PART I

ITEM 1. Business

General

NIKE, Inc. was incorporated in 1968 under the laws of the state of Oregon. As used in this report, the terms “we,” “us,” “NIKE” and the “Company” refer to NIKE, Inc. and its predecessors, subsidiaries and affiliates, collectively, unless the context indicates otherwise. Our internet address is www.nike.com. On our NIKE Corporate website, located at www.nikeinc.com, we post the following filings as soon as reasonably practicable after they are electronically filed with or furnished to the Securities and Exchange Commission: our annual report on Form 10-K, our quarterly reports on Form 10-Q, our current reports on Form 8-K and any amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities and Exchange Act of 1934, as amended. All such filings on our NIKE Corporate website are available free of charge. Also available on the NIKE Corporate website are the charters of the committees of our board of directors, as well as our corporate governance guidelines and code of ethics; copies of any of these documents will be provided in print to any shareholder who submits a request in writing to NIKE Investor Relations, One Bowerman Drive, Beaverton, Oregon 97005-6453.

Our principal business activity is the design, development and worldwide marketing and selling of athletic footwear, apparel, equipment, accessories and services. NIKE is the largest seller of athletic footwear and athletic apparel in the world. We sell our products to retail accounts, through NIKE-owned retail stores and internet websites (which we refer to as our “Direct to Consumer” operations) and through a mix of independent distributors and licensees, in virtually all countries around the world. Virtually all of our products are manufactured by independent contractors. Virtually all footwear and apparel products are produced outside the United States, while equipment products are produced both in the United States and abroad.

Products

We focus our NIKE Brand and Brand Jordan product offerings in seven key categories: Running, Basketball, Football (Soccer), Men’s Training, Women’s Training, NIKE Sportswear (our sports-inspired lifestyle products), and Action Sports. We also market products designed for kids, as well as for other athletic and recreational uses such as baseball, cricket, golf, lacrosse, outdoor activities, football, tennis, volleyball, walking, and wrestling.

NIKE’s athletic footwear products are designed primarily for specific athletic use, although a large percentage of the products are worn for casual or leisure purposes. We place considerable emphasis on high quality construction and innovation in our products. NIKE Sportswear, Running, Basketball, Football (Soccer), and kids’ shoes are currently our top-selling footwear categories and we expect them to continue to lead in product sales in the near future.

We sell sports apparel and accessories covering most of the above-mentioned categories, which feature the same trademarks and are sold predominantly through the same marketing and distribution channels as athletic footwear. We often market footwear, apparel and accessories in “collections” of similar use or by category. We also market apparel with licensed college and professional team and league logos.

We sell a line of performance equipment under the NIKE Brand name, including bags, socks, sport balls, eyewear, timepieces, digital devices, bats, gloves, protective equipment, golf clubs, and other equipment designed for sports activities. We also sell small amounts of various plastic products to other manufacturers through our wholly-owned subsidiary, NIKE IHM, Inc.

Our wholly-owned subsidiary, Converse Inc. (“Converse”), headquartered in North Andover, Massachusetts, designs, distributes and licenses athletic and casual footwear, apparel and accessories under the Converse®, Chuck Taylor®, All Star®, One Star®, Star Chevron® and Jack Purcell® trademarks.

Our wholly-owned subsidiary, Hurley International LLC (“Hurley”), headquartered in Costa Mesa, California, designs and distributes a line of action sports and youth lifestyle apparel and accessories under the Hurley® trademark.

In addition to the products we sell to our wholesale customers and directly to consumers through our Direct to Consumer operations, we have also entered into license agreements that permit unaffiliated parties to manufacture and sell certain apparel, digital devices and applications and other equipment designed for sports activities.

As part of our long-term growth strategy, we continually evaluate our portfolio of businesses to ensure we are investing in those businesses that are accretive to the NIKE Brand with the largest growth potential and highest returns. On February 1, 2013, and November 30, 2012, we completed the divestitures of the Cole Haan and Umbro businesses, respectively, allowing us to better focus our resources on driving growth in the NIKE, Jordan, Converse and Hurley brands.

Sales and Marketing

Financial information about geographic and segment operations appears in Note 18 — Operating Segments and Related Information of the accompanying Notes to the Consolidated Financial Statements.

We experience moderate fluctuations in aggregate sales volume during the year. Historically, revenues in the first and fourth fiscal quarters have slightly exceeded those in the second and third quarters. However, the mix of product sales may vary considerably as a result of changes in seasonal and geographic demand for particular types of footwear, apparel, and equipment.

Because NIKE is a consumer products company, the relative popularity of various sports and fitness activities and changing design trends affect the demand for our products. We must, therefore, respond to trends and shifts in consumer preferences by adjusting the mix of existing product offerings, developing new products, styles and categories, and influencing sports and fitness preferences through extensive marketing. Failure to respond in a timely and adequate manner could have a material adverse effect on our sales and profitability. This is a continuing risk.

We report our NIKE Brand operations based on our internal geographic organization. Each NIKE Brand geography operates predominantly in one industry: the design, development, marketing and selling of athletic footwear, apparel, equipment, accessories, and services. Our reportable operating

Table of Contents

segments for the NIKE Brand are: North America, Western Europe, Central & Eastern Europe, Greater China, Japan, and Emerging Markets. Our NIKE Brand Direct to Consumer operations are managed within each geographic segment.

United States Market

In fiscal 2013, sales in the United States, including U.S. sales of our Other Businesses, accounted for approximately 45% of total revenues, compared to 42% in both fiscal 2012 and fiscal 2011. Converse and Hurley, our affiliate brands, and NIKE Golf comprise our Other Businesses. We sell to thousands of retail accounts in the United States, including a mix of footwear stores, sporting goods stores, athletic specialty stores, department stores, skate, tennis and golf shops, and other retail accounts. During fiscal 2013, our three largest customers accounted for approximately 25% of sales in the United States.

We make substantial use of our futures ordering program, which allows retailers to order five to six months in advance of delivery with the commitment that their orders will be delivered within a set time period at a fixed price. In fiscal 2013, 87% of our U.S. wholesale footwear shipments (excluding our Other Businesses) were made under the futures program, compared to 86% in fiscal 2012 and 87% in fiscal 2011. In fiscal 2013, 67% of our U.S. wholesale apparel shipments (excluding our Other Businesses) were made under the futures program, compared to 64% in fiscal 2012 and 60% in fiscal 2011.

We utilize NIKE sales offices to solicit sales in the United States as well as independent sales representatives to sell specialty products for golf, skateboarding, and snowboarding. In addition, our Direct to Consumer operations sell NIKE Brand products to consumers through our internet website, www.nike.com, and through the following number of retail stores in the United States:

| U.S. Retail Stores | Number |
|---|------------|
| NIKE Brand factory stores | 171 |
| NIKE Brand in-line stores, including NIKETOWNS and employee-only stores | 33 |
| Converse stores (including factory stores) | 72 |
| Hurley stores (including factory and employee stores) | 27 |
| TOTAL | 303 |

NIKE has five primary distribution centers in the United States located in Memphis, Tennessee, three of which are leased. NIKE Brand apparel and equipment products are also shipped from our Foothill Ranch, California distribution center. Converse and Hurley products are shipped primarily from Ontario, California.

International Markets

In fiscal 2013, non-U.S. sales including non-U.S. sales of our Other Businesses accounted for 55% of total revenues, compared to 58% in both fiscal 2012 and fiscal 2011. We sell our products to retail accounts, through our own Direct to Consumer operations, and through a mix of independent distributors, licensees, and sales representatives around the world. We sell to thousands of retail accounts and operate 16 distribution centers outside of the United States. In many countries and regions, including Canada, Asia, some Latin American countries, and Europe, we have a futures ordering program for retailers similar to the United States futures ordering program described above. During fiscal 2013, NIKE's three largest customers outside of the U.S. accounted for approximately 6% of total non-U.S. sales.

Our Direct to Consumer business operates the following number of retail stores outside the United States:

| Non-U.S. Retail Stores | Number |
|---|------------|
| NIKE Brand factory stores | 388 |
| NIKE Brand in-line stores, including NIKETOWNS and employee-only stores | 59 |
| Converse stores (including factory stores) | 3 |
| TOTAL | 450 |

International branch offices and subsidiaries of NIKE are located in Argentina, Australia, Austria, Belgium, Bermuda, Brazil, Canada, Chile, China, Costa Rica, Croatia, Cyprus, the Czech Republic, Denmark, Finland, France, Germany, Greece, Hong Kong, Hungary, India, Indonesia, Ireland, Israel, Italy, Japan, Korea, Malaysia, Mexico, New Zealand, the Netherlands, Norway, the Philippines, Poland, Portugal, Russia, Singapore, Slovakia, Slovenia, South Africa, Spain, Sri Lanka, Sweden, Switzerland, Taiwan, Thailand, Turkey, the United Arab Emirates, the United Kingdom,

Uruguay and Vietnam.

Significant Customer

No customer accounted for 10% or more of our worldwide net sales during fiscal 2013.

Orders

Worldwide futures orders for NIKE Brand athletic footwear and apparel, scheduled for delivery from June through November 2013, were \$12.1 billion compared to \$11.2 billion for the same period last year. This futures orders amount is calculated based upon our forecast of the actual exchange rates under which our revenues will be translated during this period. Reported futures orders are not necessarily indicative of our expectation of revenues for this period. This is because the mix of orders can shift between futures and at-once orders and the fulfillment of certain of these futures orders may fall outside of the scheduled time period noted above. In addition, foreign currency exchange rate fluctuations as well as differing levels of discounts, order cancellations and returns can cause differences in the comparisons between futures orders and actual revenues. Moreover, a significant portion of our revenue is not derived from futures orders, including at-once and close-out sales of NIKE Brand footwear and apparel, sales of NIKE Brand equipment, sales from our Direct to Consumer operations, and sales from our Other Businesses.

Product Research and Development

We believe our research and development efforts are a key factor in our success. Technical innovation in the design and manufacturing process of footwear, apparel, and athletic equipment receive continued emphasis as NIKE strives to produce products that help to reduce injury, enhance athletic performance and maximize comfort.

In addition to NIKE's own staff of specialists in the areas of biomechanics, chemistry, exercise physiology, engineering, industrial design, sustainability, and related fields, we also utilize research committees and advisory boards made up of athletes, coaches, trainers, equipment managers, orthopedists, podiatrists, and other experts who consult with us and review designs, materials, concepts for product and manufacturing process improvements and compliance with product safety regulations around the world. Employee athletes, athletes engaged under sports marketing contracts and other athletes wear-test and evaluate products during the design and development process.

Manufacturing

Virtually all of our footwear is manufactured outside of the United States by independent contract manufacturers. In fiscal 2013, contract factories in Vietnam, China and Indonesia manufactured approximately 42%, 30%, and 26% of total NIKE Brand footwear, respectively. We also have manufacturing agreements with independent factories in Argentina, Brazil, India, and Mexico to manufacture footwear for sale primarily within those countries. The largest single footwear factory with which we have contracted accounted for approximately 6% of total fiscal 2013 NIKE Brand footwear production. Almost all of NIKE Brand apparel is manufactured outside of the United States by independent contract manufacturers located in 28 countries. Most of this apparel production occurred in China, Vietnam, Thailand, Indonesia, Sri Lanka, Pakistan, Malaysia, Turkey, Mexico, and Cambodia. The largest single apparel factory that we have contracted with accounted for approximately 6% of total fiscal 2013 apparel production. The principal materials used in our footwear products are natural and synthetic rubber, plastic compounds, foam cushioning materials, nylon, leather, canvas, and polyurethane films used to make Air-Sole cushioning components. During fiscal 2013, NIKE IHM, Inc., a wholly-owned subsidiary of NIKE, Inc., with facilities in Beaverton, Oregon and St. Louis, Missouri, as well as independent contractors in China and Vietnam, were our largest suppliers of the Air-Sole cushioning components used in footwear. The principal materials used in our apparel products are natural and synthetic fabrics and threads, plastic and metal hardware, and specialized performance fabrics designed to repel rain and snow, retain heat, or efficiently wick moisture away from the body. NIKE's independent contractors and suppliers buy raw materials in bulk for the manufacturing of our footwear, apparel and equipment products. Most raw materials are available and purchased by those independent contractors and suppliers in the countries where manufacturing takes place. We have thus far experienced little difficulty in satisfying our raw material requirements. Since 1972, Sojitz Corporation of America ("Sojitz America"), a large Japanese trading company and the sole owner of our redeemable preferred stock, has performed significant import-export financing services for us. During fiscal 2013, Sojitz America provided financing and purchasing services for NIKE Brand products sold in Argentina, Uruguay, Canada, Brazil, India, Indonesia, the Philippines, Malaysia, South Africa, Korea, and Thailand, excluding products produced and sold in the same country. Approximately 13% of NIKE Brand sales occurred in those countries. Any failure of Sojitz America to provide these services or any failure of Sojitz America's banks could disrupt our ability to acquire products from our suppliers and to deliver products to our customers in those markets. Such a disruption could

result in canceled orders that would adversely affect sales and profitability. However, we believe that any such disruption would be short-term in duration due to the ready availability of alternative sources of financing at competitive rates. Our current agreements with Sojitz America expire on May 31, 2014.

International Operations and Trade

Our international operations and sources of supply are subject to the usual risks of doing business abroad, such as possible revaluation of currencies, export and import duties, anti-dumping measures, quotas, safeguard measures, trade restrictions, restrictions on the transfer of funds and, in certain parts of the world, political instability and terrorism. We have not, to date, been materially affected by any such risk, but cannot predict the likelihood of such material effects occurring in the future.

In recent years, uncertain global and regional economic conditions have affected international trade and caused a rise in protectionist actions around the world. These trends are affecting many global manufacturing and service sectors, and the footwear and apparel industries, as a whole, are not immune. Companies in our industry are facing trade protectionism in many different regions, and in nearly all cases we are working together with industry groups to address trade issues and reduce the impact to the industry, while observing applicable competition laws.

Notwithstanding our efforts, such protectionist measures, if implemented, could result in increases in the cost of our products, which may in turn adversely affect our sales or profitability as well as the imported footwear and apparel industry as a whole.

We monitor protectionist trends and developments throughout the world that may materially impact our industry and engage in administrative and judicial processes to mitigate trade restrictions. In Brazil, we are actively monitoring for dumping investigations against products from China and other countries that may result in additional anti-dumping measures and could affect our industry. We are also monitoring for and advocating against other impediments that may increase customs clearance times for imports of footwear, apparel and equipment. Moreover, with respect to trade restrictions targeting China, which represents an important sourcing and consumer marketing country for us, we are working with a broad coalition of global businesses and trade associations representing a wide variety of sectors to help ensure that any legislation enacted and implemented (i) addresses legitimate and core concerns, (ii) is consistent with international trade rules, and (iii) reflects and considers China's domestic economy and the important role it has in the global economic community.

Where trade protection measures are implemented, we believe that we have the ability to develop, over a period of time, adequate alternative sources of supply for the products obtained from our present suppliers. If events prevented us from acquiring products from our suppliers in a particular country, our operations could be temporarily disrupted and we could experience an adverse financial impact. However, we believe we could abate any such disruption, and that much of the adverse impact on supply would, therefore, be of a short-term nature, although alternate sources of supply might not be as cost effective and could have an ongoing adverse impact on profitability.

Table of Contents

Competition

The athletic footwear, apparel, and equipment industry is highly competitive in the United States and on a worldwide basis. We compete internationally with a significant number of athletic and leisure footwear companies, athletic and leisure apparel companies, sports equipment companies, and large companies having diversified lines of athletic and leisure footwear, apparel, and equipment, including adidas, V.F. Corp., Puma, Li Ning and Under Armour, among others. We also compete with a number of vertical retailers such as Lululemon and Uniqlo. The intense competition and the rapid changes in technology and consumer preferences in the markets for athletic and leisure footwear and apparel, and athletic equipment, constitute significant risk factors in our operations.

NIKE is the largest seller of athletic footwear, apparel, and equipment in the world. Important aspects of competition in this industry are:

• Product quality; performance and reliability; new product innovation and development; and consumer price/value;
• Consumer connection and affinity for brands and products, developed through marketing and promotion; customer support and service; identification with prominent and influential athletes, coaches, teams, colleges and sports leagues who endorse our brands and use our products; and active engagement through sponsored sporting events and clinics; and
• Effective distribution of products, with attractive merchandising and presentation at retail, in store and online.

We believe that we are competitive in all of these areas.

Trademarks and Patents

We utilize trademarks on nearly all of our products and believe having distinctive marks that are readily identifiable is an important factor in creating a market for our goods, in identifying our brands and the Company, and in distinguishing our goods from the goods of others. We consider our NIKE® and Swoosh Design® trademarks to be among our most valuable assets and we have registered these trademarks in almost 170 jurisdictions. In addition, we own many other trademarks that we utilize in marketing our products. We continue to vigorously protect our trademarks against infringement.

NIKE has an exclusive, worldwide license to make and sell footwear using patented “Air” technology. The process utilizes pressurized gas encapsulated in polyurethane. Some of the early NIKE AIR® patents have expired, which may enable competitors to use certain types of similar technology. Subsequent NIKE AIR® patents will not expire for several years.

We also file and maintain many U.S. and foreign utility patents, as well as many U.S. and foreign design patents covering components, manufacturing techniques and features used in various athletic and leisure footwear, apparel, athletic equipment, digital devices and golf products. These patents expire at various times, and patents issued for applications filed this year in the U.S. will last until 2027 for design patents and until 2033 for utility patents. We believe our success depends primarily upon our capabilities in design, research and development, production, and marketing rather than exclusively upon our patent position. However, we have followed a policy of filing patent applications for the United States and foreign patents on inventions, designs, and improvements that we deem valuable.

Employees

As of May 31, 2013, we had approximately 48,000 employees worldwide, including retail and part-time employees. Management considers its relationship with employees to be excellent. None of our employees are represented by a union, except for certain employees in the Emerging Markets geography, where local law requires those employees to be represented by a trade union. Also, in some countries outside of the United States, local laws require employee representation by works councils (which may be entitled to information and consultation on certain Company decisions) or by organizations similar to a union. In certain European countries, we are required by local law to enter into and/or comply with industry-wide or national collective bargaining agreements. NIKE has never experienced a material interruption of operations due to labor disagreements.

Executive Officers of the Registrant

The executive officers of NIKE, Inc. as of July 19, 2013 are as follows:

Philip H. Knight, Chairman of the Board of Directors — Mr. Knight, 75, a director since 1968, is a co-founder of NIKE and, except for the period from June 1983 through September 1984, served as its President from 1968 to 1990 and from June 2000 to December 2004. Prior to 1968, Mr. Knight was a certified public accountant with Price Waterhouse and Coopers & Lybrand and was an Assistant Professor of Business Administration at Portland State University.

Mark G. Parker, President and Chief Executive Officer — Mr. Parker, 57, was appointed President and Chief Executive Officer in January 2006. He has been employed by NIKE since 1979 with primary responsibilities in product research, design and development, marketing, and brand management. Mr. Parker was appointed divisional Vice President in charge of product development in 1987, corporate Vice President in 1989, General Manager in 1993, Vice President of Global Footwear in 1998, and President of the NIKE Brand in 2001.

David J. Ayre, Executive Vice President, Global Human Resources — Mr. Ayre, 53, joined NIKE as Vice President, Global Human Resources in 2007. Prior to joining NIKE, he held a number of senior human resource positions with PepsiCo, Inc. since 1990, most recently as head of Talent and Performance Rewards.

Donald W. Blair, Executive Vice President and Chief Financial Officer — Mr. Blair, 55, joined NIKE in November 1999. Prior to joining NIKE, he held a number of financial management positions with PepsiCo, Inc., including Vice President, Finance of Pepsi-Cola Asia, Vice President, Planning of PepsiCo's Pizza Hut Division, and Senior Vice President, Finance of The Pepsi Bottling Group, Inc. Prior to joining PepsiCo, Mr. Blair was a certified public accountant with Deloitte, Haskins, and Sells.

Trevor A. Edwards, President, NIKE Brand — Mr. Edwards, 50, joined NIKE in 1992. He was appointed Marketing Manager, Strategic Accounts for Foot Locker in 1993, Director of Marketing for the Americas Region in 1995, Director of Marketing for Europe in 1997, Vice President, Marketing for the Europe, Middle East and Africa Region in 1999, and Vice President, U.S. Brand Marketing in 2000. Mr. Edwards was appointed corporate

Table of Contents

Vice President, Global Brand Management in 2002, Vice President, Global Brand and Category Management in 2006 and President, NIKE Brand in 2013. Prior to NIKE, Mr. Edwards was with the Colgate-Palmolive Company.

Jeanne P. Jackson, President, Product and Merchandising — Ms. Jackson, 61, joined NIKE in 2009. She was appointed President, Direct to Consumer in 2009 and President, Product and Merchandising in 2013. Ms. Jackson also served as a member of the NIKE, Inc. Board of Directors from 2001 through 2009. She founded and served as Chief Executive Officer of MSP Capital, a private investment company, from 2002 to 2009. Ms. Jackson was Chief Executive Officer of Walmart.com from March 2000 to January 2002. She was with Gap, Inc., as President and Chief Executive Officer of Banana Republic from 1995 to 2000, also serving as Chief Executive Officer of Gap, Inc. Direct from 1998 to 2000. Since 1978, she has held various retail management positions with Victoria's Secret, The Walt Disney Company, Saks Fifth Avenue, and Federated Department Stores.

Hilary K. Krane, Executive Vice President, Chief Administrative Officer and General Counsel — Ms. Krane, 49, joined NIKE as Vice President and General Counsel in April 2010. In 2011, her responsibilities expanded and she became Vice President, General Counsel and Corporate Affairs. Ms. Krane was appointed to Executive Vice President, Chief Administrative Officer and General Counsel in 2013. Prior to joining NIKE, Ms. Krane was General Counsel and Senior Vice President for Corporate Affairs at Levi Strauss & Co. from 2006 to 2010. From 1996 to 2006, she was a partner and assistant general counsel at PricewaterhouseCoopers LLP.

Bernard F. Pliska, Vice President, Corporate Controller — Mr. Pliska, 51, joined NIKE as Corporate Controller in 1995. He was appointed Vice President, Corporate Controller in 2003. Prior to NIKE, Mr. Pliska was with Price Waterhouse from 1984 to 1995. Mr. Pliska is a certified public accountant.

John F. Slusher, Executive Vice President, Global Sports Marketing — Mr. Slusher, 44, has been employed by NIKE since 1998 with primary responsibilities in global sports marketing. Mr. Slusher was appointed Director of Sports Marketing for the Asia Pacific and Americas Regions in 2006, divisional Vice President of Asia Pacific & Americas Sports Marketing in September 2007 and Vice President, Global Sports Marketing in November 2007. Prior to joining NIKE, Mr. Slusher was an attorney at the law firm of O'Melveny & Myers from 1995 to 1998.

Eric D. Sprunk, Chief Operating Officer — Mr. Sprunk, 49, joined NIKE in 1993. He was appointed Finance Director and General Manager of the Americas Region in 1994, Finance Director for NIKE Europe in 1995, Regional General Manager of NIKE Europe Footwear in 1998, and Vice President & General Manager of the Americas Region in 2000. Mr. Sprunk was appointed corporate Vice President of Global Footwear in 2001, Vice President of Merchandising and Product in 2009 and Chief Operating Officer in 2013. Prior to joining NIKE, Mr. Sprunk was a certified public accountant with Price Waterhouse from 1987 to 1993.

Table of Contents

ITEM 1A. Risk Factors

Special Note Regarding Forward-Looking Statements and Analyst Reports

Certain written and oral statements, other than purely historical information, including estimates, projections, statements relating to NIKE's business plans, objectives and expected operating results, and the assumptions upon which those statements are based, made or incorporated by reference from time to time by NIKE or its representatives in this report, other reports, filings with the Securities and Exchange Commission, press releases, conferences, or otherwise, are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995 and Section 21E of the Securities Exchange Act of 1934, as amended. Forward-looking statements include, without limitation, any statement that may predict, forecast, indicate, or imply future results, performance, or achievements, and may contain the words "believe," "anticipate," "expect," "estimate," "project," "will be," "will continue," "will likely result" or words or phrases of similar meaning. Forward-looking statements involve risks and uncertainties which may cause actual results to differ materially from the forward-looking statements. The risks and uncertainties are detailed from time to time in reports filed by NIKE with the Securities and Exchange Commission, including Forms 8-K, 10-Q, and 10-K, and include, among others, the following: international, national and local general economic and market conditions; the size and growth of the overall athletic footwear, apparel, and equipment markets; intense competition among designers, marketers, distributors and sellers of athletic footwear, apparel, and equipment for consumers and endorsers; demographic changes; changes in consumer preferences; popularity of particular designs, categories of products, and sports; seasonal and geographic demand for NIKE products; difficulties in anticipating or forecasting changes in consumer preferences, consumer demand for NIKE products, and the various market factors described above; difficulties in implementing, operating, and maintaining NIKE's increasingly complex information systems and controls, including, without limitation, the systems related to demand and supply planning, and inventory control; interruptions in data and information technology systems; data security; fluctuations and difficulty in forecasting operating results, including, without limitation, the fact that advance futures orders may not be indicative of future revenues due to changes in shipment timing, the changing mix of futures and at-once orders, and discounts, order cancellations and returns; the ability of NIKE to sustain, manage or forecast its growth and inventories; the size, timing and mix of purchases of NIKE's products; increases in the cost of materials, labor and energy used to manufacture products, new product development and introduction; the ability to secure and protect trademarks, patents, and other intellectual property; product performance and quality; customer service; adverse publicity; the loss of significant customers or suppliers; dependence on distributors and licensees; business disruptions; increased costs of freight and transportation to meet delivery deadlines; increases in borrowing costs due to any decline in our debt ratings; changes in business strategy or development plans; general risks associated with doing business outside the United States, including, without limitation, exchange rate fluctuations, import duties, tariffs, quotas, political and economic instability, and terrorism; changes in government regulations; the impact of, including business and legal developments relating to, climate change; natural disasters; liability and other claims asserted against NIKE; the ability to attract and retain qualified personnel; the effects of our decision to invest in or divest of businesses; and other factors referenced or incorporated by reference in this report and other reports.

The risks included here are not exhaustive. Other sections of this report may include additional factors which could adversely affect NIKE's business and financial performance. Moreover, NIKE operates in a very competitive and rapidly changing environment. New risk factors emerge from time to time and it is not possible for management to predict all such risk factors, nor can it assess the impact of all such risk factors on NIKE's business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements. Given these risks and uncertainties, investors should not place undue reliance on forward-looking statements as a prediction of actual results.

Investors should also be aware that while NIKE does, from time to time, communicate with securities analysts, it is against NIKE's policy to disclose to them any material non-public information or other confidential commercial information. Accordingly, shareholders should not assume that NIKE agrees with any statement or report issued by any analyst irrespective of the content of the statement or report. Furthermore, NIKE has a policy against issuing or confirming financial forecasts or projections issued by others. Thus, to the extent that reports issued by securities

analysts contain any projections, forecasts or opinions, such reports are not the responsibility of NIKE.

Our products face intense competition.

NIKE is a consumer products company and the relative popularity of various sports and fitness activities and changing design trends affect the demand for our products. The athletic footwear, apparel, and equipment industry is highly competitive in the United States and on a worldwide basis. We compete internationally with a significant number of athletic and leisure footwear companies, athletic and leisure apparel companies, sports equipment companies, and large companies having diversified lines of athletic and leisure footwear, apparel, and equipment. We also compete with other companies for the production capacity of independent manufacturers that produce our products and for import quota capacity.

Our competitors' product offerings, technologies, marketing expenditures (including expenditures for advertising and endorsements), pricing, costs of production, and customer service are areas of intense competition. This, in addition to rapid changes in technology and consumer preferences in the markets for athletic and leisure footwear and apparel, and athletic equipment, constitute significant risk factors in our operations. If we do not adequately and timely anticipate and respond to our competitors, our costs may increase or the consumer demand for our products may decline significantly.

Failure to maintain our reputation and brand image could negatively impact our business.

Our iconic brands have worldwide recognition, and our success depends on our ability to maintain and enhance our brand image and reputation. Maintaining, promoting and growing our brands will depend on our design and marketing efforts, including advertising and consumer campaigns, product innovation and product quality. Our commitment to product innovation and quality and our continuing investment in design (including materials) and marketing may not have the desired impact on our brand image and reputation. We could be adversely impacted if we fail to achieve any of these objectives or if the reputation or image of any of our brands is tarnished or receives negative publicity. In addition, adverse publicity about regulatory or legal action against us could damage our reputation and brand image, undermine consumer confidence in us and reduce long-term demand for our products, even if the regulatory or legal action is unfounded or not material to our operations.

In addition, our success in maintaining, extending and expanding our brand image depends on our ability to adapt to a rapidly changing media environment, including our increasing reliance on social media and online dissemination of advertising campaigns. Negative posts or comments about us on social networking websites could seriously damage our reputation and brand image. If we do not maintain, extend and expand our brand image, then our product sales, financial condition and results of operations could be materially and adversely affected.

Table of Contents

If we are unable to anticipate consumer preferences and develop new products, we may not be able to maintain or increase our net revenues and profits.

Our success depends on our ability to identify, originate and define product trends as well as to anticipate, gauge and react to changing consumer demands in a timely manner. However, long lead times for many of our products may make it more difficult for us to respond rapidly to new or changing product trends or consumer preferences. All of our products are subject to changing consumer preferences that cannot be predicted with certainty. Our new products may not receive consumer acceptance as consumer preferences could shift rapidly to different types of performance products or away from these types of products altogether, and our future success depends in part on our ability to anticipate and respond to these changes. If we fail to anticipate accurately and respond to trends and shifts in consumer preferences by adjusting the mix of existing product offerings, developing new products, designs, styles and categories, and influencing sports and fitness preferences through aggressive marketing, we could experience lower sales, excess inventories and lower profit margins, any of which could have an adverse effect on our results of operations and financial condition. In addition, we market our products globally through a diverse spectrum of advertising and promotional programs and campaigns, including social media and online advertising. If we do not successfully market our products or if advertising and promotional costs increase, these factors could have an adverse effect on our business, financial condition and results of operation.

