When declared effective pursuant to section 8(c)

Immediately upon filing pursuant to no-action relief granted to Registrant on November 9, 2010.

PROSPECTUS

2.9 Million Common Shares

Nuveen Senior Income Fund

Nuveen Senior Income Fund (the Fund) is a non-diversified, closed-end management investment company. The Fund's primary investment objective is to achieve a high level of current income, consistent with preservation of capital. The Fund cannot assure you that it will achieve its investment objective.

Investing in the Fund's Common Shares involves certain risks that are described in the Risk Factors section of this Prospectus.

Neither the SEC nor any state securities commission has approved or disapproved of these securities or determined if this Prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

You should read this Prospectus, which contains important information about the Fund, before deciding whether to invest and retain it for future reference. A Statement of Additional Information (SAI), dated May 31, 2012, containing additional information about the Fund, has been filed with the SEC and is incorporated by reference in its entirety into this Prospectus. You may request a free copy of the SAI, the table of contents of which is on the last page of this Prospectus, annual and semi-annual reports to shareholders and other information about the Fund, and make shareholder inquiries by calling (800) 257-8787, by writing to the Fund or from the Fund's website (<http://www.nuveen.com>). The information contained in, or that can be accessed through, the Fund's website is not part of this Prospectus. You also may obtain a copy of the SAI (and other information regarding the Fund) from the Securities and Exchange Commission's (SEC) web site (<http://www.sec.gov>).

The Fund's common shares do not represent a deposit or obligation of, and are not guaranteed or endorsed by, any bank or other insured depository institution, and are not federally insured by the Federal Deposit Insurance Corporation, the Federal Reserve Board or any other governmental agency.

Portfolio Contents. Under normal circumstances, the Fund will invest at least 80% of its Managed Assets (as defined on page 3) in adjustable rate, U.S. dollar-denominated secured and unsecured senior loans (Senior Loans), which unsecured Senior Loans will be, at the time of investment, investment grade quality. The Fund will invest at least 65% of its total assets in Senior Loans that are secured by specific collateral. Senior Loans are made to corporations, partnerships, limited liability companies and other entities to finance leveraged buyouts, recapitalizations, mergers, acquisitions, stock repurchases, debt refinancings and, to a lesser extent, for general operating and other purposes. The Fund may invest up to 20% of its total assets in U.S. dollar-denominated Senior Loans of Borrowers that are organized or located in countries outside the United States. In addition, the Fund may invest up to 20% of its total assets, in the aggregate, in other income producing

Edgar Filing: NUVEEN SENIOR INCOME FUND - Form 486BPOS

securities such as investment and non-investment grade corporate debt securities, high quality, short-term debt securities and equity securities and warrants acquired in connection with the Fund's investments in Senior Loans.

Adviser and Subadviser. Nuveen Fund Advisors, Inc. (formerly known as Nuveen Asset Management), the Fund's investment adviser, is responsible for determining the Fund's overall investment strategy and its implementation, including the use of leverage and hedging. Symphony Asset Management LLC, the Fund's subadviser, is responsible for managing the Fund's Managed Assets.

Common Shares will not be sold at a price less than current net asset value per share plus the per share amount of the commission to be paid to Nuveen. The Fund and Nuveen will suspend the sale of Common Shares if the per share price of the shares is less than the minimum price. The Fund currently intends to distribute the shares offered pursuant to this Prospectus primarily through at-the-market transactions, although from time to time it may also distribute shares through an underwriting syndicate or a privately negotiated transaction. To the extent shares are distributed other than through at-the-market transactions, the Fund will file a supplement to this Prospectus describing such transactions. For more information on how Common Shares may be sold, see the "Plan of Distribution" section of this Prospectus.

The common shares are listed on the New York Stock Exchange. The trading or "ticker" symbol of the Common Shares of the Fund is "NSL".

As of April 30, 2012, the Fund has sold in this offering an aggregate of 2,567,822 shares of common stock, representing net proceeds to the Fund of \$18,600,829, after payment of commissions on \$187,892 in the aggregate.

The date of this Prospectus is May 31, 2012.

The Fund will update this Prospectus to reflect any material changes to the disclosures herein.

PROSPECTUS SUMMARY

This is only a summary. You should review the more detailed information contained elsewhere in this Prospectus and in the SAI.

The Fund

Nuveen Senior Income Fund (the Fund) is a non-diversified, closed-end management investment company. See The Fund. The Fund's common shares, \$.01 par value (Common Shares), are traded on the New York Stock Exchange (NYSE) under the symbol NSL. See Description of Shares. As of March 31, 2012, the Fund had 32,431,524 Common Shares outstanding and net assets applicable to Common Shares of \$229,524,204.

Investment Objective and Policies

The Fund's primary investment objective is to achieve a high level of current income, consistent with preservation of capital. The Fund cannot assure you that it will achieve its investment objective.

Under normal circumstances, the Fund will invest at least 80% of its total assets in adjustable rate, U.S. dollar-denominated secured and unsecured senior loans (Senior Loans), which unsecured Senior Loans will be, at the time of investment, investment grade quality. The Fund will invest at least 65% of its total assets in Senior Loans that are secured by specific collateral. Senior Loans are made to corporations, partnerships, limited liability companies and other entities (Borrowers) to finance leveraged buyouts, recapitalizations, mergers, acquisitions, stock repurchases, debt refinancings and, to a lesser extent, for general operating and other purposes. The Fund may invest up to 20% of its total assets in U.S. dollar-denominated Senior Loans of Borrowers that are organized or located in countries outside the United States. In addition, the Fund may invest up to 20% of its total assets, in the aggregate, in:

other income producing securities such as investment and non-investment grade corporate debt securities, high quality, short-term debt securities; and

equity securities and warrants acquired in connection with the Fund's investments in Senior Loans.

The Fund may also engage in lending of its securities, repurchase agreements, reverse repurchase agreements and, for hedging and risk management purposes, certain derivative transactions. See Risk Factors.

The Fund's assets, including assets attributable to preferred shares, if any, that may be outstanding and the principal amount of any Borrowings (as defined on page 6), are called Managed Assets.

Investment grade quality securities are those securities that, at the time of investment, are (i) rated by at least one nationally recognized statistical rating organization (NRSRO) within the four highest grades (BBB- or Baa3 or better by Standard & Poor's Corporation, a division of The McGraw-Hill Companies (S&P), Moody's

Investors Service, Inc. (Moody's) or Fitch Ratings (Fitch), or (ii) unrated but judged to be of comparable quality. The Fund may purchase Senior Loans and other debt securities that are rated below investment grade or that are unrated but judged to be of comparable quality. See The Fund's Investments Portfolio Composition and Other Information and Risk Factors Below Investment Grade Risk.

During temporary defensive periods or in order to keep the Fund's cash fully invested, the Fund may deviate from its investment objective and invest all or a portion of its assets in investment grade debt securities, including obligations issued or guaranteed by the U.S. government, its agencies and instrumentalities. In addition, upon the Subadviser's recommendation that a change would be in the best interests of the Fund and upon concurrence by NFA (as defined below), and subject to approval of the Board of Trustees of the Fund, the Fund may deviate from its investment guidelines noted above. For a more complete discussion of the Fund's portfolio composition, see The Fund's Investments.

Investment Adviser

Nuveen Fund Advisors, Inc. (NFA or the Adviser), the Fund's investment adviser, is responsible for determining the Fund's overall strategy and its implementation. See Management of the Fund Investment Adviser, Sub-Adviser and Portfolio Manager.

Sub-Adviser

Symphony Asset Management LLC (Symphony or Subadviser) is the Fund's subadviser and oversees the day-to-day operations of the Fund.

Symphony, a registered investment adviser, is an indirect wholly owned subsidiary of Nuveen Investments. Founded in 1994, Symphony had approximately \$9.9 billion in assets under management as of March 31, 2012. Symphony specializes in the management of market neutral equity and debt strategies and Senior Loan and other debt portfolios.

NFA and Symphony will sometimes individually be referred to as an Adviser and together be referred to as the Advisers.

Nuveen Securities, LLC (Nuveen), a registered broker-dealer affiliate of NFA that is involved in the offering of the Fund's Common Shares, has reached a settlement relating to certain findings by the Financial Industry Regulatory Authority (FINRA) in connection with the marketing of MuniPreferred shares. See Plan of Distribution-Distribution Through At-the-Market Transactions.

Use of Leverage

The Fund employs financial leverage through borrowing or issuing commercial paper or notes (collectively Borrowing). The Fund has entered into a \$109,000,000 Revolving Credit and Security Agreement with an affiliate of Citibank. As of January 31, 2012, the Fund's outstanding balance on these Borrowings was \$75,500,000.

For the six months ended January 31, 2012, the average daily balance outstanding and average annual interest rate on these borrowings were \$75,129,348 and 1.13%, respectively.

The Fund does not currently, but may in the future, issue preferred shares. See Description of Shares Preferred Shares.

Leverage involves special risks. See Risk Factors Leverage Risks. There is no assurance that the Fund's leveraging strategy will be successful. Interest on Borrowings may be at a fixed or floating rate, but generally will be based on short-term rates. The Fund will seek to invest the proceeds of any future financial leverage in a manner consistent with the Fund's investment objective and policies. See Use of Leverage.

Offering Methods

The Fund may offer shares using one or more of the following methods: (i) at-the-market transactions conducted through Stifel, Nicolaus & Company, Incorporated (Stifel Nicolaus) which has entered into an Equity Distribution Agreement (Selected Dealer Agreement) with Nuveen, one of the Fund's underwriters; (ii) through an underwriting syndicate; and (iii) through privately negotiated transactions between the Fund and specific investors. See Plan of Distribution.

Distribution Through At-the-Market Transactions. The Fund from time to time may offer its Common Shares through Stifel Nicolaus, which has entered into the Selected Dealer Agreement with Nuveen pursuant to which Stifel Nicolaus will be acting as Nuveen's exclusive sub-placement agent with respect to at-the-market offerings of the Common Shares. Common Shares will only be sold on such days as shall be agreed to by the Fund, Nuveen and Stifel Nicolaus. Common Shares will be sold at market prices, which shall be determined with reference to trades on the NYSE, subject to a minimum price to be established each day by the Fund. The minimum price on any day will not be less than the current net asset value per share plus the per share amount of the commission to be paid to Nuveen. The Fund and Nuveen will suspend the sale of Common Shares if the per share price of the shares is less than the minimum price.

The Fund will compensate Nuveen with respect to sales of the Common Shares at a commission rate of up to 1% of the gross proceeds of the sale of Common Shares. Nuveen will compensate Stifel Nicolaus at a fixed rate of 0.8% of the gross proceeds of the sale of Common Shares sold by Stifel Nicolaus. Settlements of Common Share sales will occur on the third business day following the date of sale.

In connection with the sale of the Common Shares on behalf of the Fund, Nuveen may be deemed to be an underwriter within the meaning of the Securities Act of 1933 (the 1933 Act), and the

compensation of Nuveen may be deemed to be underwriting commissions or discounts. Unless otherwise indicated in a further Prospectus supplement, each of Nuveen and Stifel Nicolaus will act on a reasonable efforts basis.

The offering of Common Shares will be made pursuant to the Selected Dealer Agreement among the Fund, Nuveen and Stifel Nicolaus, which will terminate upon the earlier of (i) the sale of all Common Shares subject thereto or (ii) termination of the Selected Dealer Agreement. Each of Nuveen and Stifel Nicolaus shall have the right to terminate the Selected Dealer Agreement in its discretion at any time. See Plan of Distribution Distribution Through At-the-Market Transactions.

The Fund currently intends to distribute the shares offered pursuant to this Prospectus primarily through at-the-market transactions, although from time to time it may also distribute shares through an underwriting syndicate or a privately negotiated transaction. To the extent shares are distributed other than through at-the-market transactions, the Fund will file a supplement to this Prospectus describing such transactions.

Distribution Through Underwriting Syndicates. The Fund from time to time may issue additional Common Shares through a syndicated secondary offering. In order to limit the impact on the market price of the Fund's Common Shares, Underwriters will market and price the offering on an expedited basis (e.g., overnight or similarly abbreviated offering period). The Fund will launch a syndicated offering on a day, and upon terms, mutually agreed upon between the Fund, Nuveen and the underwriting syndicate.

The Fund will offer its shares at a price equal to a specified discount of up to 2% from the closing market price of the Fund's Common Shares on the day prior to the offering date. The applicable discount will be negotiated by the Fund and Nuveen in consultation with the underwriting syndicate on a transaction-by-transaction basis. The Fund will compensate the underwriting syndicate out of the proceeds of the offering based upon a sales load of up to 4% of the gross proceeds of the sale of Common Shares. The minimum net proceeds per share to the Fund will not be less than the greater of (i) the Fund's latest net asset value per Common Share or (ii) 94% of the closing market price of the Fund's Common Shares on the day prior to the offering date. See Plan of Distribution Distribution Through Underwriting Syndicates.

Distribution Through Privately Negotiated Transactions. The Fund, through Nuveen, from time to time may sell directly to, and solicit offers from, institutional and other sophisticated investors, who may be deemed to be underwriters as defined in the 1933 Act for any resale of Common Shares. No sales commissions or other

compensation will be paid to Nuveen or any other FINRA member in connection with such transactions.

The terms of such privately negotiated transactions will be subject to the discretion of the management of the Fund. In determining whether to sell Common Shares through a privately negotiated transaction, the Fund will consider relevant factors including, but not limited to, the attractiveness of obtaining additional funds through the sale of Common Shares, the purchase price to apply to any such sale of Common Shares and the investor seeking to purchase the Common Shares.

Common Shares issued by the Fund through privately negotiated transactions will be issued at a price equal to the greater of (i) the net asset value per Common Share of the Fund's Common Shares or (ii) at a discount ranging from 0% to 5% of the average daily closing market price of the Fund's Common Shares at the close of business on the two business days preceding the date upon which Common Shares are sold pursuant to the privately negotiated transaction. The applicable discount will be determined by the Fund on a transaction-by-transaction basis. See Plan of Distribution Distribution Through Privately Negotiated Transactions.

Special Risk Considerations

Investment in the Fund involves special risk considerations, which are summarized below. The Fund is designed as a long-term investment and not as a trading vehicle. The Fund is not intended to be a complete investment program. See Risk Factors for a more complete discussion of the special risk considerations of an investment in the Fund.

Investment and Market Risk. An investment in the Fund's Common Shares is subject to investment risk, including the possible loss of the entire principal amount that you invest. Your investment in Common Shares represents an indirect investment in the securities owned by the Fund, which generally do not trade on a national securities exchange, NASDAQ or in the over-the-counter markets. Your Common Shares at any point in time may be worth less than your original investment, even after taking into account the reinvestment of Fund dividends and distributions. See Risk Factors Investment and Market Risk.

Market Discount from Net Asset Value. Shares of closed-end investment companies like the Fund have during some periods traded at prices higher than net asset value and have during other periods traded at prices lower than net asset value. The Fund cannot predict whether Common Shares will trade at, above or below net asset value. This characteristic is a risk separate and distinct from the risk that the Fund's net asset value could decrease as a result of investment activities. Investors bear a risk of loss to the extent that the price at which they sell their shares is lower in relation to the Fund's net asset value than at the time of purchase, assuming a stable net asset value.

Proceeds from the sale of Common Shares in this offering will be reduced by shareholder transaction costs (if applicable, which vary depending on the offering method used). The net asset value per Common Share will be reduced by costs associated with any future issuances of Common Shares or preferred shares. The Common Shares are designed primarily for long-term investors, and you should not view the Fund as a vehicle for trading purposes. See *Risk Factors* *Market Discount from Net Asset Value*.

Net Asset Value Fluctuations. The Senior Loans in which the Fund will invest generally are not listed on any securities exchange. Certain Senior Loans are traded by institutional investors in an over-the-counter secondary market for Senior Loan obligations that has developed over the past several years. The secondary market for those Senior Loans generally is comparatively illiquid relative to markets for other income securities and no active trading market exists for many Senior Loans. Because of the lack of an active trading market, Senior Loans are generally more difficult to value than liquid securities for which an active trading market exists. In determining net asset value, the Fund will utilize the valuations of Senior Loans furnished by an independent third-party pricing service, which typically values Senior Loans at the mean of the highest bona fide bid and lowest bona fide ask prices when current quotations are readily available. Senior Loans for which current quotations are not readily available are valued at a fair value as determined by the pricing service using pricing matrices and other information and analyses, including credit considerations considered relevant by such pricing service, to determine valuations. If the pricing service does not provide a value for a Senior Loan, a value will be determined by the Adviser. To the extent that an active secondary trading market in Senior Loan interests develops to a reliable degree, the pricing service may rely to an increasing extent on such market prices and quotations in determining valuations of the Senior Loan interests in the Fund's portfolio. The Fund purchases Senior Loans primarily to seek to achieve its investment objective of high current income, consistent with preservation of capital, and does not anticipate that it will actively trade Senior Loans. To the extent a trading market continues to develop, certain participants in the market may have objectives other than current income and may pursue short-term trading strategies, which may result in erratic movements in the market prices for Senior Loans as a result of movements in short-term interest rates or otherwise. Although the Fund's policy of acquiring interests in floating rate Senior Loans is intended to minimize fluctuations in net asset value resulting from changes in market interest rates, the Fund's net asset value will fluctuate. See *Net Asset Value*.

Senior Loan Risks.

Issuer Credit Risk. Borrowers of Senior Loans may default on their obligations to pay principal or interest when due. This non-payment

would result in a reduction of income to the Fund, a reduction in the value of a Senior Loan experiencing non-payment and, potentially, a decrease in the net asset value of the Fund. Although under normal circumstances at least 65% of the Fund's Managed Assets will be invested in Senior Loans that are secured by specific collateral, there can be no assurance that liquidation of such collateral would satisfy the Borrower's obligation in the event of non-payment of scheduled interest or principal or that such collateral could be readily liquidated. In the event of bankruptcy of a Borrower, the Fund could experience delays or limitations with respect to its ability to realize the benefits of any collateral securing a Senior Loan. The Fund is subject to the same inherent risks described above with respect to issuers of other debt instruments in which the Fund may invest, although it is not expected that those debt instruments will be secured by collateral.

Senior Loan Interest Rate Risk. Because the interest rates of Senior Loans reset frequently, if market interest rates fall, the loans' interest rates will be reset to lower levels, potentially reducing the Fund's income. Because both Senior Loans and the Fund's preferred shares, if any, and Borrowings generally pay interest or dividends based on short-term market interest rates, the Fund's investments in Senior Loans may potentially offset the leverage risks borne by the Fund relating to the fluctuations on Common Share income due to variations in the preferred share dividend rate and/or the interest rate on Borrowings. See Use of Leverage. The Fund is subject to the same inherent risks described above with respect to other adjustable rate debt instruments in which the Fund may invest.

Participation Risks. The Fund also may purchase a participation interest in a Senior Loan and by doing so acquire some or all of the interest of a bank or other lending institution in a Senior Loan to a Borrower. A participation typically will result in the Fund having a contractual relationship only with the lender, not the Borrower. As a result, the Fund assumes the credit risk of the lender selling the participation in addition to the credit risk of the Borrower. By purchasing a participation, the Fund will have the right to receive payments of principal, interest and any fees to which it is entitled only from the lender selling the participation and only upon receipt by the lender of the payments from the Borrower. See Risk Factors Senior Loan Risks Participation Risk and Risk Factors Below Investment Grade Risk.

Prepayment Risk. During periods of declining interest rates or for other purposes, Borrowers may exercise their option to prepay principal earlier than scheduled, forcing the Fund to reinvest in lower yielding securities. This is known as call or prepayment risk.

Other Risks Associated with Senior Loans. Many Senior Loans in which the Fund may invest may not be rated by an NRSRO, generally will not be registered with the Securities and Exchange Commission and generally will not be listed on a securities exchange. In addition,

the amount of public information available with respect to Senior Loans generally may be less extensive than that available for registered and exchange-listed securities. Economic and other events (whether real or perceived) can reduce the demand for certain Senior Loans or Senior Loans generally, which may reduce market prices and cause the Fund's net asset value per share to fall. The frequency and magnitude of such changes cannot be predicted. No active trading market currently exists for some Senior Loans in which the Fund may invest and, thus, those loans may be illiquid. As a result, such Senior Loans generally are more difficult to value than more liquid securities for which a trading market exists.

Below Investment Grade Risk. The Fund may invest up to 100% of its assets in Senior Loans and other securities that are below investment grade or that are unrated but judged to be of comparable quality. Securities of below investment grade quality are regarded as having predominately speculative characteristics with respect to capacity to pay interest and repay principal, and are commonly referred to as junk bonds. Issuers of lower rated securities may be highly leveraged and may not have available to them more traditional methods of financing. The prices of these lower grade securities are typically more sensitive to negative developments, such as a decline in the issuer's revenues or a general economic downturn, than are the prices of higher rated securities. The secondary market for lower rated securities, including some Senior Loans, may not be as liquid as the secondary market for more highly rated securities, a factor which may have an adverse effect on the Fund's ability to dispose of a particular security. See Risk Factors Below Investment Grade Risk.

Non-U.S. Issuer Risk. The Fund may invest up to 20% of its Managed Assets in U.S. dollar denominated Senior Loans of Borrowers that are organized or located in countries outside the United States. Although the Senior Loans will require payment of interest and principal in U.S. dollars, these Borrowers may have significant non-U.S. dollar revenues. Investment in foreign Borrowers involves special risks, including that foreign Borrowers may be subject to:

less rigorous regulatory requirements and accounting and reporting requirements than U.S. Borrowers;

differing legal systems and laws relating to creditors' rights;

the potential inability to enforce legal judgments;

economic adversity that would result if the value of the Borrower's non-U.S. dollar-denominated revenues and assets were to fall (in U.S. dollar-denominated terms) because of fluctuations in currency values; and

the potential for political, social and economic adversity in the foreign Borrower's country.

See Risk Factors Non-U.S. Issuer Risk.

Credit Risks Associated with Investments in Participations. The Fund may acquire from a Lender a portion of the Lender's rights under a loan agreement. This is commonly referred to as purchasing a Participation in a Senior Loan. The Fund does not currently intend to invest more than 20% of its total assets in Participations. Under a Participation, the Fund generally will have rights that are more limited than the rights of Lenders or of persons who acquire a Senior Loan by Assignment (as defined below). In a Participation, the Fund typically has a contractual relationship with the Lender selling the Participation, but not with the Borrower. If the Lender selling the Participation becomes insolvent, the Fund may be treated as a general creditor of such Lender, and may not have any exclusive or senior claim with respect to such Lender's interest in, or the collateral with respect to, the Senior Loan. As a result, the Fund assumes the credit risk of the Lender selling the Participation in addition to the credit risk of the Borrower. The Fund may pay a fee or forgo a portion of interest payments when acquiring Participations or purchase assignments or novations (Assignments). A Lender selling a Participation and other persons interpositioned between the Lender and the Fund with respect to a Participation will likely conduct their principal business activities in the banking, finance and financial services industries. Because the Fund may invest in Participations, the Fund may be more susceptible than a fund without such a policy to any single economic, political or regulatory occurrence affecting such industries. The Fund intends to take measures which it believes will reduce its exposure to such risks but no assurances can be given as to their effectiveness. See The Fund's Investments.

Interest Rate Risk. When interest rates decline, the value of a portfolio invested in fixed-rate obligations can be expected to rise. Conversely, when interest rates rise, the value of a portfolio invested in fixed-rate obligations can be expected to decline. Although the Fund's net asset value will vary, the Adviser expects the Fund's policy of acquiring primarily interests in floating rate Senior Loans to minimize fluctuations in net asset value resulting from changes in market interest rates. However, because floating or variable rates on Senior Loans only reset periodically, changes in prevailing interest rates can be expected to cause some fluctuations in the Fund's net asset value. Similarly, a sudden and significant increase in market interest rates may cause a decline in the Fund's net asset value. See Risk Factors Investment and Market Risk and Risk Factors Interest Rate Risk.

Income Risk. The Fund invests primarily in Senior Loans whose interest rates reset frequently. If market interest rates fall, these interest rates will be reset at lower levels, reducing the Fund's income and in turn, dividends paid to holders of Common Shares.

Portfolio Liquidity. No active trading market currently exists for many of the Senior Loans in which the Fund will invest. Senior Loans are thus relatively illiquid. Liquidity relates to the ability of the Fund to sell an investment in a timely manner at a price approximately equal to its value on the Fund's books. The illiquidity of Senior Loans may impair the Fund's ability to realize the full value of its assets in the event of a voluntary or involuntary liquidation of such assets, and the Fund may suffer capital losses as a result. The market for relatively illiquid securities could be disrupted in the event of an economic downturn or a substantial increase or decrease in interest rates. Although the Fund believes that investing in adjustable rate Senior Loans should limit fluctuations in the Fund's net asset value from changes in interest rates, extraordinary and sudden changes in market interest rates could disrupt the market for Senior Loans and result in fluctuations in the Fund's net asset value. See "The Fund's Investments" and "Net Asset Value."

A substantial portion of the Fund's assets may be invested in relatively illiquid Senior Loan interests. However, many of the Senior Loans in which the Fund expects to invest are of a relatively large principal amount and are held by a relatively large number of financial institutions which should, in the Adviser's opinion, enhance the relative liquidity of such interests. The risks associated with illiquidity are particularly acute in situations where the Fund's operations require cash, such as when, based on a Board determination, the Fund makes open market repurchases or tender offers for its Common Shares, or if the Adviser considers it advantageous to increase the percentage of the Fund's portfolio invested in high quality, short-term securities. See "The Fund's Investments."

Leverage Risk. The use of financial leverage created through borrowing or any future issuance of preferred shares creates an opportunity for increased Common Share net income and returns, but also creates special risks for Common Shareholders. There is no assurance that the Fund's leveraging strategy will be successful. The risk of loss attributable to the Fund's use of leverage is borne by Common Shareholders. The Fund's use of financial leverage can result in a greater decrease in net asset values in declining markets. The Fund's use of financial leverage similarly can magnify the impact of changing market conditions on Common Share market prices. See "Risk Factors - Leverage Risk."

Because the long-term debt securities in which the Fund invests generally pay fixed rates of interest while the Fund's costs of leverage generally fluctuate with short- to intermediate term yields, the incremental earnings from leverage will vary over time. However, the Fund may use derivatives, such as interest rate swaps, to fix the effective rate paid on all or a portion of the Fund's leverage, in an effort to lower leverage costs over an extended period. Accordingly, the Fund cannot assure you that

the use of leverage will result in a higher yield or return to Common Shareholders. The income benefit from leverage will be reduced to the extent that the difference narrows between the net earnings on the Fund's portfolio securities and its cost of leverage. The income benefit from leverage will increase to the extent that the difference widens between the net earnings on the Fund's portfolio securities and its cost of leverage. If short- or intermediate-term rates rise, the Fund's cost of leverage could exceed the fixed rate of return on longer-term bonds held by the Fund that were acquired during periods of lower interest rates, reducing income and returns to Common Shareholders. This could occur even if short-term or intermediate-term and long-term municipal rates rise. Because of the costs of leverage, the Fund may incur losses even if the Fund has positive returns if they are not sufficient to cover the costs of leverage. The Fund's cost of leverage includes interest on borrowing, or dividends paid on preferred shares, if issued in the future, as well as any one-time costs (e.g., issuance costs) and ongoing fees and expenses associated with such leverage.

The Fund has issued preferred shares in the past, but as of March 31, 2012 no preferred shares were outstanding. The Fund may again in the future issue certain types of preferred securities to increase the Fund's leverage.

Furthermore, the amount of fees paid to Nuveen Fund Advisors for investment advisory services will be higher if the Fund uses leverage because the fees will be calculated based on the Fund's Managed Assets this may create an incentive for Nuveen Fund Advisors to leverage the Fund.

The Fund may invest in the securities of other investment companies, which may themselves be leveraged and therefore present similar risks to those described above.

Regulatory Risk. To the extent that legislation or state or federal regulators that regulate certain financial institutions impose additional requirements or restrictions with respect to the ability of such institutions to make loans, particularly in connection with highly leveraged transactions, the availability of Senior Loans for investment may be adversely affected. Further, such legislation or regulation could depress the market value of Senior Loans.

Market Disruption Risk. Certain events have a disruptive effect on the securities markets, such as terrorist attacks (including the terrorist attacks in the U.S. on September 11, 2001), war and other geopolitical events. The Fund cannot predict the effects of similar events in the future on the U.S. economy. Lower rated securities and securities of Issuers with smaller market capitalizations tend to be more volatile than higher rated securities and securities of Issuers with larger market capitalizations so that these events and any actions resulting

from them may have a greater impact on the prices and volatility of lower rated securities and securities of Issuers with smaller market capitalizations than on higher rated securities and securities of Issuers with larger market capitalizations.

Inflation Risk. Inflation risk is the risk that the value of assets or income from investments will be worth less in the future as inflation decreases the value of money. As inflation increases, the real value of the Common Shares and distributions can decline. See Risk Factors Inflation Risk.

Deflation Risk. Deflation risk is the risk that prices throughout the economy decline over time, which may have an adverse effect on the market valuation of companies, their assets and revenues. In addition, deflation may have an adverse effect on the creditworthiness of Issuers and may make Issuer default more likely, which may result in a decline in the value of the Fund's portfolio. See Risk Factors Definition Risk.

Derivatives Risk, Including the Risk of Swaps. The Fund's use of derivatives involves risks different from, and possibly greater than, the risks associated with investing directly in the investments underlying the derivatives. Whether the Fund's use of derivatives is successful will depend on, among other things, if Symphony correctly forecasts market values, interest rates and other applicable factors. If Symphony incorrectly forecasts these and other factors, the investment performance of the Fund will be unfavorably affected. In addition, the derivatives market is largely unregulated. It is possible that developments in the derivatives market could adversely affect the Fund's ability to successfully use derivative instruments.

The Fund may enter into debt-related derivatives instruments including credit swap default contracts and interest rate swaps. Like most derivative instruments, the use of swaps is a highly specialized activity that involves investment techniques and risks different from those associated with ordinary portfolio securities transactions. In addition, the use of swaps requires an understanding by Symphony not only of the referenced asset, rate or index, but also of the swap itself. See Risk Factors Derivatives Risk, Including the Risk of Swaps, Risk Factors Counterparty Risk, Hedging Transactions and the Statement of Additional Information.

Counterparty Risk. The Fund may be subject to credit risk with respect to the counterparties to certain derivative agreements entered into by the Fund. If a counterparty becomes bankrupt or otherwise fails to perform its obligations under a derivative contract due to financial difficulties, the Fund may experience significant delays in obtaining any recovery under the derivative contract in a bankruptcy or other reorganization proceeding. The Fund may obtain only a limited recovery or may obtain no recovery in such circumstances. See Risk Factors Counterparty Risk.

Reliance on Investment Adviser. The Fund is dependent upon services and resources provided by its investment adviser, NFA, and therefore the investment adviser's parent, Nuveen Investments. Nuveen Investments has a substantial amount of indebtedness. Nuveen Investments, through its own business or the financial support of its affiliates, may not be able to generate sufficient cash flow from operations or ensure that future borrowings will be available in an amount sufficient to enable it to pay its indebtedness with scheduled maturities beginning in 2014 or to fund its other liquidity needs. Nuveen Investments' failure to satisfy the terms of its indebtedness, including covenants therein, may generally have an adverse effect on the financial condition of Nuveen Investments.

Anti-Takeover Provisions. The Fund's Declaration of Trust (the Declaration) and the Fund's By-laws (the By-laws) include provisions that could limit the ability of other entities or persons to acquire control of the Fund or convert the Fund to open-end status. These provisions could have the effect of depriving the Common Shareholders of opportunities to sell their Common Shares at a premium over the then current market price of the Common Shares. See Certain Provisions in the Declaration of Trust and Risk Factors Anti-Takeover Provisions.

Non-Diversification. Because the Fund is classified as non-diversified under the 1940 Act it can invest a greater portion of its assets in obligations of a single Issuer. As a result, the Fund will be more susceptible than a more widely diversified fund to any single corporate, economic, political or regulatory occurrence. The Fund does not intend to invest, however, more than 5% of the value of its assets in interests in Senior Loans of a single Borrower. See The Fund's Investments. In addition, the Fund must satisfy certain asset diversification rules in order to qualify as a regulated investment company for federal income tax purposes.

In addition, an investment in the Fund's Common Shares raises other risks, which are more fully disclosed in the Risk Factors section of this Prospectus, including: reinvestment risk, special risks relating to certain illiquid securities, market disruption risk, impact of offering methods risk, risks relating to certain affiliations, and risks that provisions in the Fund's Declaration of Trust could affect the opportunities of Common Shareholders to sell their Common Shares. See Risk Factors.

Distributions

The Fund pays monthly cash distributions to Common Shareholders at a level rate (stated in terms of a fixed cents per Common Share dividend rate) based on the projected performance of the Fund. The Fund's ability to maintain a level Common Share dividend rate will depend on a number of factors. As portfolio and market conditions change, the rate of dividends on the Common Shares and the Fund's dividend policy could change. Over time, the Fund will distribute all of its net investment income. In addition, the Fund intends to

effectively distribute, at least annually, the net capital gain and taxable ordinary income, if any, to Common Shareholders so long as the net capital gain and taxable ordinary income are not necessary to pay accrued dividends on, or redeem or liquidate, any preferred shares then outstanding or pay any interest and required principal payments on borrowings. You may elect to reinvest automatically some or all of your distributions in additional Common Shares under the Fund's Dividend Reinvestment Plan.

As explained more fully below in Tax Matters, at least annually, the Fund may elect to retain rather than distribute all or a portion of any net capital gain (which is the excess of net long-term capital gain over net short-term capital loss) otherwise allocable to Common Shareholders and pay federal income tax on the retained gain. As provided under federal tax law, Common Shareholders of record as of the end of the Fund's taxable year will include their attributable share of the retained gain in their income for the year as a long-term capital gain, and will be entitled to an income tax credit or refund for the tax deemed paid on their behalf by the Fund. The Fund will treat the retained capital gain amount as a substitute for equivalent cash distributions. See Distributions and Dividend Reinvestment Plan.

The Fund reserves the right to change its distribution policy and the basis for establishing the rate of its monthly distributions at any time.

Custodian and Transfer Agent

State Street Bank and Trust Company serves as custodian and transfer agent of the Fund's assets. See Custodian and Transfer Agent.

Special Tax Considerations

Dividends with respect to the Common Shares generally will not constitute qualified dividend income for federal income tax purposes and thus generally will not be eligible for taxation at long-term capital gain tax rates (except in the case of capital gain dividends). See Tax Matters.

