MSCI INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

1. INTRODUCTION AND BASIS OF PRESENTATION

MSCI Inc., together with its wholly-owned subsidiaries (the Company or MSCI), is a global provider of investment decision support tools, including indexes, portfolio risk and performance analytics. The Company's flagship products are its global equity indexes and environmental, social and governance (ESG) products marketed under the MSCI and MSCI ESG Research brands, its private real estate benchmarks marketed under the IPD brand, its portfolio risk and performance analytics covering global equity and fixed income markets marketed under the Barra brand, its market and credit risk analytics marketed under the RiskMetrics and Barra brands, its performance reporting products and services offered to the investment consultant community marketed under the InvestorForce brand and its valuation models and risk management software for the energy and commodities markets marketed under the FEA brand.

On March 17, 2014, MSCI entered into a definitive agreement to sell Institutional Shareholder Services Inc. (ISS). As a result, the Company reported the operating results of ISS in Income from discontinued operations, net of income taxes in the Unaudited Condensed Consolidated Statements of Income for the three and six months ended June 30, 2014 and 2013. As a result of this change, the Company now operates as one segment. Unless otherwise indicated, the disclosures accompanying these unaudited condensed consolidated financial statements reflect the Company's continuing operations.

Basis of Presentation and Use of Estimates

These unaudited condensed consolidated financial statements include the accounts of MSCI Inc. and its subsidiaries and include all adjustments of a normal, recurring nature necessary to present fairly the financial condition as of June 30, 2014 and December 31, 2013, the results of operations and comprehensive income for the three and six months ended June 30, 2014 and 2013 and cash flows for the six months ended June 30, 2014 and 2013. The accompanying unaudited condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes included in MSCI's Annual Report on Form 10-K for the year ended December 31, 2013. The unaudited condensed consolidated financial statement information as of December 31, 2013 has been derived from the 2013 audited consolidated financial statements. The results of operations for interim periods are not necessarily indicative of results for the entire year.

The Company's unaudited condensed consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States of America (GAAP). These accounting principles require the Company to make certain estimates and judgments that can affect the reported amounts of assets and liabilities as of the date of the unaudited condensed consolidated financial statements, as well as the reported amounts of revenue and expenses during the periods presented. Significant estimates and assumptions made by management include the deferral and recognition of revenue, research and development and software capitalization, the allowance for doubtful accounts, impairment of long-lived assets, accrued compensation, income taxes and other matters that affect the unaudited condensed consolidated financial statements and related disclosures. The Company believes that estimates used in the preparation of these unaudited condensed consolidated financial statements are reasonable; however, actual results could differ materially from these estimates.

Intercompany balances and transactions are eliminated in consolidation. Certain prior period amounts have been reclassified to conform to the current year financial statement presentation.

Revision

In connection with the preparation of the Company's unaudited condensed consolidated financial statements for the three months ended June 30, 2014, the Company determined that it had understated its net tax liabilities in certain years prior to December 31, 2012. As a result of these errors, the Company has recorded the following corrections as of December 31, 2013: (i) an \$11.3 million decrease to beginning retained earnings, (ii) a \$0.7 million decrease to additional paid in capital, (iii) a \$12.8 million decrease to prepaid taxes, (iv) a \$13.6 million increase to long-term deferred tax liabilities and (v) a \$14.3 million increase to goodwill. In accordance with the accounting guidance found in Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) Subtopic 250-10, *Accounting Changes and Error Corrections*, the Company has revised its Unaudited Condensed Consolidated Statements of Financial Condition as of December 31, 2013 to reflect these corrections. The Company will revise all other previously reported results as such financial information is included in future filings.

In accordance with SEC Staff Accounting Bulletin No. 99, *Materiality*, the Company assessed the materiality of the adjustments and concluded that these corrections were not material to any of its previously issued financial statements. The Company also concluded that its compliance with debt covenants would not have been affected by these adjustments.

Table of Contents

Accordingly, the Company has revised the Unaudited Condensed Consolidated Statement of Financial Condition as of December 31, 2013 from amounts previously reported as follows:

	December 31, 2013		
	As Previously Reported	Adjustment	As Revised
Prepaid taxes	\$ 27,333	\$ (12,765)	\$ 14,568

Total liabilities and shareholders equity	\$ 3,134,537	\$ 1,578	\$ 3,136,115

Concentrations

Financial instruments that may potentially subject the Company to concentration risk consist principally of cash deposits. At June 30, 2014 and December 31, 2013, cash and cash equivalent amounts were \$683.2 million and \$358.4 million, respectively. The Company held no short-term investments at June 30, 2014 or December 31, 2013. The Company receives interest at prevailing money market fund rates on its cash deposits.

For the six months ended June 30, 2014, BlackRock, Inc. accounted for 10.4% of the Company's operating revenues. For the six months ended June 30, 2013, no single customer accounted for 10.0% or more of the Company's operating revenues.

2. RECENT ACCOUNTING STANDARDS UPDATES

In July 2013, the FASB issued Accounting Standards Update No. 2013-11, *Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists*, or ASU 2013-11. The amendments in this update require that an unrecognized tax benefit, or a portion of an unrecognized tax benefit, be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward, except under a few limited circumstances. The amendments in this update do not require new recurring disclosures. This new guidance is to be applied prospectively for interim and annual periods beginning after December 15, 2013. The adoption of ASU 2013-11 did not have a material impact on the Company's unaudited condensed consolidated financial statements.

In April 2014, the FASB issued Accounting Standards Update No. 2014-08, *Presentation of Financial Statements (Topic 205) and Property, Plant, and Equipment (Topic 360): Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity*, or ASU 2014-08. The amendments in this update change the requirements for reporting discontinued operations under ASC Subtopic 205-20, *Presentation of Financial Statements - Discontinued Operations*, such as limiting discontinued operations reporting to disposals of components of an entity that represent strategic shifts that have (or will have) a major effect on an entity's operations and financial results. The amendments in this update also require expanded disclosures in order to provide users of financial statements with more

information about the assets, liabilities, revenues and expenses of discontinued operations. Further, the amendments require an entity to disclose the pretax profit or loss of an individually significant component of an entity that does not qualify for discontinued operations reporting. This new guidance is to be applied prospectively for annual periods beginning on or after December 15, 2014, and interim periods within those years, with early adoption permitted. The Company has elected not to early adopt ASU 2014-08 and is evaluating the potential impact that the update will have on its unaudited condensed consolidated financial statements.

In May 2014, the FASB issued Accounting Standards Update No. 2014-09, *Revenue from Contracts with Customers*, or ASU 2014-09. The objective of ASU 2014-09 is to establish a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers and will supersede most of the existing revenue recognition guidance, including industry-specific guidance. The core principle of ASU 2014-09 is that an entity recognizes revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. In applying the new guidance, an entity will (1) identify the contract(s) with a customer; (2) identify the performance obligations in the contract; (3) determine the transaction price; (4) allocate the transaction price to the contract's performance obligations; and (5) recognize revenue when, or as, the entity satisfies a performance obligation. The new guidance is effective for

annual reporting periods (including interim periods within those periods) beginning after December 15, 2016 for public companies. Early adoption is not permitted. Entities have the option of using either a full retrospective or modified approach to adopt ASU 2014-09. The Company is evaluating the potential impact that the update will have on its unaudited condensed consolidated financial statements.

3. DISPOSITIONS AND DISCONTINUED OPERATIONS***Disposition of CFRA***

On March 31, 2013, MSCI completed the sale of its CFRA product line. The value of the disposed assets and liabilities and the resulting gain on disposal were not material to the Company.

