COROWARE, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 – BASIS OF PRESENTATION

The accompanying unaudited interim consolidated financial statements of CoroWare, Inc. (“CoroWare” or “the Company”) have been prepared in accordance with accounting principles generally accepted in the United States of America and the rules of the Securities and Exchange Commission (“SEC”), and should be read in conjunction with the audited financial statements and notes thereto contained in the Company’s annual report filed with the SEC on Form 10-K for the year ended December 31, 2014. The consolidated financial statements include the accounts of the Company and its wholly-owned operating subsidiary, CoroWare Technologies, Inc. Also included in the consolidated statements are the Company’s inactive wholly-owned subsidiaries, Innova Robotics, Inc., Robotic Workspace Technologies, Inc., and Robotics Software Service, Inc. (herein referred to as the “Subsidiaries”). The Company also consolidates its 51% interest in Aricon, LLC. All significant inter-company balances and transactions have been eliminated in the consolidated financial statements. In the opinion of management, all adjustments consisting of normal recurring adjustments necessary for a fair presentation of financial position and the results of operations for the interim periods presented have been reflected herein. The results of operations for interim periods are not necessarily indicative of the results to be expected for the full year. Notes to the financial statements which would substantially duplicate the disclosure contained in the audited consolidated financial statements for the most recent fiscal year ended December 31, 2014 as reported in Form 10-K have been omitted.

NOTE 2 – CONDENSED FINANCIAL STATEMENTS

The accompanying financial statements have been prepared by the Company without audit. In the opinion of management, all adjustments (which include only normal recurring adjustments) necessary to present fairly the financial position, results of operations, and cash flows at March 31, 2015, and for all periods presented herein, have been made.

Certain information and footnote disclosures normally included in the financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted. It is suggested that these condensed financial statements be read in conjunction with the financial statements and notes thereto included in the Company’s June 30, 2014 audited financial statements. The results of operations for the periods ended March 31, 2015 and March 31, 2014 are not necessarily indicative of the operating results for the full years.

NOTE 3 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Recent Accounting Pronouncements

Management does not expect the impact of any other recently issued accounting pronouncements to have a material impact on its financial condition or results of operations.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the dates of the financial statements and reported amounts of revenue and expenses during the reporting periods. Significant estimates are made in relation to the allowance for doubtful accounts and fair value of certain financial instruments.

Reclassifications

Certain immaterial items have been reclassified in prior periods presented to conform to current year presentation.

Revenue Recognition

The Company derives its software system integration services revenue from short-duration, time and material contracts. Generally, such contracts provide for an hourly-rate and a stipulated maximum fee. Revenue is recorded only on executed arrangements as time is incurred on the project and as materials, which are insignificant to the total contract value, are expended. Revenue is not recognized in cases where customer acceptance of the work product is necessary, unless sufficient work has been performed to ascertain that the performance specifications are being met and the customer acknowledges that such performance specifications are being met. The Company periodically review contractual performance and estimate future performance requirements. Losses on contracts are recorded when estimable. No contractual losses were identified during the periods presented.

The Company recognizes revenue for its software and software professional services when persuasive evidence of an arrangement exists, delivery has occurred, the sales price is fixed or determinable and collectability is probable. Product sales are recognized by us generally at the time product is shipped. Shipping and handling costs are included in cost of goods sold.

The Company accounts for arrangements that contain multiple elements in accordance with FASB ASC 605-25, Revenue Recognition, Multiple Element Arrangements. When elements such as hardware, software and consulting services are contained in a single arrangement, or in related arrangements with the same customer, the Company allocates revenue to each element based on its relative fair value, provided that such element meets the criteria for treatment as a separate unit of accounting. The price charged when the element is sold separately generally determines fair value. In the absence of fair value for a delivered element, the Company allocates revenue first to the fair value of the underlying elements and allocate the residual revenue to the delivered elements. In the absence of fair value for an undelivered element, the arrangement is accounted for as a single unit of accounting, resulting in a delay of revenue recognition for the delivered elements until the undelivered elements are fulfilled.

Basic and Diluted Loss per Share

Basic loss per share is calculated by dividing the Company's net loss applicable to shareholders by the weighted average number of shares outstanding during the period. Diluted loss per share is calculated by dividing the Company's net loss available to shareholders by the diluted weighted average number of shares outstanding during the year. The diluted weighted average number of shares outstanding is adjusted for any potentially dilutive debt or equity instruments. As of March 31, 2015 and December 31, 2014, there were 74,731,390,127 and 71,221,788,387 common stock equivalents outstanding, respectively, which were excluded from the calculation of diluted loss per unit as their effect would have been anti-dilutive.