Voting Rights

The Fund has issued preferred shares in the past, but as of March 31, 2012, no preferred shares were outstanding. The Fund may again in the future issue certain types of preferred securities to increase the Fund's leverage. In that event, such preferred securities, voting as a separate class, would have the right to elect at least two trustees at all times and to elect a majority of the trustees in the event two full years' dividends on the preferred shares are unpaid. In each case, the remaining trustees would be elected by holders of Common Shares and preferred shares, voting together as a single class. The holders of preferred shares would vote as a separate class or classes on certain other matters as required under the Declaration, the Investment Company Act of 1940, as amended (the 1940 Act) and Massachusetts law. See Description of Shares Preferred Shares Voting Rights and Certain Provisions in the Declaration of Trust.

SUMMARY OF FUND EXPENSES

The purpose of the table below is to help you understand all fees and expenses that you, as a Common Shareholder, would bear directly or indirectly. The table shows the expenses of the Fund as a percentage of the average net assets applicable to Common Shares, and not as a percentage of total assets or Managed Assets.

Shareholder Transaction Expenses (as a percentage of offering price)	
Maximum Sales Charge	4.00%
	As a Percentage of Net Assets Attributable to Common Shares
<hr/>	
Annual Expenses	
Management Fees(1)	1.12%
Interest Payments on Borrowings(2)	0.53%
Other Expenses(1)	0.24%
	<hr/>
Total Annual Expenses	1.89%
	<hr/>

- (1) Stated as a percentage of average net assets attributable to Common Shares for the six months ended January 31, 2012.
- (2) Interest Payments on Borrowings assumes an annual interest rate of 0.36% on a \$100,000,000 borrowing; and an annual Undrawn Fee of 0.15% and an annual Drawn Fee of 0.75% on a \$109,000,000 facility.

The purpose of the table above is to help you understand all fees and expenses that you, as a Common Shareholder, would bear directly or indirectly. See Management of the Fund Investment Adviser and Subadviser.

Examples

The following examples illustrate the expenses (including the applicable transaction fees, if any) that a shareholder would pay on a \$1,000 investment that is held for the time periods provided in the table. Each example assumes that all dividends and other distributions are reinvested in the Fund and that the Fund's Total Annual Expenses, as provided above, remain the same. The examples also assume a 5% annual return⁽¹⁾

Example # 1 (At-the-Market Transaction)

The following example assumes a transaction fee of 1.00%, as a percentage of the offering price.

1 Year

3 Years

5 Years

10 Years

Edgar Filing: NUVEEN SENIOR INCOME FUND - Form 486BPOS

\$29	\$ 69	\$ 111	\$ 229
------	-------	--------	--------

Example # 2 (Underwriting Syndicate Transaction)

The following example assumes a transaction fee of 4.00%, as a percentage of the offering price.

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
\$58	\$ 97	\$ 138	\$ 252

Example # 3 (Privately Negotiated Transaction)

The following example assumes there is no transaction fee.

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
\$19	\$ 59	\$ 102	\$ 221

The examples should not be considered a representation of future expenses. Actual expenses may be greater or less than those shown above.

- (1) The examples assume that all dividends and distributions are reinvested at Common Share net asset value. Actual expenses may be greater or less than those assumed. Moreover, the Fund's actual rate of return may be greater or less than the hypothetical 5% return shown in the example.

FINANCIAL HIGHLIGHTS

The following Financial Highlights table is intended to help a prospective investor understand the Fund's financial performance for the periods shown. Certain information reflects financial results for a single Common Share of the Fund. The total returns in the table represent the rate an investor would have earned or lost on an investment in Common Shares of the Fund (assuming reinvestment of all dividends). The information with respect to the fiscal year ended July 31, 2011 has been audited by Ernst & Young LLP, whose report for the fiscal year ended July 31, 2011, along with the financial statements of the Fund including the Financial Highlights for each of the periods indicated therein, are included in the Fund's 2011 Annual Report. Also included is selected data for the six months ended January 31, 2012, which is unaudited, and appears in the Fund's 2012 Semi-Annual Report. A copy of the 2011 Annual Report and 2012 Semi-Annual Report may be obtained from www.sec.gov or by visiting www.nuveen.com. The information contained in, or that can be accessed through, the Fund's website is not part of this prospectus. Past results are not indicative of future performance.

The following per share data and ratios have been derived from information provided in the financial statements.

Selected data for a Common Share outstanding throughout the period:

BORROWINGS AT END OF PERIOD

Aggregate Amount Outstanding (000)	\$ 75,500	\$ 73,950	\$ 73,950	\$ 32,900	\$ 90,000
Asset Coverage Per \$1,000	\$ 3,960	\$ 4,083	\$ 3,749	\$ 6,955	\$ 3,892

- (a) Per share Net Investment Income (Loss) is calculated using the average daily shares method.
- (b) Borrowings Interest Expense includes all interest expense and other costs related to borrowings, amortization of borrowing costs, where applicable. For the periods prior to July 31, 2007, the Ratios of Borrowings Interest Expense to Average Net Assets Applicable to Common Shares does not include program and liquidity fees.
- (c) Each ratio of Net Investment Income (Loss) includes the effect of the increase of the net realizable value of the receivable for matured senior loans as described in Footnote 1 General Information and Significant Accounting Policies, Matured Senior Loans, in the most recent shareholder report. For the fiscal period ended January 31, 2012 and the fiscal years ended July 31, 2011 and July 31, 2010, the increase (decrease) to the Ratios of Net Investment Income (Loss) to Average Net Assets Applicable to Common Shares were (0.03%)****, 0.02% and 0.09%, respectively. Prior to the fiscal year ended July 31, 2010 the Fund had no matured senior loans.
- (d) For the six months ended January 31, 2012. Unaudited.
- (e) Unaudited.

* Total Return Based on Market Value is the combination of changes in the market price per share and the effect of reinvested dividend income and reinvested capital gains distributions, if any, at the average price paid per share at the time of reinvestment. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending market price. The actual reinvestment for the last dividend declared in the period may take place over several days, and in some instances may not be based on the market price, so the actual reinvestment price may be different from the price used in the calculation. Total returns are not annualized.

Total Return Based on Common Share Net Asset Value is the combination of changes in Common share net asset value, reinvested dividend income at net asset value and reinvested capital gains distributions at net asset value, if any. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending net asset value. The actual reinvest price for the last dividend declared in the period may often be based on the Fund's market price (and not its net asset value), and therefore may be different from the price used in the calculation. Total returns are not annualized.

THE FUND

The Fund is a non-diversified, closed-end management investment company registered under the 1940 Act. The Fund was organized as a Massachusetts business trust on August 13, 1999, pursuant to a Declaration of Trust (the Declaration) governed by the laws of the Commonwealth of Massachusetts. On October 26, 1999, the Fund issued an aggregate of 26,000,000 Common Shares of beneficial interest, par value \$0.01 per share, pursuant to the initial public offering thereof. On November 16, 1999 and December 10, 1999, the Fund issued an additional 2,000,000 and 1,600,000 Common Shares, respectively, in connection with partial exercises by the underwriters of their over-allotment option. On August 17, 2010, the Fund registered an additional 2.9 million Common Shares. As of April 30, 2012, 332,178 Common Shares remain and are being offered hereunder. The Fund's Common Shares are listed on the NYSE under the symbol NSL.

The following provides information about the Fund's outstanding Common Shares as of March 31, 2012.

Title of Class	Amount Authorized	Amount Held by the Fund or for its Account	Amount Outstanding
Common	unlimited	0	32,431,524

Edgar Filing: NUVEEN SENIOR INCOME FUND - Form 486BPOS

The Fund's principal office is located at 333 West Wacker Drive, Chicago, Illinois 60606, and its telephone number is (800) 257-8787.

USE OF PROCEEDS

The net proceeds from the issuance of Common Shares hereunder will be used by the Fund to (i) invest in securities in accordance with the Fund's investment objective and policies as stated below and/or (ii) reduce the Fund's financial leverage outstanding. To the extent the Fund uses the net proceeds of any offering to invest in

securities, it is presently anticipated that the Fund will be able to invest substantially all of such proceeds in securities that meet the Fund's investment objective and policies within one month from the date on which the proceeds from an offering are received by the Fund. Pending such investment, it is anticipated that the proceeds will be invested in short-term or long-term securities issued by the U.S. Government and its agencies or instrumentalities or in high-quality, short-term money market instruments.

THE FUND'S INVESTMENTS

Investment Objective and Policies

The Fund's investment objective is to achieve a high level of current income, consistent with preservation of capital. There can be no assurance that the Fund's investment objective will be achieved.

In pursuing its objective of high current income, the Fund will invest primarily in adjustable rate U.S. dollar denominated secured Senior Loans. Investment in such floating rate instruments is expected to minimize changes in the underlying principal value of the Senior Loans, and therefore the Fund's net asset value, resulting from changes in market interest rates. The Borrowers of such Senior Loans operate in a variety of industries and geographical regions.

Under normal circumstances, the Fund will invest at least 80% of its total assets in adjustable rate, U.S. dollar-denominated, secured and unsecured Senior Loans, which unsecured Senior Loans will be, at the time of investment, investment grade quality. The Fund will invest at least 65% of its total assets in Senior Loans that are secured by specific collateral. The Fund may invest up to 20% of its total assets in U.S. dollar-denominated Senior Loans of Borrowers that are organized or located in countries outside the United States. The Fund may invest up to 20% of its total assets, in the aggregate, in:

other income producing securities such as investment and non-investment grade corporate debt securities, high-quality, short-term debt securities; and

equity securities and warrants acquired in connection with the Fund's investments in Senior Loans.

If the Adviser determines that market conditions temporarily warrant a defensive investment policy, the Fund may invest, subject to its ability to liquidate its relatively illiquid portfolio of Senior Loans, up to 100% of its assets in cash and high-quality, short-term debt securities.

The Fund's policy under normal circumstances of investing at least 80% of its total assets in adjustable rate, U.S. dollar-denominated, secured and unsecured Senior Loans, which unsecured Senior Loans will be, at the time of investment, investment grade quality, is not considered to be fundamental by the Fund and can be changed without a vote of the Common Shareholders. However, this policy may only be changed by the Fund's Board upon 60 days prior written notice to Common Shareholders.

The Fund cannot change its investment objective without the approval of the holders of a majority of the outstanding Common Shares and preferred shares voting together as a single class, and of the holders of a majority of the outstanding preferred shares voting as a separate class. When used with respect to particular shares of the Fund, a majority of the outstanding shares means (i) 67% or more of the shares present at a meeting, if the holders of more than 50% of the shares are present or represented by proxy or (ii) more than 50% of the shares, whichever is less.

Edgar Filing: NUVEEN SENIOR INCOME FUND - Form 486BPOS

See Description of Shares Preferred Shares Voting Rights and the Statement of Additional Information under Description of Shares Preferred Shares Voting Rights for additional information with respect to the voting rights of holders of preferred shares.

Overall Fund Management

NFA oversees Symphony in its management of the Fund's portfolio. This oversight includes ongoing evaluation of Symphony's investment performance, portfolio allocations, quality of investment process and personnel, compliance with Fund and regulatory guidelines, trade allocation and execution, and other factors.

NFA also oversees the Fund's use of leverage, and efforts to minimize the costs and mitigate the risks to Common Shareholders associated with using financial leverage. See *Use of Leverage* and *Hedging Transactions*. This may involve making adjustments to investment policies in an attempt to minimize costs and mitigate risks.

Symphony Investment Philosophy and Process

Investment Philosophy. Symphony believes that managing risk, particularly for volatile assets such as Senior Loans and other forms of high yield debt, is of paramount importance. Symphony believes that a combination of fundamental credit analysis and valuation information that is available from the equity markets provide a means of identifying what it believes to be superior investment candidates. Additionally, Symphony focuses primarily on liquid securities to help ensure that exit strategies remain available under different market conditions.

Investment Process. In identifying Senior Loans and other securities for potential purchase, Symphony combines quantitative screening and fundamental and relative value analysis. Symphony evaluates the identified investment candidates for liquidity constraints and favorable capital structures. The investment team then performs rigorous bottom-up fundamental analysis to identify investments with sound industry fundamentals, cash flow sufficiency and asset quality. The final portfolio is constructed using risk management and monitoring systems to ensure proper diversification.

Portfolio Composition and Other Information

The Fund's portfolio is composed principally of the following investments. A more detailed description of the Fund's investment policies and restrictions and more detailed information about the Fund's portfolio investments are contained in the Statement of Additional Information.

Senior Loans

General Description. Senior Loans generally are negotiated between a Borrower and the Lenders represented by one or more Lenders acting as agent (*Agent*) of all the Lenders. The Agent is responsible for negotiating the loan agreement (*Loan Agreement*) that establishes the terms and conditions of the Senior Loan and the rights of the Borrower and the Lenders. The Agent is paid a fee by the Borrower for its services.

Rates of Interest. Interest rates on Senior Loans adjust periodically. The interest rates are adjusted based on a base rate plus a premium or spread over the base rate. The base rate usually is the London Inter-Bank Offered Rate (*LIBOR*), the prime rate offered by one or more major United States banks (the *Prime Rate*) or the certificate of deposit (*CD*) rate or other base lending rates used by commercial lenders. LIBOR, as provided for in Loan Agreements, usually is an average of the interest rates quoted by several designated banks as the rates at which they pay interest to major depositors in the London Inter-Bank market on U.S. dollar-denominated deposits. The Adviser believes that changes in short-term LIBOR rates are closely related to changes in the Federal Reserve federal funds rate, although the two are not technically linked. The Prime Rate quoted by a major U.S. bank is generally the interest rate at which that bank is willing to lend U.S. dollars to its most creditworthy borrowers, although it may not be the bank's lowest available rate. The CD rate, as provided for in Loan Agreements, usually is the average rate paid on large certificates of deposit traded in the secondary market.

Interest rates on Senior Loans may adjust daily, monthly, quarterly, semi-annually or annually. The Fund will not invest more than 10% of its total assets in Senior Loans with interest rates that adjust less often than semi-annually. The Fund's portfolio of Senior Loans will at all times

Edgar Filing: NUVEEN SENIOR INCOME FUND - Form 486BPOS

have a dollar-weighted average time until the next interest rate adjustment of 90 days or less. The Fund may use interest rate swaps and other investment practices to shorten the effective interest rate adjustment period of Senior Loans. If the Fund does so, it considers the shortened period to be the adjustment period of the Senior Loans.

When interest rates decline, the value of a portfolio invested in fixed-rate obligations can be expected to rise. Conversely, when interest rates rise, the value of a portfolio invested in fixed-rate obligations can be expected to decline. Although the Fund's net asset value will vary, the Fund's management expects the Fund's policy of acquiring interests in Senior Loans, the interest rates on which are adjustable, to limit fluctuations in net asset value as a result of changes in interest rates. Accordingly, the value of the Fund's portfolio fluctuates less than a portfolio of fixed-rate, longer-term obligations as a result of interest rate changes. However, changes in prevailing interest rates can be expected to cause some fluctuation in the Fund's net asset value. In addition to changes in interest rates, changes in the credit quality of Borrowers (and Lenders where the Fund holds a Participation) also affect the Fund's net asset value. Furthermore, a serious deterioration in the credit quality of one or more Borrowers could cause a prolonged or permanent decrease in the Fund's net asset value. Fluctuations in net asset value would be magnified as a result of the Fund's use of leverage.

Maturity. The Fund has no policy limiting the maturity of the Senior Loans that it purchases. Senior Loans usually have mandatory and optional prepayment provisions. Because of prepayments, the actual remaining maturity of Senior Loans may be considerably less than their stated maturity.

Protective Provisions of Senior Loans. Secured Senior Loans generally have the most senior position in a Borrower's capital structure, although some Senior Loans may hold an equal ranking with other senior securities of the Borrower. The capital structure of a Borrower may include Senior Loans, senior and junior subordinated debt (which may include junk bonds), preferred stock and common stock issued by the Borrower, typically in descending order of seniority with respect to claims on the Borrower's assets.

Senior Loans generally are secured by specific collateral, which may include guarantees. In order to borrow money pursuant to collateralized Senior Loans, a Borrower will frequently, for the term of the Senior Loan, pledge as collateral assets such as trademarks, accounts receivable, inventory, buildings, real estate, franchises and common and preferred stock in its subsidiaries. In addition, in the case of some Senior Loans, there may be additional collateral pledged in the form of guarantees or other credit support by and/or securities of affiliates of the Borrowers. In certain instances, a collateralized Senior Loan may be secured only by stock in the Borrower or its subsidiaries.

Collateral may consist of assets that may not be readily liquidated, and there is no assurance that the liquidation of such assets would satisfy fully a Borrower's obligations under a Senior Loan. The Fund may invest in Senior Loans which are not secured by any collateral, subject to the limitations set forth under The Fund's Investments Investment Objective and Policies. Senior Loans that are not secured by specific collateral generally pose a greater risk of non-payment of interest or loss of principal than do collateralized Senior Loans.

Loan Agreements may include various restrictive covenants designed to limit the activities of the Borrower in an effort to protect the right of the Lenders to receive timely payments of interest on and repayment of principal of the Senior Loans. Restrictive covenants may include mandatory prepayment provisions arising from excess cash flows and typically include restrictions on dividend payments, specific mandatory minimum financial ratios, limits on total debt and other financial tests. Breach of such covenants, if not waived by the Lenders, is generally an event of default under the applicable Loan Agreement and may give the Lenders the right to accelerate principal and interest payments. When the Fund holds a Participation in a Senior Loan it may not have the right to vote to waive enforcement of any restrictive covenant breached by a Borrower. Lenders voting in connection with a potential waiver of a restrictive covenant may have interests different from those of the Fund and such Lenders may not consider the interests of the Fund in connection with their votes. Investing in Senior Loans involves investment risk despite these covenants, and some Borrowers default on their Senior Loan payments.

Borrowers. Borrowers operate in a variety of industries and geographic regions. The Fund does not intend to invest more than 10% of its total assets in Senior Loans of a single Borrower. In addition, the Fund will not invest more than 25% of its total assets in Borrowers that conduct their principal businesses in the same industry. Most Senior Loans are made to U.S. Borrowers.

The Fund may, however, invest up to 20% of its total assets in Senior Loans made to Borrowers organized or located outside the U.S. These Senior Loans must be U.S. dollar-denominated. Investing in the Senior Loans of foreign Borrowers involves special risks. See Risk Factors Non-U.S. Issuer Risk.

The capital structure of a Borrower may include Senior Loans, senior and junior subordinated debt (which may include junk bonds), preferred stock and common stock. Senior Loans typically have the most senior claim on Borrower's assets and common stock the most junior claim. The proceeds of Senior Loans that the Fund will purchase usually will be used by Borrowers to finance leveraged buyouts, recapitalizations, mergers, acquisitions, stock repurchases, debt refinancings and, to a lesser extent, for general operating and other purposes.

Although Senior Loans have the most senior position in a Borrower's capital structure and are usually secured by specific collateral, they are typically below investment grade quality and may have below investment grade ratings; these ratings are associated with securities having speculative characteristics. See Risk Factors Portfolio Liquidity. The Fund may purchase and retain in its portfolio Senior Loans of Borrowers that have filed for protection under the federal bankruptcy laws or that have had involuntary bankruptcy petitions filed against them by creditors. You should expect the Fund's net asset value to fluctuate as a result of changes in the credit quality of Borrowers and other factors. A serious deterioration in the credit quality of one or more Borrowers could cause a permanent decrease in the Fund's net asset value.

There is no minimum rating or other independent evaluation of a Borrower or its securities limiting the Fund's investments. Senior Loans may not be rated by any rating agency at the time the Fund purchases the Senior Loan. The lack of a rating does not necessarily imply that a Senior Loan is of lesser investment quality; however, most Senior Loans, when rated, are below investment grade quality. There is no limit on the percentage of the Fund's assets that may be invested in Senior Loans that are rated below investment grade or that are unrated but of comparable quality.

The Senior Loan Process.

The Fund normally relies on the Agent to collect principal and interest payments on a Senior Loan. Furthermore, the Fund also relies in part on the Agent to monitor compliance by the Borrower with the restrictive covenants in the Loan Agreement and to notify the Fund (or the Lender from which the Fund has purchased a Participation) of any adverse change in the Borrower's financial condition. The Fund will act as a Lender with respect to a syndicated Senior Loan only where the Agent, at the time of the Fund's investment, has outstanding debt or deposit obligations rated investment grade by a rating agency, or where such debt or obligations are unrated but determined by the Adviser to be of comparable quality. A rating agency's top four major rating categories generally are considered to be investment grade. The lowest tier of investment grade rating is considered to have speculative characteristics. The Fund will not purchase interests in Senior Loans unless the Agent, Lender and any other person positioned between the Fund and the Borrower has entered into an agreement that provides for the holding of assets in safekeeping for, or the prompt disbursement of assets to, the Fund. Insolvency of the Agent or other persons positioned between the Fund and the Borrower could result in losses for the Fund. See Risk Factors.

The Fund may be required to pay and may receive various fees and commissions in connection with purchasing, selling and holding interests in Senior Loans. The fees normally paid by Borrowers include three primary types: facility fees, commitment fees and prepayment penalties. Facility fees are paid to Lenders when a Senior Loan is originated. Commitment fees are paid to Lenders on an ongoing basis based on the unused portion of a Senior Loan commitment. Lenders may receive prepayment penalties when a Borrower prepays a Senior Loan. The Fund receives these fees directly from the Borrower if the Fund is an Original Lender (as defined below) or, in the case of commitment fees and prepayment penalties, if the Fund acquires an Assignment. Whether the Fund receives a facility fee in the case of an Assignment, or any fees in the case of a Participation, depends on negotiations between the Fund and the Lender selling such interests. When the Fund buys an

Assignment, it may be required to pay a fee, or forgo a portion of interest and fees payable to it, to the Lender selling the Assignment. Occasionally, the assignor pays a fee to the assignee.

A person selling a Participation to the Fund may deduct a portion of the interest and any fees payable to the Fund as an administrative fee. The Fund may be required to pass along to a person that buys a Senior Loan from the Fund a portion of any fees that the Fund is entitled to. Fees that the Fund occasionally may receive may enhance the Fund's income.

Senior Loan Investments.

The Fund may act as one of the group of Lenders originating a Senior Loan (an Original Lender), act as an Agent, purchase Assignments of portions of Senior Loans from third parties and invest in Participations in Senior Loans.

Senior Loans also include certain foreign debt obligations that are in the form of notes rather than Loan Agreements. All of these interests in Senior Loans are sometimes referred to simply as Senior Loans.

The Fund as Original Lender. When the Fund acts as an Original Lender it may participate in structuring the Senior Loan. The Fund will not act as sole Agent or sole principal negotiator of a Senior Loan. When the Fund is a member of the originating syndicate group for a Senior Loan, it may share in a fee paid to the Original Lenders. When the Fund is an Original Lender it will have a direct contractual relationship with the Borrower, may enforce compliance by the Borrower with the terms of the Loan Agreement and may have rights with respect to any funds acquired by other Lenders through set-off. Lenders also have full voting and consent rights under the applicable Loan Agreement. Action subject to Lender vote or consent generally requires the vote or consent of the holders of some specified percentage of the outstanding principal amount of the Senior Loan. Certain decisions, such as reducing the amount of interest on or principal of a Senior Loan, releasing all or substantially all of the collateral or changing the maturity of a Senior Loan, frequently require the unanimous vote or consent of all Lenders affected.

The Fund as Agent. Acting in the capacity of an Agent in a Senior Loan may subject the Fund to certain risks in addition to those associated with the Fund's role as a Lender. In consideration of such risks, the Fund will invest no more than 20% of its total assets in Senior Loans in which it acts as an Agent or co-Agent, and the size of any such individual Senior Loan will not exceed 5% of the Fund's total assets. The Fund's ability to receive fee income may also be constrained by certain requirements for qualifying as a regulated investment company under the Internal Revenue Code of 1986, as amended (the Code). The Fund intends to comply with those requirements and may limit its investments in Senior Loans in which it acts as Agent in order to do so.

Assignments. The purchaser of an Assignment typically succeeds to all the rights and obligations under the Loan Agreement of the assigning Lender and becomes a Lender under the Loan Agreement. Assignments may, however, be arranged through private negotiations, and the rights and obligations acquired by the purchaser of an Assignment may differ from, and be more limited than, those held by the assigning Lender.

Participations. Participations by the Fund in a Lender's portion of a Senior Loan typically will result in the Fund having a contractual relationship only with such Lender, not with the Borrower. As a result, the Fund may have the right to receive payments of principal, interest and any fees to which it is entitled only from the Lender selling the Participation and only upon receipt by such Lender of such payments from the Borrower. In connection with purchasing Participations, the Fund generally will have no right to enforce compliance by the Borrower with the terms of the Loan Agreement, nor have any rights with respect to any funds acquired by other Lenders through set-off against the Borrower, and the Fund may not directly benefit from the collateral supporting the Senior Loan in which it has purchased the Participation. As a result, the Fund may assume the credit risk of both the Borrower and the Lender selling the Participation. In the event of the insolvency of the Lender

Edgar Filing: NUVEEN SENIOR INCOME FUND - Form 486BPOS

selling a Participation, the Fund may be treated as a general creditor of such Lender. The Fund does not currently intend to invest more than 20% of its total assets in Participations.

The Fund will only acquire Participations if the Lender selling the Participation, and any other persons interpositioned between the Fund and the Lender, (i) at the time of investment has outstanding debt or deposit obligations rated investment grade (BBB or A-3 or higher by Standard & Poor's Corporation (S&P)), Baa or P-3 or higher by Moody's Investor Service, Inc. (Moody's) or BBB or F3 or higher by Fitch IBCA, Inc. (Fitch) or has debt or obligations that are unrated by S&P, Moody's and Fitch and determined by the Adviser to be of comparable quality and (ii) has entered into an agreement which provides for the holding of assets in safekeeping for, or the prompt disbursement of assets to, the Fund. Long-term debt rated BBB by S&P is regarded by S&P as having adequate capacity to pay interest and repay principal, and debt rated Baa by Moody's is regarded by Moody's as a medium grade obligation, i.e., it is neither highly protected nor poorly secured, and debt rated BBB by Fitch is regarded by Fitch as having adequate capacity for timely payment of financial commitments. Commercial paper rated A-3 by S&P indicates that S&P believes such obligations exhibit adequate protection parameters but that adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation, issues of commercial paper rated P-3 by Moody's are considered by Moody's to have an acceptable ability for repayment of short-term debt obligations but the effect of industry characteristics and market compositions may be more pronounced and issues of commercial paper rated F3 by Fitch are considered to be of fair credit quality with an adequate capacity for timely payment of financial commitments but near-term adverse changes could result in a reduction to non-investment grade.

The selling Lenders and other persons interpositioned between such Lenders and the Fund with respect to such Participations will likely conduct their principal business activities in the banking, finance and financial services industries. The Fund may be more susceptible to any single economic, political or regulatory occurrence affecting such industries. Persons engaged in such industries may be more susceptible than are persons engaged in some other industry to, among other things, fluctuations in interest rates, changes in the Federal Open Market Committee's monetary policy, governmental regulations concerning such industries and capital raising activities generally and fluctuations in the financial markets generally.

When the Fund holds a Participation in a Senior Loan, the Fund generally will not have the right to enforce compliance by the Borrower with the Loan Agreement, nor rights to any funds acquired by other Lenders through set-off against the Borrower. In addition, the Fund may not have the right to vote on whether to waive enforcement of any restrictive covenant breached by a Borrower. Lenders voting in connection with a potential waiver of a restrictive covenant may have interests different from those of the Fund and may not consider the interests of the Fund. The Fund may not benefit directly from the collateral supporting a Senior Loan in which it has purchased the Participation, although Lenders that sell Participations generally are required to distribute liquidation proceeds received by them pro rata among the holders of such Participations. For purposes of the Fund's policy of investing at least 80% of its total assets in secured Senior Loans, a Participation in a Senior Loan will be deemed to be secured if the underlying Senior Loan is secured.

Role of Agent. On behalf of the several Lenders, an Agent generally will be required to administer and manage the Senior Loan and, with respect to collateralized Senior Loans, to service or monitor the collateral. In this connection, the valuation of assets pledged as collateral will reflect market value and the Agent may rely on independent appraisals as to the value of specific collateral. The Agent, however, may not obtain an independent appraisal as to the value of assets pledged as collateral in all cases. The Fund normally will rely primarily on the Agent (where the Fund is an Original Lender or owns an Assignment) or the selling Lender (where the Fund owns a Participation) to collect principal of and interest on a Senior Loan.

Furthermore, the Fund usually will rely on the Agent (where the Fund is an Original Lender or owns an Assignment) or the selling Lender (where the Fund owns a Participation) to monitor compliance by the Borrower with the restrictive covenants in the Loan Agreement and notify the Fund of any adverse change in the Borrower's financial condition or any declaration of insolvency.

Loan Agreements may provide for the termination of the Agent's agency status in the event that it fails to act as required under the relevant Loan Agreement, becomes insolvent, enters FDIC receivership or, if not FDIC

insured, enters into bankruptcy. Should such an Agent, Lender or assignor with respect to an Assignment interpositioned between the Fund and the Borrower become insolvent or enter FDIC receivership or bankruptcy, any interest in the Senior Loan of such person and any loan payment held by such person for the benefit of the Fund should not be included in such person's or entity's bankruptcy estate.

If, however, any such amount were included in such person's or entity's bankruptcy estate, the Fund would incur certain costs and delays in realizing payment or could suffer a loss of principal or interest. In such event, the Fund could experience a decrease in net asset value.

Prepayments. Pursuant to the relevant Loan Agreement, a Borrower may be required in certain circumstances, and may have the option at any time, to prepay the principal amount of a Senior Loan, often without incurring a prepayment penalty. Because the interest rates on Senior Loans are periodically redetermined at relatively short intervals, the Fund and the Adviser believe that the prepayment of, and subsequent reinvestment by the Fund in, Senior Loans will not have a materially adverse impact on the yield on the Fund's portfolio and may have a beneficial impact on income due to receipt of prepayment penalties, if any, and any facility fees earned in connection with reinvestment.

Commitments to Make Additional Loans. A Lender may have certain obligations pursuant to a Loan Agreement, which may include the obligation to make additional loans in certain circumstances. The Fund currently intends to reserve against such contingent obligations by segregating a sufficient amount of cash, liquid securities and liquid Senior Loans as a reserve against such commitments. The Fund will not purchase interests in Senior Loans that would require the Fund to make any such additional loans if such additional loan commitments in the aggregate would exceed 20% of the Fund's total assets or would cause the Fund to fail to meet the diversification requirements set forth under the heading "Investment Restrictions" in the Statement of Additional Information.

Warrants, Equity Securities and Junior Debt; Short-Term Debt Securities

The Fund may acquire equity securities and warrants issued by a Borrower or its affiliates as part of a package of investments in the Borrower or its affiliates issued in connection with a Senior Loan of the Borrower. The Fund also may convert a warrant so acquired into the underlying security. The Fund may acquire junior debt securities as part of a package of investments in the Borrower or its affiliates issued in connection with a Senior Loan of the Borrower, and may invest separately up to 5% of its total assets in junior debt securities. The Fund generally will acquire interests in warrants, equity and junior bonds or other debt securities only when the Adviser believes that the value the Fund gives in exchange for such interests is substantially outweighed by their potential value. However, investments in warrants, equity and junior debt securities entail certain risks in addition to those associated with investments in Senior Loans. The value of these securities may be affected more rapidly, and to a greater extent, by company-specific developments and general market conditions. These risks may increase fluctuations in the Fund's net asset value. The Fund may frequently possess material non-public information about a Borrower as a result of its ownership of a Senior Loan of such Borrower. Because of prohibitions on trading in securities of issuers while in possession of such information the Fund might be unable to enter into a transaction in a security of such a Borrower when it would otherwise be advantageous to do so. The Fund's investments in warrants, equity securities and junior debt securities are subject to the limitations set forth under "The Fund's Investments" Investment Objective and Policies.

The Fund may invest in high quality, short-term debt securities with remaining maturities of one year or less. These may include commercial paper rated at least in the top two rating categories by S&P, Moody's or Fitch, or unrated commercial paper considered by the Adviser to be of similar quality; interests in short-term loans of Borrowers having short-term debt obligations rated, or a short-term credit rating, at least in such top two rating categories, or having no rating but determined by the Adviser to be of comparable quality; certificates of deposit and bankers acceptances; and securities issued or guaranteed by the U.S. government, its agencies or instrumentalities. These securities may pay interest at adjustable rates or at fixed rates. The Fund's investments in high-quality, short-term debt securities are subject to the limitations set forth under "The Fund's Investments" Investment Objective and Policies. In spite of those limitations, pending initial investment in Senior Loans, or if

the Adviser determines that market conditions temporarily warrant a defensive investment policy, the Fund may invest, subject to its ability to liquidate its relatively illiquid portfolio of Senior Loans, up to 100% of its assets in cash and high-quality, short-term debt securities.

Structured Notes

The Fund may invest up to 10% of its total assets in structured notes, which are privately negotiated debt obligations with rates of return determined by reference to the total rate of return on one or more Senior Loans referenced in such notes. The rate of return on the structured note may be determined by applying a multiplier to the rate of total return on the referenced loan or loans. Application of a multiplier is comparable to the use of financial leverage, a speculative technique. Leverage magnifies the potential for gain and the risk of loss; as a result, a relatively small decline in the value of a referenced Senior Loan could result in a relatively large loss in the value of a structured note.

Lending of Portfolio Holdings

The Fund may seek to increase its income by lending financial instruments in its portfolio in accordance with present regulatory policies, including those of the Board of Governors of the Federal Reserve System and the SEC. Such loans may be made, without limit, to brokers, dealers, banks or other recognized institutional borrowers of financial instruments and would be required to be secured continuously by collateral, including cash, cash equivalents or U.S. Treasury bills maintained on a current basis at an amount at least equal to the market value of the financial instruments loaned. The Fund would have the right to call a loan and obtain the financial instruments loaned at any time on five days' notice. For the duration of a loan, the Fund would continue to receive the equivalent of the interest paid by the issuer on the financial instruments loaned and also may receive compensation from the investment of the collateral.

The Fund would not have the right to vote any financial instruments having voting rights during the existence of the loan, but the Fund could call the loan in anticipation of an important vote to be taken among holders of the financial instruments or in anticipation of the giving or withholding of their consent on a material matter affecting the financial instruments. As with other extensions of credit, risks of delay in recovery or even loss of rights in the collateral exist should the borrower of the financial instruments fail financially. However, the loans would be made only to firms deemed by the Adviser to be creditworthy and when, in the judgment of the Adviser, the consideration which can be earned currently from loans of this type justifies the attendant risk. The creditworthiness of firms to which the Fund lends its portfolio holdings will be monitored on an ongoing basis by the Adviser. No specific limitation exists as to the percentage of the Fund's assets which the Fund may lend.

