MANHATTAN ASSOCIATES, INC. AND SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements

September 30, 2012

(Unaudited)

1. Basis of Presentation and Principles of Consolidation

Basis of Presentation

The accompanying unaudited condensed consolidated financial statements of Manhattan Associates, Inc. and its subsidiaries (the Company) have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information, with the instructions to Form 10-Q and with Rule 10-01 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required for complete financial statements. In the opinion of management, these condensed consolidated financial statements contain all normal recurring adjustments considered necessary for a fair presentation of the Company's financial position at September 30, 2012, the results of operations for the three and nine months ended September 30, 2012 and 2011, and cash flows for the nine months ended September 30, 2012 and 2011. The results for the three and nine months ended September 30, 2012 are not necessarily indicative of the results to be expected for the full year. These statements should be read in conjunction with the Company's audited consolidated financial statements and management's discussion and analysis included in the Company's annual report on Form 10-K for the year ended December 31, 2011.

Principles of Consolidation

The accompanying condensed consolidated financial statements include the Company's accounts and the accounts of its wholly-owned subsidiaries. All significant intercompany balances and transactions have been eliminated in consolidation.

2. Revenue Recognition

The Company's revenue consists of fees from the licensing and hosting of software (collectively included in Software license revenue in the Condensed Consolidated Statements of Income), fees from implementation and training services (collectively, professional services) and customer support services and software enhancements (collectively included in Services revenue in the Condensed Consolidated Statements of Income), and sales of hardware and other revenues, which consists of reimbursements of out-of-pocket expenses incurred in connection with its professional services (collectively included in Hardware and other revenue in the Condensed Consolidated Statements of Income). All revenue is recognized net of any related sales taxes.

The Company recognizes license revenue when the following criteria are met: (1) a signed contract is obtained, (2) delivery of the product has occurred, (3) the license fee is fixed or determinable, and (4) collection is probable. Revenue recognition for software with multiple-element arrangements requires recognition of revenue using the residual method when (a) there is vendor-specific objective evidence (VSOE) of the fair values of all undelivered elements in a multiple-element arrangement that is not accounted for using long-term contract accounting, (b) VSOE of fair value does not exist for one or more of the delivered elements in the arrangement, and (c) all other applicable revenue-recognition criteria for software revenue recognition are satisfied. For those contracts that contain significant customization or modifications, license revenue is recognized using contract accounting.

The Company allocates revenue to customer support services and software enhancements and any other undelivered elements of the arrangement based on VSOE of fair value of each element and such amounts are deferred until the applicable delivery criteria and other revenue recognition criteria have been met. The balance of the revenue, net of any discounts inherent in the arrangement, is recognized at the outset of the arrangement using the residual method as the product licenses are delivered. If the Company cannot objectively determine the fair value of each undelivered element based on the VSOE of fair value, the Company defers revenue recognition until all elements are delivered, all services have been performed, or until fair value can be objectively determined. The Company must apply judgment in determining all elements of the arrangement and in determining the VSOE of fair value for each element, considering the price charged for each product on a stand-alone basis or applicable renewal rates. For arrangements that include future software functionality deliverables, the Company accounts for these deliverables as a separate element of the arrangement. Because the Company does not sell these deliverables on a standalone basis, the Company is not able to establish VSOE of fair value of these deliverables. As a result, the Company defers all revenue under the arrangement until the future functionality has been delivered to the customer.

Table of Contents**MANHATTAN ASSOCIATES, INC. AND SUBSIDIARIES****Notes to Condensed Consolidated Financial Statements (Continued)****September 30, 2012****(Unaudited)**

Payment terms for the Company's software licenses vary. Each contract is evaluated individually to determine whether the fees in the contract are fixed and determinable and whether collectibility is probable. Judgment is required in assessing the probability of collection, which is generally based on evaluation of customer-specific information, historical collection experience, and economic market conditions. If market conditions decline, or if the financial conditions of customers deteriorate, the Company may be unable to determine that collectibility is probable, and the Company could be required to defer the recognition of revenue until the Company receives customer payments. The Company has an established history of collecting under the terms of its software license contracts without providing refunds or concessions to its customers. Therefore, the Company has determined that the presence of payment terms that extend beyond contract execution in a particular contract do not preclude the conclusion that the fees in the contract are fixed and determinable. Although infrequent, when payment terms in a contract extend beyond twelve months, the Company has determined that such fees are not fixed and determinable and recognizes revenue as payments become due provided that all other conditions for revenue recognition have been met.

The Company's services revenue consists of fees generated from professional services and customer support and software enhancements related to the Company's software products. Fees from professional services performed by the Company are generally billed on an hourly basis, and revenue is recognized as the services are performed. In certain situations, professional services are rendered under agreements in which billings are limited to contractual maximums or based upon a fixed-fee for portions of or all of the engagement. Revenue related to fixed-fee based contracts is recognized on a proportional performance basis based on the hours incurred on discrete projects within an overall services arrangement. The Company has determined that output measures, or services delivered, approximate the input measures associated with fixed-fee services arrangements. Project losses are provided for in their entirety in the period in which they become known. Revenue related to customer support services and software enhancements is generally paid in advance and recognized ratably over the term of the agreement, typically twelve months.

Hardware and other revenue is generated from the resale of a variety of hardware products, developed and manufactured by third parties, that are integrated with and complementary to the Company's software solutions. As part of a complete solution, the Company's customers periodically purchase hardware from the Company for use with the software licenses purchased from the Company. These products include computer hardware, radio frequency terminal networks, radio frequency identification (RFID) chip readers, bar code printers and scanners, and other peripherals. Hardware revenue is recognized upon shipment to the customer when title passes. The Company generally purchases hardware from the Company's vendors only after receiving an order from a customer. As a result, the Company generally does not maintain hardware inventory.

In accordance with the other presentation matters within the Revenue Recognition Topic of the Financial Accounting Standards Board's (FASB) Accounting Standards Codification, the Company recognizes amounts associated with reimbursements from customers for out-of-pocket expenses as revenue. Such amounts have been included in Hardware and other revenue in the Condensed Consolidated Statements of Income. The total amount of expense reimbursement recorded to revenue was \$3.6 million and \$2.9 million for the three months ended September 30, 2012 and 2011, respectively, and \$9.2 million and \$8.0 million for the nine months ended September 30, 2012 and 2011, respectively.

3. Fair Value Measurement

The Company measures its investments based on a fair value hierarchy disclosure framework that prioritizes and ranks the level of market price observability used in measuring assets and liabilities at fair value. Market price observability is affected by a number of factors, including the type of asset or liability and their characteristics. This hierarchy prioritizes the inputs into three broad levels as follows:

Level 1 Quoted prices in active markets for identical instruments.

Edgar Filing: MANHATTAN ASSOCIATES INC - Form 10-Q

Level 2 Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets.

Level 3 Valuations derived from valuation techniques in which one or more significant inputs or significant value drivers are unobservable.

Table of Contents**MANHATTAN ASSOCIATES, INC. AND SUBSIDIARIES****Notes to Condensed Consolidated Financial Statements (Continued)****September 30, 2012****(Unaudited)**

The Company's investments are categorized as available-for-sale securities and recorded at fair market value. Investments with maturities of less than 90 days from the date of purchase are classified as cash equivalents; investments with maturities of greater than 90 days from the date of purchase but less than one year are generally classified as short-term investments; and investments with maturities of greater than one year from the date of purchase are generally classified as long-term investments. Unrealized holding gains and losses are reflected as a net amount in a separate component of shareholders' equity until realized. For the purposes of computing realized gains and losses, cost is determined on a specific identification basis.