Accounts Receivable

The Company's accounts receivable are exposed to credit risk. During the normal course of business, the Company extends unsecured credit to its customers with normal and traditional trade terms. Typically credit terms require payments to be made by the thirtieth day following the sale. The Company regularly evaluates and monitors the creditworthiness of each customer. The Company provides an allowance for doubtful accounts based on our continuing evaluation of its customers' credit risk and its overall collection history. The Company had an allowance balance of \$2,000 at March 31, 2015 and December 31, 2014.

Inventories

Inventories, which are comprised solely of finished goods, are stated at the lower of cost (based on the first-in, first-out method) or market. The Company provides for estimated losses from obsolete or slow-moving inventories, and writes down the cost of inventory at the time such determinations are made. Reserves are estimated based upon inventory on hand, historical sales activity, industry trends, the business environment and the expected net realizable value. The net realizable value is determined based upon current awareness of market prices.

Inventories consist of the following:

	March 31, 2015	December 31, 2014
Raw materials	\$ -	\$ -
Work in process	-	-
Finished goods	4,664	5,515
Subtotal	4,664	5,515
Less: Inventory reserve	-	-
Inventory, net	\$ 4,664	\$ 5,515

NOTE 4 – CONCENTRATION OF CREDIT RISK

Sales to the Company's single largest customer approximated 99% and 87% of total sales for the three month periods ended March 31, 2015 and March 31, 2014, respectively. This same customer had accounts receivable balances of 86% and 90% of total accounts receivable as of March 31, 2015 and December 31, 2014, respectively.

NOTE 5 – PROPERTY AND EQUIPMENT

Property and Equipment

Property and equipment are recorded at cost. Expenditures for major renewals and improvements are capitalized while expenditures for minor replacements, maintenance and repairs are expensed as incurred. Depreciation is calculated using the straight-line method over the estimated useful lives of the assets. Upon retirement or disposal of assets, the accounts are relieved of cost and accumulated depreciation and the related gain or loss, if any, is reflected in loss on disposal of assets in the consolidated statement of income and comprehensive income.

Property and equipment consists of the following at March 31, 2015 and December 31, 2014:

	December 31, 2014	December 31, 2013
Computer equipment and software	\$ 108,687	\$ 102,710
Furniture and fixtures	7,862	7,862
Subtotal	116,549	110,572
Less: accumulated depreciation	(96,015)	(92,995)
Property and equipment, net	\$ 20,534	\$ 17,577

NOTE 6 – FINANCIAL CONDITION AND GOING CONCERN

The Company has a loss from operations for the three months ended March 31, 2015 of \$1,314,691. Because of this loss, the current working capital deficit, and the projection of additional losses for the remainder of 2015, the Company will require additional working capital to develop its business operations.

The Company intends to raise additional working capital through the use of public offerings and/or related party financings.

There are no assurances that the Company will be able to either (1) achieve a level of revenues adequate to generate sufficient cash flow from operations; or (2) obtain additional financing through either private placements, public offerings, bank financing and/or related party financing necessary to support the Company's working capital requirements. To the extent that funds generated from operations, any private placements, public offerings, bank financing and/or related party financings are insufficient, the Company will have to raise additional working capital. No assurance can be given that additional financing will be available or, if available, will be on terms acceptable to the Company.

These conditions raise substantial doubt about the Company's ability to continue as a going concern. The consolidated financial statements do not include any adjustments relating to the recoverability and classification of asset carrying amounts or the amount and classification of liabilities that might be necessary should the Company be unable to continue as a going concern.

NOTE 7 – ACCOUNTS RECEIVABLE FACTORING

On March 21, 2010, the Company established a \$200,000 factoring line with an asset-based lender, CapeFirst Funding, LLC (“Capefirst”) that is secured by accounts receivable that the Lender may accept and purchase from the Company. The agreement calls for Capefirst to advance up to 80% of the net face amount of each assigned account or up to 50% of eligible assigned purchase orders. The agreement calls for a maximum facility amount of \$200,000 with a purchase fee of 2% of the net face amount of each assigned account and a collection fee of 0.1% compounded daily. In the event of a dispute or in the event of fraud, misrepresentation, willful misconduct or negligence on the part of the Company, Capefirst may require the Company to immediately repurchase the assigned accounts at a purchase price that includes the amount of the assigned account plus the discount fee, interest and collection fee and may include a processing fee of 10%. The combined net balance due to Capefirst as of March 31, 2015 and December 31, 2014 was \$63,338 and \$84,274, respectively. Factor expense charged to operations for the three months ended March 31, 2015 and 2014 amounted to \$14,450 and \$5,189, respectively.

