## OPERATING PERFORMANCE

### WIRELINE TELEPHONY

#### Network

By the end of 3Q06, Brasil Telecom's plant had 10.8 million installed lines, of which 8.6 million were in service (Annex XIV and XV).

In 3Q06, Brasil Telecom adopted stricter measures in its collection and charging policy, seeking to improve its subscriber base. These actions were focused on 1,065.7 thousand lines which were blocked and did not generate revenue by the end of 2Q06, leading to the cancellation of 667.5 thousand lines throughout 3Q06. **There are no negative effects for the revenue due to the cancellations in this quarter since these clients were not generating traffic for a few months.**

With its new collection and charging policy, Brasil Telecom will make an intense effort during its **Christmas Campaign for Debt Recognition** for the recovery of 398.2 thousand blocked accesses.

With these cancellations, fixed line ARPU reached R\$71.4 in 3Q06, a 7.3% increase in comparison to the previous quarter, while the utilization rate decreased 7.3 p.p. (79.9% at the end of 3Q06).

#### Traffic

In 3Q06, Brasil Telecom reached **2.2 billion billed pulses**, a 4.0% increase in comparison to 2Q06 (Annex XIII). This performance had a positive contribution by more business days during 3Q06 and a negative contribution by the increase in the ADSL accesses and the migration of fixed calls to mobile calls.

Long distance traffic increased 1.0% in comparison to 2Q06, thus Brasil Telecom **registered 1.4 billion minutes in 3Q06** (Annex XIII). Such increase is explained by more business days in the quarter compensated by an increase in long distance plans which include minutes packages.

**At the end of 3Q06, Brasil Telecom reached a 63.1% market share in the interregional segment and a 37.0% market share in the international segment** (quarterly average). By the end of September, Brasil Telecom's quarterly average long distance market share reached 85.4% in the intra-regional segment, 0.6 p.p. superior than the 84.8% market share registered in 2Q06. In the interregional and international segments, Brasil Telecom achieved market share of 5.7 p.p. and 1.9 p.p., respectively, in 12 months. In the intra-sector segment, Brasil Telecom reached 90.8% market share.

PS: The market shares hereby presented refer to Brasil Telecom's concession area (Region II of the PGO - General Concession Plan).

## **MOBILE TELEPHONY**

**By the end of September, BrT Mobile completed 2 years of operations, consolidating the Company in the mobile telephony market in Region II**, establishing new concepts for the market, such as the Pula-Pula and the converging products and surpassing several relevant landmarks, which are reflected in its main indicators.

**BrT Mobile reached 3,051.0 thousand mobile accesses in service** (Annex XVIII), a net addition of 279.3 thousand accesses in the quarter. This number represents 77.1% of the Company's goal for 2006, of 1,087 thousand net adds. At the end of 3Q06, BrT Mobile's **subscriber base was 10.1% higher than 2Q06** and in comparison with 3Q05, there was a **82.0% increase**.

Throughout 3Q06, BrT Mobile **increased its coverage to 810 localities. Currently, its coverage reaches 87% of the Region's population.**

At the end of September, **our mobile operations had 947.3 thousand post-paid subscribers (representing 31.0% of our customer base)**, which represented the best post-paid mix among the mobile operators present in Brazil.

At the end of 3Q06, **BrT Mobile achieved a 11.4% market share** in its area of operations, compared to 10.7% in 2Q06 and 7.0% in 3Q05 (an excellent result when compared to other 4<sup>th</sup> entrant companies in the world). **BrT Mobile is in third place in terms of market share** in the Federal District and in the states of Acre, Rondônia, Tocantins and Goiás (Annex XIX).

## **DATA**

During 3Q06, **Brasil Telecom added 97.6 thousand accesses to its plant, amounting to 1,252.4 thousand broadband accesses in service by the end of September**, an increase of 8.4% and 40.4% in comparison to 2Q06 and 3Q05, respectively (Annex XIV). ADSL penetration (ADSL/LIS) reached 14.5% in 3Q06, against 12.3% in 2Q06 and 9.3% in 3Q05. This penetration is the highest among incumbents.

**By the end of September, 2006, Brasil Telecom registered growth in the following data transmission services for the corporate market:** (i) Interlan, a solution to connect more than two spots to a concentrating spot, transmitting voice and data, (ii) Vetor, a private virtual network which uses all the capacity of IP connections to form a unique network, complete and flexible, used for data, multimedia and voice transmission, (iii) *Serviço Plus*, which is a data transport service and (iv) ATM, high speed service which offers data transmission through commutation, without network layers.

## **INTERNET SERVICE PROVIDERS**

**Internet Group, Brasil Telecom's internet division, leading company in dial up internet access in the Brazilian market, has approximately 3.1 million active users of dial-up access which, altogether, generated 10.9 billion minutes in 3Q06, a 5.5% growth in comparison to the traffic generated in 2Q06, when it reached 10.4 billion minutes.** Altogether, the three Internet Service Providers have approximately 1.24 million subscribers which pay for services, including broadband accesses and value added services, against 1.09 thousand clients in 2Q06.

**The Internet Group reached 1 million broadband customers in Brazil in the beginning of October 2006 (998 thousand customers by the end of 3Q06).** The position in 3Q06 represents an increase of 13.5% as compared to the 879 thousand broadband clients in 2Q06.

**iBest, the largest dial up ISP in Region II, with an estimated market share of 53.7% in 3Q06,** had 1.4 million active users.

**iG generated 5.5 billion minutes in 3Q06,** as compared to 5.0 billion minutes in the previous quarter, which places it as leading traffic generator in Regions I and III, where most of its 1.9 million active users are concentrated. **iG's broadband subscriber base increased 71% when compared to the same quarter of 2005, reaching 278 thousand clients by the end of 3Q06.** In comparison to 2Q06, iG's broadband subscriber base increased approximately 16%.