Prior to 2008, the Company invested in auction rate securities of which certain auctions failed during 2008 and the underlying securities were not redeemed by the issuer. During 2008, the Company recorded an other-than-temporary impairment charge of \$3.5 million for one of its investments. The Company reduced the carrying value of the investment to zero due to credit downgrades of the underlying issuer and the bond insurer as well as increasing publicly reported exposure to bankruptcy risk by the issuer. During the quarter ended September 30, 2011, the Company was able to sell the auction rate security and recovered 72%, or \$2.5 million, of its original investment. The \$2.5 million recovery from the sale of the auction rate security is included in the recovery of previously impaired investment line in the Condensed Consolidated Statements of Income. During the second quarter of 2012, the Company sold its remaining auction rate security investment at its par value of \$1.0 million. The Company currently has no long-term investments.

At September 30, 2012, the Company's cash, cash equivalents, and short-term investments balances were \$62.4 million, \$36.7 million, and \$7.7 million, respectively. Cash equivalents and short-term investments primarily consist of highly liquid money market funds and certificates of deposit. The Company uses quoted prices from active markets that are classified at Level 1 as a highest level observable input in the disclosure hierarchy framework for all available-for-sale securities. At September 30, 2012, the Company has \$33.2 million in money market funds, which are classified as Level 1 and are included in cash and cash equivalents on the Condensed Consolidated Balance Sheet. The Company has no investments classified as Level 2 or Level 3.

4. Equity-Based Compensation

In January 2012, in order to simplify equity grant administration, the Company changed its practice of granting restricted stock in favor of granting restricted stock *units*, or RSUs, which convert to the Company's common stock upon vesting. There is no material difference between the grant of restricted stock and the grant of RSUs to either the Company or the recipients receiving the grants; however, in contrast to the granting of restricted stock, no stock will actually be issued under the granting of RSUs until the units vest. The Company does not currently grant stock options.

The Company recorded equity-based compensation related to stock options granted in prior years of \$0.1 million and \$0.5 million during the three months ended September 30, 2012 and 2011, respectively, and \$0.4 million and \$1.5 million during the nine months ended September 30, 2012 and 2011, respectively. No stock options were granted during the first nine months of 2012 or 2011.

A summary of changes in outstanding options for the nine months ended September 30, 2012 is as follows:

	Number of Options
Outstanding at December 31, 2011	1,633,566
Exercised	(1,005,508)
Forfeited and expired	(8,409)
Outstanding at September 30, 2012	619,649

Edgar Filing: MANHATTAN ASSOCIATES INC - Form 10-Q

The Company granted 10,830 and 226,905 RSUs during the three and nine months ended September 30, 2012, respectively, and 19,840 and 356,232 shares of restricted stock during the three and nine months ended September 30, 2011, respectively. The Company recorded equity-based compensation expense related to restricted stock and RSUs of \$2.0 million for each of the quarters ended September 30, 2012 and 2011, and \$5.4 million and \$5.8 million during the nine months ended September 30, 2012 and 2011, respectively.

Table of Contents**MANHATTAN ASSOCIATES, INC. AND SUBSIDIARIES****Notes to Condensed Consolidated Financial Statements (Continued)****September 30, 2012****(Unaudited)**

A summary of changes in unvested shares/units for the nine months ended September 30, 2012 is as follows:

	Number of shares/units
Outstanding at December 31, 2011	655,155
Granted	226,905
Vested	(240,852)
Forfeited	(29,592)
Outstanding at September 30, 2012	611,616

5. Income Taxes

The Company's effective tax rate was 35.6% and 26.6% for the quarters ended September 30, 2012 and 2011, respectively, and 35.8% and 25.9% for the nine months ended September 30, 2012 and 2011, respectively. The increase in the effective tax rate for the quarter and year to date ended September 30, 2012 compared to the same periods in the prior year is principally due to the expiration of the federal research and development tax credit and foreign net operating loss carry-forwards benefitted in prior periods that have now been fully utilized. Additionally, the effective rate for the three and nine months ended September 30, 2011 was impacted by the \$2.5 million recovery of a previously impaired investment discussed in Note 3. The Company did not record a tax benefit in 2008 on the original impairment charge as there were no future capital gains to offset the loss, and therefore did not have tax expense related to the reversal of the charge. The effective tax rate for the three and nine months ended September 30, 2011 also included a tax benefit from the disqualifying disposition of incentive stock options that were previously expensed and the reduction of income tax reserves that resulted from the expiration of tax audit statutes and the settlement of an IRS audit. In addition to the tax adjustments in the three months ended September 30, 2011, the effective tax rate in the nine months ended September 30, 2011 included a \$2.0 million tax benefit recorded in the first quarter ending March 31, 2011, resulting from the reduction of a valuation allowance associated with tax credit carryforwards and deferred tax assets in India. The benefit was attributable to the elimination of the tax holiday for Indian companies under the Software Technology Park of India (STPI) tax plan, based on the February 2011 budget approved by the India Finance Ministry, which will allow the Company to utilize tax assets previously reserved.

The Company applies the provisions for income taxes related to, among other things, accounting for uncertain tax positions and disclosure requirements in accordance with the Income Taxes Topic of the FASB Accounting Standards Codification. For the three months ended September 30, 2012, there were no material changes to unrecognized tax benefits or accrued interest and penalties related to uncertain tax positions. There has been no change to the Company's policy that recognizes potential interest and penalties related to uncertain tax positions within its global operations in income tax expense.

The Company conducts business globally and, as a result, files income tax returns in the U.S. federal jurisdiction and in many state and foreign jurisdictions. The Company is no longer subject to income tax examinations for the years before 2009 in the U.S. federal, substantially all state and local, and substantially all non-US jurisdictions.

6. Net Earnings Per Share

Basic net earnings per share is computed using net income divided by the weighted average number of shares of common stock outstanding (Weighted Shares) for each period presented. Diluted net earnings per share is computed using net income divided by the sum of Weighted Shares and common equivalent shares (CESs) outstanding for each period presented using the treasury stock method.

Edgar Filing: MANHATTAN ASSOCIATES INC - Form 10-Q

The following is a reconciliation of the net income and share amounts used in the computation of basic and diluted net earnings per common share for the three and nine months ended September 30, 2012 and 2011 (in thousands, except per share data):

Effect of CESs	562	969	627	1,033
Diluted	20,130	21,125	20,372	21,656

Weighted average shares issuable upon the exercise of stock options that were not included in the calculation of diluted earnings per share were 2,000 shares and 17,000 shares for the three and nine months ended September 30, 2011, respectively. Such shares were not included because they were anti-dilutive. There were no anti-dilutive CESs during 2012.

7. Contingencies

From time to time, the Company may be involved in litigation relating to claims arising out of its ordinary course of business, and occasionally legal proceedings not in the ordinary course. Many of the Company's installations involve products that are critical to the operations of its clients' businesses. Any failure in a product could result in a claim for substantial damages against the Company, regardless of its responsibility for such failure. Although the Company attempts to limit contractually its liability for damages arising from product failures or negligent acts or omissions, there can be no assurance that the limitations of liability set forth in the Company's contracts will be enforceable in all instances. The Company is not presently involved in any material litigation. The Company expenses legal costs associated with loss contingencies as such claims are incurred.