The Company has adopted the FASB’s amended authoritative guidance which was issued in June 2009 and which became effective January 1, 2010 as it relates to distinguishing between transfers of financial assets that are sales from transfers that are secured borrowings. Under this new guidance as adopted by the Company effective January 1, 2010, the reporting of the sale of accounts receivable is treated as a secured borrowing rather than as a sale. As a result, affected accounts receivable are reported under Current Assets within the Company’s balance sheet as “Trade receivables” subject to reserves for doubtful accounts, returns and other allowances. Similarly, the net liability owing to Capefirst appears as “obligations collateralized by receivables” within the current liabilities section of the Company’s balance sheet. Net proceeds received from the sale of accounts receivable appear as cash provided or used by financing activities within the Company’s consolidated statements of cash flows. Early adoption of this amended guidance was not permitted. Under the authoritative guidance in effect prior to the amended guidance noted above, after a transfer of financial assets, an entity recognizes the financial and servicing assets it controls and liabilities it has incurred, derecognizes financial assets when control has been surrendered, and derecognizes liabilities when extinguished.

NOTE 8 - CONVERTIBLE DEBT

The following table reconciles the activity of the Company’s convertible notes payable for the three months ended March 31, 2015:

		Gross Convertible Notes Payable	Discounts on Convertible Notes Payable	Net Convertible Notes Payable
Balance as of December 31, 2014		\$ 2,588,887	\$ (18,825)	\$ 2,570,062
Additions from new convertible notes issued for cash	(1)	20,625	(9,050)	11,575
Assignment of accrued interest and other debt to convertible notes	(2)	188,356	-	188,356
Conversion of principal on convertible notes to common stock		-	-	-
Accretion of debt discount to interest expense		-	15,678	15,678
Balance as of March 31, 2015		\$ 2,797,868	\$ (12,197)	\$ 2,785,671

- (1) On January 7, 2015 the Company entered into a \$20,625 Convertible Note Agreement with LG Capital. The \$20,525 is the gross amount of the note as \$16,500 was received in cash due to an original issuance discount of \$4,125 on the note which is being amortized to interest expense over the life of the note. The note calls for 12% interest through the maturity date of January 7, 2016, and is convertible into common shares of the Company any time after 180 days after execution at a conversion price of 45 percent of the lowest closing bid price of the stock for the 20 prior trading days, including the date of conversion.
- (2) On March 12, 2015 the Company entered into two Convertible Note Agreements with Cariou totaling \$188,356 (\$94,178 each) for settlement of compensation owed as well as penalties and interest. The note is convertible into the Company's common stock at a conversion rate of the average of the five day trading days prior the applicable conversion date. The note calls for 12% interest through the maturity date of September 12, 2015. Typically, these other notes payable were either purchased by one of several investors in the company who purchased notes from third parties or the accrued interest was converted into convertible notes. The notes had the embedded conversion features with fair values in excess of the face value and for those notes, the combined excess fair value, charged to interest expense, was \$24,791.

The following table illustrates the carrying value of convertible debt:

Lender Name	March 31, 2015	December 31, 2014
AGS Capital Group, LLC	\$ 91,905	\$ 91,905
Barclay Lyons, LLC	10,750	10,750

Less: Current portion of convertible debt	(2,785,671)	(2,570,062)
Long term portion of convertible debt	\$ -	\$ -

NOTE 9 – RELATED PARTY TRANSACTIONS

As of March 31, 2015 and December 31, 2014, the Company had notes due to related parties of \$182,916 and \$186,134, respectively. The Company is currently accruing interest on these loans at a rate of 18% per annum. Total accrued interest related to related party loans was \$171,722 and \$163,603 as of March 31, 2015 and December 31, 2014, respectively. Related party interest amounts are included in accrued expenses related party on the balance sheet. The March 31, 2015 and December 31, 2014 accrued expenses – related party balances also includes Board of Director fees payable in the amount \$15,969.

NOTE 10 – DERIVATIVE LIABILITY

Effective July 31, 2009, the Company adopted ASC 815 which defines determining whether an instrument (or embedded feature) is solely indexed to an entity's own stock. The conversion price of certain convertible notes and exercise price of certain warrants are variable and subject to the fair value of the Company's units on the date of conversion or exercise. As a result, the Company has determined that the conversion and exercise features are not considered to be solely indexed to the Company's own stock and is therefore not afforded equity treatment. In accordance with ASC 815, the Company has bifurcated the conversion and exercise features of the instruments to be recorded as a derivative liability.

ASC 815 requires Company management to assess the fair market value of certain derivatives at each reporting period and recognize any change in the fair market value as items of other income or expense. The Company's only asset or liability measured at fair value on a recurring basis is its derivative liability associated with convertible notes payable and warrants.

Several of the convertible notes are in default, however, the terms of the agreements allow conversion of the debt during periods of default. In computing the derivative liability associated with the conversion, one of the inputs is maturity of the instruments which, in this case, is technically in the past. Accordingly, management has estimated a debt maturity date of December 31, 2017 for purposes of the derivative liability calculations. During the three months ended March 31, 2015 the Company realized a derivative expense of \$762,039.

