significantly while unemployment rates remain high. Losses in Florida where Regions is in a second lien position are higher than first lien losses.

The following tables provide details related to the home equity portfolio as follows:

**Table 5 Selected Home Equity Portfolio Information**

----------------------	-------	-------	-------	-------	-------	-------	-------	-------	-------

(1) Net charge-off percentages are calculated on an annualized basis as a percent of average balances.

---

**Table of Contents**

Net charge-offs were an annualized 2.39 percent of home equity loans for the first three months of 2012 compared to an annualized 2.71 percent through the first three months of 2011. Losses in Florida-based credits remained at elevated levels, but the related net charge-off percentage did decrease to 4.27 percent for the three months ended March 31, 2012 from 5.33 percent for the three months ended March 31, 2011. Home equity losses have decreased due to improvement in unemployment rates which, although high, are lower than prior levels.

Of the \$12.6 billion home equity portfolio at March 31, 2012, approximately \$11.3 billion were home equity lines of credit and \$1.3 billion were closed-end home equity loans (primarily originated as amortizing loans). Beginning in May 2009, new home equity lines of credit have a 10 year draw period and a 10 year repayment period. Previously, the home equity lines of credit had a 20 year term with a balloon payment upon maturity or a 5 year draw period with a balloon payment upon maturity. The term balloon payment means there are no principal payments required until the balloon payment is due for interest-only lines of credit. As of March 31, 2012, none of Regions' home equity lines of credit have converted to mandatory amortization under the contractual terms. The vast majority of home equity lines of credit will convert to amortizing status after fiscal year 2020.

Of the \$11.3 billion of home equity lines of credit as of March 31, 2012, approximately 90 percent require monthly interest-only payments while the remaining approximately 10 percent require a payment equal to 1.5% of the outstanding balance, which would include some principal repayment. As of March 31, 2012, approximately 29 percent of borrowers were only paying the minimum amount due on the home equity line. In addition, approximately 55 percent of the home equity lines of credit balances have the option to amortize either all or a portion of their balance. As of March 31, 2012, approximately \$501 million of the home equity line of credit balances have elected this option.

Regions' home equity loans have higher default and delinquency rates than home equity lines of credit, which is expected at origination of the loans, due to more stringent underwriting guidelines for a line of credit versus a loan reflecting the nature of the credit being extended. Therefore, home equity loans secured with a second lien are expected to and do have higher delinquency and loss rates than home equity lines of credit with a second lien. In the current environment, second liens in areas experiencing declines in home prices, such as Florida, perform similar to an unsecured portfolio.

Regions is unable to track payment status on first liens held by another institution, including payment status related to loan modifications. When Regions' second lien position becomes delinquent, an attempt is made to contact the first lien holder and inquire as to the payment status of the first lien. However, Regions does not continuously monitor the payment status of the first lien position. Short sale offers and settlement agreements are often received by the home equity junior lien holders well before the loan balance reaches the delinquency threshold for charge-off consideration, potentially resulting in a full balance payoff/charge-off.

*OTHER CONSUMER CREDIT QUALITY DATA*

The Company calculates an estimate of the current value of property secured as collateral for both home equity and residential first mortgage lending products ( current LTV ). The estimate is based on home price indices compiled by the Federal Housing Finance Agency ( FHFA ). The FHFA data indicates trends for Metropolitan Statistical Areas ( MSA ). Regions uses the FHFA valuation trends from the MSA s in the Company s footprint in its estimate. The trend data is applied to the loan portfolios taking into account the age of the most recent valuation and geographic area.

**Table of Contents**

The following table presents current LTV data for components of the residential mortgage and home equity classes of the consumer portfolio segment. Current LTV data for the remaining loans in the portfolio is not available, primarily because some of the loans are serviced by others. Data may also not be available due to mergers and systems integrations. The amounts in the table represent the entire loan balance. For purposes of the table below, if the loan balance exceeds the current estimated collateral, the entire balance is included in the Above 100% category, regardless of the amount of collateral available to partially offset the shortfall.

**Table 6 Estimated Current Loan to Value Ranges**

	March 31, 2012		December 31, 2011

	\$ 13,611	\$ 12,642	\$ 13,784	\$ 13,021

Regions qualitatively considers factors such as periodic updates of FICO scores, unemployment, home prices, and geography as credit quality indicators for consumer loans. FICO scores are obtained at origination as part of Regions' formal underwriting process. Refreshed FICO scores are obtained by the Company quarterly for all revolving accounts and home equity lines of credit and semi-annually for all other consumer loans. Regions considers FICO scores less than 620 to be indicative of higher credit risk and obtains additional collateral in most of these instances. The following table presents estimated current FICO score data for components of classes of the consumer portfolio segment. Current FICO data is not available for the remaining loans in the portfolio for various reasons; for example, if customers do not use sufficient credit, an updated score may not be available.

**Table 7 Estimated Current FICO Score Ranges**

	Residential First Mortgage	Home Equity	March 31, 2012

**Table of Contents**

**ALLOWANCE FOR CREDIT LOSSES**

The allowance for credit losses represents management's estimate of credit losses inherent in the loan and credit commitment portfolios as of period end. The allowance for credit losses consists of two components: the allowance for loan and lease losses and the reserve for unfunded credit commitments. Management's assessment of the appropriateness of the allowance for credit losses is based on a combination of both of these components. Regions determines its allowance for credit losses in accordance with applicable accounting literature as well as regulatory guidance related to receivables and contingencies. Binding unfunded credit commitments include items such as letters of credit, financial guarantees and binding unfunded loan commitments. Additional discussion of the methodology used to calculate the allowance for credit losses is included in Note 6 Allowance for Credit Losses to the consolidated financial statements in the 2011 Annual Report on Form 10-K, as well as related discussion in Management's Discussion and Analysis.

The allowance for loan losses totaled \$2.5 billion at March 31, 2012 and \$2.7 billion at December 31, 2011. The allowance for loan losses as a percentage of net loans was 3.30 percent at March 31, 2012 and 3.54 percent on December 31, 2011. The reserve for unfunded credit commitments was \$91 million at March 31, 2012 compared to \$78 million at December 31, 2011. Net charge-offs as a percentage of average loans (annualized) were 1.73 percent and 2.37 percent in the first three months of 2012 and 2011, respectively. Net charge-off ratios were lower across all categories, period over period, except for the consumer credit card portfolio, which was purchased during the second quarter of 2011. In addition to lower levels of charge-offs, credit quality metrics have generally improved during 2012, including lower levels of non-accrual, criticized and classified loans. The provision for loan losses totaled \$117 million in the first quarter of 2012 compared to \$482 million during the first quarter of 2011. Net charge-offs exceeded the provision for loan losses for the first quarter of 2012, primarily resulting from the continued improving credit metrics.

Management considers the current level of allowance for credit losses appropriate to absorb losses inherent in the loan portfolio and unfunded commitments. Management's determination of the appropriateness of the allowance for credit losses requires the use of judgments and estimations that may change in the future. Changes in the factors used by management to determine the appropriateness of the allowance or the availability of new information could cause the allowance for credit losses to be increased or decreased in future periods. In addition, bank regulatory agencies, as part of their examination process, may require changes in the level of the allowance based on their judgments and estimates.

Given continued economic pressures and anticipated slow recovery, management expects that net loan charge-offs in 2012 will be less than 2011 but remain elevated. Economic trends such as real estate valuations, interest rates and unemployment will impact the future levels of net charge-offs and provision. Details regarding the allowance and net charge-offs, including an analysis of activity from the previous year's totals, are included in Table 8 Allowance for Credit Losses.

**Table of Contents**

Activity in the allowance for credit losses is summarized as follows:

**Table 8 Allowance for Credit Losses**

	Three Months Ended March 31

Provision for loan losses	283.8	99.8

**Table of Contents**

Residential first mortgage, home equity and other consumer TDRs are consumer loans modified under the Customer Assistance Program. Commercial and investor real estate loan modifications are not the result of a formal program, but represent situations where modification was offered as a workout alternative. As a result of clarified accounting literature that was effective for third quarter 2011, renewals of classified commercial and investor real estate loans are refutably considered to be TDRs, even if no reduction in interest rate is offered, because the existing terms are considered to be below market. More detailed information is included in Note 4 to the consolidated financial statements. The following table summarizes TDRs for the periods ending March 31, 2012 and December 31, 2011:

**Table 9 Troubled Debt Restructurings**

## Edgar Filing: REGIONS FINANCIAL CORP - Form 10-Q

(1) Exclusive of accruing loans 90 days past due

Non-performing assets totaled \$2.6 billion at March 31, 2012, compared to \$3.0 billion at December 31, 2011. Foreclosed properties, a subset of non-performing assets, totaled \$241 million and \$296 million at March 31, 2012 and December 31, 2011, respectively. The decrease in non-performing assets and foreclosed properties during the first quarter of 2012 reflects the Company's efforts to work through problem assets and reduce the riskiest exposures.

**Table of Contents**

Based on current expectations for the economy, management anticipates non-performing assets to decrease during the remainder of 2012, but remain elevated. Economic trends such as real estate valuations, interest rates and unemployment, as well as the level of disposition activity, will impact the future level of non-performing assets.

Loans past due 90 days or more and still accruing were \$427 million at March 31, 2012, a decrease from \$447 million at December 31, 2011.

At March 31, 2012, Regions had approximately \$350-\$450 million of potential problem commercial and investor real estate loans that were not included in non-accrual loans, but for which management had concerns as to the ability of such borrowers to comply with their present loan repayment terms. This is a likely estimate of the amount of commercial and investor real estate loans that may migrate to non-accrual status in the next quarter.

In order to arrive at the estimate of potential problem loans, personnel from geographic regions forecast certain larger dollar loans that may potentially be downgraded to non-accrual at a future time, depending on the occurrence of future events. These personnel consider a variety of factors, including the borrower's capacity and willingness to meet the contractual repayment terms, make principal curtailments or provide additional collateral when necessary, and provide current and complete financial information including global cash flows, contingent liabilities and sources of liquidity. A probability weighting is assigned to the listing of loans due to the inherent level of uncertainty related to potential actions that a borrower or guarantor may take to prevent the loan from reaching problem status. Regions assigns the probability weighting based on an assessment of the likelihood that the necessary actions required to prevent problem loan status will occur. Additionally, for other loans (for example, smaller dollar loans), a factor based on trends and experience is applied to determine the estimate of potential future downgrades. Because of the inherent uncertainty in forecasting future events, the estimate of potential problem loans ultimately represents the estimated aggregate dollar amounts of loans as opposed to an individual listing of loans.

The majority of the loans on which the potential problem loan estimate is based are classified as substandard accrual. Detailed disclosures for substandard accrual loans (as well as other credit quality metrics) are included in Note 4 to the consolidated financial statements.