When-Issued and Delayed Delivery Transactions

The Fund may also purchase and sell interests in Senior Loans and other portfolio securities on a when issued or delayed delivery basis. No income accrues to the Fund on such interests or securities in connection with such purchase transactions prior to the date the Fund actually takes delivery of such interests or securities.

These transactions are subject to market fluctuation; the value of the interests in Senior Loans and other portfolio debt securities at delivery may be more or less than their purchase price, and yields generally available on such interests or securities when delivery occurs may be higher or lower than yields on the interests or securities obtained pursuant to such transactions.

Edgar Filing: NUVEEN SENIOR INCOME FUND - Form 486BPOS

Because the Fund relies on the buyer or seller, as the case may be, to consummate the transaction, failure by the other party to complete the transaction may result in the Fund missing the opportunity of obtaining a price or yield considered to be advantageous. When the Fund is the buyer in such a transaction, however, it will maintain, in a segregated account with its custodian, cash or liquid securities having an aggregate value equal to the amount of such purchase commitments until payment is made.

The Fund will make commitments to purchase interests or securities on such basis only with the intention of actually acquiring these interests or securities, but the Fund may sell such interests or securities prior to the settlement date if such sale is considered to be advisable. To the extent the Fund engages in when issued or delayed delivery transactions, it will do so for the purpose of acquiring interests or securities for the Fund's portfolio consistent with the Fund's investment objective and policies and not for the purpose of investment leverage. No specific limitation exists as to the percentage of the Fund's assets which may be used to acquire securities on a when issued or delayed delivery basis.

Repurchase Agreements

The Fund may enter into repurchase agreements (a purchase of, and a simultaneous commitment to resell, a financial instrument at an agreed upon price on an agreed upon date) only with member banks of the Federal Reserve System and member firms of the New York Stock Exchange. When participating in repurchase agreements, the Fund buys securities from a vendor, e.g., a bank or brokerage firm, with the agreement that the vendor will repurchase the securities at a higher price at a later date. Such transactions afford an opportunity for the Fund to earn a return on available cash at minimal market risk, although the Fund may be subject to various delays and risks of loss if the vendor is unable to meet its obligation to repurchase. Under the 1940 Act, repurchase agreements are deemed to be collateralized loans of money by the Fund to the seller. In evaluating whether to enter into a repurchase agreement, the Adviser will consider carefully the creditworthiness of the vendor. If the member bank or member firm that is the party to the repurchase agreement petitions for bankruptcy or otherwise becomes subject to the U.S. Bankruptcy Code, the Fund might experience delays in recovering its cash. The securities underlying a repurchase agreement will be marked to market every business day so that the value of the collateral is at least equal to the value of the loan, including the accrued interest thereon, and the Adviser will monitor the value of the collateral. No specific limitation exists as to the percentage of the Fund's assets which may be used to participate in repurchase agreements.

Reverse Repurchase Agreements

The Fund may enter into reverse repurchase agreements with respect to debt obligations which could otherwise be sold by the Fund. A reverse repurchase agreement is an instrument under which the Fund may sell an underlying debt instrument and simultaneously obtain the commitment of the purchaser (a commercial bank or a broker or dealer) to sell the security back to the Fund at an agreed upon price on an agreed upon date. The Fund will maintain in a segregated account with its custodian cash or liquid securities in an amount sufficient to cover its obligations with respect to reverse repurchase agreements. The Fund receives payment for such securities only upon physical delivery or evidence of book entry transfer by its custodian. Reverse repurchase agreements could involve certain risks in the event of default or insolvency of the other party, including possible delays or restrictions upon the Fund's ability to dispose of the underlying securities. An additional risk is that the market value of securities sold by the Fund under a reverse repurchase agreement could decline below the price at which the Fund is obligated to repurchase them. Reverse repurchase agreements will be considered borrowings by the Fund and as such would be subject to the restrictions on borrowing described in the Statement of Additional Information under Investment Restrictions. The Fund will not hold more than 5% of the value of its total assets in reverse repurchase agreements.

Short-Term/Long-Term Debt Securities; Defensive Position.

During temporary defensive periods or in order to keep the Fund's cash fully invested, the Fund may deviate from its investment objective and invest all or any portion of its assets in investment grade debt securities, including obligations issued or guaranteed by the U.S. government, its agencies and instrumentalities. In such a case, the Fund may not pursue or achieve its investment objective. In addition, upon Symphony's recommendation that a change would be in the best interests of the Fund and upon concurrence by NFA, and subject to approval by the Board of Trustees of the Fund, Symphony may deviate from its investment guidelines discussed herein.

Other Investment Companies.

The Fund may invest in securities of other closed-end investment companies that invest primarily in securities of the types in which the Fund may invest directly. The Fund may invest in other investment companies either during periods when it has large amounts of uninvested cash, or during periods when there is a shortage of attractive securities of the types in which the Fund may invest in directly available in the market. As an investor in an investment company, the Fund will bear its ratable share of that investment company's expenses, and would remain subject to payment of the Fund's advisory and administrative fees with respect to assets so invested. Common Shareholders would therefore be subject to duplicative expenses to the extent the Fund invests in other investment companies. Symphony will take expenses into account when evaluating the investment merits of an investment in the investment company relative to available securities of the types in which the Fund may invest directly. In addition, the securities of other investment companies also may be leveraged and therefore will be subject to the same leverage risks described herein. As described in the section entitled "Risk Factors - Leverage Risk," the net asset value and market value of leveraged shares will be more volatile and the yield to shareholders will tend to fluctuate more than the yield generated by unleveraged shares. The Fund will treat its investments in such investment companies as investments in Senior Loans for all purposes, such as for purposes of determining compliance with the requirement set forth above that at least 80% of the Fund's Managed Assets be invested under normal circumstances in Senior Loans.

Portfolio Turnover.

The Fund may engage in portfolio trading when considered appropriate, but short-term trading will not be used as the primary means of achieving the Fund's investment objective. Although the Fund cannot accurately predict its annual portfolio turnover rate, it is not expected to exceed 100% under normal circumstances. However, there are no limits on the rate of portfolio turnover, and investments may be sold without regard to length of time held when, in the opinion of Symphony, investment considerations warrant such action. A higher portfolio turnover rate results in correspondingly greater brokerage commissions and other transactional expenses that are borne by the Fund. High portfolio turnover may result in the realization of net short-term capital gains by the Fund which, when distributed to shareholders, will be taxable as ordinary income. See "Tax Matters."

PORTFOLIO COMPOSITION

As of March 31, 2012, approximately 98% of the market value of the Fund's portfolio was invested in debt securities. The following table sets forth certain information with respect to the composition of the Fund's debt securities as of March 31, 2012.

<u>Credit Rating*</u>	<u>Percent</u>
BBB	3%
BB	39%
B	45%
CCC	7%
CC	1%
NR	5%
Total	100%

* Using the higher of S&P's or Moody's rating, if available.

USE OF LEVERAGE

The amounts and forms of leverage used by the Fund may vary with prevailing market or economic conditions. The timing and terms of any leverage transactions is determined by the Fund's Board of Trustees. The Fund employs financial leverage primarily through borrowing. The Fund has entered into a \$109,000,000 Revolving Credit and Security Agreement with an affiliate of Citibank. As of January 31, 2012, the Fund's outstanding balance on these borrowings was \$75,500,000. For the six months ended January 31, 2012, the average daily balance outstanding and average annual interest rate on these borrowings were \$75,129,348 and 1.13%, respectively. The amount of outstanding borrowings may vary with prevailing market or economic conditions. The Fund borrows money at rates generally available to institutional investors. The timing and terms of any leverage transactions is determined by the Fund's Board of Trustees. Following an offering of additional Common Shares from time to time, the Fund's leverage ratio will decrease as a result of the increase in net assets attributable to Common Shares. The Fund's leverage ratio may decline further to the extent that the net proceeds of an offering of Common Shares are used to reduce the Fund's financial leverage. A lower leverage ratio may result in lower (higher) returns to Common Shareholders over a period of time to the extent that net returns on the Fund's investment portfolio exceed (fall below) its cost of leverage over that period, which lower (higher) returns may impact the level of the Fund's distributions. See Risk Factors Leverage Risk.

The Fund has issued preferred shares in the past, but as of March 31, 2012 no preferred shares were outstanding. The Fund may again in the future issue certain types of preferred securities to increase the Fund's leverage.

Borrowings and preferred shares, if any, will have seniority over the Common Shares. Leverage involves special risks. There is no assurance that the Fund's leveraging strategy will be successful. The Fund will seek to invest the proceeds from financial leverage in a manner consistent with the Fund's objective and policies.

The Fund anticipates that the financing costs of the instruments used to create its leverage will be based upon short-term adjustable rates that are reset periodically. So long as the Fund's portfolio is invested in securities that provide a higher rate of return than the Fund's cost of leverage (after taking expenses into consideration), the leverage will cause you to receive a higher current rate of return than if the Fund were not leveraged.

Changes in the value of the Fund's portfolio, including costs attributable to Borrowings or preferred shares, if any, will be borne entirely by the Common Shareholders. If there is a net decrease (or increase) in the value of the Fund's investment portfolio, the leverage will decrease (or increase) the net asset value per Common Share to a greater extent than if the Fund were not leveraged.

Given the current economic and debt market environment with historically low short-term to intermediate-term interest rates, the Fund may use derivatives such as interest rate swaps, with terms that may range from one to seven years, to fix the effective rate paid on a significant portion of the Fund's leverage. The interest rate swap program, if implemented, will seek to achieve potentially lower leverage costs over an extended period. This strategy would enhance common shareholder returns if short-term interest rates were to rise over time to exceed on average the effective fixed interest rate for that time period. This strategy, however, would add to effective leverage costs immediately (because the effective swap costs would likely be higher than current benchmark adjustable short term rates) and would increase overall leverage costs over the entirety of any such time period, in the event that short-term interest rates do not rise sufficiently during the period to exceed on average the effective fixed interest rate for that time period.

The Fund pays NFA a management fee based on a percentage of Managed Assets. Managed Assets for this purpose includes the proceeds realized from the Fund's use of financial leverage. See Management of the Fund Investment Management Agreement. NFA will base its decision whether and how much to leverage the Fund based solely on its assessment of whether such use of leverage will advance the Fund's investment objective. NFA will be responsible for using leverage to achieve the Fund's investment objective. However, the

fact that a decision to increase the Fund's leverage will have the effect of increasing Managed Assets and therefore NFA's management fee means that NFA may have an incentive to increase the Fund's use of leverage. NFA will seek to manage that incentive by only increasing the Fund's use of leverage when it determines that such increase is consistent with the Fund's investment objective, and by periodically reviewing the Fund's performance and use of leverage with the Fund's Board of Trustees.

Under the 1940 Act, the Fund generally is not permitted to issue commercial paper or notes or borrow unless immediately after the borrowing or commercial paper or note issuance the value of the Fund's total assets less liabilities other than the principal amount represented by commercial paper, notes or borrowings, is at least 300% of such principal amount. If the Fund borrows, the Fund intends, to the extent possible, to prepay all or a portion of the principal amount of any outstanding commercial paper, notes or borrowing to the extent necessary in order to maintain the required asset coverage. Failure to maintain certain asset coverage requirements could result in an event of default and entitle the debt holders to elect a majority of the Board of Trustees.

Under the 1940 Act, the Fund is not permitted to issue preferred shares unless immediately after such issuance, the value of the Fund's asset coverage is at least 200% of the liquidation value of the outstanding preferred shares (*i.e.*, such liquidation value may not exceed 50% of the Fund's asset coverage). In addition, the Fund is not permitted to declare any cash dividend or other distribution on its Common Shares unless, at the time of such declaration, the value of the Fund's asset coverage less liabilities other than borrowings is at least 200% of such liquidation value. If preferred shares are issued in the future, the Fund intends, to the extent possible, to purchase or redeem preferred shares from time to time to the extent necessary in order to maintain coverage of any preferred shares. Though it does not currently, if the Fund were to have preferred shares outstanding, two of the Fund's trustees would be elected by the holders of preferred shares, voting separately as a class. The remaining trustees of the Fund would be elected by holders of Common Shares and preferred shares voting together as a single class. In the event the Fund would fail to pay dividends on preferred shares for two years, preferred shareholders would be entitled to elect a majority of the trustees of the Fund.

The Fund may be subject to certain restrictions imposed by either guidelines of one or more rating agencies that may issue ratings for commercial paper or notes, preferred shares, or, if the Fund borrows from a lender, by the lender. These guidelines may impose asset coverage or portfolio composition requirements that are more stringent than those imposed on the Fund by the 1940 Act. It is not anticipated that these covenants or guidelines will impede NFA from managing the Fund's portfolio in accordance with the Fund's investment objective and policies. In addition to other considerations, to the extent that the Fund believes that the covenants and guidelines required by the rating agencies or lenders would impede its ability to meet its investment objective, or if the Fund is unable to obtain the rating on borrowings (expected to be at least AA/Aa or the equivalent short-term ratings) or preferred shares (also expected to be at least AA/Aa), the Fund will not incur borrowings or issue preferred shares.

Assuming the utilization of leverage through borrowings in the aggregate amount of approximately 30% of the Fund's Managed Assets, at a combined interest or payment rate of 2% payable on such leverage, the income generated by the Fund's portfolio (net of non-leverage expenses) must exceed 0.60% in order to cover such interest or payment rates and other expenses specifically related to borrowing. These numbers are merely estimates, used for illustration. Actual interest or payment rates may vary frequently and may be significantly higher or lower than the rate estimated above.

The Fund may also borrow money for repurchase of its shares or as a temporary measure for extraordinary or emergency purposes, including the payment of dividends and the settlement of securities transactions which otherwise might require untimely dispositions of Fund securities.

The following table is furnished in response to requirements of the SEC. It is designed to illustrate the effect of leverage on Common Share total return, assuming investment portfolio total returns (comprised of income and changes in the value of investments held in the Fund's portfolio net of expenses) at the assumed portfolio total return rates provided in the table. These assumed investment portfolio returns are hypothetical figures and are not

necessarily indicative of the investment portfolio returns expected to be experienced by the Fund. The table further reflects the use of Borrowings representing 31% of the Fund's total capital and the Fund's currently projected annual dividend rate, borrowing interest rate or payment rate set by an interest rate transaction of 2%. See Risk Factors Leverage Risk and Use of Leverage.

Assumed Portfolio Return	(10.00)%	(5.00)%	0.00%	5.00%	10.00%
Common Stock Total Return	(15.39)%	(8.14)%	(0.90)%	6.35%	13.59%

Common Share total return is composed of two elements the Common Share dividends paid by the Fund (the amount of which is largely determined by the net investment income of the Fund after paying interest on any borrowings) and gains or losses on the value of the securities the Fund owns. As required by SEC rules, the table assumes that the Fund is more likely to suffer capital losses than capital appreciation.

HEDGING TRANSACTIONS

The Fund may use derivatives or other transactions for the purpose of hedging a portion of its portfolio holdings or in connection with the Fund's anticipated use of leverage through Borrowings.

Portfolio Hedging Transactions. The Fund may use derivatives or other transactions for purposes of hedging the portfolio's exposure to high yield credit risk, foreign currency exchange rate risk and the risk of increases in interest rates. The specific derivative instruments to be used, or other transactions to be entered into, each for hedging purposes, may include the purchase or sale of futures contracts on securities, credit-linked notes, securities indices, other indices or other financial instruments; options on futures contracts; exchange-traded and over-the-counter options on securities or indices; index-linked securities; swaps; and currency exchange transactions. Some, but not all, of the derivative instruments may be traded and listed on an exchange. The positions in derivatives will be marked-to-market daily at the closing price established on the relevant exchange or at a fair value. For a complete discussion of these derivative securities, see the Statement of Additional Information.

There may be an imperfect correlation between changes in the value of the Fund's portfolio holdings and hedging positions entered into by the Fund, which may prevent the Fund from achieving the intended hedge or expose the Fund to risk of loss. In addition, the Fund's success in using hedging instruments is subject to Symphony's ability to predict correctly changes in the relationships of such hedge instruments to the Fund's portfolio holdings or other factors, and there can be no assurance that Symphony's judgment in this respect will be correct. Consequently, the use of hedging transactions might result in a poorer overall performance for the Fund, whether or not adjusted for risk, than if the Fund had not hedged its portfolio holdings. In addition, there can be no assurance that the Fund will enter into hedging or other transactions at times or under circumstances in which it would be advisable to do so. See Hedging Transactions.

Futures Contracts and Options on Futures Contracts. The Fund's use of derivative instruments may include (i) U.S. Treasury security or U.S. Government Agency security futures contracts and (ii) options on U.S. Treasury security or U.S. Government Agency security futures contracts. All such instruments must be traded and listed on an exchange. U.S. Treasury and U.S. Government Agency futures contracts are standardized contracts for the future delivery of a U.S. Treasury Bond or U.S. Treasury Note or a U.S. Government Agency security or their equivalent at a future date at a price set at the time of the contract. An option on a U.S. Treasury or U.S. Government Agency futures contract, as contrasted with the direct investment in such a contract, gives the purchaser of the option the right, in return for the premium paid, to assume a position in a U.S. Treasury or U.S. Government Agency futures contract at a specified exercise price at any time on or before the expiration date of the option. Upon exercise of an option, the delivery of the futures position by the writer of the option to the holder of the option will be accompanied by delivery of the accumulated balance in the writer's future margin account, which represents the amount by which the market price of the futures contract exceeds the exercise price of the option on the futures contract.

The Fund may purchase and sell various other kinds of financial futures contracts and options thereon. Futures contracts may be based on various debt securities and securities indices (such as the Municipal Bond Index traded on the Chicago Board of Trade). Such transactions involve a risk of loss or depreciation due to unanticipated adverse changes in securities prices, which may exceed the Fund's initial investment in these contracts. The Fund will only purchase or sell futures contracts or related options in compliance with the rules of the Commodity Futures Trading Commission. These transactions involve transaction costs. There can be no assurance that the Fund's use of futures will be advantageous to the Fund. Guidelines established by one or more NRSROs that rate any preferred shares issued by the Fund may limit use of these transactions.

Credit-Linked Notes. The Fund may invest in credit-linked notes (CLN) for risk management purposes, including diversification. A CLN is a derivative instrument that is a synthetic obligation between two or more parties where the payment of principal and/or interest is based on the performance of some obligation (a reference obligation). In addition to credit risk of the reference obligation and interest rate risk, the buyer/seller of the CLN is subject to counterparty risk. See Risk Factors Counterparty Risk.

Swaps. Swap contracts may be purchased or sold to hedge against fluctuations in securities prices, interest rates or market conditions, to change the duration of the overall portfolio, or to mitigate default risk. In a standard swap transaction, two parties agree to exchange the returns (or differentials in rates of return) to be exchanged or swapped between the parties, which returns are calculated with respect to a notional amount, i.e., the return on or increase in value of a particular dollar amount invested at a particular interest rate or in a basket of securities representing a particular index.

Credit Default Swaps. The Fund may enter into credit default swap contracts for risk management purposes, including diversification. When the Fund is the buyer of a credit default swap contract, the Fund is entitled to receive the par (or other agreed-upon) value of a referenced debt obligation from the counterparty to the contract in the event of a default by a third party, such as a U.S. or non-U.S. corporate Issuer, on the debt obligation. In return, the Fund would pay the counterparty a periodic stream of payments over the term of the contract provided that no event of default has occurred. If no default occurs, the Fund would have spent the stream of payments and received no benefit from the contract. When the Fund is the seller of a credit default swap contract, it receives the stream of payments, but is obligated to pay upon default of the referenced debt obligation. As the seller, the Fund would effectively add leverage to its portfolio because, in addition to its total net assets, the Fund would be subject to investment exposure on the notional amount of the swap. The Fund will segregate assets in the form of cash and cash equivalents in an amount equal to the aggregate market value of the credit default swaps of which it is the seller, marked to market on a daily basis. These transactions involve certain risks, including the risk that the seller may be unable to fulfill the transaction. The tax treatment of certain credit default swaps is uncertain.

Interest Rate Swaps. The Fund will enter into interest rate and total return swaps only on a net basis, i.e., the two payment streams are netted out, with the Fund receiving or paying, as the case may be, only the net amount of the two payments. Interest rate swaps involve the exchange by the Fund with another party of their respective commitments to pay or receive interest (e.g., an exchange of fixed rate payments for floating rate payments). The Fund will only enter into interest rate swaps on a net basis. If the other party to an interest rate swap defaults, the Fund's risk of loss consists of the net amount of payments that the Fund is contractually entitled to receive. The net amount of the excess, if any, of the Fund's obligations over its entitlements will be maintained in a segregated account by the Fund's custodian. The Fund will not enter into any interest rate swap unless the claims-paying ability of the other party thereto is considered to be investment grade by the Adviser. If there is a default by the other party to such a transaction, the Fund will have contractual remedies pursuant to the agreements related to the transaction. These instruments are traded in the over-the-counter market.

The Fund may use interest rate swaps for risk management purposes only and not as a speculative investment and would typically use interest rate swaps to shorten the average interest rate reset time of the Fund's holdings. Interest rate swaps involve the exchange by the Fund with another party of their respective commitments to pay or receive interest (e.g., an exchange of fixed rate payments for floating rate payments). The

use of interest rate swaps is a highly specialized activity which involves investment techniques and risks different from those associated with ordinary portfolio securities transactions. If NFA is incorrect in its forecasts of market values, interest rates and other applicable factors, the investment performance of the Fund would be unfavorably affected.

Total Return Swaps. As stated above, the Fund will enter into total return swaps only on a net basis. Total return swaps are contracts in which one party agrees to make payments of the total return from the underlying asset(s), which may include securities, baskets of securities, or securities indices during the specified period, in return for payments equal to a fixed or floating rate of interest or the total return from other underlying asset(s).

Other Hedging Transactions. The Fund also may invest in relatively new instruments without a significant trading history for purposes of hedging the Fund's portfolio risks. See "Other Investment Policies and Techniques" in the Fund's Statement of Additional Information for further information on hedging transactions.

Interest Rate Transactions. The Fund's portfolio investments in Senior Loans and other adjustable rate debt instruments will serve as a hedge against the risk that Common Share net income and/or returns may decrease due to rising market dividend or interest rates on any future preferred shares or Borrowings.

RISK FACTORS

Risk is inherent in all investing. Investing in any investment company security involves risk, including the risk that you may receive little or no return on your investment or even that you may lose part or all of your investment. Therefore, before investing you should consider carefully the following risks that you assume when you invest in Common Shares.

Investment and Market Risk

An investment in the Fund's Common Shares is subject to investment risk, including the possible loss of the entire principal amount that you invest. Your investment in Common Shares represents an indirect investment in the securities owned by the Fund, most of which are not traded on a national securities exchange, NASDAQ (as defined below) or in the over-the-counter markets. The value of these securities, like other market investments, may move up or down, sometimes rapidly and unpredictably.

Your Common Shares at any point in time may be worth less than your original investment, even after taking into account the reinvestment of Fund dividends and distributions. The Fund likely will use leverage, which magnifies the securities market risks described above.

Market Discount from Net Asset Value

Shares of closed-end investment companies like the Fund have during some periods traded at prices higher than net asset value and have during other periods traded at prices lower than net asset value. The Fund cannot predict whether Common Shares will trade at, above or below net asset value. This characteristic is a risk separate and distinct from the risk that the Fund's net asset value could decrease as a result of investment activities. Investors bear a risk of loss to the extent that the price at which they sell their shares is lower in relation to the Fund's net asset value than at the time of purchase, assuming a stable net asset value. Proceeds from the sale of Common Shares in this offering will be reduced by transaction costs (if applicable, which vary depending on the offering method used). The net asset value per Common Share will be reduced by costs associated with any future offerings of Common Shares or preferred shares. The Common Shares are designed primarily for long-term investors, and you should not view the Fund as a vehicle for trading purposes.

Senior Loan Risks

Issuer Credit Risk. Senior Loans and other adjustable rate debt instruments are subject to the risk of non-payment of scheduled interest or principal. Such non-payment would result in a reduction of income to the Fund, a reduction in the value of the investment and a potential decrease in the net asset value of the Fund. Although under normal circumstances at least 65% of the Fund's Managed Assets will be invested in Senior Loans that are secured by specific collateral, there can be no assurance that the liquidation of any collateral securing a Senior Loan would satisfy the Borrower's obligation in the event of non-payment of scheduled interest or principal payments, or that such collateral could be readily liquidated. In the event of bankruptcy of a Borrower, the Fund could experience delays or limitations with respect to its ability to realize the benefits of the collateral securing a Senior Loan. The collateral securing a Senior Loan may lose all or substantially all of its value in the event of bankruptcy of a Borrower. Some Senior Loans are subject to the risk that a court, pursuant to fraudulent conveyance or other similar laws, could subordinate such Senior Loans to presently existing or future indebtedness of the Borrower or take other action detrimental to the holders of Senior Loans, including, in certain circumstances, invalidating such Senior Loans or causing interest previously paid to be refunded to the Borrower. If interest were required to be refunded, it would negatively affect the Fund's performance.

Edgar Filing: NUVEEN SENIOR INCOME FUND - Form 486BPOS

In evaluating the creditworthiness of Borrowers, Symphony may consider, and may rely in part, on analyses performed by others. Borrowers may have outstanding debt obligations that are rated below investment grade by a NRSRO. Many of the Senior Loans in the Fund will have been assigned ratings below investment grade

quality. Because of the protective features of Senior Loans, Symphony believes that Senior Loans tend to have more favorable loss recovery rates as compared to more junior types of below investment grade debt obligations. Symphony does not view ratings as the determinative factor in its investment decisions and relies more upon its credit analysis abilities than upon ratings.

The Fund is subject to the same inherent risks described above with respect to issuers of other debt instruments in which the Fund may invest, although it is not expected that these debt instruments will be secured by collateral.

Senior Loan Interest Rate Risk. When interest rates decline, the value of a fund invested in fixed rate obligations can be expected to rise. Conversely, when interest rates rise, the value of a fund invested in fixed rate obligations can be expected to decline. Although changes in prevailing interest rates can be expected to cause some fluctuations in the value of Senior Loans (due to the fact that adjustable rates on Senior Loans only reset periodically), the value of Senior Loans and other adjustable rate debt instruments is substantially less sensitive to changes in market interest rates than fixed rate instruments. As a result, the Adviser believes the Fund's policy of investing at least 80% of its Managed Assets in Senior Loans will make the Fund less volatile and its net asset value less sensitive to changes in market interest rates than if the Fund invested exclusively in fixed rate obligations. Similarly, because interest rates on most Senior Loans and other adjustable rate instruments typically only reset periodically (e.g., monthly or quarterly), a sudden and significant increase in market interest rates may cause a decline in the value of these investments and in the Fund's net asset value. Other factors (including, but not limited to, rating downgrades, credit deterioration, a large downward movement in stock prices, a disparity in supply and demand of certain Senior Loans and other securities or market conditions that reduce liquidity) can reduce the value of Senior Loans and other debt obligations, impairing the Fund's net asset value.

Risks in Senior Loan Valuation. The Fund uses an independent pricing service to value most Senior Loans and other debt securities at their market value or at a fair value determined by the independent pricing service. The Fund will use the fair value method to value loans or other securities if the independent pricing service is unable to provide a market or fair value for them or if the market or fair value provided by the independent pricing service is deemed unreliable, or if events occurring after the close of a securities market and before the Fund values its Managed Assets would materially affect net asset value. A security that is fair valued may be valued at a price higher or lower than actual market quotations or the value determined by other funds using their own fair valuation procedures. Because non-U.S. securities may trade on days when Common Shares are not priced, net asset value can change at times when Common Shares cannot be sold.

Agent Risk. A financial institution's employment as an Agent under a Senior Loan might be terminated in the event that it fails to observe a requisite standard of care or becomes insolvent. A successor Agent would generally be appointed to replace the terminated Agent, and assets held by the Agent under the loan agreement would likely remain available to holders of such indebtedness. However, if assets held by the terminated Agent for the benefit of the Fund were determined to be subject to the claims of the Agent's general creditors, the Fund might incur certain costs and delays in realizing payment on a Senior Loan or loan participation and could suffer a loss of principal and/or interest. In situations involving other interposed financial institutions (e.g., an insurance company or government agency) similar risks may arise.

Participation Risk. The Fund also may purchase a participation interest in a Senior Loan and by doing so acquire some or all of the interest of a bank or other lending institution in a Senior Loan to a Borrower. A participation typically will result in the Fund having a contractual relationship only with the Lender, not the Borrower. As a result, the Fund assumes the credit risk of the Lender selling the participation in addition to the credit risk of the Borrower. By purchasing a participation, the Fund will have the right to receive payments of principal, interest and any fees to which it is entitled only from the Lender selling the participation and only upon receipt by the Lender of the payments from the Borrower. In the event of insolvency or bankruptcy of the Lender selling the participation, the Fund may be treated as a general creditor of the Lender and may not have a senior claim to the Lender's interest in the Senior Loan. If the Fund only acquires a participation in the loan made by a third party, the Fund may not be able to control the exercise of any remedies that the Lender would have under

the Senior Loan. Such third party participation arrangements are designed to give Senior Loan investors preferential treatment over high yield investors in the event of a deterioration in the credit quality of the issuer. Even when these arrangements exist, however, there can be no assurance that the principal and interest owed on the Senior Loan will be repaid in full.

Prepayment Risk. During periods of declining interest rates or for other purposes, Borrowers may exercise their option to prepay principal earlier than scheduled, forcing the Fund to reinvest in lower yielding securities. This is known as call or prepayment risk. In addition, below investment grade securities frequently have call features that allow an issuer to redeem a security at dates prior to its stated maturity at a specified price (typically greater than par) only if certain prescribed conditions are met (commonly referred to as call protection). An issuer may redeem a lower grade security if, for example, the issuer can refinance the debt at a lower cost due to declining interest rates or an improvement in the credit standing of the issuer. Senior Loans typically have no such call protection. For premium bonds (bonds acquired at prices that exceed their par or principal value) purchased by the Fund, prepayment risk may be increased.

Other Risks Associated with Senior Loans. Many Senior Loans in which the Fund will invest may not be rated by a NRSRO, will not be registered with the Securities and Exchange Commission or any state securities commission and will not be listed on any national securities exchange. In addition, the amount of public information available with respect to Senior Loans generally may be less extensive than that available for registered or exchange listed securities. Economic and other events (whether real or perceived) can reduce the demand for certain Senior Loans or Senior Loans generally, which may reduce market prices and cause the Fund's net asset value per share to fall. The frequency and magnitude of such changes cannot be predicted. No active trading market may exist for some Senior Loans and some Senior Loans may be subject to restrictions on resale. A secondary market may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods, which may impair the ability to realize full value and thus cause a material decline in the Fund's net asset value. During periods of limited supply and liquidity of Senior Loans, the Fund's yield may be lower.

Below Investment Grade Risk

The Fund may invest 100% of its assets in Senior Loans that are rated below investment grade or that are unrated but judged to be of comparable quality by Symphony. Securities of below investment grade quality are regarded as having predominately speculative characteristics with respect to capacity to pay interest and repay principal, and are commonly referred to as junk bonds. Issuers of lower grade securities may be highly leveraged and may not have available to them more traditional methods of financing. The prices of these lower grade securities are typically more sensitive to negative developments, such as a decline in the Issuer's revenues or a general economic downturn, than are the prices of higher grade securities. The secondary market for lower grade securities, including some Senior Loans and most subordinated loans may not be as liquid as the secondary market for more highly rated securities, a factor which may have an adverse effect on the Fund's ability to dispose of a particular security. There are fewer dealers in the market for lower grade securities than for investment grade obligations. The prices quoted by different dealers for lower grade securities may vary significantly and the spread between the bid and ask price for such securities is generally much larger than for higher quality instruments. Under adverse market or economic conditions, the secondary market for lower grade securities could contract further, independent of any specific adverse changes in the condition of a particular Issuer, and these instruments may become illiquid. As a result, the Fund could find it more difficult to sell these securities or may be able to sell the securities only at prices lower than if such securities were widely traded. Prices realized upon the sale of such lower rated or unrated securities, under these circumstances, may be less than the prices used in calculating the Fund's net asset value.

Non-U.S. Issuer Risk

The Fund may invest up to 20% of its Managed Assets in U.S. dollar denominated Senior Loans of Borrowers that are organized or located in countries outside the United States. Although the Senior Loans will

require payment of interest and principal in U.S. dollars, these Borrowers may have significant non-U.S. dollar revenues. Investment in foreign Borrowers involves special risks, including that foreign Borrowers may be subject to: including the following: (i) less publicly available information about non-U.S. Issuers or markets due to less rigorous disclosure or accounting standards or regulatory practices; (ii) many non-U.S. markets are smaller, less liquid and more volatile, meaning that, in a changing market, Symphony may not be able to sell the Fund's portfolio securities at times, in amounts or at prices it considers reasonable; (iii) potential adverse effects of fluctuations in currency exchange rates or controls on the value of the Fund's investments; (iv) the economies of non-U.S. countries may grow at slower rates than expected or may experience a downturn or recession; (v) the impact of economic, political, social or diplomatic events; (vi) possible seizure, expropriation or nationalization of the company or its assets; (vii) certain non-U.S. countries may impose restrictions on the ability of non-U.S. Issuers to make payments of principal and/or interest to investors located outside the U.S., due to blockage of foreign currency exchanges or otherwise; and (viii) withholding and other non-U.S. taxes may decrease the Fund's return. These risks are more pronounced to the extent that the Fund invests a significant amount of its assets in companies located in one region and to the extent that the Fund invests in securities of Issuers in emerging markets. Although the Fund may hedge its exposure to certain of these risks, including the foreign currency exchange rate risk, there can be no assurance that the Fund will enter into hedging transactions at any time or at times or under circumstances in which it might be advisable to do so.

Economies and social and political climates in individual countries may differ unfavorably from the United States. Non-U.S. economies may have less favorable rates of growth of gross domestic product, rates of inflation, currency valuation, capital reinvestment, resource self-sufficiency and balance of payments positions. Many countries have experienced substantial, and in some cases extremely high, rates of inflation for many years. Unanticipated economic, political and social developments may also affect the values of the Fund's investments and the availability to the Fund of additional investments in such countries.

