CGG-veritas**2008 Market overview and objectives**

Looking forward in 2008 we expect the overall geophysical market to remain robust with about 15% growth worldwide. At CGGVeritas our objective is to grow at least in line with the market. Based on a /\$ exchange rate of 1.45, our operating margin targets are to be above 30% for Sercel and above 20% for Services.

As an outcome of our integration, synergies are expected to reach \$80 million in 2008 and their full impact in 2009. Our net debt to equity ratio objective is to be below 35% by end of 2008.

Within the normal quarterly fluctuations of our business, we expect approximately 2/3 of our fleet to be dedicated to contract work and 1/3 of our fleet to be on highly prefunded multi-client programs with an average amortization rate to remain in the 50% range.

Our continued growth will be supported by an estimated Capex of 170 million (\$250 million) for industrial assets and upgrades and 310 million (\$450 million) for continuing the expansion of our leading marine and land multi-client library including our wide-azimuth programs in the GoM.