8. Operating Segments

The Company operates its business in three geographical segments: the Americas (North America and Latin America); Europe, Middle East, and Africa (EMEA); and Asia Pacific (APAC). The information for the periods presented below reflects these segments. All segments derive revenue from the sale and implementation of the Company's supply chain execution and planning solutions. The individual products sold by the segments are similar in nature and are all designed to help companies manage the effectiveness and efficiency of their supply chain. The Company uses the same accounting policies for each operating segment. The Chief Executive Officer and Chief Financial Officer evaluate performance based on revenue and operating results for each region.

The Americas segment charges royalty fees to the EMEA and APAC segments based on software licenses sold by those operating segments. The royalties, which totaled approximately \$0.4 million and \$0.5 million for the three months ended September 30, 2012 and 2011, respectively, and \$2.3 million and \$1.7 million for the nine months ended September 30, 2012 and 2011, respectively, are included in cost of revenue in EMEA and APAC with a corresponding reduction in the Americas cost of revenue. The revenues represented below are from external customers only. The geographical-based costs consist of costs of personnel, direct sales and marketing expenses, and general and administrative costs to support the business. There are certain corporate expenses included in the Americas region that are not charged to the other segments, including research and development, certain marketing and general and administrative costs that support the global organization, and the amortization of acquired developed technology. Included in the Americas costs are all research and development costs including the costs associated with the Company's India operations.

9. New Accounting Pronouncements

In September 2011, the FASB issued an Accounting Standards Update on testing goodwill for impairment to simplify the goodwill impairment test. The standard update is intended to reduce cost and complexity of the annual goodwill impairment test by permitting companies to first assess qualitative factors to determine whether further impairment testing is necessary. Under this standard update, a company is not required to calculate the fair value of a reporting unit unless the company determines that it is more likely than not that its fair value is less than its carrying amount. The more likely than not threshold is defined as having a likelihood of more than 50 percent. This guidance is effective for interim and annual goodwill impairment tests performed for the fiscal years beginning after December 15, 2011. The Company does not expect the adoption of this guidance to have a material impact on its financial statements.

In May 2011, the FASB issued an Accounting Standards Update on fair value measurements that clarifies the application of existing guidance and disclosure requirements, changes certain fair value measurement principles and requires additional disclosures about fair value measurements. This guidance is effective for interim and annual periods beginning after December 15, 2011. The Company adopted the enhanced disclosures for Level 3 in its first quarter of 2012 reporting, which did not have a material impact on its financial statements.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.**Forward-Looking Statements**

Certain statements contained in this filing are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, including but not limited to statements related to plans for future business development activities, anticipated costs of revenues, product mix and service revenues, research and development and selling, general and administrative activities, and liquidity and capital needs and resources. When used in this report, the words expect, anticipate, intend, plan, believe, seek, estimate, and similar expressions are generally intended to identify forward-looking statements. Undue reliance should not be placed on these forward-looking statements, which reflect our

Edgar Filing: MANHATTAN ASSOCIATES INC - Form 10-Q

opinions only as of the date of this quarterly report. Such forward-looking statements are subject to risks, uncertainties, and other factors that could cause actual results to differ materially from future results expressed or implied by such forward-looking statements. For further information about these and other factors that could affect our future results, please see **Risk Factors** in Item 1A of our annual report on Form 10-K for the year ended December 31, 2011. Investors are cautioned that forward-looking statements are not guarantees of future performance and involve risks and uncertainties, and that actual results may differ materially from those contemplated by such forward-looking statements. The following discussion should be read in conjunction with the condensed consolidated financial statements for the three and nine months ended September 30, 2012 and 2011, including the notes to those statements, included elsewhere in this quarterly report (the **Condensed Consolidated Financial Statements**). We also recommend the following discussion be read in conjunction with management's discussion and analysis and consolidated financial statements included in our annual report on Form 10-K for the year ended December 31, 2011. References in this filing to the **Company**, **Manhattan**, **Manhattan Associates**, **we**, **our**, and **us** refer to Manhattan Associates, Inc., our predecessors, and our wholly-owned and consolidated subsidiaries.

Table of Contents

Business Overview

We are a leading developer and implementer of supply chain software solutions that help organizations optimize their supply chain operations from planning through execution. Our platform-based supply chain software solution portfolios – Manhattan SCOPE and Manhattan SCALE™ – are designed to deliver both business agility and total cost of ownership advantages to customers. Manhattan SCOPE (Supply Chain Optimization, Planning through Execution) leverages our Supply Chain Process Platform (SCPP) to unify the full breadth of the supply chain, while Manhattan SCALE (Supply Chain Architected for Logistics Execution) leverages Microsoft's .NET platform to unify logistics functions.

Early in the Company's history, our offerings were heavily focused on warehouse management solutions. As the Company grew in size and scope, our offerings expanded across the entire supply chain, while still maintaining a significant presence in, and a relatively strong concentration of revenues from warehouse management solutions, which is a component of our distribution management solution suite. Over time, as our non-warehouse management solutions have proliferated and increased in capability, the Company's revenue concentration in its warehouse management solutions has correspondingly decreased.

Our business model is singularly focused on the development and implementation of complex supply chain software solutions that are designed to optimize supply chain effectiveness and efficiency for our customers. We have three principal sources of revenue:

licenses of our supply chain software;

professional services, including solutions planning and implementation, related consulting, customer training, and customer support services and software enhancements (collectively, "services"); and

hardware sales and other revenue.

In the three and nine months ended September 30, 2012, we generated \$95.8 million and \$280.9 million in total revenue, respectively, with a revenue mix of: license revenue 17%; services revenue 75%; and hardware and other revenue 8% for both the three months and the nine months ended September 30, 2012.

We manage our business based on three geographic regions: North America and Latin America (Americas); Europe, Middle East, and Africa (EMEA); and Asia Pacific (APAC). Geographic revenue is based on the location of the sale. Our international revenue was approximately \$23.9 million and \$73.4 million for the three and nine months ended September 30, 2012, respectively, which represents approximately 25% of our total revenue for both periods. International revenue includes all revenue derived from sales to customers outside the United States. At September 30, 2012, we employed approximately 2,360 employees worldwide, of which 1,130 employees are based in the Americas, 165 employees in EMEA, and 1,065 employees in APAC (including India). We have offices in Australia, China, France, India, Japan, the Netherlands, Singapore, and the United Kingdom, as well as representatives in Mexico and reseller partnerships in Latin America, Eastern Europe, the Middle East, South Africa, and Asia.

Global Economic Trends and Industry Factors

Global macroeconomic trends, technology spending, and supply chain management market growth are important barometers for our business. In the first nine months of 2012, approximately 75% of our total revenue was generated in the United States, 11% in EMEA, and the balance in APAC, Canada, and Latin America. In addition, Gartner Inc., an information technology research and advisory company, estimates that nearly 80% of every supply chain software solutions dollar invested is spent in the United States (50%) and Western Europe (28%); consequently, the health of the U.S. and Western European economies has a meaningful impact on our financial results.

Table of Contents

We sell technology-based solutions with total pricing, including software and services, in many cases exceeding \$1.0 million. Our software often is a part of our customers' and prospects' much larger capital commitment associated with facilities expansion and business improvement. We believe that, given the lingering uncertainty in the global macro environment, the current sales cycles for large license deals of \$1.0 million or greater in our target markets have been extended. The current business climate within the United States and geographic regions in which we operate continues to affect customers' and prospects' decisions regarding timing of strategic capital expenditures. Delays with respect to such decisions can have a material adverse impact on our business, and may further intensify competition in our already highly competitive markets.