Portfolio Liquidity

No active trading market currently exists for many Senior Loans. Senior Loans are thus relatively illiquid. Liquidity relates to the ability of the Fund to sell an investment in a timely manner at a price approximately equal to its value on the Fund's books. The illiquidity of Senior Loans may impair the Fund's ability to realize the full value of its assets in the event of a voluntary or involuntary liquidation of such assets. Because of the lack of an active trading market, illiquid securities are also difficult to value and prices provided by external pricing services may not reflect the true fair value of the securities. However, many Senior Loans are of a large principal amount and are held by a large number of financial institutions. In the Adviser's opinion, this should enhance their liquidity. In addition, in recent years the number of institutional investors purchasing Senior Loans has increased. The risks of illiquidity are particularly important when the Fund's operations require cash, and may in certain circumstances require that the Fund borrow to meet short-term cash requirements. To the extent that a secondary market does exist for certain Senior Loans, the market may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods. The Fund has no limitation on the amount of its assets that may be invested in securities that are not readily marketable or that are subject to restrictions on resale (except as noted elsewhere herein). The substantial portion of the Fund's assets invested in Senior Loans may restrict the ability of the Fund to dispose of its investments in a timely fashion and at a fair price, and could result in capital losses to the Fund and holders of its shares. The market for Senior Loans could be disrupted in the event of an economic downturn or a substantial increase or decrease in interest rates. This could result in increased volatility in the market and in the Fund's net asset value and market price per share. See Net Asset Value.

Interest Rate Risk

Interest rate risk is the risk that fixed-income securities will decline in value because of changes in market interest rates. When market interest rates rise, the market value of such securities generally will fall. The Fund's investment in such securities means that the net asset value and market price of Common Shares will tend to

decline if market interest rates rise. Market interest rates in the U.S. and certain other countries in which the Fund may invest currently are near historically low levels. Because the Fund will invest at least 80% of its Managed Assets in Senior Loans and will maintain an average portfolio duration of one year or less, the Fund is intended to have a relatively low level of interest rate risk. However, because interest rates on most Senior Loans and other adjustable rate instruments typically only reset periodically (e.g., monthly or quarterly), changes in prevailing interest rates (and particularly sudden and significant changes) can be expected to cause some fluctuation in the market value of these securities, including declines in market value as interest rates rise.

Interest Rate Fluctuations

When interest rates decline, the value of a portfolio invested in fixed-rate obligations can be expected to rise. Conversely, when interest rates rise, the value of a portfolio invested in fixed-rate obligations can be expected to decline. Although the Fund's net asset value will vary, the Adviser expects the Fund's policy of acquiring primarily interests in floating rate Senior Loans to minimize fluctuations in net asset value resulting from changes in market interest rates. However, because floating or variable rates on Senior Loans only reset periodically, changes in prevailing interest rates can be expected to cause some fluctuations in the Fund's net asset value. Similarly, a sudden and significant increase in market interest rates, may cause a decline in the Fund's net asset value.

Income Risk

The Fund invests primarily in Senior Loans whose interest rates reset frequently. If market interest rates fall, these interest rates will be reset at lower levels, reducing the Fund's income and in turn, dividends paid to Common Shareholders.

Net Asset Value Fluctuations

The Senior Loans in which the Fund will invest generally are not listed on any securities exchange. Certain Senior Loans are traded by institutional investors in an over-the-counter secondary market for Senior Loan obligations that has developed over the past several years. No active trading market currently exists for many of the Senior Loans in which the Fund will invest. The secondary market for those Senior Loans generally is comparatively illiquid relative to markets for other income securities. Because of the lack of an active trading market, Senior Loans are generally more difficult to value than liquid securities for which an active trading market exists. In determining net asset value, the Fund will utilize the valuations of Senior Loans furnished by an independent third-party pricing service, which typically values Senior Loans at the mean of the highest bona fide bid and lowest bona fide ask prices when current quotations are readily available.

Senior Loans for which current quotations are not readily available are valued at a fair value as determined by the pricing service using pricing methods and other information and analyses, including credit considerations considered relevant by such pricing service, to determine valuations. If the pricing service does not provide a value for a Senior Loan, a value will be determined by the Adviser.

To the extent that an active secondary trading market in Senior Loan interests develops to a reliable degree, the pricing service may rely to an increasing extent on such market prices and quotations in determining valuations of the Senior Loan interests in the Fund's portfolio. The Fund purchases Senior Loans primarily to seek to achieve its investment objective of high current income, consistent with preservation of capital, and does not anticipate that it will actively trade Senior Loans. To the extent a trading market continues to develop, certain participants in the market may have objectives other than current income and may pursue short-term trading strategies, which may result in erratic movements in the market prices for Senior Loans as a result of movements in short-term interest rates or otherwise. Although the Fund's policy of acquiring interests in floating rate Senior Loans is intended to minimize fluctuations in net asset value resulting from changes in market interest rates, the

Fund's net asset value will fluctuate.

Reinvestment Risk

Reinvestment risk is the risk that income from the Fund's portfolio will decline if and when the Fund invests the proceeds from matured, traded or called bonds at market interest rates that are below the portfolio's current earnings rate. A decline in income could affect the Common Shares market price or their overall returns.

Leverage Risk

Leverage risk is the risk associated with the use of the Fund's borrowings, outstanding preferred shares, if issued in the future, or the use of tender option bonds to leverage the Common Shares. There can be no assurance that the Fund's leveraging strategy will be successful. Because the long-term municipal securities in which the Fund invests generally pay fixed rates of interest while the Fund's costs of leverage generally fluctuate with short- to intermediate-term yields, the incremental earnings from leverage will vary over time. However, the Fund may use derivatives, such as interest rate swaps, to fix the effective rate paid on all or a portion of the Fund's leverage in an effort to lower leverage costs over an extended period. Accordingly, the Fund cannot assure you that the use of leverage will result in a higher yield or return to Common Shareholders. The income benefit from leverage will be reduced to the extent that the difference narrows between the net earnings on the Fund's portfolio securities and its cost of leverage. The income benefit from the leverage will increase to the extent that the difference widens between the net earnings on the Fund's portfolio securities and its costs of leverage. If short- or intermediate-term rates rise, the Fund's cost of leverage could exceed the fixed rate of return on longer-term bonds held by the Fund that were acquired during periods of lower interest rates, reducing returns to Common Shareholders. This could occur even if short- or intermediate-term and long-term municipal rates rise. Because of the costs of leverage, the Fund may incur losses even if the Fund has positive returns, if they are not sufficient to cover the costs of leverage. The Fund's cost of leverage includes expenses relating to the issuance and ongoing maintenance of any borrowings or the interest attributable to tender option bonds as well as any one-time costs (*e.g.*, issuance costs) and ongoing fees and expenses associated with such leverage.

The risk of loss attributable to the Fund's use of leverage is borne by Common Shareholders. The Fund's use of financial leverage can result in a greater decrease in net asset values in declining markets. Furthermore, the amount of fees paid to Nuveen Fund Advisors for investment advisory services will be higher if the Fund uses leverage because the fees will be calculated based on the Fund's Managed Assets this may create an incentive for Nuveen Fund Advisors to leverage the Fund. The Fund is required to maintain certain regulatory and rating agency asset coverage requirements in connection with its outstanding borrowings, in order to be able to maintain the ability to declare and pay Common Share distributions and to maintain the rating of preferred shares, if issued in the future. In order to maintain required asset coverage levels, the Fund may be required to alter the composition of its investment portfolio or take other actions, such as redeeming preferred shares, if any, or prepaying borrowings with the proceeds from portfolio transactions, at what might be an inopportune time in the market. Such actions could reduce the net earnings or returns to Common Shareholders over time.

The Fund may invest in the securities of other investment companies, which may themselves be leveraged and therefore present similar risks to those described above.

Non-Diversification

The Fund has registered as a non-diversified investment company. This means that it may invest more than 5% of the value of its assets in the obligations of any single issuer, including Senior Loans of a single Borrower and Participations purchased from a single Lender. However, the Fund does not intend to invest more than 10% of the value of its assets in Senior Loans of a single Borrower. If the Fund invests a relatively high percentage of its assets in obligations of a limited number of issuers, the Fund will be more at risk to any single corporate, economic, political or regulatory event that impacts one or more of those issuers. In addition, the Fund must satisfy certain asset diversification rules to qualify as a regulated investment company for federal income tax purposes.

Borrowing Risks

In addition to borrowing for leverage (See [Use of Leverage](#)), the Fund may borrow for temporary or emergency purposes, including to meet redemption requests, pay dividends, repurchase its shares, or clear portfolio transactions. Borrowing may exaggerate changes in the net asset value of the Fund's shares and may affect the Fund's net income. When the Fund borrows money, it must pay interest and other fees, which will reduce the fund's returns if such costs exceed the returns on the portfolio securities purchased or retained with such borrowings. Any such borrowings are intended to be temporary. However, under certain market conditions, including periods of low demand or decreased liquidity in the municipal bond market such borrowings might be outstanding for longer periods of time.

Regulatory Risk

To the extent that legislation or state or federal regulators that regulate certain financial institutions impose additional requirements or restrictions with respect to the ability of such institutions to make loans, particularly in connection with highly leveraged transactions, the availability of Senior Loans for investment may be adversely affected. Further, such legislation or regulation could depress the market value of Senior Loans.

Derivatives Risk, Including the Risk of Swaps

The Fund's use of derivatives involves risks different from, and possibly greater than, the risks associated with investing directly in the investments underlying the derivatives. Whether the Fund's use of derivatives is successful will depend on, among other things, if NFA correctly forecasts market values, interest rates and other applicable factors. If NFA incorrectly forecasts these and other factors, the investment performance of the Fund will be unfavorably affected. In addition, the derivatives market is largely unregulated. It is possible that developments in the derivatives market could adversely affect the Fund's ability to successfully use derivative instruments.

The Fund may enter into debt-related derivatives instruments including credit swap default contracts and interest rate swaps. Like most derivative instruments, the use of swaps is a highly specialized activity that involves investment techniques and risks different from those associated with ordinary portfolio securities transactions. In addition, the use of swaps requires an understanding by NFA not only of the referenced asset, rate or index, but also of the swap itself. Because they are two-party contracts and because they may have terms of greater than seven days, swap agreements may be considered to be illiquid. Moreover, the Fund bears the risk of loss of the amount expected to be received under a swap agreement in the event of the default or bankruptcy of a swap agreement counterparty. It is possible that developments in the swaps market, including potential government regulation, could adversely affect the Fund's ability to terminate existing swap agreements or to realize amounts to be received under such agreements. See also, [Counterparty Risk](#), [Hedging Transactions](#) and the [Statement of Additional Information](#).

Counterparty Risk

The Fund may be subject to credit risk with respect to the counterparties to certain derivative agreements entered into by the Fund. If a counterparty becomes bankrupt or otherwise fails to perform its obligations under a derivative contract due to financial difficulties, the Fund may experience significant delays in obtaining any recovery under the derivative contract in a bankruptcy or other reorganization proceeding. The Fund may obtain only a limited recovery or may obtain no recovery in such circumstances.

Repurchase Agreement Risk

With respect to repurchase agreements, if the party agreeing to repurchase specific securities should default, the Fund may seek to sell the securities which it holds. This could involve transaction costs or delays in addition

to a loss on the securities if their value should fall below their repurchase price. Repurchase agreements maturing in more than seven days are considered to be illiquid securities.

Market Disruption Risk

Certain events have a disruptive effect on the securities markets, such as terrorist attacks (including the terrorist attacks in the U.S. on September 11, 2001), war and other geopolitical events. The Fund cannot predict the effects of similar events in the future on the U.S. economy. Below investment grade securities tend to be more volatile than higher rated securities so that these events and any actions resulting from them may have a greater impact on the prices and volatility of below investment grade securities than on higher rated securities.

Inflation Risk

Inflation risk is the risk that the value of assets or income from investment will be worth less in the future as inflation decreases the value of money. As inflation increases, the real value of the Common Shares and distributions can decline. In addition, during any periods of rising inflation, preferred share dividend rates and interest rates on Borrowings would likely increase, which, without a corresponding increase in the interest rates on investments in the Fund's portfolio, would reduce returns to Common Shareholders. Inflation risk is mitigated to a certain degree by the Fund's investments in Senior Loans and other adjustable rate debt instruments because increases in inflation have historically been accompanied by increases in the adjustable rates of interest of such securities.

Deflation Risk

Deflation risk is the risk that prices throughout the economy decline over time, which may have an adverse effect on the market valuation of companies, their assets and revenues. In addition, deflation may have an adverse effect on the creditworthiness of issuers and may make issuer default more likely, which may result in a decline in the value of the Fund's portfolio.

Impact of Offering Methods Risk

The issuance of Common Shares through the various methods described in the Prospectus may have an adverse effect on prices in the secondary market for the Fund's Common Shares by increasing the number of Common Shares available for sale. In addition, the Common Shares may be issued at a discount to the market price for such Common Shares, which may put downward pressure on the market price for Common Shares of the Fund.

Reliance on Investment Adviser

The Fund is dependent upon services and resources provided by its investment adviser, NFA, and therefore the investment adviser's parent, Nuveen Investments. Nuveen Investments has a substantial amount of indebtedness. Nuveen Investments, through its own business or the financial support of its affiliates, may not be able to generate sufficient cash flow from operations or ensure that future borrowings will be

Edgar Filing: NUVEEN SENIOR INCOME FUND - Form 486BPOS

available in an amount sufficient to enable it to pay its indebtedness with scheduled maturities beginning in 2013 or to fund its other liquidity needs. Nuveen Investments' failure to satisfy the terms of its indebtedness, including covenants therein, may generally have an adverse effect on the financial condition of Nuveen Investments. For additional information on NFA and Nuveen Investments, including the financial condition of Nuveen Investments, see Management of the Fund Additional Information Related to the Investment Adviser and Nuveen Investments.

Certain Affiliations

Certain broker-dealers may be considered to be affiliated persons of the Fund, Symphony, NFA, Nuveen Investments and/or Nuveen. Absent an exemption from the SEC or other regulatory relief, the Fund is generally precluded from effecting certain principal transactions with affiliated brokers, and its ability to purchase securities being underwritten by an affiliated broker or a syndicate including an affiliated broker, or to utilize affiliated brokers for agency transactions, is subject to restrictions. This could limit the Fund's ability to engage in securities transactions, purchase certain adjustable rate senior loans, if applicable, and take advantage of market opportunities.

Anti-Takeover Provisions

The Fund's Declaration includes provisions that could limit the ability of other entities or persons to acquire control of the Fund or convert the Fund to open-end status. These provisions could have the effect of depriving the Common Shareholders of opportunities to sell their Common Shares at a premium over the then current market price of the Common Shares. See Certain Provisions in the Declaration of Trust.

MANAGEMENT OF THE FUND

Trustees and Officers

The Board of Trustees is responsible for the management of the Fund, including supervision of the duties performed by NFA. The names and business addresses of the trustees and officers of the Fund and their principal occupations and other affiliations during the past five years are set forth under Management of the Fund in the SAI.

Investment Adviser and Subadviser

NFA, the Fund's investment adviser, offers advisory and investment management services to a broad range of mutual fund and closed-end fund clients. NFA is responsible for the overall investment strategy and its implementation, including portfolio allocations, and the use of leverage and hedging. NFA is also responsible for the ongoing monitoring of Symphony, managing the Nuveen Funds' business affairs and providing certain clerical, bookkeeping and other administrative services. NFA is located at 333 West Wacker Drive, Chicago, IL 60606.

NFA is a wholly-owned subsidiary of Nuveen Investments, Inc. (Nuveen Investments). Founded in 1898, Nuveen Investments and its affiliates had approximately \$226.7 billion in assets under management as of March 31, 2012.

Symphony, located at 555 California Street, Suite 2975, San Francisco, CA 94104, the Fund's subadviser, is responsible for managing the Fund's Managed Assets. Symphony specializes in the management of market neutral equity and debt strategies and Senior Loan and other debt portfolios. Symphony, a registered investment adviser, commenced operations in 1994 and had approximately \$9.9 billion in assets under management as of March 31, 2012. Symphony is an indirect wholly-owned subsidiary of Nuveen Investments.

Gunther Stein is the portfolio manager responsible for investing the Fund's Managed Assets. Prior to joining NFA in 1999, Mr. Stein was a high yield portfolio manager at Wells Fargo Bank, where he was responsible for investing in public high yield bonds and bank loans and also managed a team of credit analysts. Mr. Stein joined Wells Fargo in 1993 as an Associate in its Loan Syndications/Leveraged Finance Group. Previously, Mr. Stein worked for four years as a euro-currency deposit trader with First Interstate Bank. He has also worked for Standard Chartered Bank, Mexico City and Citibank Investment Bank, London. He completed Wells Fargo's Credit Management Training program and holds an M.B.A. from the University of Texas, Austin. He graduated from the University of California at Berkeley with a B.A. in Economics.

Additional information about the portfolio manager's compensation, other accounts managed by the portfolio manager and the portfolio manager's ownership of securities in the Fund is provided in the SAI. The SAI is available free of charge by calling (800) 257-8787 or by visiting the Fund's website at www.nuveen.com. The information contained in, or that can be accessed through, the Fund's website is not part of this prospectus of the SAI.

Additional Information Related to the Investment Adviser and Nuveen Investments

NFA is responsible for the execution of specific investment strategies and day-to-day investment operations. NFA manages the Nuveen Funds using a team of analysts and portfolio managers that focuses on a specific group of funds. The day-to-day operation of the Fund and the execution of its specific investment strategies is the primary responsibility of Gunther Stein, the designated portfolio manager of the Fund.

Investment Management Agreement

Pursuant to an investment management agreement between NFA and the Fund, the Fund has agreed to pay an annual management fee for the services and facilities provided by NFA, payable on a monthly basis, based on the sum of a fund-level fee and a complex-level fee, as described below.

The annual fund-level fee for the Fund, payable monthly, is calculated according to the following schedule:

<u>Average Daily Managed Assets(1)</u>	<u>Fund-Level Fee Rate</u>
For the first \$1 billion	0.6500%
For the next \$1 billion	0.6375
For the next \$3 billion	0.6250
For the next \$5 billion	0.6000
For Managed Assets over \$10 billion	0.5750

Complex Level Fee. The annual complex-level fee for the Fund, payable monthly, is calculated according to the following schedule. As of March 31, 2012, the complex-level fee rate was 0.1735%.

<u>Complex-Level Asset Breakpoint Level(1)</u>	<u>Effective Rate at Breakpoint Level</u>
\$55 billion	0.2000%
\$56 billion	0.1996
\$57 billion	0.1989
\$60 billion	0.1961
\$63 billion	0.1931
\$66 billion	0.1900
\$71 billion	0.1851
\$76 billion	0.1806

Edgar Filing: NUVEEN SENIOR INCOME FUND - Form 486BPOS

\$80 billion	0.1773
\$91 billion	0.1691
\$125 billion	0.1599
\$200 billion	0.1505
\$250 billion	0.1469
\$300 billion	0.1445

- (1) For the fund-level and complex-level fees, managed assets include closed-end fund assets managed by the Adviser that are attributable to financial leverage. For these purposes, financial leverage includes the funds' use of preferred stock and borrowings and certain investments in the residual interest certificates (also called inverse floating rate securities) in tender option bond (TOB) trusts,

including the portion of assets held by a TOB trust that has been effectively financed by the trust's issuance of floating rate securities, subject to an agreement by the Adviser as to certain funds to limit the amount of such assets for determining managed assets in certain circumstances. The complex-level fee is calculated based upon the aggregate daily managed assets of all Nuveen Funds that constitute eligible assets. Eligible assets do not include assets attributable to investments in other Nuveen Funds and assets in excess of \$2 billion added to the Nuveen Fund complex in connection with the Adviser's assumption of the management of the former First American Funds effective January 1, 2011.

The management fee compensates NFA for overall investment advisory and administrative services and general office facilities. The Fund pays all other costs and expenses of its operations, including compensation of its trustees (other than those affiliated with NFA or Symphony), custodian, transfer agency and dividend disbursing expenses, legal fees, expenses of independent auditors, expenses of repurchasing shares, expenses associated with any borrowings, expenses of preparing, printing and distributing shareholder reports, notices, proxy statements and reports to governmental agencies, and taxes, if any.

A discussion regarding the basis for the Board of Trustees' approval of the investment management and sub-advisory agreements for the Fund is available in the Fund's annual report to shareholders dated July 31 of each year.

NET ASSET VALUE

The Fund's net asset value per Common Share will be determined as of the close of trading (normally 4:00 p.m. eastern time) on each day the New York Stock Exchange is open for business. Net asset value is calculated by taking the fair value of the Fund's total assets, including interest or dividends accrued but not yet collected, less liabilities (including leverage instruments), and dividing by the total number of shares outstanding. The result, rounded to the nearest cent, is the net asset value per share.

The Senior Loans in which the Fund will invest generally are not listed on any securities exchange. Certain Senior Loans are traded by institutional investors in an over-the-counter secondary market for Senior Loan obligations that has developed over the past several years. This secondary market for those Senior Loans generally is comparatively illiquid relative to markets for other income securities and no active trading market exists for many Senior Loans. In determining net asset value, the Fund will utilize the valuations of Senior Loans furnished to the Adviser by an independent third-party pricing service approved by the Board of Trustees. The Board of Trustees has reviewed the various alternatives for pricing the Fund's portfolio of Senior Loans and has determined that the use of a pricing service is a reasonable, fair and appropriate method of valuing Senior Loans and has entered into an agreement with one or more independent third-party pricing services to provide comparable pricing services for the Fund under similar terms as those described below. The Agreement is terminable by either party and to provide that the pricing service assumes no fiduciary responsibility to the Fund or to any investor in the Fund, and that the pricing service has no liability under the Agreement to any third party, including any investor in the Fund. The Agreement provides that the pricing service will be indemnified by the Adviser unless the pricing service has acted with willful misconduct. The pricing service is explicitly permitted to act as principal for its own account in connection with the purchase and sale (from or to the Fund or otherwise) of any Senior Loan at any price simultaneously while it provides pricing services to the Fund.

Furthermore, the pricing service has no obligation to provide a valuation for a Senior Loan if it believes that it cannot determine such a valuation and, accordingly, the pricing service may not provide valuations for all the Senior Loans in the Fund's portfolio.

Pricing services typically will value Senior Loans at the mean of the highest bona fide bid and lowest bona fide ask prices when current quotations are readily available. Senior Loans for which current quotations will not be readily available are valued at a fair value as determined by the pricing service using a wide range of market

data and other information and analysis, including credit considerations considered relevant by such pricing service to determine valuations. The procedures of any pricing service and its valuations will be reviewed by the officers of the Adviser under the general supervision of the Board of Trustees. If the Adviser believes that a value provided by a pricing service does not represent a fair value as a result of information, specific to that Senior Loan or Borrower or its affiliates, of which the Adviser believes that the pricing agent may not be aware, the Adviser may in its discretion value the Senior Loan, and the Fund will utilize that price instead of the price as determined by the pricing service. In addition to such information the Adviser will consider, among other factors, (i) the creditworthiness of the Borrower and (ii) the current interest rate, the period until next interest rate reset and maturity of such Senior Loan interests in determining a fair value of a Senior Loan. If the pricing service does not provide a value for a Senior Loan or if no pricing service is then acting, a value will be determined by the Adviser in the manner described above.

It is expected that the Fund's net asset value will fluctuate as a function of interest rate and credit factors. Because of the short-term nature of such instruments, however, the Fund's net asset value is expected to fluctuate less in response to changes in interest rates than the net asset values of investment companies with portfolios consisting primarily of longer term fixed-income securities.

Because a secondary trading market in Senior Loans has not yet fully developed, the pricing service or the Adviser may not rely solely on but may consider, to the extent they believe such information to be reliable, prices or quotations provided by banks, dealers or other pricing services with respect to secondary market transactions in Senior Loans. To the extent that an active secondary trading market in Senior Loan interests develops to a reliable degree, the pricing service or the Adviser may rely to an increasing extent on such market prices and quotations in reviewing the valuations of the Senior Loan interests in the Fund's portfolio. To the extent a trading market continues to develop, certain participants in the market may have objectives other than current income and may pursue short-term trading strategies, which may result in erratic movements in the market prices for Senior Loans as a result of movements in short-term interest rates. Although the Fund's policy of acquiring interests in floating rate Senior Loans is intended to minimize fluctuations in net asset value resulting from changes in market interest rates, the Fund's net asset value will fluctuate. In light of the senior nature of Senior Loan interests that may be included in the Fund's portfolio and taking into account the Fund's access to non-public information with respect to Borrowers relating to such Senior Loan interests, the Adviser does not currently believe that consideration on a systematic basis of ratings provided by any nationally recognized statistical rating organization or price fluctuations with respect to long- or short-term debt of such Borrowers subordinate to the Senior Loans of such Borrowers is necessary in order to review the value of such Senior Loan interests. Accordingly, the Adviser generally will not systematically consider (but may consider in certain instances) and, in any event, will not rely solely upon such ratings or price fluctuations in determining or reviewing valuations of Senior Loan interests in the Fund's portfolio.

See Net Asset Value in the Statement of Additional Information.

DISTRIBUTIONS

The Fund will pay monthly distributions to Common Shareholders. Distributions will be reinvested in additional Common Shares under the Fund's Dividend Reinvestment Plan unless a Common Shareholder elects to receive cash.

The Fund will seek to pay monthly distributions at a level rate (stated in terms of a fixed cents per Common Share dividend rate) based on the Fund's projected performance. The Fund's ability to maintain a level Common Share dividend rate will depend on a number of factors. As portfolio and market conditions change, the rate of dividends on the Common Shares and the Fund's distribution policy could change. Over time, the Fund will distribute all of its net investment income. In addition, the Fund intends to distribute, at least annually, the net capital gain and taxable ordinary income, if any, to Common Shareholders.

To permit the Fund to maintain a more stable monthly distribution, the Fund may initially distribute less than the entire amount of net investment income earned in a particular period. Any such undistributed net investment income would be available to supplement future distributions. As a result, the distributions paid by the Fund for any particular monthly period may be more or less than the amount of net investment income actually earned by the Fund during the period.

Undistributed net investment income will be included in the Fund's net asset value and, correspondingly, distributions from undistributed net investment income will be deducted from the Fund's net asset value.

As explained more fully below in *Tax Matters*, at least annually, the Fund may elect to retain rather than distribute all or a portion of any net capital gain (which is the excess of net long-term capital gain over net short-term capital loss) otherwise applicable to Common Shareholders and pay U.S. federal income tax on the retained gain. As provided under federal tax law, Common Shareholders of record as of the end of the Fund's taxable year will include their attributable share of the retained net capital gain in their income for the year as a long-term capital gain (regardless of their holding period in the Common Shares), and will be entitled to an income tax credit or refund for the tax deemed paid on their behalf by the Fund. The Fund may treat the cash value of tax credit and refund amounts in connection with retained capital gains as a substitute for equivalent cash distributions. In addition, the Fund may make total distributions during a given calendar year in an amount that exceeds the Fund's net investment income and net realized long-term capital gains for that calendar year, in which case the excess would be treated by Common Shareholders as return of capital for tax purposes.

DIVIDEND REINVESTMENT PLAN

If your Common Shares are registered directly with the Fund or if you hold your Common Shares with a brokerage firm that participates in the Fund's Dividend Reinvestment Plan (the *Plan*) you may elect to have all dividends, including any capital gain dividends, on your Common Shares automatically reinvested by the Plan Agent in additional Common Shares under the Plan. You may elect to participate in the Plan by completing the Dividend Reinvestment Plan application. If you do not participate in the Plan, you will receive all distributions in cash paid by check mailed directly to you or your brokerage firm by State Street Bank and Trust Company, as dividend paying agent.

Under the Plan, the number of Common Shares you will receive will be determined as follows:

(1) If the Common Shares are trading *at or above* net asset value at the time of valuation, the Fund will issue new shares at a price equal to the greater of (i) net asset value per Common Share on that date or (ii) 95% of the market price on that date.

(2) If Common Shares are trading *below* net asset value at the time of valuation, the Plan Agent will receive the dividend or distribution in cash and will purchase Common Shares in the open market, on the New York Stock Exchange or elsewhere, for the participants' accounts. It is possible that the market price for the Common Shares may increase before the Plan Agent has completed its purchases. Therefore, the average purchase price per share paid by the Plan Agent may exceed the market price at the time of valuation, resulting in the purchase of fewer shares than if the dividend or distribution had been paid in Common Shares issued by the Fund. The Plan Agent will use all dividends and distributions received in cash to purchase Common Shares in the open market within 30 days of the valuation date. Interest will not be paid on any uninvested cash payments.

You may withdraw from the Plan at any time by giving written notice to the Plan Agent. If you withdraw or the Plan is terminated, you will receive whole shares in your account under the Plan and you will receive a cash payment for any fraction of a share in your account. If you wish, the Plan Agent will sell your shares and send you the proceeds, minus brokerage commissions and a \$2.50 service fee.

The Plan Agent maintains all shareholders' accounts in the Plan and gives written confirmation of all transactions in the accounts, including information you may need for tax records. Common Shares in your account will be held by the Plan Agent in non-certificated form. Any proxy you receive will include all Common Shares you have received under the Plan.

There is no brokerage charge for reinvestment of your dividends or distributions in Common Shares. However, all participants will pay a pro rata share of brokerage commissions incurred by the Plan Agent when it makes open market purchases.

Automatically reinvesting dividends and distributions does not mean that you do not have to pay income taxes due upon receiving dividends and distributions.

If you hold your Common Shares with a brokerage firm that does not participate in the Plan, you will not be able to participate in the Plan and any dividend reinvestment may be effected on different terms than those described above. Consult your financial advisor for more information.

The Fund reserves the right to amend or terminate the Plan if in the judgment of the Board of Trustees the change is warranted. There is no direct service charge to participants in the Plan; however, the Fund reserves the right to amend the Plan to include a service charge payable by the participants. Additional information about the Plan may be obtained by writing to State Street Bank and Trust Company, Attn: ComputerShare Nuveen Investments, P.O. Box 43071, Providence, Rhode Island 02940-3071 or by calling (800) 257-8787.

PLAN OF DISTRIBUTION

The Fund may sell the Common Shares offered under this Prospectus through

at-the-market transactions;

underwriting syndicates; and

privately negotiated transactions.

The Fund will bear the expenses of the Offering, including but not limited to, the expenses of preparation of the Prospectus and SAI for the Offering and the expense of counsel and auditors in connection with the Offering.

Distribution Through At-the-Market Transactions

The Fund has entered into a Distribution Agreement with Nuveen, and Nuveen has entered into an Equity Distribution Agreement (the "Selected Dealer Agreement") with Stifel, Nicolaus & Company, Incorporated ("Stifel Nicolaus"), pursuant to which Stifel Nicolaus will act as the exclusive sub-placement agent with respect to at-the-market offerings of the Common Shares. A form of the Selected Dealer Agreement has been filed as

Edgar Filing: NUVEEN SENIOR INCOME FUND - Form 486BPOS

an exhibit to the Registration Statement of which this Prospectus forms a part. The summary of the Selected Dealer Agreement contained herein is qualified by reference to the Selected Dealer Agreement.

Common Shares will only be sold on such days as shall be agreed to by the Fund, Nuveen and Stifel Nicolaus. Common Shares will be sold at market prices, which shall be determined with reference to trades on the NYSE, subject to a minimum price to be established each day by Nuveen. The minimum price on any day will not be less than the current net asset value per Common Share plus the per share amount of the commission to be paid to Nuveen. Nuveen and Stifel Nicolaus will suspend the sale of Common Shares if the per share price of the shares is less than the minimum price.

The Fund will compensate Nuveen with respect to sales of the Common Shares at a commission rate of up to 1% of the gross proceeds of the sale of Common Shares. Nuveen will compensate Stifel Nicolaus at a fixed rate of 0.80% of the gross proceeds of the sale of Common Shares sold by Stifel Nicolaus. Settlements of sales of Common Shares will occur on the third business day following the date on which any such sales are made.

In connection with the sale of the Common Shares on behalf of the Fund, Nuveen may be deemed to be an underwriter within the meaning of the 1933 Act, and the compensation of Nuveen may be deemed to be underwriting commissions or discounts. Unless otherwise indicated in a Prospectus supplement, Nuveen and Stifel Nicolaus will act on a reasonable efforts basis.

The offering of Common Shares pursuant to the Selected Dealer Agreement will terminate upon the earlier of (i) the sale of all Shares subject thereto or (ii) termination of the Selected Dealer Agreement. Each of Nuveen and Stifel Nicolaus has the right to terminate the Selected Dealer Agreement in its discretion at any time.

In connection with an inquiry by FINRA into the activities of Nuveen, a registered broker-dealer affiliate of Nuveen Asset Management that is involved in the offering of the Fund's shares, in marketing and distributing preferred shares of certain closed-end funds managed by Nuveen Fund Advisors, FINRA staff members had previously notified Nuveen that they had made a preliminary determination to recommend that disciplinary action be brought against Nuveen. A letter of acceptance, waiver and consent was publicly issued by FINRA on May 23, 2011, including findings by the FINRA staff that certain closed-end fund preferred share marketing materials provided by Nuveen were false and misleading from 2006 to 2008, and of failures by Nuveen relating to its supervisory system with respect to the marketing of such preferred shares. Nuveen neither admitted nor denied these findings, and agreed, among other things, to pay a fine of \$3 million in connection with the settlement of this matter.

The Fund currently intends to distribute the Common Shares offered pursuant to this Prospectus primarily through at-the-market transactions, although from time to time it may also distribute Common Shares through an underwriting syndicate or a privately negotiated transaction. To the extent Common Shares are distributed other than through at-the-market transactions, the Fund will file a supplement to this Prospectus describing such transactions.

As of April 30, 2012, the Fund has sold in this offering an aggregate of 2,567,822 shares of common stock, representing net proceeds to the Fund of \$18,600,829, after payment of commissions on \$187,892 in the aggregate.

Distribution Through Underwriting Syndicates

The Fund from time to time may issue Common Shares through a syndicated secondary offering. In order to limit the impact on the market price of the Fund's Common Shares, underwriters will market and price the offering on an expedited basis (*e.g.*, overnight or similarly abbreviated offering period). The Fund will launch a syndicated offering on a day, and upon terms, mutually agreed upon between the Fund, Nuveen, one of the Fund's underwriters, and the underwriting syndicate.

The Fund will offer its shares at a price equal to a specified discount of up to 5% from the closing market price of the Fund's Common Shares on the day prior to the offering date. The applicable discount will be negotiated by the Fund and Nuveen in consultation with the underwriting syndicate on a transaction-by-transaction basis. The Fund will compensate the underwriting syndicate out of the proceeds of the offering based upon a sales load of up to 4% of the gross proceeds of the sale of Common Shares. The minimum net proceeds per share to the Fund will not be less than the greater of (i) the Fund's latest net asset value per Common Share or (ii) 91% of the closing market price of the Fund's Common Shares on the day prior to the offering date.

Distribution Through Privately Negotiated Transactions

Edgar Filing: NUVEEN SENIOR INCOME FUND - Form 486BPOS

The Fund, through Nuveen, from time to time may sell directly to, and solicit offers from, institutional and other sophisticated investors, who may be deemed to be underwriters as defined in the 1933 Act for any resale of Common Shares. No sales commissions or other compensation will be paid to Nuveen or any other FINRA member in connection with such transactions.