**Table of Contents**

The following table provides an analysis of non-accrual loans (excluding loans held for sale) by portfolio segment for the three months ended March 31, 2012:

**Table 11 Analysis of Non-Accrual Loans**

	<b>Non-Accrual Loans, Excluding Loans Held for Sale</b>			
	<b>Three Months Ended March 31, 2012</b>			
	<b>Commercial</b>	<b>Investor Real Estate</b>	<b>Consumer (1)</b>	<b>Total</b>
	<b>(In millions)</b>			
Balance at beginning of year	\$ 1,072	\$ 914	\$ 386	\$ 2,372
Additions	196	192	(7)	381
Net payments/other activity	(64)	(101)		(165)
Return to accrual	(26)	(76)		(102)
Charge-offs on non-accrual loans <sup>(2)</sup>	(120)	(92)		(212)
Transfers to held for sale <sup>(3)</sup>	(35)	(57)	(1)	(93)
Transfers to foreclosed properties	(15)	(10)		(25)
Sales	(1)	(3)	(1)	(5)
<b>Balance at end of period</b>	<b>\$ 1,007</b>	<b>\$ 767</b>	<b>\$ 377</b>	<b>\$ 2,151</b>

(1) All net activity within the consumer portfolio segment other than sales and transfers to held for sale is included as a single net number within the additions line, due to the relative immateriality of consumer non-accrual loans.

(2) Includes charge-offs on loans on non-accrual status and charge-offs taken upon sale and transfer of non-accrual loans to held for sale.

(3) Transfers to held for sale are shown net of charge-offs of \$53 million recorded upon transfer.

**LOANS HELD FOR SALE**

Loans held for sale totaled \$1.1 billion at March 31, 2012, consisting of \$752 million of residential real estate mortgage loans, \$249 million of non-performing investor real estate loans, and \$53 million of performing commercial and investor real estate loans. At December 31, 2011, loans held for sale totaled \$1.2 billion, consisting of \$844 million of residential real estate mortgage loans, \$328 million of non-performing investor real estate loans and \$21 million of performing commercial and investor real estate loans. The level of residential real estate mortgage loans held for sale fluctuates depending on the timing of origination and sale to third parties.

The following table provides an analysis of non-performing loans held for sale for the three months ended March 31, 2012 and 2011:

**Table 12 Non-performing Loans Held For Sale**

<b>Balance at end of period</b>	<b>\$ 249</b>	<b>\$ 381</b>

---

**Table of Contents**

**ALL OTHER INTEREST-EARNING ASSETS**

All other interest-earning assets, which are primarily comprised of interest-bearing deposits in other banks, trading account assets, and other interest-earning assets, increased approximately \$154 million from year-end 2011 to March 31, 2012, primarily due to an increase in interest-bearing deposits in other banks offset by a decrease in trading account assets.

**GOODWILL**

Goodwill totaled \$4.8 billion at both March 31, 2012 and December 31, 2011 and is allocated to each of Regions' reportable segments (each a reporting unit), at which level goodwill is tested for impairment on an annual basis or more often if events and circumstances indicate impairment may exist (refer to Note 1 – Significant Accounting Policies to the 2011 consolidated financial statements filed on Form 10-K for the year ended December 31, 2011 for further discussion of when Regions tests goodwill for impairment).

A test of goodwill for impairment consists of two steps. In Step One, the fair value of the reporting unit is compared to its carrying amount. To the extent that the fair value of the reporting unit exceeds the carrying value, impairment is not indicated and no further testing is required. Conversely, if the fair value of the reporting unit is below its carrying amount, Step Two must be performed. Step Two consists of determining the implied fair value of goodwill, which is the net difference between the after-tax valuation adjustments of assets and liabilities and the valuation adjustment to equity (from Step One) of the reporting unit. Adverse changes in the economic environment, declining operations of the reporting unit, or other factors could result in a decline in the estimated implied fair value of goodwill. If the estimated implied fair value is less than the carrying amount, a loss would be recognized to reduce the carrying amount to the estimated implied fair value.

The fair value of the reporting unit is determined using two approaches and several key assumptions. Regions utilizes the capital asset pricing model (CAPM) in order to derive the base discount rate. The inputs to the CAPM include the 20-year risk-free rate, 5-year beta for a select peer set, and the market risk premium based on published data. Once the output of the CAPM is determined, a size premium is added (also based on a published source) as well as a company-specific risk premium, which is an estimate determined by the Company and meant to compensate for the risk inherent in the future cash flow projections and inherent differences (such as business model and market perception of risk) between Regions and the peer set.

In estimating future cash flows, a balance sheet as of the test date and a statement of operations for the last twelve months of activity for the reporting unit are compiled. From that point, future balance sheets and statements of operations are projected based on the inputs. Cash flows are based on expected future capitalization requirements due to balance sheet growth and anticipated changes in regulatory capital requirements. The baseline cash flows utilized in all models correspond to the most recent internal forecasts and/or budgets that range from 1 to 5 years. These internal forecasts are based on inputs developed in the Company's capital planning processes.

Refer to Note 6 – Goodwill, for further discussion of these approaches and related assumptions. The fair values of assets and liabilities are determined using an exit price concept. Refer to the discussion of fair value in Note 1 – Summary of Significant Accounting Policies to the 2011 annual report on form 10K for discussions of the exit price concept and the determination of fair values of financial assets and liabilities.

Throughout 2009 and 2010 in the Banking/Treasury reporting unit, the credit quality of Regions' loan portfolio declined, which contributed to increased losses as well as elevated non-performing loan levels. Accordingly, Regions performed tests of goodwill for impairment during each quarter of 2010 and during the second, third and fourth quarters of 2009 in a manner consistent with the test conducted in the fourth quarter of 2008. Regions continued to perform its goodwill impairment tests during the four quarters of 2011 and the first quarter of 2012, in a manner consistent with the tests conducted in prior periods, primarily due to the Company's

**Table of Contents**

market capitalization remaining below book value. The long-term fair value of equity was determined using both income and market approaches (discussed in Note 6 Goodwill). The results of these calculations for the first quarter of 2012 indicated that the fair value of the Banking/Treasury reporting unit was less than the carrying amount. At February 29, 2012, the carrying amount and fair value of the Banking/Treasury reporting unit were \$11.6 billion and \$9.2 billion, respectively, while the carrying amount of goodwill for the reporting unit was \$4.7 billion. Therefore, Step Two of the goodwill impairment test was performed. In Step Two, the fair values of the reporting unit's assets and liabilities, including the loan portfolio, intangible assets, time deposits, debt, and other assets and liabilities were calculated. Once the fair values were determined, deferred tax adjustments were calculated as applicable. For the Banking/Treasury reporting unit, the after-tax effects of the Step Two adjustments, which were primarily write-downs of assets to fair value, exceeded any reductions in the value of common equity determined in Step One; accordingly the calculation of implied goodwill exceeded its carrying amount. Therefore, the results were no impairment for the Banking/Treasury reporting unit, whose implied fair value of goodwill exceeded its carrying amount by approximately 48 percent as of February 29, 2012 compared to approximately 12 percent as of fourth quarter 2011.

The table below summarizes the discount rate used in the goodwill impairment tests of the Banking/Treasury reporting unit for the reporting periods indicated:

	1st Quarter 2012	4th Quarter 2011	3rd Quarter 2011	2nd Quarter 2011	1st Quarter 2011
Discount Rate	14%	15%	15%	15%	15%

Regions' capital plan, which was required under the Federal Reserve's Comprehensive Capital Analysis and Review (CCAR), was submitted in early January of 2012. The Federal Reserve responded with no objections to the capital actions set forth in the capital plan on March 13, 2012. Shortly thereafter, Regions issued and sold 152.9 million shares of its common stock, par value \$0.01 per share, at a price to the public of \$5.90 per share, a premium above the closing price. The Company received approximately \$875 million in net proceeds from the offering after underwriting discounts and commissions and other expenses. Additionally, in connection with the CCAR on March 13, 2012, the Federal Reserve disclosed its projections of pro-forma, post stress pre-provision income and losses and pro-forma, post stress capital ratios under the Federal Reserve's Supervisory Stress Scenario for the nineteen institutions, including Regions, that participated in the 2011 CCAR. Regions exceeded the minimum required capital level over the entire review period through year-end 2013. Regions also received an upgrade to its debt ratings from Standard & Poor's rating agency on March 15, 2012. These positive factors led to a reduction in the discount rate applied to the Banking/Treasury reporting unit in the first quarter of 2012.

Specific factors as of the date of filing the financial statements that could negatively impact the assumptions used in assessing goodwill for impairment include: a protracted decline in the Company's market capitalization; disparities in the level of fair value changes in net assets compared to equity; adverse business trends resulting from litigation and/or regulatory actions; higher loan losses; lengthened forecasts of higher unemployment relative to pre-crisis levels beyond 2013; future increased minimum regulatory capital requirements above current thresholds (refer to Note 13 Regulatory Capital Requirements and Restrictions of the consolidated financial statements included in the Annual Report on Form 10-K for the year ended December 31, 2011 for a discussion of current minimum regulatory requirements); future federal rules and regulations resulting from the Dodd-Frank Act; and/or a protraction in the current low level of interest rates significantly beyond 2014.

**Table of Contents**

The following table presents an analysis of independent changes in market factors or significant assumptions that could adversely impact the carrying balance of goodwill in the Banking/Treasury reporting unit and the outcome of the Step One tests for the Insurance reporting unit:

**Table 13 Goodwill Sensitivity****Impact to the Carrying Value of Goodwill****Banking/Treasury Reporting Unit**

	<b>Estimated Amount of Impairment (In millions)</b>
<b>Change in Discount Rate</b>	
+ 4%	\$ (a)
+ 5%	(319)
+ 6%	(685)
<b>Change in Tangible Book Value Multipliers (b)</b>	
- 82%	\$ (a)
<b>Improvement in Loan Fair Values</b>	
+ 4.9 Percentage Points	\$ (a)
+ 5.9 Percentage Points	(459)
+ 6.9 Percentage Points	(932)

(a) Represents the point at which the implied fair value of goodwill would approximate its carrying value.

(b) Represents an 82 percent decline in both tangible book value multipliers of 1.1x and 1.4x for the public company method and the transaction method, respectively. The 1.1x multiplier for the public company method is before the 30 percent control premium utilized for this metric. See Note 6 for further details.

For the Insurance reporting unit, a 100 percent increase in the discount rate or decrease in the market approach multiplier for the last twelve months of net income would not impact the result of the Step One test.

