GENERAL

This Information Statement is being furnished to the shareholders of China Jianye Fuel, Inc. (the "Company") in connection with the proposed amendment to the Certificate of Incorporation of the Company to effectuate a reverse stock split of our issued and outstanding Common Stock by changing and reclassifying each one hundred (100) shares of our issued and outstanding common stock, par value \$0.001 per share ("Common Stock") into one (1) fully paid and non-assessable share of Common Stock (the "Reverse Split" or "Amendment"). This Information Statement has been prepared by our management.

"We," "us," "our," the "Registrant" and the "Company" refers to China Jianye Fuel, Inc., a Delaware corporation. The amendment to the Company's Certificate of Incorporation is sometimes referred to as the "Amendment".

SUMMARY OF CORPORATE ACTIONS

On February 21, 2011, our Board of Directors and the holder of a majority of the Company's Common Stock approved the amendment to the Company's Certificate of Incorporation which will authorize the Amendment. The Amendment was approved by written consent of the shareholders holding approximately 76% of our outstanding Common Stock (the "Majority Shareholders"). Pursuant to the Delaware General Corporation Law, the Amendment is required to be approved by a majority of our shareholders. This approval could be obtained either by the written consent of the holders of a majority of our issued and outstanding voting securities, or it could be considered by our shareholders at a special shareholders' meeting convened for the specific purpose of approving the Amendment. The Company's voting securities consist of Common Stock. Each share of Common Stock is entitled to one vote per share on any matter requiring shareholder vote. In order to eliminate the costs and management time involved in holding a special meeting, our Board of Directors voted to utilize the written consent of the Majority Shareholders. The elimination of the need for a meeting of shareholders to approve this action is made possible by Section 228 of the Delaware General Corporation Law, as may be amended, which provides that the written consent of the holders of a majority of the outstanding shares of voting capital stock, having no less than the minimum number of votes which would be necessary to authorize or take such action at a meeting at which all shares entitled to vote thereon were present.

As of February 21, 2011, there were 29,976,923 issued and outstanding shares of our Common Stock.

The date on which this Information Statement was first sent to shareholders is on or about March \_\_, 2011 (the "Mailing Date"). Inasmuch as we will have provided this Information Statement to our shareholders of record as of the record date of February 21 2011 ("Record Date") no additional action will be undertaken pursuant to such written consent. Shareholders of record on the Record Date who did not consent to the Amendment are not entitled to

dissenter's rights under Delaware law.

The Amendment will be effective twenty (20) days after this Information Statement is first mailed to our shareholders. No further vote of our shareholders is required.

ACTION BY THE BOARD OF DIRECTORS

In accordance with Section 141 and 228 of the Delaware General Corporation Law, the following actions were taken based upon the approval of the Company's Board of Directors and the written consent of majority of the shareholders of the Company's Common Stock. No Appraisal Rights for the Amendment

Under Delaware law, the Company's shareholders are not entitled to appraisal rights with respect to the Amendment and the Company will not independently provide shareholders with any such right.

AMENDMENT TO THE CERTIFICATE OF INCORPORATION

AMENDMENT TO OUR CERTIFICATE OF INCORPORATION TO EFFECTUATE A 1-FOR-100 REVERSE STOCK SPLIT

The Board of Directors has determined that it will be in the best interest of the shareholders to effectuate a reverse stock split of our issued and outstanding Common Stock by changing and reclassifying each one hundred (100) shares of our issued and outstanding Common Stock ("Old Shares") into one (1) fully paid and non-assessable share of Common Stock ("New Shares") ("Reverse Stock Split") for the purposes stated herein.

The Board of Directors believes that the low per-share market price of the Company's Common Stock impairs the acceptability of the Common Stock to potential acquisition candidates, certain members of the investing public, including institutional investors, as well adversely affecting our ability to raise additional working capital. Because of the current low price of the Company's Common Stock, the Company's credibility as a viable business enterprise is negatively impacted. No assurance exists that any positive impact in these or other matters will result from the proposed action. Further, given the history of the Company to undertake such stock splits from time to time, there is no assurance that the Company will not continue to undertake such actions.

In addition, the Board believes that the Reverse Stock Split and anticipated increase per share price of our Common Stock should also enhance the acceptability and marketability of the Common Stock to the financial community and investing public. Many institutional investors have policies prohibiting them from holding lower-priced stocks in their portfolios, which reduces the number of potential buyers of our Common Stock. Additionally, analysts at many

brokerage firms are reluctant to recommend lower-priced stocks to their clients or monitor the activity of lower-priced stocks. Brokerage houses also frequently have internal practices and policies that discourage individual brokers from dealing in lower-priced stocks due to, among other reasons, the trading volatility often associated with lower-priced stocks. Some of those policies and practices may function to make the processing of trades in low-priced stocks economically unattractive to brokers. Further, because brokers' commissions on lower-priced stock generally represent a higher percentage of the stock price than commissions on higher priced stock, investors in lower-priced stocks pay transaction costs which are a higher percentage of their total share value, which may limit the willingness of individual investors and institutions to purchase our Common Stock. It should be noted that the liquidity of our Common Stock may be adversely affected by the proposed Reverse Stock Split given the reduced number of shares that will be outstanding after the Reverse Stock Split. The Board of Directors is hopeful, however, that the anticipated higher market price will reduce, to some extent, the negative effects on the liquidity and marketability of the Common Stock inherent in some of the policies and practices of institutional investors and brokerage houses described above. No assurance exists that the opinions of the Company will prove correct.