The terms of such privately negotiated transactions will be subject to the discretion of the management of the Fund. In determining whether to sell Common Shares through a privately negotiated transaction, the Fund will consider relevant factors, including, but not limited to, the attractiveness of obtaining additional funds through the sale of Common Shares, the purchase price to apply to any such sale of Common Shares and the person seeking to purchase the Common Shares.

Common Shares issued by the Fund through privately negotiated transactions will be issued at a price equal to the greater of (i) the net asset value per Common Share of the Fund's Common Shares or (ii) at a discount ranging from 0% to 5% of the average daily closing market price of the Fund's Common Shares at the close of business on the two business days preceding the date upon which Common Shares are sold pursuant to the privately negotiated transaction. The applicable discount will be determined by the Fund on a transaction-by-transaction basis.

DESCRIPTION OF SHARES

Common Shares

The Declaration authorizes the issuance of an unlimited number of Common Shares. The Common Shares being offered have a par value of \$0.01 per share and, subject to the rights of holders of preferred shares, if issued, and Borrowings, if incurred, have equal rights to the payment of dividends and the distribution of assets upon liquidation. The Common Shares being offered will, when issued, be fully paid and, subject to matters discussed in Certain Provisions in the Declaration of Trust, non-assessable, and will have no pre-emptive or conversion rights or rights to cumulative voting. Whenever the Fund incurs Borrowings and/or preferred shares are outstanding, Common Shareholders will not be entitled to receive any cash distributions from the Fund unless all interest on such Borrowings has been paid and all accrued dividends on preferred shares have been paid, unless asset coverage (as defined in the 1940 Act) with respect to any Borrowings would be at least 300% after giving effect to the distributions and asset coverage (as defined in the 1940 Act) with respect to preferred shares would be at least 200% after giving effect to the distributions. See Description of Shares Preferred Shares below.

The Common Shares have been approved for listing on the NYSE, subject to notice of issuance. The Fund intends to hold annual meetings of shareholders so long as the Common Shares are listed on a national securities exchange and such meetings are required as a condition to such listing. The Fund will not issue share certificates.

Unlike open-end funds, closed-end funds like the Fund do not provide daily redemptions. Rather, if a shareholder determines to buy Common Shares or sell shares already held, the shareholder may conveniently do so by trading on the exchange through a broker or otherwise. Shares of closed-end investment companies may frequently trade on an exchange at prices lower than net asset value. Shares of closed-end investment companies like the Fund have during some periods traded at prices higher than net asset value and have during other periods traded at prices lower than net asset value.

Because the market value of the Common Shares may be influenced by such factors as distribution levels (which are in turn affected by expenses), call protection, dividend stability, portfolio credit quality, net asset value, relative demand for and supply of such shares in the market, general market and economic conditions, and other factors beyond the control of the Fund, the Fund cannot assure you that Common Shares will trade at a price equal to or higher than net asset value in the future. The Common Shares are designed primarily for long-term investors, and investors in the Common Shares should not view the Fund as a vehicle for trading purposes. See Repurchase of Fund Shares; Conversion to Open-End Fund.

Borrowings

Edgar Filing: NUVEEN SENIOR INCOME FUND - Form 486BPOS

The Declaration authorizes the Fund, without approval of the Common Shareholders, to borrow money. In this connection, the Fund may issue notes or other evidence of indebtedness (including bank borrowings or

commercial paper) and may secure any such borrowings by mortgaging, pledging or otherwise subjecting as security the Fund's assets. The Fund has entered into a \$109,000,000 Revolving Credit and Security Agreement with an affiliate of Citibank. As of January 31, 2012, the Fund's outstanding balance on these borrowings was \$75,500,000. For the six months ended January 31, 2012, the average daily balance outstanding and average annual interest rate on these borrowings were \$75,129,348 and 1.13%, respectively. The Fund borrows money at rates generally available to institutional investors. In connection with such Borrowings, the Fund may be required to maintain minimum average balances with the lender or to pay a commitment or other fee to maintain a line of credit. Any such requirements will increase the cost of any such Borrowings over the stated interest rate. Under the requirements of the 1940 Act, the Fund, immediately after any such Borrowings, must have an asset coverage of at least 300%. With respect to any such Borrowings, asset coverage means the ratio that the value of the total assets of the Fund, less all liabilities and indebtedness not represented by senior securities (as defined in the 1940 Act), bears to the aggregate amount of such Borrowings represented by senior securities issued by the Fund. Certain types of Borrowings may result in the Fund being subject to covenants in credit agreements relating to asset coverages or portfolio coverages or otherwise. In addition, as with the issuance of preferred shares, certain types of Borrowings may result in the Fund being subject to certain restrictions imposed by guidelines of one or more rating agencies that may issue ratings for commercial paper or notes issued by the Fund. Such restrictions may be more stringent than those imposed by the 1940 Act.

The rights of lenders to the Fund to receive interest on and repayment of principal of any such Borrowings will be senior to those of the Common Shareholders, and the terms of any such Borrowings may contain provisions which limit certain activities of the Fund, including the payment of dividends to Common Shareholders in certain circumstances. Furthermore, the 1940 Act does (in certain circumstances) grant to the lenders to the Fund certain voting rights in the event of default in the payment of interest on or repayment of principal. In the event that such provisions would impair the Fund's status as a regulated investment company under the Code, the Fund would repay the Borrowings. Any Borrowings will likely be ranked senior or equal to all other existing and future Borrowings of the Fund. The Fund may also borrow money for repurchase of its shares or as a temporary measure for extraordinary or emergency situations. See *Investment Restrictions* in the Statement of Additional Information.

Preferred Shares

The Declaration authorizes the issuance of an unlimited number of preferred shares in one or more classes or series, with rights as determined by the Board of Trustees, by action of the Board of Trustees without the approval of the Common Shareholders. The Fund has issued preferred shares in the past, but as of March 31, 2012 no preferred shares were outstanding. The Fund may again in the future issue certain types of preferred securities to increase the Fund's leverage.

Limited Issuance of Preferred Shares. Under the 1940 Act, the Fund could issue preferred shares with an aggregate liquidation value of up to one-half of the value of the Fund's total net assets, including any liabilities associated with Borrowings, measured immediately after issuance of the preferred shares. Liquidation value means the original purchase price of the shares being liquidated plus any accrued and unpaid dividends. In addition, the Fund is not permitted to declare any cash dividend or other distribution on its Common Shares unless the liquidation value of the preferred shares is less than one-half of the value of the Fund's total net assets (determined after deducting the amount of such dividend or distribution) immediately after the distribution.

Distribution Preference. If issued in the future, preferred shares would have complete priority over the Common Shares as to distribution of assets.

Liquidation Preference. In the event of any voluntary or involuntary liquidation, dissolution or winding up of the affairs of the Fund, holders of preferred shares, if issued in the future, would be entitled to receive a preferential liquidating distribution (expected to equal the original purchase price per share plus accumulated and unpaid dividends thereon, whether or not earned or declared) before any distribution of assets is made to Common Shareholders.

Voting Rights. Preferred shares are required to be voting shares and to have equal voting rights with Common Shares. Except as otherwise indicated in this Prospectus or the SAI and except as otherwise required by applicable law, preferred shares, if issued in the future, would vote together with Common Shareholders as a single class.

Holders of preferred shares, if issued in the future, voting as a separate class, would be entitled to elect two of the Fund's trustees (following the establishment of the Fund by an initial trustee, the Declaration provides for a total of no less than two and no more than 12 trustees). The remaining trustees would be elected by Common Shareholders and holders of preferred shares, if issued in the future, voting together as a single class. In the unlikely event that two full years of accrued dividends are unpaid on the preferred shares, if issued in the future, the holders of all outstanding preferred shares, if issued in the future, voting as a separate class, would be entitled to elect a majority of the Fund's trustees until all dividends in arrears have been paid or declared and set apart for payment. In order for the Fund to take certain actions or enter into certain transactions, a separate class vote of holders of preferred shares, if issued in the future, would be required, in addition to the single class vote of the holders of preferred shares, if issued in the future, and Common Shares. See Certain Provisions in the Declaration of Trust and the SAI under Description of Shares Preferred Shares Voting Rights.

Redemption, Purchase and Sale of Preferred Shares. The terms of the preferred shares, if issued in the future, would provide that they may be redeemed by the issuer at certain times, in whole or in part, at the original purchase price per share plus accumulated dividends. Any redemption or purchase of preferred shares, if issued in the future, by the Fund will reduce the leverage applicable to Common Shares, while any issuance of shares by the Fund would increase such leverage.

CERTAIN PROVISIONS IN THE DECLARATION OF TRUST

Under Massachusetts law, shareholders could, under certain circumstances, be held personally liable for the obligations of the Fund. However, the Declaration contains an express disclaimer of shareholder liability for debts or obligations of the Fund and requires that notice of such limited liability be given in each agreement, obligation or instrument entered into or executed by the Fund or the trustees. The Declaration further provides for indemnification out of the assets and property of the Fund for all loss and expense of any shareholder held personally liable for the obligations of the Fund. Thus, the risk of a shareholder incurring financial loss on account of shareholder liability is limited to circumstances in which the Fund would be unable to meet its obligations. The Fund believes that the likelihood of such circumstances is remote.

The Declaration includes provisions that could limit the ability of other entities or persons to acquire control of the Fund or to convert the Fund to open-end status. Specifically, the Declaration requires a vote by holders of at least two-thirds of the Common Shares and preferred shares, if issued in the future, voting together as a single class, except as described below, to authorize (1) a conversion of the Fund from a closed-end to an open-end investment company, (2) a merger or consolidation of the Fund, or a series or class of the Fund, with any corporation, association, trust or other organization or a reorganization of the Fund, or a series or class of the Fund, (3) a sale, lease or transfer of all or substantially all of the Fund's assets (other than in the regular course of the Fund's investment activities), (4) in certain circumstances, a termination of the Fund, or a series or class of the Fund, or (5) a removal of trustees by shareholders, and then only for cause, unless, with respect to (1) through (4), such transaction has already been authorized by the affirmative vote of two-thirds of the total number of trustees fixed in accordance with the Declaration or the By-laws, in which case the affirmative vote of the holders of at least a majority of the Fund's Common Shares and preferred shares, if issued in the future, outstanding at the time, voting together as a single class, is required; provided, however, that where only a particular class or series is affected (or, in the case of removing a trustee, when the trustee has been elected by only one class), only the required vote by the applicable class or series will be required. Approval of shareholders is not required, however, for any transaction, whether deemed a merger, consolidation, reorganization or otherwise whereby the Fund issues shares in connection with the acquisition of assets (including those subject to liabilities) from any other investment company or similar entity. In the case of the conversion of the Fund to an

open-end investment company, or in the case of any of the foregoing transactions constituting a plan of reorganization which adversely affects the holders of preferred shares, if issued in the future, the action in question will also require the affirmative vote of the holders of at least two-thirds of the Fund's preferred shares, if issued in the future, outstanding at the time, voting as a separate class, or, if such action has been authorized by the affirmative vote of two-thirds of the total number of trustees fixed in accordance with the Declaration or the By-laws, the affirmative vote of the holders of at least a majority of the Fund's preferred shares, if issued in the future, outstanding at the time, voting as a separate class. None of the foregoing provisions may be amended except by the vote of at least two-thirds of the Common Shares and preferred shares, if issued in the future, voting together as a single class. The votes required to approve the conversion of the Fund from a closed-end to an open-end investment company or to approve transactions constituting a plan of reorganization which adversely affects the holders of preferred shares, if issued in the future, are higher than those required by the 1940 Act. The Board of Trustees believes that the provisions of the Declaration relating to such higher votes are in the best interest of the Fund and its shareholders. See the SAI under Certain Provisions in the Declaration of Trust.

The provisions of the Declaration described above could have the effect of depriving the Common Shareholders of opportunities to sell their Common Shares at a premium over the then current market price of the Common Shares by discouraging a third party from seeking to obtain control of the Fund in a tender offer or similar transaction. The overall effect of these provisions is to render more difficult the accomplishment of a merger or the assumption of control by a third party. They provide, however, the advantage of potentially requiring persons seeking control of the Fund to negotiate with its management regarding the price to be paid and facilitating the continuity of the Fund's investment objective and policies. The Board of Trustees of the Fund has considered the foregoing anti-takeover provisions and concluded that they are in the best interests of the Fund and its Common Shareholders.

Reference should be made to the Declaration on file with the SEC for the full text of these provisions.

REPURCHASE OF FUND SHARES; CONVERSION TO OPEN-END FUND

The Fund is a closed-end investment company and as such its shareholders will not have the right to cause the Fund to redeem their shares. Instead, the Common Shares will trade in the open market at a price that will be a function of several factors, including dividend levels (which are in turn affected by expenses), net asset value, call protection, dividend stability, portfolio credit quality, relative demand for and supply of such shares in the market, general market and economic conditions and other factors. Because shares of closed-end investment companies may frequently trade at prices lower than net asset value, the Fund's Board of Trustees has currently determined that, at least annually, it will consider action that might be taken to reduce or eliminate any material discount from net asset value in respect of Common Shares, which may include the repurchase of such shares in the open market or in private transactions, the making of a tender offer for such shares at net asset value, or the conversion of the Fund to an open-end investment company. The Fund cannot assure you that its Board of Trustees will decide to take any of these actions, or that share repurchases or tender offers will actually reduce market discount. On July 30, 2008, the Fund's Board of Trustees approved an open market share repurchase program under which the Fund may repurchase up to 10% of its Common Shares. Since the inception of the Fund's repurchase program, the Fund has not repurchased any of its outstanding Common Shares.

If the Fund converted to an open-end investment company, it would be required to redeem all preferred shares then outstanding, if any (requiring in turn that it liquidate a portion of its investment portfolio), and the Common Shares would no longer be listed on the NYSE. In contrast to a closed-end investment company, shareholders of an open-end investment company may require the company to redeem their shares at any time (except in certain circumstances as authorized by or under the 1940 Act) at their net asset value, less any redemption charge that is in effect at the time of redemption. See the SAI under Certain Provisions in the Declaration of Trust for a discussion of the voting requirements applicable to the conversion of the Fund to an open-end investment company.

Before deciding whether to take any action if the Common Shares trade below net asset value, the Board would consider all relevant factors, including the extent and duration of the discount, the liquidity of the Fund's portfolio, the impact of any action that might be taken on the Fund or its shareholders, and market considerations. Based on these considerations, even if the Fund's shares should trade at a discount, the Board of Trustees may determine that, in the interest of the Fund and its shareholders, no action should be taken. See the SAI under Repurchase of Fund Shares; Conversion to Open-End Fund for a further discussion of possible action to reduce or eliminate such discount to net asset value.

TAX MATTERS

The following information is meant as a general summary for U.S. shareholders. Please see the SAI for additional information. Investors should rely on their own tax adviser for advice about the particular federal, state and local tax consequences to them of investing in the Fund.

The Fund intends to qualify for the special tax treatment afforded to regulated investment companies (RIC) under the Internal Revenue Code of 1986, as amended (the Code). As long as the Fund qualifies as a regulated investment company, it pays no federal income tax on the earnings it distributes to shareholders.

Unless your investment in the Fund is through a tax-exempt entity or tax deferred retirement account, such as a 401(k) plan, you will normally have to pay federal income taxes, and any state or local taxes, on the dividends and other distributions you receive from the Fund, whether you take the distributions in cash or reinvest them in additional shares. For U.S. federal income tax purposes, distributions from the Fund's net capital gains (if any) are considered long-term capital gains and may be taxable to you at reduced rates. Distributions from the Fund's net short-term capital gains are taxable as ordinary income. Other dividends are generally taxable as ordinary income. Since the Fund's income is derived primarily from sources that do not pay dividends, it is not expected that a substantial portion of dividends paid by the Fund will qualify for either the dividends-received deduction for corporations or the currently available reduced U.S. federal income tax rates available to individuals on qualified dividend income. A distribution of an amount in excess of the Fund's current and accumulated earnings and profits will be treated by a shareholder as a return of capital which is applied against and reduces the shareholder's basis in his or her shares. To the extent the amount of any such distribution exceeds the shareholder's basis in his or her shares, the excess will be treated by the shareholder as gain from a sale or exchange of the shares.

The Fund will report to shareholders annually the U.S. federal income tax status of all Fund distributions.

If the Fund declares a dividend in October, November or December, payable to shareholders of record in such a month, but pays it in January of the following year, you will be taxed on the dividend as if you received it in the year in which it was declared.

Unless your investment in the Fund is through a tax-exempt entity or tax deferred retirement account, when you sell or exchange Fund shares you will generally recognize a capital gain or capital loss in an amount equal to the difference between the net amount of sale proceeds (or, in the case of an exchange, the fair market value of the shares) that you receive and your tax basis for the shares that you sell or exchange.

Investments by the Fund in zero coupon or other discount securities will result in income to the Fund equal to a portion of the excess of the face value of the securities over their issue price (the original issue discount or OID) each year that the securities are held, even though the Fund receives no cash interest payments. In addition, any market discount recognized on a bond is taxable as ordinary income. A market discount bond is a bond acquired in the secondary market at a price below redemption value or adjusted issue price if issued with original issue discount. Absent an election by the Fund to include the market discount in income as it accrues, gain on the Fund's disposition of such an obligation will be treated as ordinary income rather than capital gain to the extent of the accrued market discount. Because the income required to be recognized

by the Fund as a result

of the OID and/or market discount rules may not be matched by a corresponding cash distribution to the Fund, the Fund may be required to borrow money or dispose of other securities to be able to make distributions to its shareholders to meet the requirements to retain its RIC qualification and eliminate taxes at the Fund level.

Recent legislation effective beginning in 2013 provides that U.S. individuals with income exceeding \$200,000 (\$250,000 if married and filing jointly) will be subject to a new 3.8% Medicare contribution tax on their net investment income, including interest, dividends, and capital gains (including capital gains realized on the sale or exchange of shares of the Fund), but net investment income for this purpose does not include exempt-interest dividends.

The redemption, sale or exchange of shares of Common Shares normally will result in capital gain or loss to holders of Common Shares who hold their shares as capital assets. Generally a shareholder's gain or loss will be long-term capital gain or loss if the shares have been held for more than one year even though the increase in value in such shares of Common Shares is attributable to tax-exempt interest income. Present law taxes both long-term and short-term capital gains of corporations at the same rates applicable to ordinary income. For non-corporate taxpayers, however, long-term capital gains are currently taxed at a maximum rate of 15%, while short-term capital gains and other ordinary income are currently taxed at ordinary income rates. As noted above, absent further legislation, the maximum rates applicable to long-term capital gains will cease to apply to taxable years beginning after December 31, 2012 and the maximum rate on long-term capital gains will return under current law to 20%. Any loss on the sale of shares of Common Shares that have been held for six months or less will be disallowed to the extent of any distribution of exempt-interest dividends received with respect to such shares of Common Shares. If a shareholder sells or otherwise disposes of shares of Common Shares before holding them for six months, any loss on the sale or disposition will be treated as a long-term capital loss to the extent of any capital gain dividends received by the Common Shareholder. Any loss realized on a sale or exchange of shares of the Fund will be disallowed to the extent those shares of the Fund are replaced by other substantially identical shares (or enters into a contract or option to repurchase shares) of the Fund within a period of 61 days beginning 30 days before and ending 30 days after the date of disposition of the original shares. This loss disallowance rule will apply to shares received through the reinvestment of dividends during the 61-day period. In that event, the basis of the replacement shares of the Fund will be adjusted to reflect the disallowed loss.

Any interest on indebtedness incurred or continued to purchase or carry the Fund's shares to which exempt interest dividends are allocated is not deductible. Under certain applicable rules, the purchase or ownership of shares may be considered to have been made with borrowed funds even though such funds are not directly used for the purchase or ownership of the shares. In addition, if you receive social security or certain railroad retirement benefits, you may be subject to U.S. federal income tax on a portion of such benefits as a result of receiving investment income, including exempt-interest dividends and other distributions paid by the Fund.

As with all investment companies, the Fund will be required in certain cases to withhold at applicable withholding rates (currently 28%, but scheduled to revert to 31% on January 1, 2013) and remit to the United States Treasury the amount withheld on amounts payable to any shareholder who (1) has provided the Fund either an incorrect tax identification number or no number at all, (2) is subject to backup withholding by the Internal Revenue Service for failure to properly report payments of interest or dividends, (3) has failed to certify to the Fund that such shareholder is not subject to backup withholding, or (4) has not certified that such shareholder is a U.S. person (including a U.S. resident alien).

CUSTODIAN AND TRANSFER AGENT

The custodian of the assets of the Fund is State Street Bank and Trust Company, One Lincoln Street, Boston, Massachusetts 02110. The Custodian performs custodial, fund accounting and portfolio accounting services. The Fund's transfer, shareholder services and dividend paying agent is also State Street (Transfer Agent). The Transfer Agent is located at 250 Royall Street, Canton, Massachusetts 02021.

INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Ernst & Young LLP, an independent registered public accounting firm, provides auditing services to the Fund.

LEGAL OPINION

Certain legal matters in connection with the Common Shares will be passed upon for the Fund by Morgan, Lewis & Bockius LLP and for Stifel Nicolaus by Andrews Kurth LLP, New York, New York.

AVAILABLE INFORMATION

The Fund is subject to the informational requirements of the Securities Exchange Act of 1934, as amended (the Exchange Act) and the 1940 Act and is required to file reports, proxy statements and other information with the SEC. These documents can be inspected and copied for a fee at the SEC's public reference room, 100 F Street, NE, Washington, D.C. 20549, and Northeast Regional Office, Woolworth Building, 233 Broadway, New York, NY 10013-2409. Reports, proxy statements, and other information about the Fund can be inspected at the offices of the NYSE.

This Prospectus does not contain all of the information in the Fund's Registration Statement, including amendments, exhibits, and schedules. Statements in this Prospectus about the contents of any contract or other document are not necessarily complete and in each instance reference is made to the copy of the contract or other document filed as an exhibit to the Registration Statement, each such statement being qualified in all respects by this reference.

Additional information about the Fund and Common Shares can be found in the Fund's Registration Statement (including amendments, exhibits, and schedules) on Form N-2 filed with the SEC. The SEC maintains a web site (<http://www.sec.gov>) that contains the Fund's Registration Statement, other documents incorporated by reference, and other information the Fund has filed electronically with the SEC, including proxy statements and reports file under the Exchange Act.

2.9 Million Common Shares

Nuveen Senior Income Fund

PROSPECTUS

May 31, 2012

EPR-NSL-0512D

NUVEEN SENIOR INCOME FUND

333 West Wacker Drive

Chicago, Illinois 60606

STATEMENT OF ADDITIONAL INFORMATION

May 31, 2012

Nuveen Senior Income Fund (the "Fund") is a non-diversified, closed-end management investment company registered under the Investment Company Act of 1940, as amended ("1940 Act"). The Fund was organized on March 25, 2004. This Statement of Additional Information relating to common shares of the Fund ("Common Shares") does not constitute a Prospectus, but should be read in conjunction with the Fund's Prospectus relating thereto dated May 31, 2012 (the "Prospectus"). This Statement of Additional Information does not include all information that a prospective investor should consider before purchasing Common Shares. Investors should obtain and read the Fund's Prospectus prior to purchasing such shares. In addition, the Fund's financial statements and the independent registered public accounting firm's report therein included in the Fund's annual report dated July 31, 2011, are incorporated herein by reference. Also incorporated by reference is the Fund's unaudited semi-annual report dated January 31, 2012. A copy of the Fund's Prospectus may be obtained without charge by calling (800) 257-8787. You may also obtain a copy of the Fund's Prospectus on the U.S. Securities and Exchange Commission's SEC web site (<http://www.sec.gov>). Capitalized terms used but not defined in this Statement of Additional Information have the meanings ascribed to them in the Prospectus.

USE OF PROCEEDS

The net proceeds from the issuance of Common Shares hereunder will be used by the Fund to (i) invest in securities in accordance with the Fund's investment objective and policies as stated below and/or (ii) to reduce the Fund's financial leverage outstanding. To the extent the Fund uses the net proceeds of any offering to invest in securities, it is presently anticipated that the Fund will be able to invest substantially all of such proceeds in securities that meet the Fund's investment objective and policies within one month from the date on which the proceeds from an offering are received by the Fund. Pending investment in Senior Loans and other debt instruments that meet the Fund's investment objective and policies, it is anticipated that the proceeds will be invested in short-term or long-term securities issued by the U.S. Government and its agencies or instrumentalities or in high quality, short-term money market instruments.

INVESTMENT OBJECTIVE

The Fund's investment objective is to achieve a high level of current income, consistent with preservation of capital.

Nuveen Fund Advisors, Inc. (formerly, Nuveen Asset Management) (NFA or the Adviser), the Fund's investment adviser, is responsible for the Fund's overall investment strategy and its implementation, including the use of leverage and hedging. Symphony Asset Management LLC (Symphony or Subadviser), the Fund's subadviser, is responsible for the day-to-day management of the Fund's Managed Assets. See Overall Fund Management.

The Fund seeks to achieve its objective primarily by investing in senior secured and unsecured loans whose interest rates adjust periodically based on a benchmark index such as the Prime Rate or LIBOR. Although the Fund's net asset value will vary, the Fund's policy of acquiring interests in floating or variable rate, U.S. dollar-denominated senior loans (Senior Loans) is expected to minimize the fluctuations in the Fund's net asset value as a result of changes in interest rates. The Fund's net asset value may be affected by changes in the credit quality of borrowers with respect to Senior Loan interests in which the Fund invests. Fluctuations in net asset value may be magnified as a result of the Fund's use of leverage. In addition, the Fund's use of leverage may affect the Fund's ability to make distributions. The Common Shares may trade at a discount or premium to net asset value. An investment in the Fund may not be appropriate for all investors and is not intended to be a complete investment program. No assurance can be given that the Fund will achieve its investment objective. For further discussion of the characteristics of Senior Loan interests and associated special risk considerations, see The Fund's Investments in the Prospectus.

The Fund cannot change its investment objective without the approval of the holders of a majority of the outstanding Common Shares and preferred shares voting together as a single class, and of the holders of a majority of the outstanding preferred shares voting as a separate class. When used with respect to particular shares of the Fund, a majority of the outstanding shares means (i) 67% or more of the shares present at a meeting, if the holders of more than 50% of the shares are present or represented by proxy, or (ii) more than 50% of the shares, whichever is less. See Description of Shares Preferred Shares Voting Rights in the Fund's Prospectus and in this Statement of Additional Information for additional information with respect to the voting rights of holders of preferred shares.

INVESTMENT RESTRICTIONS

The Fund's investment objective and certain fundamental investment policies of the Fund are described in the Prospectus. The Fund, as a fundamental policy, may not, without the approval of the holders of a majority of the shares of the Fund:

1. Purchase any security if, as a result of such purchase, 25% or more of the Fund's total assets (taken at current value) would be invested in the securities of borrowers and other issuers having their principal

business activities in the same industry (the electric, gas, water and telephone utility industries, commercial banks, thrift institutions and finance companies being treated as separate industries for purposes of this restriction); provided, that this limitation shall not apply with respect to obligations issued or guaranteed by the U.S. Government or by its agencies or instrumentalities and provided further that for purposes of this limitation, the term issuer shall not include a lender selling a participation to the Fund together with any other person interpositioned between such lender and the Fund with respect to a participation.

2. Borrow money, except as permitted by the 1940 Act.

3. Issue senior securities, as defined in the 1940 Act, other than (i) preferred shares which immediately after issuance will have asset coverage of at least 200%, (ii) indebtedness which immediately after issuance will have asset coverage of at least 300%, or (iii) the borrowings permitted by investment restriction 2. above.

4. Make loans of money or property to any person, except for obtaining interests in Senior Loans in accordance with its investment objective, through loans of portfolio securities or the acquisition of securities subject to repurchase agreements.

5. Act as an underwriter of securities, except to the extent the Fund may be deemed to be an underwriter in certain cases when disposing of its portfolio investments or acting as an agent or one of a group of co-agents in originating senior loans.

6. Purchase or sell real estate, commodities or commodities contracts except pursuant to the exercise by the Fund of its rights under loan agreements, except to the extent the interests in senior loans the Fund may invest in are considered to be interests in real estate, commodities or commodities contracts and except to the extent that hedging instruments the Fund may invest in are considered to be commodities or commodities contracts.

For the purpose of applying the limitation set forth in paragraph 2 above, under the 1940 Act, the Fund generally is not permitted to issue commercial paper or notes or borrow unless immediately after the borrowing or commercial paper or note issuance the value of the Fund's total assets less liabilities other than the principal amount represented by the commercial paper, notes or borrowings, is at least 300% of such principal amount. The Fund does not currently have or have pending any exemptive relief with the Securities and Exchange Commission that would allow it to borrow outside of the limits of the 1940 Act.

For the purpose of applying the limitation set forth in paragraph 3 above, the Fund may not issue senior securities not permitted by the 1940 Act simply by describing such securities in the Prospectus.

In addition to the foregoing fundamental investment policies, the Fund is also subject to the following non-fundamental restrictions and policies, which may be changed by the Board of Trustees. The Fund may not:

1. Purchase any securities (other than obligations issued or guaranteed by the United States Government or by its agencies or instrumentalities), if as a result more than 10% of the Fund's total assets would then be invested in securities of a single issuer or if as a result the Fund would hold more than 10% of the outstanding voting securities of any single issuer; provided that, with respect to 50% of the Fund's assets, the Fund may invest up to 25% of its assets in the securities of any one issuer. For purposes of this restriction, the term issuer includes both the borrower under a loan agreement and the lender selling a participation to the Fund together with any other persons interpositioned between such lender and the Fund with respect to a participation.

2. Sell any security short, write, purchase or sell puts, calls or combinations thereof, or purchase or sell financial futures or options, except to the extent that the hedging transactions in which the Fund may engage would be deemed to be any of the foregoing transactions.

3. Invest in securities of other investment companies, except that the Fund may purchase securities of other investment companies to the extent permitted by (i) the 1940 Act, as amended from time to time,

(ii) the rules and regulations promulgated by the Securities and exchange Commission under the 1940 Act, as amended from time to time, or (iii) an exemption or other relief from the provisions of the 1940 Act. The Fund will rely on representations of borrowers in loan agreements in determining whether such borrowers are investment companies.

4. Make investments for the purpose of exercising control or participation in management, except to the extent that exercise by the Fund of its rights under loan agreements would be deemed to constitute such control or participation.

For purposes of non-fundamental investment restriction number 1, the Fund will consider all relevant factors in determining whether to treat the Lender selling a Participation and any persons interpositioned between such Lender and the Fund as an issuer, including: the terms of the Loan Agreement and other relevant agreements (including inter-creditor agreements and any agreements between such person and the Fund's custodian); the credit quality of such Lender or interpositioned person; general economic conditions applicable to such Lender or interpositioned person; and other factors relating to the degree of credit risk, if any, of such Lender or interpositioned person incurred by the Fund.

The Fund's policy under normal circumstances of investing at least 80% of its total assets in adjustable rate, U.S. dollar-denominated, secured and unsecured Senior Loans, which unsecured Senior Loans will be, at the time of investment, investment grade quality, is not considered to be fundamental by the Fund and can be changed without a vote of the Common Shareholders. However, this policy may only be changed by the Fund's Board upon 60 days prior written notice to the Common Shareholders.

The Fund generally will not engage in the trading of securities for the purpose of realizing short-term profits, but it will adjust its portfolio as it deems advisable in view of prevailing or anticipated market conditions to accomplish the Fund's investment objective. For example, the Fund may sell portfolio securities in anticipation of a movement in interest rates. Frequency of portfolio turnover will not be a limiting factor if the Fund considers it advantageous to purchase or sell securities. The Fund anticipates that the annual portfolio turnover rate of the Fund will not be in excess of 100%. A high rate of portfolio turnover involves correspondingly greater expenses than a lower rate, which expenses must be borne by the Fund and its shareholders.

The foregoing restrictions and limitations will apply only at the time of purchase of securities, and the percentage limitations will not be considered violated unless an excess or deficiency occurs or exists immediately after and as a result of an acquisition of securities, unless otherwise indicated.

The foregoing fundamental investment policies, together with the investment objective of the Fund, cannot be changed without approval by holders of a majority of the Fund's outstanding voting shares. As defined in the 1940 Act, this means the vote of (i) 67% or more of the Fund's shares present at a meeting, if the holders of more than 50% of the Fund's shares are present or represented by proxy, or (ii) more than 50% of the Fund's shares, whichever is less.

The Fund is an entity commonly known as a Massachusetts business trust. Under Massachusetts law, shareholders of a trust may, under certain circumstances, be held personally liable as partners for its obligations. However, the Declaration contains an express disclaimer of shareholder liability for acts or obligations of the Fund and requires that notice of this disclaimer be given in each agreement, obligation or instrument entered into or executed by the Fund or the trustees. The Declaration further provides for indemnification out of the assets and property of the Fund for all loss and expense of any shareholder personally liable for the obligations of the Fund. Thus, the risk of a shareholder incurring financial loss on account of shareholder liability is limited to circumstances in which both inadequate insurance existed and the Fund itself were unable to meet its obligations. The Fund believes the likelihood of these circumstances is remote.

The Fund may be subject to certain restrictions imposed by either guidelines of one or more nationally recognized statistical rating organizations (NRSROs) that may issue ratings for preferred shares, commercial paper or notes, or, if the Fund borrows from a lender, by the lender. These guidelines may impose asset coverage or portfolio composition requirements that are more stringent than those imposed on the Fund by the 1940 Act. It is not anticipated that these covenants or guidelines will impede NFA from managing the Fund's portfolio in accordance with the Fund's investment objective and policies. In addition to other considerations, to the extent that the Fund believes that the covenants and guidelines required by the NRSROs or lenders would impede its ability to meet its investment objective, or if the Fund is unable to obtain the rating on preferred shares (expected to be at least AA/Aa), the Fund will not issue preferred shares.

INVESTMENT POLICIES AND TECHNIQUES

The following information supplements the discussion of the Fund's investment objective, policies, and techniques that are described in the Fund's Prospectus.

Originating Senior Loans

Senior Loans are typically arranged through private negotiations between a borrower (Borrower) and several lenders (Lenders) represented in each case by one or more such Lenders acting as agent of the several Lenders (the Agent). On behalf of the several Lenders, the Agent, which is frequently the entity that originates the Senior Loan and invites the other parties to join the lending syndicate, will be primarily responsible for negotiating the Senior Loan agreements that establish the relative terms, conditions and rights of the Borrower and the several Lenders (the Loan Agreements). The co-agents, on the other hand, are not responsible for administration of a Senior Loan, but are part of the initial group of Lenders that commit to providing funding for a Senior Loan. In large transactions, it is common to have several Agents; however, one such Agent typically has primary responsibility for documentation and administration of the Senior Loan. The Fund will not act as sole Agent in a transaction. The Agent is required to administer and manage the Senior Loan and to service or monitor the collateral. The Agent is also responsible for the collection of principal and interest and fee payments from the Borrower and the apportionment of these payments to the credit of all Lenders which are parties to the Loan Agreement. The Agent is responsible for monitoring compliance by the Borrower with the restrictive covenants in the loan agreement and of notifying the Lenders of any adverse change in the Borrower's financial condition. In addition, the Agent generally is responsible for determining that the Lenders have obtained a perfected security interest in the collateral securing the Senior Loan.