COROWARE, INC.
Notes to the Consolidated Financial Statements
December 31, 2014 and 2013

NOTE 11 – DERIVATIVE LIABILITY (CONTINUED)

At origination and subsequent revaluations, the Company valued the derivative liabilities using the Black-Scholes options pricing model under the following assumptions:

	March 31, 2015	December 31, 2014
Risk-free interest rate	0.05% – 0.89 %	1.37% - 1.75 %
Expected options life	0.75 – 2.76	1.00 – 5.00
Expected dividend yield	–	–
Expected price volatility	274% – 507 %	137% – 205 %

NOTE 12 – NOTES PAYABLE

	March 31, 2015	December 31, 2014
Notes payable – merger	\$ 50,000	\$ 50,000
Notes payable – shareholders	109,500	109,500
Notes payable – third parties	45,000	45,000
Notes payable - Yorkville	37,500	37,500
Other notes payable	52,502	32,582
Total	\$ 294,502	\$ 274,582

During the period ended March 31, 2015, the Company entered into two additional loan agreements with a third party lending institution, each for \$10,000. The first note was entered on January 23, 2015 and is due on February 1, 2017. The second note was entered on February 22, 2015 and is due on March 1, 2017. Each note bears interest at 149% per annum. The note dated January 23, 2015 was paid in full July 24, 2015.

NOTE 13 - STOCKHOLDERS' DEFICIT

a) Stock Options:

The following table summarizes stock option activity:

	Total Options
Outstanding, December 31, 2014	38,164
Granted	-
Cancelled	-
Forfeited	-

Edgar Filing: CoroWare, Inc, - Form 10-Q

Exercised	-
Outstanding, March 31, 2015	38,164
Exercisable at March 31, 2015	38,164

-13-

The following table summarizes information about stock options and warrants as of March 31, 2015:

Range of Exercise Prices	Options and Warrants Outstanding			Options and Warrants Exercisable	
	Number Outstanding	Weighted Average Remaining Contractual Life (in years)	Weighted Average Exercise Price	Number Exercisable	Weighted Average Exercise Price
\$ 1 to \$69	38,164	1.12	\$ 3.60	38,164	\$ 3.60
	38,164	1.12	\$ 3.60	38,164	\$ 3.60

b) Dividends

At March 31, 2015 and December 31, 2014, there were cumulative undeclared dividends to Preferred Series B shareholders of \$71,852, respectively, the obligation for which is contingent on declaration by the board of directors.

c) Series A Preferred Stock

The Company has authorized 125,000 shares of Series A Preferred Stock. Each share of Series A Preferred Stock (i) pays a dividend of 5%, payable at the discretion of the Company in cash or common stock, (ii) is convertible immediately after issuance into the Company's common stock at the lesser of \$0.005 per share or 75 percent of the average closing bid prices over the 20 trading days immediately preceding the date of conversion, (iii) has a liquidation preference of \$1.00 per share, (iv) may be redeemed by the Company at any time up to five years after the issuance date for \$1.30 per share plus accrued and unpaid dividends, and (v) has no voting rights except when mandated by Delaware law. There were no shares of Series A Preferred Shares outstanding at any time during the periods ended March 31, 2015 and December 31, 2014.

d) Series B Preferred Stock

The Company has authorized 525,000 shares of Series B Preferred Stock. Each share of Series B Preferred Stock (i) pays a dividend of 5 percent, payable at the discretion of the Company in cash or common stock, (ii) is convertible immediately after issuance into the Company's common stock at the lesser of \$15 per share or 75 percent of the average closing bid prices over the 20 trading days immediately preceding the date of conversion, (iii) has a liquidation preference of \$1.00 per share, and (iv) may be redeemed by the Company at any time up to five years.

Based upon the Company's evaluation of the terms and conditions of the Series B Preferred Stock, the embedded conversion feature related to the preferred stock was afforded the exemption as a conventional convertible instrument due to certain variabilities in the conversion price, and met the conditions for equity classification. However, the Company is required to bifurcate the embedded conversion feature and carry it as a derivative liability.

The Company estimated the fair value of the compound derivative using a common stock equivalent and the current share price of the Company's common stock. As a result of this estimate, the Company's valuation model resulted in a compound derivative balance associated with the Series B preferred stock of \$212,888 as of March 31, 2015 and December 31, 2014, respectively. This amount is included as a current liability on the Company's balance sheet.