We rely on technical innovation and high quality products to compete in the market for our products.

Technical innovation and quality control in the design and manufacturing process of footwear, apparel, and athletic equipment is essential to the commercial success of our products. Research and development plays a key role in technical innovation. We rely upon specialists in the fields of biomechanics, exercise physiology, engineering, industrial design and related fields, as well as research committees and advisory boards made up of athletes, coaches, trainers, equipment managers, orthopedists, podiatrists, and other experts to develop and test cutting edge performance products. While we strive to produce products that help to reduce injury, enhance athletic performance and maximize comfort, if we fail to introduce technical innovation in our products, consumer demand for our products could decline, and if we experience problems with the quality of our products, we may incur substantial expense to remedy the problems.

Failure to continue to obtain high quality endorsers of our products could harm our business.

We establish relationships with professional athletes, sports teams and leagues to evaluate, promote, and establish product authenticity with consumers. If certain endorsers were to stop using our products contrary to their endorsement agreements, our business could be adversely affected. In addition, actions taken by athletes, teams or leagues associated with our products that harm the reputations of those athletes, teams or leagues, or negative posts or comments about our sports marketing endorsements on social networking websites, could also seriously harm our brand image with consumers and, as a result, could have an adverse effect on our sales and financial condition. In addition, poor performance by our endorsers, a failure to continue to correctly identify promising athletes to use and endorse our products, or a failure to enter into cost effective endorsement arrangements with prominent athletes and sports organizations could adversely affect our brand and result in decreased sales of our products.

Global capital and credit market conditions, and resulting declines in consumer confidence and spending, could have a material adverse effect on our business, operating results, and financial condition.

The uncertain state of the global economy continues to impact businesses around the world. Continuing volatility and disruption in the global capital and credit markets have led to fluctuations in the availability of business credit and capital liquidity, a contraction of consumer credit, business failures, higher unemployment, and declines in consumer confidence and spending in many parts of the world. If global economic and financial market conditions deteriorate or remain weak for an extended period of time, the following factors could have a material adverse effect on our business, operating results, and financial condition:

- Slower consumer spending may result in reduced demand for our products, reduced orders from retailers for our products, order cancellations, lower revenues, higher discounts, increased inventories, and lower gross margins.

We may be unable to find suitable investments that are safe, liquid, and provide a reasonable return. This could result in lower interest income or longer investment horizons. Disruptions to capital markets or the banking system may also impair the value of investments or bank deposits we currently consider safe or liquid.

In the future, we may be unable to access financing in the credit and capital markets at reasonable rates in the event we find it desirable to do so.

The failure of financial institution counterparties to honor their obligations to us under credit and derivative instruments could jeopardize our ability to rely on and benefit from those instruments. Our ability to replace those instruments on the same or similar terms may be limited under poor market conditions.

We conduct transactions in various currencies, which increase our exposure to fluctuations in foreign currency exchange rates relative to the U.S. Dollar. Continued volatility in the markets and exchange rates for foreign currencies and contracts in foreign currencies could have a significant impact on our reported financial results and condition.

Continued volatility and availability in the markets and prices for commodities and raw materials we use in our products and in our supply chain (such as cotton or petroleum derivatives) could have a material adverse effect on our costs, gross margins, and profitability.

If retailers of our products experience declining revenues, or retailers experience difficulty obtaining financing in the capital and credit markets to purchase our products, this could result in reduced orders for our products, order cancellations, inability of retailers to timely meet their payment obligations to us, extended payment terms, higher accounts receivable, reduced cash flows, greater expense associated with collection efforts, and increased bad debt expense.

If retailers of our products experience severe financial difficulty, some may become insolvent and cease business operations, which could reduce the availability of our products to consumers.

If contract manufacturers of our products or other participants in our supply chain experience difficulty obtaining financing in the capital and credit markets to purchase raw materials or to finance general working capital needs, it may result in delays or non-delivery of shipments of our products.

Table of Contents

Our business is affected by seasonality, which could result in fluctuations in our operating results and stock price. We experience moderate fluctuations in aggregate sales volume during the year. Historically, revenues in the first and fourth fiscal quarters have slightly exceeded those in the second and third fiscal quarters. However, the mix of product sales may vary considerably from time to time as a result of changes in seasonal and geographic demand for particular types of footwear, apparel and equipment. In addition, our customers may cancel orders, change delivery schedules or change the mix of products ordered with minimal notice. As a result, we may not be able to accurately predict our quarterly sales. Accordingly, our results of operations are likely to fluctuate significantly from period to period. This seasonality, along with other factors that are beyond our control, including general economic conditions, changes in consumer preferences, weather conditions, availability of import quotas and currency exchange rate fluctuations, could adversely affect our business and cause our results of operations to fluctuate. Our operating margins are also sensitive to a number of factors that are beyond our control, including manufacturing and transportation costs, shifts in product sales mix, geographic sales trends, and currency exchange rate fluctuations, all of which we expect to continue. Results of operations in any period should not be considered indicative of the results to be expected for any future period.

Futures orders may not be an accurate indication of our future revenues.

We make substantial use of our futures ordering program, which allows retailers to order five to six months in advance of delivery with the commitment that their orders will be delivered within a set period of time at a fixed price. Our futures ordering program allows us to minimize the amount of products we hold in inventory, purchasing costs, the time necessary to fill customer orders, and the risk of non-delivery. We report changes in futures orders in our periodic financial reports. Although we believe futures orders are an important indicator of our future revenues, reported futures orders are not necessarily indicative of our expectation of changes in revenues for any future period. This is because the mix of orders can shift between futures and at-once orders. In addition, foreign currency exchange rate fluctuations, order cancellations, shipping timing, returns, and discounts can cause differences in the comparisons between futures orders and actual revenues. Moreover, a significant portion of our revenue is not derived from futures orders, including at-once and close-out sales of NIKE Brand footwear and apparel, sales of NIKE brand equipment, sales from our Direct to Consumer operations, and sales from our Other Businesses.

Our futures ordering program does not prevent excess inventories or inventory shortages, which could result in decreased operating margins and harm to our business.

We purchase products from manufacturers outside of our futures ordering program and in advance of customer orders, which we hold in inventory and resell to customers. There is a risk we may be unable to sell excess products ordered from manufacturers. Inventory levels in excess of customer demand may result in inventory write-downs, and the sale of excess inventory at discounted prices could significantly impair our brand image and have an adverse effect on our operating results and financial condition. Conversely, if we underestimate consumer demand for our products or if our manufacturers fail to supply products we require at the time we need them, we may experience inventory shortages. Inventory shortages might delay shipments to customers, negatively impact retailer and distributor relationships, and diminish brand loyalty.

The difficulty in forecasting demand also makes it difficult to estimate our future results of operations and financial condition from period to period. A failure to accurately predict the level of demand for our products could adversely affect our net revenues and net income, and we are unlikely to forecast such effects with any certainty in advance.

We may be adversely affected by the financial health of our retailers.

We extend credit to our customers based on an assessment of a customer's financial condition, generally without requiring collateral. To assist in the scheduling of production and the shipping of seasonal products, we offer customers the ability to place orders five to six months ahead of delivery under our futures ordering program. These advance orders may be canceled, and the risk of cancellation may increase when dealing with financially ailing retailers or retailers struggling with economic uncertainty. In the past, some customers have experienced financial difficulties, which have had an adverse effect on our business. When the retail economy weakens, retailers may be more cautious with orders. A slowing economy in our key markets could adversely affect the financial health of our customers, which in turn could have an adverse effect on our results of operations and financial condition. In addition, product sales are dependent in part on high quality merchandising and an appealing store environment to attract

consumers, which requires continuing investments by retailers. Retailers who experience financial difficulties may fail to make such investments or delay them, resulting in lower sales and orders for our products.

Consolidation of retailers or concentration of retail market share among a few retailers may increase and concentrate our credit risk, and impair our ability to sell our products.

The athletic footwear, apparel, and equipment retail markets in some countries are dominated by a few large athletic footwear, apparel, and equipment retailers with many stores. These retailers have in the past increased their market share and may continue to do so in the future by expanding through acquisitions and construction of additional stores. These situations concentrate our credit risk with a relatively small number of retailers, and, if any of these retailers were to experience a shortage of liquidity, it would increase the risk that their outstanding payables to us may not be paid. In addition, increasing market share concentration among one or a few retailers in a particular country or region increases the risk that if any one of them substantially reduces their purchases of our products, we may be unable to find a sufficient number of other retail outlets for our products to sustain the same level of sales and revenues.

Our Direct to Consumer operations have required and will continue to require a substantial investment and commitment of resources and are subject to numerous risks and uncertainties.

Our Direct to Consumer locations have required substantial fixed investment in equipment and leasehold improvements, information systems, inventory and personnel. We have entered into substantial operating lease commitments for retail space. Certain stores have been designed and built to serve as high-profile venues to promote brand awareness and marketing activities. Because of their unique design elements, locations and size, these stores require substantially more investment than certain of our other stores. Due to the high fixed-cost structure associated with our Direct to Consumer operations, a decline in sales or the closure or poor performance of individual or multiple stores could result in significant lease termination costs, write-offs of equipment and leasehold improvements, and employee-related costs.

Many factors unique to retail operations, some of which are beyond the Company's control, pose risks and uncertainties. Risks include, but are not limited to: credit card fraud; mismanagement of existing retail channel partners; and inability to manage costs associated with store construction and operation. Risks specific to our e-commerce business also include diversion of sales from our brick and mortar stores, difficulty in recreating

Table of Contents

the in-store experience through direct channels and liability for online content. Our failure to successfully respond to these risks might adversely affect sales in our e-commerce business, as well as damage our reputation and brands. Failure to adequately protect or enforce our intellectual property rights could adversely affect our business. We utilize trademarks on nearly all of our products and believe that having distinctive marks that are readily identifiable is an important factor in creating a market for our goods, in identifying us, and in distinguishing our goods from the goods of others. We consider our NIKE® and Swoosh Design® trademarks to be among our most valuable assets and we have registered these trademarks in almost 170 jurisdictions. In addition, we own many other trademarks that we utilize in marketing our products. In addition, we own many other trademarks that we utilize on or in the marketing of our products.

We believe that our trademarks, patents, trade secrets and other intellectual property rights are important to our brand, our success, and our competitive position. We periodically discover products that are counterfeit reproductions of our products or that otherwise infringe on our intellectual property rights. If we are unsuccessful in challenging a party's products on the basis of trade secret misappropriation or trademark, copyright, design patent, utility patent, or other intellectual property infringement, continued sales of these products could adversely affect our sales and our brand and result in the shift of consumer preference away from our products.

The actions we take to establish and protect trademarks, copyrights, trade secrets, patents, and other intellectual property rights may not be adequate to prevent imitation of our products by others or to prevent others from seeking to block sales of our products as violations of proprietary rights.

We may be subject to liability if third parties successfully claim that we infringe on their trademarks, copyrights, patents, or other intellectual property rights. Defending infringement claims could be expensive and time-consuming and might result in our entering into costly license agreements. We also may be subject to significant damages or injunctions against development, use, importation and/or sale of certain products.

We take various actions to prevent confidential information from unauthorized use and/or disclosure. Such actions include contractual measures such as entering into non-disclosure agreements and providing confidential information awareness training. Our controls and efforts to prevent unauthorized use and/or disclosure of confidential information might not always be effective. Confidential information that is related to business strategy, new technologies, mergers and acquisitions, unpublished financial results or personal data could be prematurely or inadvertently used and/or disclosed resulting in a loss of reputation, a decline in our stock price, a negative impact on our market position, and could lead to damages, fines, penalties, or injunctions.

In addition, the laws of certain foreign countries may not protect or allow enforcement of intellectual property rights to the same extent as the laws of the United States. We may face significant expenses and liability in connection with the protection of our intellectual property rights outside the United States, and if we are unable to successfully protect our rights or resolve intellectual property conflicts with others, our business or financial condition may be adversely affected.

We are subject to periodic litigation and other regulatory proceedings, which could result in unexpected expense of time and resources.

From time to time we are called upon to defend ourselves against lawsuits and regulatory actions relating to our business. Due to the inherent uncertainties of litigation and regulatory proceedings, we cannot accurately predict the ultimate outcome of any such proceedings. An unfavorable outcome could have an adverse impact on our business, financial condition and results of operations. In addition, any significant litigation in the future, regardless of its merits, could divert management's attention from our operations and result in substantial legal fees.

Failure of our contractors or our licensees' contractors to comply with our code of conduct, local laws, and other standards could harm our business.

We work with hundreds of contractors outside of the United States to manufacture our products, and we also have license agreements that permit unaffiliated parties to manufacture or contract for the manufacture of products using our trademarks. We impose, and require the contractors that directly manufacture our products and our licensees the contract with manufacturers to make products bearing our trademarks, a code of conduct and other environmental, health, and safety standards for the benefit of workers. We also require these contractors to comply with applicable standards for product safety. Notwithstanding their contractual obligations, from time to time contractors may not

comply with such standards or applicable local law or our licensees may fail to enforce such standards or applicable local law on their contractors. Significant or continuing noncompliance with such standards and laws by one or more contractors could harm our reputation or result in a product recall and, as a result, could have an adverse effect on our sales and financial condition.

Our international operations involve inherent risks which could result in harm to our business.

Virtually all of our athletic footwear and apparel is manufactured outside of the United States, and the majority of our products are sold outside of the United States. Accordingly, we are subject to the risks generally associated with global trade and doing business abroad, which include foreign laws and regulations, varying consumer preferences across geographic regions, political unrest, disruptions or delays in cross-border shipments, and changes in economic conditions in countries in which we manufacture or sell products. In addition, disease outbreaks, terrorist acts and military conflict have increased the risks of doing business abroad. These factors, among others, could affect our ability to manufacture products or procure materials, our ability to import products, our ability to sell products in international markets, and our cost of doing business. If any of these or other factors make the conduct of business in a particular country undesirable or impractical, our business could be adversely affected. In addition, many of our imported products are subject to duties, tariffs, or quotas that affect the cost and quantity of various types of goods imported into the United States and other countries. Any country in which our products are produced or sold may eliminate, adjust or impose new quotas, duties, tariffs, safeguard measures, anti-dumping duties, cargo restrictions to prevent terrorism, restrictions on the transfer of currency, climate change legislation, product safety regulations or other charges or restrictions, any of which could have an adverse effect on our results of operations and financial condition.

Changes in tax laws and unanticipated tax liabilities could adversely affect our effective income tax rate and profitability.

We are subject to income taxes in the United States and numerous foreign jurisdictions. Increases in income tax rates could reduce our after-tax income from affected jurisdictions. We earn a substantial portion of our income in foreign countries. If our capital or financing needs in the United States require us to repatriate earnings from foreign jurisdictions above our current levels, our effective income tax rates for the affected periods could be negatively impacted. Current economic and political conditions make tax rules in any jurisdiction, including the United States, subject to

Table of Contents

significant change. There have been proposals to reform U.S. tax laws that could significantly impact how U.S. multinational corporations are taxed on foreign earnings. Although we cannot predict whether or in what form these proposals will pass, several of the proposals being considered, if enacted into law, could have an adverse impact on our income tax expense and cash flows.

Our effective income tax rate in the future could be adversely affected by a number of factors, including changes in the mix of earnings in countries with differing statutory tax rates, changes in the valuation of deferred tax assets and liabilities, changes in tax laws, the outcome of income tax audits in various jurisdictions around the world, and any repatriation of non-U.S. earnings for which we have not previously provided for U.S. taxes. The Company is also subject to the examination of its tax returns by the Internal Revenue Service and other tax authorities. We regularly assess all of these matters to determine the adequacy of our tax provision, which is subject to significant discretion. Although we believe our tax provisions are adequate, the final determination of tax audits and any related disputes could be materially different from our historical income tax provisions and accruals. The results of audits or related disputes could have an adverse effect on our financial statements for the period or periods for which the applicable final determinations are made.

Currency exchange rate fluctuations could result in lower revenues, higher costs and decreased margins and earnings. A majority of our products are sold outside of the United States. As a result, we conduct transactions in various currencies, which increase our exposure to fluctuations in foreign currency exchange rates relative to the U.S. Dollar. Our international revenues and expenses generally are derived from sales and operations in foreign currencies, and these revenues and expenses could be affected by currency fluctuations, including amounts recorded in foreign currencies and translated into U.S. Dollars for consolidated financial reporting. Currency exchange rate fluctuations could also disrupt the business of the independent manufacturers that produce our products by making their purchases of raw materials more expensive and more difficult to finance. Foreign currency fluctuations could have an adverse effect on our results of operations and financial condition.

We may hedge certain foreign currency exposures to lessen and delay, but not to completely eliminate, the effects of foreign currency fluctuations on our financial results. Since the hedging activities are designed to lessen volatility, they not only reduce the negative impact of a stronger U.S. Dollar, but they also reduce the positive impact of a weaker U.S. Dollar. Our future financial results could be significantly affected by the value of the U.S. Dollar in relation to the foreign currencies in which we conduct business. The degree to which our financial results are affected for any given time period will depend in part upon our hedging activities.

If one or more of our counterparty financial institutions default on their obligations to us or fail, we may incur significant losses.

As part of our hedging activities, we enter into transactions involving derivative financial instruments, which may include forward contracts, commodity futures contracts, option contracts, collars and swaps, with various financial institutions. In addition, we have significant amounts of cash, cash equivalents and other investments on deposit or in accounts with banks or other financial institutions in the United States and abroad. As a result, we are exposed to the risk of default by or failure of counterparty financial institutions. The risk of counterparty default or failure may be heightened during economic downturns and periods of uncertainty in the financial markets. If one of our counterparties were to become insolvent or file for bankruptcy, our ability to recover losses incurred as a result of default or our assets that are deposited or held in accounts with such counterparty may be limited by the counterparty's liquidity or the applicable laws governing the insolvency or bankruptcy proceedings. In the event of default or failure of one or more of our counterparties, we could incur significant losses, which could negatively impact our results of operations and financial condition.

Our products are subject to risks associated with overseas sourcing, manufacturing, and financing.

The principal materials used in our apparel products — natural and synthetic fabrics and threads, plastic and metal hardware, and specialized performance fabrics designed to repel rain or snow, retain heat, or efficiently wick moisture away from the body — are available in countries where our manufacturing takes place. The principal materials used in our footwear products — natural and synthetic rubber, plastic compounds, foam cushioning materials, nylon, leather, canvas and polyurethane films — are also locally available to manufacturers. Both our apparel and footwear products are dependent upon the ability of our unaffiliated contract manufacturers' to locate, train and employ adequate personnel.

NIKE contractors and suppliers buy raw materials in bulk and are subject to wage rates that are oftentimes regulated by the governments of the countries in which our products are manufactured.

There could be a significant disruption in the supply of fabrics or raw materials from current sources or, in the event of a disruption, we might not be able to locate alternative suppliers of materials of comparable quality at an acceptable price, or at all. Further, there may be wage increases, whether government mandated or otherwise, that affect our unaffiliated contract manufacturers. In addition, we cannot be certain that our unaffiliated manufacturers will be able to fill our orders in a timely manner. If we experience significant increases in demand, or reductions in the availability of materials, or need to replace an existing manufacturer, there can be no assurance that additional supplies of fabrics or raw materials or additional manufacturing capacity will be available when required on terms that are acceptable to us, or at all, or that any supplier or manufacturer would allocate sufficient capacity to us in order to meet our requirements. In addition, even if we are able to expand existing or find new manufacturing or sources of materials, we may encounter delays in production and added costs as a result of the time it takes to train suppliers and manufacturers in our methods, products, quality control standards, and labor, health and safety standards. Any delays, interruption or increased costs in labor or wages, or the supply of materials or manufacture of our products could have an adverse effect on our ability to meet retail customer and consumer demand for our products and result in lower revenues and net income both in the short and long-term.

Because independent manufacturers manufacture a majority of our products outside of our principal sales markets, our products must be transported by third parties over large geographic distances. Delays in the shipment or delivery of our products due to the availability of transportation, work stoppages, port strikes, infrastructure congestion, or other factors, and costs and delays associated with consolidating or transitioning between manufacturers, could adversely impact our financial performance. In addition, manufacturing delays or unexpected demand for our products may require us to use faster, but more expensive, transportation methods such as air freight, which could adversely affect our profit margins. The cost of oil is a significant component in manufacturing and transportation costs, so increases in the price of petroleum products can adversely affect our profit margins.

In addition, Sojitz America performs significant import-export financing services for most of the NIKE Brand products sold outside of the United States, Europe, Middle East, Africa, and Japan, excluding products produced and sold in the same country. Any failure of Sojitz America to provide these services or any failure of Sojitz America's banks could disrupt our ability to acquire products from our suppliers and to deliver products to our customers outside of the United States, Europe, Middle East, Africa, and Japan. Such a disruption could result in canceled orders that would adversely affect sales and profitability.

Table of Contents

Our success depends on our global distribution facilities.

We distribute our products to customers directly from the factory and through distribution centers located throughout the world. Our ability to meet customer expectations, manage inventory, complete sales and achieve objectives for operating efficiencies and growth, particularly in emerging markets, depends on the proper operation of our distribution facilities, the development or expansion of additional distribution capabilities, and the timely performance of services by third parties (including those involved in shipping product to and from our distribution facilities). Our distribution facilities could be interrupted by information technology problems and disasters such as earthquakes or fires. Any significant failure in our distribution facilities could result in an adverse effect on our business. We maintain business interruption insurance, but it may not adequately protect us from adverse effects that could be caused by significant disruptions in our distribution facilities.

We rely significantly on information technology to operate our business, including our supply chain and retail operations, and any failure, inadequacy, breach, interruption or security failure of that technology or any misappropriation of any data could harm our reputation or our ability to effectively operate our business.

We are heavily dependent on information technology systems and networks, including the Internet and third-party hosted services (“information technology systems”), across our supply chain, including product design, production, forecasting, ordering, manufacturing, transportation, sales, and distribution, as well as for processing financial information for external and internal reporting purposes, retail operations and other business activities. Our ability to effectively manage and maintain our inventory and to ship products to customers on a timely basis depends significantly on the reliability of these information technology systems. Over a number of years, we have implemented information technology systems in all of the geographical regions in which we operate. Our work to integrate and enhance these systems and related processes in our global operations is ongoing. The failure of these systems to operate effectively, problems with transitioning to upgraded or replacement systems, or a breach in security of these systems could cause delays in product fulfillment and reduced efficiency of our operations, could require significant capital investments to remediate the problem, and may have an adverse effect on our results of operations and financial condition.

We also use information technology systems to process financial information and results of operations for internal reporting purposes and to comply with regulatory financial reporting, legal and tax requirements. If our information technology systems suffer severe damage, disruption or shutdown and our business continuity plans do not effectively resolve the issues in a timely manner, we could experience delays in reporting our financial results, which could result in lost revenues and profits, as well as reputational damage.

In addition, hackers and data thieves are increasingly sophisticated and operate large scale and complex automated attacks. Any breach of our network may result in the loss of valuable business data, our customers’ or employees’ personal information or a disruption of our business, which could give rise to unwanted media attention, damage our customer relationships and reputation and result in lost sales, fines or lawsuits. In addition, we must comply with increasingly complex regulatory standards enacted to protect this business and personal data. An inability to maintain compliance with these regulatory standards could subject us to legal risks.

Furthermore, we depend on information technology systems and personal data collection and use for digital marketing, digital commerce and the marketing and use of our Digital Sport products. We also engage in electronic communications throughout the world between and among our employees as well as with other third parties, including customers, suppliers, vendors and consumers. Our information technology systems are critical to many of our operating activities and our business processes and may be negatively impacted by any service interruption or shutdown. Misuse or leakage of personal information could result in a violation of data privacy laws and regulations and damage our reputation and credibility and have a negative impact on revenues and profits.

The market for prime real estate is competitive.

Our ability to effectively obtain real estate to open new retail stores and otherwise conduct our operations, both domestically and internationally, depends on the availability of real estate that meets our criteria for traffic, square footage, co-tenancies, lease economics, demographics, and other factors. We also must be able to effectively renew our existing real estate leases. In addition, from time to time, we seek to downsize, consolidate, reposition, or close some of our real estate locations, which may require modification of an existing lease. Failure to secure adequate new

locations or successfully modify leases for existing locations, or failure to effectively manage the profitability of our existing fleet of retail stores, could have an adverse effect on our operating results and financial condition.

Additionally, the economic environment may at times make it difficult to determine the fair market rent of real estate properties domestically and internationally. This could impact the quality of our decisions to exercise lease options at previously negotiated rents and the quality of our decisions to renew expiring leases at negotiated rents. Any adverse effect on the quality of these decisions could impact our ability to retain real estate locations adequate to meet our targets or efficiently manage the profitability of our existing fleet of stores and could have an adverse effect on our operating results and financial condition.

Natural disasters could negatively impact our operating results and financial condition.

Natural disasters such as earthquakes, hurricanes, tsunamis or other adverse weather and climate conditions, whether occurring in the U.S. or abroad, and the consequences and effects thereof, including energy shortages and public health issues, could disrupt our operations, or the operations of our vendors and other suppliers, or result in economic instability that may negatively impact our operating results and financial condition.

Our financial results may be adversely affected if substantial investments in businesses and operations fail to produce expected returns.

From time to time, we may invest in business infrastructure, acquisitions of new businesses, product offering and manufacturing innovation, and expansion of existing businesses, such as our retail operations, which require substantial cash investments and management attention. We believe cost effective investments are essential to business growth and profitability. However, significant investments are subject to typical risks and uncertainties inherent in acquiring or expanding a business. The failure of any significant investment to provide their expected returns or profitability could have a material adverse effect on our financial results and divert management attention from more profitable business operations.

We depend on key personnel, the loss of whom would harm our business.

Our future success will depend in part on the continued service of key executive officers and personnel. The loss of the services of any key individual could harm our business. Our future success also depends on our ability to recruit, retain and motivate our personnel sufficiently, both to maintain our current business and to execute our strategic initiatives. Competition for employees in our industry is intense and we may not be successful in attracting and retaining such personnel.

Table of Contents

The sale of a large number of shares held by our Chairman could depress the market price of our common stock. Philip H. Knight, Co-founder and Chairman of our Board of Directors, beneficially owns over 75.6% of our Class A Common Stock. If all of his Class A Common Stock were converted into Class B Common Stock, Mr. Knight would own over 15.8% of our Class B Common Stock. These shares are available for resale, subject to the requirements of the U.S. securities laws. The sale or prospect of the sale of a substantial number of these shares could have an adverse effect on the market price of our common stock.

Changes in our credit ratings or macroeconomic conditions may affect our liquidity, increasing borrowing costs and limiting our financing options.

Our long-term debt is currently rated investment grade by Standard & Poor's and Moody's Investors Service. If our credit ratings are lowered, borrowing costs for future long-term debt or short-term credit facilities may increase and our financing options, including our access to the unsecured credit market, could be limited. We may also be subject to restrictive covenants that would reduce our flexibility. In addition, macroeconomic conditions, such as increased volatility or disruption in the credit markets, could adversely affect our ability to refinance existing debt or obtain additional financing to support operations or to fund new initiatives.

Anti-takeover provisions may impair an acquisition of the Company or reduce the price of our common stock. There are provisions of our articles of incorporation and Oregon law that are intended to protect shareholder interests by providing the Board of Directors a means to attempt to deny coercive takeover attempts or to negotiate with a potential acquirer in order to obtain more favorable terms. Such provisions include a control share acquisition statute, a freeze-out statute, two classes of stock that vote separately on certain issues, and the fact that holders of Class A Common Stock elect three-quarters of the Board of Directors rounded down to the next whole number. However, such provisions could discourage, delay or prevent an unsolicited merger, acquisition or other change in control of our company that some shareholders might believe to be in their best interests or in which shareholders might receive a premium for their common stock over the prevailing market price. These provisions could also discourage proxy contests for control of the Company.

We may fail to meet market expectations, which could cause the price of our stock to decline.

Our Class B Common Stock is traded publicly, and at any given time various securities analysts follow our financial results and issue reports on us. These reports include information about our historical financial results as well as analysts' estimates of our future performance. Analysts' estimates are based upon their own opinions and are often different from our estimates or expectations. If our operating results are below the estimates or expectations of public market analysts and investors, our stock price could decline. In the past, securities class action litigation has been brought against NIKE and other companies following a decline in the market price of their securities. If our stock price is volatile, we may become involved in this type of litigation in the future. Any litigation could result in substantial costs and a diversion of management's attention and resources that are needed to successfully run our business.

Table of Contents

ITEM 1B. Unresolved Staff Comments

Not applicable.

ITEM 2. Properties

The following is a summary of principal properties owned or leased by NIKE.

The NIKE World Campus, owned by NIKE and located near Beaverton, Oregon, USA, is a 250-acre facility of 35 buildings which functions as our world headquarters and is occupied by almost 8,000 employees engaged in management, research, design, development, marketing, finance, and other administrative functions serving nearly all of our divisions. We also lease various office facilities in the surrounding metropolitan area. We lease a similar, but smaller, administrative facility in Hilversum, the Netherlands, which serves as the headquarters for the Western Europe and Central & Eastern Europe geographies. In the United States, there are five significant distribution centers in Memphis, Tennessee; two are owned and three are leased. NIKE Brand apparel and equipment are also shipped from our Foothill Ranch, California distribution center, which we lease. Smaller leased distribution facilities for non-NIKE Brand businesses are located in various parts of the United States. We also own or lease distribution and customer service facilities outside the United States. The most significant are the distribution facilities located in Tomisato, Japan; Laakdal, Belgium; and Taicang, China; all of these facilities are owned.

We manufacture Air-Sole cushioning materials and components at NIKE IHM, Inc. manufacturing facilities located in Beaverton, Oregon and St. Charles, Missouri; these facilities are owned. We also manufacture and sell small amounts of various other plastic products to other manufacturers through NIKE IHM, Inc.

Aside from the principal properties described above, we lease over 110 sales offices and approximately 90 administrative offices worldwide. We lease more than 750 retail stores worldwide, which consist primarily of factory outlet stores. See “United States Market” and “International Markets” in Part 1 of this Report. Our leases expire at various dates through the year 2033.

ITEM 3. Legal Proceedings

There are no material pending legal proceedings, other than ordinary routine litigation incidental to our business, to which we are a party or of which any of our property is the subject.