The sensitivity calculations above are hypothetical and should not be considered to be predictive of future performance. Changes in implied fair value based on adverse changes in assumptions generally cannot be extrapolated because the relationship of the change in assumption to the change in fair value may not be linear. Also, the effect of an adverse variation in a particular assumption on the implied fair value of goodwill is calculated without changing any other assumption, while in reality changes in one factor may result in changes in another which may either magnify or counteract the effect of the change.

**Table of Contents****FORECLOSED PROPERTIES**

Other real estate and certain other assets acquired in foreclosure are reported at the lower of the investment in the loan or fair value of the property less estimated costs to sell. The following table summarizes foreclosed property activity for the years ended December 31:

**Table 14 Foreclosed Properties**

	<b>Three Months Ended March 31</b>	
	<b>2012</b>	<b>2011</b>
	<b>(In millions)</b>	
Balance at beginning of period	\$ 296	\$ 454
Transfer from loans	94	161
Valuation adjustments	(19)	(41)
Foreclosed property sold	(129)	(113)
Payments and other	(1)	4
	(55)	11
Balance at end of period	\$ 241	\$ 465

Note: Approximately 74 percent of the ending balances as of both March 31, 2012 and 2011 relate to properties transferred into foreclosed properties during the previous twelve months.

Valuation adjustments are primarily recorded in other non-interest expense; adjustments are also recorded as a charge to the allowance for loan losses if incurred within 60 days after the date of transfer from loans. Valuation adjustments are primarily post-foreclosure write-downs that are a result of continued declining property values based on updated appraisals or other indications of value, such as offers to purchase. Foreclosed property sold represents the net book value of the properties sold.

**OTHER ASSETS**

Other assets decreased \$732 million to \$8.0 billion as of March 31, 2012, primarily due to the net settlements of securities sales. Lower derivative balances also contributed to the decrease.

**DEPOSITS**

Regions competes with other banking and financial services companies for a share of the deposit market. Regions' ability to compete in the deposit market depends heavily on the pricing of its deposits and how effectively the Company meets customers' needs. Regions employs various means to meet those needs and enhance competitiveness, such as providing a high level of customer service, competitive pricing and providing convenient branch locations for its customers. Regions also serves customers through providing centralized, high-quality banking services and alternative product delivery channels such as internet banking.

**Table of Contents**

The following table summarizes deposits by category:

**Table 15 Deposits**

	March 31 2012	December 31 2011
	(In millions)	
Non-interest-bearing demand	\$ 29,707	\$ 28,266
Savings accounts	5,632	5,159
Interest-bearing transaction accounts	19,805	19,388
Money market accounts domestic	23,513	23,053
Money market accounts foreign	271	378
Low-cost deposits	78,928	76,244
Time deposits	18,207	19,378
Customer deposits	97,135	95,622
Corporate treasury time deposits	3	5
	\$ 97,138	\$ 95,627

Total deposits at March 31, 2012 increased approximately \$1.5 billion compared to year-end 2011 levels. The overall increase in deposits was driven by increases in almost all categories of low-cost deposits, particularly non-interest-bearing demand accounts. This increase was partially offset by decreases in time deposits and foreign money market accounts. Regions continued to focus on shifting the overall deposit mix toward low-cost deposits, focusing on non-interest-bearing demand.

**SHORT-TERM BORROWINGS**

The following is a summary of short-term borrowings:

**Table 16 Short-Term Borrowings**

	March 31 2012	December 31 2011
	(In millions)	
Company funding sources:		
Federal funds purchased	\$ 19	\$ 18
Securities sold under agreements to repurchase	885	969
Other short-term borrowings		29
	904	1,016
Customer-related borrowings:		
Securities sold under agreements to repurchase	1,383	1,346
Brokerage customer liabilities	344	394
Short-sale liability	216	256
Customer collateral	61	55
	2,004	2,051
	\$ 2,908	\$ 3,067

*COMPANY FUNDING SOURCES*

Federal funds purchased and securities sold under agreements to repurchase used for funding purposes totaled \$904 million at March 31, 2012 compared to \$987 million at December 31, 2011. The level of these borrowings can fluctuate significantly on a day-to-day basis, depending on funding needs and which sources of funds are used to satisfy those needs. All such arrangements are considered typical of the banking and brokerage industries and are accounted for as borrowings.

**Table of Contents**

Other short-term borrowings are related to Morgan Keegan and include borrowings under lines of credit that Morgan Keegan maintains with unaffiliated banks. As of March 31, 2012, there were no other short-term borrowings related to Morgan Keegan outstanding, compared to \$29 million December 31, 2011. The lines of credit provided for maximum borrowings of \$585 million as of March 31, 2012.

Selected data for short-term borrowings used for funding purposes is presented below (dollars in millions):

	<b>Three Months Ended March 31</b>	
	<b>2012</b>	<b>2011</b>
	<b>(Dollars in millions)</b>	
<b>Federal funds purchased:</b>		
Balance at quarter-end	\$ 19	\$ 16
Average outstanding (based on average daily balances)	23	20
Maximum amount outstanding at any month-end during the quarter	28	106
Weighted-average interest rate at quarter-end	0.2%	0.2%
Weighted-average interest rate on amounts outstanding during the quarter (based on average daily balances)	0.1%	0.1%
<b>Securities sold under agreements to repurchase:</b>		
Balance at quarter-end	\$ 885	\$ 296
Average outstanding (based on average daily balances)	520	334
Maximum amount outstanding at any month-end during the quarter	885	361
Weighted-average interest rate at quarter-end	0.1%	0.2%
Weighted-average interest rate on amounts outstanding during the quarter (based on average daily balances)	0.1%	0.2%
<b>CUSTOMER-RELATED BORROWINGS</b>		

Short-term borrowings that are the result of customer activity related to investment opportunities or brokerage interests totaled \$2.0 billion at March 31, 2012, compared to \$2.1 billion at December 31, 2011. The decrease between periods was due to decreases in brokerage customer liabilities and short-sale liabilities.

Repurchase agreements are also offered as commercial banking products as short-term investment opportunities for customers. At the end of each business day, customer balances are swept into the agreement account. In exchange for cash, Regions sells the customer securities with a commitment to repurchase them on the following business day. The repurchase agreements are collateralized to allow for market fluctuations. Securities from Regions Bank's investment portfolio are used as collateral. From the customer's perspective, the investment earns more than a traditional money market instrument. From Regions' standpoint, the repurchase agreements are similar to deposit accounts, although they are not insured by the FDIC or guaranteed by the United States or agencies. Regions Bank does not manage the level of these investments on a daily basis as the transactions are initiated by the customers. The level of these borrowings can fluctuate significantly on a day-to-day basis.

Regions, through Morgan Keegan, maintains two types of liabilities for its brokerage customers that are classified as short-term borrowings since Morgan Keegan pays its customers interest related to these liabilities. The brokerage customer position liability represents liquid funds in customers' brokerage accounts. The short-sale liability represents traditional obligations to deliver to customers securities at a predetermined date and price. Balances due to brokerage customers totaled \$344 million at March 31, 2012 compared to \$394 million at December 31, 2011. The short-sale liability was \$216 million at March 31, 2012 compared to \$256 million at December 31, 2011. The balances of these liabilities fluctuate frequently based on customer activity.

Customer collateral increased \$6 million to \$61 million at March 31, 2012 from \$55 million at December 31, 2011. This balance includes cash collateral posted by customers related to derivative transactions by swap customers of Morgan Keegan.

**Table of Contents****LONG-TERM BORROWINGS**

Long-term borrowings are summarized as follows:

**Table 17 Long-Term Borrowings**

	March 31 2012	December 31 2011
	(In millions)	
<b>Regions Financial Corporation (Parent):</b>		
6.375% subordinated notes due May 2012	\$ 600	\$ 600
LIBOR floating rate senior notes due June 2012	350	350
4.875% senior notes due April 2013	249	249
7.75% senior notes due November 2014	694	694
5.75% senior notes due June 2015	496	496
7.75% subordinated notes due September 2024	100	100
6.75% subordinated debentures due November 2025	162	162
7.375% subordinated notes due December 2037	300	300
6.625% junior subordinated notes due May 2047	498	498
8.875% junior subordinated notes due June 2048	345	345
Other long-term debt	6	6
Valuation adjustments on hedged long-term debt	78	87
	3,878	3,887
<b>Regions Bank:</b>		
Other Federal Home Loan Bank advances	1,014	1,914
4.85% subordinated notes due April 2013	497	497
5.20% subordinated notes due April 2015	348	347
7.50% subordinated notes due May 2018	750	750
6.45% subordinated notes due June 2037	497	497
Other long-term debt	175	175
Valuation adjustments on hedged long-term debt	37	43
	3,318	4,223
	\$ 7,196	\$ 8,110

Long-term borrowings decreased approximately \$914 million since year-end 2011. During the first quarter of 2012, Regions prepaid approximately \$900 million of FHLB advances, realizing an immaterial pre-tax loss on early extinguishment. These extinguishments were part of the Company's asset/liability management process. Other FHLB advances have a weighted-average interest rate of 1.4% and 1.0% at March 31, 2012 and December 31, 2011, respectively, with maturities ranging from six months to nineteen years and a weighted average maturity of 2.14 years.

**STOCKHOLDERS' EQUITY**

Stockholders' equity was \$17.5 billion at March 31, 2012 compared to \$16.5 billion at December 31, 2011. During the first three months of 2012, net income increased stockholders' equity by \$199 million, while cash dividends reduced equity by \$13 million for common stock and \$44 million for preferred stock. Changes in accumulated other comprehensive income increased equity by \$9 million. On March 19, 2012, the Company issued 152.9 million shares of common stock at \$5.90 per share. The proceeds from the sale, net of issuance costs, increased equity by approximately \$875 million.

Regions' Board of Directors declared a \$0.01 per share cash dividend for the first quarter of both 2012 and 2011. Regions understands the importance of returning capital to shareholders. Management will continue to

---

**Table of Contents**

execute the capital planning process, including evaluation of the amount of the common dividend, with the Board of Directors and in conjunction with regulatory supervisors, subject to the Company's results of operations.

Regions' ratio of stockholders' equity to total assets was 13.67 percent at March 31, 2012, compared to 12.99 percent at December 31, 2011. Regions' ratio of tangible common stockholders' equity to tangible assets was 7.35 percent at March 31, 2012, compared to 6.57 percent at December 31, 2011 (see Table 20 "GAAP to Non-GAAP Reconciliation" for further discussion).

See Note 7, "Stockholders' Equity and Comprehensive Income (Loss)" for further information related to common shares available for repurchase and dividends.

