Item 1.01 Entry into a Material Definitive Agreement.

On March 23, 2006, Illumina, Inc. entered into a Subscription Agreement for Secured Convertible Debentures with Genizon Biosciences Inc. ("Genizon"), a Canadian company focused on gene discovery. Pursuant to the agreement, Illumina purchased a secured convertible debenture of Genizon for CDN\$3.5 million and certain warrants. Illumina understands Genizon is exclusively using Illumina's Sentrix® HumanHap300 BeadChip along with the Infinium™ assay to perform whole-genome association studies involving thousands of members of the Quebec Founder Population. The goal of the studies is to provide unprecedented understanding of the genetic origins and mechanisms of common diseases which may then lead to possible drug targets.

The debenture is convertible, automatically upon the occurrence of a "liquidity event," as defined in the debenture, into Class H Preferred Shares of Genizon. The debenture matures two years from issuance and bears interest, payable semiannually, at a rate of 5% per annum for the first year and 12.5% per annum for the second year. Unless the debenture is converted before maturity, 112.5% of the principal amount of the debenture is due upon maturity. Illumina also received warrants to purchase 226,721 shares of Genizon Class H Preferred Shares at an exercise price of \$1.5437 per share. Upon the occurrence of certain events, Illumina may be entitled to receive additional shares of Genizon's Class H Preferred Shares. The above description is qualified in its entirety by reference to the forms of Subscription Agreement, Warrant and Secured Convertible Debenture, which Illumina intends to file as an exhibit to its quarterly report on Form 10-Q for the first quarter of 2006.