**BrTurbo reached 712 thousand clients on Region II by the end of 3Q06, 50.5% and 12% greater in comparison to 3Q05 and 2Q06, respectively.** Approximately 57.3% of Brasil Telecom's broadband accesses were BrTurbo

subscribers, a 1.9 p.p. increase as compared to 2Q06, making it market leader in Region II.

## FINANCIAL PERFORMANCE

### REVENUE

**Brasil Telecom's total gross revenue amounted to R\$3,835.2 million in 3Q06**, 6.0% and 1.8% superior to the revenue registered in 2Q06 and 3Q05, respectively.

**Gross revenue from local service reached R\$1,735.1 million in 3Q06**, 1.9% larger than 2Q06's. The subscription and measured service revenues accounted for 70.4% and VC-1 calls accounted for 28.4% of the total revenue from local service (Annex III).

**In the first quarter, gross revenue from subscription fees totaled R\$871.6 million**, stable in comparison to the R\$871.1 million achieved in 2Q06.

**Gross revenue from measured service totaled R\$350.3 million in the 3Q06**, 4.3% superior to the previous quarter, reflecting 1.7% increase in the exceeding pulses. **In comparison to 3Q05, gross revenues from measured service decreased 12.5%**, due to the traffic reduction, which reached 13.2%.

**Gross revenues with VC-1 calls reached R\$493.3 million in 3Q06**, 3.6% superior than 2Q06, reflecting a 3.1% increase in VC-1 traffic. **In comparison to 3Q05, gross revenues with VC-1 calls were 10.0% inferior**, explained, mainly, by the 11.4% reduction in traffic. Regarding VC-1 traffic, as of the second semester of 2005, we have been observing a trend for reduction, which reflects the aggressive promotional campaigns of mobile operations focused on mobile-mobile traffic.

**Gross revenue with public telephony reached R\$135.5 million in 3Q06**, a 2.3% and 3.3% reduction in comparison with the revenue obtained in 2Q06 and 3Q05, respectively.

**Gross revenue from LD calls reached R\$666.3 million in 3Q06**, representing a reduction of 1.8% in comparison to 2Q06. Although there was a 1.0% increase in LD traffic, the commercialization of plans with minutes packages for long distance calls in the quarter caused the reduction in revenue once these revenue is registered as subscription, not

LD revenue.

**Interconnection revenue in 3Q06 amounted to R\$120.0 million**, a 20.4% increase in comparison to 2Q06 and 17.4% drop in comparison to 3Q05. . The increase in comparison to 2Q06 is explained by the recovery of revenue related to the remuneration for network usage with another telephony operator, while the reduction in comparison to 3Q05 is explained by the interconnection tariff reduction which amounted to 19.1% in January 2006.

**In 3Q06, gross revenue from data communications and other services reached R\$616.1 million, a 9.5% increase as compared to the previous quarter and a 23.6% increase in comparison to 3Q05.** ADSL revenues amounted to R\$270,4 million, representing 43.9% of the total data communications revenues. The growth in network formation services (*Interlan, Vektor, Serviço Plus and ATM*) and a 8.4% expansion in ADSL accesses in service are worth being noted.

**In 3Q06, consolidated gross revenue from mobile telephony totaled R\$375.7 million**, of which R\$309.9 million were related to services and R\$65.7 million to the sale of handsets and accessories. The consolidated gross revenue from mobile telephony ion 3Q06 registered an increase of 44.2% and 106.1% in comparison to 2Q06 and 3Q05, respectively.

In comparison to 2Q06 and 3Q05, respectively, **gross revenues from services with mobile telephony in 3Q06 exceeded in 62.3% and 174.6%, respectively**, due to the increase in the subscriber base and to the effects of Anatel s new regulation (full bill), which established that all calls among mobile operators would be charged (previously only the calls in which the difference in outgoing and incoming traffic was superior to 55%). Gross revenues from the sale of handsets and accessories decreased 5.4% in comparison to 2Q06.

**The blended mobile ARPU in the 3Q06 was of R\$35.6** (Annex XVII). The post-paid ARPU was of R\$45.9 and the pre-paid ARPU was of R\$30.9. In comparison to 2Q06, **the blended mobile ARPU increased 37.0%** affected by the full bill.

**Brasil Telecom's net revenue reached R\$2,628.0 million in 3Q06**, 7.2% and 2.0% larger than the revenue registered in 2Q06 and 3Q05, respectively (Annex III).

## **COSTS AND EXPENSES**

**In 3Q06, operating costs and expenses amounted to R\$2,385.8 million, compared to R\$2,303.3 million in 2Q06 and R\$2,482.4 million in the 3Q05.** The main items that determined such performance were: others (+158.9%), interconnection (+16.9%), subcontracted services (-7.7%) and provisions (-6.2%) (Annex IV).

**At the end of 3Q06, 5,132 employees worked in Brasil Telecom's wireline segment,** against 5,384 employees in the previous quarter. **BrT Mobile ended 3Q06 with 632 employees,** the same number as in the 2Q06. By the end of September, Brasil Telecom had 5,764 employees, **a 4.2% reduction in comparison with June.**

**Total personnel costs and expenses reached R\$156.9 million, a 2.8% reduction as compared to the previous quarter.** This variation is explained by the work force reduction which happened in the first quarter and for the reduction in costs and expenses associated to the work force reduction.

**Costs and expenses with subcontracted services,** excluding interconnection, marketing and advertisement, **totaled R\$529.0 million in 3Q06,** 7.7% inferior to the amount registered in the previous quarter. This decrease can be partially explained by reduction in costs and expenses with legal and call center services.
