#### MANAGED DISTRIBUTION POLICY DISCLOSURE

The MFS Charter Income Trust s (the fund) Board of Trustees adopted a managed distribution policy. The fund seeks to pay monthly distributions based on an annual rate of 8.00% of the fund s average monthly net asset value. The primary purpose of the managed distribution policy is to provide shareholders with a constant, but not guaranteed, fixed minimum rate of distribution each month. You should not draw any conclusions about the fund s investment performance from the amount of the current distribution or from the terms of the fund s managed distribution policy. The Board may amend or terminate the managed distribution policy at any time without prior notice to fund shareholders. The amendment or termination of the managed distribution policy could have an adverse effect on the market price of the fund s shares.

With each distribution, the fund will issue a notice to shareholders and an accompanying press release which will provide detailed information regarding the amount and composition of the distribution and other related information. The amounts and sources of distributions reported in the notice to shareholders are only estimates and are not being provided for tax reporting purposes. The actual amounts and sources of the amounts for tax reporting purposes will depend upon the fund s investment experience during its fiscal year and may be subject to changes based on tax regulations. The fund will send you a Form 1099-DIV for the calendar year that will tell you how to report these distributions for federal income tax purposes. Please refer to Tax Matters and Distributions under Note 2 of the Notes to Financial Statements for information regarding the tax character of the fund s distributions.

Under a managed distribution policy the fund may at times distribute more than its net investment income and net realized capital gains; therefore, a portion of your distribution may result in a return of capital. A return of capital may occur, for example, when some or all of the money that you invested in the fund is paid back to you. Any such returns of capital will decrease the fund s total assets and, therefore, could have the effect of increasing the fund s expense ratio. In addition, in order to make the level of distributions called for under its managed distribution policy, the fund may have to sell portfolio securities at a less than opportune time. A return of capital does not necessarily reflect the fund s investment performance and should not be confused with yield or income. The fund s total return in relation to changes in net asset value is presented in the Financial Highlights.

### LETTER FROM THE EXECUTIVE CHAIRMAN

Dear Shareholders:

Most markets have proved resilient over the past year, despite uncertainty accompanying a new presidential administration in the United States and unease over

ongoing negotiations between the United Kingdom and the European Union regarding Brexit. U.S. share prices have reached new highs in recent months although the U.S. Federal Reserve has continued to gradually hike interest rates and has begun to shrink its balance sheet.

Globally, we ve experienced a synchronized upturn in economic growth for more than a year. Despite the improvement in economic activity, there are few immediate signs of worrisome inflation amid muted wage gains around the world. Emerging market economies have been boosted in part by a weaker

U.S. dollar and are recovering despite lingering concerns over the potential for restrictive U.S. trade policies. Commodity markets have recovered somewhat in response to solid global demand and robust global trade, though not enough to rekindle inflation fears.

At MFS®, we believe having a disciplined, long-term investment approach through a full market cycle is essential to capturing the best opportunities while also managing risk. In our view, such a strategy, along with the professional guidance of a financial advisor, will help you reach your investment objectives.