There were 159,666 and 159,666 shares of Series B Preferred Stock issued and outstanding as of March 31, 2015 and December 31, 2014, respectively.

e) Series C Preferred Stock

The Company is authorized to issue 500,000 shares of Series C Preferred Stock. During 2007, the Company initiated a private offering under Regulation D of the Securities Act of 1933 (the "Private Offering"), of an aggregate 500,000 units (collectively referred to as the "Units") at a price of \$1.00 (one dollar) per unit, with each unit consisting of one share of Series C Convertible Preferred Stock. Each unit is convertible at the lesser of eighty five percent (85%) of the average closing bid price of the Common Stock over the twenty (20) trading days immediately preceding the date of conversion or \$0.04, and stock purchase warrants equal to the number of shares of common stock converted from the Series C Convertible Preferred Stock, exercisable at \$0.06 per share and which expire five (5) years from the conversion date. There were no shares of Series C Preferred Shares outstanding at any time during the periods ended March 31, 2015 and 2014.

f) Series D Preferred Stock

The Company has authorized 500,000 shares of Series D Preferred Stock. During 2007, the Company initiated a private offering under Regulation D of the Securities Act of 1933 (the "Private Offering"), of an aggregate 500,000 units (collectively referred to as the "Units") at a price of \$1.00 (one dollar) per unit, with each unit consisting of one share of Series D Convertible Preferred Stock at the lesser of eighty five percent (85%) of the average closing bid price of the Common Stock over the twenty (20) trading days immediately preceding the date of conversion or \$0.04 and stock purchase warrants equal to the number of shares of common stock converted from the Series D Convertible Preferred Stock, exercisable at \$0.06 per share and which expire five (5) years from the conversion date.

Based upon the Company's evaluation of the terms and conditions of the Series D Preferred Stock, the embedded conversion feature related to the preferred stock was afforded the exemption as a conventional convertible instrument due to certain variabilities in the conversion price, and met the conditions for equity classification. However, the Company is required to bifurcate the embedded conversion feature and carry it as a derivative liability.

The Company estimated the fair value of the compound derivative using a common stock equivalent and the current share price of the Company's common stock. As a result of this estimate, the Company's valuation model resulted in a compound derivative balance associated with the Series D Preferred Stock of \$100,000 as of March 31, 2015 and December 2014, respectively. This amount is included as a current liability on the Company's balance sheet.

There were 100,000 and 100,000 shares of Series D Preferred Stock issued and outstanding as of March 31, 2015 and December 31, 2014, respectively.

g) Preferred Stock, Series E:

On March 9, 2012 the Board approved by unanimous written consent an amendment to the Corporation's Certificate of Incorporation to designate the rights and preferences of Series E Preferred Stock. There are 1,000,000 shares of Series E Preferred Stock authorized with a par value of \$0.001. Each share of Series E Preferred Stock has a stated value equal to \$1.00 and shall be entitled to receive dividends at the rate of 5% per annum on the stated value before dividends are declared on any other outstanding shares of stock of the Company. These preferred shares rank higher than the common shares and pari passu with all other classes of preferred stock. Each outstanding share of Series E Preferred Stock shall be convertible into the number of shares of the Corporation's common stock determined by dividing the Stated Value by the Conversion Price which is defined as \$0.0001. Mandatory conversion can be demanded by the Company prior to October 1, 2013. The holders of the Series E Preferred Stock shall have no voting power.

Based upon the Company's evaluation of the terms and conditions of the Series E Preferred Stock, the embedded conversion feature related to the preferred stock was afforded the exemption as a conventional convertible instrument due to certain variabilities in the conversion price, and met the conditions for equity classification. However, the Company is required to bifurcate the embedded conversion feature and carry it as a derivative liability.

The Company estimated the fair value of the compound derivative using a common stock equivalent and the current share price of the Company's common stock. As a result of this estimate, the Company's valuation model resulted in a compound derivative balance associated with the Series E Preferred Stock of \$789,084 as of March 31, 2015 and 2014, respectively. This amount is included as a current liability on the Company's balance sheet

There were 798,084 shares of Series E Preferred Stock issued and outstanding as of March 31, 2015 and December 31, 2014, respectively.

h) Preferred Stock, Series F:

On October 4, 2013, the Company filed the certificate of designation pursuant to which the Company set forth the designation, powers, rights, privileges, preferences and restrictions of 500,000 authorized shares of Series F Convertible Preferred Stock, par value \$0.001 per share.

The shares of preferred stock have a stated value of \$1.00, have no voting rights, are entitled to no dividends due or payable and are convertible into the number of shares of the Corporation's common stock determined by dividing the stated value by the conversion price which is defined as eighty five percent (85%) of the average closing bid price of the common stock over the five (5) trading days immediately preceding the date of conversion, but no less than par value of the common stock. At any time after the issuance date through the fifth (5th) anniversary of the issuance of the preferred stock, the Company shall have the option to redeem any unconverted shares at an amount equal to one hundred thirty percent (130%) of the stated value of the stock plus accrued and unpaid dividends, if any. Redemption shall be established by the Company in its sole and absolute discretion and no holder of Series F Preferred Stock may demand that the Series F Preferred Stock be redeemed.