Disposition of ISS

On March 17, 2014, MSCI entered into a definitive agreement to sell ISS. The results of operations from ISS and the CFRA product line are reflected in *Income from discontinued operations, net of income taxes* in the Unaudited Condensed Consolidated Statements of Income.

The sale of ISS was completed on April 30, 2014 for \$367.4 million, subject to final working capital adjustments. The value of the assets and liabilities of ISS that were disposed, directly attributable transaction costs and the resulting gain on disposal that has been reported in *Income from discontinued operations, net of income taxes* for the three and six months ended June 30, 2014 are as follows:

5. EARNINGS PER COMMON SHARE

Basic earnings per share (EPS) is computed by dividing income available to MSCI common shareholders by the weighted average number of common shares outstanding during the period. Common shares outstanding include common stock and vested restricted stock unit awards where recipients have satisfied either the explicit vesting terms or retirement-eligible requirements. Diluted EPS reflects the assumed conversion of all dilutive securities. There were 104,272 stock options excluded from the calculation of diluted EPS for the three and six months ended June 30, 2014, because of their anti-dilutive effect. There were 224 and 112 stock options excluded from the calculation of diluted EPS for the three and six months ended June 30, 2013, because of their anti-dilutive effect.

Table of Contents

The Company computes EPS using the two-class method and determines whether instruments granted in share-based payment transactions are participating securities. The following table presents the computation of basic and diluted EPS:

8. COMMITMENTS AND CONTINGENCIES

Legal matters. From time to time, the Company is party to various litigation matters incidental to the conduct of its business. The Company is not presently party to any legal proceedings the resolution of which the Company believes would have a material effect on its business, operating results, financial condition or cash flows.

Leases. The Company leases facilities under non-cancelable operating lease agreements. The terms of certain lease agreements provide for rental payments on a graduated basis. The Company recognizes rent expense on the straight-line basis over the lease period and has accrued for rent expense incurred but not paid. Rent expense for the three months ended June 30, 2014 and 2013 was \$6.8 million and \$5.7 million, respectively. Rent expense for the six months ended June 30, 2014 and 2013 was \$13.4 million and \$11.5 million, respectively.

Share repurchase. On December 13, 2012, the Board of Directors approved a stock repurchase program authorizing the purchase of up to \$300.0 million worth of shares of MSCI's common stock beginning immediately and continuing through December 31, 2014 (the 2012 Repurchase Program).

On December 13, 2012, as part of the 2012 Repurchase Program, the Company entered into an accelerated share repurchase (ASR) agreement with a financial institution to initiate a repurchase aggregating \$100.0 million (the December 2012 ASR Program). As a result of the December 2012 ASR Program, the Company received 2.2 million shares on December 14, 2012 and 0.8 million shares on July 31, 2013 for a combined average purchase price of \$33.47 per share.

Table of Contents

On August 1, 2013, MSCI entered into a second ASR agreement to initiate share repurchases aggregating \$100.0 million (the August 2013 ASR Program). As a result of the August 2013 ASR Program, the Company received 1.9 million shares on August 2, 2013 and 0.5 million shares on December 30, 2013 for a combined average purchase price of \$41.06 per share.

On February 6, 2014, MSCI utilized the remaining repurchase authorization provided by the 2012 Repurchase Program by entering into a new ASR agreement to initiate share repurchases aggregating \$100.0 million (the February 2014 ASR Program). As a result of the February 2014 ASR Program, the Company received 1.7 million shares on February 7, 2014 and 0.6 million shares on May 5, 2014 for a combined average purchase price of \$43.10 per share.

On February 4, 2014, the Board of Directors approved a stock repurchase program authorizing the purchase of up to \$300.0 million worth of shares of MSCI's common stock which will be available from time to time at management's discretion (the 2014 Repurchase Program). The 2014 Repurchase Program may be modified, suspended or terminated by the Company at any time without prior notice.

Acquisition of GMI Ratings. On June 27, 2014, the Company announced that it plans to acquire GMI Ratings, a provider of ESG ratings and research to institutional investors, for a total cash consideration of \$15.0 million, subject to customary closing conditions. The deal is expected to close during the quarter ending September 30, 2014.

Long-term debt. On June 1, 2010, the Company entered into a senior secured credit facility (the 2010 Credit Facility). On March 14, 2011, the Company completed the repricing of the 2010 Credit Facility pursuant to Amendment No. 2 to the 2010 Credit Facility. On May 4, 2012, the Company amended and restated its 2010 Credit Facility (the credit agreement as so amended and restated, the Amended and Restated Credit Facility). The Amended and Restated Credit Facility provides for the incurrence of a new senior secured five-year Term Loan A Facility in an aggregate amount of \$880.0 million (the 2012 Term Loan) and a \$100.0 million senior secured revolving facility (the 2012 Revolving Credit Facility). The Amended and Restated Credit Facility also amended certain negative covenants, including financial covenants.

In March 2013, the Company made a \$15.0 million prepayment on the 2012 Term Loan.

On December 12, 2013, the Company entered into an agreement that extended the maturity of the Amended and Restated Credit Facility from May 2017 to December 2018 (the New Amended and Restated Credit Facility). The Company also amended the amortization schedule of required debt payments under the 2012 Term Loan. Pursuant to the New Amended and Restated Credit Facility, the Company is required to repay \$5.1 million in quarterly payments over the first two years and \$10.1 million in quarterly payments over the following three years, with the exception of the final payment in December 2018, which will be \$658.1 million (assuming no further prepayments).

The 2012 Term Loan bears interest equal to LIBOR plus a margin. As of June 30, 2014, the 2012 Term Loan bore interest at LIBOR plus a margin of 2.25%, or 2.40%.

Current maturities of long-term debt at June 30, 2014 were \$19.8 million, net of a \$0.5 million discount. Long-term debt, net of current maturities at June 30, 2014 was \$778.1 million, net of a \$1.5 million discount.

Current maturities of long-term debt at December 31, 2013 were \$19.8 million, net of a \$0.5 million discount. Long-term debt, net of current maturities at December 31, 2013 was \$788.0 million, net of a \$1.7 million discount.

In connection with entering into the New Amended and Restated Credit Facility, certain fees were paid and are being amortized over the life of the New Amended and Restated Credit Facility. At June 30, 2014, \$7.4 million of the

deferred financing fees remain unamortized, \$1.7 million of which is included in Prepaid and other assets and \$5.7 million of which is included in Other non-current assets on the Company's Unaudited Condensed Consolidated Statement of Financial Condition.

The Company amortized \$0.4 million and \$0.7 million of deferred financing fees in interest expense during the three months ended June 30, 2014 and 2013, respectively. The Company amortized \$0.9 million and \$1.5 million of deferred financing fees in interest expense during the six months ended June 30, 2014 and 2013, respectively. Approximately \$0.1 million and \$0.2 million of debt discount was amortized in interest expense during the three months ended June 30, 2014 and 2013, respectively. Approximately \$0.2 million and \$0.5 million of debt discount were amortized in interest expense during the six months ended June 30, 2014 and 2013, respectively.

At June 30, 2014 and December 31, 2013, the fair market value of the Company's debt obligations were \$801.9 million and \$812.0 million, respectively. The fair market value is determined in accordance with accounting standards related to the determination of fair value and represents Level 2 valuations. The Company utilizes the market approach and obtains security pricing from a vendor who uses broker quotes and third-party pricing services to determine fair values.