Respectfully,

#### Robert J. Manning

#### **Table of Contents**

Portfolio Composition continued

- (a) For all securities other than those specifically described below, ratings are assigned to underlying securities utilizing ratings from Moody s, Fitch, and Standard & Poor s rating agencies and applying the following hierarchy: If all three agencies provide a rating, the middle rating (after dropping the highest and lowest ratings) is assigned; if two of the three agencies rate a security, the lower of the two is assigned. Ratings are shown in the S&P and Fitch scale (e.g., AAA). Securities rated BBB or higher are considered investment grade. All ratings are subject to change. U.S. Government includes securities issued by the U.S. Department of the Treasury. Federal Agencies includes rated and unrated U.S. Agency fixed-income securities, U.S. Agency mortgage-backed securities, and collateralized mortgage obligations of U.S. Agency mortgage-backed securities. Not Rated includes fixed income securities, including fixed income futures contracts, which have not been rated by any rating agency. Non-Fixed Income includes any equity securities (including convertible bonds and equity derivatives) and/or commodity-linked derivatives. The fund may or may not have held all of these instruments on this date. The fund is not rated by these agencies.
- (d) Duration is a measure of how much a bond s price is likely to fluctuate with general changes in interest rates, e.g., if rates rise 1.00%, a bond with a 5-year duration is likely to lose about 5.00% of its value due to the interest rate move.
- (i) For purposes of this presentation, the components include the value of securities, and reflect the impact of the equivalent exposure of derivative positions, if any. These amounts may be negative from time to time. Equivalent exposure is a calculated amount that translates the derivative position into a reasonable approximation of the amount of the underlying asset that the portfolio would have to hold at a given point in time to have the same price sensitivity that results from the portfolio s ownership of the derivative contract. When dealing with derivatives, equivalent exposure is a more representative measure of the potential impact of a position on portfolio performance than value. The bond component will include any accrued interest amounts.
- (m) In determining an instrument s effective maturity for purposes of calculating the fund s dollar-weighted average effective maturity, MFS uses the instrument s stated maturity or, if applicable, an earlier date on which MFS believes it is probable that a maturity-shortening device (such as a put, pre-refunding or prepayment) will cause the instrument to be repaid. Such an earlier date can be substantially shorter than the instrument s stated maturity.
- (o) Less than 0.1%.

Where the fund holds convertible bonds, they are treated as part of the equity portion of the portfolio.

Cash & Cash Equivalents includes any cash, investments in money market funds, short-term securities, and other assets less liabilities. Please see the Statement of Assets and Liabilities for additional information related to the fund s cash position and other assets and liabilities.

From time to time Cash & Cash Equivalents may be negative due to borrowings for leverage transactions and/or timing of cash receipts.

Other includes equivalent exposure from currency derivatives and/or any offsets to derivative positions.

Percentages are based on net assets as of November 30, 2017.

The portfolio is actively managed and current holdings may be different.

3

### MANAGEMENT REVIEW

#### **Summary of Results**

MFS Charter Income Trust (fund) is a closed-end fund. The fund s investment objective is to seek high current income, but may also consider capital appreciation. MFS normally invests the fund s assets primarily in debt instruments. MFS normally invests the fund s assets in corporate bonds of U.S. and/or foreign issuers, U.S. Government securities, foreign government securities, mortgage-backed and other asset-backed securities of U.S. and/or foreign issuers, and/or debt instruments of issuers located in emerging market countries. MFS allocates the fund s assets across these categories with a view toward broad diversification across and within these categories.

For the twelve months ended November 30, 2017, shares of the fund provided a total return of 9.02%, at net asset value and a total return of 9.67%, at market value. This compares with a return of 9.16% for the fund s benchmark, the Bloomberg Barclays U.S. High-Yield Corporate Bond 2% Issuer Capped Index. Over the same period, the fund s other benchmark, the MFS Charter Income Trust Blended Index (Blended Index), generated a return of 6.50%. The Blended Index reflects the blended returns of various fixed income market indices, with percentage allocations to each index designed to resemble the fixed income allocations of the fund. The market indices and related percentage allocations used to compile the Blended Index are set forth in the Performance Summary.

The performance commentary below is based on the net asset value performance of the fund which reflects the performance of the underlying pool of assets held by the fund. The total return at market value represents the return earned by owners of the shares of the fund which are traded publicly on the exchange.

#### **Market Environment**

For the first time in many years, the global economy experienced a period of synchronized economic growth over the reporting period. The rebound in emerging markets (EM) economies was more pronounced (despite the slight deceleration in Chinese growth at the end of the period), helped by larger economies, such as Brazil and Russia, emerging from recessions. At the same time, developed markets (DM) economies continued to grow at or above potential. Market confidence increased in the US during the period fueled, in part, by a more lenient US regulatory backdrop and hopes for a significant cut in corporate tax rates.