ITEM 4. Mine Safety Disclosures

PART II

ITEM 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

NIKE's Class B Common Stock is listed on the New York Stock Exchange and trades under the symbol NKE. At July 19, 2013, there were 30,586 holders of record of our Class B Common Stock and 19 holders of record of our Class A Common Stock. These figures do not include beneficial owners who hold shares in nominee name. The Class A Common Stock is not publicly traded but each share is convertible upon request of the holder into one share of Class B Common Stock. The following tables set forth, for each of the quarterly periods indicated, the high and low sales prices for the Class B Common Stock as reported on the New York Stock Exchange Composite Tape and dividends declared on the Class A and Class B Common Stock. All share and per share amounts presented are reflective of the two-for-one stock split that began trading at the split adjusted price on December 26, 2012.

| Fiscal 2013 (June 1, 2012 — May 31, 2013) | High | Low | Dividends Declared |
|---|---------|---------|--------------------|
| First Quarter | \$54.32 | \$43.89 | \$0.18 |
| Second Quarter | 50.42 | 45.30 | 0.21 |
| Third Quarter | 55.55 | 48.46 | 0.21 |
| Fourth Quarter | 65.91 | 53.49 | 0.21 |
| Fiscal 2012 (June 1, 2011 — May 31, 2012) | High | Low | Dividends Declared |
| First Quarter | \$46.83 | \$39.29 | \$0.16 |
| Second Quarter | 48.38 | 41.25 | 0.18 |
| Third Quarter | 53.96 | 46.69 | 0.18 |
| Fourth Quarter | 57.20 | 52.17 | 0.18 |

The following table presents a summary of share repurchases made by NIKE during the quarter ended May 31, 2013. During the second quarter of fiscal 2013, the Company completed the previous four-year, \$5 billion share repurchase program approved by our Board of Directors in September 2008. During the prior program, the Company purchased a total of 118.8 million shares at an average price of \$42.08 per share. Following the completion of this program, the Company began repurchases under the four-year, \$8 billion share repurchase program approved by the Board in September 2012.

| Period | Total Number of Shares Purchased | Average Price Paid per Share | Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs | Maximum Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs (In millions) |
|--------------------------|----------------------------------|------------------------------|--|--|
| March 1 — March 31, 2013 | 2,198,417 | \$54.51 | 2,198,417 | \$ 7,333 |
| April 1 — April 30, 2013 | 1,573,111 | \$59.30 | 1,573,111 | \$ 7,239 |
| May 1 — May 31, 2013 | 450,000 | \$63.18 | 450,000 | \$ 7,211 |
| | 4,221,528 | \$57.22 | 4,221,528 | |

Performance Graph

The following graph demonstrates a five-year comparison of cumulative total returns for NIKE's Class B Common Stock, the Standard & Poor's 500 Stock Index, the Standard & Poor's Apparel, Accessories & Luxury Goods Index, and the Dow Jones U.S. Footwear Index. The graph assumes an investment of \$100 on May 31, 2008 in each of our Class B Common Stock, and the stocks comprising the Standard & Poor's 500 Stock Index, the Standard & Poor's Apparel, Accessories & Luxury Goods Index, and the Dow Jones U.S. Footwear Index. Each of the indices assumes that all dividends were reinvested.

COMPARISON OF 5-YEAR CUMULATIVE TOTAL RETURN AMONG NIKE, INC.; S&P 500 INDEX; S&P APPAREL, ACCESSORIES & LUXURY GOODS INDEX; AND THE DOW JONES U.S. FOOTWEAR INDEX

The Dow Jones U.S. Footwear Index consists of NIKE, Deckers Outdoor Corp., Wolverine World Wide, Inc., Iconix Brand Group, Inc., Crocs, Inc., and Steven Madden, Ltd. Because NIKE is part of the Dow Jones U.S. Footwear Index, the price and returns of NIKE stock have a substantial effect on this index. The Standard & Poor's Apparel, Accessories & Luxury Goods Index consists of V.F. Corp., Coach, Inc., Polo Ralph Lauren Corporation, and Fossil Group, Inc. The Dow Jones U.S. Footwear Index and the Standard & Poor's Apparel, Accessories, and Luxury Goods Index include companies in two major lines of business in which the Company competes. The indices do not encompass all of the Company's competitors, nor all product categories and lines of business in which the Company is engaged.

The stock performance shown on the performance graph above is not necessarily indicative of future performance. The Company will not make nor endorse any predictions as to future stock performance.

The performance graph above is being furnished solely to accompany this Report pursuant to Item 201(e) of Regulation S-K, and is not being filed for purposes of Section 18 of the Securities Exchange Act of 1934, as amended, and is not to be incorporated by reference into any filing of the Company, whether made before or after the date hereof, regardless of any general incorporation language in such filing.

Table of Contents

ITEM 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations

NIKE designs, develops, markets and sells athletic footwear, apparel, equipment, accessories and services worldwide. We are the largest seller of athletic footwear and apparel in the world. We sell our products to retail accounts, through NIKE-owned retail stores and internet websites, which we refer to as our “Direct to Consumer” operations, and through a mix of independent distributors, licensees and sales representatives in virtually all countries around the world. Our goal is to deliver value to our shareholders by building a profitable global portfolio of branded footwear, apparel, equipment, accessories and service businesses. Our strategy is to achieve long-term revenue growth by creating innovative, “must have” products, building deep personal consumer connections with our brands, and delivering compelling consumer experiences at retail and online.

In addition to achieving long-term, sustainable revenue growth, we continue to strive to deliver shareholder value by driving operational excellence in several key areas:

Expanding gross margin by:

- Making our supply chain a competitive advantage;
- Reducing product costs through a continued focus on manufacturing efficiency, product design and innovation; and
- Delivering innovative, premium products that command higher prices while maintaining a strong consumer price-to-value proposition.

Improving selling and administrative expense productivity by focusing on investments that drive economic returns in the form of incremental revenue and gross profit, and leveraging existing infrastructure across our portfolio of businesses to eliminate duplicative costs;

Improving working capital efficiency; and

Deploying capital effectively.

Through execution of this strategy, our long-term financial goals continue to be:

High single-digit revenue growth,

Mid-teens earnings per share growth,

Increased return on invested capital and accelerated cash flows, and

Consistent results through effective management of our diversified portfolio of businesses.

Over the past ten years, we have achieved or exceeded all of these financial goals. During this time, revenues and earnings per share for NIKE, Inc., inclusive of both continuing and discontinued operations, have grown 9% and 15%, respectively, on an annual compounded basis. Our return on invested capital has increased from 18% to 24% and we expanded gross margins by approximately 260 basis points.

On November 15, 2012, we announced a two-for-one stock split of both Class A and Class B Common shares. The stock split was in the form of a 100 percent stock dividend payable on December 24, 2012 to shareholders of record at the close of business December 10, 2012. Common stock began trading at the split-adjusted price on December 26, 2012. All share numbers and per share amounts presented reflect the stock split.

Our fiscal 2013 results from continuing operations demonstrated the power of the NIKE, Inc. portfolio to deliver consistent growth in revenues, earnings, and cash returns to shareholders, while investing for long-term growth.

Despite the ongoing challenges in the global economy, we delivered record revenues and earnings per share in fiscal 2013. Our revenues grew 8% to \$25.3 billion, net income from continuing operations increased 9% to \$2.5 billion, and we delivered diluted earnings per share of \$2.69, an 11% increase from fiscal 2012.

Earnings before interest and income taxes for continuing operations increased 8% for fiscal 2013, driven by revenue growth and improved gross margin, which more than offset higher selling and administrative expense as a percentage of revenue. The increase in revenues was driven by growth across most NIKE Brand geographies, key categories and product types. This growth was primarily fueled by:

- Innovative performance and sportswear products, incorporating proprietary technology platforms such as NIKE Air, Lunar, Shox, FREE, Flywire, Dri-F.I.T, FlyKnit, NIKE +, and NIKE Fuel;

Deep brand connections to consumers through a category lens, reinforced by investments in endorsements by high profile athletes and teams (such as the NFL, FC Barcelona, Michael Jordan), high impact marketing around global sporting events (such as the Olympics, European Football Championships and NBA Finals) and digital marketing; and

Strong category retail presentation online and at NIKE owned and retail partner stores.

Revenues also improved for each of our Other Businesses (Converse, NIKE Golf and Hurley).

Our gross margins improved largely due to the positive impact of higher average selling prices, partially offset by higher product input costs, primarily labor cost inflation, and foreign currency headwinds.

For fiscal 2013, the growth of our net income from continuing operations was positively affected by a year-over-year decrease in our effective tax rate. In addition, diluted earnings per share grew at a higher rate than net income due to a 2% decrease in the weighted average number of diluted common shares outstanding, as a result of share repurchases during fiscal 2013.

On May 31, 2012, we announced our intention to divest of the Cole Haan and Umbro businesses, which would allow us to better focus our resources on driving growth in the NIKE, Jordan, Converse and Hurley brands. During the second quarter of fiscal 2013 we completed the sale of certain assets of the Umbro brand and recorded a loss on the sale of these assets of \$107 million, net of tax. During the third quarter of fiscal 2013 we completed the sale of Cole Haan and recorded a gain on sale of \$231 million, net of tax. As of May 31, 2013 the Company had substantially completed all transition services related to the sale of both businesses. Unless otherwise indicated, the following disclosures reflect the Company's continuing operations; refer to our "Discontinued Operations" section for additional information regarding our discontinued operations.

While we expect to face continued macroeconomic uncertainties in the global economy, we continue to see opportunities to drive future growth and remain committed to effectively managing our business to achieve our financial goals over the long-term, by executing against the operational strategies outlined above.

Table of Contents

Results of Operations

Unless otherwise indicated, the following disclosures reflect the Company's continuing operations.

(1) Certain prior year amounts have been reclassified to conform to fiscal 2013 presentation.

Results have been restated using actual exchange rates in use during the comparative period to enhance the visibility of the underlying business trends by excluding the impact of translation arising from foreign currency exchange rate fluctuations.

Corporate revenues primarily consist of intercompany revenue eliminations and foreign currency revenue-related hedge gains and losses generated by entities within the NIKE Brand geographic operating segments and certain Other Businesses through our centrally managed foreign exchange risk management program.

References to NIKE Brand wholesale equivalent revenues are intended to provide context as to the total size of our NIKE Brand market footprint if we had no Direct to Consumer operations. NIKE Brand wholesale equivalent revenues consist of (1) sales to external wholesale customers and (2) internal sales from our wholesale operations to our Direct to Consumer operations which are charged at prices that are comparable to prices charged to external wholesale customers.

(5) Others include all other categories and certain adjustments that are not allocated at the category level.

Table of Contents

Fiscal 2013 Compared to Fiscal 2012

On a currency neutral basis, revenues from our NIKE, Inc. continuing operations grew 11% for fiscal 2013, driven by increases in revenues for both the NIKE Brand and our Other Businesses. Every NIKE Brand geography except Greater China delivered higher revenues for fiscal 2013. North America contributed 7 percentage points of the increase in NIKE, Inc. revenues, while Emerging Markets contributed 2 percentage points and Western and Central and Eastern Europe each contributed 1 percentage point. Greater China's results reduced NIKE, Inc. revenue growth by 1 percentage point. Revenues for our Other Businesses contributed 1 percentage point to our consolidated revenue growth.

Excluding the effects of changes in currency exchange rates, NIKE Brand footwear and apparel revenue increased 11% and 10%, respectively, while NIKE Brand equipment revenues increased 20% during fiscal 2013. The increase in NIKE Brand footwear revenue for fiscal 2013 was attributable to growth across our Running, Basketball, Football (Soccer), and Sportswear categories. The growth of NIKE footwear revenues continued to be fueled by increased demand for performance products, including Running models with NIKE FREE and Lunar technologies, NIKE and Brand Jordan Basketball styles, and performance Football (soccer) products. In fiscal 2013, unit sales of footwear increased approximately 7% and the average selling price per pair increased approximately 4%, driven equally by price increases and a shift in mix to higher priced products.

For NIKE Brand apparel, the increase in revenue for fiscal 2013 was driven by our Men's Training category (which includes the NFL licensed business), in addition to strong demand for Running and Basketball products. Apparel unit sales in fiscal 2013 increased approximately 7% and the average selling price per unit increased approximately 3%, reflecting a favorable mix of higher priced products, such as performance Running, Basketball, and NFL licensed apparel, and to a lesser extent, higher selling prices.

While wholesale revenues remain the largest component of overall NIKE Brand revenues, we continue to expand Direct to Consumer revenues. Our NIKE Brand Direct to Consumer operations include NIKE owned in-line and factory stores, as well as online sales through NIKE owned websites. For fiscal 2013, Direct to Consumer revenues represented approximately 19% of our total NIKE Brand revenues compared to 17% in fiscal 2012. On a currency neutral basis, Direct to Consumer revenues grew 24% for fiscal 2013, as comparable store sales grew 14% and we continue to expand our store network and e-commerce business. Comparable store sales include revenues from NIKE owned in-line and factory stores for which all three of the following requirements have been met: (1) the store has been open at least one year, (2) square footage has not changed by more than 15% within the past year, and (3) the store has not been permanently repositioned within the past year.

Revenues for our Other Businesses are comprised of results from Converse, Hurley and NIKE Golf. Excluding the impact of currency changes, revenues for these businesses increased 9% in fiscal 2013, reflecting growth across all businesses.

Fiscal 2012 Compared to Fiscal 2011

On a currency neutral basis, revenues for NIKE, Inc.'s continuing operations grew 15% for fiscal 2012, driven by increases in revenues for both the NIKE Brand and our Other Businesses. Excluding the effects of changes in currency exchange rates, revenues for the NIKE Brand increased 15%, as every NIKE Brand geography delivered higher revenues for fiscal 2012. North America contributed approximately 7 percentage points to the NIKE Brand revenue increase, while the Emerging Markets and Greater China geographies contributed approximately 4 and 2 percentage points to the NIKE Brand revenue growth, respectively. Revenues for our Other Businesses grew 12% during fiscal 2012, contributing 1 percentage point of our consolidated revenue growth.

Excluding the effects of changes in currency exchange rates, NIKE Brand footwear and apparel revenue increased 15% and 13%, respectively, while NIKE Brand equipment revenues increased 16% during fiscal 2012. Continuing to fuel the growth of our NIKE Brand footwear business was the increased demand for performance products, including the NIKE Lunar and FREE technologies. The increase in NIKE Brand footwear revenue for fiscal 2012 was attributable to double-digit percentage growth in unit sales along with a low-single-digit percentage increase in average selling price per pair, primarily reflecting the favorable impact from product price increases, partially offset by higher discounts on close-out sales. The overall increase in footwear sales was driven by growth across all key categories, notably Running, Sportswear and Basketball. For NIKE Brand apparel, the increase in revenue for fiscal

2012 was driven by mid-single-digit percentage increases in both unit sales and average selling prices. The increase in average selling prices was primarily driven by product price increases, partially offset by a higher mix of close-out sales. The overall increase in apparel sales was reflective of increased demand across most key categories.

For fiscal 2012, Direct to Consumer channels represented approximately 17% of our total NIKE Brand revenues compared to 16% in fiscal 2011. On a currency neutral basis, Direct to Consumer revenues grew 21% for fiscal 2012, as comparable store sales grew 13% and we continue to expand our store network and e-commerce business.

Revenues for our Other Businesses consisted of results from our affiliate brands; Converse, Hurley and NIKE Golf. Excluding the impact of currency changes, revenues for these businesses increased by 12% in fiscal 2012, reflecting growth across all businesses except Hurley, which was down slightly for the fiscal year.

Futures Orders

Futures orders for NIKE Brand footwear and apparel scheduled for delivery from June through November 2013 were 8% higher than the orders reported for the comparable prior year period. The U.S. Dollar futures order amount is calculated based upon our internal forecast of the currency exchange rates under which our revenues will be translated during this period. Excluding the impact of currency changes, futures orders also increased 8%, as unit orders contributed approximately 5 percentage points of growth and average selling price per unit contributed approximately 3 percentage points of growth.

Table of Contents

By geography, futures orders growth was as follows:

| | Reported Futures Orders Growth | Futures Orders Excluding Currency Changes ⁽¹⁾ | |
|---------------------------------|-----------------------------------|--|---|
| North America | 12 | % 12 | % |
| Western Europe | 2 | % 0 | % |
| Central & Eastern Europe | 14 | % 12 | % |
| Greater China | 3 | % 0 | % |
| Japan | -17 | % 6 | % |
| Emerging Markets | 12 | % 12 | % |
| Total NIKE Brand Futures Orders | 8 | % 8 | % |

(1) Growth rates have been restated using constant exchange rates for the comparative period to enhance the visibility of the underlying business trends excluding the impact of foreign currency exchange rate fluctuations.

The reported futures orders growth is not necessarily indicative of our expectation of revenue growth during this period. This is due to year-over-year changes in shipment timing, because the mix of orders can shift between futures and at-once orders, and the fulfillment of certain orders may fall outside of the schedule noted above. In addition, exchange rate fluctuations as well as differing levels of order cancellations and discounts can cause differences in the comparisons between futures orders and actual revenues. Moreover, a significant portion of our revenue is not derived from futures orders, including at-once and close-out sales of NIKE Brand footwear and apparel, sales of NIKE Brand equipment, sales from our Direct to Consumer operations, and sales from our Other Businesses.

Gross Margin

| (Dollars in millions) | Fiscal 2013 | Fiscal 2012 | FY13 vs. FY12 % Change | Fiscal 2011 | FY12 vs. FY11 % Change |
|-----------------------|----------------|----------------|---------------------------|----------------|------------------------------|
| Gross Profit | \$11,034 | \$10,148 | 9 % | \$9,202 | 10 % |
| Gross Margin % | 43.6 | % 43.5 | % 10 | bps 45.7 | % (220) bps |

Fiscal 2013 Compared to Fiscal 2012

For fiscal 2013, our consolidated gross margin was 10 basis points higher than fiscal 2012, primarily driven by higher net average selling prices (approximately 160 basis points) that were attributable to higher prices and a favorable sales mix. The positive benefit of higher net average selling prices was largely offset by higher product costs (approximately 110 basis points), primarily due to higher factory labor costs, and unfavorable foreign currency exchange rate movements (approximately 40 basis points).

In addition, we have seen significant shifts in the mix of revenues from higher to lower margin segments of our business. While growth in these lower gross margin segments delivers incremental revenue and profits, it has a negative effect on our consolidated gross margin.

Fiscal 2012 Compared to Fiscal 2011

For fiscal 2012, our consolidated gross margin was 220 basis points lower than the prior year period, primarily driven by higher product input costs, including materials and labor, across most businesses. Also contributing to the decrease in gross margin were higher customs duty charges, discounts on close-out sales and an increase in investments in our digital business and infrastructure. Together, these factors decreased consolidated gross margin by approximately 390 basis points. Partially offsetting this decrease were positive impacts from product price increases, lower air freight costs, the growth of our NIKE Brand Direct to Consumer business, and benefits from our ongoing product cost reduction initiatives.

Selling and Administrative Expense

| (Dollars in millions) | Fiscal 2013 | Fiscal 2012 | Fiscal 2011 |
|-----------------------|-------------|-------------|-------------|
|-----------------------|-------------|-------------|-------------|

Edgar Filing: NIKE INC - Form 10-K

| | | | FY13 vs. FY12 | | FY12 vs. | | |
|--|---------|---------|---------------|-----|----------|---------|-----|
| | | | % Change | | FY11 % | | |
| | | | | | Change | | |
| Demand creation expense ⁽¹⁾ | \$2,745 | \$2,607 | 5 | % | \$2,344 | 11 | % |
| Operating overhead expense | 5,035 | 4,458 | 13 | % | 4,017 | 11 | % |
| Selling and administrative expense | \$7,780 | \$7,065 | 10 | % | \$6,361 | 11 | % |
| % of Revenues | 30.7 | % 30.3 | % 40 | bps | 31.6 | % (130) | bps |

(1) Demand creation consists of advertising and promotion expenses, including costs of endorsement contracts.

Fiscal 2013 Compared to Fiscal 2012

Demand creation expense increased 5% compared to the prior year, mainly driven by an increase in sports marketing expense, marketing support for key product initiatives, including the NIKE Fuelband and NFL launch, as well as an increased level of marketing spending around global sporting events such as the European Football Championships and London Summer Olympics. Excluding the effects of changes in foreign currency exchange rates, demand creation expense increased 8%.

Table of Contents

Compared to the prior year, operating overhead expense increased 13%, primarily attributable to increased investments in our Direct to Consumer operations, higher personnel costs, and corporate initiatives to support the growth of our overall business. Excluding the effects of changes in foreign currency exchange rates, the growth in operating overhead expense was 15%.

Fiscal 2012 Compared to Fiscal 2011

Overall, selling and administrative expense grew at a slower rate than revenues for fiscal 2012.

Demand creation expense increased 11% compared to the prior year, mainly driven by an increase in sports marketing expense, marketing support for key product initiatives, including the NIKE Fuelband and NFL launch, as well as an increased level of brand event spending in advance of the European Football Championships and London Summer Olympics. For fiscal 2012, changes in currency exchange rates increased the growth of demand creation expense by 1 percentage point.

Compared to the prior year, operating overhead expense increased 11%, primarily attributable to increased investments in our Direct to Consumer operations, higher personnel costs as well as travel expenses to support the growth of our overall business. For fiscal 2012, changes in currency exchange rates increased the growth of operating overhead expense by 1 percentage point.

Other (Income) Expense, net

(In millions)

| | Fiscal 2013 | Fiscal 2012 | Fiscal 2011 |
|-----------------------------|-------------|-------------|-------------|
| Other (income) expense, net | \$ (15 |) \$ 54 | \$(25) |

Other (income) expense, net is comprised of foreign currency conversion gains and losses from the re-measurement of monetary assets and liabilities denominated in non-functional currencies, the impact of certain foreign currency derivative instruments, as well as unusual or non-operating transactions that are outside the normal course of business.

Fiscal 2013 Compared to Fiscal 2012

For fiscal 2013, other (income), net increased \$69 million compared to the prior year. This change was primarily driven by a \$48 million decrease in foreign currency net losses in the current year as well as the recognition of a \$24 million restructuring charge for NIKE Brand's Western Europe operations in the prior year. These positive impacts were partially offset by smaller net gains from non-operating items.

We estimate the combination of the translation of foreign currency-denominated profits from our international businesses and the year-over-year change in foreign currency related gains and losses included in other (income) expense, net had an unfavorable impact on our income before income taxes of \$56 million for fiscal 2013.

Fiscal 2012 Compared to Fiscal 2011

For fiscal 2012, other expense, net increased \$79 million compared to the prior year. This change was primarily driven by a \$77 million change in foreign currency net gains in the prior year to net losses in the current year. These impacts, together with a \$24 million charge recognized during the fourth quarter of fiscal 2012 for the restructuring of NIKE Brand's Western Europe operations, were partially offset by certain net gains related to non-operating items.

We estimate the combination of translation of foreign currency-denominated profits from our international businesses and the year-over-year change in foreign currency related gains and losses included in other expense, net did not have a significant impact on our income before income taxes for fiscal 2012.

Income Taxes

| | Fiscal 2013 | Fiscal 2012 | FY13 vs. FY12 % Change | Fiscal 2011 | FY12 vs. FY11 % Change |
|--------------------|-------------|-------------|------------------------------|-------------|---------------------------|
| Effective tax rate | 24.7 | % 25.0 | % (30) bps | 24.1 | % 90 bps |

Fiscal 2013 Compared to Fiscal 2012

The 30 basis point decrease in our effective tax rate for the fiscal year was primarily driven by the U.S. legislative retroactive reinstatement of the research and development tax credit and a reduction of tax reserves on foreign operations, partially offset by an increase in the percentage of earnings in higher tax jurisdictions.

Fiscal 2012 Compared to Fiscal 2011

Our effective tax rate for fiscal 2012 was 90 basis points higher than the effective tax rate for fiscal 2011 primarily due to changes in estimates of uncertain tax positions. This impact was partially offset by a reduction in the effective tax rate on operations outside of the United States as a result of changes in geographical mix of foreign earnings.

Discontinued Operations

The Company continually evaluates its existing portfolio of businesses to ensure resources are invested in those businesses that are accretive to the NIKE Brand and represent the largest growth potential and highest returns. On May 31, 2012, the Company announced its intention to divest of Umbro and Cole Haan, allowing it to focus its resources on driving growth in the NIKE, Jordan, Converse and Hurley brands.

Table of Contents

On February 1, 2013, the Company completed the sale of Cole Haan to Apax Partners for an agreed upon purchase price of \$570 million and received at closing \$561 million, net of \$9 million of purchase price adjustments. The transaction resulted in a gain on sale of \$231 million, net of \$137 million in tax expense; this gain is included in the net income (loss) from discontinued operations line item on the consolidated statements of income.

Beginning November 30, 2012, we classified the Cole Haan disposal group as held-for-sale and presented the results of Cole Haan's operations in the net income (loss) from discontinued operations line item on the consolidated statements of income. From this date until the sale, the assets and liabilities of Cole Haan were recorded as assets and liabilities of discontinued operations on the consolidated balance sheets of NIKE, Inc. Previously, these amounts were reported in our segment presentation as "Other Businesses."

Under the sale agreement, we agreed to provide certain transition services to Cole Haan for an expected period of 3 to 9 months from the date of sale. We will also license NIKE proprietary Air and Lunar technologies to Cole Haan for a transition period. The continuing cash flows related to these items are not expected to be significant to Cole Haan and we will have no significant continuing involvement with Cole Haan beyond the transition services. Additionally, preexisting guarantees of certain Cole Haan lease payments remain in place after the sale; the maximum exposure under the guarantees is \$44 million at May 31, 2013. The fair value of these guarantees is not material.

On November 30, 2012, we completed the sale of certain assets of Umbro to Iconix Brand Group ("Iconix") for \$225 million. The results of Umbro's operations and Umbro's financial position are presented as discontinued operations on the consolidated statements of income and balance sheets, respectively. Previously, these amounts were reported in our segment presentation as "Other Businesses." Upon meeting the held-for-sale criteria, we recorded a loss of \$107 million, net of tax, on the sale of Umbro. The loss on sale was calculated as the net sales price less the Umbro assets of \$248 million, including intangibles, goodwill, and fixed assets, other miscellaneous charges of \$22 million, and the release of the associated cumulative translation adjustment of \$129 million, offset by a \$67 million tax benefit on the loss.

Under the sale agreement, we provided transition services to Iconix while certain markets were transitioned to Iconix-designated licensees. These transition services are substantially complete and we have wound down the remaining operations of Umbro.

For the year ended May 31, 2013, net income (loss) from discontinued operations included, for both businesses, the net gain or loss on sale, net operating losses, tax expenses, and approximately \$20 million in wind down costs.

Operating Segments

The Company's reportable operating segments are based on our internal geographic organization. Each NIKE Brand geography operates predominantly in one industry: the design, development, marketing and selling of athletic footwear, apparel, and equipment. Our reportable operating segments for the NIKE Brand are: North America, Western Europe, Central & Eastern Europe, Greater China, Japan, and Emerging Markets. Our NIKE Brand Direct to Consumer operations are managed within each geographic segment.

As part of our centrally managed foreign exchange risk management program, standard foreign currency rates are assigned twice per year to each NIKE Brand entity in our geographic operating segments and certain Other Businesses. These rates are set approximately nine months in advance of the future selling season based on average market spot rates in the calendar month preceding the date they are established. Inventories and cost of sales for geographic operating segments and certain Other Businesses reflect use of these standard rates to record non-functional currency product purchases into the entity's functional currency. Differences between assigned standard foreign currency rates and actual market rates are included in Corporate together with foreign currency hedge gains and losses generated from our centrally managed foreign exchange risk management program.

Certain prior year amounts have been reclassified to conform to fiscal 2013 presentation.

The breakdown of revenues is as follows:

| (Dollars in millions) | Fiscal 2013 | Fiscal 2012 ⁽¹⁾ FY12 | FY13 vs. FY12 % Change | FY13 vs. FY12 % Change Excluding Currency | Fiscal 2011 ⁽¹⁾ FY11 | FY12 vs. FY11 % Change | FY12 vs. FY11 % Change Excluding Currency |

(1) Certain prior year amounts have been reclassified to conform to fiscal 2013 presentation. These changes had no impact on previously reported results of operations or shareholders' equity.

Results have been restated using actual exchange rates in use during the comparative period to enhance the (2) visibility of the underlying business trends by excluding the impact of translation arising from foreign currency exchange rate fluctuations.

Table of Contents

Corporate revenues primarily consist of certain intercompany revenue eliminations and foreign currency hedge (3) gains and losses related to revenues generated by entities within the NIKE Brand geographic operating segments and certain Other Businesses but managed through our central foreign exchange risk management program. The primary financial measure used by the Company to evaluate performance of individual operating segments is earnings before interest and taxes (commonly referred to as "EBIT") which represents net income before interest (income) expense, net and income taxes in the consolidated statements of income. As discussed in Note 18 — Operating Segments and Related Information in the accompanying notes to the consolidated financial statements, certain corporate costs are not included in EBIT of our operating segments. The breakdown of earnings before interest and taxes is as follows:

| (Dollars in millions) | Fiscal 2013 | Fiscal 2012 ⁽¹⁾ | FY13 vs. FY12 % Change | Fiscal 2011 ⁽¹⁾ | FY12 vs. FY11 % Change | |
|--|----------------|----------------------------|---------------------------|----------------------------|---------------------------|----------|

Fiscal 2013 Compared to Fiscal 2012

Our category offense continued to deliver innovative products, deep brand connections, and compelling retail experiences to consumers in North America, driving increased demand for NIKE Brand products across all key categories except Action Sports. Our Basketball, Men's Training, Running, and Sportswear categories drove the revenue growth in fiscal 2013. North America's Direct to Consumer revenue growth for fiscal 2013 was fueled by 15% growth in comparable store sales as well as the addition of new stores and rapid growth in online sales. North America footwear revenue growth was driven by higher demand in all seven key categories, most notably Basketball, Running, and Sportswear. Both unit sales and average selling price per pair increased 7% in fiscal 2013. The increase in average selling price per pair was driven approximately equally by price increases and a favorable mix of higher priced products. Apparel revenue growth in North America was driven by higher demand in our Men's Training category, reflecting the addition of the NFL licensed business, as well as Basketball, Women's Training, and Running. Unit sales increased 10% while average selling price per unit increased 12%, largely driven by a favorable mix of higher priced products.