Based upon the Company's evaluation of the terms and conditions of the Series F Preferred Stock, the embedded conversion feature related to the preferred stock was afforded the exemption as a conventional convertible instrument due to certain variabilities in the conversion price, and met the conditions for equity classification. However, the Company is required to bifurcate the embedded conversion feature and carry it as a derivative liability.

The Company estimated the fair value of the compound derivative using a common stock equivalent and the current share price of the Company's common stock. As a result of this estimate, the Company's valuation model resulted in a compound derivative balance associated with the Series F Preferred Stock of \$190,000 as of March 31, 2015 and December 31, 2014, respectively.

There were 190,000 shares of Series F Preferred Stock issued and outstanding as of March 31, 2015 and December 31, 2014, respectively.

i) Preferred Stock, Series G:

On April 17, 2014, the Company filed the certificate of designation pursuant to which the Company set forth the designation, powers, rights, privileges, preferences and restrictions of 500,000 authorized shares of Series G Convertible Preferred Stock, par value \$0.001 per share.

The shares of preferred stock have a stated value of \$1.00, have voting rights equal to 5,000,000 votes of common stock, are entitled to no dividends due or payable, are non-redeemable and are convertible into the number of shares of the Corporation's common stock determined by dividing the stated value by the conversion price which is defined as eighty five percent (85%) of the average closing bid price of the common stock over the twenty (20) trading days immediately preceding the date of conversion, but no less than par value of the common stock.

Based upon the Company's evaluation of the terms and conditions of the Series G Preferred Stock, the embedded conversion feature related to the preferred stock was afforded the exemption as a conventional convertible instrument due to certain variabilities in the conversion price, and met the conditions for equity classification. However, the Company is required to bifurcate the embedded conversion feature and carry it as a derivative liability.

The Company estimated the fair value of the compound derivative using a common stock equivalent and the current share price of the Company's common stock. As a result of this estimate, the Company's valuation model resulted in a compound derivative balance associated with the Series G Preferred Stock of \$25,000 as of March 31, 2015 and December 31, 2014, respectively. This amount is included as a current liability on the Company's balance sheet.

There were 25,000 shares of Series G preferred stock issued and outstanding as of March 31, 2015 and December 31, 2014, respectively.

j) Reverse split:

On January 3, 2014, the Company effected a one-for-two hundred (1:200) reverse split of the Company's Common Stock. All common share amounts within this document have been adjusted to reflect this change.

NOTE 14 – FAIR VALUE MEASUREMENTS

For assets and liabilities measured at fair value, the Company uses the following hierarchy of inputs:

- Level one – Quoted market prices in active markets for identical assets or liabilities:
- Level two – Inputs other than level one inputs that are either directly or indirectly observable: and
- Level three – Unobservable inputs developed using estimates and assumptions, which are developed by the reporting entity and reflect those assumptions that a market participant would use.

Liabilities measured at fair value on a recurring basis at March 31, 2015, are summarized as follows:

	Level 1	Level 2	Level 3	Total
Fair value of derivatives	\$ -	\$ 7,416,338	\$ -	\$ -

Liabilities measured at fair value on a recurring basis at December 31, 2014, are summarized as follows:

	Level 1	Level 2	Level 3	Total
Fair value of derivatives	\$ -	\$ 6,432,768	\$ -	\$ -

NOTE 15 – SUBSEQUENT EVENTS

Management has evaluated subsequent events according to the requirements of ASC Topic 855, and has determined that there were no material reportable subsequent events to be disclosed other than those outlined below.

a) Notes Payable

During the period ended June 30, 2015, the Company entered into two loan agreements, each for \$10,000. The first note was entered on January 23, 2015 and is due on February 1, 2017. The second note was entered on February 22, 2015 and is due on March 1, 2017. Each note bears interest at 149% per annum. The note dated January 23, 2015 was paid in full July 24, 2015.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This report contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. These statements relate to future events or our future financial performance. In some cases, you can identify forward-looking statements by terminology such as "may" "should," "expect," "plan," "anticipate," "believe," "estimate," "predict," "potential" or "continue," the negative of such terms, or other comparable terminology. These statements are only predictions. Actual events or results may differ materially from those in the forward-looking statements as a result of various important factors. Although we believe that the expectations reflected in the forward-looking statements are reasonable, they should not be regarded as a representation by CoroWare, Inc., or any other person, that such expectations will be achieved. The business and operations of CoroWare, Inc. are subject to substantial risks, which increase the uncertainty inherent in the forward-looking statements contained in this report.