Globally, markets benefited from a reflation trade as commodity prices strengthened, activity and growth prospects improved, and inflation moved higher, though within moderate bounds. As a result, there were more tightening signals and actions by DM central banks. The US Federal Reserve (Fed) increased interest rates by 25 basis points three times during the period, bringing the total number of quarter-percent hikes in the federal funds rate to four, since December 2015. The European Central Bank announced an extension of its quantitative easing program at the end of the period, but reduced the pace of its monthly asset purchases by half. In addition, the Bank of England hiked its base rate for the first time in a decade, near the end of the period. Markets were comforted, along with central banks, by the decline in fears of a populist surge in Europe after establishment candidates won the Dutch and French

4

#### **Table of Contents**

Management Review continued

elections, though a right-wing populist party gained seats in the German parliament for the first time in the post-World War II era. Additionally, European growth reflected a generally calmer political economic backdrop.

In recent months, the US dollar reversed the sharp rise seen early in the period, easing what had been a substantial headwind to earnings for multinationals. US consumer spending held up well during the second half of the period amid a modest increase in real wages and relatively low gasoline prices. However, demand for autos cooled from the record level logged early in the period, while the housing market improved, albeit constrained by below-average inventory levels. Global trade, which was sluggish early in the period, showed signs of improvement in the period is second half, a positive indicator of global economic activity and prospects. Early in the period, there was a selloff in EM due to fears that President Trump would follow through on various campaign threats and promises that were judged to be detrimental to EM. While President Trump withdrew the US from the Trans-Pacific Partnership and began the renegotiation of the North American Free Trade Agreement, significant additional policy action was lacking on economic issues involving EM. As a result, EM resumed their upward trajectory, powered by strong inflows throughout 2017.

10-Year US Treasury yields exhibited quite a bit of volatility during the reporting period, reaching as high as 2.62% in March 2017, and as low as 2.05% in September 2017, before finishing the reporting period essentially unchanged from one year ago. The increase in yields was driven by optimism over the potential for stronger US growth in the wake of the US presidential election, as well as signs of improving global growth, and a modest improvement in oil prices, which investors felt could lead to a reflationary environment. However, yields declined subsequent to March 2017 as investors priced in a lower likelihood of fiscal stimulus, and little indication of higher inflation led markets to believe that the Fed would be dovish, or more gradual, in normalizing policy. US Treasury yields then rose during the latter part of the reporting period as the Fed signaled that it viewed the low inflationary environment as temporary, and that further increases in the Fed Funds rate were likely, and that the Fed would likely begin unwinding its balance sheet in the fall as well.

#### **Factors Affecting Performance**

Relative to the Blended Index, the fund s lesser exposure to *sovereign* bonds held back relative performance. Additionally, the fund s exposure to *commercial mortgage-backed securities (CMBS)*, which are not held by the benchmark, weakened relative returns.

Conversely, the fund s greater allocation to the *industrials* sector and a lesser allocation to the *treasury* sector, contributed to relative performance. The fund s greater exposure to BB rate about the position within the *government-related agencies* and *treasury* sectors, also bolstered relative results. Security selection in CCC rated securities, specifically within the *industrials* sector, further benefited relative performance. The fund s shorter-than-benchmark duration stance, particularly in the long end of the curve, was another factor that supported relative returns as rates generally rose during the reporting period.

The fund employs leverage which has been created through the use of loan agreements with a bank. To the extent that investments are purchased through the use

5

#### **Table of Contents**

Management Review continued

of leverage, the fund s net asset value will increase or decrease at a greater rate than a comparable unleveraged fund. During the reporting period, the fund s use of leverage positively impacted performance.