**REGULATORY CAPITAL REQUIREMENTS**

Regions and Regions Bank are required to comply with regulatory capital requirements established by Federal banking agencies. These regulatory capital requirements involve quantitative measures of the Company's assets, liabilities and certain off-balance sheet items, and also qualitative judgments by the regulators. Failure to meet minimum capital requirements can subject the Company to a series of increasingly restrictive regulatory actions. Currently, there are two basic measures of capital adequacy: a risk-based measure and a leverage measure.

The risk-based capital requirements are designed to make regulatory capital requirements more sensitive to differences in credit and market risk profiles among banks and bank holding companies, to account for off-balance sheet exposure and interest rate risk, and to minimize disincentives for holding liquid assets. Assets and off-balance sheet items are assigned to broad risk categories, each with specified risk-weighting factors. The resulting capital ratios represent capital as a percentage of total risk-weighted assets and off-balance sheet items. Banking organizations that are considered to have excessive interest rate risk exposure are required to maintain higher levels of capital.

The minimum standard for the ratio of total capital to risk-weighted assets is 8 percent. At least 50 percent of that capital level must consist of common equity, undivided profits and non-cumulative perpetual preferred stock, senior perpetual preferred stock issued to the U.S. Treasury under the Capital Purchase Program, minority interests relating to qualifying common or noncumulative perpetual preferred stock issued by a consolidated U.S. depository institution or foreign bank subsidiary, less goodwill, deferred tax assets and certain other intangibles ("Tier 1 capital"). The remainder ("Tier 2 capital") may consist of a limited amount of other preferred stock, mandatorily convertible securities, subordinated debt, and a limited amount of the allowance for loan losses. The sum of Tier 1 capital and Tier 2 capital is "total risk-based capital" or total capital. However, under the Collins Amendment, which was passed as a section of the Dodd-Frank Act, trust preferred securities will be eliminated as an element of Tier 1 capital. This disallowance of trust preferred securities will be phased in from January 1, 2013 to January 1, 2016. Debt or equity instruments issued to the Federal government as part of the CPP are exempt from the Collins Amendment. As of March 31, 2012, Regions had \$846 million of trust preferred securities that are subject to the Collins Amendment and \$3.5 billion of preferred equity that is exempt from the Collins Amendment. As discussed in Note 16 "Subsequent Events" to the consolidated financial statements, on April 4, 2012, the Series A preferred shares were repurchased from the U.S. Treasury.

The minimum guidelines to be considered well capitalized for Total capital and Tier 1 capital are 10 percent and 6 percent, respectively. As of March 31, 2012 and December 31, 2011, the most recent notification from Federal banking agencies categorized Regions and its significant subsidiaries as well capitalized under the regulatory framework.

The Company believes that no changes in conditions or events have occurred since March 31, 2012, which would result in changes that would cause Regions or Regions Bank to fall below the well capitalized level.

**Table of Contents**

The banking regulatory agencies also have adopted regulations that supplement the risk-based guidelines to include a minimum ratio of 3 percent of Tier 1 capital to average assets less goodwill and disallowed deferred tax assets (the Leverage ratio). Depending upon the risk profile of the institution and other factors, the regulatory agencies may require a Leverage ratio of 1 percent to 2 percent above the minimum 3 percent level.

In recent years, banking regulators began supplementing their assessment of the capital adequacy of a bank based on a variation of Tier 1 capital, known as Tier 1 common equity. While not prescribed in amount by federal banking regulations, analysts and banking regulators have assessed Regions' capital adequacy using the tangible common stockholders' equity and/or the Tier 1 common equity measure. Because tangible common stockholders' equity and Tier 1 common equity are not formally defined by GAAP or prescribed in amount by federal banking regulations, these measures are considered to be non-GAAP financial measures and other entities may calculate them differently than Regions' disclosed calculations (see Table 20, GAAP to Non-GAAP Reconciliation for further details).

Regions is evaluating the anticipated impact of Basel III, which will begin in 2013 and is expected to be fully phased-in on January 1, 2019. The Company's estimated Tier 1 common and Tier 1 capital ratios as of March 31, 2012, based on Regions' current understanding of the guidelines, were approximately 8.9 and 12.5 percent, respectively, and therefore exceed the Basel III minimums of 7 percent for Tier 1 common and 8.5 percent for Tier 1 capital. Based on Regions' understanding of the calculation for the liquidity coverage ratio under Basel III, Regions currently meets the requirement due to the Company's current cash and investment positions. Should Regions' cash position or investment mix change in the future, Regions' ability to meet the liquidity coverage ratio may be impacted. Additionally, there is still need for clarification of the Basel III rules as well as interpretation and implementation by U.S. banking regulators, so the ultimate impact of Basel III on Regions is not completely known at this point. Because the Basel III capital calculations are not formally defined by GAAP and are not currently codified in the federal banking regulations, these measures are considered to be non-GAAP financial measures, and other entities may calculate them differently than Regions' disclosed calculations (see Table 20, GAAP to Non-GAAP Reconciliation for further details).

See the Supervision and Regulation Capital Requirements subsection of the Business section and the Risk Factors section of Regions' Annual Report on Form 10-K for the year ended December 31, 2011 for more information.

The following chart summarizes the applicable holding company and bank regulatory capital requirements. Regions' capital ratios at March 31, 2012 and December 31, 2011 exceeded all regulatory requirements.

**Table 18 Regulatory Capital Requirements**

	March 31, 2012 Ratio	December 31, 2011 Ratio	To Be Well Capitalized
Tier 1 common (non-GAAP):			
Regions Financial Corporation	9.62%	8.51%	NA(1)
Tier 1 capital:			
Regions Financial Corporation	14.34%	13.28%	6.00%
Regions Bank	13.10	12.86	6.00
Total capital:			
Regions Financial Corporation	17.99%	16.99%	10.00%
Regions Bank	16.17	15.98	10.00
Leverage:			
Regions Financial Corporation	10.99%	9.91%	5.00%
Regions Bank	10.17	9.76	5.00

- (1) The Board of Governors of the Federal Reserve System has proposed 5% as the level of Tier 1 common capital sufficient to withstand periods of economic stress.

---

**Table of Contents**

As discussed in Note 16 Subsequent Events to the consolidated financial statements, on April 4, 2012 Regions repurchased \$3.5 billion Series A preferred shares, reducing the parent company's Tier 1 and Total capital by that same amount.

**LIQUIDITY**

*GENERAL*

Liquidity is an important factor in the financial condition of Regions and affects Regions' ability to meet the borrowing needs and deposit withdrawal requirements of its customers. Regions intends to fund obligations primarily through cash generated from normal operations. In addition to these obligations, Regions has obligations related to potential litigation contingencies. See Note 14 Commitments and Contingencies to the consolidated financial statements for additional discussion of the Company's funding requirements.

Assets, consisting principally of loans and securities, are funded by customer deposits, purchased funds, borrowed funds and stockholders equity. Regions' goal in liquidity management is to satisfy the cash flow requirements of depositors and borrowers, while at the same time meeting the Company's cash flow needs. The challenges of the current market environment demonstrate the importance of having and using various sources of liquidity to satisfy the Company's funding requirements.

In order to ensure an appropriate level of liquidity is maintained, Regions performs specific procedures including scenario analyses and stress testing at the bank, holding company, and affiliate levels. Regions' policy is to maintain a sufficient level of funding to meet projected cash needs, including all debt service and maturities, for the subsequent two years at the parent company and acceptable periods for the bank and other affiliates. The Company's current non-investment grade credit ratings makes access to short-term unsecured funding markets unreliable; therefore, the Company's funding and contingency planning does not currently include any reliance on unsecured sources. Risk limits are established within the Company's ALCO, which regularly reviews compliance with the established limits.

The securities portfolio is one of Regions' primary sources of liquidity. Maturities of securities provide a constant flow of funds available for cash needs (see Note 3 Securities, to the consolidated financial statements). The agency guaranteed mortgage portfolio is another source of liquidity in various secured borrowing capacities. In anticipation of regulatory changes proposed within the Basel III framework, in particular the Liquidity Coverage Ratio, Regions increased its holdings in securities backed by the Government National Mortgage Association (GNMA), which are explicitly backed by the U.S. Government. Additionally, the Company has \$11.8 billion of unencumbered liquid securities available for pledging or repurchase agreements.

Maturities in the loan portfolio also provide a steady flow of funds. Additional funds are provided from payments on consumer loans and one-to-four family residential first mortgage loans. In addition, liquidity needs can also be met by borrowing funds in state and national money markets, although Regions does not currently rely on unsecured wholesale market funding. Historically, Regions' liquidity has been enhanced by its relatively stable customer deposit base. During 2011 and 2012, Regions' customer base grew substantially in response to competitive offers and customers' desire to lock-in rates in the falling rate environment, as well as the introduction of new consumer and business checking products.

Regulation Q prohibited banks from paying interest on business checking accounts in accordance with the Glass-Steagall Act of 1933. However, the Dodd-Frank Act repealed Regulation Q. In July 2011, financial institutions, such as Regions, were allowed to offer interest on corporate checking accounts. Regions responded to these changes by enhancing its existing core interest-bearing products. However, due to the low interest rate environment and unlimited FDIC insurance available on non-interest bearing balances until January 1, 2013, the Company has not experienced, nor does it anticipate experiencing, significant migration of business customer balances from non-interest bearing accounts to interest-bearing accounts.

---

**Table of Contents**

Due to the potential for uncertainty and inconsistency in the unsecured funding markets, Regions has been maintaining higher levels of cash liquidity by depositing excess cash with the Federal Reserve Bank, which is the primary component of the balance sheet line item, interest-bearing deposits in other banks. At March 31, 2012, Regions had approximately \$5.2 billion in excess cash on deposit with the Federal Reserve. Regions' borrowing availability with the Federal Reserve Bank as of March 31, 2012, based on assets available for collateral at that date, was \$18.4 billion.

Regions periodically accesses funding markets through sales of securities with agreements to repurchase. Repurchase agreements are also offered through a commercial banking sweep product as a short-term investment opportunity for customers. All such arrangements are considered typical of the banking and brokerage industries and are accounted for as borrowings.

Regions' financing arrangement with the FHLB adds additional flexibility in managing its liquidity position. As of March 31, 2012, Regions' borrowing availability from the FHLB totaled \$6.3 billion. FHLB borrowing capacity is contingent on the amount of collateral pledged to the FHLB. Regions Bank and its subsidiaries have pledged certain residential first mortgage loans on one-to-four family dwellings and home equity lines of credit as collateral for the FHLB advances outstanding. Additionally, investment in FHLB stock is required in relation to the level of outstanding borrowings. Regions held \$219 million in FHLB stock at March 31, 2012. The FHLB has been and is expected to continue to be a reliable and economical source of funding.