In October 2012, the International Monetary Fund (IMF) provided a World Economic Outlook (WEO), which noted that the global economy has weakened further since the July 2012 WEO Update thus lowering the projected global growth rate to about 3.3 percent in 2012 and 3.6 percent in 2013. The WEO stated that output is expected to remain sluggish in advanced economies but still relatively solid in many emerging market and developing economies. The WEO further stated that it expects unemployment to stay elevated and financial conditions to remain unstable in many parts of the world. The WEO projected that advanced economies, which represent our primary revenue markets, would grow at about 1.3 percent in 2012 and 1.5 percent in 2013, while the emerging and developing economies would continue to grow at about 5.3 percent in 2012 and 5.6 percent in 2013.

During 2011 and continuing into 2012, the overall trend has been steady for the Company's large license deals, with recognized \$1.0 million or larger software license totaling thirteen for 2011, up from nine in 2010, and totaling nine in the first nine months of 2012. However, the large deal flow has been inconsistent from quarter to quarter, reflecting what we believe to be ongoing macroeconomic uncertainty in the United States and Western Europe. While we are encouraged by our 2011 and first nine months of 2012 results, we, along with many of our customers, still remain cautious regarding the pace of global economic recovery. With global GDP growth continuing to be well below pre-2008 levels, we believe global economic volatility likely will continue to shape customers' and prospects' buying decisions, making it more difficult to forecast sales cycles for our products and the timing of large software license deals.

Revenue

License revenue. License revenue, a leading indicator of our business, is primarily derived from software license fees that customers pay for supply chain solutions. License revenue totaled \$16.2 million, or 17% of total revenue, with gross margins of 87.1% for the three months ended September 30, 2012, and \$47.1 million, or 17% of total revenue, with gross margins of 88.6% for the nine months ended September 30, 2012. Our typical license revenue percentage mix of new to existing customers historically has approximated 50/50. However, for the three months ended September 30, 2012, the majority of license revenue was generated from existing customers, largely influenced by two large deals, and for the nine months ended September 30, 2012, the percentage mix of new to existing customers was approximately 30/70, respectively. We believe our current mix of new customer to existing customer license sales will fluctuate with continuing global macroeconomic uncertainty; however, the mix should return to historically normal levels in improved global economic conditions.

License revenue growth is influenced by the strength of general economic and business conditions and the competitive position of our software products. Our license revenue generally has long sales cycles and the timing of the closing of a few large license transactions can have a material impact on our quarterly license revenues, operating profit, operating margins, and earnings per share. For example, \$1.0 million of license revenue in the third quarter of 2012 equates to approximately \$0.03 of diluted earnings per share impact.

Our software solutions are singularly focused on the supply chain planning and execution markets, which are intensely competitive and characterized by rapid technological change. We are a market leader in the supply chain management software solutions market as defined by industry analysts such as ARC Advisory Group and Gartner. Our goal is to extend our position as a leading global supply chain solutions provider by growing our license revenues faster than our competitors through investment in innovation. We expect to continue to face increased competition from Enterprise Resource Planning (ERP) and Supply Chain Management applications vendors and business application software vendors that may broaden their solution offerings by internally developing, or by acquiring or partnering with independent developers of supply chain planning and execution software. Increased competition could result in price reductions, fewer customer orders, reduced gross margins, and loss of market share.

Services revenue. Our services business consists of professional services (consulting and customer training) and customer support services and software enhancements (CSSE). Services revenue totaled \$71.9 million, or 75% of total revenue, with gross margins of 54.6% for the three months ended September 30, 2012, and \$211.6 million, or 75% of total revenue, with gross margins of 55.3%, for the nine months ended September 30, 2012. Professional services accounted for approximately 65% of total services revenue and approximately 50% of total revenue in the three and nine months ended September 30, 2012. Our operating margin profile may be lower than those of various other technology companies due to our large services revenue mix as a percentage of total revenue. While we believe our services margins are very strong, they do lower our overall operating margin profile as services margins are inherently lower than license revenue margins.

Table of Contents

At September 30, 2012, our services organization totaled approximately 1,395 employees, accounting for 60% of our total employees worldwide. Our professional services organization provides our customers with expertise and assistance in planning and implementing our solutions. To ensure a successful product implementation, consultants assist customers with the initial installation of a system, the conversion and transfer of the customer's historical data onto our system, and ongoing training, education, and system upgrades. We believe our professional services enable customers to implement our software more rapidly than if they rely on internal or other third party services, enable the customer to maximize value from our solution, strengthen our customer relationships, and add to our industry-specific knowledge base for use in future implementations and product innovations.

Although our professional services are optional, the majority of our customers use at least some portion of these services for their planning, implementation, or related needs. Professional services are typically rendered under time and materials-based contracts with services typically billed on an hourly basis. Professional services are sometimes rendered under fixed-fee based contracts with payments due on specific dates or milestones.

Typically, our professional services lag license revenue by several quarters, as implementation services and related consulting are performed after the purchase of the software. Services revenue growth is contingent upon license revenue growth and customer upgrade cycles, which is influenced by the strength of general economic and business conditions and the competitive position of our software products. In addition, our business has competitive exposure to offshore providers and other consulting companies. All of these factors potentially create the risk of pricing pressure, fewer customer orders, reduced gross margins, and loss of market share.

For CSSE, we offer a comprehensive 24 hour per day, 365 days per year program that provides our customers with software upgrades, when and if available, which include additional or improved functionality and technological advances incorporating emerging supply chain and industry initiatives.

Our CSSE revenues totaled \$24.8 million and \$72.4 million for the three and nine months ended September 30, 2012, respectively, representing approximately 35% of services revenue and approximately 25% of total revenue in the three and nine months ended September 30, 2012. The growth of CSSE revenues is influenced by: (i) new license revenue growth, (ii) annual renewal of support contracts, and (iii) fluctuations in currency rates. Substantially all of our customers renew their annual support contracts. Over the last three years, our annual revenue renewal rate of customers subscribing to comprehensive support and enhancements has been greater than 90%. CSSE fees generally are paid in advance, and our CSSE revenue generally is recognized ratably over the term of the agreement, typically twelve months. CSSE renewal revenue is not recognized unless payment is received from the customer.

Hardware and other revenue. Our hardware and other revenue totaled \$7.8 million, representing 8% of total revenue with gross margins of 17.5% for the three months ended September 30, 2012 and \$22.2 million, representing 8% of total revenue with gross margins of 17.1% for the nine months ended September 30, 2012. In conjunction with the licensing of our software, and as a convenience for our customers, we resell a variety of hardware products developed and manufactured by third parties. These products include computer hardware, radio frequency terminal networks, RFID chip readers, bar code printers and scanners, and other peripherals. We resell all third-party hardware products pursuant to agreements with manufacturers or through distributor-authorized reseller agreements pursuant to which we are entitled to purchase hardware products at discount prices and to receive technical support in connection with product installations and any subsequent product malfunctions. We generally purchase hardware from our vendors only after receiving an order from a customer. As a result, we generally do not maintain hardware inventory.