Table of Contents

North America EBIT increased faster than revenue due to gross margin expansion and selling and administrative expense leverage. Gross margin increased 50 basis points for fiscal 2013, reflecting the favorable impact of selling price increases, partially offset by higher product costs, an unfavorable mix of lower margin products and royalties for the NFL business. Selling and administrative expenses increased versus fiscal 2012, though at a rate slower than revenue; the growth was largely driven by higher demand creation expense for the Olympics in the first quarter of fiscal 2013 as well as key product initiatives, including the NFL launch, and higher operating overhead costs to support the expansion of our Direct to Consumer business and overall growth of the business.

Fiscal 2012 Compared to Fiscal 2011

Revenues for North America increased 17% for fiscal 2012, driven by growth in both wholesale and Direct to Consumer revenues. Our category offense continued to deliver innovative products, deep brand connections and compelling retail experiences to consumers, driving demand for NIKE Brand products across all seven key categories. North America's Direct to Consumer revenues grew 19% for fiscal 2012, driven by 15% growth in comparable store sales.

For fiscal 2012, footwear revenue in North America increased 15%, driven by an increase in both unit sales and average selling prices. Unit sales rose at a double-digit rate while average selling price per pair grew at a mid-single-digit rate, reflective of product price increases, partially offset by higher discounts on close-out sales. The overall increase in footwear sales was driven by growth in all key categories, most notably Running, Basketball, Women's Training and Sportswear.

Compared to the prior year, apparel revenue for North America increased 18%, primarily driven by a low-double-digit percentage growth in average selling price per unit and a mid-single-digit percentage growth in unit sales. The increase in average selling price per unit was reflective of product price increases and a greater mix of higher price point products. The overall increase in apparel sales was driven by double-digit percentage growth across most key categories, including Men's Training, Running and Basketball.

For fiscal 2012, EBIT for North America increased 17% as revenue growth and improved selling and administrative expense leverage more than offset a decline in gross margin. Gross margin decreased 90 basis points during fiscal 2012, primarily due to higher product input costs and lower gross margins on close-out sales, which more than offset the favorable impact of selling price increases, lower air freight costs and the growth of our Direct to Consumer business. Selling and administrative expense as a percentage of revenue decreased by 70 basis points for fiscal 2012, as both demand creation and operating overhead expense grew at a slower rate than revenues.

Fiscal 2013 Compared to Fiscal 2012

On a currency neutral basis, most territories in Western Europe reported revenue growth for fiscal 2013, which more than offset revenue declines of 17% and 18% in Italy and Iberia, respectively, reflecting poor economic conditions in Southern Europe. Revenues for the U.K. & Ireland and AGS (Austria, Germany, and Switzerland) territories, the largest markets in Western Europe, increased 8% and 12%, respectively. The growth in Direct to Consumer revenues reflected 17% growth in comparable store sales, the addition of 19 net new factory stores and strong growth in online sales. On a category basis, Western Europe's revenue growth was largely driven by growth in our Running and Basketball categories.

Constant currency footwear revenue growth in Western Europe was primarily driven by growth in Running, Sportswear, and Basketball. Unit sales increased 7% and average selling price per pair increased 3%, the latter primarily the result of price increases.

The constant currency decrease in Western Europe apparel revenues was due to a decline in Sportswear, partially offset by growth in Running, Men's Training, and Basketball. Unit sales in fiscal 2013 decreased 1% while average selling price per unit decreased 3%, as higher discounts on close-out sales more than offset selling price increases. The EBIT growth in fiscal 2013 was driven by a 200 basis point increase in gross margin, partially offset by higher selling and administrative expenses. The gross margin increase was primarily driven by favorable standard foreign currency exchange rates; higher net average selling prices were mostly offset by higher product costs. The increase in selling and administrative expense was mainly driven by an increased level of demand creation spending around the European Football Championships and Olympics in the first quarter of fiscal 2013, as well as higher sports marketing expense. Additionally, operating overhead costs increased to support the expansion of our Direct to Consumer business and overall growth of the business. Fiscal 2013 EBIT growth for Western Europe was also increased by a \$24 million, one-time restructuring charge that was recorded in other (income) expense, net, in the fourth quarter of fiscal 2012.

Table of Contents

Fiscal 2012 Compared to Fiscal 2011

On a currency neutral basis, revenues for Western Europe increased 4% for fiscal 2012, as most territories reported revenue growth, which more than offset revenue declines in the U.K. & Ireland and Italy. Revenues for the U.K. & Ireland, the largest market in Western Europe, declined 3% for the fiscal 2012 period. Western Europe's Direct to Consumer revenues grew 18% for fiscal 2012, including 8% growth in comparable store sales.

Excluding changes in currency exchange rates, footwear revenue in Western Europe increased 5% for fiscal 2012, primarily driven by a low-single-digit percentage growth in both unit sales and average selling price per pair, primarily reflective of product price increases, partially offset by higher discounts on in-line and close-out sales. The overall increase in footwear sales was driven by growth in Running, Basketball and Football (Soccer), which more than offset a decline in Action Sports.

Excluding changes in currency exchange rates, apparel revenue in Western Europe increased 2% for fiscal 2012. The year-over-year change was primarily driven by a mid-single-digit percentage increase in average selling price per unit, reflective of higher product prices. Partially offsetting the increase in average selling price per unit was a mid-single-digit percentage decline in unit sales. The overall increase in apparel sales was driven by growth in Football (Soccer) and Running, which more than offset a decline in Sportswear.

On a reported basis, revenues for Western Europe increased 7% for fiscal 2012. However, EBIT fell 18%, primarily driven by a 350 basis point decline in gross margin and higher selling and administrative expense as a percentage of revenues. The decline in gross margin was driven by higher product input costs and the negative impact from changes in standard currency rates, which more than offset the favorable impact of product price increases and the growth of our Direct to Consumer business. The increase in selling and administrative expense as a percentage of revenues was mainly driven by an increased level of demand creation spending around the European Football Championships and London Summer Olympics. Also reflected in Western Europe's fiscal 2012 results was a \$24 million charge relating to the restructuring of its operations.

Central & Eastern Europe

| (Dollars in millions) | Fiscal 2013 | Fiscal 2012 | FY13 vs. FY12 % Change | FY13 vs. FY12 % Change Excluding Currency Changes | Fiscal 2011 | FY12 vs. FY11 % Change | FY12 vs. FY11 % Change Excluding Currency Changes |
|------------------------------------|-------------|-------------|------------------------|---|-------------|------------------------|---|
| Revenues by: | | | | | | | |
| Footwear | \$714 | \$671 | 6 | % 11 | % \$605 | 11 | % 13 |
| Apparel | 483 | 441 | 10 | % 14 | % 359 | 23 | % 24 |
| Equipment | 90 | 88 | 2 | % 9 | % 76 | 16 | % 17 |
| TOTAL REVENUES | \$1,287 | \$1,200 | 7 | % 12 | % \$1,040 | 15 | % 17 |
| EARNINGS BEFORE INTEREST AND TAXES | \$259 | \$234 | 11 | % | \$244 | -4 | % |

Fiscal 2013 Compared to Fiscal 2012

On a currency neutral basis, Central & Eastern Europe revenues for fiscal 2013 were driven by growth across most territories, particularly Russia and Turkey, which grew 28% and 19%, respectively. Revenue growth in Central & Eastern Europe was driven by growth in all key categories, most notably Running, Football (Soccer), and Sportswear. Constant currency footwear revenue growth in fiscal 2013 was primarily driven by growth in Running, Football (Soccer), and Basketball, partially offset by lower revenues in Sportswear. Unit sales increased 6% while average selling price per pair increased 5%, primarily driven by price increases.

Constant currency apparel revenue growth in fiscal 2013 was driven by growth in nearly all categories, most notably Sportswear, Football (Soccer), and Running. Unit sales increased 16%, while average selling price per unit decreased 2%, as an unfavorable mix of lower priced products more than off-set higher selling prices.

EBIT for Central & Eastern Europe grew faster than revenue primarily due to gross margin improvement and selling and administrative expense leverage. Gross margin increased 30 basis points, largely driven by price increases and the favorable impact of our higher margin Direct to Consumer business, more than offsetting higher product costs and unfavorable standard foreign currency exchange rates.

Fiscal 2012 Compared to Fiscal 2011

Excluding the changes in currency exchange rates, revenues for Central & Eastern Europe increased 17% for fiscal 2012, driven by growth across most territories, including double-digit growth in Russia and Turkey, which more than offset lower revenues in Greece.

Excluding changes in currency exchange rates, Central & Eastern Europe's footwear revenue grew 13%, primarily driven by double-digit percentage growth in unit sales and a low-single-digit percentage increase in average selling price per pair. The increase in average selling price per pair was reflective of product price increases which more than offset the negative impact of higher discounts on in-line and close-out sales. The overall increase in footwear sales was driven by growth across all key categories, most notably Running, Sportswear and Football (Soccer).

Excluding changes in currency exchange rates, Central & Eastern Europe's apparel revenues grew 24%, mainly driven by double-digit percentage growth in unit sales, offset by a slight decrease in average price per unit, mainly due to less favorable product mix and higher discounts on in-line sales, which more than offset the impact from product price increases. The overall increase in apparel sales was primarily driven by growth in Football (Soccer), Sportswear and Running.

Table of Contents

On a reported basis, revenues for Central & Eastern Europe increased 15% for fiscal 2012. However, EBIT fell 4%, primarily driven by a 420 basis point decline in gross margin. The decline in gross margin was primarily due to higher product input costs as well as higher discounts on in-line and close-out products, which more than offset the favorable impact from product price increases. Selling and administrative expense as a percentage of revenues remained relatively flat compared to the prior period.

Greater China

| (Dollars in millions) | Fiscal 2013 | Fiscal 2012 | FY13 vs. FY12 % Change | FY13 vs. FY12 % Change Excluding Currency Changes | Fiscal 2011 | FY12 vs. FY11 % Change | FY12 vs. FY11 % Change Excluding Currency Changes |
|--|----------------|----------------|------------------------------|--|----------------|------------------------------|--|
| Revenues by: | | | | | | | |
| Footwear | \$1,493 | \$1,518 | -2 | % -3 | % \$1,164 | 30 | % 25 |
| Apparel | 829 | 896 | -7 | % -9 | % 789 | 14 | % 9 |
| Equipment | 131 | 125 | 5 | % 3 | % 107 | 17 | % 12 |
| TOTAL REVENUES | \$2,453 | \$2,539 | -3 | % -5 | % \$2,060 | 23 | % 18 |
| EARNINGS BEFORE INTEREST AND TAXES | \$809 | \$911 | -11 | % | \$777 | 17 | % |

Fiscal 2013 Compared to Fiscal 2012

On a currency neutral basis, Greater China revenue decreased in fiscal 2013, driven by lower futures orders as well as increased discounts, product returns and proactive cancellation of orders to manage inventory levels at retail. These downsides were partially offset by 33% growth in our Direct to Consumer business driven by comparable store sales growth of 13% and the addition of 29 net new factory stores. Fiscal 2013 revenues for most key categories were lower than in fiscal 2012.

For fiscal 2013, constant currency footwear revenue growth for Greater China declined, driven by lower sales across most key categories, most notably Sportswear and Men's and Women's Training, and increased reserves for product discounts and returns. Unit sales decreased 1%, while average selling price per pair decreased 2%, reflecting a higher mix of close-out sales and higher discounts.

The decrease in constant currency apparel revenue for fiscal 2013 was driven by lower revenues in Sportswear and Men's and Women's Training, partially offset by higher revenues in Basketball. Apparel unit sales in fiscal 2013 were 3% lower than the prior year while average selling price per unit was down 6%, reflecting a higher mix of close-out sales and higher discounts.

Fiscal 2013 EBIT for Greater China decreased at a faster rate than revenue, driven by lower gross margin and selling and administrative expense deleverage. Fiscal 2013 gross margin decreased 50 basis points due to a lower average selling price per unit driven by higher discounts and close-out mix partially offset by favorable standard foreign currency exchange rates. Selling and administrative expense increased as a percent of revenues, driven primarily by the increased investment in our Direct to Consumer business and the decrease in revenues.

Our results in Greater China have been adversely impacted by sluggish macroeconomic growth and slow product sell-through at retail, leading to high levels of inventory in the marketplace. Our strategy to return to sustained, profitable growth in Greater China focuses on extending our brand leadership position with consumers; expanding the offering of product styles and fits designed for the Chinese consumer; and working with our retail partners to create more differentiated, productive, and profitable retail stores.

Despite the challenges we have seen in China, there are indications that our strategies are taking hold in the marketplace. Comparable store sales are growing in our NIKE-owned Direct to Consumer doors and our wholesale customers are reporting comparable store growth and declining inventory levels. While we are making progress, we will continue to work with our retailers to optimize inventory, accelerate sell-through, and improve retail productivity. While China futures orders for the next six months are in line with last year, we expect revenues for the first half of

the fiscal year will be below last year as we continue to manage the amount of product we ship into the market. We believe our revenue in China will stabilize around prior year levels in the second half of this fiscal year.

Fiscal 2012 Compared to Fiscal 2011

Excluding changes in currency exchange rates, Greater China revenues increased 18% for fiscal 2012, driven by continued expansion in the number of both NIKE mono-branded stores owned by our wholesale customers and NIKE owned stores, as well as higher comparable store sales.

Excluding changes in currency exchange rates, the growth in Greater China's footwear revenue for fiscal 2012 was primarily driven by double-digit percentage growth in unit sales and a mid-single-digit growth in average unit price per pair, reflective of product price increases. The overall increase in footwear sales was driven by double-digit percentage growth across most key categories, led by Running and Sportswear.

Excluding changes in currency exchange rates, the growth in Greater China's apparel revenues for fiscal 2012 was mainly driven by a high-single-digit growth in the average selling price per unit and a low-single-digit percentage increase in unit sales. The increase in average selling price was reflective of product price increases, partially offset by higher discounts on in-line and close-out products to accelerate the sales of slower moving apparel inventories.

On a reported basis, revenues for Greater China increased 23% for fiscal 2012, while EBIT grew 17%, as revenue growth was partially offset by a decline in gross margin and an increase in selling and administrative expense as a percentage of revenues. Gross margin decreased 150 basis points for fiscal 2012, primarily attributable to higher product input costs and discounts on close-out products, which more than offset the favorable impact of product price increases. Selling and administrative expense as a percentage of revenues increased 50 basis points, driven by an increase in operating overhead expense.

Table of Contents

Japan

| (Dollars in millions) | Fiscal 2013 | Fiscal 2012 | FY13 vs. FY12 % Change | FY13 vs. FY12 % Change Excluding Currency Changes | Fiscal 2011 | FY12 vs. FY11 % Change | FY12 vs. FY11 % Change Excluding Currency Changes |
|------------------------------------|-------------|-------------|------------------------|---|-------------|------------------------|---|
| Revenues by: | | | | | | | |
| Footwear | \$429 | \$439 | -2 | % 5 | % \$397 | 11 | % 3 |
| Apparel | 301 | 325 | -7 | % -1 | % 305 | 7 | % -1 |
| Equipment | 61 | 71 | -14 | % -9 | % 71 | 0 | % -5 |
| TOTAL REVENUES | \$791 | \$835 | -5 | % 1 | % \$773 | 8 | % 1 |
| EARNINGS BEFORE INTEREST AND TAXES | \$133 | \$136 | -2 | % | \$114 | 19 | % |

Fiscal 2013 Compared to Fiscal 2012

Excluding changes in currency exchange rates, the revenue increase for Japan was driven by higher revenues in Running, Football (Soccer) and Basketball, partially offset by lower revenues in Sportswear and Men's and Women's Training.

Fiscal 2013 EBIT for Japan decreased as a result of lower revenues, partially offset by gross margin improvement and lower selling and administrative expense. The decrease in selling and administrative expense in fiscal 2013 was attributable to lower operating overhead and demand creation spending.

Fiscal 2012 Compared to Fiscal 2011

During fiscal 2012, the macroeconomic environment in Japan remained uncertain as the market continued to recover from the effects of the earthquake and tsunami that occurred in March 2011. On a currency neutral basis, footwear revenue in Japan increased 3% for fiscal 2012, as growth in Running and Football (Soccer) more than offset a decline in Sportswear.

Excluding changes in currency exchange rates, apparel revenue decreased 1% for fiscal 2012, as the decline in Sportswear more than offset the growth in Running and Football (Soccer).

On a reported basis, EBIT for Japan grew at a faster rate than revenue as a result of improved gross margin and leverage of selling and administrative expenses. The increase in Japan's gross margin was mainly driven by the favorable impact from the year-over-year change in standard currency rates, a decrease in inventory obsolescence expense as well as a lower mix of close-out sales. These favorable impacts were partially offset by higher product input costs.

Emerging Markets

| (Dollars in millions) | Fiscal 2013 | Fiscal 2012 | FY13 vs. FY12 % Change | FY13 vs. FY12 % Change Excluding Currency Changes | Fiscal 2011 | FY12 vs. FY11 % Change | FY12 vs. FY11 % Change Excluding Currency Changes |
|------------------------------------|-------------|-------------|------------------------|---|-------------|------------------------|---|
| Revenues by: | | | | | | | |
| Footwear | \$2,570 | \$2,387 | 8 | % 15 | % \$1,897 | 26 | % 27 |
| Apparel | 918 | 815 | 13 | % 19 | % 657 | 24 | % 25 |
| Equipment | 230 | 209 | 10 | % 17 | % 183 | 14 | % 15 |
| TOTAL REVENUES | \$3,718 | \$3,411 | 9 | % 16 | % \$2,737 | 25 | % 26 |
| EARNINGS BEFORE INTEREST AND TAXES | \$1,011 | \$853 | 19 | % | \$688 | 24 | % |

Fiscal 2013 Compared to Fiscal 2012

For fiscal 2013, constant currency revenue growth for the Emerging Markets geography was driven by growth in every key category and every territory, led by Argentina, Brazil, and Mexico.

Constant currency footwear revenue growth for fiscal 2013 was driven by growth in most key categories, most notably Running, Football (Soccer), and Women's Training. Unit sales increased approximately 9% and average selling price per pair increased 6%, primarily driven by selling price increases.

Fiscal 2013 constant currency apparel revenue was driven by growth in every key category, led by Football (Soccer), Running, Sportswear, and Men's Training. Unit sales increased approximately 10% and average selling price per unit increased 9%, largely attributable to price increases.

Fiscal 2013 Emerging Markets EBIT grew faster than revenue primarily driven by gross margin improvement, partially offset by higher selling and administrative expense as a percent of revenue. Gross margin increased 260 basis points due largely to the favorable impact of price increases, the anniversary of a one-time custom duty charge in fiscal 2012, and favorable standard foreign currency exchange rates, which more than offset the unfavorable impact of higher product costs. As a percent of revenue, selling and administrative expense was higher due to higher operating overhead costs to support the expansion of our Direct to Consumer business and overall growth of the business.

Table of Contents

Fiscal 2012 Compared to Fiscal 2011

Excluding the changes in currency exchange rates, revenues for the Emerging Markets increased 26% for fiscal 2012 as all territories in the geography reported double-digit revenue growth, led by Argentina, Brazil, Mexico and Korea. For fiscal 2012, revenue growth for both footwear and apparel in the Emerging Markets was driven by double-digit percentage growth in unit sales and mid-single-digit percentage growth in average selling price per unit, primarily reflective of product price increases. The overall increase in Emerging Markets' footwear and apparel sales was driven by strong demand in nearly all key categories, led by Running and Sportswear.

The increase in Emerging Markets' EBIT for fiscal 2012 was primarily the result of revenue growth and selling and administrative expense leverage, which more than offset a lower gross margin. Gross margin declined 150 basis points for the fiscal year, primarily due to higher product input costs, customs duty charges and inventory obsolescence expense. These factors were partially offset by the favorable impact of changes in standard currency exchange rates and product price increases. Selling and administrative expense as a percentage of revenues decreased 140 basis points, as both demand creation expense and operating overhead grew at a slower rate than revenues.

Global Brand Divisions

| (Dollars in millions) | Fiscal 2013 | Fiscal 2012 | FY13 vs. FY12 % Change | FY13 vs. FY12 % Change Excluding Currency Changes | Fiscal 2011 | FY12 vs. FY11 % Change | FY12 vs. FY11 % Change Excluding Currency Changes | |
|----------------------------------|----------------|----------------|------------------------------|--|----------------|------------------------------|--|---|
| Revenues | \$117 | \$111 | 5 | % 8 | % \$96 | 16 | % 13 | % |
| (Loss) Before Interest and Taxes | (1,396) | (1,200) | 16 | % | (971) | 24 | % | |

Global Brand Divisions primarily represent demand creation, operating overhead, and product creation and design expenses that are centrally managed for the NIKE Brand. Revenues for the Global Brand Divisions are primarily attributable to NIKE Brand licensing businesses that are not part of a geographic operating segment.

Fiscal 2013 Compared to Fiscal 2012

For fiscal 2013, Global Brand Divisions' loss before interest and taxes increased \$196 million, primarily driven by increased investments and marketing support for our digital business, product creation and design initiatives and higher demand creation spending in the first quarter of fiscal 2013 around the Olympics and European Football Championships.

Fiscal 2012 Compared to Fiscal 2011

For fiscal 2012, Global Brand Divisions' loss before interest and taxes increased \$229 million, primarily driven by increased investments in our digital business and infrastructure for our Direct to Consumer operations, higher sports marketing expense as well as higher personnel costs to support our global brand functions.

Other Businesses

| (Dollars in millions) | Fiscal 2013 | Fiscal 2012 | FY13 vs. FY12 % Change | FY13 vs. FY12 % Change Excluding Currency Changes | Fiscal 2011 | FY12 vs. FY11 % Change | FY12 vs. FY11 % Change Excluding Currency Changes | |

EARNINGS BEFORE
INTEREST AND TAXES

Fiscal 2013 Compared to Fiscal 2012

Our Other Businesses are comprised of Converse, NIKE Golf, and Hurley.

Other Businesses revenue growth in fiscal 2013 reflects growth in each of our Other Businesses. Revenue growth at Converse was primarily driven by increased sales in the UK as well as in China, as we transitioned that market to direct distribution in the second half of fiscal 2012. The increase in fiscal 2013 revenue for NIKE Golf was driven by double-digit growth in each of our apparel, footwear, and club businesses.

The fiscal 2013 increase in EBIT for our Other Businesses was driven by improved profits for all of our Other Businesses.

Table of Contents

Fiscal 2012 Compared to Fiscal 2011

For fiscal 2012, revenues for our Other Businesses increased 12%, reflecting growth across most businesses, led by Converse. The revenue growth at Converse was primarily driven by increased sales in North America and China, as well as increased revenues in the U.K. as we transitioned that market to direct distribution in the second half of fiscal 2011. Excluding changes in currency exchange rates, revenues for NIKE Golf increased 9% for fiscal 2012, driven by double-digit percentage growth in our apparel business, partially offset by a single-digit percentage decline in our club business.

On a reported basis, revenues for our Other Businesses increased 13% for fiscal 2012, while EBIT grew 9%, as earnings growth at Converse was partially off-set by losses at Hurley. Higher selling and administrative expense as a percentage of revenues negatively affected profitability and lower gross margins contributed to the decline in Hurley's earnings.

Corporate

| (Dollars in millions) | Fiscal 2013 | Fiscal 2012 | FY13 vs. FY12 % Change | Fiscal 2011 | FY12 vs. FY11 % Change | |
|----------------------------------|-------------|-------------|------------------------------|-------------|------------------------------|---|
| Revenues | \$(68) | \$(46) | — | \$(77) | — | |
| (Loss) Before Interest and Taxes | (1,177) | (917) | 28 | % (805) | 14 | % |

Corporate revenues primarily consist of certain intercompany revenue eliminations and foreign currency hedge gains and losses related to revenues generated by entities within the NIKE Brand geographic operating segments and certain Other Businesses but managed through our central foreign exchange risk management program.

Corporate loss before interest and taxes consists largely of unallocated general and administrative expenses, including expenses associated with centrally managed departments; depreciation and amortization related to our corporate headquarters; unallocated insurance, benefit and compensation programs, including stock-based compensation; certain foreign currency gains and losses, including certain hedge gains and losses; certain intercompany eliminations and other items.

In addition to the foreign currency gains and losses recognized in Corporate revenues, foreign currency results included in gross margin are gains and losses resulting from the difference between actual foreign currency rates and standard rates used to record non-functional currency denominated product purchases within the NIKE Brand geographic operating segments and certain Other Businesses and related foreign currency hedge results. All other foreign currency related results, including conversion gains and losses arising from re-measurement of monetary assets and liabilities in non-functional currencies and certain foreign currency derivative instruments, are included in other (income) expense, net.

Fiscal 2013 Compared to Fiscal 2012

For fiscal 2013, Corporate's loss before interest and taxes increased by \$260 million primarily due to the following:
 A \$165 million increase in foreign exchange losses related to the difference between actual foreign currency exchange rates and standard foreign currency exchange rates assigned to the NIKE Brand geographic operating segments and certain Other Businesses, net of hedge gains; these losses are reported as a component of consolidated gross margin.
 A \$48 million decrease in foreign currency net losses, reported as a component of consolidated other (income) expense, net.

A \$143 million increase in corporate overhead expense related to corporate initiatives to support the growth of the business and performance-based compensation.

Fiscal 2012 Compared to Fiscal 2011

For fiscal 2012, Corporate's loss before interest and taxes grew \$112 million, mainly due to an increase of \$49 million in performance-based compensation and a year-over-year net increase of \$73 million from foreign currency impacts. These foreign currency impacts were driven by a year-over-year increase in foreign currency net losses, arising from certain Euro/U.S. Dollar foreign currency hedges and the re-measurement of monetary assets and liabilities in various non-functional currencies, net of related undesignated forward instruments, as a variety of foreign currencies weakened against the U.S. Dollar year-over-year. The above impacts were partially offset by a slight decrease in

centrally managed operating overhead expenses.

Foreign Currency Exposures and Hedging Practices

Overview

As a global company with significant operations outside the United States, in the normal course of business we are exposed to risk arising from changes in currency exchange rates. Our primary foreign currency exposures arise from the recording of transactions denominated in non-functional currencies and the translation of foreign currency denominated results of operations, financial position and cash flows into U.S. Dollars.

Our foreign exchange risk management program is intended to lessen both the positive and negative effects of currency fluctuations on our consolidated results of operations, financial position and cash flows. We manage global foreign exchange risk centrally on a portfolio basis to address those risks that are material to NIKE, Inc. We manage these exposures by taking advantage of natural offsets and currency correlations that exist within the portfolio and where practical and material, by hedging a portion of the remaining exposures using derivative instruments such as forward contracts and options. As described below, the implementation of the NIKE Trading Company ("NTC") and our foreign currency adjustment program enhanced our ability to manage our foreign exchange risk by increasing the natural offsets and currency correlation benefits that exist within our portfolio of foreign exchange exposures. Our hedging policy is designed to partially or entirely offset the impact of exchange rate changes

Table of Contents

on the underlying net exposures being hedged. Where exposures are hedged, our program has the effect of delaying the impact of exchange rate movements on our consolidated financial statements; the length of the delay is dependent upon hedge horizons. We do not hold or issue derivative instruments for trading or speculative purposes.

Transactional exposures

We conduct business in various currencies and have transactions which subject us to foreign currency risk. Our most significant transactional foreign currency exposures are:

- **Product Costs** — NIKE’s product costs are exposed to fluctuations in foreign currencies in the following ways:
 1. **Product purchases denominated in currencies other than the functional currency of the transacting entity:**

Certain NIKE entities purchase product from the NTC, a wholly-owned sourcing hub that buys NIKE branded products from third party factories, predominantly in U.S. Dollars. The NTC, whose functional currency is the U.S. Dollar, then sells the products to NIKE entities in their respective functional currencies. When the NTC sells to a NIKE entity with a different functional currency, the result is a foreign currency exposure for the NTC.
 - a. U.S. Dollar, then sells the products to NIKE entities in their respective functional currencies. When the NTC sells to a NIKE entity with a different functional currency, the result is a foreign currency exposure for the NTC.
 - b. Other NIKE entities purchase product directly from third-party factories in U.S. Dollars. These purchases generate a foreign currency exposure for those NIKE entities with a functional currency other than the U.S. Dollar.

In both purchasing scenarios, a weaker U.S. Dollar reduces the inventory cost incurred by NIKE whereas a stronger U.S. Dollar increases its cost.

- 2. **Factory input costs:** In January 2012, NIKE implemented a foreign currency adjustment program with certain factories. The program is designed to more effectively manage foreign currency risk by assuming certain of the factories’ foreign currency exposures, some of which are natural offsets to our existing foreign currency exposures. Under this program, our payments to these factories are adjusted for rate fluctuations in the basket of currencies (“factory currency exposure index”) in which the labor, materials and overhead costs incurred by the factories in the production of NIKE branded products (“factory input costs”) are denominated.

For the currency within the factory currency exposure indices that is the local or functional currency of the factory, the currency rate fluctuation affecting the product cost is recorded within inventories and is recognized in cost of sales when the related product is sold to a third-party. All currencies within the indices, excluding the U.S. Dollar and the local or functional currency of the factory, are recognized as embedded derivative contracts and are recorded at fair value through other (income) expense, net. Refer to Note 17 — Risk Management and Derivatives for additional detail. As an offset to the impacts of the fluctuating U.S. Dollar on our non-functional currency denominated product purchases described above, a strengthening U.S. Dollar against the foreign currencies within the factory currency exposure indices decreases NIKE’s U.S. Dollar inventory cost. Conversely, a weakening U.S. Dollar against the indexed foreign currencies increases our inventory cost.