In February 2010, Regions filed a shelf registration statement with the U.S. Securities and Exchange Commission. This shelf registration does not have a capacity limit and can be utilized by Regions to issue various debt and/or equity securities. The registration statement will expire in February 2013. In March 2012, Regions issued from the shelf 152.9 million shares of common stock with a par value \$0.01 per share at \$5.90 a share.

Regions' Bank Note program allows Regions Bank to issue up to \$20 billion aggregate principal amount of bank notes outstanding at any one time. No issuances have been made under this program as of March 31, 2012. Notes issued under the program may be senior notes with maturities from 30 days to 15 years and subordinated notes with maturities from 5 years to 30 years. These notes are not deposits and they are not insured or guaranteed by the FDIC.

Regions may, from time to time, consider opportunistically retiring outstanding issued securities, including subordinated debt, trust preferred securities and preferred shares in privately negotiated or open market transactions for cash or common shares. Regulatory approval would be required for retirement of some instruments.

***RATINGS***

In March of 2012, Standard & Poor's (S&P) upgraded the credit ratings for each of the obligations of both Regions Financial Corporation and Regions Bank. The upgrades were attributable to the March 2012 common stock offering of approximately \$875 million, net of issuance costs, as well as the redemption of 3.5 million shares of Series A preferred stock. In February of 2012, Moody's revised its outlook for Regions Financial from negative to stable.

On March 8, 2012, Fitch Ratings (Fitch) downgraded the junior subordinated notes of Regions Financial Corporation. This ratings action was part of a global review of securities impacted in part by capital requirements set forth in Basel III as well as Fitch's view regarding the likelihood of sovereign support.

At March 31, 2012, Moody's credit ratings for Regions Financial Corporation and Regions Bank were below investment grade. Dominion Bond Rating Service (DBRS) continues to have a negative outlook for Regions Financial Corporation and Regions Bank.

**Table of Contents**

Table 19 Credit Ratings reflects the current debt ratings information of Regions Financial Corporation and Regions Bank by S&P, Moody's, Fitch and DBRS.

In general, ratings agencies base their ratings on many quantitative and qualitative factors, including capital adequacy, liquidity, asset quality, business mix, probability of government support, and level and quality of earnings. Any downgrade in credit ratings by one or more ratings agencies may impact Regions in several ways, including, but not limited to, Regions' access to the capital markets or short-term funding, borrowing cost and capacity, collateral requirements, acceptability of its letters of credit, and funding of variable rate demand notes (VRDNs), thereby potentially adversely impacting Regions' financial condition and liquidity. See the Risk Factors section in the Annual Report on Form 10-K for the year ended December 31, 2011 for more information.

A security rating is not a recommendation to buy, sell or hold securities, and the ratings are subject to revision or withdrawal at any time by the assigning rating agency. Each rating should be evaluated independently of any other rating.

**Table of Contents****OPERATING RESULTS**

The table below presents computations of earnings (loss) and certain other financial measures including fee income ratio, efficiency ratio, return on average assets from continuing operations, return on average tangible common stockholders' equity, end of period tangible common stockholders' equity and related ratios, Tier 1 common equity and related ratios, and Basel III ratios, all of which are non-GAAP measures. Regions believes these financial measures provide a meaningful base for period-to-period comparisons which management believes will assist investors in analyzing the operating results of the Company and predicting future performance. These non-GAAP financial measures are also used by management to assess the performance of Regions' business. Management and the Board of Directors utilize these non-GAAP financial measures as follows:

Preparation of Regions' operating budgets

Monthly financial performance reporting

Monthly close-out reporting of consolidated results (management only)

Presentations to investors of Company performance.

Regions believes that presenting these non-GAAP financial measures will permit investors to assess the performance of the Company on the same basis as that applied by management and the Board of Directors.

The efficiency ratio (non-GAAP), which is a measure of productivity, is generally calculated as non-interest expense divided by total revenue on a fully tax equivalent basis. The fee income ratio (non-GAAP) is generally calculated as non-interest income divided by total revenue. Management uses these ratios to monitor performance and believes these measures provide meaningful information to investors. Non-interest expense (GAAP) may be presented excluding adjustments to arrive at adjusted non-interest expense (non-GAAP), which is the numerator for the efficiency ratio. Non-interest income (GAAP) may be presented excluding adjustments to arrive at adjusted non-interest income (non-GAAP), which is the numerator for the fee income ratio. Net interest income on a fully-taxable equivalent basis (GAAP) and non-interest income (GAAP) are added together to arrive at total revenue (GAAP). Adjustments are made to arrive at adjusted total revenue (non-GAAP), which is the denominator for the fee income and efficiency ratios. Regions believes that the non-GAAP measures reflecting these adjustments provide a meaningful base for period-to-period comparisons, which management believes will assist investors in analyzing the operating results of the Company and predicting future performance. These non-GAAP financial measures are also used by management to assess the performance of Regions' business. It is possible that the activities related to the adjustments may recur; however, management does not consider the activities related to the adjustments to be indications of ongoing operations. Regions believes that presentation of these non-GAAP financial measures will permit investors to assess the performance of the Company on the same basis as that applied by management.

Tangible common stockholders' equity ratios have become a focus of some investors in analyzing the capital position of the Company absent the effects of intangible assets and preferred stock. Traditionally, the Federal Reserve and other banking regulatory bodies have assessed a bank's capital adequacy based on Tier 1 capital, the calculation of which is codified in federal banking regulations. In connection with the Federal Reserve's Comprehensive Capital Analysis and Review process, these regulators are supplementing their assessment of the capital adequacy of a bank based on a variation of Tier 1 capital, known as Tier 1 common equity. While not prescribed in amount by federal banking regulations, analysts and banking regulators have assessed Regions' capital adequacy using the tangible common stockholders' equity and/or the Tier 1 common equity measure. Because tangible common stockholders' equity and Tier 1 common equity are not formally defined by GAAP or prescribed in amount by federal banking regulations, these measures are considered to be non-GAAP financial measures and other entities may calculate them differently than Regions' disclosed calculations. Since analysts and banking regulators may assess Regions' capital adequacy using tangible common stockholders' equity and Tier 1 common equity, Regions believes that it is useful to provide investors the ability to assess Regions' capital adequacy on these same bases.

**Table of Contents**

Tier 1 common equity is often expressed as a percentage of risk-weighted assets. Under the risk-based capital framework, a bank's balance sheet assets and credit equivalent amounts of off-balance sheet items are assigned to one of four broad risk categories. The aggregated dollar amount in each category is then multiplied by the risk weighting assigned to that category. The resulting weighted values from each of the four categories are added together and this sum is the risk-weighted assets total that, as adjusted, comprises the denominator of certain risk-based capital ratios. Tier 1 capital is then divided by this denominator (risk-weighted assets) to determine the Tier 1 capital ratio. Adjustments are made to Tier 1 capital to arrive at Tier 1 common equity (non-GAAP). Tier 1 common equity is also divided by the risk-weighted assets to determine the Tier 1 common equity ratio (non-GAAP). The amounts disclosed as risk-weighted assets are calculated consistent with banking regulatory requirements.

Regions currently calculates its risk-based capital ratios under guidelines adopted by the Federal Reserve based on the 1988 Capital Accord ( Basel I ) of the Basel Committee on Banking Supervision (the Basel Committee ). In December 2010, the Basel Committee released its final framework for Basel III, which will strengthen international capital and liquidity regulation. When implemented by U.S. bank regulatory agencies and fully phased-in, Basel III will change capital requirements and place greater emphasis on common equity. Implementation of Basel III will begin on January 1, 2013, and will be phased in over a multi-year period. The U.S. bank regulatory agencies have not yet finalized regulations governing the implementation of Basel III. Accordingly, the calculations provided below are estimates, based on Regions' current understanding of the framework, including the Company's reading of the requirements, and informal feedback received through the regulatory process. Regions' understanding of the framework is evolving and will likely change as the regulations are finalized. Because the Basel III implementation regulations are not formally defined by GAAP and have not yet been finalized and codified, these measures are considered to be non-GAAP financial measures, and other entities may calculate them differently from Regions' disclosed calculations. Since analysts and banking regulators may assess Regions' capital adequacy using the Basel III framework, Regions believes that it is useful to provide investors information enabling them to assess Regions' capital adequacy on the same basis.

Non-GAAP financial measures have inherent limitations, are not required to be uniformly applied and are not audited. Although these non-GAAP financial measures are frequently used by stakeholders in the evaluation of a company, they have limitations as analytical tools, and should not be considered in isolation, or as a substitute for analyses of results as reported under GAAP.

**Table of Contents**

The following tables provide: 1) a reconciliation of net income available to common shareholders (GAAP) to income from continuing operations available to common shareholders, 2) a reconciliation of non-interest income from continuing operations (GAAP) to adjusted non-interest income (non-GAAP), 3) a computation of adjusted total revenue (non-GAAP), 4) a computation of the fee income ratio (non-GAAP), 5) a computation of the efficiency ratio (non-GAAP), 6) a reconciliation of average and ending stockholders' equity (GAAP) to average and ending tangible common stockholders' equity (non-GAAP) and calculations of related ratios, 7) a reconciliation of stockholders' equity (GAAP) to Tier 1 capital (regulatory) and to Tier 1 common equity (non-GAAP) and calculations of related ratios, and 8) a reconciliation of stockholders' equity (GAAP) to Basel III Tier 1 capital (non-GAAP), Basel III total capital (non-GAAP) and Basel III Tier 1 common (non-GAAP) and calculations of related ratios.

Preferred Stock		(3,429)	(3,419)
Qualifying non-controlling interests		(4)	(4)
Basel III tier 1 common (non-GAAP)	N	\$ 8,384	\$ 7,161

## Edgar Filing: REGIONS FINANCIAL CORP - Form 10-Q

Basel I risk-weighted assets (regulatory)		92,546	91,449
Basel III risk-weighted assets (non-GAAP) (4)	O	94,334	92,935
Basel III tier 1 capital ratio (non-GAAP)	M/O	12.53%	11.39%
Basel III tier 1 common ratio (non-GAAP)	N/O	8.89%	7.70%

- (1) Return on assets from continuing operations does not include average assets related to discontinued operations of \$2,776 million and \$3,225 million for March 31, 2012 and 2011, respectively.
- (2) Income statement amounts have been annualized in calculation.
- (3) Under Basel III, regulatory capital must be reduced by purchased credit card relationship intangible assets. These assets are partially allowed in Basel I capital.
- (4) Regions continues to develop systems and internal controls to calculate risk-weighted assets as required by Basel III. The amount included above is a reasonable approximation, based on our understanding of the requirements.