Other revenue represents amounts associated with reimbursements from customers for out-of-pocket expenses. The total amount of expense reimbursement recorded to hardware and other revenue was \$3.6 million and \$9.2 million for the three and nine months ended September 30, 2012, respectively.

Product Development

We continue to invest significantly in research and development (R&D), which historically has averaged about \$0.12 to \$0.14 of every revenue dollar, to provide leading solutions that help global manufacturers, wholesalers, distributors, retailers, and logistics providers successfully manage accelerating and fluctuating demands as well as the increasing complexity and volatility of their local and global supply chains. Our research and development expenses were \$11.4 million and \$33.8 million for the three and nine months ended September 30, 2012, respectively. At September 30, 2012, our R&D organization totaled approximately 645 employees, located in the U.S. and India, representing nearly 30% of our total employees worldwide.

Table of Contents

We expect to continue to focus our R&D resources on the development and enhancement of supply chain software solutions. We offer what we believe to be the broadest solution portfolio in the supply chain solutions marketplace, to address all aspects of planning and forecasting, inventory optimization, order lifecycle management, transportation lifecycle management, and distribution management. We also plan to continue to enhance our existing solutions and to introduce new solutions to address evolving industry standards and market needs. We identify opportunities to further enhance our solutions and to develop and provide new solutions through our customer support organization, as well as through ongoing customer consulting engagements and implementations, interactions with our user groups, association with leading industry analysts and market research firms, and participation on industry standards and research committees. Our solutions address the needs of customers in various vertical markets, including retail, consumer goods, food and grocery, logistics service providers, industrial and wholesale, high technology and electronics, life sciences, and government.

Cash Flow and Financial Condition

For the three and nine months ended September 30, 2012, we generated cash flow from operating activities of \$17.5 million and \$51.4 million, respectively. Our cash, cash equivalents, and investments at September 30, 2012 totaled \$106.8 million, with no debt on our balance sheet. We currently have no credit facilities. During the past three years, our primary uses of cash have been funding investment in R&D and operations to drive earnings growth and repurchases of our common stock.

We repurchased 418,932 and 1,418,205 shares of Manhattan Associates' outstanding common stock under our repurchase program during the three and nine months ended September 30, 2012, respectively. In October 2012, our Board of Directors approved raising the Company's remaining share repurchase authority to \$50.0 million of Manhattan Associates' outstanding common stock.

For the remainder of 2012, we anticipate that our priorities for the use of cash will be in developing sales and services resources and continued investment in product development to drive and support profitable growth and extend our market leadership. We will continue to evaluate acquisition opportunities that are complementary to our product footprint and technology direction. We will also continue to weigh our share repurchase options against cash for acquisitions and investing in the business. We do not anticipate any borrowing requirements in the remainder of 2012 or in 2013 for general corporate purposes.

Results of Operations

The following table summarizes our consolidated results for the three and nine months ended September 30, 2012 and 2011.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2012	2011	2012	2011
	(in thousands, except per share data)			
Revenue	\$ 95,841	\$ 85,602	\$ 280,889	\$ 245,714

Table of Contents

We manage our business based on three geographic regions: the Americas, EMEA, and APAC. Geographic revenue information is based on the location of sale. The revenues represented below are from external customers only. The geographical-based expenses include costs of personnel, direct sales and marketing expenses, and general and administrative costs to support the business. There are certain corporate expenses included in the Americas region that are not charged to the other segments, including research and development, certain marketing and general and administrative costs that support the global organization, and the amortization of acquired developed technology. Included in the Americas costs are all research and development costs, including the costs associated with the Company's India operations. During the three and nine months ended September 30, 2012 and 2011, we derived the majority of our revenues from sales to customers within our Americas region. The following table summarizes revenue and operating profit by region:

	Three Months Ended September 30,			Nine Months Ended September 30,

Summary of the Third Quarter 2012 Condensed Consolidated Financial Results

Diluted earnings per share was \$0.69 in the third quarter of 2012, compared to \$0.70 in the third quarter of 2011. Third quarter results for 2011 include a \$0.12 per share benefit for the recovery of a previously impaired auction rate security investment.

Consolidated total revenue was \$95.8 million in the third quarter of 2012, compared to \$85.6 million in the third quarter of 2011. License revenue was \$16.2 million in the third quarter of 2012, compared to \$13.6 million in the third quarter of 2011.

Table of Contents

Operating income was \$21.7 million in the third quarter of 2012, compared to \$19.4 million in the third quarter of 2011. Results for the third quarter of 2011 include a \$2.5 million recovery of a previously impaired auction rate security investment.

Cash flow from operations was \$17.5 million in the third quarter of 2012, compared to \$16.9 million in the third quarter of 2011.

Days Sales Outstanding was 70 days at September 30, 2012, compared to 63 days at June 30, 2012.

Cash and investments on-hand was \$106.8 million at September 30, 2012, compared to \$99.1 million at December 31, 2011.

For the three months ended September 30, 2012, we repurchased 418,932 shares of our common stock under our share repurchase program for a total investment of \$21.2 million. In October 2012, the Board of Directors approved raising our remaining share repurchase authority to an aggregate of \$50.0 million of our outstanding common stock.

The results of our operations for the third quarters of 2012 and 2011 are discussed below.

Revenue

	Three Months Ended September 30,				
	2012	2011	% Change vs. Prior Year	% of Total Revenue	
	(in thousands)				
Software license	\$ 16,164	\$ 13,565	19%	17%	16%
Services	71,886	63,594	13%	75%	74%
Hardware and other	7,791	8,443	-8%	8%	10%
Total revenue	\$ 95,841	\$ 85,602	12%	100%	100%

Our revenue consists of fees generated from the licensing and hosting of software; fees from professional services, customer support services, and software enhancements; hardware sales of complementary radio frequency and computer equipment; and other revenue representing amounts associated with reimbursements from customers for out-of-pocket expenses.

License revenue. License revenue increased \$2.6 million, or 19%, in the quarter ended September 30, 2012 compared to the same period in the prior year. We completed two large software license deals greater than \$1.0 million in the third quarter of 2012. The license sales percentage mix across our product suite in the quarter ended September 30, 2012 was approximately 70/30 of warehouse management solutions to non-warehouse management solutions.

Services revenue. Services revenue increased \$8.3 million, or 13%, in the third quarter of 2012 compared to the same quarter in the prior year due to a \$5.7 million increase in professional services revenue and a \$2.6 million increase in customer support and software enhancements. The increase in services revenue was primarily due to customer-specific initiatives in conjunction with customer upgrade activity and large license deals signed. Services revenue for the Americas, EMEA, and APAC segments increased \$6.5 million, \$1.5 million, and \$0.3 million, respectively, in the third quarter of 2012 compared to the third quarter of 2011.

Hardware and other. Hardware sales decreased by \$1.4 million to \$4.2 million in the third quarter of 2012 compared to \$5.6 million for the third quarter of 2011. Sales of hardware are largely dependent upon customer-specific desires, which fluctuate from quarter to quarter. Other revenue represents reimbursements for professional service travel expenses that are required to be classified as revenue and are included in hardware and other revenue. Reimbursements by customers for out-of-pocket expenses were approximately \$3.6 million and \$2.9 million for the quarters ended September 30, 2012 and 2011, respectively.