- **Non-Functional Currency Denominated External Sales** — A portion of our Western Europe and Central & Eastern Europe geography revenues are earned in currencies other than the Euro (e.g. British Pound) but are recognized at a subsidiary that uses the Euro as its functional currency. These sales generate a foreign currency exposure.
- **Other Costs** — Non-functional currency denominated costs, such as endorsement contracts, intercompany royalties and other intercompany charges, also generate foreign currency risk though to a lesser extent.
- **Non-Functional Currency Denominated Monetary Assets and Liabilities** — Our global subsidiaries have various assets and liabilities, primarily receivables and payables, denominated in currencies other than their functional currencies. These balance sheet items are subject to re-measurement, which may create fluctuations in other (income) expense, net within our consolidated results of operations.

Managing transactional exposures

Transactional exposures are managed on a portfolio basis within our foreign currency risk management program. We manage these exposures by taking advantage of natural offsets and currency correlations that exist within the portfolio and may also elect to use currency forward and option contracts to hedge the remaining effect of exchange rate fluctuations on probable forecasted future cash flows, including certain product cost exposures, non-functional currency denominated external sales and other costs described above. Generally, these are accounted for as cash flow hedges in accordance with the accounting standards for derivatives and hedging, except for hedges of the embedded

derivatives component of the product cost exposures as discussed below..

Certain currency forward contracts used to manage the foreign exchange exposure of non-functional currency denominated monetary assets and liabilities subject to re-measurement and the embedded derivative contracts discussed above are not formally designated as hedging instruments under the accounting standards for derivatives and hedging. Accordingly, changes in fair value of these instruments are immediately recognized in other (income) expense, net and are intended to offset the foreign currency impact of the re-measurement of the related non-functional currency denominated asset or liability or the embedded derivative contract being hedged.

Refer to Note 6 — Fair Value Measurements and Note 17 – Risk Management and Derivatives in the accompanying Notes to the Consolidated Financial Statements for additional description of how the above financial instruments are valued and recorded as well as the fair value of outstanding derivatives at period end.

Translational exposures

Many of our foreign subsidiaries operate in functional currencies other than the U.S. Dollar. Fluctuations in currency exchange rates create volatility in our reported results as we are required to translate the balance sheets, operational results and cash flows of these subsidiaries into U.S. Dollars for consolidated reporting. The translation of foreign subsidiaries' non-U.S. Dollar denominated balance sheets into U.S. Dollars for consolidated reporting results in a cumulative translation adjustment to OCI within shareholders' equity. In the translation of our consolidated statements of income, a weaker U.S. Dollar in relation to foreign functional currencies benefits our consolidated earnings whereas a stronger U.S. Dollar reduces our consolidated earnings. The impact of foreign exchange rate fluctuations on the translation of our consolidated revenues was a benefit (detriment) of approximately \$(605) million and \$268 million for the years ended May 31, 2013 and 2012, respectively. The impact of foreign exchange rate

Table of Contents

fluctuations on the translation of our income before income taxes was a benefit (detriment) of approximately \$(104) million and \$74 million for the years ended May 31, 2013 and 2012, respectively.

Managing translational exposures

To minimize the impact of translating foreign currency denominated revenues and expenses into U.S. Dollars for consolidated reporting, certain foreign subsidiaries use excess cash to purchase U.S. Dollar denominated available-for-sale investments. The variable future cash flows associated with the purchase and subsequent sale of these U.S. Dollar denominated securities at non-U.S. Dollar functional currency subsidiaries creates a foreign currency exposure that qualifies for hedge accounting under the accounting standards for derivatives and hedging. We utilize forward contracts and/or options to mitigate the variability of the forecasted future purchases and sales of these U.S. Dollar investments. The combination of the purchase and sale of the U.S. Dollar investment and the hedging instrument has the effect of partially offsetting the year-over-year foreign currency translation impact on net earnings in the period the investments are sold. Hedges of available-for-sale investments are accounted for as cash flow hedges. Refer to Note 6 — Fair Value Measurements and Note 17 — Risk Management and Derivatives in the accompanying Notes to the Consolidated Financial Statements for additional description of how the above financial instruments are valued and recorded as well as the fair value of outstanding derivatives at period end.

We estimate the combination of translation of foreign currency-denominated profits from our international businesses and the year-over-year change in foreign currency related gains and losses included in other (income) expense, net had an unfavorable impact of approximately \$56 million on our income before income taxes for the year ended May 31, 2013 and had an insignificant impact for the year ended May 31, 2012.

Net investments in foreign subsidiaries

We are also exposed to the impact of foreign exchange fluctuations on our investments in wholly-owned foreign subsidiaries denominated in a currency other than the U.S. Dollar, which could adversely impact the U.S. Dollar value of these investments and therefore the value of future repatriated earnings. We have hedged and may, in the future, hedge net investment positions in certain foreign subsidiaries to mitigate the effects of foreign exchange fluctuations on these net investments. In accordance with the accounting standards for derivatives and hedging, the effective portion of the change in fair value of the forward contracts designated as net investment hedges is recorded in the cumulative translation adjustment component of accumulated other comprehensive income. Any ineffective portion is immediately recognized in earnings as a component of other (income) expense, net. The impact of ineffective hedges was not material for any period presented. To minimize credit risk, we have structured these net investment hedges to be generally less than six months in duration. Upon maturity, the hedges are settled based on the current fair value of the forward contracts with the realized gain or loss remaining in OCI. There were no outstanding net investment hedges as of May 31, 2013 and 2012. Cash flows from net investment hedge settlements totaled \$22 million for the year ended May 31, 2012.

Liquidity and Capital ResourcesCash Flow Activity

Cash provided by operations was \$3.0 billion for fiscal 2013 compared to \$1.9 billion for fiscal 2012. Our primary source of operating cash flow for fiscal 2013 was net income of \$2.5 billion. Our fiscal 2013 change in working capital was a net cash outflow of \$42 million, which is exclusive of working capital amounts sold as part of the divestitures of Umbro and Cole Haan, as compared to a net cash outflow of \$799 million for fiscal 2012. Our investments in working capital decreased due to slowing growth in inventory and reductions in accounts receivable compared to the prior year. During fiscal 2013, inventory for continuing operations increased 7% compared to a 23% increase for fiscal 2012; the slowing growth was driven by our continued focus on increasing inventory productivity. The reduction in accounts receivable was primarily driven by the collection of receivables related to discontinued operations.

Cash used by investing activities was \$1,067 million during fiscal 2013, compared to a \$514 million source of cash for fiscal 2012. A major driver of the change was the swing from net sales/maturities of short-term investments in fiscal 2012 to net purchases of short-term investments in fiscal 2013, reflective of the additional purchases of short-term investments made with the proceeds from the issuance of long term debt in April 2013. In fiscal 2012, there were

\$1,124 million of net sales/maturities of short-term investments (net of purchases), while in fiscal 2013 we made \$1,203 million in net purchases of short-term investments (net of sales/maturities). This impact was partially offset by \$786 million in proceeds from the sale of Umbro and Cole Haan in fiscal 2013.

Cash used by financing activities was \$1,040 million for fiscal 2013 compared to \$2,118 million for fiscal 2012. The decrease in cash used by financing activities was primarily due to \$986 million in proceeds from the issuance of long-term debt in April 2013. Also contributing to the decrease were lower payments of long-term debt and notes payable and lower repurchases of common stock, which were partially offset by a reduction in the proceeds from the exercise of stock options.

In fiscal 2013, we purchased 33.5 million shares of NIKE's class B common stock for \$1.7 billion, an average price of \$49.50. During the year, we completed the four-year, \$5 billion share repurchase program approved by our Board of Directors in September 2008. Under that program, we purchased a total of 118.8 million shares at an average price of \$42.08. Subsequently, we began repurchases under a four-year, \$8 billion program approved by the Board in September 2012. As of the end of fiscal 2013, we had repurchased 15.3 million shares at a cost of \$789 million under this current program. We continue to expect funding of share repurchases will come from operating cash flow, excess cash, and/or debt. The timing and the amount of shares purchased will be dictated by our capital needs and stock market conditions.

Capital Resources

On April 23, 2013, we filed a shelf registration statement (the "Shelf") with the SEC which permits us to issue an unlimited amount of debt securities. The Shelf expires on April 23, 2017. On April 23, 2013, we issued \$1.0 billion of senior notes with tranches maturing in 2023 and 2043. The 2023 senior notes were issued in an initial aggregate principal amount of \$500 million at a 2.25% fixed, annual interest rate and will mature on May 1, 2023. The 2043 senior notes were issued in an initial aggregate principal amount of \$500 million at a 3.625% fixed, annual interest rate and will mature on May 1, 2043. Interest on the senior notes is payable semi-annually on May 1 and November 1 of each year. The issuance resulted in gross proceeds before expenses of \$998 million. We will use the net proceeds for general corporate purposes, which may include, but are not

Table of Contents

limited to, discharging or refinancing debt, working capital, capital expenditures, share repurchases, as yet unplanned acquisitions of assets or businesses and investments in subsidiaries.

On November 1, 2011, we entered into a committed credit facility agreement with a syndicate of banks which provides for up to \$1 billion of borrowings with the option to increase borrowings to \$1.5 billion with lender approval. The facility matures November 1, 2016, with a one-year extension option prior to both the second and third anniversary of the closing date, provided that extensions shall not extend beyond November 1, 2018. As of and for the year ended May 31, 2013, we had no amounts outstanding under our committed credit facility.

We currently have long-term debt ratings of A+ and A1 from Standard and Poor's Corporation and Moody's Investor Services, respectively. If our long-term debt rating were to decline, the facility fee and interest rate under our committed credit facility would increase. Conversely, if our long-term debt rating were to improve, the facility fee and interest rate would decrease. Changes in our long-term debt rating would not trigger acceleration of maturity of any then-outstanding borrowings or any future borrowings under the committed credit facility. Under this committed revolving credit facility, we have agreed to various covenants. These covenants include limits on our disposal of fixed assets, the amount of debt secured by liens we may incur, as well as a minimum capitalization ratio. In the event we were to have any borrowings outstanding under this facility and failed to meet any covenant, and were unable to obtain a waiver from a majority of the banks in the syndicate, any borrowings would become immediately due and payable. As of May 31, 2013, we were in full compliance with each of these covenants and believe it is unlikely we will fail to meet any of these covenants in the foreseeable future.

Liquidity is also provided by our \$1 billion commercial paper program. During the year ended May 31, 2013, we issued and subsequently repaid commercial paper borrowings of \$505 million. As of May 31, 2013, there were no outstanding borrowings under this program. We may continue to issue commercial paper or other debt securities during fiscal 2014 depending on general corporate needs. We currently have short-term debt ratings of A1 and P1 from Standard and Poor's Corporation and Moody's Investor Services, respectively.

As of May 31, 2013, we had cash, cash equivalents and short-term investments totaling \$6.0 billion, of which \$3.5 billion was held by our foreign subsidiaries. Cash equivalents and short-term investments consist primarily of deposits held at major banks, money market funds, Tier-1 commercial paper, corporate notes, U.S. Treasury obligations, U.S. government sponsored enterprise obligations, and other investment grade fixed income securities. Our fixed income investments are exposed to both credit and interest rate risk. All of our investments are investment grade to minimize our credit risk. While individual securities have varying durations, as of May 31, 2013 the average duration of our short-term investments and cash equivalents portfolio is 98 days.

Despite recent uncertainties in the financial markets, to date we have not experienced difficulty accessing the credit markets or incurred higher interest costs. Future volatility in the capital markets, however, may increase costs associated with issuing commercial paper or other debt instruments or affect our ability to access those markets. We believe that existing cash, cash equivalents, short-term investments and cash generated by operations, together with access to external sources of funds as described above, will be sufficient to meet our domestic and foreign capital needs in the foreseeable future.

We utilize a variety of tax planning and financing strategies to manage our worldwide cash and deploy funds to locations where they are needed. We routinely repatriate a portion of our foreign earnings for which U.S. taxes have previously been provided. We also indefinitely reinvest a significant portion of our foreign earnings, and our current plans do not demonstrate a need to repatriate these earnings. Should we require additional capital in the U.S., we may elect to repatriate indefinitely reinvested foreign funds or raise capital in the U.S. through debt. If we were to repatriate indefinitely reinvested foreign funds, we would be required to accrue and pay additional U.S. taxes less applicable foreign tax credits. If we elect to raise capital in the U.S. through debt, we would incur additional interest expense.

Off-Balance Sheet Arrangements

In connection with various contracts and agreements, we routinely provide indemnifications relating to the enforceability of intellectual property rights, coverage for legal issues that arise and other items where we are acting as the guarantor. Currently, we have several such agreements in place. However, based on our historical experience and the estimated probability of future loss, we have determined that the fair value of such indemnifications is not material

to our financial position or results of operations.

Contractual Obligations

Our significant long-term contractual obligations as of May 31, 2013 and significant endorsement contracts entered into through the date of this report are as follows:

| Description of Commitment (In millions) | Cash Payments Due During the Year Ending May 31, | | | | | | Total |
|---|--|----------------|----------------|--------------|--------------|----------------|-----------------|
| | 2014 | 2015 | 2016 | 2017 | 2018 | Thereafter | |
| Operating Leases | \$403 | \$340 | \$304 | \$272 | \$225 | \$816 | \$2,360 |
| Capital Leases | 23 | 28 | 21 | 9 | — | — | 81 |
| Long-term Debt | 98 | 46 | 145 | 79 | 56 | 1,525 | 1,949 |
| Endorsement Contracts ⁽¹⁾ | 909 | 790 | 586 | 450 | 309 | 559 | 3,603 |
| Product Purchase Obligations ⁽²⁾ | 3,273 | — | — | — | — | — | 3,273 |
| Other ⁽³⁾ | 304 | 89 | 52 | 82 | 4 | 18 | 549 |
| TOTAL | \$5,010 | \$1,293 | \$1,108 | \$892 | \$594 | \$2,918 | \$11,815 |

The amounts listed for endorsement contracts represent approximate amounts of base compensation and minimum guaranteed royalty fees we are obligated to pay athlete and sport team endorsers of our products. Actual payments under some contracts may be higher than the amounts listed as these contracts provide for bonuses to be paid to the endorser based upon athletic achievements and/or royalties on product sales in future periods. Actual payments under some contracts may also be lower as these contracts include provisions for reduced payments if athletic performance declines in future periods.

In addition to the cash payments, we are obligated to furnish our endorsers with NIKE product for their use. It is not possible to determine how much we will spend on this product on an annual basis as the contracts generally do not stipulate a specific amount of cash to be spent on the product. The amount of product provided to the endorsers will depend on many factors, including general playing conditions, the number

Table of Contents

of sporting events in which they participate, and our own decisions regarding product and marketing initiatives. In addition, the costs to design, develop, source, and purchase the products furnished to the endorsers are incurred over a period of time and are not necessarily tracked separately from similar costs incurred for products sold to customers.

We generally order product at least 4 to 5 months in advance of sale based primarily on futures orders received from customers. The amounts listed for product purchase obligations represent agreements (including open purchase orders) to purchase products in the ordinary course of business that are enforceable and legally binding and that specify all significant terms. In some cases, prices are subject to change throughout the production process. The reported amounts exclude product purchase liabilities included in accounts payable on the consolidated balance sheet as of May 31, 2013.

Other amounts primarily include service and marketing commitments made in the ordinary course of business. The amounts represent the minimum payments required by legally binding contracts and agreements that specify all significant terms, including open purchase orders for non-product purchases. The reported amounts exclude those liabilities included in accounts payable or accrued liabilities on the consolidated balance sheet as of May 31, 2013. The total liability for uncertain tax positions was \$447 million, excluding related interest and penalties, at May 31, 2013. We are not able to reasonably estimate when or if cash payments of the long-term liability for uncertain tax positions will occur.

We also have the following outstanding short-term debt obligations as of May 31, 2013. Refer to Note 7 — Short-Term Borrowings and Credit Lines for further description and interest rates related to the short-term debt obligations listed below.

| (In millions) | Outstanding as of May 31, 2013 |
|--|-----------------------------------|
| Notes payable, due at mutually agreed-upon dates within one year of issuance or on demand | \$121 |
| Payable to Sojitz America for the purchase of inventories, generally due 60 days after shipment of goods from a foreign port | 55 |

As of May 31, 2013, letters of credit of \$149 million were outstanding, which were generally issued for the purchase of inventory and as guarantees of the Company's performance under certain self-insurance and other programs.

Recently Adopted Accounting Standards

In July 2012, the Financial Accounting Standards Board ("FASB") issued an accounting standards update intended to simplify how an entity tests indefinite-lived intangible assets other than goodwill for impairment by providing entities with an option to perform a qualitative assessment to determine whether further impairment testing is necessary. This accounting standard update will be effective for us beginning June 1, 2013, and early adoption is permitted. We early adopted this standard and the adoption did not have a material impact on our consolidated financial position or results of operations.

In September 2011, the FASB issued updated guidance on the periodic testing of goodwill for impairment. This guidance will allow companies to assess qualitative factors to determine if it is more-likely-than-not that goodwill might be impaired and whether it is necessary to perform the two-step goodwill impairment test required under current accounting standards. This new guidance was effective for us beginning June 1, 2012. The adoption did not have a material effect on our consolidated financial position or results of operations.

In June 2011, the FASB issued guidance on the presentation of comprehensive income. This new guidance eliminates the current option to report other comprehensive income and its components in the statement of shareholders' equity. Companies are now required to present the components of net income and other comprehensive income in either one continuous statement, referred to as the statement of comprehensive income, or in two separate, but consecutive statements. This requirement was effective for us beginning June 1, 2012. As this guidance only amended the presentation of the components of comprehensive income, the adoption did not have an impact on our consolidated financial position or results of operations. Further, this guidance required companies to present reclassification adjustments out of accumulated other comprehensive income by component in both the statement in which net income is presented and the statement in which other comprehensive income is presented. This requirement will be effective for us beginning June 1, 2013. As this guidance only amends the presentation of the components of comprehensive income, we do not anticipate the adoption will have an impact on our consolidated financial position or results of

operations.

Recently Issued Accounting Standards

In December 2011, the FASB issued guidance enhancing disclosure requirements surrounding the nature of an entity's right to offset and related arrangements associated with its financial instruments and derivative instruments. This new guidance requires companies to disclose both gross and net information about instruments and transactions eligible for offset in the statement of financial position and instruments and transactions subject to master netting arrangements. This new guidance is effective for us beginning June 1, 2013. As this guidance only requires expanded disclosures, we do not anticipate the adoption will have an impact on our consolidated financial position or results of operations.

Critical Accounting Policies

Our previous discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities.

We believe that the estimates, assumptions and judgments involved in the accounting policies described below have the greatest potential impact on our financial statements, so we consider these to be our critical accounting policies. Because of the uncertainty inherent in these matters, actual results could differ from the estimates we use in applying the critical accounting policies. Certain of these critical accounting policies affect working capital account balances, including the policies for revenue recognition, the allowance for uncollectible accounts receivable, inventory reserves, and contingent payments under endorsement contracts. These policies require that we make estimates in the preparation of our financial statements as of a given date. However, since our business cycle is relatively short, actual results related to these estimates are generally known within the

Table of Contents

six-month period following the financial statement date. Thus, these policies generally affect only the timing of reported amounts across two to three fiscal quarters.

Within the context of these critical accounting policies, we are not currently aware of any reasonably likely events or circumstances that would result in materially different amounts being reported.

Revenue Recognition

We record wholesale revenues when title passes and the risks and rewards of ownership have passed to the customer, based on the terms of sale. Title passes generally upon shipment or upon receipt by the customer depending on the country of the sale and the agreement with the customer. Retail store revenues are recorded at the time of sale.

In some instances, we ship product directly from our supplier to the customer and recognize revenue when the product is delivered to and accepted by the customer. Our revenues may fluctuate in cases when our customers delay accepting shipment of product for periods of up to several weeks.

In certain countries outside of the U.S., precise information regarding the date of receipt by the customer is not readily available. In these cases, we estimate the date of receipt by the customer based upon historical delivery times by geographic location. On the basis of our tests of actual transactions, we have no indication that these estimates have been materially inaccurate historically.

As part of our revenue recognition policy, we record estimated sales returns, discounts and miscellaneous claims from customers as reductions to revenues at the time revenues are recorded. Our post invoice sales discounts consist of contractual programs with certain customers or discretionary discounts that are expected to be granted to certain customers at a later date. We base our estimates on historical rates of product returns, discounts and claims, specific identification of outstanding claims and outstanding returns not yet received from customers, and estimated returns, discounts and claims expected but not yet finalized with our customers. Actual returns, discounts and claims in any future period are inherently uncertain and thus may differ from our estimates. If actual or expected future returns, discounts and claims were significantly greater or lower than the reserves we had established, we would record a reduction or increase to net revenues in the period in which we made such determination.

Allowance for Uncollectible Accounts Receivable

We make ongoing estimates relating to the ability to collect our accounts receivable and maintain an allowance for estimated losses resulting from the inability of our customers to make required payments. In determining the amount of the allowance, we consider our historical level of credit losses and make judgments about the creditworthiness of significant customers based on ongoing credit evaluations. Since we cannot predict future changes in the financial stability of our customers, actual future losses from uncollectible accounts may differ from our estimates. If the financial condition of our customers were to deteriorate, resulting in their inability to make payments, a larger allowance might be required. In the event we determine that a smaller or larger allowance is appropriate, we would record a credit or a charge to selling and administrative expense in the period in which such a determination is made.

Inventory Reserves

We also make ongoing estimates relating to the net realizable value of inventories based upon our assumptions about future demand and market conditions. If we estimate that the net realizable value of our inventory is less than the cost of the inventory recorded on our books, we record a reserve equal to the difference between the cost of the inventory and the estimated net realizable value. This reserve is recorded as a charge to cost of sales. If changes in market conditions result in reductions in the estimated net realizable value of our inventory below our previous estimate, we would increase our reserve in the period in which we made such a determination and record a charge to cost of sales.

Contingent Payments under Endorsement Contracts

A significant portion of our demand creation expense relates to payments under endorsement contracts. In general, endorsement payments are expensed uniformly over the term of the contract. However, certain contract elements may be accounted for differently, based upon the facts and circumstances of each individual contract.

Some of the contracts provide for contingent payments to endorsers based upon specific achievements in their sports (e.g., winning a championship). We record selling and administrative expense for these amounts when the endorser achieves the specific goal.

Some of the contracts provide for payments based upon endorsers maintaining a level of performance in their sport over an extended period of time (e.g., maintaining a top ranking in a sport for a year). These amounts are reported in

selling and administrative expense when we determine that it is probable that the specified level of performance will be maintained throughout the period. In these instances, to the extent that actual payments to the endorser differ from our estimate due to changes in the endorser's athletic performance, increased or decreased selling and administrative expense may be reported in a future period.

Some of the contracts provide for royalty payments to endorsers based upon a predetermined percentage of sales of particular products. We expense these payments in cost of sales as the related sales occur. In certain contracts, we offer minimum guaranteed royalty payments. For contractual obligations for which we estimate we will not meet the minimum guaranteed amount of royalty fees through sales of product, we record the amount of the guaranteed payment in excess of that earned through sales of product in selling and administrative expense uniformly over the remaining guarantee period.

Property, Plant and Equipment and Definite-Lived Assets

Property, plant and equipment, including buildings, equipment, and computer hardware and software are recorded at cost (including, in some cases, the cost of internal labor) and are depreciated over the estimated useful life. Changes in circumstances (such as technological advances or changes to our business operations) can result in differences between the actual and estimated useful lives. In those cases where we determine that the useful life of a long-lived asset should be shortened, we increase depreciation expense over the remaining useful life to depreciate the asset's net book value to its salvage value.

We review the carrying value of long-lived assets or asset groups to be used in operations whenever events or changes in circumstances indicate that the carrying amount of the assets might not be recoverable. Factors that would necessitate an impairment assessment include a significant

Table of Contents

adverse change in the extent or manner in which an asset is used, a significant adverse change in legal factors or the business climate that could affect the value of the asset, or a significant decline in the observable market value of an asset, among others. If such facts indicate a potential impairment, we would assess the recoverability of an asset group by determining if the carrying value of the asset group exceeds the sum of the projected undiscounted cash flows expected to result from the use and eventual disposition of the assets over the remaining economic life of the primary asset in the asset group. If the recoverability test indicates that the carrying value of the asset group is not recoverable, we will estimate the fair value of the asset group using appropriate valuation methodologies that would typically include an estimate of discounted cash flows. Any impairment would be measured as the difference between the asset group's carrying amount and its estimated fair value.

Goodwill and Indefinite-Lived Intangible Assets

We perform annual impairment tests on goodwill and intangible assets with indefinite lives in the fourth quarter of each fiscal year, or when events occur or circumstances change that would, more likely than not, reduce the fair value of a reporting unit or an intangible asset with an indefinite life below its carrying value. Events or changes in circumstances that may trigger interim impairment reviews include significant changes in business climate, operating results, planned investments in the reporting unit, planned divestitures or an expectation that the carrying amount may not be recoverable, among other factors. We may first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If, after assessing the totality of events and circumstances, we determine that it is more likely than not that the fair value of the reporting unit is greater than its carrying amount, the two-step impairment test is unnecessary. The two-step impairment test requires us to estimate the fair value of our reporting units. If the carrying value of a reporting unit exceeds its fair value, the goodwill of that reporting unit is potentially impaired and we proceed to step two of the impairment analysis. In step two of the analysis, we measure and record an impairment loss equal to the excess of the carrying value of the reporting unit's goodwill over its implied fair value, if any.

We generally base our measurement of the fair value of a reporting unit on a blended analysis of the present value of future discounted cash flows and the market valuation approach. The discounted cash flows model indicates the fair value of the reporting unit based on the present value of the cash flows that we expect the reporting unit to generate in the future. Our significant estimates in the discounted cash flows model include: our weighted average cost of capital; long-term rate of growth and profitability of the reporting unit's business; and working capital effects. The market valuation approach indicates the fair value of the business based on a comparison of the reporting unit to comparable publicly traded companies in similar lines of business. Significant estimates in the market valuation approach model include identifying similar companies with comparable business factors such as size, growth, profitability, risk and return on investment, and assessing comparable revenue and operating income multiples in estimating the fair value of the reporting unit.

Indefinite-lived intangible assets primarily consist of acquired trade names and trademarks. We may first perform a qualitative assessment to determine whether it is more likely than not that an indefinite-lived intangible asset is impaired. If, after assessing the totality of events and circumstances, we determine that it is more likely than not that the indefinite-lived intangible asset is not impaired, no quantitative fair value measurement is necessary. If a quantitative fair value measurement calculation is required for these intangible assets, we utilize the relief-from-royalty method. This method assumes that trade names and trademarks have value to the extent that their owner is relieved of the obligation to pay royalties for the benefits received from them. This method requires us to estimate the future revenue for the related brands, the appropriate royalty rate and the weighted average cost of capital.

Fair Value Measurements

For financial assets and liabilities measured at fair value on a recurring basis, fair value is the price we would receive to sell an asset or pay to transfer a liability in an orderly transaction with a market participant at the measurement date. In general, and where applicable, we use quoted prices in active markets for identical assets or liabilities to determine the fair values of our financial instruments. This pricing methodology applies to our Level 1 investments, including U.S. Treasury securities.

In the absence of active markets for identical assets or liabilities, such measurements involve developing assumptions based on market observable data, including quoted prices for similar assets or liabilities in active markets and quoted

prices for identical or similar assets or liabilities in markets that are not active. This pricing methodology applies to our Level 2 investments such as commercial paper and bonds, U.S. agency securities and money market funds. Level 3 investments are valued using internally developed models with unobservable inputs. Assets and liabilities measured using unobservable inputs are an immaterial portion of our portfolio.

A majority of our available-for-sale securities are priced by pricing vendors and are generally Level 1 or Level 2 investments, as these vendors either provide a quoted market price in an active market or use observable inputs without applying significant adjustments in their pricing. Observable inputs include broker quotes, interest rates and yield curves observable at commonly quoted intervals, volatilities and credit risks. Our fair value processes include controls that are designed to ensure appropriate fair values are recorded. These controls include an analysis of period-over-period fluctuations and comparison to another independent pricing vendor.

Hedge Accounting for Derivatives

We use forward and option contracts to hedge certain anticipated foreign currency exchange transactions as well as certain non-functional currency monetary assets and liabilities. When the specific criteria to qualify for hedge accounting has been met, changes in the fair value of contracts hedging probable forecasted future cash flows are recorded in other comprehensive income, rather than net income, until the underlying hedged transaction affects net income. In most cases, this results in gains and losses on hedge derivatives being released from other comprehensive income into net income some time after the maturity of the derivative. One of the criteria for this accounting treatment is that the forward and option contracts amount should not be in excess of specifically identified anticipated transactions. By their very nature, our estimates of anticipated transactions may fluctuate over time and may ultimately vary from actual transactions. When anticipated transaction estimates or actual transaction amounts decline below hedged levels, or if it is no longer probable that a forecasted transaction will occur by the end of the originally specified time period or within an additional two-month period of time thereafter, we are required to reclassify the cumulative changes in fair values of the over-hedged portion of the related hedge contract from other comprehensive income to other (income) expense, net during the quarter in which such changes occur.

We have used and may, in the future, use forward contracts to hedge our investment in the net assets of certain international subsidiaries to offset foreign currency translation related to our net investment in those subsidiaries. The change in fair value of the forward contracts hedging our net investments is reported in the cumulative translation adjustment component of accumulated other comprehensive income within shareholders' equity, to the extent effective, to offset the foreign currency translation adjustments on those investments. As the value of our underlying net

Table of Contents

investments in wholly-owned international subsidiaries is known at the time a hedge is placed, the designated hedge is matched to the portion of our net investment at risk. Accordingly, the variability involved in net investment hedges is substantially less than that of other types of hedge transactions and we do not expect any material ineffectiveness. We consider, on a quarterly basis, the need to redesignate existing hedge relationships based on changes in the underlying net investment. Should the level of our net investment decrease below hedged levels, the cumulative change in fair value of the over-hedged portion of the related hedge contract would be reported directly to earnings in the period in which changes occur.

Stock-based Compensation

We account for stock-based compensation by estimating the fair value of stock-based compensation on the date of grant using the Black-Scholes option pricing model. The Black-Scholes option pricing model requires the input of highly subjective assumptions including volatility. Expected volatility is estimated based on implied volatility in market traded options on our common stock with a term greater than one year, along with other factors. Our decision to use implied volatility was based on the availability of actively traded options on our common stock and our assessment that implied volatility is more representative of future stock price trends than historical volatility. If factors change and we use different assumptions for estimating stock-based compensation expense in future periods, stock-based compensation expense may differ materially in the future from that recorded in the current period.