The Reverse Stock Split will also have the effect of increasing the number of shares of Common Stock available to us for future issuances as the split will not change the number of authorized shares of our Common Stock which will remain at 200,000,000 shares. On February 21, 2011, there were 29,976,923 shares of Common Stock issued and outstanding.

For these reasons the Board of Directors has chosen to adopt and recommend the Reverse Stock Split. The Company is not, however, a party to any binding agreement, acquisition agreement or agreement to raise additional working capital other than which has been publicly announced, nor can we be certain that the Reverse Split will have a long-term positive effect on the market price of the Common Stock or increase the Company's abilities to enter into financing arrangements in the future.

The Reverse Split will affect all of the holders of our Common Stock uniformly. Any fractional shares existing as a result of the Reverse Split shall be rounded to the next higher whole number to those shareholders who are entitled to receive them as a consequence of the Reverse Split. On the effective date of the Reverse Stock Split, each shareholder will own a reduced number of shares of our Common Stock, but will hold the same percentage of the outstanding Common Stock as the shareholder held prior to the Effective Date. The Reverse Stock Split will increase the number of shareholders who own odd-lots. An odd-lot is fewer than 100 shares. Such shareholders may experience an increase in the cost of selling their shares and may have greater difficulty in making sales.

The Reverse Stock Split will not affect the par value of the Common Stock. As a result, on the effective date of the reverse Split (the "Split Effective Date"), the stated capital on the Company's balance sheet attributable to Common Stock will be reduced in proportion with the Reverse Stock Split and additional paid-in capital account will be credited with the amount by which the stated capital is reduced. These accounting entries will have no impact on total shareholders' equity. All share and per share information will be retroactively adjusted following the Split Effective Date to reflect the Reverse Stock Split for all periods presented in future filings.

The availability of additional authorized shares will also allow the Board to issue shares for corporate purposes, if appropriate opportunities should arise, without further action by the shareholders or the time delay involved in obtaining shareholder approval (except to the extent that approval is otherwise required by applicable law). Such purposes could include meeting requirements for capital expenditures or working capital or, depending on the market conditions, effecting future acquisitions of other businesses through the issuance of shares of our Common Stock or securities convertible into shares of our Common Stock.

#### Anti-Takeover Effects of the Reverse Stock Split

Because the Reverse Stock Split results in a decreased number of issued and outstanding shares of the Company's Common Stock, it may be construed as having an anti-takeover effect. Although the Reverse Stock Split is not being undertaken by the Board for this purpose, in the future the Board could, subject to its fiduciary duties and applicable law, use the increased number of authorized but unissued shares to frustrate persons seeking to take over or otherwise gain control of our company by, for example, privately placing shares with purchasers who might side with the Board in opposing a hostile takeover bid. Shares of Common Stock could also be issued to a holder that would thereafter have sufficient voting power to assure that any proposal to amend or repeal the Company's Bylaws or certain provisions of the Company's Certificate of Incorporation would not receive the requisite vote. Such uses of the Company's Common Stock could render more difficult, or discourage, an attempt to acquire control of the Company if such transactions were opposed by the Board of Directors. However, it is also possible that an indirect result of the anti-takeover effect of the Reverse Stock Split could be that shareholders will be denied the opportunity to obtain any advantages of a hostile takeover, including, but not limited to, receiving a premium to the then current market price of our Common Stock, if the same was so offered by a party attempting a hostile takeover of our company. We are not aware of any party's interest in or efforts to engage in a hostile takeover attempt as of the date of this Information

Statement.

### Summary of the Reverse Stock Split

The Reverse Stock Split will have the following effects upon the Common Stock:

1. The number of shares owned by each holder of Common Stock will be reduced ten fold;
2. The number of shares of Common Stock which will be issued and outstanding after the Reverse Stock Split will be reduced from 29,976,923 shares of our Common Stock to approximately 299,769 shares, subject to rounding.
3. 199,700,231 shares of Common Stock reserved for issuance (assuming that there are 200,000,000 shares of common stock authorized); and
4. 1,000,000 shares of Preferred Stock reserved for issuance.
5. The per share loss and net book value of the Common Stock will be increased because there will be a lesser number of shares of our Common Stock outstanding;
6. The par value of the Common Stock will remain \$0.001 per share;
7. The stated capital on the Company's balance sheet attributable to the Common Stock will be decreased one hundred (100) times its present amount and the additional paid-in capital account will be credited with the amount by which the stated capital is decreased; and
8. All outstanding options, warrants, and convertible securities entitling the holders thereof to purchase shares of Common Stock will enable such holders to purchase, upon exercise thereof, one hundred (100) times fewer of the number of shares of Common Stock which such holders would have been able to purchase upon exercise thereof immediately preceding the Reverse Stock Split, at the same aggregate price required to be paid therefore upon exercise thereof immediately preceding the Reverse Stock Split.
9. Because the market price of the Common Stock is also based on factors which may be unrelated to the number of shares outstanding, including our performance, general economic and market conditions and other factors, many of which are beyond our control, the market price per new share of the New Shares may not rise or remain constant in proportion to the reduction in the number of Old Shares outstanding before the Reverse Stock Split. Accordingly, the total market capitalization of Common Stock after the Reverse Stock Split may be lower than the total market capitalization before the Reverse Stock Split. In the future, the market price of Common Stock following the Reverse Stock Split may not equal or exceed the market price prior to the Reverse Stock Split. In many cases, the total market capitalization of a company following a Reverse Stock Split is lower than the total market capitalization before the Reverse Stock Split.

There are currently no proposals or arrangements, written or otherwise, to issue additional shares of our Common Stock at this time. However, should we issue additional shares of stock in the future, this could have the effect of diluting the earnings per share and book value per share of existing shares of Common Stock.