**Table of Contents****NET INTEREST INCOME**

The following table presents an analysis of net interest income/margin for the three months ended March 31, 2012 and 2011:

**Table 21 Consolidated Average Daily Balances and Yield/Rate Analysis for Continuing Operations**

## Edgar Filing: REGIONS FINANCIAL CORP - Form 10-Q

Net interest income/margin on a taxable-equivalent basis from  
continuing operations (4)(5)

- (1) Loans, net of unearned income include non-accrual loans for all periods presented.
- (2) Interest income includes net loan fees of \$14 million and \$15 million for the three months ended March 31, 2012 and 2011, respectively.

**Table of Contents**

- (3) Total deposit costs may be calculated by dividing total interest expense on deposits by the sum of interest-bearing deposits and non-interest bearing deposits. The rates for total deposit costs equal 0.37% and 0.59% for the three months ended March 31, 2012 and 2011, respectively.
- (4) The computation of taxable-equivalent net interest income is based on the statutory federal income tax rate of 35%, adjusted for applicable state income taxes net of the related federal tax benefit.
- (5) The table above does not include average assets, average liabilities, interest income, or interest expense for discontinued operations (see Note 2 to the consolidated financial statements). If these assets, liabilities, and net interest income were included in the calculation, the consolidated net interest income and margin on a taxable equivalent basis would be \$846 million and 3.07% and \$872 million and 3.07% for the three months ended March 31, 2012 and 2011, respectively.

For the first quarter of 2012, net interest income (taxable-equivalent basis) totaled \$839 million compared to \$864 million in the first quarter of 2011. The net interest margin (taxable-equivalent basis) was 3.09 percent in both the first quarter of 2012 and the first quarter of 2011.

**MARKET RISK INTEREST RATE RISK**

Regions primary market risk is interest rate risk, including uncertainty with respect to absolute interest rate levels as well as uncertainty with respect to relative interest rate levels, which is impacted by both the shape and the slope of the various yield curves that affect the financial products and services that the Company offers. To quantify this risk, Regions measures the change in its net interest income in various interest rate scenarios compared to a base case scenario. Net interest income sensitivity is a useful short-term indicator of Regions interest rate risk.

*Sensitivity Measurement* Financial simulation models are Regions primary tools used to measure interest rate exposure. Using a wide range of sophisticated simulation techniques provides management with extensive information on the potential impact to net interest income caused by changes in interest rates. Models are structured to simulate cash flows and accrual characteristics of Regions balance sheet. Assumptions are made about the direction and volatility of interest rates, the slope of the yield curve, and the changing composition of the balance sheet that result from both strategic plans and from customer behavior. Among the assumptions are expectations of balance sheet growth and composition, the pricing and maturity characteristics of existing business and the characteristics of future business. Interest rate-related risks are expressly considered, such as pricing spreads, the lag time in pricing deposit accounts, prepayments and other option risks. Regions considers these factors, as well as the degree of certainty or uncertainty surrounding their future behavior.

The primary objective of asset/liability management at Regions is to coordinate balance sheet composition with interest rate risk management to sustain a reasonable and stable net interest income throughout various interest rate cycles. In computing interest rate sensitivity for measurement, Regions compares a set of alternative interest rate scenarios to the results of a base case scenario based on market forward rates. The standard set of interest rate scenarios includes the traditional instantaneous parallel rate shifts of plus 100 and 200 basis points. Regions also prepares a minus 50 basis points scenario, as minus 100 and 200 basis scenarios are not considered realistic in the current rate environment. Up-rate scenarios of greater magnitude are also analyzed, and are of increased importance as the current and historic low levels of interest rates increase the relative likelihood of a rapid and substantial increase in interest rates. Regions also includes simulations of gradual interest rate movements that may more realistically mimic potential interest rate movements. These gradual scenarios include curve steepening, flattening, and parallel movements of various magnitudes phased in over a six-month period, and include rate shifts of minus 50 basis points and plus 100 and 200 basis points.

*Exposure to Interest Rate Movements* As of March 31, 2012, Regions was moderately asset sensitive to both gradual and instantaneous rate shifts as compared to the base case for the measurement horizon ending March 2013. Selected receive-fixed swaps, designated as cash flow hedges of loans, provide some offset to the impact on net interest income attributable to an extended period of low short-term interest rates. These

**Table of Contents**

instruments, which have a notional amount of \$7.5 billion, have a final maturity in June 2012. Until maturity of these instruments, Regions' net interest income sensitivity is relatively neutral to movements in short-term interest rates. Therefore, the majority of the exposure reflected in the minus 50 basis points scenario reflects the risk of accelerating prepayment activity as spurred by exceptionally low levels of long-term interest rates. The table below summarizes Regions' position, and the scenarios are inclusive of all interest-rate risk hedging activities. Note that where scenarios would indicate negative interest rates, a minimum of zero is applied.

**Table 22 Interest Rate Sensitivity**

	<b>Estimated Annual Change in Net Interest Income March 31, 2012 (In millions)</b>
<b><u>Gradual Change in Interest Rates</u></b>	
+200 basis points	\$ 300
+100 basis points	170
-50 basis points	(103)
<b><u>Instantaneous Change in Interest Rates</u></b>	
+200 basis points	\$ 361
+100 basis points	213
-50 basis points	(131)

Interest rate movements may also have an impact on the value of Regions' securities portfolio, which can directly impact the carrying value of stockholders' equity. Regions from time to time may hedge these price movements with derivatives (as discussed below). However, at March 31, 2012, Regions had no designations of hedges to mitigate price movements of securities.

*Derivatives* Regions uses financial derivative instruments for management of interest rate sensitivity. The Asset and Liability Committee (ALCO), which consists of members of Regions' senior management team, in its oversight role for the management of interest rate sensitivity, approves the use of derivatives in balance sheet hedging strategies. The most common derivatives Regions employs are forward rate contracts, Eurodollar futures contracts, interest rate swaps, options on interest rate swaps, interest rate caps and floors, and forward sale commitments. Derivatives are also used to offset the risks associated with customer derivatives, which include interest rate, credit and foreign exchange risks.

Forward rate contracts are commitments to buy or sell financial instruments at a future date at a specified price or yield. A Eurodollar futures contract is a future on a Eurodollar deposit. Eurodollar futures contracts subject Regions to market risk associated with changes in interest rates. Because futures contracts are cash settled daily, there is minimal credit risk associated with Eurodollar futures. Interest rate swaps are contractual agreements typically entered into to exchange fixed for variable (or vice versa) streams of interest payments. The notional principal is not exchanged but is used as a reference for the size of interest settlements. Interest rate options are contracts that allow the buyer to purchase or sell a financial instrument at a predetermined price and time. Forward sale commitments are contractual obligations to sell market instruments at a future date for an already agreed-upon price. Foreign currency contracts involve the exchange of one currency for another on a specified date and at a specified rate. The Company is subject to the credit risk that another party will fail to perform.

Regions has made use of interest rate swaps to effectively convert a portion of its fixed-rate funding position to a variable-rate position and, in some cases, to effectively convert a portion of its variable-rate loan portfolio to fixed-rate. Regions also uses derivatives to manage interest rate and pricing risk associated with its mortgage origination business. In the period of time that elapses between the origination and sale of mortgage loans,

## **Table of Contents**

changes in interest rates have the potential to cause a decline in the value of the loans in this held-for-sale portfolio. Futures contracts and forward sale commitments are used to protect the value of the loan pipeline and loans held for sale from changes in interest rates and pricing.

Regions manages the credit risk of these instruments in much the same way as it manages credit risk of the loan portfolios by establishing credit limits for each counterparty and through collateral agreements for dealer transactions. For non-dealer transactions, the need for collateral is evaluated on an individual transaction basis and is primarily dependent on the financial strength of the counterparty. Credit risk is also reduced significantly by entering into legally enforceable master netting agreements. When there is more than one transaction with a counterparty and there is a legally enforceable master netting agreement in place, the exposure represents the net of the gain and loss positions with and collateral received from and/or posted to that counterparty. The Credit Risk section in Regions Annual Report on Form 10-K for the year ended December 31, 2011 contains more information on the management of credit risk.

Regions also uses derivatives to meet the needs of its customers. Interest rate swaps, interest rate options and foreign exchange forwards are the most common derivatives sold to customers. Other derivatives instruments with similar characteristics are used to hedge market risk and minimize volatility associated with this portfolio. Instruments used to service customers are held in the trading account, with changes in value recorded in the consolidated statements of operations.

The primary objective of Regions hedging strategies is to mitigate the impact of interest rate changes, from an economic perspective, on net interest income and the net present value of its balance sheet. The overall effectiveness of these hedging strategies is subject to market conditions, the quality of Regions execution, the accuracy of its valuation assumptions, counterparty credit risk and changes in interest rates. See Note 11 Derivative Financial Instruments and Hedging Activities to the consolidated financial statements for a tabular summary of Regions quarter-end and year-end derivatives positions and further discussion.

Regions accounts for mortgage servicing rights at fair market value with any changes to fair value being recorded within mortgage income. Regions enters into derivative and balance sheet transactions to mitigate the impact of market value fluctuations related to mortgage servicing rights. Derivative instruments entered into in the future could be materially different from the current risk profile of Regions current portfolio.

## **MARKET RISK PREPAYMENT RISK**

Regions, like most financial institutions, is subject to changing prepayment speeds on mortgage-related assets under different interest rate environments. Prepayment risk is a significant risk to earnings and specifically to net interest income. For example, mortgage loans and other financial assets may be prepaid by a debtor, so that the debtor may refinance its obligations at lower rates. As loans and other financial assets prepay in a falling rate environment, Regions must reinvest these funds in lower-yielding assets. Prepayments of assets carrying higher rates reduce Regions interest income and overall asset yields. Conversely, in a rising rate environment, these assets will prepay at a slower rate, resulting in opportunity cost by not having the cash flow to reinvest at higher rates. Prepayment risk can also impact the value of securities and the carrying value of equity. Regions greatest exposures to prepayment risks primarily rest in its mortgage-backed securities portfolio, the mortgage fixed-rate loan portfolio and the mortgage servicing asset, all of which tend to be sensitive to interest rate movements. Regions also has prepayment risk that would be reflected in non-interest income in the form of servicing income on loans sold. Regions actively monitors prepayment exposure as part of its overall net interest income forecasting and interest rate risk management. In particular, because interest rates are currently relatively low, Regions is actively managing exposure to declining prepayments that are expected to coincide with increasing interest rates in both the loan and securities portfolios.

---

**Table of Contents**

**MARKET RISK BROKERAGE AND OTHER MARKET ACTIVITY RISK**

When there are references to Morgan Keegan it should not be assumed or inferred that any specific activity mentioned is carried on by any particular Morgan Keegan entity. On January 11, 2012, Regions entered into a stock purchase agreement to sell Morgan Keegan & Company, Inc. and related affiliates to Raymond James Financial, Inc. The transaction closed on April 2, 2012. Refer to Note 2 Discontinued Operations, and Note 16 Subsequent Events to the consolidated financial statements for further details.