Taxes

We record valuation allowances against our deferred tax assets, when necessary. Realization of deferred tax assets (such as net operating loss carry-forwards) is dependent on future taxable earnings and is therefore uncertain. At least quarterly, we assess the likelihood that our deferred tax asset balance will be recovered from future taxable income. To the extent we believe that recovery is not likely, we establish a valuation allowance against our net deferred tax asset, which increases our income tax expense in the period when such determination is made.

In addition, we have not recorded U.S. income tax expense for foreign earnings that we have determined to be indefinitely reinvested outside the U.S., thus reducing our overall income tax expense. The amount of earnings designated as indefinitely reinvested offshore is based upon the actual deployment of such earnings in our offshore assets and our expectations of the future cash needs of our U.S. and foreign entities. Income tax considerations are also a factor in determining the amount of foreign earnings to be indefinitely reinvested offshore.

We carefully review all factors that drive the ultimate disposition of foreign earnings determined to be reinvested offshore and apply stringent standards to overcome the presumption of repatriation. Despite this approach, because the determination involves our future plans and expectations of future events, the possibility exists that amounts declared as indefinitely reinvested offshore may ultimately be repatriated. For instance, the actual cash needs of our U.S. entities may exceed our current expectations, or the actual cash needs of our foreign entities may be less than our current expectations. This would result in additional income tax expense in the year we determined that amounts were no longer indefinitely reinvested offshore. Conversely, our approach may also result in a determination that accumulated foreign earnings (for which U.S. income taxes have been provided) will be indefinitely reinvested offshore. In this case, our income tax expense would be reduced in the year of such determination.

On an interim basis, we estimate what our effective tax rate will be for the full fiscal year. This estimated annual effective tax rate is then applied to the year-to-date pre-tax income excluding infrequently occurring or unusual items, to determine the year-to-date tax expense. The income tax effects of infrequent or unusual items are recognized in the interim period in which they occur. As the fiscal year progresses, we continually refine our estimate based upon actual events and earnings by jurisdiction during the year. This continual estimation process periodically results in a change to our expected effective tax rate for the fiscal year. When this occurs, we adjust the income tax provision during the quarter in which the change in estimate occurs.

On a quarterly basis, we reevaluate the probability that a tax position will be effectively sustained and the appropriateness of the amount recognized for uncertain tax positions based on factors including changes in facts or circumstances, changes in tax law, settled audit issues and new audit activity. Changes in our assessment may result in the recognition of a tax benefit or an additional charge to the tax provision in the period our assessment changes. We recognize interest and penalties related to income tax matters in income tax expense.

Other Contingencies

In the ordinary course of business, we are involved in legal proceedings regarding contractual and employment relationships, product liability claims, trademark rights, and a variety of other matters. We record contingent liabilities resulting from claims against us, including related legal costs, when a loss is assessed to be probable and the amount of the loss is reasonably estimable. Assessing probability of loss and estimating probable losses requires analysis of multiple factors, including in some cases judgments about the potential actions of third-party claimants and courts. Recorded contingent liabilities are based on the best information available and actual losses in any future period are inherently uncertain. If future adjustments to estimated probable future losses or actual losses exceed our recorded liability for such claims, we would record additional charges as other (income) expense, net during the period in which the actual loss or change in estimate occurred. In addition to contingent liabilities recorded for probable losses, we disclose contingent liabilities when there is a reasonable possibility that the ultimate loss will materially exceed the recorded liability. While we cannot predict the outcome of pending legal matters with certainty, we do not believe any currently identified claim, proceeding or litigation, either individually or in aggregate, will have a material impact on our results of operations, financial position or cash flows.

Table of Contents

ITEM 7A. Quantitative and Qualitative Disclosures about Market Risk

In the normal course of business and consistent with established policies and procedures, we employ a variety of financial instruments to manage exposure to fluctuations in the value of foreign currencies and interest rates. It is our policy to utilize these financial instruments only where necessary to finance our business and manage such exposures; we do not enter into these transactions for trading or speculative purposes.

We are exposed to foreign currency fluctuations, primarily as a result of our international sales, product sourcing and funding activities. Our foreign exchange risk management program is intended to lessen both the positive and negative effects of currency fluctuations on our consolidated results of operations, financial position and cash flows. We use forward exchange contracts and options to hedge certain anticipated but not yet firmly committed transactions as well as certain firm commitments and the related receivables and payables, including third-party and intercompany transactions. We have, and may in the future, also use forward contracts to hedge our investment in the net assets of certain international subsidiaries to offset foreign currency translation adjustments related to our net investment in those subsidiaries. Where exposures are hedged, our program has the effect of delaying the impact of exchange rate movements on our consolidated financial statements.

The timing for hedging exposures, as well as the type and duration of the hedge instruments employed, are guided by our hedging policies and determined based upon the nature of the exposure and prevailing market conditions. Generally, hedged transactions are expected to be recognized within 12 to 18 months. When intercompany loans are hedged, it is typically for their expected duration. Hedged transactions are principally denominated in Euros, British Pounds and Japanese Yen. See section “Foreign Currency Exposures and Hedging Practices” under Item 7 for additional detail.

Our earnings are also exposed to movements in short- and long-term market interest rates. Our objective in managing this interest rate exposure is to limit the impact of interest rate changes on earnings and cash flows and to reduce overall borrowing costs. To achieve these objectives, we maintain a mix of commercial paper, bank loans and fixed rate debt of varying maturities and have entered into receive-fixed, pay-variable interest rate swaps for a portion of our fixed rate debt.

Market Risk Measurement

We monitor foreign exchange risk, interest rate risk and related derivatives using a variety of techniques including a review of market value, sensitivity analysis, and Value-at-Risk (“VaR”). Our market-sensitive derivative and other financial instruments are foreign currency forward contracts, foreign currency option contracts, interest rate swaps, intercompany loans denominated in non-functional currencies, fixed interest rate U.S. Dollar denominated debt, and fixed interest rate Japanese Yen denominated debt.

We use VaR to monitor the foreign exchange risk of our foreign currency forward and foreign currency option derivative instruments only. The VaR determines the maximum potential one-day loss in the fair value of these foreign exchange rate-sensitive financial instruments. The VaR model estimates assume normal market conditions and a 95% confidence level. There are various modeling techniques that can be used in the VaR computation. Our computations are based on interrelationships between currencies and interest rates (a “variance/co-variance” technique). These interrelationships are a function of foreign exchange currency market changes and interest rate changes over the preceding one year period. The value of foreign currency options does not change on a one-to-one basis with changes in the underlying currency rate. We adjust the potential loss in option value for the estimated sensitivity (the “delta” and “gamma”) to changes in the underlying currency rate. This calculation reflects the impact of foreign currency rate fluctuations on the derivative instruments only and does not include the impact of such rate fluctuations on non-functional currency transactions (such as anticipated transactions, firm commitments, cash balances, and accounts and loans receivable and payable), including those which are hedged by these instruments.

The VaR model is a risk analysis tool and does not purport to represent actual losses in fair value that we will incur nor does it consider the potential effect of favorable changes in market rates. It also does not represent the full extent of the possible loss that may occur. Actual future gains and losses will differ from those estimated because of changes or differences in market rates and interrelationships, hedging instruments and hedge percentages, timing and other factors.

The estimated maximum one-day loss in fair value on our foreign currency sensitive derivative financial instruments, derived using the VaR model, was \$34 million and \$21 million at May 31, 2013 and 2012, respectively. The VaR increased year-over-year as a result of an increase in the total notional value of our foreign currency derivative portfolio combined with a longer average duration on our outstanding trades at May 31, 2013. Such a hypothetical loss in the fair value of our derivatives would be offset by increases in the value of the underlying transactions being hedged. The average monthly change in the fair values of foreign currency forward and foreign currency option derivative instruments was \$49 million and \$87 million during fiscal 2013 and fiscal 2012, respectively.

The instruments not included in the VaR are intercompany loans denominated in non-functional currencies, fixed interest rate Japanese Yen denominated debt, fixed interest rate U.S. Dollar denominated debt and interest rate swaps. Intercompany loans and related interest amounts are eliminated in consolidation. Furthermore, our non-functional currency intercompany loans are substantially hedged against foreign exchange risk through the use of forward contracts, which are included in the VaR calculation above. Therefore, we consider the interest rate and foreign currency market risks associated with our non-functional currency intercompany loans to be immaterial to our consolidated financial position, results from operations and cash flows.

Details of third-party debt and interest rate swaps are provided in the table below. The table presents principal cash flows and related weighted average interest rates by expected maturity dates. Weighted average interest rates for the fixed rate swapped to floating rate debt reflect the effective interest rates at May 31, 2013.

Table of Contents

| (Dollars in millions) | Expected Maturity Date | | | | | | Total | Fair Value |
|--|------------------------|-------|-------|-------|-------|------------|---------|------------|

| Interest Rate Risk | | | | | | | | |
| Japanese Yen Functional Currency | | | | | | | | |
| Long-term Japanese Yen debt — Fixed rate | | | | | | | | |
| Principal payments | \$7 | \$7 | \$7 | \$7 | \$7 | \$14 | \$49 | \$52 |
| Average interest rate | 2.4 | % 2.4 | % 2.4 | % 2.4 | % 2.4 | % 2.4 | % 2.4 | % |
| U.S. Dollar Functional Currency | | | | | | | | |
| Long-term U.S. Dollar debt — Fixed rate swapped to Floating rate | | | | | | | | |
| Principal payments | \$— | \$— | \$100 | \$— | \$— | \$— | \$100 | \$110 |
| Average interest rate | 0.0 | % 0.0 | % 0.4 | % 0.0 | % 0.0 | % 0.0 | % 0.4 | % |
| Long-term U.S. Dollar debt — Fixed rate | | | | | | | | |
| Principal payments | \$51 | \$1 | \$1 | \$38 | \$18 | \$1,000 | \$1,109 | \$1,057 |
| Average interest rate | 4.7 | % 6.4 | % 6.4 | % 6.2 | % 6.8 | % 2.9 | % 3.2 | % |

The fixed interest rate Japanese Yen denominated debt instruments were issued by and are accounted for by one of our Japanese subsidiaries. Accordingly, the monthly translation of these instruments, which varies due to changes in foreign exchange rates, is recognized in accumulated other comprehensive income upon the consolidation of this subsidiary.

ITEM 8. Financial Statements and Supplemental Data

Management of NIKE, Inc. is responsible for the information and representations contained in this report. The financial statements have been prepared in conformity with the generally accepted accounting principles we considered appropriate in the circumstances and include some amounts based on our best estimates and judgments. Other financial information in this report is consistent with these financial statements.

Our accounting systems include controls designed to reasonably assure assets are safeguarded from unauthorized use or disposition and provide for the preparation of financial statements in conformity with generally accepted accounting principles. These systems are supplemented by the selection and training of qualified financial personnel and an organizational structure providing for appropriate segregation of duties.

An Internal Audit department reviews the results of its work with the Audit Committee of the Board of Directors, presently consisting of three outside directors. The Audit Committee is responsible for the appointment of the independent registered public accounting firm and reviews with the independent registered public accounting firm, management and the internal audit staff, the scope and the results of the annual examination, the effectiveness of the accounting control system and other matters relating to the financial affairs of NIKE as the Audit Committee deems appropriate. The independent registered public accounting firm and the internal auditors have full access to the Committee, with and without the presence of management, to discuss any appropriate matters.

Table of Contents

Management's Annual Report on Internal Control Over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rule 13a-15(f) and Rule 15d-15(f) of the Securities Exchange Act of 1934, as amended. Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the financial statements for external purposes in accordance with generally accepted accounting principles in the United States of America. Internal control over financial reporting includes those policies and procedures that: (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of assets of the Company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of our management and directors; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of assets of the Company that could have a material effect on the financial statements.

While "reasonable assurance" is a high level of assurance, it does not mean absolute assurance. Because of its inherent limitations, internal control over financial reporting may not prevent or detect every misstatement and instance of fraud. Controls are susceptible to manipulation, especially in instances of fraud caused by the collusion of two or more people, including our senior management. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, our management conducted an evaluation of the effectiveness of our internal control over financial reporting based upon the framework in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on the results of our evaluation, our management concluded that our internal control over financial reporting was effective as of May 31, 2013.

PricewaterhouseCoopers LLP, an independent registered public accounting firm, has audited (1) the consolidated financial statements and (2) the effectiveness of our internal control over financial reporting as of May 31, 2013, as stated in their report herein.

Mark G. Parker
President and Chief Executive Officer

Donald W. Blair

Table of Contents

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of NIKE, Inc.:

In our opinion, the consolidated financial statements listed in the index appearing under Item 15(a)(1) present fairly, in all material respects, the financial position of NIKE, Inc. and its subsidiaries at May 31, 2013 and 2012, and the results of their operations and their cash flows for each of the three years in the period ended May 31, 2013 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the appendix appearing under Item 15(a)(2) presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of May 31, 2013, based on criteria established in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements and financial statement schedule, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Annual Report on Internal Control Over Financial Reporting appearing under Item 8. Our responsibility is to express opinions on these financial statements, on the financial statement schedule, and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

NOTE 1 — Summary of Significant Accounting Policies

Description of Business

NIKE, Inc. is a worldwide leader in the design, development and worldwide marketing and selling of athletic footwear, apparel, equipment, accessories and services. Wholly-owned NIKE, Inc. subsidiaries include Converse Inc., which designs, markets and distributes casual footwear, apparel and accessories and Hurley International LLC, which designs, markets and distributes action sports and youth lifestyle footwear, apparel and accessories.

Basis of Consolidation

The consolidated financial statements include the accounts of NIKE, Inc. and its subsidiaries (the “Company”). All significant intercompany transactions and balances have been eliminated.

The Company completed the sale of Cole Haan during the third quarter ended February 28, 2013 and completed the sale of Umbro during the second quarter ended November 30, 2012. As a result, the Company reports the operating results of Cole Haan and Umbro in the net income (loss) from discontinued operations line in the consolidated statements of income for all periods presented. In addition, the assets and liabilities associated with these businesses are reported as assets of discontinued operations and liabilities of discontinued operations, as appropriate, in the consolidated balance sheets (refer to Note 15 — Discontinued Operations). Unless otherwise indicated, the disclosures accompanying the consolidated financial statements reflect the Company’s continuing operations.

On November 15, 2012, the Company announced a two-for-one split of both NIKE Class A and Class B Common shares. The stock split was a 100 percent stock dividend payable on December 24, 2012 to shareholders of record at the close of business December 10, 2012. Common stock began trading at the split-adjusted price on December 26, 2012. All share numbers and per share amounts presented reflect the stock split.

Recognition of Revenues

Wholesale revenues are recognized when title and the risks and rewards of ownership have passed to the customer, based on the terms of sale. This occurs upon shipment or upon receipt by the customer depending on the country of the sale and the agreement with the customer. Retail store revenues are recorded at the time of sale. Provisions for post-invoice sales discounts, returns and miscellaneous claims from customers are estimated and recorded as a reduction to revenue at the time of sale. Post-invoice sales discounts consist of contractual programs with certain customers or discretionary discounts that are expected to be granted to certain customers at a later date. Estimates of discretionary discounts, returns and claims are based on historical rates, specific identification of outstanding claims and outstanding returns not yet received from customers, and estimated discounts, returns and claims expected but not yet finalized with customers. As of May 31, 2013 and 2012, the Company’s reserve balances for post-invoice sales discounts, returns and miscellaneous claims were \$531 million and \$455 million, respectively.

Cost of Sales

Cost of sales consists primarily of inventory costs, as well as warehousing costs (including the cost of warehouse labor), third party royalties, certain foreign currency hedge gains and losses, and research, design and development costs.

Shipping and Handling Costs

Shipping and handling costs are expensed as incurred and included in cost of sales.

Operating Overhead Expense

Operating overhead expense consists primarily of payroll and benefit related costs, rent, depreciation and amortization, professional services, and meetings and travel.

Demand Creation Expense

Demand creation expense consists of advertising and promotion costs, including costs of endorsement contracts, television, digital and print advertising, brand events, and retail brand presentation. Advertising production costs are expensed the first time an advertisement is run. Advertising placement costs are expensed in the month the advertising appears, while costs related to brand events are expensed when the event occurs. Costs related to retail brand presentation are expensed when the presentation is completed and delivered.

A significant amount of the Company’s promotional expenses result from payments under endorsement contracts.

Accounting for endorsement payments is based upon specific contract provisions. Generally, endorsement payments

are expensed on a straight-line basis over the term of the contract after giving recognition to periodic performance compliance provisions of the contracts. Prepayments made under contracts are included in prepaid expenses or other assets depending on the period to which the prepayment applies.

Some of the contracts provide for contingent payments to endorsers based upon specific achievements in their sports (e.g., winning a championship). The Company records selling and administrative expense for these amounts when the endorser achieves the specific goal.

Some of the contracts provide for payments based upon endorsers maintaining a level of performance in their sport over an extended period of time (e.g., maintaining a top ranking in a sport for a year). These amounts are recorded in selling and administrative expense when the Company determines that it is probable that the specified level of performance will be maintained throughout the period. In these instances, to the extent that actual payments to the endorser differ from our estimate due to changes in the endorser's athletic performance, increased or decreased selling and administrative expense may be recorded in a future period.

Some of the contracts provide for royalty payments to endorsers based upon a predetermined percentage of sales of particular products. The Company expenses these payments in cost of sales as the related sales occur. In certain contracts, the Company offers minimum guaranteed royalty payments. For contractual obligations for which the Company estimates it will not meet the minimum guaranteed amount of royalty fees through sales of product, the Company records the amount of the guaranteed payment in excess of that earned through sales of product in selling and administrative expense uniformly over the remaining guarantee period.

Table of Contents

Through cooperative advertising programs, the Company reimburses retail customers for certain costs of advertising the Company's products. The Company records these costs in selling and administrative expense at the point in time when it is obligated to its customers for the costs, which is when the related revenues are recognized. This obligation may arise prior to the related advertisement being run.

Total advertising and promotion expenses were \$2,745 million, \$2,607 million, and \$2,344 million for the years ended May 31, 2013, 2012 and 2011, respectively. Prepaid advertising and promotion expenses recorded in prepaid expenses and other current assets totaled \$386 million and \$281 million at May 31, 2013 and 2012, respectively.

Cash and Equivalents

Cash and equivalents represent cash and short-term, highly liquid investments, including commercial paper, U.S. treasury, U.S. agency, and corporate debt securities with maturities of three months or less at date of purchase.

Short-Term Investments

Short-term investments consist of highly liquid investments, including commercial paper, U.S. treasury, U.S. agency, and corporate debt securities, with maturities over three months from the date of purchase. Debt securities that the Company has the ability and positive intent to hold to maturity are carried at amortized cost. At May 31, 2013 and 2012, the Company did not hold any short-term investments that were classified as trading or held-to-maturity. At May 31, 2013 and 2012, short-term investments consisted of available-for-sale securities. Available-for-sale securities are recorded at fair value with unrealized gains and losses reported, net of tax, in other comprehensive income, unless unrealized losses are determined to be other than temporary. Realized gains and losses on the sale of securities are determined by specific identification. The Company considers all available-for-sale securities, including those with maturity dates beyond 12 months, as available to support current operational liquidity needs and therefore classifies all securities with maturity dates beyond three months at the date of purchase as current assets within short-term investments on the consolidated balance sheets.

Refer to Note 6 — Fair Value Measurements for more information on the Company's short-term investments.

Allowance for Uncollectible Accounts Receivable

Accounts receivable consists primarily of amounts receivable from customers. The Company makes ongoing estimates relating to the collectability of its accounts receivable and maintains an allowance for estimated losses resulting from the inability of its customers to make required payments. In determining the amount of the allowance, the Company considers historical levels of credit losses and makes judgments about the creditworthiness of significant customers based on ongoing credit evaluations. Accounts receivable with anticipated collection dates greater than 12 months from the balance sheet date and related allowances are considered non-current and recorded in other assets. The allowance for uncollectible accounts receivable was \$104 million and \$91 million at May 31, 2013 and 2012, respectively, of which \$54 million and \$45 million, respectively, was classified as long-term and recorded in other assets.

Inventory Valuation

Inventories are stated at lower of cost or market and valued primarily on an average cost basis. Inventory costs primarily consist of product cost from our suppliers, as well as freight, import duties, taxes, insurance and logistics and other handling fees.

Property, Plant and Equipment and Depreciation

Property, plant and equipment are recorded at cost. Depreciation for financial reporting purposes is determined on a straight-line basis for buildings and leasehold improvements over 2 to 40 years and for machinery and equipment over 2 to 15 years.

Depreciation and amortization of assets used in manufacturing, warehousing and product distribution are recorded in cost of sales. Depreciation and amortization of other assets are recorded in selling and administrative expense.

Software Development Costs

Internal Use Software. Expenditures for major software purchases and software developed for internal use are capitalized and amortized over a 2 to 10 year period on a straight-line basis. The Company's policy provides for the capitalization of external direct costs of materials and services associated with developing or obtaining internal use computer software. In addition, the Company also capitalizes certain payroll and payroll-related costs for employees who are directly associated with internal use computer software projects. The amount of capitalizable payroll costs

with respect to these employees is limited to the time directly spent on such projects. Costs associated with preliminary project stage activities, training, maintenance and all other post-implementation stage activities are expensed as incurred.

Computer Software to be Sold, Leased or Otherwise Marketed. Development costs of computer software to be sold, leased, or otherwise marketed as an integral part of a product are subject to capitalization beginning when a product's technological feasibility has been established and ending when a product is available for general release to customers. In most instances, the Company's products are released soon after technological feasibility has been established. Therefore, costs incurred subsequent to achievement of technological feasibility are usually not significant, and generally most software development costs have been expensed as incurred.

Impairment of Long-Lived Assets

The Company reviews the carrying value of long-lived assets or asset groups to be used in operations whenever events or changes in circumstances indicate that the carrying amount of the assets might not be recoverable. Factors that would necessitate an impairment assessment include a significant adverse change in the extent or manner in which an asset is used, a significant adverse change in legal factors or the business climate that could affect the value of the asset, or a significant decline in the observable market value of an asset, among others. If such facts indicate a potential impairment, the Company would assess the recoverability of an asset group by determining if the carrying value of the asset group exceeds

Table of Contents

the sum of the projected undiscounted cash flows expected to result from the use and eventual disposition of the assets over the remaining economic life of the primary asset in the asset group. If the recoverability test indicates that the carrying value of the asset group is not recoverable, the Company will estimate the fair value of the asset group using appropriate valuation methodologies, which would typically include an estimate of discounted cash flows. Any impairment would be measured as the difference between the asset group's carrying amount and its estimated fair value.

Identifiable Intangible Assets and Goodwill

The Company performs annual impairment tests on goodwill and intangible assets with indefinite lives in the fourth quarter of each fiscal year, or when events occur or circumstances change that would, more likely than not, reduce the fair value of a reporting unit or an intangible asset with an indefinite life below its carrying value. Events or changes in circumstances that may trigger interim impairment reviews include significant changes in business climate, operating results, planned investments in the reporting unit, planned divestitures or an expectation that the carrying amount may not be recoverable, among other factors. The Company may first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If, after assessing the totality of events and circumstances, the Company determines that it is more likely than not that the fair value of the reporting unit is greater than its carrying amount, the two-step impairment test is unnecessary. The two-step impairment test first requires the Company to estimate the fair value of its reporting units. If the carrying value of a reporting unit exceeds its fair value, the goodwill of that reporting unit is potentially impaired and the Company proceeds to step two of the impairment analysis. In step two of the analysis, the Company measures and records an impairment loss equal to the excess of the carrying value of the reporting unit's goodwill over its implied fair value, if any.

The Company generally bases its measurement of the fair value of a reporting unit on a blended analysis of the present value of future discounted cash flows and the market valuation approach. The discounted cash flows model indicates the fair value of the reporting unit based on the present value of the cash flows that the Company expects the reporting unit to generate in the future. The Company's significant estimates in the discounted cash flows model include: its weighted average cost of capital; long-term rate of growth and profitability of the reporting unit's business; and working capital effects. The market valuation approach indicates the fair value of the business based on a comparison of the reporting unit to comparable publicly traded companies in similar lines of business. Significant estimates in the market valuation approach model include identifying similar companies with comparable business factors such as size, growth, profitability, risk and return on investment, and assessing comparable revenue and operating income multiples in estimating the fair value of the reporting unit.

Indefinite-lived intangible assets primarily consist of acquired trade names and trademarks. The Company may first perform a qualitative assessment to determine whether it is more likely than not that an indefinite-lived intangible asset is impaired. If, after assessing the totality of events and circumstances, the Company determines that it is more likely than not that the indefinite-lived intangible asset is not impaired, no quantitative fair value measurement is necessary. If a quantitative fair value measurement calculation is required for these intangible assets, the Company utilizes the relief-from-royalty method. This method assumes that trade names and trademarks have value to the extent that their owner is relieved of the obligation to pay royalties for the benefits received from them. This method requires the Company to estimate the future revenue for the related brands, the appropriate royalty rate and the weighted average cost of capital.

Operating Leases

The Company leases retail store space, certain distribution and warehouse facilities, office space, and other non-real estate assets under operating leases. Operating lease agreements may contain rent escalation clauses, rent holidays or certain landlord incentives, including tenant improvement allowances. Rent expense for non-cancelable operating leases with scheduled rent increases or landlord incentives are recognized on a straight-line basis over the lease term, beginning with the effective lease commencement date, which is generally the date in which the Company takes possession of or controls the physical use of the property. Certain leases also provide for contingent rents, which are determined as a percentage of sales in excess of specified levels. A contingent rent liability is recognized together with the corresponding rent expense when specified levels have been achieved or when the Company determines that

achieving the specified levels during the period is probable.

Fair Value Measurements

The Company measures certain financial assets and liabilities at fair value on a recurring basis, including derivatives and available-for-sale securities. Fair value is the price the Company would receive to sell an asset or pay to transfer a liability in an orderly transaction with a market participant at the measurement date. The Company uses a three-level hierarchy established by the Financial Accounting Standards Board ("FASB") that prioritizes fair value measurements based on the types of inputs used for the various valuation techniques (market approach, income approach, and cost approach).

The levels of hierarchy are described below:

Level 1: Observable inputs such as quoted prices in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices that are observable for the asset or liability, either directly or indirectly; these include quoted prices for similar assets or liabilities in active markets and quoted prices for identical or similar assets or liabilities in markets that are not active.

Level 3: Unobservable inputs for which there is little or no market data available, which require the reporting entity to develop its own assumptions.

The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to the asset or liability. Financial assets and liabilities are classified in their entirety based on the most conservative level of input that is significant to the fair value measurement.

Pricing vendors are utilized for certain Level 1 and Level 2 investments. These vendors either provide a quoted market price in an active market or use observable inputs without applying significant adjustments in their pricing.

Observable inputs include broker quotes, interest rates and yield curves observable at commonly quoted intervals, volatilities and credit risks. The Company's fair value processes include controls that are designed to ensure appropriate fair values are recorded. These controls include an analysis of period-over-period fluctuations and comparison to another independent pricing vendor.

Refer to Note 6 — Fair Value Measurements for additional information.

Table of Contents

Foreign Currency Translation and Foreign Currency Transactions

Adjustments resulting from translating foreign functional currency financial statements into U.S. Dollars are included in the foreign currency translation adjustment, a component of accumulated other comprehensive income in shareholders' equity.

The Company's global subsidiaries have various assets and liabilities, primarily receivables and payables, which are denominated in currencies other than their functional currency. These balance sheet items are subject to remeasurement, the impact of which is recorded in other (income) expense, net, within the consolidated statements of income.

Accounting for Derivatives and Hedging Activities

The Company uses derivative financial instruments to reduce its exposure to changes in foreign currency exchange rates and interest rates. All derivatives are recorded at fair value on the balance sheet and changes in the fair value of derivative financial instruments are either recognized in other comprehensive income (a component of shareholders' equity), debt or net income depending on the nature of the underlying exposure, whether the derivative is formally designated as a hedge, and, if designated, the extent to which the hedge is effective. The Company classifies the cash flows at settlement from derivatives in the same category as the cash flows from the related hedged items. For undesignated hedges and designated cash flow hedges, this is within the cash provided by operations component of the consolidated statements of cash flows. For designated net investment hedges, this is generally within the cash provided or used by investing activities component of the cash flow statement. As our fair value hedges are receive-fixed, pay-variable interest rate swaps, the cash flows associated with these derivative instruments are periodic interest payments while the swaps are outstanding. These cash flows are reflected within the cash provided by operations component of the cash flow statement.

Refer to Note 17 — Risk Management and Derivatives for more information on the Company's risk management program and derivatives.

Stock-Based Compensation

The Company estimates the fair value of options and stock appreciation rights granted under the NIKE, Inc. 1990 Stock Incentive Plan (the "1990 Plan") and employees' purchase rights under the Employee Stock Purchase Plans ("ESPPs") using the Black-Scholes option pricing model. The Company recognizes this fair value, net of estimated forfeitures, as selling and administrative expense in the consolidated statements of income over the vesting period using the straight-line method.

Refer to Note 11 — Common Stock and Stock-Based Compensation for more information on the Company's stock programs.

Income Taxes

The Company accounts for income taxes using the asset and liability method. This approach requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of temporary differences between the carrying amounts and the tax basis of assets and liabilities. The Company records a valuation allowance to reduce deferred tax assets to the amount management believes is more likely than not to be realized. United States income taxes are provided currently on financial statement earnings of non-U.S. subsidiaries that are expected to be repatriated. The Company determines annually the amount of undistributed non-U.S. earnings to invest indefinitely in its non-U.S. operations.

The Company recognizes a tax benefit from uncertain tax positions in the financial statements only when it is more likely than not that the position will be sustained upon examination by relevant tax authorities. The Company recognizes interest and penalties related to income tax matters in income tax expense.

Refer to Note 9 — Income Taxes for further discussion.