Lenders generally rely on the Agent to collect their portion of the payments on the Senior Loan and to use appropriate creditor remedies against the Borrower. Typically under Loan Agreements, the Agent is given broad discretion in enforcing the Loan Agreement. The Borrower compensates the Agent for these services. Such compensation may include special fees paid on structuring and funding the Senior Loan and other fees paid on a continuing basis. The precise duties and rights of an Agent are defined in the Loan Agreement.

When the Fund is an Agent, it has, as a party to the Loan Agreement, a direct contractual relationship with the Borrower and, prior to allocating portions of the Senior Loan to Lenders, if any, assumes all risks associated with the Senior Loan. The Agent may enforce compliance by the Borrower with the terms of the Loan Agreement. Agents also have voting and consent rights under the applicable Loan Agreement. Action subject to Agent vote or consent generally requires the vote or consent of the holders of some specified percentage of the outstanding principal amount of the Senior Loan, which percentage varies depending on the relevant Loan Agreement. Certain decisions, such as reducing the amount or increasing the time for payment of interest on or repayment of principal of a Senior Loan, or releasing all or substantially all of the collateral therefor, frequently require the unanimous consent of all Lenders affected.

Pursuant to the terms of a Loan Agreement, the Fund as Agent typically has sole responsibility for servicing and administering a loan on behalf of the other Lenders. Each Lender in a Senior Loan is generally responsible for performing its own credit analysis and its own investigation of the financial condition of the Borrower. Generally, Loan Agreements will hold the Fund liable for any action taken or omitted that amounts to gross negligence or willful misconduct. In the event of a Borrower's default on a loan, the Loan Agreements generally provide that the Lenders do not have recourse against the Fund for its activities as Agent. Instead, Lenders will be required to look to the Borrower for recourse.

Acting in the capacity of an Agent in a Senior Loan may subject the Fund to certain risks in addition to those associated with the Fund's role as a Lender.

An Agent is charged with the above described duties and responsibilities to Lenders and Borrowers subject to the terms of the Loan Agreement. Failure to adequately discharge such responsibilities in accordance with the standard of care set forth in the Loan Agreement may expose the Fund to liability for breach of contract. If a relationship of trust is found between the Agent and the Lenders, the Agent will be held to a higher standard of conduct in administering the loan. In consideration of such risks, the Fund will invest no more than 20% of its total assets in Senior Loans in which it acts as an Agent or co-agent and the size of any individual loan will not exceed 5% of the Fund's total assets.

Lending Fees

In the process of buying, selling and holding Senior Loans the Fund may receive and/or pay certain fees. These fees are in addition to interest payments received and may include facility fees, commitment fees, commissions and prepayment penalty fees. When the Fund buys a Senior Loan it may receive a facility fee and when it sells a Senior Loan it may pay a facility fee. On an ongoing basis, the Fund may receive a commitment fee based on the undrawn portion of the underlying line of credit portion of a Senior Loan. In certain circumstances, the Fund may receive a prepayment penalty fee upon the prepayment of a Senior Loan by a Borrower. Other fees received by the Trust may include covenant waiver fees and covenant modification fees.

Borrower Covenants

A Borrower must comply with various restrictive covenants contained in a Loan Agreement. Such covenants, in addition to requiring the scheduled payment of interest and principal, may include restrictions on dividend payments and other distributions to stockholders, provisions requiring the Borrower to maintain specific minimum financial ratios, and limits on total debt. In addition, the Loan Agreement may contain a covenant requiring the Borrower to prepay the Senior Loan with any free cash flow. Free cash flow is generally defined as net cash flow after scheduled debt service payments and permitted capital expenditures, and includes the proceeds from asset dispositions or sales of securities. A breach of a covenant which is not waived by the Agent, or by the lenders directly, as the case may be, is normally an event of acceleration; i.e., the Agent, or the lenders directly, as the case may be, has the right to call the outstanding Senior Loan. The typical practice of an Agent or a Lender in relying exclusively or primarily on reports from the Borrower may involve a risk of fraud by the Borrower. In the case of a Senior Loan in the form of a Participation, the agreement between the buyer and seller may limit the rights of the holder of a Senior Loan to vote on certain changes which may be made to the Loan Agreement, such as waiving a breach of a covenant. However, the holder of the Participation will, in almost all cases, have the right to vote on certain fundamental issues such as changes in principal amount, payment dates and interest rate.

Administration of Loans

In a typical Senior Loan, the Agent administers the terms of the Loan Agreement. In such cases, the Agent is normally responsible for the collection of principal and interest payments from the Borrower and the apportionment of these payments to the credit of all institutions which are parties to the Loan Agreement. The

Fund will generally rely upon the Agent or an intermediate participant to receive and forward to the Fund its portion of the principal and interest payments on the Senior Loan. Furthermore, unless under the terms of a Participation Agreement the Fund has direct recourse against the Borrower, the Fund will rely on the Agent and the other members of the lending syndicate to use appropriate credit remedies against the Borrower. The Agent is typically responsible for monitoring compliance with covenants contained in the Loan Agreement based upon reports prepared by the Borrower. The seller of the Senior Loan usually does, but is often not obligated to, notify holders of Senior Loans of any failures of compliance. The Agent may monitor the value of the collateral and, if the value of the collateral declines, may accelerate the Senior Loan, may give the Borrower an opportunity to provide additional collateral or may seek other protection for the benefit of the participants in the Senior Loan.

The Agent is compensated by the Borrower for providing these services under a Loan Agreement, and such compensation may include special fees paid upon structuring and funding the Senior Loan and other fees paid on a continuing basis. With respect to Senior Loans for which the Agent does not perform such administrative and enforcement functions, the Fund will perform such tasks on its own behalf, although a collateral bank will typically hold any collateral on behalf of the Fund and the other lenders pursuant to the applicable Loan Agreement.

A financial institution's appointment as Agent may be terminated in the event that it fails to observe the requisite standard of care or becomes insolvent, enters Federal Deposit Insurance Corporation (FDIC) receivership, or, if not FDIC insured, enters into bankruptcy proceedings. A successor Agent would generally be appointed to replace the terminated Agent, and assets held by the Agent under the Loan Agreement should remain available to holders of Senior Loans. However, if assets held by the Agent for the benefit of the Fund were determined to be subject to the claims of the Agent's general creditors, the Fund might incur certain costs and delays in realizing payment on a Senior Loan, or suffer a loss of principal and/or interest. In situations involving other intermediate participants similar risks may arise.

Prepayments

Senior Loans may require, in addition to scheduled payments of interest and principal, the prepayment of the Senior Loan from free cash flow or asset sales. The degree to which Borrowers prepay Senior Loans, whether as a contractual requirement or at their election, may be affected by general business conditions, the financial condition of the Borrower and competitive conditions among Lenders, among others. As such, prepayments cannot be predicted with accuracy. Upon a prepayment, either in part or in full, the actual outstanding debt on which the Fund derives interest income will be reduced.

However, the Fund may receive both a prepayment penalty fee from the prepaying Borrower and a facility fee upon the purchase of a new Senior Loan with the proceeds from the prepayment of the former. Prepayments generally will not materially affect the Fund's performance because the Fund should be able to reinvest prepayments in other Senior Loans that have similar or identical yields and because receipt of such fees may mitigate any adverse impact on the Fund's yield.

Other Information Regarding Senior Loans

From time to time, the Adviser and its affiliates may borrow money from various banks in connection with their business activities. Such banks may also sell Senior Loans to or acquire them from the Fund or may be intermediate participants with respect to Senior Loans in which the Fund owns interests. Such banks may also act as Agents for Senior Loans held by the Fund.

The Fund may acquire interests in Senior Loans which are designed to provide temporary or bridge financing to a Borrower pending the sale of identified assets or the arrangement of longer-term loans or the issuance and sale of debt obligations. The Fund may also invest in Senior Loans of Borrowers who have obtained

bridge loans from other parties. A Borrower's use of bridge loans involves a risk that the Borrower may be unable to locate permanent financing to replace the bridge loan, which may impair the Borrower's perceived creditworthiness.

To the extent that collateral consists of the stock of the Borrower's subsidiaries or other affiliates, the Fund will be subject to the risk that this stock will decline in value. Such a decline, whether as a result of bankruptcy proceedings or otherwise, could cause the Senior Loan to be undercollateralized or unsecured. In most credit agreements there is no formal requirement to pledge additional collateral. In addition, the Fund may invest in Senior Loans guaranteed by, or fully secured by assets of, shareholders or owners, even if the Senior Loans are not otherwise collateralized by assets of the Borrower; provided, however, that such guarantees are fully secured. There may be temporary periods when the principal asset held by a Borrower is the stock of a related company, which may not legally be pledged to secure a Senior Loan. On occasions when such stock cannot be pledged, the Senior Loan will be temporarily unsecured until the stock can be pledged or is exchanged for or replaced by other assets, which will be pledged as security for the Senior Loan. However, the Borrower's ability to dispose of such securities, other than in connection with such pledge or replacement, will be strictly limited for the protection of the holders of Senior Loans. During any such period in which the Senior Loan is temporarily unsecured, such Senior Loans will not be treated by the Fund as secured Senior Loans for purposes of the Fund's policy of investing in normal circumstances at least 80% of its total assets in secured Senior Loans.

If a Borrower becomes involved in bankruptcy proceedings, a court may invalidate the Fund's security interest in the loan collateral or subordinate the Fund's rights under the Senior Loan to the interests of the Borrower's unsecured creditors. Such action by a court could be based, for example, on a fraudulent conveyance claim to the effect that the Borrower did not receive fair consideration for granting the security interest in the loan collateral to the Fund. For Senior Loans made in connection with a highly leveraged transaction, consideration for granting a security interest may be deemed inadequate if the proceeds of the Loan were not received or retained by the Borrower, but were instead paid to other persons (such as shareholders of the Borrower) in an amount which left the Borrower insolvent or without sufficient working capital. There are also other events, such as the failure to perfect a security interest due to faulty documentation or faulty official filings, which could lead to the invalidation of the Fund's security interest in loan collateral. If the Fund's security interest in loan collateral is invalidated or the Senior Loan is subordinated to other debt of a Borrower in bankruptcy or other proceedings, it is unlikely that the Fund would be able to recover the full amount of the principal and interest due on the Loan.

Interest Rate and Other Hedging Transactions

The Fund may enter into various interest rate hedging and risk management transactions. Certain of these interest rate hedging and risk management transactions involve derivative instruments. A derivative is a financial instrument whose performance is derived at least in part from the performance of an underlying index, security or asset. The values of certain derivatives can be affected dramatically by even small market movements, sometimes in ways that are difficult to predict. There are many different types of derivatives, with many different uses. The Fund enters into these transactions primarily to seek to preserve a return on a particular investment or portion of its portfolio, and may also enter into such transactions to seek to protect against decreases in the anticipated rate of return on floating or variable rate financial instruments the Fund owns or anticipates purchasing at a later date, or for other risk management strategies such as managing the effective dollar-weighted average duration of the Fund's portfolio. The Fund may also engage in hedging transactions to seek to protect the value of its portfolio against declines in net asset value resulting from changes in interest rates or other market changes. The Fund does not intend to engage in such transactions to enhance the yield on its portfolio or to increase income available for distributions. Market conditions will determine whether and in what circumstances the Fund would employ any of the hedging and risk management techniques described below. The successful utilization of hedging and risk management transactions requires skills different from those needed in the selection of the Fund's portfolio securities. The Fund believes that the Adviser possesses the skills necessary for the successful utilization of hedging and risk management transactions. The Fund will incur brokerage and other costs in connection with its hedging transactions.

The Fund may enter into interest rate swaps or purchase or sell interest rate caps or floors. Interest rate swaps involve the exchange by the Fund with another party of their respective obligations to pay or receive interest, e.g., an exchange of an obligation to make floating rate payments for an obligation to make fixed rate payments. For example, the Fund may seek to shorten the effective interest rate redetermination period of a Senior Loan in its portfolio with an interest rate redetermination period of one year. The Fund could exchange the Borrower's obligation to make fixed rate payments for one year for an obligation to make payments that readjust monthly. In such event, the Fund would consider the interest rate redetermination period of such Senior Loan to be the shorter period.

The purchase of an interest rate cap entitles the purchaser, to the extent that a specified index exceeds a predetermined interest rate, to receive payments of interest at the difference of the index and the predetermined rate on a notional principal amount (the reference amount with respect to which interest obligations are determined although no actual exchange of principal occurs) from the party selling such interest rate cap. The purchase of an interest rate floor entitles the purchaser, to the extent that a specified index falls below a predetermined interest rate, to receive payments of interest at the difference of the index and the predetermined rate on a notional principal amount from the party selling such interest rate floor. The Fund will not enter into swaps, caps or floors if, on a net basis, the aggregate notional principal amount with respect to such agreements exceeds the net assets of the Fund. The Fund will not sell interest rate caps or floors that it does not own.

In circumstances in which the Adviser anticipates that interest rates will decline, the Fund might, for example, enter into an interest rate swap as the floating rate payor or, alternatively, purchase an interest rate floor. In the case of purchasing an interest rate floor, if interest rates declined below the floor rate, the Fund would receive payments from its counterparty which would wholly or partially offset the decrease in the payments it would receive in respect of the portfolio assets being hedged. In the case where the Fund purchases such an interest rate swap, if the floating rate payments fell below the level of the fixed rate payment set in the swap agreement, the Fund's counterparty would pay the Fund amounts equal to interest computed at the difference between the fixed and floating rates over the notional principal amount. Such payments would offset or partially offset the decrease in the payments the Fund would receive in respect of floating rate portfolio assets being hedged.

The successful use of swaps, caps and floors to preserve the rate of return on a portfolio of financial instruments depends on the Adviser's ability to predict correctly the direction and extent of movements in interest rates.

Although the Fund believes that use of the hedging and risk management techniques described above will benefit the Fund, if the Adviser's judgment about the direction or extent of the movement in interest rates is incorrect, the Fund's overall performance would be worse than if it had not entered into any such transactions. For example, if the Fund had purchased an interest rate swap or an interest rate floor to hedge against its expectation that interest rates would decline but instead interest rates rose, the Fund would lose part or all of the benefit of the increased payments it would receive as a result of the rising interest rates because it would have to pay amounts to its counterparty under the swap agreement or would have paid the purchase price of the interest rate floor.

Because these hedging transactions are entered into for good-faith risk management purposes, the Adviser and the Fund believe such obligations do not constitute senior securities. The Fund will usually enter into interest rate swaps on a net basis, i.e., where the two parties make net payments with the Fund receiving or paying, as the case may be, only the net amount of the two payments. The net amount of the excess, if any, of the Fund's obligations over its entitlements with respect to each interest rate swap will be accrued and an amount of cash or liquid securities having an aggregate net asset value at least equal to the accrued excess will be maintained in a segregated account by the Fund's custodian. If the Fund enters into a swap on other than a net basis, the Fund will maintain in the segregated account the full amount of the Fund's obligations under each such swap. Accordingly, the Fund does not treat swaps as senior securities. The Fund may enter into swaps, caps and floors

with member banks of the Federal Reserve System, members of the New York Stock Exchange or other entities determined by the Adviser, pursuant to procedures adopted and reviewed on an ongoing basis by the Board of Trustees, to be creditworthy. If a default occurs by the other party to such transaction, the Fund will have contractual remedies pursuant to the agreements related to the transaction but such remedies may be subject to bankruptcy and insolvency laws which could affect the Fund's rights as a creditor. The swap market has grown substantially in recent years with a large number of banks and financial services firms acting both as principals and as agents utilizing standardized swap documentation. As a result, the swap market has become relatively liquid. Caps and floors are more recent innovations and they are less liquid than swaps. There can be no assurance, however, that the Fund will be able to enter into interest rate swaps or to purchase interest rate caps or floors at prices or on terms the Adviser believes are advantageous to the Fund. In addition, although the terms of interest rate swaps, caps and floors may provide for termination, there can be no assurance that the Fund will be able to terminate an interest rate swap or to sell or offset interest rate caps or floors that it has purchased.

The Fund may also engage in credit derivative transactions. Default price risk derivatives are linked to the price of reference securities or loans after a default by the issuer or borrower, respectively. Market spread derivatives are based on the risk that changes in market factors, such as credit spreads, can cause a decline in the value of a security, loan or index. There are three basic transactional forms for credit derivatives; swaps, options and structured instruments. The use of credit derivatives is a highly specialized activity which involves strategies and risks different from those associated with ordinary portfolio security transactions. If the Adviser is incorrect in its forecasts of default risks, market spreads or other applicable factors, the investment performance of the Fund would diminish compared with what it would have been if these techniques were not used. Moreover, even if the Adviser is correct in its forecasts, there is a risk that a credit derivative position may correlate imperfectly with the price of the asset or liability being hedged.

Credit derivative transaction exposure will be limited to 10% of the total assets of the Fund.

New financial products continue to be developed and the Fund may invest in any such products as may be developed to the extent consistent with its investment objective and the regulatory and federal tax requirements applicable to investment companies.

OVERALL FUND MANAGEMENT

NFA is responsible for the Fund's overall investment strategy and its implementation, including the use of leverage and hedging. Symphony is responsible for the management of the fund's Managed Assets

NFA oversees Symphony in its management of the Fund's portfolio. This oversight will include ongoing evaluation of Symphony's investment performance, quality of investment process and personnel, compliance with Fund and regulatory guidelines, trade allocation and execution, and other factors.

NFA will also oversee the Fund's use of leverage, and efforts to minimize the costs and mitigate the risks to Common Shareholders associated with using financial leverage. See *Use of Leverage and Hedging Transactions* in the Fund's Prospectus and this Statement of Additional Information. This effort may involve making adjustments to investment policies in an attempt to minimize costs and mitigate risks.

SYMPHONY INVESTMENT PHILOSOPHY AND PROCESS

Investment Philosophy. Symphony believes that managing risk, particularly for volatile assets such as Senior Loans and other forms of high yield debt, is of paramount importance. Symphony believes that a combination of fundamental credit analysis and valuation information that is available from the equity markets

provide a means of identifying what it believes to be superior investment candidates. Additionally, Symphony focuses primarily on liquid securities to help ensure that exit strategies remain available under different market conditions.

Investment Process. In identifying Senior Loans and other securities for potential purchase, Symphony combines quantitative screening and fundamental and relative value analysis. Symphony evaluates the identified investment candidates for liquidity constraints and favorable capital structures. The investment team then performs rigorous bottom-up fundamental analysis to identify investments with sound industry fundamentals, cash flow sufficiency and asset quality. The final portfolio is constructed using risk management and monitoring systems to ensure proper diversification.

PORTFOLIO COMPOSITION

The Fund's portfolio will be composed principally of the investments described below.

Senior Loans

Senior Loans, as with the other types of securities in which the Fund may invest, are counted for purposes of various other limitations described in this Statement of Additional Information, including the limitation on investing no more than 50% of the Fund's Managed Assets in illiquid securities, to the extent such Senior Loans are deemed to be illiquid.

Senior Loans, like most other debt obligations, are subject to the risk of default. Default in the payment of interest or principal on a Senior Loan results in a reduction in income to the Fund, a reduction in the value of the Senior Loan and a decrease in the Fund's net asset value. This decrease in the Fund's net asset value would be magnified by the Fund's use of leverage. The risk of default increases in the event of an economic downturn or a substantial increase in interest rates. An increased risk of default could result in a decline in the value of Senior Loans and in the Fund's net asset value.

Many Senior Loans in which the Fund may invest may not be rated by an NRSRO, generally will not be registered with the Securities and Exchange Commission and generally will not be listed on a securities exchange. In addition, the amount of public information available with respect to Senior Loans generally may be less extensive than that available for registered and exchange-listed securities. Economic and other events (whether real or perceived) can reduce the demand for certain Senior Loans or Senior Loans generally, which may reduce market prices and cause the Fund's net asset value per share to fall. The frequency and magnitude of such changes cannot be predicted. Senior Loans may not be rated at the time that the Fund purchases them. If a Senior Loan is rated at the time of purchase, Symphony may consider the rating when evaluating the Senior Loan but may not view ratings as a determinative factor in investment decisions. As a result, the Fund is more dependent on Symphony's credit analysis abilities. Because of the protective terms of most Senior Loans, it is possible that the Fund is more likely to recover more of its investment in a defaulted Senior Loan than would be the case for most other types of defaulted debt securities.

In the case of collateralized Senior Loans, there is no assurance that sale of the collateral would raise enough cash to satisfy the Borrower's payment obligation or that the collateral can or will be liquidated. In the event of bankruptcy, liquidation may not occur and the court may not give lenders the full benefit of their senior positions. If the terms of a Senior Loan do not require the Borrower to pledge additional collateral in the event of a decline in the value of the original collateral, the Fund will be exposed to the risk that the value of the collateral will not at all times equal or exceed the amount of the Borrower's obligations under the Senior Loan. To the extent that a Senior Loan is collateralized by stock in the Borrower or its subsidiaries, such stock may lose all of its value in the event of bankruptcy of the Borrower. Uncollateralized Senior Loans involve a greater risk of loss. Some Senior Loans in which the Fund may invest are subject to the risk that a court, pursuant to fraudulent conveyance or other similar laws, could subordinate such Senior Loans to presently existing or future indebtedness of the Borrower or take other action detrimental to the holders of Senior Loans, such as the Fund, including, under certain circumstances, invalidating such Senior Loans. Lenders commonly have certain obligations pursuant to the loan agreement, which may include the obligation to make additional loans or release collateral in certain circumstances.

The amount of public information with respect to Senior Loans generally may be less extensive than that available for more widely rated, registered and exchange-listed securities. Economic and other events (whether real or perceived) can reduce the demand for certain Senior Loans or Senior Loans generally, which may reduce market prices and cause the Fund's net asset value per share to fall. The frequency and magnitude of such changes cannot be predicted. In addition, there is no minimum rating or other independent evaluation of a Borrower or its securities limiting the Fund's investments. Symphony may rely exclusively or primarily on its

own evaluation of Borrower credit quality in selecting Senior Loans for purchase. As a result, the Fund is particularly dependent on the analytical abilities of Symphony.

No active trading market currently exists for some of the Senior Loans in which the Fund may invest and, thus, those loans may be illiquid. Liquidity relates to the ability of the Fund to sell an investment in a timely manner at a price approximately equal to its value on the Fund's books. The illiquidity of some Senior Loans may impair the Fund's ability to realize the full value of its assets in the event of a voluntary or involuntary liquidation of such assets. Because of the lack of an active trading market, illiquid securities are also difficult to value and prices provided by external pricing services may not reflect the true fair value of the securities. The risks of illiquidity are particularly important when the Fund's operations require cash, and may in certain circumstances require that the Fund sell other investments or borrow to meet short-term cash requirements. To the extent that a secondary market does exist for certain Senior Loans, the market may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods. The market for Senior Loans could be disrupted in the event of an economic downturn or a substantial increase or decrease in interest rates. This could result in increased volatility in the market and in the Fund's net asset value and market price per share.

If legislation or state or federal regulators impose additional requirements or restrictions on the ability of financial institutions to make loans that are considered highly leveraged transactions, the availability of Senior Loans for investment by the Fund may be adversely affected. In addition, such requirements or restrictions could reduce or eliminate sources of financing for certain Borrowers. This would increase the risk of default. If legislation or federal or state regulators require financial institutions to dispose of Senior Loans that are considered highly leveraged transactions or subject such Senior Loans to increased regulatory scrutiny, financial institutions may determine to sell such Senior Loans. Such sales could result in prices that, in the opinion of Symphony, do not represent fair value. If the Fund attempts to sell a Senior Loan at a time when a financial institution is engaging in such a sale, the price the Fund could get for the Senior Loan may be adversely affected.

Any lender, which could include the Fund, is subject to the risk that a court could find the lender liable for damages in a claim by a Borrower arising under the common laws of tort or contracts or anti-fraud provisions of certain securities laws for actions taken or omitted to be taken by the lenders under the relevant terms of a loan agreement or in connection with actions with respect to the collateral underlying the Senior Loan.

The Fund may purchase participations in Senior Loans. By purchasing a participation interest in a loan, the Fund acquires some or all of the interest of a bank or other financial institution in a loan to a Borrower. Under a participation, the Fund generally will have rights that are more limited than the rights of lenders or of persons who acquire a Senior Loan by assignment. In a participation, the Fund typically has a contractual relationship with the lender selling the participation, but not with the Borrower. As a result, the Fund assumes the credit risk of the lender selling the participation in addition to the credit risk of the Borrower. In the event of insolvency of the lender selling the participation, the Fund may be treated as a general creditor of the lender and may not have a senior claim to the lender's interest in the Senior Loan. A lender selling a participation and other persons interpositioned between the lender and the Fund with respect to participations will likely conduct their principal business activities in the banking, finance and financial services industries.

The Fund may purchase and retain in its portfolio Senior Loans where the Borrowers have experienced, or may be perceived to be likely to experience, credit problems, including involvement in or recent emergence from bankruptcy reorganization proceedings or other forms of debt restructuring. Such investments may provide opportunities for enhanced income as well as capital appreciation. At times, in connection with the restructuring of a Senior Loan either outside of bankruptcy court or in the context of bankruptcy court proceedings, the Fund may determine or be required to accept equity securities or junior debt securities in exchange for all or a portion of a Senior Loan.

Non-Senior Loan Investments

The Fund may invest in debt instruments and other securities as described below:

Corporate Bonds. Corporate bonds generally are used by corporations to borrow money from investors. The issuer pays the investor a fixed or variable rate of interest and normally must repay the amount borrowed on or before maturity. Certain bonds are perpetual in that they have no maturity date. The Fund may invest in bonds and other debt securities of any quality.

Structured Notes. The Fund may use structured notes, which are privately negotiated debt obligations or economically equivalent instruments where the principal and/or interest is determined by reference to the performance of a benchmark asset, market or interest rate (an embedded index), such as selected securities or loans, an index of securities or loans, or specified interest rates, or the differential performance of two assets or markets. Structured notes may be issued by corporations, including banks, as well as by governmental agencies. Structured notes frequently are assembled in the form of medium-term notes, but a variety of forms are available and may be used in particular circumstances. The terms of such structured notes normally provide that their principal and/or interest payments are to be adjusted upwards or index while the structured notes are outstanding. As a result, the interest and/or principal payments that may be made on a structured product may vary widely, depending on a variety of factors, including the volatility of the embedded index and the effect of changes in the embedded index on principal and/or interest payments. If the Fund invests in structured notes that are designed to provide returns and risks that emulate those of senior loans, the Fund may treat the value of (or, if applicable, the notional amount of) such investment as an investment in Senior Loans for purposes of determining compliance with the requirement set forth above that at least 80% of the Fund's Managed Assets be invested under normal market circumstances in Senior Loans, except to the extent that the value (or notional amount) of such investments exceeds 5% of the Fund's Managed Assets. Any such investment amounts that exceed 5% of Managed Assets will be treated as a type of other debt instruments which, in the aggregate, are limited to 20% of Managed Assets. The rate of return on structured notes may be determined by applying a multiplier to the performance or differential performance of the referenced index(es) or other asset(s). Application of the multiplier involves leverage that will serve to magnify the potential for gain and the risk of loss.

Symphony may utilize structured notes for investment purposes and also for risk management purposes, such as to reduce the duration and interest rate sensitivity of the Fund's portfolio. While structured notes may offer the potential for a favorable rate of return from time to time, they also entail certain risks. Structured notes may be less liquid than other debt securities, and the price of structured notes may be more volatile. In some cases, depending on the terms of the embedded index, a structured note may provide that the principal and/or interest payments may be adjusted below zero. Structured notes also may involve significant credit risk and risk of default by the counterparty. Although structured notes are not necessarily illiquid, NFA believes that currently most structured notes are illiquid. Like other sophisticated strategies, the Fund's use of structured notes may not work as intended. If the value of the embedded index changes in a manner other than that expected by Symphony, principal and/or interest payments received on the structured notes may be substantially less than expected. Also, if Symphony uses structured notes to reduce the duration of the Fund's portfolio, this may limit the Fund's return when having a longer duration of the Fund's portfolio, this may limit the Fund's return when having a longer duration would be beneficial (for instance, when interest rates decline).

Below Investment Grade Securities. Investments in below investment grade securities generally provide greater income and increased opportunity for capital appreciation than investments in higher quality securities, but they also typically entail greater price volatility and principal and income risk, including the possibility of issuer default and bankruptcy. Issuers of below investment grade securities may be highly leveraged and may not have available to them more traditional methods of financing. Securities in the lowest investment grade category also may be considered to possess some speculative characteristics by certain rating agencies. In addition, analysis of the creditworthiness of issuers of below investment grade securities may be more complex than for issuers of higher quality securities.

Below investment grade securities may be more susceptible to real or perceived adverse economic and competitive industry conditions than investment grade securities. A projection of an economic downturn or of a period of rising interest rates, for example, could cause a decline in lower-grade security prices because the advent of a recession could lessen the ability of an issuer to make principal and interest payments on its debt obligations. If an issuer of below investment grade securities defaults, in addition to risking payment of all or a portion of interest and principal, the Fund may incur additional expenses to seek recovery. In the case of below investment grade securities structured as zero coupon or payment-in-kind securities, their market prices will normally be affected to a greater extent by interest rate changes, and therefore tend to be more volatile than securities which pay interest currently and in cash. Symphony seeks to reduce these risks through diversification, credit analysis and attention to current developments and trends in both the economy and financial markets.

The secondary market for below investment grade securities may not be as liquid as the secondary market for more highly rated securities, a factor which may have an adverse effect on the Fund's ability to dispose of a particular security. There are fewer dealers in the market for below investment grade securities than for investment grade obligations. The prices quoted by different dealers may vary significantly and the spread between the bid and ask price is generally much larger than for higher quality instruments. Under adverse market or economic conditions, the secondary market for below investment grade securities could contract further, independent of any specific adverse changes in the condition of a particular issuer, and these instruments may become illiquid. As a result, the Fund could find it more difficult to sell these securities or may be able to sell the securities only at prices lower than if such securities were widely traded. Prices realized upon the sale of such lower rated or unrated securities, under these circumstances, may be less than the prices used in calculating the Fund's net asset value.

Adverse publicity and investor perceptions, whether or not based on fundamental analysis, may decrease the values and liquidity of below investment grade securities, especially in a thinly traded market. When secondary markets for below investment grade securities are less liquid than the market for investment grade securities, it may be more difficult to value the securities because such valuation may require more research, and elements of judgment may play a greater role in the valuation because there is less reliable, objective data available. During periods of thin trading in these markets, the spread between bid and asked prices is likely to increase significantly and the Fund may have greater difficulty selling its portfolio securities. The Fund will be more dependent on Symphony research and analysis when investing in below investment grade securities. Symphony seeks to minimize the risks of investing in all securities through in-depth credit analysis and attention to current developments in interest rates and market conditions.

A general description of the ratings of securities by Moody's, S&P and Fitch is set forth in Appendix A to this Statement of Additional Information. The ratings of Moody's, S&P and Fitch represent their opinions as to the quality of the securities they rate. It should be emphasized, however, that ratings are general and are not absolute standards of quality. Consequently, in the case of debt obligations, certain debt obligations with the same maturity, coupon and rating may have different yields while debt obligations with the same maturity and coupon with different ratings may have the same yield. For these reasons, the use of credit ratings as the sole method of evaluating lower-grade securities can involve certain risks. For example, credit ratings evaluate the safety of principal and interest payments, not the market value risk of lower-grade securities. Also, credit rating agencies may fail to change credit ratings in a timely fashion to reflect events since the security was last rated. The Subadviser does not rely solely on credit ratings when selecting securities for the Fund, and develops its own independent analysis of issuer credit quality.

The Fund's credit quality policies apply only at the time a security is purchased, and the Fund is not required to dispose of a security in the event that a rating agency or Symphony downgrades its assessment of the credit characteristics of a particular issue. In determining whether to retain or sell such a security, Symphony may consider such factors as its assessment of the credit quality of the issuer of such security, the price at which such security could be sold and the rating, if any, assigned to such security by other rating agencies. However, analysis of the creditworthiness of issuers of below investment grade securities may be more complex than for issuers of higher quality debt securities.

U.S. Government Securities. U.S. Government securities include (1) U.S. Treasury obligations, which differ in their interest rates, maturities and times of issuance: U.S. Treasury bills (maturities of one year or less), U.S. Treasury notes (maturities of one year to ten years) and U.S. Treasury bonds (generally maturities of greater than ten years) and (2) obligations issued or guaranteed by U.S. Government agencies and instrumentalities that are supported by any of the following: (i) the full faith and credit of the U.S. Treasury, (ii) the right of the issuer to borrow an amount limited to a specific line of credit from the U.S. Treasury, (iii) discretionary authority of the U.S. Government to purchase certain obligations of the U.S. Government agency or instrumentality or (iv) the credit of the agency or instrumentality. The Fund also may invest in any other security or agreement collateralized or otherwise secured by U.S. Government securities. Agencies and instrumentalities of the U.S. Government include but are not limited to: Federal Land Banks, Federal Financing Banks, Banks for Cooperatives, Federal Intermediate Credit Banks, Farm Credit Banks, Federal Home Loan Banks, FHLMC, FNMA, GNMA, Student Loan Marketing Association, United States Postal Service, Small Business Administration, Tennessee Valley Authority and any other enterprise established or sponsored by the U.S. Government. Because the U.S. Government generally is not obligated to provide support to its instrumentalities, the Fund will invest in obligations issued by these instrumentalities only if Symphony determines that the credit risk with respect to such obligations is minimal.

The principal of and/or interest on certain U.S. Government securities which may be purchased by the Fund could be (i) payable in non-U.S. currencies rather than U.S. dollars or (b) increased or diminished as a result of changes in the value of the U.S. dollar relative to the value of non-U.S. currencies. The value of such portfolio securities may be affected favorably by changes in the exchange rate between foreign currencies and the U.S. dollar.

Commercial Paper. Commercial paper represents short-term unsecured promissory notes issued in bearer form by corporations such as banks or bank holding companies and finance companies. The rate of return on commercial paper may be linked or indexed to the level of exchange rates between the U.S. dollar and a foreign currency or currencies.