Morgan Keegan's business activities, including its securities inventory positions and securities held for investment, expose it to market risk. Further, the Company is also exposed to market risk in its capital markets business, which includes derivatives, loan syndication and foreign exchange trading activities, and mortgage trading activity, which includes secondary marketing of loans to government-sponsored entities.

Morgan Keegan trades for its own account in corporate and tax-exempt securities and U.S. Government agency and Government-sponsored securities. Most of these transactions are entered into to facilitate the execution of customers' orders to buy or sell these securities. In addition, it trades certain equity securities in order to make a market in these securities. Morgan Keegan's trading activities require the commitment of capital. All principal transactions place the subsidiary's capital at risk. Profits and losses are dependent upon the skills of employees and market fluctuations. In order to mitigate the risks of carrying inventory and as part of other normal brokerage activities, Morgan Keegan assumes short positions on securities.

In the normal course of business, Morgan Keegan enters into underwriting and forward commitments. As of March 31, 2012, the total notional amount of forward and future commitments was approximately \$879 million. Morgan Keegan typically settles its position by entering into equal but opposite contracts and, as such, the contract amounts do not necessarily represent future cash requirements. Settlement of the transactions relating to such commitments is not expected to have a material effect on Regions' consolidated financial position. Transactions involving future settlement give rise to market risk, which represents the potential loss that can be caused by a change in the market value of a particular financial instrument. Regions' exposure to market risk is determined by a number of factors, including the size, composition and diversification of positions held, the absolute and relative levels of interest rates, and market volatility.

Additionally, in the normal course of business, Morgan Keegan enters into transactions for delayed delivery, to-be-announced securities, which are recorded in trading account assets on the consolidated balance sheets at fair value. Risks arise from the possible inability of counterparties to meet the terms of their contracts and from unfavorable changes in interest rates or the market values of the securities underlying the instruments. The credit risk associated with these contracts is typically limited to the cost of replacing all contracts on which Morgan Keegan has recorded an unrealized gain. For exchange-traded contracts, the clearing organization acts as the counterparty to specific transactions and, therefore, bears the risk of delivery to and from counterparties.

Interest rate risk at Morgan Keegan arises from the exposure of holding interest-sensitive financial instruments such as government, corporate and municipal bonds, and certain preferred equities. Morgan Keegan manages its exposure to interest rate risk by setting and monitoring limits and, where feasible, entering into offsetting positions in securities with similar interest rate risk characteristics. Securities inventories recorded in trading account assets on the consolidated balance sheets are marked to market, and, accordingly, there are no unrecorded gains or losses in value. While a significant portion of the securities inventories have contractual maturities in excess of five years, these inventories, on average, turn over in excess of twelve times per year. Accordingly, the exposure to interest rate risk inherent in Morgan Keegan's securities inventories is less than that of similar financial instruments held by firms in other industries. Morgan Keegan's equity securities inventories are exposed to risk of loss in the event of unfavorable price movements. Also, Morgan Keegan is subject to credit risk arising from non-performance by trading counterparties, customers and issuers of debt securities owned. This risk is managed by imposing and monitoring position limits, monitoring trading counterparties, reviewing security concentrations, holding and marking to market collateral, and conducting business through clearing

## **Table of Contents**

organizations that guarantee performance. Morgan Keegan regularly participates in the trading of some derivative securities for its customers; however, this activity does not involve Morgan Keegan acquiring a position or commitment in these products and this trading is not a significant portion of Morgan Keegan's business.

Morgan Keegan has been an underwriter and dealer in auction rate securities. See Note 14 "Commitments and Contingencies" to the consolidated financial statements for more details regarding regulatory action related to Morgan Keegan auction rate securities. As of March 31, 2012, customers of Morgan Keegan owned approximately \$250 thousand of auction rate securities, and Morgan Keegan held approximately \$124 million of auction rate securities on its balance sheet.

To manage trading risks arising from interest rate and equity price risks, the Company uses a Value at Risk ( VAR ) model along with other risk management methods to measure the potential fair value the Company could lose on its trading positions given a specified statistical confidence level and time-to-liquidate time horizon. The results of VAR were immaterial for both March 31, 2012 and December 31, 2011.

## **PROVISION FOR LOAN LOSSES**

The provision for loan losses is used to maintain the allowance for loan losses at a level that in management's judgment is appropriate to absorb probable losses inherent in the portfolio at the balance sheet date. The provision for loan losses totaled \$117 million in the first quarter of 2012 compared to \$482 million during the first quarter of 2011. Net charge-offs as a percentage of average loans (annualized) were 1.73 percent and 2.37 percent in the first three months of 2012 and 2011, respectively. Net charge-offs were lower across all major loan categories when comparing the 2012 period to the prior year period, except for the consumer credit card portfolio which was purchased in the second quarter of 2011. In addition to lower levels of charge-offs, credit quality metrics continued to improve. Charge-offs exceeded provision for loan losses for the first quarter of 2012, primarily due to improving credit metrics.

## **CREDIT RISK**

Regions' objective regarding credit risk is to maintain a high-quality credit portfolio that provides for stable credit costs with acceptable volatility through an economic cycle. Regions has a diversified loan portfolio in terms of product type, collateral and geography. See Table 2 for further details of each loan portfolio segment. See the "Credit Risk" section of the Form 10-K for the year ended December 31, 2011 for a discussion of risk characteristics of each loan type.

## **INTERNATIONAL RISK**

Regions has minimal sovereign credit exposure. Regions does own an immaterial amount in government securities issued by a single non-European sovereign, as well as a guarantee on a leveraged lease from a Western European government agency. However, Regions does have country exposure, which is defined as the aggregation of exposure Regions has with financial institutions, companies, or individuals in a given country outside of the United States. The majority of these exposures are in the form of corporate bonds, and to a lesser extent, derivative hedges (interest rate and foreign exchange) and leveraged lease guarantees. This exposure is concentrated in highly-rated, Western European countries but not in those most severely affected by the recent Eurozone turmoil. In addition to Western Europe, Regions' corporate securities include investments in corporations domiciled in other countries in Eastern Europe, North America and Australia.

Regions has other smaller exposures in the form of trade confirmations, due from clearing accounts and loan participations with counterparties domiciled in countries in other regions, such as Latin America, Asia and the Middle East / North Africa region.

**Table of Contents**

At March 31, 2012, Regions' international exposure was approximately \$1.0 billion in total. Approximately 63 percent of the total exposure relates to corporate bonds. Approximately 61 percent of the total exposure relates to highly-rated Western European entities.

Regions' Counterparty Risk department is responsible for the setting of country limits and managing of the outstanding country exposure for all departments of the bank as well as monitoring compliance of the outstanding exposure to the set limits. Reports are sent to Counterparty Risk by the lines of business on a monthly basis to demonstrate their compliance with their set limits. Counterparty Risk conducts a formal, quarterly assessment of the exposure, on both an outstanding and limit basis, which is then distributed to upper management for review.

**NON-INTEREST INCOME**

The following tables present a summary of non-interest income. For expanded discussion of certain significant non-interest income items, refer to the discussion of each component following the tables presented.

**Table 23 Non-Interest Income from Continuing Operations**

	<b>Three Months Ended March 31</b>	
	<b>2012</b>	<b>2011</b>
	<b>(In millions)</b>	
Service charges on deposit accounts	\$ 254	\$ 287
Capital markets and investment income	28	31
Mortgage income	77	45
Trust department income	49	50
Securities gains, net	12	82
Insurance commissions and fees	28	28
Bank owned life insurance	21	21
Commercial credit fee income	19	20
Leveraged lease termination gains	7	
Net revenue (loss) from affordable housing	(14)	(14)
Other miscellaneous income	43	30
	<b>\$ 524</b>	<b>\$ 580</b>

*Service charges on deposit accounts* Service charges on deposit accounts decreased \$33 million for the quarter ended March 31, 2012, as compared to the first quarter of 2011. The decrease is primarily driven by policy changes related to Regulation E, as well as a decline in interchange income as a result of debit interchange price controls implemented in the fourth quarter of 2011. These factors were offset by the restructuring of checking accounts from free to fee-eligible and a higher level of customer transactions.

Interchange income, which is included in service charges on deposit accounts, was impacted by the Federal Reserve's rulemaking required by section 1075 of the Dodd-Frank Act. The Federal Reserve Board of Governors announced its final rule on debit card interchange fees mandated by the Durbin Amendment to the Dodd-Frank Act effective October 1, 2011. Based on the final ruling, the Company estimates that the impact on annual debit interchange revenue will be approximately \$180 million before any mitigation efforts. However, the Company believes it will be able to mitigate this impact over time through fee changes, introduction of new products and services, and expense management.

*Mortgage income* Mortgage income increased \$32 million for the first quarter of 2012 as compared to the first quarter of 2011 as customers took advantage of the opportunity to refinance under the extended Home Affordable Refinance Program, or HARP II. Mortgage originations totaled \$1.6 billion during both the first quarter of 2012 and of 2011. Mortgage originations continue to be consistent as a result of the sustained refinancing activity.

**Table of Contents**

*Securities gains (losses), net* During the first quarter of 2012, Regions received proceeds of approximately \$1.4 billion primarily from sales of available for sale agency mortgage-backed securities. Proceeds from these sales were reinvested in similar securities. Additionally, during the first quarter of 2012, Regions added approximately \$2.2 billion of residential agency mortgage-backed securities and \$1.0 billion of high quality investment grade corporate bonds. The net purchases of agency mortgage-backed securities are an offset to the Company's strategy to sell the majority of agency eligible residential first mortgages at origination, and the corporate bonds increase diversification in the portfolio with an attractive risk and return profile. Securities gains for the first quarter of 2012 declined to \$12 million from \$82 million for the first quarter of 2011. The 2011 period included sales of approximately \$2.4 billion in securities, primarily agency securities available for sale.

*Leveraged lease termination gains* A 2008 settlement with the Internal Revenue Service ( IRS ) negatively impacted the economics of Regions leveraged lease portfolio. In addition, there has been a mutual desire with lessees to terminate certain leases within this portfolio. Therefore, Regions terminated certain leveraged leases during the first quarter of 2012 resulting in a \$7 million net gain.

*Other miscellaneous income* Other miscellaneous income increased \$13 million for the quarter ended March 31, 2012, as compared to the first quarter of 2011. The largest component of the increase was credit card income which totaled \$14 million in the first quarter of 2012 with no impact in 2011. In June 2011, Regions purchased approximately \$1.1 billion of Regions-branded credit card accounts from FIA Card Services.