Earnings Per Share

Basic earnings per common share is calculated by dividing net income by the weighted average number of common shares outstanding during the year. Diluted earnings per common share is calculated by adjusting weighted average outstanding shares, assuming conversion of all potentially dilutive stock options and awards.

Refer to Note 12 — Earnings Per Share for further discussion.

Management Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates, including estimates relating to assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates.

Recently Adopted Accounting Standards

In July 2012, the FASB issued an accounting standards update intended to simplify how an entity tests indefinite-lived intangible assets other than goodwill for impairment by providing entities with an option to perform a qualitative assessment to determine whether further impairment testing is necessary. This accounting standard update will be effective for the Company beginning June 1, 2013, and early adoption is permitted. The Company early adopted this standard and the adoption did not have a material impact on its consolidated financial position or results of operations.

In September 2011, the FASB issued updated guidance on the periodic testing of goodwill for impairment. This guidance will allow companies to assess qualitative factors to determine if it is more-likely-than-not that goodwill might be impaired and whether it is necessary to perform the two-step goodwill impairment test required under current accounting standards. This new guidance was effective for the Company beginning June 1, 2012 and the adoption did not have a material effect on its consolidated financial position or results of operations.

In June 2011, the FASB issued guidance on the presentation of comprehensive income. This new guidance eliminates the current option to report other comprehensive income and its components in the statement of shareholders' equity. Companies are now required to present the components

Table of Contents

of net income and other comprehensive income in either one continuous statement, referred to as the statement of comprehensive income, or in two separate, but consecutive statements. This requirement was effective for the Company beginning June 1, 2012. As this guidance only amended the presentation of the components of comprehensive income, the adoption did not have an impact on the Company's consolidated financial position or results of operations. Further, this guidance required companies to present reclassification adjustments out of accumulated other comprehensive income by component in both the statement in which net income is presented and the statement in which other comprehensive income is presented. This requirement will be effective for the Company beginning June 1, 2013. As this guidance only amends the presentation of the components of comprehensive income, the Company does not anticipate the adoption will have an impact on the Company's consolidated financial position or results of operations.

Recently Issued Accounting Standards

In December 2011, the FASB issued guidance enhancing disclosure requirements surrounding the nature of an entity's right to offset and related arrangements associated with its financial instruments and derivative instruments. This new guidance requires companies to disclose both gross and net information about instruments and transactions eligible for offset in the statement of financial position and instruments and transactions subject to master netting arrangements. This new guidance is effective for the Company beginning June 1, 2013. As this guidance only requires expanded disclosures, the Company does not anticipate the adoption will have an impact on its consolidated financial position or results of operations.

NOTE 2 — Inventories

Inventory balances of \$3,434 million and \$3,222 million at May 31, 2013 and 2012, respectively, were substantially all finished goods.

NOTE 3 — Property, Plant and Equipment

Property, plant and equipment included the following:

| (In millions) | As of May 31, | |
|---|----------------|----------------|
| | 2013 | 2012 |
| Land | \$268 | \$252 |
| Buildings | 1,174 | 1,158 |
| Machinery, equipment and internal-use software | 2,985 | 2,654 |
| Leasehold improvements | 945 | 883 |
| Construction in process | 128 | 110 |
| Total property, plant and equipment, gross | 5,500 | 5,057 |
| Less accumulated depreciation | 3,048 | 2,848 |
| TOTAL PROPERTY, PLANT AND EQUIPMENT, NET | \$2,452 | \$2,209 |

Capitalized interest was not material for the years ended May 31, 2013, 2012, and 2011. The Company had \$81 million in capital lease obligations as of May 31, 2013 included in machinery, equipment, and internal-use software; there were no capital lease obligations as of May 31, 2012.

NOTE 4 — Identifiable Intangible Assets and Goodwill

The following table summarizes the Company's identifiable intangible asset balances as of May 31, 2013 and 2012:

| (In millions) | As of May 31, 2013 | | | As of May 31, 2012 | | |
|---------------------------------|--------------------|---------------|--------------|--------------------|---------------|--------------|
| | Gross Carrying | Accumulated | Net Carrying | Gross Carrying | Accumulated | Net Carrying |
| | Amount | Amortization | Amount | Amount | Amortization | Amount |
| Amortized intangible assets: | | | | | | |
| Patents | \$119 | \$(35) | \$84 | \$99 | \$(29) | \$70 |
| Trademarks | 43 | (32) | 11 | 40 | (26) | 14 |
| Other | 20 | (16) | 4 | 19 | (16) | 3 |
| TOTAL | \$182 | \$(83) | \$99 | \$158 | \$(71) | \$87 |
| Unamortized intangible assets — | | | | | | |
| Trademarks | | | 283 | | | 283 |
| IDENTIFIABLE INTANGIBLE | | | \$382 | | | \$370 |

ASSETS, NET

Amortization expense, which is included in selling and administrative expense, was \$14 million, \$14 million, and \$13 million for the years ended May 31, 2013, 2012, and 2011, respectively. The estimated amortization expense for intangible assets subject to amortization for each of the years ending May 31, 2014 through May 31, 2018 are as follows: 2014: \$13 million; 2015: \$9 million; 2016: \$9 million; 2017: \$7 million; 2018: \$6 million.

Goodwill was \$131 million at May 31, 2013 and May 31, 2012, respectively, and is included in the Company's "Other" category for segment reporting purposes. There were no accumulated impairment balances for goodwill as of either period end.

Table of Contents

NOTE 5 — Accrued Liabilities

Accrued liabilities included the following:

| (In millions) | As of May 31, | |
|--|----------------|----------------|
| | 2013 | 2012 |
| Compensation and benefits, excluding taxes | \$713 | \$691 |
| Endorsement compensation | 264 | 288 |
| Taxes other than income taxes | 192 | 169 |
| Dividends payable | 188 | 165 |
| Import and logistics costs | 111 | 133 |
| Advertising and marketing | 77 | 94 |
| Fair value of derivatives | 34 | 55 |
| Other ⁽¹⁾ | 407 | 346 |
| TOTAL ACCRUED LIABILITIES | \$1,986 | \$1,941 |

(1) Other consists of various accrued expenses with no individual item accounting for more than 5% of the balance at May 31, 2013 and 2012.

NOTE 6 — Fair Value Measurements

The following table presents information about the Company's financial assets and liabilities measured at fair value on a recurring basis as of May 31, 2013 and 2012, and indicates the fair value hierarchy of the valuation techniques utilized by the Company to determine such fair value. Refer to Note 1 – Summary of Significant Accounting Policies for additional detail regarding the Company's fair value measurement methodology.

| (In millions) | As of May 31, 2013 | | | Assets/Liabilities at Fair Value | Balance Sheet Classification |

| TOTAL LIABILITIES | \$— | \$55 | \$— | \$55 | |

Derivative financial instruments include foreign exchange forwards and options, embedded derivatives and interest rate swap contracts. The fair value of derivative contracts is determined using observable market inputs such as the daily market foreign currency rates, forward pricing curves, currency volatilities, currency correlations and interest rates, and considers nonperformance risk of the Company and that of its counterparties. Adjustments relating to these nonperformance risks were not material at May 31, 2013 or 2012. Refer to Note 17 — Risk Management and Derivatives for additional detail.

Available-for-sale securities comprise investments in U.S. Treasury and Agency securities, money market funds, corporate commercial paper and bonds. These securities are valued using market prices on both active markets (Level 1) and less active markets (Level 2). Pricing vendors are utilized for certain Level 1 or Level 2 investments. These vendors either provide a quoted market price in an active market or use observable inputs without applying significant adjustments in their pricing. Observable inputs include broker quotes, interest rates and yield curves observable at commonly quoted intervals, volatilities and credit risks. The carrying amounts reflected in the consolidated balance sheets for short-term investments and cash and equivalents approximate fair value.

The Company's Level 3 assets comprise investments in certain non-marketable preferred stock. These investments are valued using internally developed models with unobservable inputs. These Level 3 investments are an immaterial portion of our portfolio. Changes in Level 3 investment assets were immaterial during the years ended May 31, 2013 and 2012.

No transfers among the levels within the fair value hierarchy occurred during the years ended May 31, 2013 or 2012.

As of May 31, 2013 and 2012, the Company had no assets or liabilities that were required to be measured at fair value on a non-recurring basis.

Short-Term Investments

As of May 31, 2013 and 2012, short-term investments consisted of available-for-sale securities. As of May 31, 2013, the Company held \$2,229 million of available-for-sale securities with maturity dates within one year from the purchase date and \$399 million with maturity dates over one year and less than five years from the purchase date within short-term investments. As of May 31, 2012, the Company held \$1,129 million of available-for-sale securities with maturity dates within one year from purchase date and \$311 million with maturity dates over one year and less than five years from purchase date within short-term investments.

Table of Contents

Short-term investments classified as available-for-sale consist of the following at fair value:

| (In millions) | As of May 31, | |
|---|----------------|----------------|
| | 2013 | 2012 |
| Available-for-sale investments: | | |
| U.S. treasury and agencies | \$1,984 | \$1,157 |
| Commercial paper and bonds | 644 | 283 |
| TOTAL AVAILABLE-FOR-SALE INVESTMENTS | \$2,628 | \$1,440 |

Included in interest (income) expense, net was interest income related to cash and equivalents and short-term investments of \$26 million, \$27 million, and \$28 million for the years ended May 31, 2013, 2012, and 2011, respectively.

For fair value information regarding notes payable and long-term debt, refer to Note 7 — Short-Term Borrowings and Credit Lines and Note 8 — Long-Term Debt.

NOTE 7 — Short-Term Borrowings and Credit Lines

Notes payable and interest-bearing accounts payable to Sojitz Corporation of America (“Sojitz America”) as of May 31, 2013 and 2012, are summarized below:

| (In millions) | As of May 31, | | 2012 | |
|------------------------------------|---------------|---------------|--------------|---------------|
| | 2013 | Interest Rate | Borrowings | Interest Rate |
| Notes payable: | | | | |
| U.S. operations | \$20 | 0.00 | \$30 | 5.50 |
| Non-U.S. operations | 101 | 4.77 | 78 | 9.46 |
| TOTAL NOTES PAYABLE | \$121 | | \$108 | |
| Interest-Bearing Accounts Payable: | | | | |
| Sojitz America | \$55 | 0.99 | \$75 | 1.10 |

(1) Weighted average interest rate includes non-interest bearing overdrafts.

The carrying amounts reflected in the consolidated balance sheets for notes payable approximate fair value.

The Company purchases through Sojitz America certain athletic footwear, apparel and equipment it acquires from non-U.S. suppliers. These purchases are for the Company’s operations outside of the United States, Europe and Japan. Accounts payable to Sojitz America are generally due up to 60 days after shipment of goods from the foreign port.

The interest rate on such accounts payable is the 60-day London Interbank Offered Rate (“LIBOR”) as of the beginning of the month of the invoice date, plus 0.75%.

As of May 31, 2013 and 2012, the Company had no amounts outstanding under its commercial paper program.

In November 2011, the Company entered into a committed credit facility agreement with a syndicate of banks which provides for up to \$1 billion of borrowings pursuant to a revolving credit facility with the option to increase borrowings to \$1.5 billion with lender approval. The facility matures on November 1, 2016, with a one-year extension option prior to both the second and third anniversary of the closing date, provided that extensions shall not extend beyond November 1, 2018. Based on the Company’s current long-term senior unsecured debt ratings of A+ and A1 from Standard and Poor’s Corporation and Moody’s Investor Services, respectively, the interest rate charged on any outstanding borrowings would be the prevailing LIBOR plus 0.56%. The facility fee is 0.065% of the total commitment. Under this committed credit facility, the Company must maintain, among other things, certain minimum specified financial ratios with which the Company was in compliance at May 31, 2013. No amounts were outstanding under this facility as of May 31, 2013 or 2012.

Table of Contents

NOTE 8 — Long-Term Debt

Long-term debt, net of unamortized premiums and discounts and swap fair value adjustments, comprises the following:

| Scheduled Maturity (Dollars in millions) | Original Principal | Interest Rate | Interest Payments | Book Value Outstanding As of May 31, | |
|--|--------------------|---------------|-------------------|--------------------------------------|--------------|
| | | | | 2013 | 2012 |
| Corporate Bond Payables: ⁽⁴⁾ | | | | | |
| July 23, 2012 ⁽¹⁾ | \$25 | 5.66 | % Semi-Annually | \$— | \$25 |
| August 7, 2012 ⁽¹⁾ | \$15 | 5.40 | % Semi-Annually | — | 15 |
| October 1, 2013 | \$50 | 4.70 | % Semi-Annually | 50 | 50 |
| October 15, 2015 ⁽¹⁾ | \$100 | 5.15 | % Semi-Annually | 111 | 115 |
| May 1, 2023 ⁽⁵⁾ | \$500 | 2.25 | % Semi-Annually | 499 | — |
| May 1, 2043 ⁽⁵⁾ | \$500 | 3.63 | % Semi-Annually | 499 | — |
| Promissory Notes: ⁽²⁾ | | | | | |
| April 1, 2017 | \$40 | 6.20 | % Monthly | 40 | — |
| January 1, 2018 | \$19 | 6.79 | % Monthly | 19 | — |
| Japanese Yen Notes: | | | | | |
| August 20, 2001 through November 20, 2020 ⁽³⁾ | ¥9,000 | 2.60 | % Quarterly | 34 | 50 |
| August 20, 2001 through November 20, 2020 ⁽³⁾ | ¥4,000 | 2.00 | % Quarterly | 15 | 22 |
| Total | | | | 1,267 | 277 |
| Less current maturities | | | | 57 | 49 |
| TOTAL LONG-TERM DEBT | | | | \$1,210 | \$228 |

The Company has entered into interest rate swap agreements whereby the Company receives fixed interest payments at the same rate as the note and pays variable interest payments based on the six-month LIBOR plus a spread. The swaps have the same notional amount and maturity date as the corresponding note. At May 31, 2013, the interest rates payable on these swap agreements ranged from approximately 0.3% to 0.4%.

The Company assumed a total of \$59 million in bonds payable on May 30, 2013 as part of its agreement to purchase certain Corporate properties, which was treated as a non-cash financing transaction. The property serves as collateral for the debt. The purchase of these properties was accounted for as a business combination where the total consideration of \$85 million was allocated to the land and buildings acquired; no other tangible or intangible assets or liabilities resulted from the purchase. The bonds mature in 2017 and 2018 and the Company does not have the ability to re-negotiate the terms of the debt agreements and would incur significant financial penalties if the notes are paid off prior to maturity.

NIKE Logistics YK assumed a total of ¥13.0 billion in loans as part of its agreement to purchase a distribution center in Japan, which serves as collateral for the loans. These loans mature in equal quarterly installments during the period August 20, 2001 through November 20, 2020.

Senior unsecured obligations rank equally with our other unsecured and unsubordinated indebtedness.

The bonds carry a make whole call provision and are redeemable at any time prior to maturity. The bonds also feature a par call provision payable 3 months and 6 months prior to the scheduled maturity date for the bonds maturing on May 1, 2023 and May 1, 2043, respectively.

The scheduled maturity of long-term debt in each of the years ending May 31, 2014 through 2018 are \$57 million, \$7 million, \$108 million, \$45 million and \$25 million, respectively, at face value.

The fair value of the Company's long-term debt, including the current portion, was approximately \$1,219 million at May 31, 2013 and \$283 million at May 31, 2012. The fair value of long-term debt is estimated based upon quoted prices of similar instruments (level 2).

NOTE 9 — Income Taxes

Income before income taxes is as follows:

Edgar Filing: NIKE INC - Form 10-K

| (In millions) | Year Ended May 31, | | 2011 |
|----------------------------------|--------------------|---------|----------|
| | 2013 | 2012 | |
| Income before income taxes: | | | |
| United States | \$ 1,240 | \$ 804 | \$ 1,040 |
| Foreign | 2,032 | 2,221 | 1,822 |
| TOTAL INCOME BEFORE INCOME TAXES | \$3,272 | \$3,025 | \$2,862 |

56

Table of Contents

The provision for income taxes is as follows:

| (In millions) | Year Ended May 31, | | | |
|---------------------------------|--------------------|--------------|--------------|---|
| | 2013 | 2012 | 2011 | |
| Current: | | | | |
| United States | | | | |
| Federal | \$434 | \$289 | \$298 | |
| State | 69 | 51 | 57 | |
| Foreign | 398 | 488 | 435 | |
| Total | 901 | 828 | 790 | |
| Deferred: | | | | |
| United States | | | | |
| Federal | 1 | (48 |) (62 |) |
| State | (4 |) 5 | — | |
| Foreign | (90 |) (29 |) (38 |) |
| Total | (93 |) (72 |) (100 |) |
| TOTAL INCOME TAX EXPENSE | \$808 | \$756 | \$690 | |

A reconciliation from the U.S. statutory federal income tax rate to the effective income tax rate is as follows:

| | Year Ended May 31, | | | |
|-------------------------------------|--------------------|---------------|---------------|----------|
| | 2013 | 2012 | 2011 | |
| Federal income tax rate | 35.0 | % 35.0 | % 35.0 | % |
| State taxes, net of federal benefit | 1.4 | % 1.3 | % 1.3 | % |
| Foreign earnings | -11.8 | % -11.9 | % -11.4 | % |
| Other, net | 0.1 | % 0.6 | % -0.8 | % |
| EFFECTIVE INCOME TAX RATE | 24.7 | % 25.0 | % 24.1 | % |

The effective tax rate from continuing operations for the year ended May 31, 2013 was 30 basis points lower than the effective tax rate from continuing operations for the year ended May 31, 2012 primarily due to tax benefits received from the intercompany sale of intellectual property rights outside of the U.S., the retroactive reinstatement of the research and development credit and the intra-period allocation of tax expense between continuing operations, discontinued operations, and other comprehensive income. The decrease in the effective tax rate was partially offset by a higher effective tax rate on operations as a result of an increase in earnings in higher tax jurisdictions. The effective tax rate from continuing operations for the year ended May 31, 2012 was 90 basis points higher than the effective tax rate from continuing operations for the year ended May 31, 2011 primarily due to the changes in uncertain tax positions partially offset by a reduction in the effective rate related to a decrease in earnings in higher tax jurisdictions.

Table of Contents

Deferred tax assets and (liabilities) comprise the following:

| (In millions) | As of May 31, | | |
|---|---------------|--------|---|
| | 2013 | 2012 | |
| Deferred tax assets: | | | |
| Allowance for doubtful accounts | \$20 | \$17 | |
| Inventories | 40 | 37 | |
| Sales return reserves | 101 | 84 | |
| Deferred compensation | 197 | 186 | |
| Stock-based compensation | 140 | 126 | |
| Reserves and accrued liabilities | 66 | 66 | |
| Foreign loss carry-forwards | 19 | 35 | |
| Foreign tax credit carry-forwards | 106 | 216 | |
| Undistributed earnings of foreign subsidiaries | 162 | 82 | |
| Other | 47 | 62 | |
| Total deferred tax assets | 898 | 911 | |
| Valuation allowance | (5 |) (27 |) |
| Total deferred tax assets after valuation allowance | 893 | 884 | |
| Deferred tax liabilities: | | | |
| Property, plant and equipment | (241 |) (191 |) |
| Intangibles | (96 |) (98 |) |
| Other | (20 |) (22 |) |
| Total deferred tax liability | (357 |) (311 |) |
| NET DEFERRED TAX ASSET | \$536 | \$573 | |

The following is a reconciliation of the changes in the gross balance of unrecognized tax benefits:

| (In millions) | As of May 31, | | | |
|--|---------------|-------|-------|---|
| | 2013 | 2012 | 2011 | |
| Unrecognized tax benefits, as of the beginning of the period | \$285 | \$212 | \$282 | |
| Gross increases related to prior period tax positions | 77 | 48 | 13 | |
| Gross decreases related to prior period tax positions | (3 |) (25 |) (98 |) |
| Gross increases related to current period tax positions | 130 | 91 | 59 | |
| Gross decreases related to current period tax positions | (9 |) (1 |) (6 |) |
| Settlements | — | (20 |) (43 |) |
| Lapse of statute of limitations | (21 |) (9 |) (8 |) |
| Changes due to currency translation | (12 |) (11 |) 13 | |
| UNRECOGNIZED TAX BENEFITS, AS OF THE END OF THE PERIOD | \$447 | \$285 | \$212 | |

As of May 31, 2013, the total gross unrecognized tax benefits, excluding related interest and penalties, were \$447 million, \$281 million of which would affect the Company's effective tax rate if recognized in future periods.

The Company recognizes interest and penalties related to income tax matters in income tax expense. The liability for payment of interest and penalties increased \$4 million, \$17 million, and \$10 million during the years ended May 31, 2013, 2012, and 2011, respectively. As of May 31, 2013 and 2012, accrued interest and penalties related to uncertain tax positions was \$112 million and \$108 million, respectively (excluding federal benefit).

The Company is subject to taxation primarily in the U.S., China, the Netherlands, and Brazil, as well as various state and other foreign jurisdictions. The Company has concluded substantially all U.S. federal income tax matters through fiscal 2010. The Company is currently under audit by the Internal Revenue Service for the 2011 through 2013 tax years. Many issues are at an advanced stage in the examination process, the most significant of which includes the negotiation of a U.S. Unilateral Advanced Pricing Agreement that covers intercompany transfer pricing issues for fiscal years May 31, 2011 through May 31, 2015. In addition, the Company is in appeals regarding the validation of foreign tax credits taken. The Company's major foreign jurisdictions, China, the Netherlands and Brazil, have

concluded substantially all income tax matters through calendar 2005, fiscal 2007 and calendar 2006, respectively. Although the timing of resolution of audits is not certain, the Company evaluates all domestic and foreign audit issues in the aggregate, along with the expiration of applicable statutes of limitations, and estimates that it is reasonably possible the total gross unrecognized tax benefits could decrease by up to \$86 million within the next 12 months. We provide for United States income taxes on the undistributed earnings of foreign subsidiaries unless they are considered indefinitely reinvested outside the United States. At May 31, 2013, the indefinitely reinvested earnings in foreign subsidiaries upon which United States income taxes have not been provided was approximately \$6.7 billion. If these undistributed earnings were repatriated to the United States, or if the shares of the relevant foreign subsidiaries were sold or otherwise transferred, they would generate foreign tax credits that would reduce the federal tax liability associated with the foreign dividend or the otherwise taxable transaction. Assuming a full utilization of the foreign tax credits, the potential net deferred tax liability associated with these temporary differences of undistributed earnings would be approximately \$2.2 billion at May 31, 2013.

A portion of the Company's foreign operations are benefiting from a tax holiday, which will phase out in 2019. This tax holiday may be extended when certain conditions are met or may be terminated early if certain conditions are not met. The impact of this tax holiday decreased foreign taxes

Table of Contents

by \$108 million, \$117 million, and \$36 million for the fiscal years ended May 31, 2013, 2012, and 2011, respectively. The benefit of the tax holiday on net income per share (diluted) was \$0.12, \$0.12, and \$0.04 for the fiscal years ended May 31, 2013, 2012, and 2011, respectively.

Deferred tax assets at May 31, 2013 and 2012 were reduced by a valuation allowance relating to tax benefits of certain subsidiaries with operating losses. The net change in the valuation allowance was a decrease of \$22 million, an increase of \$23 million, and a decrease of \$1 million for the years ended May 31, 2013, 2012, and 2011, respectively.

The Company does not anticipate that any foreign tax credit carry-forwards will expire unutilized.

The Company has available domestic and foreign loss carry-forwards of \$58 million at May 31, 2013. Such losses will expire as follows:

| (In millions) | Year Ending May 31, | | | | | | Total |
|----------------------|---------------------|------|------|------|------------|------------|-------|
| | 2014 | 2015 | 2016 | 2017 | 2018- 2032 | Indefinite | |
| Net Operating Losses | \$— | — | 2 | — | 52 | 4 | \$58 |

During the years ended May 31, 2013, 2012, and 2011, income tax benefits attributable to employee stock-based compensation transactions of \$76 million, \$120 million, and \$68 million, respectively, were allocated to shareholders' equity.

NOTE 10 — Redeemable Preferred Stock

Sojitz America is the sole owner of the Company's authorized Redeemable Preferred Stock, \$1 par value, which is redeemable at the option of Sojitz America or the Company at par value aggregating \$0.3 million. A cumulative dividend of \$0.10 per share is payable annually on May 31 and no dividends may be declared or paid on the common stock of the Company unless dividends on the Redeemable Preferred Stock have been declared and paid in full. There have been no changes in the Redeemable Preferred Stock in the three years ended May 31, 2013, 2012, and 2011. As the holder of the Redeemable Preferred Stock, Sojitz America does not have general voting rights but does have the right to vote as a separate class on the sale of all or substantially all of the assets of the Company and its subsidiaries, on merger, consolidation, liquidation or dissolution of the Company or on the sale or assignment of the NIKE trademark for athletic footwear sold in the United States. The Redeemable Preferred Stock has been fully issued to Sojitz America and is not blank check preferred stock. The Company's articles of incorporation do not permit the issuance of additional preferred stock.

NOTE 11 — Common Stock and Stock-Based Compensation

The authorized number of shares of Class A Common Stock, no par value, and Class B Common Stock, no par value, are 200 million and 1,200 million, respectively. Each share of Class A Common Stock is convertible into one share of Class B Common Stock. Voting rights of Class B Common Stock are limited in certain circumstances with respect to the election of directors. There are no differences in the dividend and liquidation preferences or participation rights of the Class A and Class B common shareholders.

In 1990, the Board of Directors adopted, and the shareholders approved, the NIKE, Inc. 1990 Stock Incentive Plan (the "1990 Plan"). The 1990 Plan provides for the issuance of up to 326 million previously unissued shares of Class B Common Stock in connection with stock options and other awards granted under the plan. The 1990 Plan authorizes the grant of non-statutory stock options, incentive stock options, stock appreciation rights, restricted stock, restricted stock units, and performance-based awards. The exercise price for stock options and stock appreciation rights may not be less than the fair market value of the underlying shares on the date of grant. A committee of the Board of Directors administers the 1990 Plan. The committee has the authority to determine the employees to whom awards will be made, the amount of the awards, and the other terms and conditions of the awards. Substantially all stock option grants outstanding under the 1990 Plan were granted in the first quarter of each fiscal year, vest ratably over four years, and expire 10 years from the date of grant.

The following table summarizes the Company's total stock-based compensation expense recognized in selling and administrative expense:

| (In millions) | Year Ended May 31, | | |
|---------------|--------------------|------|------|
| | 2013 | 2012 | 2011 |

| | | | |
|---|--------------|--------------|--------------|
| Stock options ⁽¹⁾ | \$123 | \$96 | \$77 |
| ESPPs | 19 | 16 | 14 |
| Restricted stock | 32 | 18 | 14 |
| TOTAL STOCK-BASED COMPENSATION EXPENSE | \$174 | \$130 | \$105 |

Expense for stock options includes the expense associated with stock appreciation rights. Accelerated stock option expense is recorded for employees eligible for accelerated stock option vesting upon retirement.

(1) Accelerated stock option expense for years ended May 31, 2013, 2012, and 2011 was \$22 million, \$17 million, and \$12 million, respectively.

As of May 31, 2013, the Company had \$199 million of unrecognized compensation costs from stock options, net of estimated forfeitures, to be recognized as selling and administrative expense over a weighted average period of 2.3 years.

Table of Contents

The weighted average fair value per share of the options granted during the years ended May 31, 2013, 2012, and 2011, as computed using the Black-Scholes pricing model, was \$12.71, \$11.08, and \$8.84, respectively. The weighted average assumptions used to estimate these fair values are as follows:

| | Year Ended May 31, | | | |
|---|--------------------|--------|--------|---|
| | 2013 | 2012 | 2011 | |
| Dividend yield | 1.5 | % 1.4 | % 1.6 | % |
| Expected volatility | 35.0 | % 29.5 | % 31.5 | % |
| Weighted average expected life (in years) | 5.3 | 5.0 | 5.0 | |
| Risk-free interest rate | 0.6 | % 1.4 | % 1.7 | % |

The Company estimates the expected volatility based on the implied volatility in market traded options on the Company's common stock with a term greater than one year, along with other factors. The weighted average expected life of options is based on an analysis of historical and expected future exercise patterns. The interest rate is based on the U.S. Treasury (constant maturity) risk-free rate in effect at the date of grant for periods corresponding with the expected term of the options.

The following summarizes the stock option transactions under the plan discussed above:

| | Shares ⁽¹⁾ | Weighted Average Option Price |
|----------------------------------|-----------------------|----------------------------------|
| | (In millions) | |
| Options outstanding May 31, 2010 | 72.2 | \$23.30 |
| Exercised | (14.0) |) 21.35 |
| Forfeited | (1.3) |) 29.03 |
| Granted | 12.7 | 34.60 |
| Options outstanding May 31, 2011 | 69.6 | \$25.65 |
| Exercised | (18.0) |) 22.81 |
| Forfeited | (1.0) |) 35.61 |
| Granted | 13.7 | 45.87 |
| Options outstanding May 31, 2012 | 64.3 | \$30.59 |
| Exercised | (9.9) |) 24.70 |
| Forfeited | (1.3) |) 40.14 |
| Granted | 14.6 | 46.55 |
| Options outstanding May 31, 2013 | 67.7 | \$34.72 |
| Options exercisable at May 31, | | |
| 2011 | 40.1 | \$22.03 |
| 2012 | 33.9 | 24.38 |
| 2013 | 35.9 | 27.70 |

(1)Includes stock appreciation rights transactions.

The weighted average contractual life remaining for options outstanding and options exercisable at May 31, 2013 was 6.3 years and 4.7 years, respectively. The aggregate intrinsic value for options outstanding and exercisable at May 31, 2013 was \$1,823 million and \$1,218 million, respectively. The aggregate intrinsic value was the amount by which the market value of the underlying stock exceeded the exercise price of the options. The total intrinsic value of the options exercised during the years ended May 31, 2013, 2012, and 2011 was \$293 million, \$453 million, and \$267 million, respectively.

In addition to the 1990 Plan, the Company gives employees the right to purchase shares at a discount to the market price under employee stock purchase plans ("ESPPs"). Employees are eligible to participate through payroll deductions of up to 10% of their compensation. At the end of each six-month offering period, shares are purchased by the participants at 85% of the lower of the fair market value at the beginning or the end of the offering period. Employees purchased 1.6 million, 1.7 million, and 1.6 million shares during each of the three years ended May 31, 2013, 2012 and 2011, respectively.