Respectfully,

Portfolio Manager(s)

Richard Hawkins, Robert Spector, William Adams, Ward Brown, David Cole, Pilar Gomez-Bravo, Joshua Marston, Robert Persons, Matt Ryan, and Erik Weisman

- (d) Duration is a measure of how much a bond s price is likely to fluctuate with general changes in interest rates, e.g., if rates rise 1.00%, a bond with a 5-year duration is likely to lose about 5.00% of its value.
- (r) Bonds rated BBB, Baa, or higher are considered investment grade; bonds rated BB, Ba, or below are considered non-investment grade. The source for bond quality ratings is Moody's Investors Service, Standard & Poor's and Fitch, Inc. and are applied using the following hierarchy: If all three agencies provide a rating, the middle rating (after dropping the highest and lowest ratings) is assigned; if two of the three agencies rate a security, the lower of the two is assigned. Ratings are shown in the S&P and Fitch scale (e.g., AAA). For securities which are not rated by any of the three agencies, the security is considered Not Rated. The views expressed in this report are those of the portfolio manager(s) only through the end of the period of the report as stated on the cover and do not necessarily reflect the views of MFS or any other person in the MFS organization. These views are subject to change at any time based on market or other conditions, and MFS disclaims any responsibility to update such views. These views may not be relied upon as investment advice or an indication of trading intent on behalf of any MFS portfolio. References to specific securities are not recommendations of such securities, and may not be representative of any MFS portfolio s current or future investments.

### PERFORMANCE SUMMARY THROUGH 11/30/17

The following chart presents the fund s historical performance in comparison to its benchmark(s). Investment return and principal value will fluctuate, and shares, when sold, may be worth more or less than their original cost; current performance may be lower or higher than quoted. The performance shown does not reflect the deduction of taxes, if any, that a shareholder would pay on fund distributions or the sale of fund shares. Performance data shown represents past performance and is no guarantee of future results.

#### **Table of Contents**

Performance Summary continued

(w) As of November 30, 2017, the MFS Charter Income Trust Blended Index was comprised of 42% Bloomberg Barclays U.S. High-Yield Corporate Bond 2% Issuer Capped Index, 20% Bloomberg Barclays U.S. Government/Mortgage Bond Index, 15.2% Citigroup World Government Bond Non-Dollar Hedged Index, 12.8% JPMorgan Emerging Markets Bond Index Global, and 10% Bloomberg Barclays U.S. Credit Bond Index.

#### **Benchmark Definition(s)**

Bloomberg Barclays U.S. Credit Bond Index a market capitalization-weighted index that measures the performance of publicly issued, SEC-registered, U.S. corporate and specified foreign debentures and secured notes that meet specified maturity, liquidity, and quality requirements.

Bloomberg Barclays U.S. Government/Mortgage Bond Index measures debt issued by the U.S. Government, and its agencies, as well as mortgage-backed pass-through securities of Ginnie Mae (GNMA), Fannie Mae (FNMA), and Freddie Mac (FHLMC).

Bloomberg Barclays U.S. High-Yield Corporate Bond 2% Issuer Capped Index a component of the Bloomberg Barclays U.S. High-Yield Corporate Bond Index, which measures performance of non-investment grade, fixed rate debt. The index limits the maximum exposure to any one issuer to 2%.

Citigroup World Government Bond Non-Dollar Hedged Index a market capitalization-weighted index that is designed to represent the currency-hedged performance of the international developed government bond markets, excluding the United States.

JPMorgan Emerging Markets Bond Index Global measures the performance of U.S. dollar-denominated debt instruments issued by emerging market sovereign and quasi-sovereign entities: Brady bonds, loans, Eurobonds.

It is not possible to invest directly in an index.

### **Notes to Performance Summary**

The fund s shares may trade at a discount or premium to net asset value. When fund shares trade at a premium, buyers pay more than the net asset value underlying fund shares, and shares purchased at a premium would receive less than the amount paid for them in the event of the fund s concurrent liquidation.