Table of Contents**Cost of Revenue**

	Three Months Ended September 30,		% Change vs. Prior Year
	2012	2011	
	(in thousands)		
Cost of software license	\$ 2,086	\$ 1,196	74%
Cost of services	32,614	28,054	16%
Cost of hardware and other	6,428	6,695	-4%
Total cost of revenue	\$ 41,128	\$ 35,945	14%

Cost of license. Cost of license consists of the costs associated with software reproduction; hosting services; media, packaging and delivery, documentation and other related costs; and royalties on third-party software sold with or as part of our products. Cost of license increased by \$0.9 million in the third quarter of 2012 compared to the same quarter of 2011 principally due to increased sales of third-party software.

Cost of services. Cost of services consists primarily of salaries and other personnel-related expenses of employees dedicated to professional and technical services and customer support services. The \$4.6 million, or 16%, increase in cost of services in the quarter ended September 30, 2012 compared to the same quarter in the prior year was principally due to an increase of \$3.5 million in compensation and other personnel-related expenses resulting from increased headcount in our services organization and an increase of \$0.5 million in performance-based bonus expenses.

Cost of hardware and other. Cost of hardware decreased by \$1.0 million to \$2.9 million in the third quarter of 2012 compared to \$3.9 million in the same quarter of 2011. Cost of hardware and other includes professional services billed travel expenses reimbursed by customers of approximately \$3.5 million and \$2.8 million for the quarters ended September 30, 2012 and 2011, respectively.

Operating Expenses

	Three Months Ended September 30,		% Change vs. Prior Year
	2012	2011	
	(in thousands)		
Research and development	\$ 11,400	\$ 10,877	5%
Sales and marketing	10,999	10,865	1%
General and administrative	9,258	9,342	-1%
Depreciation and amortization	1,379	1,698	-19%
Recovery of previously impaired investment		(2,519)	-100%
Operating expenses	\$ 33,036	\$ 30,263	9%

Research and development. Research and development expenses primarily consist of salaries and other personnel-related costs for personnel involved in our research and development activities. Research and development expenses for the quarter ended September 30, 2012 increased by \$0.5 million as compared to the quarter ended September 30, 2011 principally due to an increase of \$0.2 million in compensation and other personnel-related expenses and an increase of \$0.3 million in performance-based bonus expenses.

Our principal research and development activities have focused on the expansion and integration of products acquired and new product releases and the expansion of the product footprint of our supply chain optimization solutions called Supply Chain Optimization from Planning through Execution (SCOPE). The Manhattan SCOPE Platform provides not only a sophisticated service-oriented architecture-based application framework, but a platform that facilitates integration with ERP and other supply chain solutions. For each of the quarters ended September 30, 2012 and 2011, we did not capitalize any research and development costs.

Table of Contents

Sales and marketing. Sales and marketing expenses include salaries, commissions, travel and other personnel-related costs, and the costs of our marketing and alliance programs and related activities. Sales and marketing expenses slightly increased by \$0.1 million in the third quarter of 2012 compared to the same quarter of the prior year.

General and administrative. General and administrative expenses consist primarily of salaries and other personnel-related costs of executive, financial, human resources, information technology, and administrative personnel, as well as facilities, legal, insurance, accounting, and other administrative expenses. General and administrative expenses were flat in the current year quarter compared to the same quarter in the prior year.

Depreciation and amortization. Depreciation expense was \$1.4 million for each of the quarters ended September 30, 2012 and 2011. Amortization of intangibles associated with various acquisitions in prior years totaled \$0.3 million for the quarter ended September 30, 2011.

Recovery of previously impaired investment. In the quarter ended September 30, 2008, we recorded an impairment charge of \$3.5 million on an investment in an auction rate security. We reduced the carrying value of the investment to zero due to credit downgrades of the underlying issuer and the bond insurer as well as increasing publicly reported exposure to bankruptcy risk by the issuer. In the quarter ended September 30, 2011, we were able to sell the auction rate security recovering 72%, or \$2.5 million, of our original investment.

Operating Income

Operating income for the third quarter of 2012 was \$21.7 million compared to \$19.4 million for the third quarter of 2011. Operating margins were 22.6% for the third quarter of 2012 versus 22.7% for the same quarter in the prior year. Operating income and margin for the quarter ended September 30, 2011 included a \$2.5 million recovery of a previously impaired auction rate security investment. Excluding the recovery of the previously impaired investment, operating income and margins increased primarily due to strong revenue growth and expense management in the current quarter in addition to favorable foreign currency translation effects of \$0.9 million for the three months ended September 30, 2012, primarily due to the weakening of the Indian Rupee versus the U.S. dollar during the three months ended September 30, 2012 compared to the same period in the prior year.

Other Income, Net and Taxes

	Three Months Ended September 30,		
	2012	2011	% Change vs. Prior Year
	(in thousands)		
Other (expense) income, net	\$ (247)	\$ 862	-129%
Income tax provision	7,621	5,379	42%

Other (expense) income, net. Other (expense) income, net principally includes interest income, foreign currency gains and losses, and other non-operating expenses. Other (expense) income, net decreased \$1.1 million in the third quarter of 2012 compared to the third quarter of 2011 primarily due to a \$1.1 million decrease in foreign currency gains related to the fluctuation of the U.S. dollar relative to foreign currencies, principally the Indian Rupee. We recorded a net foreign currency loss of approximately \$0.6 million and a net foreign currency gain of \$0.6 million during the quarters ended September 30, 2012 and 2011, respectively.

Income tax provision. Our effective income tax rate was 35.6% and 26.6% for the quarters ended September 30, 2012 and 2011, respectively. The increase in the effective tax rate for the quarter ended September 30, 2012 compared to the same quarter in the prior year is principally due to the expiration of the federal research and development tax credit and foreign net operating loss carry-forwards benefitted in prior periods that have now been fully utilized. Further, the effective rate for the three months ended September 30, 2011 was impacted by the \$2.5 million recovery of the previously impaired investment discussed above. We did not record a tax benefit in 2008 on the original impairment charge as there were no future capital gains to offset the loss, and therefore did not have tax expense related to the reversal of the charge. In addition, the effective tax rate in the third quarter of 2011 included a tax benefit from disqualifying dispositions of incentive stock options that were previously expensed and a reduction of U.S. federal and state income tax reserves that resulted from the expiration of tax audit statutes for tax returns filed for 2007 and prior and the settlement of an IRS audit.

Table of Contents**Summary of the First Nine Months of 2012 Condensed Consolidated Financial Results**

Diluted earnings per share for the nine months ended September 30, 2012 was \$1.93, compared to \$1.59 for the nine months ended September 30, 2011. Results for the nine months ended September 30, 2011 included a \$0.12 per share benefit for the recovery of a previously impaired auction rate security investment.

Consolidated revenue for the nine months ended September 30, 2012 was \$280.9 million, compared to \$245.7 million for the nine months ended September 30, 2011. License revenue was \$47.1 million for the nine months ended September 30, 2012, compared to \$37.7 million in the nine months ended September 30, 2011.

Operating income was \$61.0 million for the nine months ended September 30, 2012, compared to \$45.2 million for the nine months ended September 30, 2011. Results for the nine months ended September 30, 2011 included a \$2.5 million recovery of a previously impaired auction rate security investment.

For the nine months ended September 30, 2012, we repurchased 1,418,205 shares of our common stock under our share repurchase program, for a total investment of \$68.5 million.

The results of our operations for the nine months ended September 30, 2012 and 2011 are discussed below.