Table of Contents

As of June 30, 2014, the Company's retained earnings of \$947.0 million were restricted as to the payments of dividends. As outlined in the New Amended and Restated Credit Facility, the Company cannot pay or declare any dividends except out of amounts available for restricted payments. As of June 30, 2014, the amount available for restricted payments was \$482.0 million, reflecting the Company's cumulative retained excess cash flows (CRECF), as defined in the New Amended and Restated Credit Facility, through December 31, 2013 and adjusted for, among other things, any restricted payments made during the six months ended June 30, 2014. To the extent the CRECF is utilized for other actions restricted under the New Amended and Restated Credit Facility, including stock repurchases, the amount available for restricted payments will be reduced.

Derivatives and Hedging Activities. The Company is exposed to certain risks arising from both its business operations and economic conditions. The Company principally manages its exposures to a wide variety of business and operational risks through management of its core business activities. The Company manages economic risks, including interest rate, liquidity, and credit risk, primarily by managing the amount, sources, and duration of its debt funding and the use of derivative financial instruments.

Certain of the Company's foreign operations expose the Company to fluctuations of foreign exchange rates. These fluctuations may impact the value of the Company's cash receipts and payments in terms of the Company's functional currency, the U.S. dollar. The Company enters into derivative financial instruments to protect the value or fix the amount of certain obligations in terms of its functional currency.

Non-designated Hedges of Foreign Exchange Risk. Derivatives not designated as hedges are not speculative and are used to manage the Company's exposure to foreign exchange rate movements but do not meet the strict hedge accounting requirements. Changes in the fair value of derivatives not designated in hedging relationships are recorded directly in earnings. As of June 30, 2014, the Company had one outstanding foreign currency forward with a notional amount of \$13.0 million that was not designated as a hedge in a qualifying hedging relationship.

The following table presents the fair values of the Company's derivative instruments and the location in which they are presented on the Company's Unaudited Condensed Consolidated Statements of Financial Condition:

The Company's foreign exchange forward contracts were classified within Level 2, as they were valued using pricing models that took into account the contract terms as well as multiple observable inputs where applicable, such as prevailing spot rates and forward points.

9. INCOME TAXES

The Company's provision for income taxes was \$53.7 million and \$49.0 million for the six months ended June 30, 2014 and 2013, respectively. These amounts reflect effective tax rates of 34.0% and 31.0% for the six months ended June 30, 2014 and 2013, respectively.

Table of Contents

The effective tax rate of 34.0% for the six months ended June 30, 2014 reflects the Company's estimate of the effective tax rate for the period and is impacted by certain discrete items totaling \$2.7 million related to state taxes and the release of reserves associated with certain IRS examinations, the effect of which was to decrease the Company's effective tax rate by 1.8 percentage points. The effective tax rate of 31.0% for the six months ended June 30, 2013 reflects the Company's estimate of the effective tax rate for the period and is impacted by certain discrete items totaling \$3.9 million, the effect of which was to decrease the Company's effective tax rate by 2.5 percentage points.

The Company is under examination by the Internal Revenue Service and other tax authorities in certain countries, such as the United Kingdom, and states in which the Company has significant business operations, such as New York. The tax years currently under examination vary by jurisdiction. As a result of having previously been a member of the Morgan Stanley consolidated group, the Company may have future settlements with Morgan Stanley related to the ultimate disposition of their New York State and New York City examination relating to the tax years 2007 through 2008 and their IRS examination relating to the tax years 2006 through 2008. The Company does not believe it has any material exposure to the New York State and New York City examination. Additionally, the Company believes it has adequate reserves for any tax issues that may arise out of the IRS examination relating to the tax years 2006 through 2008 and therefore does not believe any related settlement with Morgan Stanley will have a material impact.

The Company regularly assesses the likelihood of additional assessments in each of the taxing jurisdictions in which it files income tax returns. The Company has established unrecognized tax benefits that the Company believes are adequate in relation to the potential for additional assessments. Once established, the Company adjusts unrecognized tax benefits only when more information is available or when an event occurs necessitating a change. As part of the Company's periodic review of unrecognized tax benefits and based on new information regarding the status of federal and state examinations, the Company's unrecognized tax benefits were remeasured. It is reasonably possible that significant changes in the balance of unrecognized tax benefits may occur within the next 12 months. At this time, however, it is not possible to reasonably estimate the expected change to the total amount of unrecognized tax benefits and the impact on the effective tax rate over the next 12 months.

The following table summarizes the major taxing jurisdictions in which the Company and its affiliates operate and the open tax years for each major jurisdiction:

10. SEGMENT INFORMATION

Prior to March 31, 2014, MSCI operated as two segments, the Performance and Risk business and the Governance business. These designations were made as the discrete operating results of these segments were reviewed by the Company's CODM for purposes of making operating decisions and assessing financial performance.

On March 17, 2014, MSCI entered into a definitive agreement to sell ISS, which, together with the previously disposed of CFRA product line, made up the Company's Governance segment and are now reflected in Income from discontinued operations, net of income taxes in the Unaudited Condensed Consolidated Statements of Income. As a result, the Company now operates and reports as a single business segment (see Note 3, Dispositions and Discontinued Operations, for further details).

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of MSCI Inc.

We have reviewed the accompanying condensed consolidated balance sheet of MSCI Inc. and its subsidiaries as of June 30, 2014, and the related condensed consolidated statements of income and of comprehensive income for the three and six-month period ended June 30, 2014 and the condensed consolidated statement of cash flows for the six-month period ended June 30, 2014. These interim financial statements are the responsibility of the Company's management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the accompanying condensed consolidated interim financial statements for them to be in conformity with accounting principles generally accepted in the United States of America.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of MSCI Inc.:

We have reviewed the accompanying condensed consolidated statements of income and comprehensive income of MSCI Inc. and subsidiaries (the Company) for the three and six-month period ended June 30, 2013 and the related condensed consolidated statements of cash flows for the six-month period ended June 30, 2013. These interim financial statements are the responsibility of the Company's management. We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States).

A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to such condensed consolidated interim financial statements for them to be in conformity with accounting principles generally accepted in the United States of America.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated statement of financial condition of MSCI Inc. and subsidiaries as of December 31, 2013 and the related consolidated statements of income, comprehensive income, shareholders' equity and cash flows for the fiscal year then ended prior to retrospective adjustment for the change in discontinued operations (not presented herein); and in our report dated February 28, 2014, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated statement of financial condition as of December 31, 2013 is fairly stated, in all material respects, in relation to the consolidated statement of financial condition from which it has been derived.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

The following discussion and analysis of the financial condition and results of operations should be read in conjunction with the condensed consolidated financial statements and related notes included elsewhere in this Form 10-Q and in our Annual Report on Form 10-K for the fiscal year ended December 31, 2013 (the "Form 10-K"). This discussion contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those discussed below. Factors that could cause or contribute to such differences include, but are not limited to, those identified below and those discussed in Item 1A, Risk Factors, in our Form 10-K for the fiscal year ended December 31, 2013.

Overview

We are a leading global provider of investment decision support tools, including indexes, portfolio risk and performance analytics. Our products and services address multiple markets, asset classes and geographies and are sold to a diverse client base, including asset owners such as pension funds, endowments, foundations, central banks, family offices and insurance companies; institutional and retail asset managers, such as managers of pension assets, mutual funds, exchange traded funds (ETFs), real estate, hedge funds and private wealth; financial intermediaries such as banks, broker-dealers, exchanges, custodians and investment consultants; and corporate clients. As of June 30, 2014, we had offices related to continuing operations in 35 cities in 22 countries in order to help serve our diverse client base, with 50.2% of our revenue from clients in the Americas, 37.3% in Europe, the Middle East and Africa (EMEA) and 12.5% in Asia and Australia based on revenues for the six months ended June 30, 2014.