BACKGROUND

CoroWare, Inc is a public holding company whose principal subsidiary, CoroWare Technologies, Inc. ("CTI"), has expertise in information technology consulting, mobile robotics, and affordable collaboration. Through our subsidiary, CoroWare delivers custom engineering services, hardware and software products, and subscription services that benefit customers in North America, Europe, Australia, Asia and the Middle East. Our customers span multiple industry sectors and comprise universities, large enterprises and small businesses, software and hardware product development companies, and non-profit organizations. The company also maintains a Near Shore practice which is comprised of multiple subcontracting companies with whom the Company maintains close working relationships. Through these relationships, the Company is able to provide services in South America.

COROWARE TECHNOLOGIES, INC.

CTI is a software professional services company with a strong focus on Information Technology integration and robotics integration, business automation solutions, and unmanned systems solutions to its customers in North America and Europe.

CTI's expertise includes the deployment and integration of computing platforms and applications, as well as the development of unmanned vehicle software and solutions for customers in the research, commercial, and homeland security market segments. CTI shall continue to offer its high value software systems development and integration services that complement the growing trend in outsourced software development services in Asia, Latin America, and Eastern Europe.

CoroWare Technologies comprises three separately managed lines of business:

- CoroWare Business Solutions : IT and lab management; business intelligence; software architecture, design and development; content delivery; partner and program management.
- Robotics and Automation : Custom engineering such as visualization, simulation and software development; and mobile robot platforms.
- Enhanced Collaboration Solution : Collaboration and conferencing products, solutions and subscription services.

The Company's revenues are principally derived from standing contracts that include Microsoft (partner management and IT professional services), a European auto manufacturer (simulation software custom development), and other customers whose product development groups require custom software development and consulting companies. Existing contract revenues vary month by month based on the demands of the clients. The Company's collaboration effort is in the early stages of growth and will require additional working capital to compete effectively against new

entrants in this rapidly growing market.

-18-

RESULTS OF OPERATIONS

THREE MONTHS ENDED MARCH 31, 2015 COMPARED TO THREE MONTHS ENDED MARCH 31, 2014:

During the three-month period ended March 31, 2015 (the "2015 Period") revenues were \$798,541 compared to revenues of \$291,538 during the three-month period ended March 31, 2014 (the "2014 Period"). Our revenues increased substantially compared to the previous year as customers continued to increase spending on software development services for IT consulting and software development projects. In addition, the Company is a preferred vendor to its single largest customer. This preferred vendor status has increased revenue due to the Company's single largest customer narrowing its vendor list, which has provided more work for the Company.

Cost of revenues was \$572,062 for the 2015 Period compared to \$232,556 for the 2014 Period. Cost of revenues represents primarily labor and labor-related costs in addition to overhead costs. Gross profit on these 2015 revenues amounted to \$226,479 (28% gross profit percentage) compared to \$58,982 (20% gross profit percentage) for the 2014 Period. The increased gross profit percentage resulted from increased labor utilization for service delivery personnel.

Research and development was \$20,328 for the 2015 Period compared to \$16,569 in the 2014 Period. The increased research and development investment resulted from completing our software development and testing initiatives related to robotics software product development.

Operating expenses were \$415,171 during the 2015 Period compared to \$182,785 during the 2014 Period. General and Administration expenses increased to \$371,805 in the 2015 Period compared to \$156,744 for the 2014 Period as the Company increased its administration compensation and public company expenses. Sales and marketing expenses increased to \$20,018 in the 2015 Period compared to \$7,389 for the 2014 Period as the Company refocused its sales and marketing efforts on selling IT consulting and software development services. Loss from operations was \$188,692 during the 2015 Period compared to \$123,803 in the 2014 Period.

Total other expense was \$1,125,999 during the 2015 Period compared to other income of \$2,655,862 in the 2014 Period. Other income is comprised primarily of derivative income and expense as well as interest expense. Keeping the number of shares constant, the liability associated with the embedded conversion features increases as our share price and volatility increases and, likewise, decreases when our share price and share price volatility decreases. Derivative income (expense) displays the inverse relationship. The derivative expense in the 2015 Period is primarily due to expense recognized in connection with derivative valuation losses on various debentures. Interest expense for the three month 2015 Period is \$147,354 compared to \$888,744 for the three month 2014 Period. The debt discount amortized using the effective interest method was \$15,678 during 2015 compared to \$33,386 during 2014. Under this method, the amount of amortization increases exponentially as the underlying carrying value of the amortized debt increases.

Net Loss for the 2015 Period was \$1,134,691 compared to net income of \$2,776,872 for the 2014 Period.

Basic weighted average shares outstanding were 8,414,278,152 during the 2015 Period compared to 330,631,438 in the 2014 Period. There is no fully diluted calculation for the Periods presented as the effect would be anti-dilutive.