**NON-INTEREST EXPENSE**

The following tables present a summary of non-interest expense. For expanded discussion of certain significant non-interest expense items, refer to the discussion of each component following the tables presented.

**Table 24 Non-Interest Expense from Continuing Operations**

	<b>Three Months Ended March 31</b>	
	<b>2012</b>	<b>2011</b>
	<b>(In millions)</b>	
Salaries and employee benefits	\$ 442	\$ 428
Net occupancy expense	94	100
Furniture and equipment expense	64	70
Professional and legal expenses	27	55
Amortization of core deposit intangible	22	25
Other real estate owned expense	23	39
Credit/checkcard expenses	20	8
FDIC premiums	47	52
Marketing	17	13
Other miscellaneous expenses	157	142
	<b>\$ 913</b>	<b>\$ 932</b>

*Salaries and employee benefits* Salaries and employee benefits increased \$14 million for the first quarter of 2012 when compared to the first quarter of 2011. The increase is due to higher pension costs and incentive increases.

*Professional and legal expenses* Professional and legal expenses decreased \$28 million for the first quarter of 2012 when compared to the first quarter of 2011. The decrease between periods was driven by a lower volume of legal costs, as well as timing of invoices.

*Other real estate owned expense* Other real estate owned ( OREO ) expense includes the cost of adjusting foreclosed properties to estimated fair value after these assets have been classified as OREO, net gains and losses

---

**Table of Contents**

on sales of properties, and other costs to maintain the property such as property taxes, security, and grounds maintenance. OREO expense decreased \$16 million for the first quarter of 2012 when compared to the first quarter of 2011. The decline in expense was due in part to lower OREO balances which decreased to \$241 million at March 31, 2012 from \$465 million at March 31, 2011. The decrease was also the result of stabilizing real estate values.

*Credit/checkcard expense* Credit/checkcard expenses increased \$12 million for the first quarter of 2012 when compared to the first quarter of 2011. The increase is due primarily to increased activity due to the re-entry into the credit card business with the purchase of approximately \$1.1 billion of Regions-branded credit card accounts from FIA Card Services in June 2011.

*Other miscellaneous expenses* Other miscellaneous expenses include communications, postage, supplies, certain credit-related costs and business development services, and increased \$15 million for the first quarter of 2012 as compared to the same period of 2011.

**INCOME TAXES**

The Company's income tax expense from continuing operations for the three months ended March 31, 2012 was \$82 million compared to a tax benefit of \$29 million for the same period in 2011, resulting in an effective tax rate of 25.5 percent and (138.1) percent, respectively. The increase in income tax expense was principally due to positive consolidated pre-tax earnings.

The Company's effective tax rate is affected by recurring items such as affordable housing tax credits, bank-owned life insurance and tax-exempt income, which are expected to be consistent in the near term. The effective tax rate is also affected by items that may occur in any given period but are not consistent from period to period, such as the potential termination of leveraged leases. Accordingly, future period effective tax rates may not be comparable to the current period.

At March 31, 2012, the Company reported a net deferred tax asset of \$1.2 billion, compared to \$1.3 billion as of December 31, 2011. Of this amount, \$766 million was generated from differences between the financial statement carrying amounts and the corresponding tax bases of assets and liabilities, of which a significant portion relates to the allowance for loan losses. These net deferred tax assets have not yet reduced taxable income and therefore do not have a set expiration date. The remaining \$457 million net deferred tax asset balance relates to tax carryforwards that have defined expiration dates which are typically 15 or 20 years from the date of creation.

Management's determination of the realization of the net deferred tax asset is based upon an evaluation of the four possible sources of taxable income: 1) the future reversals of taxable temporary differences; 2) future taxable income exclusive of reversing temporary differences and carryforwards; 3) taxable income in prior carryback years; and 4) tax-planning strategies. In making a conclusion, management has evaluated all available positive and negative evidence impacting these sources of taxable income. The primary sources of positive and negative evidence impacting taxable income are summarized below.

*Positive Evidence*

*History of earnings* The Company has a strong history of generating earnings and has demonstrated positive earnings in 16 of the last 20 years. Absent the goodwill impairments during 2011 and 2008, which had limited impact on taxable net income reported on the Company's tax returns, the Company would have generated positive earnings during these years leaving only 2009 and 2010 in loss positions. Excluding the goodwill impairment related to the process of selling Morgan Keegan, the Company has had six straight quarters of pre-tax income. The Company did not generate any federal net operating losses or tax credit carryforwards until 2009, and the Company has utilized all federal net

---

**Table of Contents**

operating losses and a portion of the federal tax credit carryforwards. There is no history of significant tax carryforwards expiring unused.

**Reversals of taxable temporary differences** The Company anticipates that future reversals of taxable temporary differences, including the accretion of taxable temporary differences related to leveraged leases acquired in the AmSouth merger, can absorb up to approximately \$830 million of deferred tax assets.

**Creation of future taxable income** As of March 31, 2012, the Company has utilized all taxable income in prior carryback years. The Company has projected future taxable income that will be sufficient to absorb the remaining deferred tax assets after the reversal of future taxable temporary differences. The taxable income forecasting process utilizes the forecasted pre-tax earnings and adjusts for book-tax differences that will be exempt from taxation, primarily tax-exempt interest income and bank-owned life insurance, as well as temporary book-tax differences including the allowance for loan losses. The projections relied upon for this process are consistent with the Company's financial forecasting process.

**Strong capital position** At March 31, 2012, the Company had a Tier 1 capital ratio of 14.34 percent, substantially above the 6.0 percent minimum standard to be well capitalized. Also, the Total capital ratio of 17.99 percent substantially exceeds the 10.0 percent minimum standard to be well capitalized. The Company's Tier 1 common ratio (non-GAAP) was 9.62 percent at March 31, 2012 (see Table 20 GAAP to Non-GAAP Reconciliation for further details). The Board of Governors of the Federal Reserve System has proposed 5 percent as the level of Tier 1 common capital sufficient to withstand periods of economic stress.

**Ability to implement tax-planning strategies** The Company has the ability to implement tax planning strategies to maximize the realization of deferred tax assets, such as the sale of assets. As an example, at March 31, 2012, the Company's portfolio of securities available for sale had \$548 million of gross unrealized pre-tax gains which could accelerate the recognition of the associated taxable temporary differences, which management would consider being a tax planning strategy to maximize the realization of the deferred tax assets that may expire unutilized.

*Negative Evidence*

**Cumulative loss position** The Company remains in a three-year cumulative loss position. Management believes the primary contributing factor, unprecedented provision for loan losses, will continue to stabilize in future periods.

The Company does not believe that a portion of the state net operating loss carryforwards and state tax credit carryforwards will be realized due to the length of certain state carryforward periods. Accordingly, a valuation allowance has been established in the amount of \$33 million against such benefits at March 31, 2012 and \$32 million at December 31, 2011.

Except for certain state tax carryforwards, the Company believes, based on the analysis above, that the net deferred tax asset is more-likely-than-not to be realized.

**DISCONTINUED OPERATIONS**

Regions reported a loss from discontinued operations of \$40 million, or (\$0.03) per diluted common share, for the first quarter of 2012, compared to income of \$19 million, or \$0.01 per diluted common share, for the first quarter of 2011. Higher professional and legal costs drove the loss from discontinued operations.

**Table of Contents**

**Item 3. Quantitative and Qualitative Disclosures about Market Risk**

Reference is made to pages 91 through 95 included in Management's Discussion and Analysis.

**Item 4. Controls and Procedures**

Based on an evaluation, as of the end of the period covered by this Form 10-Q, under the supervision and with the participation of Regions management, including its Chief Executive Officer and Chief Financial Officer, the Chief Executive Officer and Chief Financial Officer have concluded that Regions' disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934) are effective. During the quarter ended March 31, 2012, there have been no changes in Regions' internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, Regions' internal control over financial reporting.

**Table of Contents****PART II. OTHER INFORMATION****Item 1. Legal Proceedings**

Information required by this item is set forth in Note 14, Commitments and Contingencies in the Notes to the Consolidated Financial Statements (Unaudited) in Part I. Item 1. of this report, which is incorporated herein by reference.

**Item 2. Unregistered Sales of Equity Securities and Use of Proceeds**

Information concerning Regions' repurchases of its outstanding common stock during the three-month period ended March 31, 2012, is set forth in the following table:

**Issuer Purchases of Equity Securities**

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
January 1 - 31, 2012				23,072,300
February 1 - 29, 2012				23,072,300
March 1 - 31, 2012				23,072,300
Total				23,072,300

On January 18, 2007, Regions' Board of Directors authorized the repurchase of 50 million shares of Regions' common stock through open market or privately negotiated transactions and announced the authorization of this repurchase. As indicated in the table above, approximately 23.1 million shares remain available for repurchase under the existing plan.

**Restrictions on Dividends and Repurchase of Stock**

Holders of Regions common stock are only entitled to receive such dividends as Regions' board of directors may declare out of funds legally available for such payments. Furthermore, holders of Regions common stock are subject to the prior dividend rights of any holders of Regions preferred stock then outstanding. As of March 31, 2012, there were 3,500,000 shares of Regions' Fixed Rate Cumulative Perpetual Preferred Stock Series A (the Series A Preferred Stock) with a liquidation amount of \$1,000 per share, issued and outstanding. Under the terms of the Series A Preferred Stock, Regions' ability to declare and pay dividends on or repurchase Regions' common stock was subject to restrictions in the event Regions failed to declare and pay (or set aside for payment) full dividends on the Series A Preferred Stock. However, on April 4, 2012, Regions repurchased all of the outstanding Series A Preferred Stock.

Also as long as the Series A Preferred Stock remained outstanding, dividend payments and repurchases or redemptions relating to certain equity securities, including Regions common stock, were prohibited during any period there were accrued and unpaid dividends on such preferred stock, subject to certain limited exceptions. Regions understands the importance of returning capital to shareholders. Management will continue to execute the capital planning process, including evaluation of the amount of the common dividend, with the Board of Directors and in conjunction with the regulatory supervisors, subject to the Company's results of operations. Also, Regions is a bank holding company, and its ability to declare and pay dividends is dependent on certain federal regulatory considerations, including the guidelines of the Federal Reserve regarding capital adequacy and dividends.

## **Table of Contents**

In addition, the terms of Regions' outstanding junior subordinated debt securities prohibit it from declaring or paying any dividends or distributions on Regions' capital stock, including its common stock, or purchasing, acquiring, or making a liquidation payment on such stock, if Regions has given notice of its election to defer interest payments but the related deferral period has not yet commenced or a deferral period is continuing.