Our principal sales model is to license annual, recurring subscriptions to our products and services for use at specified locations, often by a given number of users or for a certain volume of services for an annual fee paid up front. Additionally, our recurring subscriptions are increasingly related to our managed services offering whereby we oversee the production of risk and performance reports on behalf of our clients. Fees attributable to annual, recurring subscriptions are recorded as deferred revenues on our Unaudited Condensed Consolidated Statement of Financial Condition and are recognized on our Unaudited Condensed Consolidated Statement of Income as the service is rendered. Additionally, a portion of our revenues comes from clients who use our indexes as the basis for index-linked investment products such as ETFs or as the basis for passively managed funds and separate accounts. These clients commonly pay us a license fee for the use of our intellectual property based on the investment product's assets. We generate a limited amount of our revenues from certain exchanges that use our indexes as the basis for futures and options contracts and pay us a license fee for the use of our intellectual property based on their volume of trades. We also receive revenues from one-time fees related to implementation, historical or customized reports, advisory and consulting services and from certain products and services that are designed for one-time usage.

In evaluating our financial performance, we focus on revenue growth for the Company in total and by product category as well as operating profit growth. In addition, we focus on operating metrics, including Run Rates and retention rates to manage the business. Our business is not highly capital intensive and, as such, we expect to continue to convert a high percentage of our operating profits into excess cash in the future. Our revenue growth strategy includes: (a) expanding and deepening our relationships with investment institutions worldwide; (b) developing new and enhancing existing product offerings, including combining existing product features or data derived from our products to create new products; and (c) actively seeking to acquire products, technologies and companies that will enhance, complement or expand our client base and our product offerings.

To maintain and accelerate our revenue and operating income growth, we expect to continue to invest in and expand our operating functions and infrastructure, including additional product management, sales and client support staff and facilities in locations around the world and additional staff and supporting technology for our research and our data operations and technology functions. At the same time, managing and controlling our operating expenses is very

important to us and a distinct part of our culture.

The purpose of these investments is to maximize our medium-term revenue and operating income growth, while at the same time ensuring that we will remain a leading provider of investment decision support tools into the future. As a result, the rate of growth of our investments may from time to time exceed that of our revenues, which would slow the growth of, or even reduce, our operating profit. For example, for the six months ended June 30, 2014, our revenues grew by 10.3% but our operating income decreased by 2.7% compared to 2013, due, in part, to increased investment in our business. We anticipate that our increases in spending in areas such as sales, client service, information technology and product development in 2014 will continue to exceed the rate of growth of our revenues and will again slow the growth of our operating profit. However, we believe these investments will result in higher revenue and operating profit growth over the medium-term.

Changes in Presentation

On March 17, 2014, we entered into a definitive agreement to sell Institutional Shareholder Services Inc. (ISS) which, together with the previously disposed of CFRA product line, made up our Governance segment. As a result, we now operate as a single business segment and the operating results of ISS and the CFRA product line are reported as discontinued operations for all periods presented. Prior to March 31, 2014, we operated under two segments: the Performance and Risk business and the Governance business. Our Performance and Risk business is a leading global provider of investment decision support tools, including indexes and portfolio risk and performance analytics, credit analytics and environmental, social and governance (ESG) products. Our Governance business was a leading provider of corporate governance products and services and specialized financial research and analysis services to institutional investors and corporations around the world.

Table of Contents

In addition, for periods prior to March 31, 2014, we reported energy and commodity analytics products separately as its own product category for disclosures related to operating revenues, Run Rate and Aggregate and Core Retention Rates. Beginning with the three months ended March 31, 2014, we reported the results of energy and commodity analytics products as part of the risk management analytics product category as we view the product offerings and customer base of the energy and commodities analytics products to be similar in nature to those in the risk management analytics product category. Prior periods have also been presented to reflect this change in categorization.

Factors Affecting the Comparability of Results*Term Loan Amendment*

On June 1, 2010, we entered into a senior secured credit facility (the 2010 Credit Facility). On March 14, 2011, we completed the repricing of the 2010 Credit Facility pursuant to Amendment No. 2 to the 2010 Credit Facility. On May 4, 2012, we amended and restated our 2010 Credit Facility (the credit agreement as so amended and restated, the Amended and Restated Credit Facility). The Amended and Restated Credit Facility provides for the incurrence of a new senior secured five-year Term Loan A Facility in an aggregate amount of \$880.0 million (the 2012 Term Loan) and a \$100.0 million senior secured revolving facility (the 2012 Revolving Credit Facility). The Amended and Restated Credit Facility also amended certain negative covenants, including financial covenants.

In March 2013, we made a \$15.0 million prepayment on the 2012 Term Loan.

On December 12, 2013, we entered into an agreement that extended the maturity of the Amended and Restated Credit Facility from May 2017 to December 2018 (New Amended and Restated Credit Facility). We also amended the amortization schedule of required debt payments under the 2012 Term Loan. Pursuant to the New Amended and Restated Credit Facility, we are required to repay \$5.1 million in quarterly payments over the first two years and \$10.1 million in quarterly payments over the following three years, with the exception of the final payment in December 2018, which will be \$658.1 million (assuming no further prepayments).

The 2012 Term Loan bears interest equal to LIBOR plus a margin. As of June 30, 2014, the 2012 Term Loan bore interest at LIBOR plus a margin of 2.25%, or 2.40%. This amendment has decreased the interest expense on our outstanding 2012 Term Loan and 2012 Revolving Credit Facility.

Share Repurchases

On December 13, 2012, the Board of Directors approved a stock repurchase program authorizing the purchase of up to \$300.0 million worth of shares of MSCI's common stock beginning immediately and continuing through December 31, 2014 (the 2012 Repurchase Program).

On December 13, 2012, as part of the 2012 Repurchase Program, we entered into an accelerated share repurchase (ASR) agreement with a financial institution to initiate share repurchases aggregating \$100.0 million (the December 2012 ASR Program). As a result of the December 2012 ASR Program, we received 2.2 million shares on December 14, 2012 and 0.8 million shares on July 31, 2013 for a combined average purchase price of \$33.47 per share.

On August 1, 2013, we entered into a second ASR agreement to initiate share repurchases aggregating \$100.0 million (the August 2013 ASR Program). As a result of the August 2013 ASR Program, we received 1.9 million shares on August 2, 2013 and 0.5 million shares on December 30, 2013 for a combined average purchase price of \$41.06 per

share.

On February 6, 2014, we utilized the remaining repurchase authorization provided by the 2012 Repurchase Program by entering into a new ASR agreement to initiate share repurchases aggregating \$100.0 million (the February 2014 ASR Program). As a result of the February 2014 ASR Program, we received 1.7 million shares on February 7, 2014 and 0.6 million shares on May 5, 2014 for a combined average purchase price of \$43.10 per share.

The effect of these share repurchase programs has decreased the weighted average shares used in calculating our basic and diluted earnings per share.

Our index and ESG products primarily consist of equity and real estate index subscriptions, equity index asset-based fees products and ESG products. Our index and ESG products are used to benchmark investment performance, as a basis for index-linked investment products, the assessment of corporate management of ESG risks and opportunities, investment manager selection and investment research. We derive revenues from our index and ESG products through index data and ESG subscriptions, fees based on assets in investment products linked to our indexes and non-recurring licenses of our historical index data. Revenues related to index and ESG products increased \$18.1 million, or 13.7%, to \$150.3 million for the three months ended June 30, 2014 compared to \$132.2 million for the three months ended June 30, 2013.