From time to time, the Company grants restricted stock units and restricted stock to key employees under the 1990 Plan. The number of shares underlying such awards granted to employees during the years ended May 31, 2013, 2012, and 2011 were 1.6 million, 0.7 million, and 0.4 million with weighted average values per share of \$46.86, \$49.49, and \$35.11, respectively. Recipients of restricted stock are entitled to cash dividends and to vote their respective shares throughout the period of restriction. Recipients of restricted stock units are entitled to dividend equivalent cash payments upon vesting. The value of all grants of restricted stock and restricted stock units was established by the market price on the date of grant. During the years ended May 31, 2013, 2012, and 2011, the aggregate fair value of restricted stock and restricted stock units vested was \$25 million, \$22 million, and \$15 million, respectively, determined as of the date of vesting.

NOTE 12 — Earnings Per Share

The following is a reconciliation from basic earnings per share to diluted earnings per share. Options to purchase an additional 0.1 million, 0.2 million, and 0.3 million shares of common stock were outstanding at May 31, 2013, 2012, and 2011 respectively, but were not included in the computation of diluted earnings per share because the options were anti-dilutive.

Table of Contents

| (In millions, except per share data) | Year Ended May 31, | | |
|---|--------------------|--------------|--------------|
| | 2013 | 2012 | 2011 |
| Determination of shares: | | | |
| Weighted average common shares outstanding | 897.3 | 920.0 | 951.1 |
| Assumed conversion of dilutive stock options and awards | 19.1 | 19.6 | 20.2 |
| DILUTED WEIGHTED AVERAGE COMMON SHARES OUTSTANDING | 916.4 | 939.6 | 971.3 |
| Earnings per share from continuing operations: | | | |
| Basic earnings per common share | \$2.75 | \$2.47 | \$2.28 |
| Diluted earnings per common share | \$2.69 | \$2.42 | \$2.24 |
| Earnings per share from discontinued operations: | | | |
| Basic earnings per common share | \$0.02 | \$(0.05) | \$(0.04) |
| Diluted earnings per common share | \$0.02 | \$(0.05) | \$(0.04) |
| Basic earnings per common share for NIKE, Inc. | \$2.77 | \$2.42 | \$2.24 |
| Diluted earnings per common share for NIKE, Inc. | \$2.71 | \$2.37 | \$2.20 |

NOTE 13 — Benefit Plans

The Company has a profit sharing plan available to most U.S.-based employees. The terms of the plan call for annual contributions by the Company as determined by the Board of Directors. A subsidiary of the Company also had a profit sharing plan available to its U.S.-based employees prior to fiscal 2012. The terms of the plan called for annual contributions as determined by the subsidiary's executive management. Contributions of \$47 million, \$40 million, and \$39 million were made to the plans and are included in selling and administrative expense for the years ended May 31, 2013, 2012, and 2011, respectively. The Company has various 401(k) employee savings plans available to U.S.-based employees. The Company matches a portion of employee contributions. Company contributions to the savings plans were \$46 million, \$42 million, and \$38 million for the years ended May 31, 2013, 2012, and 2011, respectively, and are included in selling and administrative expense.

The Company also has a Long-Term Incentive Plan ("LTIP") that was adopted by the Board of Directors and approved by shareholders in September 1997 and later amended in fiscal 2007. The Company recognized \$50 million, \$51 million, and \$31 million of selling and administrative expense related to cash awards under the LTIP during the years ended May 31, 2013, 2012, and 2011, respectively.

The Company has pension plans in various countries worldwide. The pension plans are only available to local employees and are generally government mandated. The liability related to the unfunded pension liabilities of the plans was \$104 million and \$113 million at May 31, 2013 and May 31, 2012, respectively, which was primarily classified as long-term in other liabilities.

NOTE 14 — Accumulated Other Comprehensive Income

The components of accumulated other comprehensive income, net of tax, are as follows:

| (In millions) | May 31 | |
|---|--------------|--------------|
| | 2013 | 2012 |
| Cumulative translation adjustment and other | \$(14) | \$(127) |
| Net deferred gain on cash flow hedge derivatives | 193 | 181 |
| Net deferred gain on net investment hedge derivatives | 95 | 95 |
| ACCUMULATED OTHER COMPREHENSIVE INCOME | \$274 | \$149 |

Refer to Note 17— Risk Management and Derivatives for more information on the Company's risk management program and derivatives.

NOTE 15 — Discontinued Operations

The Company continually evaluates its existing portfolio of businesses to ensure resources are invested in those businesses that are accretive to the NIKE Brand and represent the largest growth potential and highest returns. During the year, the Company divested of Umbro and Cole Haan, allowing it to focus its resources on driving growth in the NIKE, Jordan, Converse and Hurley brands.

On February 1, 2013, the Company completed the sale of Cole Haan to Apax Partners for an agreed upon purchase price of \$570 million and received at closing \$561 million, net of \$9 million of purchase price adjustments. The transaction resulted in a gain on sale of \$231 million, net of \$137 million in tax expense; this gain is included in the net income (loss) from discontinued operations line item on the consolidated statements of income. There were no adjustments to these recorded amounts as of May 31, 2013. Beginning November 30, 2012, the Company classified the Cole Haan disposal group as held-for-sale and presented the results of Cole Haan's operations in the net income (loss) from discontinued operations line item on the consolidated statements of income. From this date until the sale, the assets and liabilities of Cole Haan were recorded in the assets of discontinued operations and liabilities of discontinued operations line items on the consolidated balance sheets, respectively. Previously, these amounts were reported in the Company's segment presentation as "Other Businesses."

Table of Contents

Under the sale agreement, the Company agreed to provide certain transition services to Cole Haan for an expected period of 3 to 9 months from the date of sale. The Company will also license NIKE proprietary Air and Lunar technologies to Cole Haan for a transition period. The continuing cash flows related to these items are not expected to be significant to Cole Haan and the Company will have no significant continuing involvement with Cole Haan beyond the transition services. Additionally, preexisting guarantees of certain Cole Haan lease payments remain in place after the sale; the maximum exposure under the guarantees is \$44 million at May 31, 2013. The fair value of the guarantees is not material.

On November 30, 2012, the Company completed the sale of certain assets of Umbro to Iconix Brand Group (“Iconix”) for \$225 million. The Umbro disposal group was classified as held-for-sale as of November 30, 2012 and the results of Umbro's operations are presented in the net income (loss) from discontinued operations line item on the consolidated statements of income. The remaining liabilities of Umbro are recorded in the liabilities of discontinued operations line items on the consolidated balance sheets. Previously, these amounts were reported in the Company's segment presentation as “Other Businesses.” Upon meeting the held-for-sale criteria, the Company recorded a loss of \$107 million, net of tax, on the sale of Umbro and the loss is included in the net income (loss) from discontinued operations line item on the consolidated statements of income. The loss on sale was calculated as the net sales price less Umbro assets of \$248 million, including intangibles, goodwill, and fixed assets, other miscellaneous charges of \$22 million, and the release of the associated cumulative translation adjustment of \$129 million. The tax benefit on the loss was \$67 million. There were no adjustments to these recorded amounts as of May 31, 2013.

Under the sale agreement, the Company provided transition services to Iconix while certain markets were transitioned to Iconix-designated licensees. These transition services are complete and the Company has wound down the remaining operations of Umbro.

For the year ended May 31, 2013, net income (loss) from discontinued operations included, for both businesses, the net gain or loss on sale, net operating losses, tax expenses, and approximately \$20 million in wind down costs.

Summarized results of the Company's discontinued operations are as follows:

| (In millions) | Year Ended May 31, | | |
|--|--------------------|-------|---------|
| | 2013 | 2012 | 2011 |
| Revenues | \$523 | \$796 | \$746 |
| Income (loss) before income taxes | 108 | (43 |) (18 |
| Income tax expense (benefit) | 87 | 3 | 21 |
| Net income (loss) from discontinued operations | \$21 | \$(46 |) \$(39 |

As of May 31, 2013 and 2012, the aggregate components of assets and liabilities classified as discontinued operations and included in current assets and current liabilities consisted of the following:

| (In millions) | As of May 31, | |
|---|---------------|--------------|
| | 2013 | 2012 |
| Accounts Receivable, net | \$— | \$148 |
| Inventories | — | 128 |
| Deferred income taxes and other assets | — | 35 |
| Property, plant and equipment, net | — | 70 |
| Identifiable intangible assets, net | — | 234 |
| TOTAL ASSETS | \$— | \$615 |
| Accounts payable | \$1 | \$42 |
| Accrued liabilities | 17 | 112 |
| Deferred income taxes and other liabilities | — | 16 |
| TOTAL LIABILITIES | \$18 | \$170 |

NOTE 16 — Commitments and Contingencies

The Company leases space for certain of its offices, warehouses and retail stores under leases expiring from 1 to 21 years after May 31, 2013. Rent expense was \$482 million, \$431 million, and \$386 million for the years ended May 31, 2013, 2012 and 2011, respectively. Amounts of minimum future annual rental commitments under non-cancelable operating leases in each of the five years ending May 31, 2014 through 2018 are \$403 million, \$340 million, \$304

million, \$272 million, \$225 million, respectively, and \$816 million in later years. Amounts of minimum future annual commitments under non-cancelable capital leases in each of the four years ending May 31, 2014 through 2017 are \$23 million, \$28 million, \$21 million, and \$9 million, respectively; the Company has no capital lease obligations beyond the year ending May 31, 2017.

As of May 31, 2013 and 2012, the Company had letters of credit outstanding totaling \$149 million and \$137 million, respectively. These letters of credit were generally issued for the purchase of inventory and guarantees of the Company's performance under certain self-insurance and other programs.

In connection with various contracts and agreements, the Company provides routine indemnifications relating to the enforceability of intellectual property rights, coverage for legal issues that arise and other items where the Company is acting as the guarantor. Currently, the Company has several such agreements in place. However, based on the Company's historical experience and the estimated probability of future loss, the Company has determined that the fair value of such indemnifications is not material to the Company's financial position or results of operations.

In the ordinary course of its business, the Company is involved in various legal proceedings involving contractual and employment relationships, product liability claims, trademark rights, and a variety of other matters. While the Company cannot predict the outcome of its pending legal matters

Table of Contents

with certainty, the Company does not believe any currently identified claim, proceeding or litigation, either individually or in aggregate, will have a material impact on the Company's results of operations, financial position or cash flows.

NOTE 17 — Risk Management and Derivatives

The Company is exposed to global market risks, including the effect of changes in foreign currency exchange rates and interest rates, and uses derivatives to manage financial exposures that occur in the normal course of business. The Company does not hold or issue derivatives for trading or speculative purposes.

The Company may elect to designate certain derivatives as hedging instruments under the accounting standards for derivatives and hedging. The Company formally documents all relationships between designated hedging instruments and hedged items as well as its risk management objective and strategy for undertaking hedge transactions. This process includes linking all derivatives designated as hedges to either recognized assets or liabilities or forecasted transactions.

The majority of derivatives outstanding as of May 31, 2013 are designated as cash flow or fair value hedges. All derivatives are recognized on the balance sheet at fair value and classified based on the instrument's maturity date. The total notional amount of outstanding derivatives as of May 31, 2013 was approximately \$9 billion, which primarily comprises cash flow hedges for Euro/U.S. Dollar, British Pound/Euro, and Japanese Yen/U.S. Dollar currency pairs. As of May 31, 2013, there were outstanding currency forward contracts with maturities up to 24 months.

The following table presents the fair values of derivative instruments included within the consolidated balance sheets as of May 31, 2013 and 2012:

| (In millions) | Asset Derivatives | | Liability Derivatives | | | |
|--|--|--------------|-----------------------|---|-------------|-------------|
| | Balance Sheet Location | 2013 | 2012 | Balance Sheet Location | 2013 | 2012 |
| Derivatives formally designated as hedging instruments: | | | | | | |
| Foreign exchange forwards and options | Prepaid expenses and other current assets | \$141 | \$203 | Accrued liabilities | \$12 | \$35 |
| Foreign exchange forwards and options | Deferred income taxes and other long-term assets | 79 | 7 | Deferred income taxes and other long-term liabilities | — | — |
| Interest rate swap contracts | Deferred income taxes and other long-term assets | 11 | 15 | Deferred income taxes and other long-term liabilities | — | — |
| Total derivatives formally designated as hedging instruments | | \$231 | \$225 | | \$12 | \$35 |
| Derivatives not designated as hedging instruments: | | | | | | |
| Foreign exchange forwards and options | Prepaid expenses and other current assets | \$58 | \$55 | Accrued liabilities | \$22 | \$20 |
| Embedded derivatives | Prepaid expenses and other current assets | — | 1 | Accrued liabilities | — | — |
| Total derivatives not designated as hedging instruments | | 58 | 56 | | 22 | 20 |
| TOTAL DERIVATIVES | | \$289 | \$281 | | \$34 | \$55 |

Edgar Filing: NIKE INC - Form 10-K

The following tables present the amounts affecting the consolidated statements of income for years ended May 31, 2013, 2012 and 2011:

| (In millions) | Amount of Gain (Loss) Recognized in Other Comprehensive Income on Derivatives ⁽¹⁾ | | | Location of Gain (Loss) Reclassified From Accumulated Other Comprehensive Income Into Income ⁽¹⁾ | Amount of Gain (Loss) Reclassified From Accumulated Other Comprehensive Income into Income ⁽¹⁾ | | |
|---|---|---------|---------|--|---|---------|---------|
| | Year Ended May 31, | | | | Year Ended May 31, | | |
| | 2013 | 2012 | 2011 | | 2013 | 2012 | 2011 |
| Derivatives designated as cash flow hedges: | | | | | | | |
| Foreign exchange forwards and options | \$42 | \$(29) | \$(87) | Revenue | \$(19) | \$5 | \$(30) |
| Foreign exchange forwards and options | 67 | 253 | (152) | Cost of sales | 113 | (57) | 103 |
| Foreign exchange forwards and options | (3) | 3 | (4) | Selling and administrative expense | 2 | (2) | 1 |
| Foreign exchange forwards and options | 33 | 36 | (65) | Other (income) expense, net | 9 | (9) | 34 |
| Total designated cash flow hedges | \$139 | \$263 | \$(308) | | \$105 | \$(63) | \$108 |
| Derivatives designated as net investment hedges: | | | | | | | |
| Foreign exchange forwards and options | \$— | \$45 | \$(85) | Other (income) expense, net | \$— | \$— | \$— |

For the years ended May 31, 2013, 2012, and 2011, the amounts recorded in other (income) expense, net as a result (1) of hedge ineffectiveness and the discontinuance of cash flow hedges because the forecasted transactions were no longer probable of occurring were immaterial.

Table of Contents

| (In millions) | Amount of Gain (Loss) Recognized in Income on Derivatives Year Ended May 31, | | | Location of Gain (Loss) Recognized in Income on Derivatives |
|---|--|-------|------|---|
| | 2013 | 2012 | 2011 | |
| Derivatives designated as fair value hedges: | | | | |
| Interest rate swaps ⁽¹⁾ | \$5 | \$6 | \$6 | Interest (income) expense, net |
| Derivatives not designated as hedging instruments: | | | | |
| Foreign exchange forwards and options | 51 | 64 | (30 |) Other (income) expense, net |
| Embedded derivatives | \$(4 |) \$1 | \$— | Other (income) expense, net |

All interest rate swap agreements meet the shortcut method requirements under the accounting standards for derivatives and hedging. Accordingly, changes in the fair values of the interest rate swap agreements are considered to exactly offset changes in the fair value of the underlying long-term debt. Refer to “Fair Value Hedges” in this note for additional detail.

Refer to Note 5 — Accrued Liabilities for derivative instruments recorded in accrued liabilities, Note 6 — Fair Value Measurements for a description of how the above financial instruments are valued, Note 14 — Accumulated Other Comprehensive Income and the consolidated statements of shareholders’ equity for additional information on changes in other comprehensive income for the years ended May 31, 2013, 2012 and 2011.

Cash Flow Hedges

The purpose of the Company’s foreign currency hedging activities is to protect the Company from the risk that the eventual cash flows resulting from transactions in foreign currencies will be adversely affected by changes in exchange rates. Foreign currency exposures that the Company may elect to hedge in this manner include product cost exposures, non-functional currency denominated external and intercompany revenues, selling and administrative expenses, investments in U.S. Dollar-denominated available-for-sale debt securities and certain other intercompany transactions.

Product cost exposures are primarily generated through non-functional currency denominated product purchases and the foreign currency adjustment program described below. NIKE entities primarily purchase products in two ways: (1) Certain NIKE entities purchase product from the NIKE Trading Company (“NTC”), a wholly-owned sourcing hub that buys NIKE branded products from third party factories, predominantly in U.S. Dollars. The NTC, whose functional currency is the U.S. Dollar, then sells the products to NIKE entities in their respective functional currencies. When the NTC sells to a NIKE entity with a different functional currency, the result is a foreign currency exposure for the NTC; (2) Other NIKE entities purchase product directly from third party factories in U.S. Dollars. These purchases generate a foreign currency exposure for those NIKE entities with a functional currency other than the U.S. Dollar.

In January 2012, the Company implemented a foreign currency adjustment program with certain factories. The program is designed to more effectively manage foreign currency risk by assuming certain of the factories’ foreign currency exposures, some of which are natural offsets to our existing foreign currency exposures. Under this program, the Company’s payments to these factories are adjusted for rate fluctuations in the basket of currencies (“factory currency exposure index”) in which the labor, materials and overhead costs incurred by the factories in the production of NIKE branded products (“factory input costs”) are denominated. For the portion of the indices denominated in the local or functional currency of the factory, the Company may elect to place formally designated cash flow hedges. For all currencies within the indices, excluding the U.S. Dollar and the local or functional currency of the factory, an embedded derivative contract is created upon the factory’s acceptance of NIKE’s purchase order. Embedded derivative contracts are separated from the related purchase order and their accounting treatment is described further below.

The Company’s policy permits the utilization of derivatives to reduce its foreign currency exposures where internal netting or other strategies cannot be effectively employed. Hedged transactions are denominated primarily in Euros, British Pounds and Japanese Yen. The Company may enter into hedge contracts typically starting up to 12 to 18 months in advance of the forecasted transaction and may place incremental hedges for up to 100% of the exposure by

the time the forecasted transaction occurs.

All changes in fair value of derivatives designated as cash flow hedges, excluding any ineffective portion, are recorded in other comprehensive income until net income is affected by the variability of cash flows of the hedged transaction. In most cases, amounts recorded in other comprehensive income will be released to net income some time after the maturity of the related derivative. Effective hedge results are classified within the consolidated statements of income in the same manner as the underlying exposure, with the results of hedges of non-functional currency denominated revenues and product cost exposures, excluding embedded derivatives as described below, recorded in revenues or cost of sales, when the underlying hedged transaction affects consolidated net income. Results of hedges of selling and administrative expense are recorded together with those costs when the related expense is recorded. Results of hedges of anticipated purchases and sales of U.S. Dollar-denominated available-for-sale securities are recorded in other (income) expense, net when the securities are sold. Results of hedges of certain anticipated intercompany transactions are recorded in other (income) expense, net when the transaction occurs. The Company classifies the cash flows at settlement from these designated cash flow hedge derivatives in the same category as the cash flows from the related hedged items, generally within the cash provided by operations component of the cash flow statement.

Premiums paid on options are initially recorded as deferred charges. The Company assesses the effectiveness of options based on the total cash flows method and records total changes in the options' fair value to other comprehensive income to the degree they are effective.

The Company formally assesses, both at a hedge's inception and on an ongoing basis, whether the derivatives that are used in the hedging transaction have been highly effective in offsetting changes in the cash flows of hedged items and whether those derivatives may be expected to remain highly effective in future periods. Effectiveness for cash flow hedges is assessed based on forward rates. Ineffectiveness was not material for the years ended May 31, 2013, 2012 and 2011.

The Company discontinues hedge accounting prospectively when (1) it determines that the derivative is no longer highly effective in offsetting changes in the cash flows of a hedged item (including hedged items such as firm commitments or forecasted transactions); (2) the derivative expires or is sold, terminated, or exercised; (3) it is no longer probable that the forecasted transaction will occur; or (4) management determines that designating the derivative as a hedging instrument is no longer appropriate.

Table of Contents

When the Company discontinues hedge accounting because it is no longer probable that the forecasted transaction will occur in the originally expected period, but is expected to occur within an additional two-month period of time thereafter, the gain or loss on the derivative remains in accumulated other comprehensive income and is reclassified to net income when the forecasted transaction affects consolidated net income. However, if it is probable that a forecasted transaction will not occur by the end of the originally specified time period or within an additional two-month period of time thereafter, the gains and losses that were accumulated in other comprehensive income will be recognized immediately in other (income) expense, net. In all situations in which hedge accounting is discontinued and the derivative remains outstanding, the Company will carry the derivative at its fair value on the balance sheet, recognizing future changes in the fair value in other (income) expense, net. For the years ended May 31, 2013, 2012 and 2011, the amounts recorded in other (income) expense, net as a result of the discontinuance of cash flow hedging because the forecasted transaction was no longer probable of occurring were immaterial.

As of May 31, 2013, \$132 million of deferred net gains (net of tax) on both outstanding and matured derivatives accumulated in other comprehensive income are expected to be reclassified to net income during the next 12 months concurrent with the underlying hedged transactions also being recorded in net income. Actual amounts ultimately reclassified to net income are dependent on the exchange rates in effect when derivative contracts that are currently outstanding mature. As of May 31, 2013, the maximum term over which the Company is hedging exposures to the variability of cash flows for its forecasted transactions is 24 months.

Fair Value Hedges

The Company is also exposed to the risk of changes in the fair value of certain fixed-rate debt attributable to changes in interest rates. Derivatives currently used by the Company to hedge this risk are receive-fixed, pay-variable interest rate swaps. As of May 31, 2013, all interest rate swap agreements are designated as fair value hedges of the related long-term debt and meet the shortcut method requirements under the accounting standards for derivatives and hedging. Accordingly, changes in the fair values of the interest rate swap agreements are considered to exactly offset changes in the fair value of the underlying long-term debt. The cash flows associated with the Company's fair value hedges are periodic interest payments while the swaps are outstanding, which are reflected within the cash provided by operations component of the cash flow statement. The Company recorded no ineffectiveness from its interest rate swaps designated as fair value hedges for the years ended May 31, 2013, 2012, or 2011.

Net Investment Hedges

The Company has hedged and may, in the future, hedge the risk of variability in foreign-currency-denominated net investments in wholly-owned international operations. All changes in fair value of the derivatives designated as net investment hedges, except ineffective portions, are reported in the cumulative translation adjustment component of other comprehensive income along with the foreign currency translation adjustments on those investments. The Company classifies the cash flows at settlement of its net investment hedges within the cash provided or used by investing component of the cash flow statement. The Company assesses hedge effectiveness based on changes in forward rates. The Company recorded no ineffectiveness from its net investment hedges for the years ended May 31, 2013, 2012, or 2011.

Embedded Derivatives

As part of the foreign currency adjustment program described above, currencies within the factory currency exposure indices that are neither the U.S. Dollar nor the local or functional currency of the factory, an embedded derivative contract is created upon the factory's acceptance of NIKE's purchase order. Embedded derivative contracts are treated as foreign currency forward contracts that are bifurcated from the related purchase order and recorded at fair value as a derivative asset or liability on the balance sheet with their corresponding change in fair value recognized in other (income) expense, net from the date a purchase order is accepted by a factory through the date the purchase price is no longer subject to foreign currency fluctuations. At May 31, 2013, the notional amount of embedded derivatives was approximately \$136 million.

Undesignated Derivative Instruments

The Company may elect to enter into foreign exchange forwards to mitigate the change in fair value of specific assets and liabilities on the balance sheet and/or the embedded derivative contracts explained above. These forwards are not designated as hedging instruments under the accounting standards for derivatives and hedging. Accordingly, these

undesigned instruments are recorded at fair value as a derivative asset or liability on the balance sheet with their corresponding change in fair value recognized in other (income) expense, net, together with the re-measurement gain or loss from the hedged balance sheet position or embedded derivative contract. The Company classifies the cash flows at settlement from undesigned instruments in the same category as the cash flows from the related hedged items, generally within the cash provided by operations component of the cash flow statement.

Credit Risk

The Company is exposed to credit-related losses in the event of non-performance by counterparties to hedging instruments. The counterparties to all derivative transactions are major financial institutions with investment grade credit ratings. However, this does not eliminate the Company's exposure to credit risk with these institutions. This credit risk is limited to the unrealized gains in such contracts should any of these counterparties fail to perform as contracted. To manage this risk, the Company has established strict counterparty credit guidelines that are continually monitored.

The Company's derivative contracts contain credit risk related contingent features designed to protect against significant deterioration in counterparties' creditworthiness and their ultimate ability to settle outstanding derivative contracts in the normal course of business. The Company's bilateral credit related contingent features generally require the owing entity, either the Company or the derivative counterparty, to post collateral for the portion of the fair value in excess of \$50 million should the fair value of outstanding derivatives per counterparty be greater than \$50 million. Additionally, a certain level of decline in credit rating of either the Company or the counterparty could also trigger collateral requirements. As of May 31, 2013, the Company was in compliance with all credit risk related contingent features and the fair value of its derivative instruments with credit risk related contingent features in a net liability position was insignificant. Accordingly, the Company was not required to post any collateral as a result of these contingent features. Further, as of May 31, 2013 those counterparties which were required to post collateral complied with such requirements. Given the considerations described above, the Company considers the impact of the risk of counterparty default to be immaterial.

Table of Contents

NOTE 18 — Operating Segments and Related Information

Operating Segments. The Company's operating segments are evidence of the structure of the Company's internal organization. The major segments are defined by geographic regions for operations participating in NIKE Brand sales activity excluding NIKE Golf. Each NIKE Brand geographic segment operates predominantly in one industry: the design, development, marketing and selling of athletic footwear, apparel, and equipment. The Company's reportable operating segments for the NIKE Brand are: North America, Western Europe, Central & Eastern Europe, Greater China, Japan, and Emerging Markets. The Company's NIKE Brand Direct to Consumer operations are managed within each geographic segment.

The Company's "Other" category is broken into two components for presentation purposes to align with the way management views the Company. The "Global Brand Divisions" category primarily represents NIKE Brand licensing businesses that are not part of a geographic operating segment, demand creation and operating overhead expenses that are centrally managed for the NIKE Brand, and costs associated with product development and supply chain operations. The "Other Businesses" category consists of the activities of Converse Inc., Hurley International LLC, and NIKE Golf. Activities represented in the "Other" category are considered immaterial for individual disclosure. Corporate consists largely of unallocated general and administrative expenses, including expenses associated with centrally managed departments, depreciation and amortization related to the Company's headquarters, unallocated insurance and benefit programs, including stock-based compensation, certain foreign currency gains and losses, including certain hedge gains and losses, certain corporate eliminations and other items.

The primary financial measure used by the Company to evaluate performance of individual operating segments is earnings before interest and taxes (commonly referred to as "EBIT"), which represents net income before interest (income) expense, net and income taxes in the consolidated statements of income. Reconciling items for EBIT represent corporate expense items that are not allocated to the operating segments for management reporting.

As part of our centrally managed foreign exchange risk management program, standard foreign currency rates are assigned twice per year to each NIKE Brand entity in our geographic operating segments and certain Other Businesses. These rates are set approximately nine months in advance of the future selling season based on average market spot rates in the calendar month preceding the date they are established. Inventories and cost of sales for geographic operating segments and certain Other Businesses reflect use of these standard rates to record non-functional currency product purchases in the entity's functional currency. Differences between assigned standard foreign currency rates and actual market rates are included in Corporate, together with foreign currency hedge gains and losses generated from our centrally managed foreign exchange risk management program and other conversion gains and losses.

Accounts receivable, inventories and property, plant and equipment for operating segments are regularly reviewed by management and are therefore provided below. Additions to long-lived assets as presented in the following table represent capital expenditures.

Certain prior year amounts have been reclassified to conform to fiscal 2013 presentation.

Revenues and Long-Lived Assets by Geographic Area

Geographical area information is similar to what is reflected above under operating segments with the exception of the Other activity, which has been allocated to the geographical areas based on the location where the sales originated. Revenues derived in the United States were \$11,385 million, \$9,793 million, and \$8,467 million for the years ended May 31, 2013, 2012, and 2011, respectively. The Company's largest concentrations of long-lived assets primarily consist of the Company's world headquarters and distribution facilities in the United States and distribution facilities

Table of Contents

in Japan, Belgium and China. Long-lived assets attributable to operations in the United States, which are primarily composed of net property, plant & equipment, were \$1,424 million, \$1,204 million, and \$1,056 million at May 31, 2013, 2012, and 2011, respectively. Long-lived assets attributable to operations in Japan were \$270 million, \$360 million, and \$361 million at May 31, 2013, 2012, and 2011, respectively. Long-lived assets attributable to operations in Belgium were \$157 million, \$164 million, and \$182 million at May 31, 2013, 2012, and 2011, respectively. Long-lived assets attributable to operations in China were \$212 million, \$188 million, and \$175 million at May 31, 2013, 2012, and 2011, respectively.

Major Customers

No customer accounted for 10% or more of the Company's net revenues during the years ended May 31, 2013, 2012, and 2011.

ITEM 9. Changes In and Disagreements with Accountants on Accounting and Financial Disclosure

There has been no change of accountants nor any disagreements with accountants on any matter of accounting principles or practices or financial statement disclosure required to be reported under this Item.

ITEM 9A. Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure information required to be disclosed in our Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow for timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management is required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

We carry out a variety of on-going procedures, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, to evaluate the effectiveness of the design and operation of our disclosure controls and procedures. Based on the foregoing, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective at the reasonable assurance level as of May 31, 2013.

"Management's Annual Report on Internal Control Over Financial Reporting" is included in Item 8 of this Report. There has been no change in our internal control over financial reporting during our most recent fiscal quarter that has materially affected, or is reasonable likely to materially affect, our internal control over financial reporting.

ITEM 9B. Other Information

No disclosure is required under this Item.