LIQUIDITY AND CAPITAL RESOURCES

At March 31, 2015, we had current assets of \$188,408, current liabilities of \$18,328,258, negative working capital of \$18,139,850 and an accumulated deficit of \$51,413,401. For the three months ending March 31, 2015, we had net cash flows provided by operating activities of \$25,383, net cash flows used in investing activities of \$5,977 and net cash flows provided by financing activities of \$10,087.

We will need to obtain additional capital in order to expand operations and become profitable. In order to obtain capital, we may need to sell additional shares of our common stock or borrow funds from private lenders. There can be no assurance that we will be successful in obtaining additional funding. We will still need additional capital in order to continue operations until we are able to achieve positive operating cash flow. Additional capital is being sought, but we cannot guarantee that we will be able to obtain such investments. Financing transactions may include the issuance of equity or debt securities, obtaining credit facilities, or other financing mechanisms. If we do not obtain additional capital, we may cease operations.

However, even if we are able to raise the funds required, it is possible that we could incur unexpected costs and expenses, fail to collect significant amounts owed to us, or experience unexpected cash requirements that would force us to seek alternative financing. Furthermore, if we issue additional equity or debt securities, stockholders may experience additional dilution or the new equity securities may have rights, preferences or privileges senior to those of existing holders of our common stock. If additional financing is not available or is not available on acceptable terms, we will have to curtail our operations.

OFF-BALANCE SHEET ARRANGEMENTS

We do not have any off balance sheet arrangements that are reasonably likely to have a current or future effect on our financial condition, revenues, results of operations, liquidity or capital expenditures.

CONTRACTUAL OBLIGATIONS

The following table sets forth the contractual obligations of the Company as of March 31, 2015:

Contractual Obligations	Total	Payments due by Period			
		Less than 1 year	1-3 years	3-5 years	More than 5 years
Convertible debt, net	\$ 2,785,671	\$ 2,785,671	\$ -	\$ -	\$ -
Notes payable	294,502	294,502	-	-	-
Notes payable, related parties	182,916	182,916	-	-	-
Long-term debt	979,450	-	979,450	-	-
Total	\$ 4,242,539	\$ 3,263,089	\$ 979,450	\$ -	\$ -

EFFECT OF RECENT ACCOUNTING PRONOUNCEMENTS

Refer to Form 10-K for the year ended December 31, 2014.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

As a smaller reporting company, as defined in Rule 12b-2 of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), we are not required to provide the information required by this item.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

With the participation of Lloyd T. Spencer, who serves as the Chief Executive Officer (the principal executive officer) and Interim Chief Financial Officer (the principal financial officer); the Company's management has evaluated the effectiveness of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")), as of the end of the quarterly period covered by this Quarterly Report on Form 10-Q. As of the end of the period covered by this Report, we conducted an evaluation, under the supervision and with the participation of our chief executive officer and interim chief financial officer, of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934). Based on this evaluation, our chief executive officer and interim chief financial officer concluded that our disclosure controls and procedures are not effective to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms. The ineffectiveness of our disclosure controls and procedures is the result of certain deficiencies in internal controls constituting material weaknesses as discussed below.

The Company has historically had limited operating revenue and, as such, all accounting and financial reporting operations have been and are currently performed by a limited number of individuals. The parties that perform the accounting and financial reporting operations are the only parties with any significant knowledge of generally accepted accounting principles. Thus, we lack segregation of duties in the period-end financial reporting process. This lack of additional accounting/auditing staff with significant knowledge of generally accepted accounting principles in order to properly segregate duties could result in ineffective oversight and monitoring and the possibility of a misstatement within the consolidated financial statements. However, the material weaknesses identified did not result in the restatement of any previously reported financial statements or any other related financial disclosure, nor does management believe that it had any effect on the accuracy of the Company's consolidated financial statements for the current reporting period.

The Company is currently reviewing its policies and is evaluating its disclosure controls and procedures so that it will be able to determine the changes it can and should make to make such controls more effective.

Changes in Internal Controls over Financial Reporting

There were no changes in the Company's internal control over financial reporting during the Company's last fiscal quarter that have materially affected, or are likely to materially affect, the Company's internal control over financial reporting.

Part II – OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

None.

ITEM 1A. RISK FACTORS

As a smaller reporting company, as defined in Rule 12b-2 of the Exchange Act, we are not required to provide the information required by this item.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF FUNDS

None.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

- (a) At March 31, 2015, we were in default in payment of interest and/or principal on indebtedness amounting to \$3,070,173.
- (b) As of the balance sheet date the company is in arrears in the payment of dividends related to its Series B preferred stock in the amount of \$71,852.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

ITEM 5. OTHER INFORMATION

ITEM 6. EXHIBITS