Subscription revenues from the index and ESG products increased 11.5% to \$106.2 million for the three months ended June 30, 2014 compared to \$95.2 million for the three months ended June 30, 2013. The increase was primarily driven by growth in revenues from our equity index benchmark, real estate and ESG products.

Asset-based fee revenues attributable to index and ESG products increased \$7.1 million, or 19.3%, to \$44.1 million for the three months ended June 30, 2014 compared to \$37.0 million for the three months ended June 30, 2013. The increase was primarily driven by an increase of \$35.5 billion, or 11.0%, in the average value of assets in ETFs linked to MSCI indexes and a growth in assets from non-ETF passive funds. The growth rate of asset-based fee revenues relative to the growth in the average value of assets in ETFs linked to MSCI indexes also benefited from a shift in the overall mix toward higher fee products that resulted from the transition of certain Vanguard ETFs away from MSCI benchmarks (the Vanguard ETFs) during the three months ended June 30, 2013.

As of June 30, 2014, the value of assets in ETFs linked to MSCI indexes was \$378.7 billion, representing an increase of \$109.0 billion, or 40.4%, from \$269.7 billion as of June 30, 2013. Of the \$378.7 billion of assets in ETFs linked to MSCI indexes as of June 30, 2014, 52.7% were linked to non-U.S. developed market indexes, 26.3% were linked to emerging market indexes, 16.2% were linked to U.S. market indexes and 4.8% were linked to other global indexes.

The following table sets forth the value of assets in ETFs linked to MSCI indexes and the sequential change of such assets under management (AUM) as of the periods indicated:

Our risk management analytics products offer risk and performance assessment frameworks for managing and monitoring investments in organizations globally. These products allow clients to analyze investments in a variety of asset classes and are based on our proprietary integrated fundamental multi-factor risk models, value-at-risk methodologies, performance attribution frameworks and asset valuation models. We also offer products for monitoring, analyzing and reporting on institutional assets. Additionally, we provide products consisting of software applications which help users value, model and hedge physical assets and derivatives across a number of market segments including energy and commodity assets.

Revenues related to risk management analytics products increased \$7.5 million, or 10.7%, to \$77.7 million for the three months ended June 30, 2014 compared to \$70.2 million for the three months ended June 30, 2013. The increase in risk management analytics revenues was driven primarily by higher revenues from our RiskManager and BarraOne products and the timing of client implementations, in addition to higher revenues from our hedge fund transparency and InvestorForce products.

Our portfolio management analytics products consist of equity portfolio analytics tools and fixed income portfolio analytics tools. Revenues related to portfolio management analytics products increased \$0.2 million, or 0.8%, to \$26.3 million for the three months ended June 30, 2014 compared to \$26.1 million for three months ended June 30, 2013.

Run Rate

At the end of any period, we generally have subscription and investment product license agreements in place for a large portion of total revenues for the following 12 months. We measure the fees related to these agreements and refer to this as *Run Rate*. The Run Rate at a particular point in time represents the forward-looking revenues for the next 12 months from all subscriptions and investment product licenses we currently provide to our clients under renewable contracts or agreements assuming all contracts or agreements that come up for renewal are renewed and assuming then-current currency exchange rates. For any license where fees are linked to an investment product's assets or trading volume, the Run Rate calculation reflects, for ETF fees, the market value on the last trading day of the period, and for non-ETF funds and futures and options, the most recent periodic fee earned under such license or subscription. The Run Rate does not include fees associated with one-time and other non-recurring transactions. In addition, we remove from the Run Rate the fees associated with any subscription or investment product license agreement with respect to which we have received a notice of termination or non-renewal during the period and determined that such notice evidences the client's final decision to terminate or not renew the applicable subscription or agreement, even though

such notice is not effective until a later date.

Because the Run Rate represents potential future revenues, there is typically a delayed impact on our operating revenues from changes in our Run Rate. In addition, the actual amount of revenues we will realize over the following 12 months will differ from the Run Rate because of:

revenues associated with new subscriptions and non-recurring sales;

modifications, cancellations and non-renewals of existing agreements, subject to specified notice requirements;

fluctuations in asset-based fees, which may result from changes in certain investment products' total expense ratios, market movements or from investment inflows into and outflows from investment products linked to our indexes;

fluctuations in fees based on trading volumes of futures and options contracts linked to our indexes;

fluctuations in the number of hedge funds for which we provide investment information and risk analysis to hedge fund investors;

price changes;

revenue recognition differences under U.S. GAAP, including timing of implementation and report deliveries;

fluctuations in foreign exchange rates; and

Total Run Rate	\$ 986,507	\$ 880,889	\$ 955,256	12.0%	3.3%

Total Run Rate grew by \$105.6 million, or 12.0%, to \$986.5 million as of June 30, 2014 compared to \$880.9 million as of June 30, 2013. Changes in foreign currency rates positively impacted Run Rate by \$7.2 million relative to June 30, 2013.

Subscription Run Rate from the index and ESG products grew by \$43.0 million, or 12.3%, to \$393.8 million at June 30, 2014 from \$350.8 million at June 30, 2013, driven primarily by growth in our equity index benchmark and data products and aided by strong growth in our IPD real estate and ESG products. Changes in foreign currency rates positively impacted Run Rate by \$3.8 million relative to June 30, 2013.

Asset-based fee Run Rate from index and ESG products increased by 34.0% to \$176.6 million at June 30, 2014 from \$131.7 million at June 30, 2013. The increase was primarily driven by higher inflows into ETFs linked to MSCI indexes and, to a lesser extent, higher market performance.

As of June 30, 2014, AUM in ETFs linked to MSCI indexes were \$378.7 billion, up \$109.0 billion, or 40.4%, from June 30, 2013 and up \$37.9 billion, or 11.1%, from March 31, 2014. During the three months ended June 30, 2014, MSCI-linked ETFs were impacted by market increases of \$15.2 billion and net inflows of \$22.7 billion.

Risk management analytics products Run Rate increased \$15.8 million, or 5.4%, to \$309.6 million at June 30, 2014 compared to \$293.8 million at June 30, 2013, primarily driven by strong growth from RiskManager products. Changes in foreign currency positively benefited Run Rate by \$3.2 million compared to Run Rate at June 30, 2013.

Table of Contents

Portfolio management analytics products Run Rate increased \$2.0 million, or 1.9%, to \$106.5 million at June 30, 2014 from \$104.5 million at June 30, 2013. The increase was driven primarily by an increase in sales of our equity analytics products and higher retention rates. Changes in foreign currency rates had only a modest impact on Run Rate compared to Run Rate at June 30, 2013.

Aggregate and Core Retention Rates

The following table sets forth our Aggregate Retention Rates by product category for the indicated three months ended:

	June 30, 2014	June 30, 2013
Index and ESG products	94.1%	94.0%
Risk management analytics	91.6%	92.2%
Portfolio management analytics	94.8%	87.0%
Total	93.2%	92.3%

The following table sets forth our Core Retention Rates by product category for the indicated three months ended:

	June 30, 2014	June 30, 2013
Index and ESG products	94.1%	94.1%
Risk management analytics	91.6%	92.8%
Portfolio management analytics	95.8%	87.5%
Total	93.3%	92.6%

The Aggregate Retention Rates for a period are calculated by annualizing the cancellations for which we have received a notice of termination or we believe there is an intention to not renew during the period and we believe that such notice or intention evidences the client's final decision to terminate or not renew the applicable agreement, even though such notice is not effective until a later date. This annualized cancellation figure is then divided by the subscription Run Rate at the beginning of the year to calculate a cancellation rate. This cancellation rate is then subtracted from 100% to derive the annualized Aggregate Retention Rate for the period. The Aggregate Retention Rate is computed on a product-by-product basis. Therefore, if a client reduces the number of products to which it subscribes or switches between our products, we treat it as a cancellation. In addition, we treat any reduction in fees resulting from renegotiated contracts as a cancellation in the calculation to the extent of the reduction.