Warrants and Equity Securities. The Fund may acquire equity securities and warrants issued by a Borrower or its affiliates as part of a package of investments in the Borrower or its affiliates issued in connection with a Senior Loan of the Borrower. The Fund also may convert a warrant so acquired into the underlying security. Investments in warrants and equity securities entail certain risks in addition to those associated with investments in Senior Loans. The value of these securities may be affected more rapidly, and to a greater extent, by company-specific developments and general market conditions. These risks may increase fluctuations in the Fund's net asset value. The Fund may possess material non-public information about a Borrower as a result of its ownership of a Senior Loan of such Borrower. Because of prohibitions on trading in securities of issuers while in possession of such information the Fund might be unable to enter into a transaction in a security of such a Borrower when it would otherwise be advantageous to do so.

OTHER INVESTMENT POLICIES AND TECHNIQUES

Repurchase Agreements

As temporary investments, the Fund may invest in repurchase agreements. A repurchase agreement is a contractual agreement whereby the seller of securities (U.S. Government securities or municipal bonds) agrees to repurchase the same security at a specified price on a future date agreed upon by the parties. The agreed-upon repurchase price determines the yield during the Fund's holding period. Repurchase agreements are considered to be loans collateralized by the underlying security that is the subject of the repurchase contract. The Fund will only enter into repurchase agreements with registered securities dealers or domestic banks that, in the opinion of Symphony, present minimal credit risk. The risk to the Fund is limited to the ability of the issuer to pay the agreed-upon repurchase price on the delivery date; however, although the value of the underlying collateral at the

time the transaction is entered into always equals or exceeds the agreed-upon repurchase price, if the value of the collateral declines there is a risk of loss of both principal and interest. In the event of default, the collateral may be sold but the Fund might incur a loss if the value of the collateral declines, and might incur disposition costs or experience delays in connection with liquidating the collateral. In addition, if bankruptcy proceedings are commenced with respect to the seller of the security, realization upon the collateral by the Fund may be delayed or limited. Symphony will monitor the value of the collateral at the time the transaction is entered into and at all times subsequent during the term of the repurchase agreement in an effort to determine that such value always equals or exceeds the agreed-upon repurchase price. In the event the value of the collateral declines below the repurchase price, Symphony will demand additional collateral from the issuer to increase Symphony of the collateral to at least that of the repurchase price, including interest.

Securities Issued by Non-U.S. Issuers

The Fund may invest up to 20% of its Managed Assets in U.S. dollar denominated Senior Loans of Borrowers that are organized or located in countries outside the United States. Although the Senior Loans will require payment of interest and principal in U.S. dollars, these Borrowers may have significant non-U.S. dollar revenues. Investment in foreign Borrowers involves special risks and investors should understand and consider carefully the risks involved in investing in securities of non-U.S. issuers.

Investing in securities of non-U.S. issuers involves certain considerations comprising both risks and opportunities not typically associated with investing in securities of U.S. issuers. These considerations include: (i) less publicly available information about non-U.S. issuers or markets due to less rigorous disclosure or accounting standards or regulatory practices; (ii) many non-U.S. markets are smaller, less liquid and more volatile, meaning that, in a changing market, Symphony may not be able to sell the Fund's portfolio securities at times, in amounts or at prices it considers reasonable; (iii) potential adverse effects of fluctuations in currency exchange rates or controls on the value of the Fund's investments; (iv) the economies of non-U.S. countries may grow at slower rates than expected or may experience a downturn or recession; (v) the impact of economic, political, social or diplomatic developments may adversely affect the securities markets; (vi) withholding and other non-U.S. taxes may decrease the Fund's return; (vii) certain non-U.S. countries may impose restrictions on the ability of non-U.S. issuers to make payments of principal and/or interest to investors located outside the U.S. due to blockage of foreign currency exchanges or otherwise; and (viii) possible seizure, expropriation or nationalization of the company or its assets. These risks are more pronounced to the extent that the Fund invests a significant amount of its investments in issuers located in one region and to the extent that the Fund invests in securities of issuers in emerging markets.

Although the Fund may hedge its exposure to certain of these risks, including the foreign currency exchange rate risk, there can be no assurance that the Fund will enter into hedging transactions at any time or at times or under circumstances in which it might be advisable to do so.

Zero Coupon and Payment-In-Kind Securities

The Fund's investments in debt securities may be in the form of a zero coupon bond. Zero coupon bonds are debt obligations that do not entitle the holder to any periodic payments of interest for the entire life of the obligation. When held to its maturity, its return comes from the difference between the purchase price and its maturity value. Payment-in-kind securities (PIKs) pay dividends or interest in the form of additional securities of the issuer, rather than in cash. Each of these instruments is typically issued and traded at a deep discount from its face amount. The amount of the discount varies depending on such factors as the time remaining until maturity of the securities, prevailing interest rates, the liquidity of the security and the perceived credit quality of the issuer. The market prices of zero coupon bonds and PIKs generally are more volatile than the market prices of debt instruments that pay interest currently and in cash and are likely to respond to changes in interest rates to a greater degree than do other types of securities having similar maturities and credit quality. In order to satisfy a requirement for qualification to be taxed as a regulated investment company under the Internal Revenue Code

of 1986, as amended (the Code), an investment company, such as the Fund, must distribute each year at least 90% of its investment company taxable income, including the original issue discount accrued on zero coupon bonds and PIKs. Because the Fund will not on a current basis receive cash payments from the issuer of these securities in respect of any accrued original issue discount, in some years the Fund may have to distribute cash obtained from selling other portfolio holdings of the Fund in order to avoid unfavorable tax consequences. In some circumstances, such sales might be necessary in order to satisfy cash distribution requirements to its Common Shareholders even though investment considerations might otherwise make it undesirable for the Fund to sell securities at such time. Under many market conditions, investments in zero coupon bonds and PIKs may be illiquid, making it difficult for the Fund to dispose of them or determine their current value.

When-Issued and Delayed Delivery Transactions

The Fund may buy and sell securities on a when-issued or delayed delivery basis, making payment or taking delivery at a later date, normally within 15-45 days of the trade date. On such transactions the payment obligation and the interest rate are fixed at the time the buyer enters into the commitment. Beginning on the date the Fund enters into a commitment to purchase securities on a when-issued or delayed delivery basis, the Fund is required under rules of the Commission to maintain in a separate account liquid assets, consisting of cash, cash equivalents or liquid securities having a market value at all times of at least equal to the amount of any delayed payment commitment. The Fund may enter into contracts to purchase securities on a forward basis (*i.e.*, where settlement will occur more than 60 days from the date of the transaction) only to the extent that the Fund specifically collateralizes such obligations with a security that is expected to be called or mature within sixty days before or after the settlement date of the forward transaction. The commitment to purchase securities on a when-issued, delayed delivery or forward basis may involve an element of risk because no interest accrues on the bonds prior to settlement and at the time of delivery the market value may be less than their cost.

No Inverse Floating Rate Securities

The Fund will not invest in inverse floating rate securities, which are securities that pay interest at rates that vary inversely with changes in prevailing interest rates and which represent a leveraged investment in an underlying security.

Portfolio Liquidity

No active trading market currently exists for many Senior Loans. Senior Loans are thus relatively illiquid. Liquidity relates to the ability of the Fund to sell an investment in a timely manner at a price approximately equal to its value on the Fund's books. The illiquidity of Senior Loans may impair the Fund's ability to realize the full value of its assets in the event of a voluntary or involuntary liquidation of such assets. Because of the lack of an active trading market, illiquid securities are also difficult to value and prices provided by external pricing services may not reflect the true fair value of the securities. However, many Senior Loans are of a large principal amount and are held by a large number of financial institutions. In the Adviser's opinion, this should enhance their liquidity. In addition, in recent years the number of institutional investors purchasing Senior Loans has increased. The risks of illiquidity are particularly important when the Fund's operations require cash, and may in certain circumstances require that the Fund borrow to meet short-term cash requirements. To the extent that a secondary market does exist for certain Senior Loans, the market may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods. The Fund has no limitation on the amount of its assets that may be invested in securities that are not readily marketable or that are subject to restrictions on resale (except as noted elsewhere herein). The substantial portion of the Fund's assets invested in Senior Loans may restrict the ability of the Fund to dispose of its investments in a timely fashion and at a fair price, and could result in capital losses to the Fund and holders of its shares. The market for Senior Loans could be disrupted in the event of an economic downturn or a substantial increase or decrease in interest rates. This could result in increased volatility in the market and in the Fund's net asset value and market price per share.

Short-Term/Long-Term Debt Securities; Defensive Position. During temporary defensive purposes or in order to keep the Fund's cash on hand fully invested, the Fund may invest up to 100% of its Managed Assets in cash equivalents and investment grade debt securities, including obligations issued or guaranteed by the U.S. government, its agencies and instrumentalities. In addition, upon Symphony's recommendation that a change would be in the best interests of the Fund and upon concurrence by NFA, and subject to approval of the Board of Trustees of the Fund, Symphony may deviate from its investment guidelines discussed herein. In such a case, the Fund may not pursue or achieve its investment objective. These investments are defined to include, without limitation, the following:

(1) U.S. government securities, including bills, notes and bonds differing as to maturity and rates of interest that are either issued or guaranteed by the U.S. Treasury or by U.S. government agencies or instrumentalities. U.S. government agency securities include securities issued by (a) the Federal Housing Administration, Farmers Home Administration, Export-Import Bank of the United States, Small Business Administration, and the Government National Mortgage Association, whose securities are supported by the full faith and credit of the United States; (b) the Federal Home Loan Banks, Federal Intermediate Credit Banks, and the Tennessee Valley Authority, whose securities are supported by the right of the agency to borrow from the U.S. Treasury; (c) the Federal National Mortgage Association, whose securities are supported by the discretionary authority of the U.S. government to purchase certain obligations of the agency or instrumentality; and (d) the Student Loan Marketing Association, whose securities are supported only by its credit. While the U.S. government provides financial support to such U.S. government-sponsored agencies or instrumentalities, no assurance can be given that it always will do so since it is not so obligated by law. The U.S. government, its agencies, and instrumentalities do not guarantee the market value of their securities. Consequently, the value of such securities may fluctuate.

(2) Certificates of Deposit issued against funds deposited in a bank or a savings and loan association. Such certificates are for a definite period of time, earn a specified rate of return, and are normally negotiable. The issuer of a certificate of deposit agrees to pay the amount deposited plus interest to the bearer of the certificate on the date specified thereon. Under current FDIC regulations, the maximum insurance payable as to any one certificate of deposit is \$100,000; therefore, certificates of deposit purchased by the Fund may not be fully insured.

(3) Repurchase agreements, which involve purchases of debt securities. At the time the Fund purchases securities pursuant to a repurchase agreement, it simultaneously agrees to resell and redeliver such securities to the seller, who also simultaneously agrees to buy back the securities at a fixed price and time. This assures a predetermined yield for the Fund during its holding period, since the resale price is always greater than the purchase price and reflects an agreed-upon market rate. Such actions afford an opportunity for the Fund to invest temporarily available cash. The Fund may enter into repurchase agreements only with respect to obligations of the U.S. government, its agencies or instrumentalities; certificates of deposit; or bankers' acceptances in which the Fund may invest. Repurchase agreements may be considered loans to the seller, collateralized by the underlying securities. The risk to the Fund is limited to the ability of the seller to pay the agreed-upon sum on the repurchase date; in the event of default, the repurchase agreement provides that the Fund is entitled to sell the underlying collateral. If the seller defaults under a repurchase agreement when the value of the underlying collateral is less than the repurchase price, the Fund could incur a loss of both principal and interest. The Adviser monitors the value of the collateral at the time the action is entered into and at all times during the term of the repurchase agreement. The Adviser does so in an effort to determine that the value of the collateral always equals or exceeds the agreed-upon repurchase price to be paid to the Fund. If the seller were to be subject to a federal bankruptcy proceeding, the ability of the Fund to liquidate the collateral could be delayed or impaired because of certain provisions of the bankruptcy laws.

(4) Commercial paper, which consists of short-term unsecured promissory notes, including variable rate master demand notes issued by corporations to finance their current operations. Master demand notes are direct lending arrangements between the Fund and a corporation. There is no secondary market for such notes. However, they are redeemable by the Fund at any time. NFA will consider the financial condition of the corporation (e.g., earning power, cash flow, and other liquidity measures) and will continuously monitor

the corporation's ability to meet all of its financial obligations, because the Fund's liquidity might be impaired if the corporation were unable to pay principal and interest on demand. Investments in commercial paper will be limited to commercial paper rated in the highest categories by a NRSRO and which mature within one year of the date of purchase or carry a variable or floating rate of interest.

Other Investment Companies

The Fund may invest in securities of other closed-end investment companies that invest primarily in securities of the types in which the Fund may invest directly. The Fund may invest in other investment companies either during periods when it has large amounts of uninvested cash, or during periods when there is a shortage of attractive securities of the types in which the Fund may invest in directly available in the market. The Fund may invest in investment companies that are advised by NFA or its affiliates to the extent permitted by the applicable law and/or pursuant to exemptive relief from the U.S. Securities and Exchange Commission. As an investor in an investment company, the Fund will bear its ratable share of that investment company's expenses, and would remain subject to payment of the Fund's advisory and administrative fees with respect to assets so invested. Common Shareholders would therefore be subject to duplicative expenses to the extent the Fund invests in other investment companies. Symphony will take expenses into account when evaluating the investment merits of an investment in the investment company relative to available securities of the types in which the Fund may invest directly. In addition, the securities of other investment companies also may be leveraged and therefore will be subject to the same leverage risks described herein. As described in the section entitled "Risk Factors" in the Prospectus, the net asset value and market value of leveraged shares will be more volatile and the yield to shareholders will tend to fluctuate more than the yield generated by unleveraged shares. The Fund will treat its investments in such investment companies as investments in Senior Loans for all purposes, such as for purposes of determining compliance with the requirement set forth above that at least 80% of the Fund's Managed Assets be invested under normal circumstances in Senior Loans.

Lending of Portfolio Securities

The Fund may lend its portfolio securities to broker-dealers and banks. Any such loan must be continuously secured by collateral in cash or cash equivalents maintained on a current basis in an amount at least equal to the market value of the securities loaned by the Fund. The Fund would continue to receive the equivalent of the interest or dividends paid by the Issuer on the securities loaned through payments from the borrower. The Fund would also receive an additional return that may be in the form of a fixed fee or a percentage of the collateral. The Fund may pay reasonable fees to persons unaffiliated with the Fund for services in arranging these loans. The Fund would have the right to call the loan and obtain the securities loaned at any time on notice of not more than five business days. The Fund would not have the right to vote the securities during the existence of the loan but would call the loan to permit voting of the securities, if, in Symphony's judgment, a material event requiring a shareholder vote would otherwise occur before the loan was repaid. In the event of bankruptcy or other default of the borrower, the Fund could experience both delays in liquidating the loan collateral or recovering the loaned securities and losses, including (a) possible decline in the value of the collateral or in the value of the securities loaned during the period while the Fund seeks to enforce its rights thereto, (b) possible subnormal levels of income and lack of access to income during this period, and (c) expenses of enforcing its rights.

Portfolio Trading and Turnover Rate

Portfolio trading may be undertaken to accomplish the investment objective of the Fund in relation to actual and anticipated movements in interest rates. In addition, a security may be sold and another of comparable quality purchased at approximately the same time to take advantage of what Symphony believes to be a temporary price disparity between the two securities. Temporary price disparities between two comparable securities may result from supply and demand imbalances where, for example, a temporary oversupply of certain securities may cause a temporarily low price for such securities, as compared with other securities of like quality and characteristics. A security may also be sold when Symphony anticipates a change in the price of such

security, Symphony believes the price of a security has reached or is near a realistic maximum, or there are other securities that Symphony believes are more attractive given the Fund's investment objective. The Fund may also engage to a limited extent in short-term trading consistent with its investment objective. Securities may be sold in anticipation of a market decline or purchased in anticipation of a market rise and later sold, but the Fund will not engage in trading solely to recognize a gain. Subject to the foregoing, the Fund will attempt to achieve its investment objective by prudent selection of securities with a view to holding them for investment. While there can be no assurance thereof, the Fund anticipates that its annual portfolio turnover rate will generally not exceed 100%. However, the rate of turnover will not be a limiting factor when the Fund deems it desirable to sell or purchase securities. Therefore, depending upon market conditions, the annual portfolio turnover rate of the Fund may exceed 100% in particular years. A higher portfolio turnover rate results in correspondingly greater brokerage commissions and other transactional expenses that are borne by the Fund. High portfolio turnover may result in the realization of net short-term capital gains by the Fund which, when distributed to shareholders, will be taxable as ordinary income.

Interest Rate Transactions

The Fund expects that the Fund's portfolio investments in Senior Loans and other adjustable rate debt instruments in which the Fund may invest will serve as a hedge against the risk that Common Share net income and/or returns may decrease due to rising market dividend or interest rates on any preferred shares or Borrowings. If market conditions are deemed favorable, the Fund also may enter into interest rate swap or cap transactions to attempt to protect itself from such interest rate risk on the remaining amount of any outstanding preferred shares and/or Borrowings. Interest rate swaps involve the Fund's agreement with the swap counterparty to pay a fixed rate payment in exchange for the counterparty agreeing to pay the Fund a payment at a variable rate that is expected to approximate the rate on the Fund's variable rate payment obligation on Borrowings or any variable rate preferred shares. The payment obligations would be based on the notional amount of the swap. The Fund may use an interest rate cap, which would require it to pay a premium to the cap counterparty and would entitle it, to the extent that a specified variable rate index exceeds a predetermined fixed rate, to receive from the counterparty payment of the difference based on the notional amount. The Fund would use interest rate swaps or caps only with the intent to reduce or eliminate the risk that an increase in short-term interest rates could have on Common Share net earnings as a result of leverage.

Because Senior Loans and other adjustable rate debt instruments in which the Fund may invest and the Fund's preferred shares and Borrowings generally pay interest or dividends based on short-term market interest rates, the Fund's investments in Senior Loans and other adjustable rate debt instruments may potentially offset the leverage risks borne by the Fund relating to the fluctuations on Common Share income due to variations in the preferred share dividend rate and/or the interest rate on Borrowings. The Fund will usually enter into swaps or caps on a net basis; that is, the two payment streams will be netted out in a cash settlement on the payment date or dates specified in the instrument, with the Fund receiving or paying, as the case may be, only the net amount of the two payments. The Fund intends to maintain in a segregated account with its custodian cash or liquid securities having a value at least equal to the Fund's net payment obligations under any swap transaction, marked-to-market daily.

The use of interest rate swaps and caps is a highly specialized activity that involves investment techniques and risks different from those associated with ordinary portfolio security transactions. Depending on the state of interest rates in general, the Fund's use of interest rate swaps or caps could enhance or harm the overall performance on the Common Shares. To the extent there is a decline in interest rates, the value of the interest rate swap or cap could decline, and could result in a decline in the net asset value of the Common Shares. In addition, if short-term interest rates are lower than the Fund's fixed rate of payment on the interest rate swap, the swap will reduce Common Share net earnings. If, on the other hand, short-term interest rates are higher than the fixed rate of payment on the interest rate swap, the swap will enhance Common Share net earnings. Buying interest rate caps could enhance the performance of the Common Shares by providing a maximum leverage expense. Buying interest rate caps could also decrease the net earnings of the Common Shares in the event that the premium paid

by the Fund to the counterparty exceeds the additional amount the Fund would have been required to pay had it not entered into the cap agreement. The Fund will not enter into interest rate swap or cap transactions in an aggregate notional amount that exceeds the remainder of the outstanding amount of the Fund's leverage, less the amount of Senior Loans in the Fund's portfolio. The Fund has no current intention of selling an interest rate swap or cap. The Fund will monitor its interest rate swap and cap transactions with a view to insuring that it remains in compliance with all applicable tax requirements.

Interest rate swaps and caps do not involve the delivery of securities or other underlying assets or principal. Accordingly, the risk of loss with respect to interest rate swaps is limited to the net amount of interest payments that the Fund is contractually obligated to make. If the counterparty defaults, the Fund would not be able to use the anticipated net receipts under the swap or cap to offset the interest payments on Borrowings or dividend payments on the preferred shares. Depending on whether the Fund would be entitled to receive net payments from the counterparty on the swap or cap, which in turn would depend on the general state of short-term interest rates at that point in time, such a default could negatively impact the performance of the Common Shares. Although this will not guarantee that the counterparty does not default, the Fund will not enter into an interest rate swap or cap transaction with any counter-party that NFA believes does not have the financial resources to honor its obligation under the interest rate swap or cap transaction. Further, NFA will continually monitor the financial stability of a counterparty to an interest rate swap or cap transaction in an effort to proactively protect the Fund's investments.

In addition, at the time the interest rate swap or cap transaction reaches its scheduled termination date, there is a risk that the Fund would not be able to obtain a replacement transaction or that the terms of the replacement would not be as favorable as on the expiring transaction. If this occurs, it could have a negative impact on the performance of the Fund's Common Shares. The Fund may choose or be required to prepay any Borrowings or redeem some or all of the preferred shares. This redemption would likely result in the Fund seeking to terminate early all or a portion of any swap or cap transaction. Such early termination of a swap could result in termination payment by or to the Fund. An early termination of a cap could result in a termination payment to the Fund.

SEGREGATION OF ASSETS

As a closed-end investment company registered with the Securities and Exchange Commission, the Fund is subject to the federal securities laws, including the 1940 Act, the rules thereunder, and various interpretive provisions of the Securities and Exchange Commission and Securities and its staff. In accordance with these laws, rules and positions, the Fund must set aside (often referred to as asset segregation) liquid assets, or engage in other Securities and Exchange Commission or staff-approved measures, to cover open positions with respect to certain kinds of derivatives instruments. In the case of forward currency contracts that are not contractually required to cash settle, for example, the Fund must set aside liquid assets equal to such contracts' full notional value while the positions are open. With respect to forward currency contracts that are contractually required to cash settle, however, the Fund is permitted to set aside liquid assets in an amount equal to the Fund's daily marked-to-market net obligations (*i.e.*, the Fund's daily net liability) under the contracts, if any, rather than such contracts' full notional value. The Fund reserves the right to modify its asset segregation policies in the future to comply with any changes in the positions from time to time articulated by the Securities and Exchange Commission or its staff regarding asset segregation.

The Fund generally will use its assets to cover its obligations as required by the 1940 Act, the rules thereunder, and applicable positions of the Securities and Exchange Commission and its staff. As a result of their segregation, such assets may not be used for other operational purposes. NFA will monitor the Fund's use of derivatives and will take action as necessary for the purpose of complying with the asset segregation policy stated above. Such actions may include the sale of the Fund's portfolio investments.

HEDGING TRANSACTIONS

As a non-fundamental policy that can be changed by the Board of Trustees, the use of derivatives and other transactions for purposes of hedging the portfolio will be restricted to reducing the portfolio's exposure to lower grade credit risk, foreign currency exchange rate risk and the risk of increases in interest rates. The specific derivative instruments to be used, or other transactions to be entered into, for hedging purposes may include the purchase or sale of futures contracts on securities, credit-linked notes, securities indices, other indices or other financial instruments; options on futures contracts; exchange-traded and over-the-counter options on securities or indices; index-linked securities; swaps; and currency exchange transactions. Some, but not all, of the derivative instruments may be traded and listed on an exchange. The positions in derivatives will be marked-to-market daily at the closing price established on the relevant exchange or at a fair value.

There may be an imperfect correlation between changes in the value of the Fund's portfolio holdings and hedging positions entered into by the Fund, which may prevent the Fund from achieving the intended hedge or expose the Fund to risk of loss. In addition, the Fund's success in using hedging instruments is subject to Symphony's ability to predict correctly changes in the relationships of such hedge instruments to the Fund's portfolio holdings or other factors, and there can be no assurance that Symphony's judgment in this respect will be correct. Consequently, the use of hedging transactions might result in a poorer overall performance for the Fund, whether or not adjusted for risk, than if the Fund had not hedged its portfolio holdings. In addition, there can be no assurance that the Fund will enter into hedging or other transactions at times or under circumstances in which it would be advisable to do so. See Hedging Transactions in the Fund's Prospectus.

Short Sales. The Fund may make short sales of securities if, at all times when a short position is open, the Fund owns at least an equal amount of such securities or securities convertible into or exchangeable for, without payment of any further consideration, securities of the same issuer as, and equal in amount to, the securities sold short. This technique is called selling short against the box.

In a short sale, the Fund will not deliver from its portfolio the securities sold and will not receive immediately the proceeds from the sale. Instead, the Fund will borrow the securities sold short from a broker-dealer through which the short sale is executed and the broker-dealer will deliver such securities, on behalf of the Fund, to the purchaser of such securities. Such broker-dealer will be entitled to retain the proceeds from the short sale until the Fund delivers to such broker-dealer the securities sold short. In addition, the Fund will be required to pay the broker-dealer the amount of any dividends paid on shares sold short. Finally, to secure its obligation to deliver to such broker-dealer the securities sold short, the Fund must deposit and continuously maintain in a separate account with its custodian an equivalent amount of the securities sold short or securities convertible into or exchangeable for such securities without the payment of additional consideration. The Fund is said to have a short position in the securities sold until it delivers to the broker-dealer the securities sold, at which time the Fund will receive the proceeds of the sale. Because the Fund ordinarily will want to continue to hold securities in its portfolio that are sold short, the Fund will normally close out a short position by purchasing on the open market and delivering to the broker-dealer an equal amount of the securities sold short, rather than delivering portfolio securities.

Short sales may protect the Fund against the risk of losses in the value of its portfolio securities because any unrealized losses with respect to such portfolio securities should be wholly or partially offset by a corresponding gain in the short position. However, any potential gain in such portfolio securities should be wholly or partially offset by a corresponding loss in the short position. The extent to which such gains or losses are offset will depend upon the amount of securities sold short relative to the amount the Fund owns, either directly or indirectly, and, in the case where the Fund owns convertible securities, changes in the conversion premium. The Fund will incur transaction costs in connection with short sales.

In addition to enabling the Fund to hedge against market risk, short sales may afford the Fund an opportunity to earn additional current income to the extent the Fund is able to enter into arrangements with

broker-dealers through which the short sales are executed to receive income with respect to the proceeds of the short sales during the period the Fund's short positions remain open.

The Code imposes constructive sale treatment for federal income tax purposes on certain hedging strategies with respect to appreciated financial positions. Under these rules, taxpayers will recognize gain, but not loss, with respect to securities if they enter into short sales or offsetting notional principal contracts (as defined by the Code) with respect to, or futures or forward contracts to deliver, the same or substantially identical property, or if they enter into such transactions and then acquire the same or substantially identical property. See Tax Matters.

Options on Securities. In order to hedge against adverse market shifts, the Fund may purchase put and call options on stock, bonds or other securities. In addition, the Fund may seek to hedge a portion of its portfolio investments through writing (i.e., selling) covered put and call options. A put option embodies the right of its purchaser to compel the writer of the option to purchase from the option holder an underlying security or its equivalent at a specified price at any time during the option period. In contrast, a call option gives the purchaser the right to buy the underlying security covered by the option or its equivalent from the writer of the option at the stated exercise price at any time during the option period.

As a holder of a put option, the Fund will have the right to sell the securities underlying the option and as the holder of a call option, the Fund will have the right to purchase the securities underlying the option, in each case at their exercise price at any time during the option period prior to the option's expiration date. The Fund may choose to exercise the options it holds, permit them to expire or terminate them prior to their expiration by entering into closing sale or purchase transactions. In entering into a closing sale or purchase transaction, the Fund would sell an option of the same series as the one it has purchased. The ability of the Fund to enter into a closing sale transaction with respect to options purchased and to enter into a closing purchase transaction with respect to options sold depends on the existence of a liquid secondary market. There can be no assurance that a closing purchase or sale transaction can be effected when the Fund so desires. The Fund's ability to terminate option positions established in the over-the-counter market may be more limited than in the case of exchange-traded options and may also involve the risk that securities dealers participating in such transactions would fail to meet their obligations to the Fund.

In purchasing a put option, the Fund seeks to benefit from a decline in the market price of the underlying security, while in purchasing a call option, the Fund seeks to benefit from an increase in the market price of the underlying security. If an option purchased is not sold or exercised when it has remaining value, or if the market price of the underlying security remains equal to or greater than the exercise price, in the case of a put, or remains equal to or below the exercise price, in the case of a call, during the life of the option, the option will expire worthless. For the purchase of an option to be profitable, the market price of the underlying security must decline sufficiently below the exercise price, in the case of a put, and must increase sufficiently above the exercise price, in the case of a call, to cover the premium and transaction costs. Because option premiums paid by the Fund are small in relation to the market value of the instruments underlying the options, buying options can result in additional amounts of leverage to the Fund. The leverage caused by trading in options could cause the Fund's net asset value to be subject to more frequent and wider fluctuation than would be the case if the Fund did not invest in options.

The Fund will receive a premium when it writes put and call options, which increases the Fund's return on the underlying security in the event the option expires unexercised or is closed out at a profit. By writing a call, the Fund will limit its opportunity to profit from an increase in the market value of the underlying security above the exercise price of the option for as long as the Fund's obligation as the writer of the option continues. Upon the exercise of a put option written by the Fund, the Fund may suffer an economic loss equal to the difference between the price at which the Fund is required to purchase the underlying security and its market value at the time of the option exercise, less the premium received for writing the option. Upon the exercise of a call option written by the Fund, the Fund may suffer an economic loss equal to an amount not less than the excess of the security's market value at the time of the option exercise over the Fund's acquisition cost of the security, less the

sum of the premium received for writing the option and the difference, if any, between the call price paid to the Fund and the Fund's acquisition cost of the security. Thus, in some periods the Fund might receive less total return and in other periods greater total return from its hedged positions than it would have received from its underlying securities unhedged.

Options on Stock and Bond Indexes. The Fund may purchase put and call options on stock and bond indexes to hedge against risks of market-wide price movements affecting its assets. In addition, the Fund may write covered put and call options on stock and bond indexes. A stock or bond index measures the movement of a certain group of stocks or bonds by assigning relative values to the stocks or bonds included in the index. Options on a stock or bond index are similar to options on securities. Because no underlying security can be delivered, however, the option represents the holder's right to obtain from the writer, in cash, a fixed multiple of the amount by which the exercise price exceeds (in the case of a put) or is less than (in the case of a call) the closing value of the underlying index on the exercise date. The advisability of using stock or bond index options to hedge against the risk of market-wide movements will depend on the extent of diversification of the Fund's investments and the sensitivity of its investments to factors influencing the underlying index. The effectiveness of purchasing or writing stock or bond index options as a hedging technique will depend upon the extent to which price movements in the Fund's investments correlate with price movements in the stock or bond index selected. In addition, successful use by the Fund of options on stock or bond indexes will be subject to the ability of Symphony to predict correctly changes in the relationship of the underlying index to the Fund's portfolio holdings. No assurance can be given that Symphony's judgment in this respect will be correct. When the Fund writes an option on a stock or bond index, it will establish a segregated account with its custodian in which the Fund will deposit liquid securities in an amount equal to the market value of the option, and will maintain the account while the option is open.

Stock and Bond Index Futures Contracts. The Fund may purchase and sell stock index futures as a hedge against movements in the equity markets. Stock and bond index futures contracts are agreements in which one party agrees to deliver to the other an amount of cash equal to a specific dollar amount times the difference between the value of a specific stock or bond index at the close of the last trading day of the contract and the price at which the agreement is made. No physical delivery of securities is made. For example, if Symphony expects general stock or bond market prices to decline, it might sell a futures contract on a particular stock or bond index. If that index does in fact decline, the value of some or all of the securities in the Fund's portfolio may also be expected to decline, but that decrease would be offset in part by the increase in the value of the Fund's position in such futures contract. If, on the other hand, Symphony expects general stock or bond market prices to rise, it might purchase a stock or bond index futures contract as a hedge against an increase in prices of particular securities it wants ultimately to buy. If in fact the stock or bond index does rise, the price of the particular securities intended to be purchased may also increase, but that increase would be offset in part by the increase in the value of the Fund's futures contract resulting from the increase in the index. The Fund may purchase futures contracts on a stock or bond index to enable Symphony to gain immediate exposure to the underlying securities market pending the investment in individual securities of the Fund's portfolio.

Under regulations of the Commodity Futures Trading Commission (CFTC) currently in effect, which may change from time to time, with respect to futures contracts purchased by the Fund, the Fund will set aside in a segregated account liquid securities with a value at least equal to the value of instruments underlying such futures contracts less the amount of initial margin on deposit for such contracts. The current view of the staff of the Securities and Exchange Commission is that the Fund's long and short positions in futures contracts must be collateralized with cash or certain liquid assets held in a segregated account or covered in order to counter the impact of any potential leveraging. Parties to a futures contract must make initial margin deposits to secure performance of the contract. There are also requirements to make variation margin deposits from time to time as the value of the futures contract fluctuates. The Fund and NFA have claimed, respectively, an exclusion from registration as a commodity pool and as a commodity trading advisor under the Commodity Exchange Act (CEA) and, therefore, neither the Fund nor NFA, or their officers and directors, are subject to the registration requirements of the CEA. The Fund reserves the right to engage in transactions involving futures and options

thereon to the extent allowed by CFTC regulations in effect from time to time and in accordance with the Fund's policies. In addition, certain provisions of the Code may limit the extent to which the Fund may enter into futures contracts or engage in options transactions. See Tax Matters.

The potential loss related to the purchase of an option on a futures contract is limited to the premium paid for the option (plus transaction costs). With respect to options purchased by the Fund, there are no daily cash payments made by the Fund to reflect changes in the value of the underlying contract; however, the value of the option does change daily and that change would be reflected in the net asset value of the Fund.

Other Futures Contracts and Options on Futures Contracts. The Fund's use of derivative instruments also may include (i) U.S. Treasury security or U.S. Government Agency security futures contracts and (ii) options on U.S. Treasury security or U.S. Government Agency security futures contracts. All such instruments must be traded and listed on an exchange. U.S. Treasury and U.S. Government Agency futures contracts are standardized contracts for the future delivery of a U.S. Treasury Bond or U.S. Treasury Note or a U.S. Government Agency security or their equivalent at a future date at a price set at the time of the contract. An option on a U.S. Treasury or U.S. Government Agency futures contract, as contrasted with the direct investment in such a contract, gives the purchaser of the option the right, in return for the premium paid, to assume a position in a U.S. Treasury or U.S. Government Agency futures contract at a specified exercise price at any time on or before the expiration date of the option. Upon exercise of an option, the delivery of the futures position by the writer of the option to the holder of the option will be accompanied by delivery of the accumulated balance in the writer's future margin account, which represents the amount by which the market price of the futures contract exceeds the exercise price of the option on the futures contract.