Revenue

	Nine Months Ended September 30,				
	2012	2011	% Change vs. Prior Year	% of Total Revenue	
	(in thousands)				
Software license	\$ 47,096	\$ 37,674	25%	17%	15%
Services	211,578	183,446	15%	75%	75%
Hardware and other	22,215	24,594	-10%	8%	10%
Total revenue	\$ 280,889	\$ 245,714	14%	100%	100%

License revenue. License revenue increased \$9.4 million, or 25%, in the nine months ended September 30, 2012 over the same period in the prior year. Our license revenue performance depends heavily on the number and relative value of large deals we close in the period. We completed nine large deals and eight large deals greater than \$1.0 million in the first nine months of 2012 and 2011, respectively. Due to the sluggish economic recovery in the United States and other geographic regions in which we operate, the sales cycle on these deals remains somewhat less predictable.

The license sales percentage mix across our product suite in the nine months ended September 30, 2012 was approximately 65/35 of warehouse management solutions to non-warehouse management solutions, respectively.

Services revenue. Services revenue increased \$28.1 million, or 15%, in the nine months ended September 30, 2012 compared to the same period in the prior year due to a \$20.5 million increase in professional services revenue and a \$7.7 million increase in customer support and software enhancements. The increase in services revenue was primarily due to customer-specific initiatives in conjunction with customer upgrade activity and implementation services for large license deals signed. Services revenue for the Americas, EMEA and APAC segments increased \$21.9 million, \$2.8 million and \$3.4 million, respectively, in the nine months ended September 30, 2012 compared to the same period in the prior year.

Hardware and other. Hardware sales decreased by \$3.6 million, or 22%, to \$13.0 million in the nine months ended September 30, 2012 compared to \$16.6 million for the same period in the prior year. Sales of hardware are largely dependent upon customer-specific desires, which fluctuate from quarter to quarter. Reimbursements for out-of-pocket expenses are required to be classified as revenue and are included in hardware and other revenue. Reimbursements by customers for out-of-pocket expenses were approximately \$9.2 million and \$8.0 million for the nine months ended September 30, 2012 and 2011, respectively.

Table of Contents**Cost of Revenue**

	Nine Months Ended September 30,		
	2012	2011	% Change vs. Prior Year
	(in thousands)		
Cost of software license	\$ 5,351	\$ 4,259	26%
Cost of services	94,646	80,474	18%
Cost of hardware and other	18,416	19,452	-5%
Total cost of revenue	\$ 118,413	\$ 104,185	14%

Cost of license. Cost of license consists of the costs associated with software reproduction; hosting services; media, packaging and delivery, documentation and other related costs; and royalties on third-party software sold with or as part of our products. Cost of license increased by \$1.1 million, or 26%, in the first nine months of 2012 compared to the same period of 2011 principally due to the increase in license revenue.

Cost of services. Cost of services consists primarily of salaries and other personnel-related expenses of employees dedicated to professional and technical services and customer support services. The \$14.2 million, or 18%, increase in cost of services in the nine months ended September 30, 2012 compared to the same period in the prior year was principally due to a \$9.9 million increase in compensation and other personnel-related expenses resulting from increased headcount in our services organization and an increase of \$1.8 million in performance-based bonus expense.

Cost of hardware and other. Cost of hardware decreased by \$2.2 million to approximately \$9.4 million in the nine months ended September 30, 2012 compared to \$11.6 million in the same period of 2011. Cost of hardware and other includes out-of-pocket expenses to be reimbursed by customers of approximately \$9.0 million and \$7.9 million for the nine months ended September 30, 2012 and 2011, respectively.

Operating Expenses

	Nine Months Ended September 30,		
	2012	2011	% Change vs. Prior Year
	(in thousands)		
Research and development	\$ 33,753	\$ 31,936	6%
Sales and marketing	34,817	33,774	3%
General and administrative	28,806	27,256	6%
Depreciation and amortization	4,141	5,922	-30%
Recovery of previously impaired investment		(2,519)	-100%
Operating expenses	\$ 101,517	\$ 96,369	5%

Research and development. Research and development expenses primarily consist of salaries and other personnel-related costs for personnel involved in our research and development activities. Research and development expenses for the nine months ended September 30, 2012 increased by \$1.8 million, or 6%, compared to the same period in 2011. This increase was primarily attributable to an increase in compensation and employee-related expenses of \$1.0 million and an increase in performance-based compensation expense of \$0.7 million.

Sales and marketing. Sales and marketing expenses include salaries, commissions, travel and other personnel-related costs and the costs of our marketing and alliance programs and related activities. Sales and marketing expenses increased by \$1.0 million, or 3%, in the first nine months of 2012 compared to the same period of the prior year. This increase was mainly attributable to the increase in performance-based compensation expense of \$2.8 million partially offset by a decrease in marketing programs expense of \$0.8 million and a decrease in travel expenses of \$0.9 million.

Table of Contents

General and administrative. General and administrative expenses consist primarily of salaries and other personnel-related costs of executive, financial, human resources, information technology and administrative personnel, as well as facilities, legal, insurance, accounting and other administrative expenses. General and administrative expenses increased \$1.6 million, or 6%, during the nine months ended September 30, 2012 compared to the same period in the prior year. The increase was primarily attributable to an increase in compensation, bonus, and employee-related expenses of \$1.4 million and professional fees, including temporary contracted personnel, of \$0.4 million, partially offset by a decrease in equity-based compensation expense of \$0.8 million.

Depreciation and amortization. Depreciation expense amounted to \$4.1 million and \$4.7 million for the nine months ended September 30, 2012 and 2011, respectively. Amortization of intangibles associated with various acquisitions totaled \$1.2 million for the nine months ended September 30, 2011.

Recovery of previously impaired investment. In the quarter ended September 30, 2008, we recorded an impairment charge of \$3.5 million on an investment in an auction rate security. We reduced the carrying value of the investment to zero due to credit downgrades of the underlying issuer and the bond insurer as well as increasing publicly reported exposure to bankruptcy risk by the issuer. In the quarter ended September 30, 2011, we were able to sell the auction rate security recovering 72%, or \$2.5 million, of our original investment.

Operating Income

Operating income for the nine months ended September 30, 2012 was \$61.0 million compared to \$45.2 million for the nine months ended September 30, 2011. Operating margins were 21.7% for the first nine months of 2012 versus 18.4% for the first nine months of 2011. Operating income and margin for the nine months ended September 30, 2011 included a \$2.5 million recovery of a previously impaired auction rate security investment discussed above. Operating income and margins increased due to strong revenue growth and expense management during the year in addition to favorable foreign currency translation effects of \$2.4 million for the nine months ended September 30, 2012, primarily due to the weakening of the Indian Rupee versus the U.S. dollar during the nine months ended September 30, 2012 compared to the same period in the prior year.

Other Income, Net and Taxes

	Nine Months Ended September 30,		
	2012	2011	% Change vs. Prior Year
	(in thousands)		
Other income, net	\$ 431	\$ 1,214	-64%
Income tax provision	22,007	11,992	84%

Other income, net. Other income, net principally includes interest income, foreign currency gains and losses and other non-operating expenses. Other income, net decreased \$0.8 million in the nine months ended September 30, 2012 compared to the same period in 2011 primarily related to the fluctuation of the U.S. dollar relative to foreign currencies, principally the Indian Rupee. We recorded a net foreign currency loss of \$0.4 million and a net foreign currency gain of \$0.4 million during the nine months ended September 30, 2012 and 2011, respectively.