For the calculation of the Core Retention Rate, the same methodology is used except the cancellations in the period are reduced by the amount of product swaps. We do not calculate Aggregate or Core Retention Rates for that portion of our Run Rate attributable to assets in investment products linked to our indexes or to trading volumes of futures and options contracts linked to our indexes.

In our businesses, Aggregate and Core Retention Rates are generally higher during the first half and lower in the second half of the year.

Operating Expenses

We group our operating expenses into four categories:

Cost of services

Selling, general and administrative (SG&A)

Amortization of intangible assets

Depreciation and amortization of property, equipment and leasehold improvements

In both the cost of services and SG&A expense categories, compensation and benefits represent the majority of our expenses. Other costs associated with the number of employees, such as office space, are included in both the cost of services and SG&A expense categories and are consistent with the allocation of employees to those respective areas.

Table of Contents

The following table shows operating expenses by each of the categories:

	Three Months Ended

Total operating expenses	\$ 165,695	\$ 138,534	\$ 27,161	19.6%

Operating expenses were \$165.7 million for the three months ended June 30, 2014, an increase of \$27.2 million, or 19.6%, compared to \$138.5 million for the three months ended June 30, 2013.

Compensation and benefits expenses represent the majority of our expenses across all of our operating functions and typically have represented approximately 60% of total operating expenses. These costs generally contribute to the majority of our expense increases from period to period, reflecting increased staffing levels along with increased compensation and benefits expenses for current staff. We had 2,762 and 2,346 employees not related to the ISS operations as of June 30, 2014 and 2013, respectively. Continued growth of our emerging market centers around the world is an important factor in our ability to manage and control the growth of our compensation and benefit expenses. As of June 30, 2014, 49.2% of our employees were located in emerging market centers compared to 43.1% of our employees who did not leave as part of the ISS disposition as of June 30, 2013.

During the three months ended June 30, 2014, compensation and benefits costs were \$102.7 million, an increase of \$15.1 million, or 17.2%, compared to \$87.6 million for the three months ended June 30, 2013. The increase in compensation and benefits costs was driven primarily by an increase in overall headcount of 17.7%.

Non-compensation expenses for the three months ended June 30, 2014 increased \$10.7 million, or 30.7%, to \$45.6 million compared to \$34.9 million for the three months ended June 30, 2013. The increase reflected higher information technology, professional services, occupancy and recruiting costs, among other items.

Cost of Services

Cost of services includes costs related to our research, data management and production, software engineering and product management functions. Costs in these areas include staff compensation and benefits, occupancy costs, market data fees and information technology services. Compensation and benefits generally contribute to a majority of our expense increases from period to period, reflecting increased staffing levels and increased compensation and benefits for existing staff. For the three months ended June 30, 2014, total cost of services increased \$7.1 million, or 10.2%, to \$76.8 million compared to \$69.7 million for the three months ended June 30, 2013.

Compensation and benefits expenses for the three months ended June 30, 2014 increased \$5.0 million, or 9.7%, to \$56.7 million compared to \$51.7 million for the three months ended June 30, 2013. The increase in compensation and benefits expenses was primarily impacted by increased staffing levels and increased compensation and benefits related to current staff.

Non-compensation expenses for the three months ended June 30, 2014 increased \$2.1 million, or 11.8%, to \$20.1 million compared to \$18.0 million for the three months ended June 30, 2013. The increase was primarily driven by higher costs related to occupancy, information technology and market data.

Table of Contents***Selling, General and Administrative***

SG&A includes expenses for our sales and marketing staff and our finance, human resources, legal and compliance, information technology infrastructure and corporate administration personnel. As with cost of services, the largest expense in this category relates to compensation and benefits. Other significant expenses are for occupancy costs, third-party professional fees and information technology costs. For the three months ended June 30, 2014, SG&A increased \$18.7 million, or 35.3%, to \$71.5 million compared to \$52.8 million for the three months ended June 30, 2013.

Compensation and benefits expenses increased 28.0% to \$46.0 million for the three months ended June 30, 2014 compared to \$36.0 million for the three months ended June 30, 2013. Similar to compensation and benefits expenses in cost of services, the increase was primarily impacted by increased staffing levels and increased compensation and benefits related to current staff.

Non-compensation expenses for the three months ended June 30, 2014 increased 51.0% to \$25.5 million compared to \$16.9 million for the three months ended June 30, 2013. The increase was primarily driven by higher costs related to professional services, information technology and recruiting.

Amortization of Intangible Assets

Amortization of intangible assets expense relates to the intangible assets arising from the acquisitions of Barra, LLC in June 2004, RiskMetrics Group, LLC in June 2010, Measurisk, LLC in July 2010, IPD Group Limited in November 2012 and Investor Force Holdings, Inc. in January 2013, as well as capitalized software development costs. Amortization of intangible assets expense totaled \$11.4 million and \$11.2 million for the three months ended June 30, 2014 and 2013, respectively.

Depreciation and Amortization of Property, Equipment and Leasehold Improvements

Depreciation and amortization of property, equipment and leasehold improvements was \$5.9 million and \$4.8 million for the three months ended June 30, 2014 and 2013, respectively. The increase was related to higher depreciation associated with continued investment in information technology infrastructure.

Other Expense (Income), Net

Other expense (income), net for the three months ended June 30, 2014 was \$4.4 million, a decrease of 25.7% compared to \$6.0 million for the three months ended June 30, 2013, primarily driven by lower interest rates and lower average outstanding principal on our debt.

Provision For Income Taxes

The provision for income tax expense for the three months ended June 30, 2014 was \$27.3 million, a decrease of \$0.5 million, or 1.7%, compared to \$27.8 million for the three months ended June 30, 2013. These amounts reflect effective tax rates of 32.4% and 33.1% for the three months ended June 30, 2014 and 2013, respectively.

The provision for income tax expense for the three months ended June 30, 2014 included a benefit of \$2.6 million related to state taxes and the release of reserves associated with certain IRS examinations. Excluding the impact of these items, the effective tax rate was 35.6% for the three months ended June 30, 2014.

Income from Discontinued Operations, Net of Income Taxes

On April 30, 2014, MSCI completed the sale of ISS for cash consideration of \$367.4 million, subject to final working capital adjustments. ISS, together with the previously sold CFRA product line, is reflected as discontinued operations in our unaudited condensed consolidated financial statements.

Income from discontinued operations, net of income taxes was \$50.9 million for the three months ended June 30, 2014 compared to \$4.9 million for the three months ended June 30, 2013. The three months ended June 30, 2014 included a net gain of \$48.1 million resulting from the disposition of ISS.

Total operating revenues for the six months ended June 30, 2014 increased \$46.0 million, or 10.3%, to \$493.9 million compared to \$447.9 million for the six months ended June 30, 2013.

Revenues related to our index and ESG products increased 13.8% to \$288.5 million for the six months ended June 30, 2014 compared to \$253.6 million for the six months ended June 30, 2013.