The fund s monthly distributions may include a return of capital to shareholders to the extent that the fund s net investment income and net capital gains, determined in accordance with federal income tax regulations, are insufficient to meet the fund s target annual distribution rate. Distributions that are treated for federal income tax purposes as a return of capital will reduce each shareholder s basis in his or her shares and, to the extent the return of capital exceeds such basis, will be treated as gain to the shareholder from a sale of shares. It may also result in a recharacterization of what economically represents a return of capital to ordinary income in those situations where a fund has long term capital gains and a capital loss carryforward. Returns of shareholder capital may have the effect of reducing the fund s assets and increasing the fund s expense ratio.

8

#### **Table of Contents**

Performance Summary continued

The fund s target annual distribution rate is calculated based on an annual rate of 8.00% of the fund s average monthly net asset value, not a fixed share price, and the fund s dividend amount will fluctuate with changes in the fund s average monthly net assets.

Net asset values and performance results based on net asset value per share do not include adjustments made for financial reporting purposes in accordance with U.S. generally accepted accounting principles and may differ from amounts reported in the Statement of Assets and Liabilities or the Financial Highlights.

From time to time the fund may receive proceeds from litigation settlements, without which performance would be lower.

In accordance with Section 23(c) of the Investment Company Act of 1940, the fund hereby gives notice that it may from time to time repurchase shares of the fund in the open market at the option of the Board of Trustees and on such terms as the Trustees shall determine.

10

### DIVIDEND REINVESTMENT AND CASH PURCHASE PLAN

The fund offers a Dividend Reinvestment and Cash Purchase Plan (the Plan) that allows common shareholders to reinvest either all of the distributions paid by the fund or only the long-term capital gains. Generally, purchases are made at the market price unless that price exceeds the net asset value (the shares are trading at a premium). If the shares are trading at a premium, purchases will be made at a price of either the net asset value or 95% of the market price, whichever is greater. You can also buy shares on a quarterly basis in any amount \$100 and over. The Plan Agent will purchase shares under the Cash Purchase Plan on the 15th of January, April, July, and October or shortly thereafter.

If shares are registered in your own name, new shareholders will automatically participate in the Plan, unless you have indicated that you do not wish to participate. If your shares are in the name of a brokerage firm, bank, or other nominee, you can ask the firm or nominee to participate in the Plan on your behalf. If the nominee does not offer the Plan, you may wish to request that your shares be re-registered in your own name so that you can participate. There is no service charge to reinvest distributions, nor are there brokerage charges for shares issued directly by the fund. However, when shares are bought on the New York Stock Exchange or otherwise on the open market, each participant pays a pro rata share of the transaction expenses, including commissions. Dividends and capital gains distributions are taxable whether received in cash or reinvested in additional shares the automatic reinvestment of distributions does not relieve you of any income tax that may be payable (or required to be withheld) on the distributions.

If your shares are held directly with the Plan Agent, you may withdraw from the Plan at any time by going to the Plan Agent s website at www.computershare.com/investor, by calling 1-800-637-2304 any business day from 9 a.m. to 5 p.m. Eastern time or by writing to the Plan Agent at P.O. Box 43078, Providence, RI 02940-3078. Please have available the name of the fund and your account number. For certain types of registrations, such as corporate accounts, instructions must be submitted in writing. Please call for additional details. When you withdraw from the Plan, you can receive the value of the reinvested shares in one of three ways: your full shares will be held in your account, the Plan Agent will sell your shares and send the proceeds to you, or you may transfer your full shares to your investment professional who can hold or sell them. Additionally, the Plan Agent will sell your fractional shares and send the proceeds to you.

If you have any questions or for further information or a copy of the Plan, contact the Plan Agent Computershare Trust Company, N.A. (the Transfer Agent for the fund) at 1-800-637-2304, at the Plan Agent s website at www.computershare.com/investor, or by writing to the Plan Agent at P.O. Box 43078, Providence, RI 02940-3078.