Income tax provision. Our effective income tax rate was 35.8% and 25.9% for the nine months ended September 30, 2012 and 2011, respectively. The increase in the effective tax rate for the nine months ended September 30, 2012 compared to the same period in the prior year is principally due to the expiration of the federal research and development tax credit and foreign net operating loss carry-forwards benefitted in prior periods that have now been fully utilized. The effective rate for the nine months ended September 30, 2011 also included a \$2.0 million tax benefit recorded in the first quarter ending March 31, 2011, resulting from the reduction of a valuation allowance associated with tax credit carryforwards and deferred tax assets in India. The benefit was attributable to the elimination of the tax holiday for Indian companies under the STPI tax plan, based on the February 2011 budget approved by the India Finance Ministry, which will allow us to utilize tax assets previously reserved. Further, the effective rate for the nine months ended September 30, 2011 was impacted by the \$2.5 million recovery of the previously impaired investment discussed above. We did not record a tax benefit in 2008 on the original impairment charge as there were no future capital gains to offset the loss, and therefore did not have tax expense related to the reversal of the charge. In addition, the effective tax rate in the nine months of 2011 included a tax benefit from disqualifying dispositions of incentive stock options that were previously expensed and a reduction of U.S. federal and state income tax reserves that resulted from the expiration of tax audit statutes for tax returns filed for 2007 and prior and the settlement of an IRS audit.

Table of Contents

Liquidity and Capital Resources

As of September 30, 2012, we had approximately \$106.8 million in cash, cash equivalents, and investments, as compared to \$99.1 million at December 31, 2011. Our main source of operating cash flow is cash collections from our customers, which we use to fund our operations. In the fourth quarter of 2012, we expect that our priorities for the use of cash will be in developing sales and services resources and continued investment in product development to drive and support profitable growth and to extend our market leadership. We will continue to evaluate acquisition opportunities that are complementary to our product footprint and technology direction. We will also continue to weigh our share repurchase options against cash for acquisitions and investing in the business. We do not anticipate any borrowing requirements in the remainder of 2012 or in 2013 for general corporate purposes.

Our operating activities generated cash flow of approximately \$51.4 million and \$41.0 million for the nine months ended September 30, 2012 and 2011, respectively. The increase in cash flow from operations was primarily attributable to higher revenue and net earnings.

Our investing activities used cash of approximately \$4.6 million and \$3.2 million during the nine months ended September 30, 2012 and 2011, respectively. The primary use of cash for investing activities for the nine months ended September 30, 2012 was \$4.3 million in capital expenditures and net purchases of \$0.2 million in short-term investments. The primary use of cash for investing activities for the nine months ended September 30, 2011 was \$3.7 million in capital expenditures and net maturities of \$0.5 million in short-term investments.

Our financing activities used cash of approximately \$40.2 million and \$63.9 million for the nine months ended September 30, 2012 and 2011, respectively. The principal use of cash for financing activities for the nine months ended September 30, 2012 was to purchase approximately \$71.7 million of our common stock, including \$3.2 million for shares withheld for taxes due upon vesting of restricted stock, partially offset by proceeds generated from options exercised of \$25.7 million and a \$5.7 million excess tax benefit from equity-based compensation. The principal use of cash for financing activities for the nine months ended September 30, 2011 was to purchase approximately \$95.6 million of our common stock, including \$2.3 million for shares withheld for taxes due upon vesting of restricted stock, partially offset by proceeds generated from options exercised of \$30.3 million and a \$1.4 million excess tax benefit from equity-based compensation.

Periodically, opportunities may arise to grow our business through the acquisition of complementary and synergistic companies, products, and technologies. Any material acquisition could result in a decrease to our working capital depending on the amount, timing, and nature of the consideration to be paid. We believe that existing balances of cash and investments will be sufficient to meet our working capital and capital expenditure needs at least for the next twelve months, although there can be no assurance that this will be the case.

Critical Accounting Policies and Estimates

In the first nine months of 2012, there were no significant changes to our critical accounting policies and estimates from those disclosed in the section Management's Discussion and Analysis of Financial Condition and Results of Operations in our annual report on Form 10-K for the year ended December 31, 2011.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

There were no material changes to the Quantitative and Qualitative Disclosures about Market Risk previously disclosed in our annual report on Form 10-K for the year ended December 31, 2011.

Item 4. Controls and Procedures.

Disclosure Controls and Procedures

We maintain disclosure controls and procedures designed to provide reasonable assurance that information required to be disclosed in reports filed under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and our Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Table of Contents

No system of controls, no matter how well designed and operated, can provide absolute assurance that the objectives of the system of controls are met, and no evaluation of controls can provide absolute assurance that the system of controls has operated effectively in all cases. Our disclosure controls and procedures however are designed to provide reasonable assurance that the objectives of disclosure controls and procedures are met.

As of the end of the period covered by this report, our management evaluated, with the participation of our Chief Executive Officer and Chief Financial Officer, the effectiveness of our disclosure controls and procedures. Based on the evaluation, our Chief Executive Officer and Chief Financial Officer concluded that, as of the end of the period covered by this report, our disclosure controls and procedures are effective to provide reasonable assurance that the objectives of disclosure controls and procedures are met.

Changes in Internal Control over Financial Reporting

During the nine months ended September 30, 2012, there were no changes in our internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting, including any corrective actions with regard to material weaknesses.

PART II**OTHER INFORMATION****Item 1. Legal Proceedings.**

From time to time, we are party to various legal proceedings arising in the ordinary course of business, and occasionally legal proceeding not in the ordinary course. The Company is not currently a party to any legal proceedings the result of which it believes could have a material adverse impact upon its business, financial position, results of operations, or cash flows.

Many of our installations involve products that are critical to the operations of our clients' businesses. Any failure in our products could result in a claim for substantial damages against us, regardless of our responsibility for such failure. Although we attempt to limit contractually our liability for damages arising from product failures or negligent acts or omissions, there can be no assurance the limitations of liability set forth in our contracts will be enforceable in all instances.

Item 1A. Risk Factors.

In addition to the other information set forth in this report, you should carefully consider the risk factors disclosed in Item 1A, Risk Factors, of the Company's annual report on Form 10-K for the year ended December 31, 2011.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

The following table provides information regarding our common stock repurchases under our publicly-announced repurchase program and shares withheld for taxes due upon vesting of restricted stock for the quarter ended September 30, 2012. All repurchases related to the repurchase program were made on the open market.

Period	Total Number of Shares Purchased ^(a)	Average Price Paid per Share ^(b)	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares that May Yet Be Purchased Under the Plans or Programs
July 1 - July 31, 2012	65,687	\$ 47.23	63,458	\$ 47,000,114
August 1 - August 31, 2012	167,739	48.09	167,678	38,936,095
September 1 - September 30, 2012	189,986	53.95	187,796	28,797,767

Edgar Filing: MANHATTAN ASSOCIATES INC - Form 10-Q

Total	423,412	\$ 50.59	418,932	\$ 28,797,767
-------	---------	----------	---------	---------------

Table of Contents

- (a) Includes 2,229 shares, 61 shares, and 2,190 shares withheld for taxes due upon vesting of restricted stock during July, August, and September, respectively.
- (b) The average price paid per share for shares withheld for taxes due upon vesting of restricted stock was \$46.05, \$45.73, and \$50.54 in July, August, and September, respectively.

In October 2012, our Board of Directors approved raising our remaining repurchase authority for the Company's common stock to a total of \$50.0 million.