Subscription revenues from the index and ESG products were up \$23.4 million, or 13.0%, to \$203.5 million for the six months ended June 30, 2014 compared to \$180.1 million for the six months ended June 30, 2013, driven primarily by growth in revenues from our equity index benchmark products.

Asset-based fee revenues attributable to the index and ESG products increased \$11.5 million, or 15.7%, to \$85.0 million for the six months ended June 30, 2014 compared to \$73.5 million for the six months ended June 30, 2013. The increase in asset-based fee revenues resulted from a shift in the overall mix toward higher fee products, which more than offset a decline of \$1.2 billion, or 0.3%, in the average value of assets in the ETFs linked to MSCI indexes. The decrease in the average value of assets in ETFs linked to MSCI indexes was primarily related to the transition of the Vanguard ETFs, which had an average value of assets of \$60.5 billion for the six months ended June 30, 2013. Excluding the \$60.5 billion related to the Vanguard ETFs, the average value of assets in ETFs linked to MSCI indexes would have increased by 20.7%.

The following table sets forth the average value of assets in ETFs linked to MSCI indexes for the year-to-date periods indicated:

Revenues related to risk management analytics products increased 9.0% to \$153.2 million for the six months ended June 30, 2014 compared to \$140.6 million for the six months ended June 30, 2013. The increase was primarily driven by higher revenues from our RiskManager and BarraOne products.

Revenues related to portfolio management analytics products decreased 2.9% to \$52.2 million for the six months ended June 30, 2014 compared to \$53.7 million for six months ended June 30, 2013. The decrease in revenues was the result of lower sales of our equity analytics products in prior periods, as well as lower revenues from our fixed income analytics products.

There have been no significant changes in our accounting policies or critical accounting estimates since the end of the fiscal year ended December 31, 2013.

Liquidity and Capital Resources

On June 1, 2010, we entered into the 2010 Credit Facility. On March 14, 2011, we completed the repricing of the 2010 Credit Facility pursuant to Amendment No. 2 to the 2010 Credit Facility. On May 4, 2012, we entered into the Amended and Restated Credit Facility. The Amended and Restated Credit Facility provides for the incurrence of the 2012 Term Loan in an aggregate amount of \$880.0 million and the 2012 Revolving Credit Facility in an aggregate amount of \$100.0 million. The Amended and Restated Credit Facility also amended certain negative covenants, including financial covenants.

In March 2013, we made a \$15.0 million prepayment on the 2012 Term Loan.

Table of Contents

On December 12, 2013, we entered into the New Amended and Restated Credit Facility. We also amended the amortization schedule of required debt payments under the 2012 Term Loan. Pursuant to the New Amended and Restated Credit Facility, we are required to repay \$5.1 million in quarterly payments over the first two years and \$10.1 million in quarterly payments over the following three years, with the exception of the final payment in December 2018, which will be \$658.1 million (assuming no further prepayments).

We require capital to fund ongoing operations, internal growth initiatives and acquisitions. Our primary sources of liquidity are cash flows generated from our operations, existing cash and cash equivalents and credit capacity under our credit facilities. We intend to use these sources of liquidity to service our existing and future debt obligations and fund our working capital requirements, capital expenditures, investments, acquisitions and repurchases of our common stock. In connection with our business strategy, we regularly evaluate acquisition opportunities. We believe our liquidity, along with other financing alternatives, will provide the necessary capital to fund these transactions and achieve our planned growth.

The effective combined rate on our debt was 2.30% at June 30, 2014.

The obligations under the New Amended and Restated Credit Facility are guaranteed by each of our material direct and indirect wholly-owned domestic subsidiaries, subject to limited exceptions. The obligations under the New Amended and Restated Credit Facility are secured by a lien on substantially all of the equity interests of our present and future material domestic subsidiaries, up to 65% of the equity interests of our first-tier foreign subsidiaries, and substantially all of our and our domestic subsidiaries' present and future property and assets, subject to certain exceptions.

The New Amended and Restated Credit Facility contains affirmative and restrictive covenants that, among other things, limit our ability and the ability of our existing or future subsidiaries to:

incur liens and further negative pledges;

incur additional indebtedness or prepay, redeem or repurchase indebtedness;

make loans or hold investments;

merge, dissolve, liquidate, consolidate with or into another person;

enter into acquisition transactions;

make capital expenditures;

issue disqualified capital stock;

sell, transfer or dispose of assets;

pay dividends or make other distributions in respect of our capital stock or engage in stock repurchases, redemptions and other restricted payments;

create new subsidiaries;

permit certain restrictions affecting our subsidiaries;

change the nature of our business, accounting policies or fiscal periods;

enter into any transactions with affiliates other than on an arm's length basis; and

amend our organizational documents or amend, modify or change the terms of certain agreements relating to our indebtedness.

The New Amended and Restated Credit Facility also contains customary events of default, including those relating to non-payment, breach of representations, warranties or covenants, cross-default and cross-acceleration, bankruptcy and insolvency events, invalidity or impairment of loan documentation or collateral, change of control and customary ERISA defaults. None of the restrictions above are expected to impact our ability to effectively operate the business.

The New Amended and Restated Credit Facility also requires us and our subsidiaries to achieve financial and operating results sufficient to maintain compliance with the following financial ratios on a consolidated basis through the termination of the New Amended and Restated Credit Facility: (1) the maximum Consolidated Leverage Ratio (as defined in the New Amended and Restated Credit Facility) measured quarterly on a rolling four-quarter basis shall not exceed 3.25:1.00 and (2) the minimum Consolidated Interest Coverage Ratio (as defined in the New Amended and Restated Credit Facility) measured quarterly on a rolling four-quarter basis shall be at least 5.00:1.00. As of June 30, 2014, our Consolidated Leverage Ratio (as defined in the New Amended and Restated Credit Facility) was 1.88:1.00 and our Consolidated Interest Coverage Ratio (as defined in the New Amended and Restated Credit Facility) was 21.90:1.00.

On February 6, 2014, we entered into a new ASR agreement to initiate share repurchases aggregating \$100.0 million. As a result, we received 1.7 million shares on February 7, 2014 and 0.6 million shares on May 5, 2014 for a combined average purchase price of \$43.10 per share.

	June 30, 2014	December 31, 2013

Cash and cash equivalents were \$683.2 million and \$358.4 million as of June 30, 2014 and December 31, 2013, respectively. As of June 30, 2014 and December 31, 2013, \$71.4 million and \$95.6 million, respectively, of the cash and cash equivalents were held by foreign subsidiaries, which could be subject to U.S. federal income taxation on repatriation to the U.S. and some of which could be subject to local country taxes if repatriated to the U.S. In addition, repatriation of some foreign cash is further restricted by local laws.

We believe that domestic cash flows from operations, together with existing cash and cash equivalents, will continue to be sufficient to fund our domestic operating activities and cash commitments for investing and financing activities, such as scheduled debt repayments and material capital expenditures, for at least the next 12 months and for the foreseeable future thereafter. In addition, we expect existing foreign cash flows from operations, together with existing cash and cash equivalents, will continue to be sufficient to fund our foreign operating activities for at least the next 12 months and for the foreseeable future thereafter.

Cash flows from operating activities

Cash flows from operating activities consist of net income adjusted for certain non-cash items and changes in assets and liabilities. Cash provided by operating activities was \$94.1 million and \$156.7 million for the six months ended

June 30, 2014 and 2013, respectively. The year-over-year decrease reflects increased expenses and a related increase in cash payments as well as increased payments for income taxes.