Risks Associated with Futures Contracts and Options on Futures Contracts. Futures prices are affected by many factors, such as current and anticipated short-term interest rates, changes in volatility of the underlying instrument and the time remaining until expiration of the contract. A purchase or sale of a futures contract may result in losses in excess of the amount invested in the futures contract. While the Fund may enter into futures contracts and options on futures contracts for hedging purposes, the use of futures contracts and options on futures contracts might result in a poorer overall performance for the Fund than if it had not engaged in any such transactions. If, for example, the Fund had insufficient cash, it might have to sell a portion of its underlying portfolio of securities in order to meet daily variation margin requirements on its futures contracts or options on futures contracts at a time when it might be disadvantageous to do so. There may be an imperfect correlation between the Fund's portfolio holdings and futures contracts or options on futures contracts entered into by the Fund, which may prevent the Fund from achieving the intended hedge or expose the Fund to risk of loss. The degree of imperfection of correlation depends on circumstances such as: variations in speculative market demand for futures, futures options and the related securities, including technical influences in futures and futures options trading and differences between the securities markets and the securities underlying the standard contracts available for trading. Futures prices are affected by many factors, such as current and anticipated short-term interest rates, changes in volatility of the underlying instrument and the time remaining until the expiration of the contract. Further, the Fund's use of futures contracts and options on futures contracts to reduce risk involves costs and will be subject to Symphony's ability to predict correctly changes in interest rate relationships or other factors. A decision as to whether, when and how to use futures contracts involves the exercise of skill and judgment, and even a well-conceived transaction may be unsuccessful to some degree because of market behavior or unexpected stock price or interest rate trends. No assurance can be given that Symphony's judgment in this respect will be correct.

Futures exchanges may limit the amount of fluctuation permitted in certain futures contract prices during a single trading day. The daily limit establishes the maximum amount that the price of a futures contract may vary either up or down from the previous day's settlement price at the end of the current trading session. Once the daily limit has been reached in a futures contract subject to the limit, no more trades may be made on that day at a price beyond that limit. The daily limit governs only price movements during a particular trading day and therefore does not limit potential losses because the limit may work to prevent the liquidation of unfavorable

positions. For example, futures prices have occasionally moved to the daily limit for several consecutive trading days with little or no trading, thereby preventing prompt liquidation of positions and subjecting some holders of futures contracts to substantial losses. Stock index futures contracts are not normally subject to such daily price change limitations.

The Fund may invest in other options. An option is an instrument that gives the holder of the instrument the right, but not the obligation, to buy or sell a predetermined number of specific securities (i.e. preferred stocks, common stocks or bonds) at a stated price within the expiration period of the instrument, which is generally less than 12 months from its issuance. If the right is not exercised after a specified period but prior to the expiration, the option expires. Both put and call options may be used by the Fund.

Structured Notes. The Fund may use structured notes and similar instruments for hedging purposes. Structured notes are privately negotiated debt obligations or economically equivalent instruments where the principal and/or interest is determined by reference to the performance of a benchmark asset, market or interest rate (an embedded index), such as selected securities or loans, an index of securities or loans or specified interest rates or the differential performance of two assets or markets. The terms of such structured instruments normally provide that their principal and/or interest payments are to be adjusted upwards or downwards (but not ordinarily below zero) to reflect changes in the embedded index while the structured instruments are outstanding. As a result, the interest and/or principal payments that may be made on a structured product may vary widely, depending on a variety of factors, including the volatility of the embedded index and the effect of changes in the embedded index on principal and/or interest payments. The rate of return on structured notes may be determined by applying a multiplier to the performance or differential performance of the referenced index(es) or other asset(s). Application of a multiplier involves leverage that will serve to magnify the potential for gain and the risk of loss.

The Fund may purchase and sell various other kinds of financial futures contracts and options thereon. Futures contracts may be based on various debt securities and securities indices (such as the Municipal Bond Index traded on the Chicago Board of Trade). Such transactions involve a risk of loss or depreciation due to unanticipated adverse changes in securities prices, which may exceed the Fund's initial investment in these contracts. The Fund will only purchase or sell futures contracts or related options in compliance with the rules of the Commodity Futures Trading Commission. These transactions involve transaction costs. There can be no assurance that the Fund's use of futures will be advantageous to the Fund. Guidelines established by one or more NRSROs that rate any preferred shares issued by the Fund may limit use of these transactions.

Credit-Linked Notes. The Fund may invest in credit-linked notes (CLN) for risk management purposes, including diversification. A CLN is a derivative instrument that is a synthetic obligation between two or more parties where the payment of principal and/or interest is based on the performance of some obligation (a reference obligation). In addition to credit risk of the reference obligation and interest rate risk, the buyer/seller of the CLN is subject to counterparty risk. See Risk Factors Counterparty Risk in the Fund's Prospectus.

Swaps. Swap contracts may be purchased or sold to hedge against fluctuations in securities prices, interest rates or market conditions, to change the duration of the overall portfolio, or to mitigate default risk. In a standard swap transaction, two parties agree to exchange the returns (or differentials in rates of return) to be exchanged or swapped between the parties, which returns are calculated with respect to a notional amount, i.e., the return on or increase in value of a particular dollar amount invested at a particular interest rate or in a basket of securities representing a particular index.

Credit Default Swaps. The Fund may enter into credit default swap contracts for risk management purposes, including diversification. When the Fund is the buyer of a credit default swap contract, the Fund is entitled to receive the par (or other agreed-upon) value of a referenced debt obligation from the counterparty to the contract in the event of a default by a third party, such as a U.S. or non-U.S. corporate issuer, on the debt obligation. In return, the Fund would pay the counterparty a periodic stream of payments over the term of the contract provided

that no event of default has occurred. If no default occurs, the Fund would have spent the stream of payments and received no benefit from the contract. When the Fund is the seller of a credit default swap contract, it receives the stream of payments, but is obligated to pay upon default of the referenced debt obligation. As the seller, the Fund would effectively add leverage to its portfolio because, in addition to its total net assets, the Fund would be subject to investment exposure on the notional amount of the swap. The Fund will segregate assets in the form of cash and cash equivalents in an amount equal to the aggregate market value of the credit default swaps of which it is the seller, marked to market on a daily basis. These transactions involve certain risks, including the risk that the seller may be unable to fulfill the transaction. The tax treatment of certain credit default swaps is uncertain.

Interest Rate Swaps. The Fund will enter into interest rate and total return swaps only on a net basis, i.e., the two payment streams are netted out, with the Fund receiving or paying, as the case may be, only the net amount of the two payments. Interest rate swaps involve the exchange by the Fund with another party of their respective commitments to pay or receive interest (e.g., an exchange of fixed rate payments for floating rate payments). The Fund will only enter into interest rate swaps on a net basis. If the other party to an interest rate swap defaults, the Fund's risk of loss consists of the net amount of payments that the Fund is contractually entitled to receive. The net amount of the excess, if any, of the Fund's obligations over its entitlements will be maintained in a segregated account by the Fund's custodian. The Fund will not enter into any interest rate swap unless the claims-paying ability of the other party thereto is considered to be investment grade by the Advisers. If there is a default by the other party to such a transaction, the Fund will have contractual remedies pursuant to the agreements related to the transaction.

These instruments are traded in the over-the-counter market. The Fund may use interest rate swaps for risk management purposes only and not as a speculative investment and would typically use interest rate swaps to shorten the average interest rate reset time of the Fund's holdings. Interest rate swaps involve the exchange by the Fund with another party of their respective commitments to pay or receive interest (e.g., an exchange of fixed rate payments for floating rate payments). The use of interest rate swaps is a highly specialized activity which involves investment techniques and risks different from those associated with ordinary portfolio securities transactions. If Symphony is incorrect in its forecasts of market values, interest rates and other applicable factors, the investment performance of the Fund would be unfavorably affected.

Total Return Swaps. As stated above, the Fund will enter into total return swaps only on a net basis. Total return swaps are contracts in which one party agrees to make payments of the total return from the underlying asset(s), which may include securities, baskets of securities, or securities indices during the specified period, in return for payments equal to a fixed or floating rate of interest or the total return from other underlying asset(s).

Other Hedging Transactions. The Fund may invest in relatively new instruments without a significant trading history for purposes of hedging the Fund's portfolio risks. As a result, there can be no assurance that an active secondary market will develop or continue to exist.

MANAGEMENT OF THE FUND
Trustees and Officers

The management of the Fund, including general supervision of the duties performed for the Fund under the Investment Management Agreement (as defined herein), is the responsibility of the Board of Trustees of the Fund. The number of trustees of the Fund is currently set at ten, one of whom is an interested person (as that term is defined in the 1940 Act) and nine of whom are not interested persons (referred to herein as independent trustees). None of the trustees who are not interested persons of the Fund has ever been a director or employee of, or consultant to, Nuveen or its affiliates. The trustees are classified as Class I, Class II and Class III trustees. Trustees are elected for a three-year term, the Class II trustees serving until the 2014 annual meeting, the Class III trustees serving until the 2012 annual meeting and the Class I trustees serving until the 2013 annual meeting, in each case until their respective successors are elected and qualified.

Currently, Board Members Hunter, Stockdale, Stone, and Stringer are slated in Class I, Board Members Amboian, Kundert and Toth are slated in Class II and Board Members Bremner, Evans and Schneider are slated in Class III. The names and business addresses of the trustees and officers of the Fund, their principal occupations and other affiliations during the past five years, the number of portfolios each oversees and other directorships they hold are set forth below.

Name, Business Address and Birthdate	Position(s) Held with Fund	Year First Elected or Appointed⁽¹⁾	Principal Occupation(s) During Past Five Years	Number of Portfolios in Fund Complex Overseen by Trustee	Other Directorships Held by Trustee During Past 5 Years
Independent Trustees: Robert P. (2004-2010).	235

- (1) Board members serve a three-year term, until his/her successor is elected. The year first elected or appointed represents the year in which the board member or officer was first elected or appointed to any fund in the Nuveen Complex.
- (2) Mr. Amboian is an interested person of the Trust, as defined in the 1940 Act, by reason of his positions with Nuveen Investments, Inc. (Nuveen Investments) and certain of its subsidiaries.

Board Leadership Structure and Risk Oversight

The Board of Directors or the Board of Trustees (as the case may be, each is referred to hereafter as the Board and the directors or trustees of the Nuveen Funds, as applicable, are each referred to herein as Trustees) oversees the operations and management of the Nuveen Funds, including the duties performed for the Nuveen Funds by the investment advisor. The Board has adopted a unitary board structure. A unitary board consists of one group of directors who serve on the board of every fund in the complex. In adopting a unitary board structure, the Trustees seek to provide effective governance through establishing a board, the overall composition of which will, as a body, possess the appropriate skills, independence and experience to oversee the Nuveen Funds business. With this overall framework in mind, when the Board, through its Nominating and Governance Committee discussed below, seeks nominees for the Board, the Trustees consider not only the candidate s particular background, skills and experience, among other things, but also whether such background, skills and experience enhance the Board s diversity and at the same time complement the Board given its current composition and the mix of skills and experiences of the incumbent Trustees.

The Board believes the unitary board structure enhances good and effective governance, particularly given the nature of the structure of the investment company complex. Funds in the same complex generally are served by the same service providers and personnel and are governed by the same regulatory scheme which raises common issues that must be addressed by the directors across the fund complex (such as compliance, valuation, liquidity, brokerage, trade allocation or risk management). The Board believes it is more efficient to have a single board review and oversee common policies and procedures which increases the Board's knowledge and expertise with respect to the many aspects of fund operations that are complex-wide in nature. The unitary structure also enhances the Board's influence and oversight over the investment advisor and other service providers.

In an effort to enhance the independence of the Board, the Board also has a Chairman that is an independent Trustee. The Board recognizes that a chairman can perform an important role in setting the agenda for the Board, establishing the boardroom culture, establishing a point person on behalf of the Board for fund management, and reinforcing the Board's focus on the long-term interests of shareholders. The Board recognizes that a chairman may be able to better perform these functions without any conflicts of interests arising from a position with fund management. Accordingly, the Trustees have elected Robert P. Bremner as the independent Chairman of the Board. Specific responsibilities of the Chairman include: (i) presiding at all meetings of the Board and of the shareholders; (ii) seeing that all orders and resolutions of the Trustees are carried into effect; and (iii) maintaining records of and, whenever necessary, certifying all proceedings of the Trustees and the shareholders.

Although the Board has direct responsibility over various matters (such as advisory contracts, underwriting contracts and Fund performance), the Board also exercises certain of its oversight responsibilities through several committees that it has established and which report back to the full Board. The Board believes that a committee structure is an effective means to permit Trustees to focus on particular operations or issues affecting the Nuveen Funds, including risk oversight. More specifically, with respect to risk oversight, the Board has delegated matters relating to valuation and compliance to certain committees (as summarized below) as well as certain aspects of investment risk. In addition, the Board believes that the periodic rotation of Trustees among the different committees allows the Trustees to gain additional and different perspectives of the Fund's operations. The Board has established five standing committees: the Executive Committee, the Dividend Committee, the Audit Committee, the Compliance, Risk Management and Regulatory Oversight Committee and the Nominating and Governance Committee. The Board may also from time to time create ad hoc committees to focus on particular issues as the need arises. The membership and functions of the standing committees are summarized below.

Executive Committee. Robert P. Bremner, Chair, Judith M. Stockdale and John P. Amboian, serve as members of the executive committee of the Fund. The executive committee, which meets between regular meetings of the Board, is authorized to exercise all of the powers of the Board; provided that the scope of the powers of the executive committee, unless otherwise specifically authorized by the full Board, is limited to: (i) emergency matters where assembly of the full Board is impracticable (in which case management will take all reasonable steps to quickly notify each individual Board Member of the actions taken by the executive committee) and (ii) matters of an administrative or ministerial nature. During the fiscal year ended July 31, 2011, the Executive Committee did not meet.

Dividend Committee. Jack B. Evans, Chair, Judith M. Stockdale and Terence J. Toth are the current members of the Dividend Committee. The Dividend Committee is authorized to declare distributions on the Trust's shares including, but not limited to, regular and special dividends, capital gains and ordinary income distributions. During the fiscal year ended July 31, 2011, the Dividend Committee held five meetings.

Compliance Risk Management and Regulatory Oversight Committee. The Compliance, Risk Management and Regulatory Oversight Committee (the Compliance Committee) is responsible for the oversight of compliance issues, risk management and other regulatory matters affecting the Nuveen Funds that are not otherwise the jurisdiction of the other committees. The Board has adopted and periodically reviews policies and procedures designed to address the Nuveen Funds' compliance and risk matters. As part of its duties, the Compliance Committee reviews the policies and procedures relating to compliance matters and recommends

modifications thereto as necessary or appropriate to the full Board; develops new policies and procedures as new regulatory matters affecting the Nuveen Funds arise from time to time; evaluates or considers any comments or reports from examinations from regulatory authorities and responses thereto; and performs any special reviews, investigations or other oversight responsibilities relating to risk management, compliance and/or regulatory matters as requested by the Board.

In addition, the Compliance Committee is responsible for risk oversight, including, but not limited to, the oversight of risks related to investments and operations. Such risks include, among other things, exposures to particular issuers, market sectors, or types of securities; risks related to product structure elements, such as leverage; and techniques that may be used to address those risks, such as hedging and swaps. In assessing issues brought to the committee's attention or in reviewing a particular policy, procedure, investment technique or strategy, the Compliance Committee evaluates the risks to the Nuveen Funds in adopting a particular approach or resolution compared to the anticipated benefits to the Nuveen Funds and their shareholders. In fulfilling its obligations, the Compliance Committee meets on a quarterly basis, and at least once a year in person. The Compliance Committee receives written and oral reports from the Nuveen Funds' Chief Compliance Officer (CCO) and meets privately with the CCO at each of its quarterly meetings. The CCO also provides an annual report to the full Board regarding the operations of the Nuveen Funds and other service providers' compliance programs as well as any recommendations for modifications thereto. The Compliance Committee also receives reports from the investment services group of Nuveen regarding various investment risks. Notwithstanding the foregoing, the full Board also participates in discussions with management regarding certain matters relating to investment risk, such as the use of leverage and hedging. The investment services group therefore also reports to the full Board at its quarterly meetings regarding, among other things, Fund performance and the various drivers of such performance. Accordingly, the Board directly and/or in conjunction with the Compliance Committee oversees matters relating to investment risks. Matters not addressed at the committee level are addressed directly by the full Board. The committee operates under a written charter adopted and approved by the Board of Trustees. The members of the Compliance Committee are Jack B. Evans, William C. Hunter, William J. Schneider, Judith M. Stockdale (Chair), and Virginia L. Stringer. During the fiscal year ended July 31, 2011, the Compliance, Risk Management and Regulatory Oversight Committee met four times.

Audit Committee. The Audit Committee assists the Board in the oversight and monitoring of the accounting and reporting policies, processes and practices of the Funds, and the audits of the financial statements of the Nuveen Funds; the quality and integrity of the financial statements of the Nuveen Funds; the Nuveen Funds' compliance with legal and regulatory requirements relating to the Nuveen Funds' financial statements; the independent auditors' qualifications, performance and independence; and the pricing procedures of the Nuveen Funds and the internal valuation group of Nuveen. It is the responsibility of the Audit Committee to select, evaluate and replace any independent auditors (subject only to Board and, if applicable, shareholder ratification) and to determine their compensation. The Audit Committee is also responsible for, among other things, overseeing the valuation of securities comprising the Nuveen Funds' portfolios. Subject to the Board's general supervision of such actions, the Audit Committee addresses any valuation issues, oversees the Nuveen Funds' pricing procedures and actions taken by Nuveen's internal valuation group which provides regular reports to the committee, reviews any issues relating to the valuation of the Nuveen Funds' securities brought to its attention and considers the risks to the Nuveen Funds in assessing the possible resolutions to these matters. The Audit Committee may also consider any financial risk exposures for the Nuveen Funds in conjunction with performing its functions.

To fulfill its oversight duties, the Audit Committee receives annual and semi-annual reports and has regular meetings with the external auditors for the Nuveen Funds and the internal audit group at Nuveen Investments. The Audit Committee also may review in a general manner the processes the Board or other Board committees have in place with respect to risk assessment as well as compliance with legal and regulatory matters relating to the Nuveen Funds' financial statements. The committee operates under a written charter adopted and approved by the Board. Members of the Audit Committee shall be independent (as set forth in the charter) and free of any relationship that, in the opinion of the Trustees, would interfere with their exercise of independent judgment as

an Audit Committee member. The members of the Audit Committee are Robert P. Bremner, David J. Kundert (Chair), William J. Schneider, Carole E. Stone and Terence J. Toth, each of whom is an independent Trustee of the Nuveen Funds. During the fiscal year ended July 31, 2011, the Audit Committee met four times.

Nominating and Governance Committee. The Nominating and Governance Committee is responsible for seeking, identifying and recommending to the Board qualified candidates for election or appointment to the Board. In addition, the Nominating and Governance Committee oversees matters of corporate governance, including the evaluation of Board performance and processes, the assignment and rotation of committee members, and the establishment of corporate governance guidelines and procedures, to the extent necessary or desirable, and matters related thereto. Although the unitary and committee structure has been developed over the years and the Nominating and Governance Committee believes the structure has provided efficient and effective governance, the committee recognizes that as demands on the Board evolve over time (such as through an increase in the number of funds overseen or an increase in the complexity of the issues raised), the committee must continue to evaluate the Board and committee structures and their processes and modify the foregoing as may be necessary or appropriate to continue to provide effective governance. Accordingly, the Nominating and Governance Committee has a separate meeting each year to, among other things, review the Board and committee structures, their performance and functions, and recommend any modifications thereto or alternative structures or processes that would enhance the Board's governance over the Nuveen Funds' business. In addition, the Nominating and Governance Committee, among other things, makes recommendations concerning the continuing education of Trustees; monitors performance of legal counsel and other service providers; establishes and monitors a process by which security holders are able to communicate in writing with members of the Board; and periodically reviews and makes recommendations about any appropriate changes to Trustee compensation. In the event of a vacancy on the Board, the Nominating and Governance Committee receives suggestions from various sources as to suitable candidates. Suggestions should be sent in writing to Lorna Ferguson, Manager of Fund Board Relations, Nuveen Investments, 333 West Wacker Drive, Chicago, IL 60606. The Nominating and Governance Committee sets appropriate standards and requirements for nominations for new Trustees and reserves the right to interview any and all candidates and to make the final selection of any new Trustees. In considering a candidate's qualifications, each candidate must meet certain basic requirements, including relevant skills and experience, time availability (including the time requirements for due diligence site visits to internal and external sub-advisors and service providers) and, if qualifying as an Independent Trustee candidate, independence from the Advisor, sub-advisors, underwriters or other service providers, including any affiliates of these entities. These skill and experience requirements may vary depending on the current composition of the Board, since the goal is to ensure an appropriate range of skills, diversity and experience, in the aggregate. Accordingly, the particular factors considered and weight given to these factors will depend on the composition of the Board and the skills and backgrounds of the incumbent Trustees at the time of consideration of the nominees. All candidates, however, must meet high expectations of personal integrity, independence, governance experience and professional competence. All candidates must be willing to be critical within the Board and with management and yet maintain a collegial and collaborative manner toward other Board members. The committee operates under a written charter adopted and approved by the Board. This committee is composed of the independent Trustees of the Nuveen Funds. Accordingly, the members of the Nominating and Governance Committee are Robert P. Bremner, Chair, Jack B. Evans, William C. Hunter, David J. Kundert, William J. Schneider, Judith M. Stockdale, Carole E. Stone, Virginia L. Stringer and Terence J. Toth. During the fiscal year ended July 31, 2011, the Nominating and Governance Committee met five times.

The Board held six regular meetings and four special meetings during the last fiscal year. During the last fiscal year, each Board Member attended 75% or more of the Fund's Board meetings and the committee meetings (if a member thereof) held during the period for which such Board Member was a Board Member. The policy of the Board relating to attendance by Board Members at annual meetings of the Fund and the number of Board Members who attended the last annual meeting of shareholders of the Fund is posted on the Nuveen Funds' website at www.nuveen.com/cef/info/shareholder.aspx.

Effective January 1, 2012, the Board approved the creation of the Open-End Funds Committee. The Open-End Funds Committee is responsible for assisting the Board in the oversight and monitoring of the Nuveen Funds that are registered as open-end management investment companies (Open-End Funds). The committee may review and evaluate matters related to the formation and the initial presentation to the Board of any new Open-End Fund and may review and evaluate any matters relating to any existing Open-End Fund. The committee operates under a written charter adopted and approved by the Board. The members of the Open-End Funds Committee are Robert P. Bremner, David J. Kundert, Judith M. Stockdale, Virginia L. Stringer and Terence J. Toth, Chair.

Effective January 1, 2012, the Board approved the creation of the Closed-End Funds Committee. The Closed-End Funds Committee is responsible for assisting the Board in the oversight and monitoring of the Nuveen Funds that are registered as closed-end investment companies (Closed-End Funds). The committee may review and evaluate matters related to the formation and the initial presentation to the Board of any new Closed-End Fund and may review and evaluate any matters relating to any existing Closed-End Fund. The committee operates under a written charter adopted and approved by the Board. The members of the Closed-End Funds Committee are Robert P. Bremner, Jack B. Evans, William C. Hunter, William J. Schneider, Chair, and Carole E. Stone.

Board Diversification and Trustee Qualifications. In determining that a particular Board Member was qualified to serve as a Board Member, the Board has considered each Board Member's background, skills, experience and other attributes in light of the composition of the Board with no particular factor controlling. The Board believes that Board Members need to have the ability to critically review, evaluate, question and discuss information provided to them, and to interact effectively with Fund management, service providers and counsel, in order to exercise effective business judgment in the performance of their duties and the Board believes each Board Member satisfies this standard. An effective Board Member may achieve this ability through his or her educational background; business, professional training or practice; public service or academic positions; experience from service as a board member (including the Boards of the Funds), or as an executive of investment funds, public companies or significant private or not-for-profit entities or other organizations; and or/other life experiences. Accordingly, set forth below is a summary of the experiences, qualifications, attributes, and skills that led to the conclusion, as of the date of this document, that each Board Member should continue to serve in that capacity. References to the experiences, qualifications, attributes and skills of Board Members are pursuant to requirements of the Securities and Exchange Commission, do not constitute holding out of the Board or any Board Member as having any special expertise or experience and shall not impose any greater responsibility or liability on any such person or on the Board by reason thereof.

John P. Amboian

Mr. Amboian, an interested Trustee of the Nuveen Funds, joined Nuveen Investments, Inc. (Nuveen) in June 1995 and became Chief Executive Officer in July 2007 and Chairman in November 2007. Prior to this, since 1999, he served as President with responsibility for the firm's product, marketing, sales, operations and administrative activities. Mr. Amboian initially served Nuveen as Executive Vice President and Chief Financial Officer. Prior to joining Nuveen, Mr. Amboian held key management positions with two consumer product firms affiliated with the Phillip Morris Companies. He served as Senior Vice President of Finance, Strategy and Systems at Miller Brewing Company. Mr. Amboian began his career in corporate and international finance at Kraft Foods, Inc., where he eventually served as Treasurer. He received a Bachelor's degree in economics and a Masters of Business Administration (MBA) from the University of Chicago. Mr. Amboian serves on the Board of Directors of Nuveen and is a Board Member or Trustee of the Investment Company Institute Board of Governors, Boys and Girls Clubs of Chicago, Children's Memorial Hospital and Foundation, the Council on the Graduate School of Business (University of Chicago), and the North Shore Country Day School Foundation. He is also a member of the Civic Committee of the Commercial Club of Chicago and the Economic Club of Chicago.

Robert P. Bremner

Mr. Bremner, the Nuveen Funds Independent Chairman, is a private investor and management consultant in Washington, D.C. His biography of William McChesney Martin, Jr., a former chairman of the Federal Reserve Board, was published by Yale University Press in November 2004. From 1994 to 1997, he was a Senior Vice President at Samuels International Associates, an international consulting firm specializing in governmental policies, where he served in a part-time capacity. Previously, Mr. Bremner was a partner in the LBK Investors Partnership and was chairman and majority stockholder with ITC Investors Inc., both private investment firms. He currently serves on the Board and as Treasurer of the Humanities Council of Washington D.C. and is a Board Member of the Independent Directors Council affiliated with the Investment Company Institute. From 1984 to 1996, Mr. Bremner was an independent Trustee of the Flagship Funds, a group of municipal open-end funds. He began his career at the World Bank in Washington D.C. He graduated with a Bachelor of Science degree from Yale University and received his MBA from Harvard University.

Jack B. Evans

President of the Hall-Perrine Foundation, a private philanthropic corporation, since 1996, Mr. Evans was formerly President and Chief Operating Officer of the SCI Financial Group, Inc., a regional financial services firm headquartered in Cedar Rapids, Iowa. Formerly, he was a member of the Board of the Federal Reserve Bank of Chicago as well as a Director of Alliant Energy. Mr. Evans is Chairman of the Board of United Fire Group, sits on the Board of the Source Media Group, is a member of the Board of Regents for the State of Iowa University System, is a Life Trustee of Coe College and is a member of the Advisory Council of the Department of Finance in the Tippie College of Business, University of Iowa. He has a Bachelor of Arts degree from Coe College and an MBA from the University of Iowa.

William C. Hunter

Mr. Hunter was appointed Dean of the Henry B. Tippie College of Business at the University of Iowa effective July 1, 2006. He had been Dean and Distinguished Professor of Finance at the University of Connecticut School of Business since June 2003. From 1995 to 2003, he was the Senior Vice President and Director of Research at the Federal Reserve Bank of Chicago. While there he served as the Bank's Chief Economist and was an Associate Economist on the Federal Reserve System's Federal Open Market Committee (FOMC). In addition to serving as a Vice President in charge of financial markets and basic research at the Federal Reserve Bank in Atlanta, he held faculty positions at Emory University, Atlanta University, the University of Georgia and Northwestern University. A past Director of the Credit Research Center at Georgetown University, SS&C Technologies, Inc. (2005) and past President of the Financial Management Association International, he has consulted with numerous foreign central banks and official agencies in Western Europe, Central and Eastern Europe, Asia, Central America and South America. From 1990 to 1995, he was a U.S. Treasury Advisor to Central and Eastern Europe. He has been a Director of the Xerox Corporation since 2004 and Wellmark, Inc. since 2009. He is President-Elect of Beta Gamma Sigma, Inc., the International Business Honor Society.

David J. Kundert

Mr. Kundert retired in 2004 as Chairman of JPMorgan Fleming Asset Management, and as President and CEO of Banc One Investment Advisors Corporation, and as President of One Group Mutual Funds. Prior to the merger between Bank One Corporation and JPMorgan Chase and Co., he was Executive Vice President, Bank One Corporation and, since 1995, the Chairman and CEO, Banc One Investment Management Group. From 1988 to 1992, he was President and CEO of Bank One Wisconsin Trust Company. Currently, Mr. Kundert is a Director of the Northwestern Mutual Wealth Management Company. He started his career as an attorney for Northwestern Mutual Life Insurance Company. Mr. Kundert has served on the Board of Governors of the Investment Company Institute and he is currently a member of the Wisconsin Bar Association. He is on the Board of the Greater Milwaukee Foundation and chairs its Investment Committee. He received his Bachelor of Arts degree from Luther College, and his Juris Doctor from Valparaiso University.

William J. Schneider

Mr. Schneider is currently Chairman, formerly Senior Partner and Chief Operating Officer (retired, December 2004) of Miller-Valentine Partners Ltd., a real estate investment company. He is a Director and Past Chair of the Dayton Development Coalition. He was formerly a member of the Community Advisory Board of the National City Bank in Dayton as well as a former member of the Business Advisory Council of the Cleveland Federal Reserve Bank. Mr. Schneider is a member of the Business Advisory Council for the University of Dayton College of Business. Mr. Schneider was an independent Trustee of the Flagship Funds, a group of municipal open-end funds. He also served as Chair of the Miami Valley Hospital and as Chair of the Finance Committee of its parent holding company. Mr. Schneider has a Bachelor of Science in Community Planning from the University of Cincinnati and a Masters of Public Administration from the University of Dayton.

Judith M. Stockdale

Ms. Stockdale is currently Executive Director of the Gaylord and Dorothy Donnelley Foundation, a private foundation working in land conservation and artistic vitality in the Chicago region and the Lowcountry of South Carolina. Her previous positions include Executive Director of the Great Lakes Protection Fund, Executive Director of Openlands, and Senior Staff Associate at the Chicago Community Trust. She has served on the Boards of the Land Trust Alliance, the National Zoological Park, the Governor's Science Advisory Council (Illinois), the Nancy Ryerson Ranney Leadership Grants Program, Friends of Ryerson Woods and the Donors Forum. Ms. Stockdale, a native of the United Kingdom, has a Bachelor of Science degree in geography from the University of Durham (UK) and a Master of Forest Science degree from Yale University.

Carole E. Stone

Ms. Stone retired from the New York State Division of the Budget in 2004, having served as its Director for nearly five years and as Deputy Director from 1995 through 1999. Ms. Stone is currently on the Board of Directors of the Chicago Board Options Exchange, CBOE Holdings, Inc. and C2 Options Exchange, Incorporated and was formerly a Commissioner on the New York State Commission on Public Authority Reform. She has also served as the Chair of the New York Racing Association Oversight Board, as Chair of the Public Authorities Control Board and as a member of the Boards of Directors of several New York State public authorities. Ms. Stone has a Bachelor of Arts from Skidmore College in Business Administration.

Virginia L. Stringer

Ms. Stringer served as the independent chair of the Board of the First American Fund Complex from 1997 to 2010, having joined the Board in 1987. Ms. Stringer serves on the Governing Board of the Investment Company Institute's Independent Directors Council and on the board of the Mutual Fund Directors Forum. She is a recipient of the Outstanding Corporate Director award from Twin Cities Business Monthly and the Minnesota Chapter of the National Association of Corporate Directors. Ms. Stringer is the immediate past board chair of the Oak Leaf Trust, director and the immediate past board chair of the Saint Paul Riverfront Corporation and is immediate past President of the Minneapolis Club's Governing Board. She is a director and former board chair of the Minnesota Opera and a Life Trustee and former board of the Voyageur Outward Bound School. She also served as a trustee of Outward Bound USA. She was appointed by the Governor of Minnesota Board on Judicial Standards and recently served on a Minnesota Supreme Court Judicial Advisory Committee to reform the state's judicial disciplinary process. She is a member of the International Women's Forum and attended the London Business School as an International Business Fellow. Ms. Stringer also served as board chair of the Human Resource Planning Society, the Minnesota Women's Campaign Fund and the Minnesota Women's Economic Roundtable. Ms. Stringer is the retired founder of Strategic Management Resources, a consulting practice focused on corporate governance, strategy and leadership. She has twenty five years of corporate experience having held executive positions in general management, marketing and human resources with IBM and the Pillsbury Company.

Terence J. Toth

Mr. Toth is a Director, Legal & General Investment Management America, Inc. (since 2008) and a Managing Partner, Promus Capital (since 2008). From 2004 to 2007, he was Chief Executive Officer and President of Northern Trust Global Investments, and Executive Vice President of Quantitative Management & Securities Lending from 2000 to 2004. He also formerly served on the Board of the Northern Trust Mutual Funds. He joined Northern Trust in 1994 after serving as Managing Director and Head of Global Securities Lending at Bankers Trust (1986 to 1994) and Head of Government Trading and Cash Collateral Investment at Northern Trust from 1982 to 1986. He currently serves on the Boards of the Goodman Theatre and Chicago Fellowship, and is Chairman of the Board of Catalyst Schools of Chicago. Mr. Toth graduated with a Bachelor of Science degree from the University of Illinois, and received his MBA from New York University. In 2005, he graduated from the CEO Perspectives Program at Northwestern University.

Compensation of Board Members

The following table shows, for each independent trustee, (1) the aggregate compensation paid by the Fund for its fiscal year ended July 31, 2011, (2) the amount of total compensation paid by the Fund that has been deferred and (3) the total compensation paid to each trustee by the Nuveen Funds for the one year period ended December 31, 2011. The Fund does not have a retirement or pension plan. The officers and trustees affiliated with Nuveen Investments serve without any compensation from the Fund. Certain of the Nuveen Funds have a deferred compensation plan (the Plan) that permits any trustee who is not an interested person of certain funds to elect to defer receipt of all or a portion of his or her compensation as a trustee. The deferred compensation of a participating trustee is credited to the book reserve account of a fund when the compensation would otherwise have been paid to the trustee. The value of the trustee's deferral account at any time is equal to the value that the account would have had if contributions to the account had been invested and reinvested in shares of one or more of the eligible Nuveen Funds. At the time for commencing distributions from a trustee's deferral account, the trustee may elect to receive distributions in a lump sum or over a period of five years. The Fund will not be liable for any other fund's obligations to make distributions under the Plan.

Name of Trustee	Aggregate Compensation from The Fund(1)	Amount of Total Compensation That Has Been Deferred(2)	Total Compensation from Fund and Fund Complex(3)