Our primary uses of cash from operating activities are for the payment of cash compensation expenses, office rent, technology costs, market data costs, interest expenses and income taxes. The payment of cash for compensation and benefits is historically at its highest level in the first quarter when we pay discretionary employee compensation related to the previous fiscal year.

Cash flows from investing activities

Cash provided by investing activities was \$340.9 million for the six months ended June 30, 2014 compared to \$39.1 million for the six months ended June 30, 2013. The year-over-year increase in cash provided by investing activities primarily reflects net cash inflows resulting from the disposition of ISS during the six months ended June 30, 2014. Partially offsetting this were the final cash inflows from the maturation of short-term investments in the six months ended June 30, 2013. In the six months ended June 30, 2013 we began investing excess cash in money market funds and other similar cash equivalents rather than U.S. Treasury securities and other short-term investments as we had in prior periods.

Table of Contents*Cash flows from financing activities*

Cash used in financing activities was \$110.8 million and \$38.4 million for the six months ended June 30, 2014 and 2013, respectively. The year-over-year change primarily reflects higher purchases of treasury shares, partially offset by lower repayments on our debt.

Balance Sheet Items

Total current assets increased 61.3% to \$1,006.9 million as of June 30, 2014 from \$624.3 million as of December 31, 2013. The increase was primarily driven by an increase in cash resulting from the disposition of ISS during the six months ended June 30, 2014. Total current liabilities decreased 5.5% to \$475.5 million as of June 30, 2014 from \$503.0 million as of December 31, 2013. The decrease was primarily driven by a decrease in accrued compensation and benefits, partially offset by an increase in other accrued liabilities.

Off-Balance Sheet Arrangements

We do not have any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities, which would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes.

Item 3. Quantitative and Qualitative Disclosures about Market Risk***Foreign Currency Risk***

We are subject to foreign currency exchange fluctuation risk. Exchange rate movements can impact the U.S. dollar-reported value of our revenues, expenses, assets and liabilities denominated in non-U.S. dollar currencies or where the currency of such items is different than the functional currency of the entity where these items were recorded.

A significant portion of our revenues from our index-linked investment products are based on fees earned on the value of assets invested in securities denominated in currencies other than the U.S. dollar. For all operations outside the United States where the Company has designated the local non-U.S. dollar currency as the functional currency, revenues and expenses are translated using average monthly exchange rates and assets and liabilities are translated into U.S. dollars using month-end exchange rates. For these operations, currency translation adjustments arising from a change in the rate of exchange between the functional currency and the U.S. dollar are accumulated in a separate component of shareholders' equity. In addition, transaction gains and losses arising from a change in exchange rates for transactions denominated in a currency other than the functional currency of the entity are reflected in non-operating Other expense (income), net in our Unaudited Condensed Consolidated Statements of Income.

Revenues from index-linked investment products represented approximately \$85.0 million, or 17.2%, and \$73.5 million, or 14.4%, of our total revenues for the six months ended June 30, 2014 and 2013, respectively. While our fees for index-linked investment products are generally invoiced in U.S. dollars, the fees are based on the investment product's assets, a large majority of which are invested in securities denominated in currencies other than the U.S. dollar. Accordingly, declines in such other currencies against the U.S. dollar will decrease the fees payable to us under such licenses. In addition, declines in such currencies against the U.S. dollar could impact the attractiveness of such investment products resulting in net fund outflows, which would further reduce the fees payable under such licenses.

We generally invoice our clients in U.S. dollars; however, we invoice a portion of our clients in Euros, British pounds sterling, Japanese yen and a limited number of other non-U.S. dollar currencies. For the six months ended June 30, 2014 and 2013, approximately 15.5% and 15.7% of our total revenues, respectively, were invoiced in currencies other than U.S. dollars. For the six months ended June 30, 2014, 53.8% of our foreign currency revenues were in Euros, 24.1% were in British pounds sterling and 11.5% were in Japanese yen. For the six months ended June 30, 2013, 55.0% of our foreign currency revenues were in Euros, 21.7% were in Japanese yen and 13.0% were in British pounds sterling.

We are exposed to additional foreign currency risk in certain of our operating costs. Approximately \$159.5 million, or 44.2%, and \$137.9 million, or 42.8%, of our total operating costs for the six months ended June 30, 2014 and 2013, respectively, were denominated in foreign currencies, the significant majority of which were denominated in British pounds sterling, Euros, Indian rupees, Swiss francs, Hungarian forints, Hong Kong dollars, and Mexican pesos. Expenses incurred in foreign currency may increase as we expand our business outside the U.S.

We have certain monetary assets and liabilities denominated in currencies other than local functional amounts and when these balances were remeasured into their local functional currency, either a gain or a loss resulted from the change of the value of the functional currency as compared to the originating currencies. We manage foreign currency exchange rate risk, in part, through the use of derivative financial instruments comprised principally of forward contracts on foreign currency which are not designated as hedging instruments for accounting purposes. The objective of the derivative instruments is to minimize the income statement impact

associated with intercompany loans that are denominated in certain foreign currencies. As a result of these positions, we recognized total foreign currency exchange losses of \$1.6 million for the six months ended June 30, 2014 and 2013. These amounts were recorded in Other expense (income), net in our Unaudited Condensed Consolidated Statements of Income.

Interest Rate Sensitivity

We had unrestricted cash and cash equivalents totaling \$683.2 million at June 30, 2014 and \$358.4 million at December 31, 2013, respectively. These amounts were held primarily in checking and money market accounts in the countries where we maintain banking relationships. The unrestricted cash and cash equivalents are held for working capital purposes. We do not enter into investments for trading or speculative purposes. We believe that we do not have any material exposure to changes in fair value as a result of changes in interest rates. Declines in interest rates, however, will reduce future interest income.

Borrowings under the 2012 Term Loan bear interest at a rate equal to the sum of LIBOR and a margin of 2.25%, which margin will be subject to adjustment based on our leverage ratio. As of June 30, 2014, the 2012 Term Loan, as amended, bore interest at 2.40%. Assuming an average of \$792.3 million of variable rate debt outstanding, a hypothetical 100 basis point increase in LIBOR for a one year period would result in approximately \$7.9 million of additional interest rate expense.

Item 4. Controls and Procedures

Our Chief Executive Officer and Chief Financial Officer have evaluated our disclosure controls and procedures, as defined in Rule 13a-15(e) or 15d-15(e) of the Securities Exchange Act of 1934, as amended, (the Exchange Act), as of June 30, 2014, and have concluded that these disclosure controls and procedures are effective to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time specified in the SEC's rules and forms. These disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by us in the reports we file or submit is accumulated and communicated to management, including the Chief Executive Officer and the Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of the end of the period covered by this report.

There have been no changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the three months ended June 30, 2014 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II**Item 1. Legal Proceedings**

Various lawsuits, claims and proceedings have been or may be instituted or asserted against the Company, which arise in the ordinary course of business. While the amounts claimed could be substantial, the ultimate liability cannot now be determined because of the considerable uncertainties that exist. Therefore, it is possible that MSCI's business, operating results, financial condition or cash flows in a particular period could be materially affected by certain contingencies. However, based on facts currently available, management believes that the disposition of matters that

are currently pending or asserted will not, individually or in the aggregate, have a material effect on MSCI's business, operating results, financial condition or cash flows.

Item 1A. Risk Factors

For a discussion of the risk factors affecting the Company, see Risk Factors in Part I, Item 1A of our Annual Report on Form 10-K for the fiscal year ended December 31, 2013.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

There have been no unregistered sales of equity securities.
