Modine Reports a 20% Increase in Sales and a 22% Improvement

in Earnings for the First Quarter of Fiscal 2005

RACINE, Wis., July 21, 2004 -- Modine Manufacturing Company (NASDAQ: MODI) today reported strong improvement in its financial results for the first quarter ended June 26, 2004. Sales for the first quarter increased 20% to \$347.4 million from \$288.9 million reported one year ago. This is the third consecutive quarter the Company achieved record sales. Net earnings for the quarter increased over 22% to \$13.8 million, or \$0.40 per fully diluted share, compared with \$11.3 million, or \$0.33 per fully diluted share for the same period one year ago. The effective tax rate in the quarter increased to 41.1% from 34.3% last year.

"We started the current fiscal year on a strong note and continued the positive momentum we established in the second half of fiscal year 2004, with a more than 20% increase in both sales and earnings," said David Rayburn, Modine's President and Chief Executive Officer.

Income from operations in the first quarter increased significantly to \$21.2 million, an improvement of 40% from \$15.2 million one year ago. Net favorable currency exchange rates, primarily the stronger Euro, added approximately \$11.2 million to first quarter sales and \$1.0 million to pre-tax earnings. Also included in the first quarter, on a pre-tax basis, is approximately \$2.0 million in costs related to the previously announced closure of the Guaymas, Mexico facility in the Company's electronics cooling business.

"We delivered another strong year-over-year performance in the first quarter. New business programs and operational improvements continue to make a positive impact on our financial results. The recovery in the North America truck and heavy-duty markets that we first saw in our fiscal fourth quarter continued this quarter and contributed positively to our performance. Partially offsetting the performance improvement was the lag impact of pass-through of rising raw material costs to our original equipment manufacturer (OEM) customers. Overall, income from operations increased to 6.1% of sales this quarter from 5.2% of sales for the same period one year ago," continued Rayburn.

Segment Data and Performance

First quarter sales for the Original Equipment segment increased nearly 30% to \$143.7 million from \$111.0 million one year ago. Operating income showed a similarly strong improvement, increasing to \$21.7 million from \$16.7

million in the previous year. All three major businesses in the segment (Automotive, Truck, and Heavy Duty & Industrial) showed a double-digit increase in sales. Both the North American truck and off-highway & industrial businesses had particularly strong year-over-year growth and contributed positively to the increase in operating income for this segment.

Sales for the Distributed Products segment in the first quarter decreased slightly to \$85.1 million from \$85.2 million one year ago, with lower aftermarket volumes offsetting stronger coil sales in the commercial HVAC&R (heating, ventilating, air conditioning, and refrigeration) business. Operating income showed a significant improvement of \$1.1 million from a loss of \$1.2 million in the previous year, despite the \$2.0 million charge associated with the closure of the Electronics Cooling Division plant in Guaymas, Mexico. The aftermarket business recorded the strongest year-over-year operating performance improvement among the three businesses in the segment, despite lower sales.

Sales for the European Operations segment in the first quarter increased 20% to \$123.1 million from \$102.3 million one year ago, with growth in the European heavy-duty business and the positive impact of the stronger Euro contributing to the increase. Operating income decreased to \$13.2 million from \$13.7 million reported one year ago, as higher SG&A (selling, general and administrative) costs in support of forthcoming programs offset the volume growth in the heavy-duty business and the benefit of currency exchange rates.

Balance Sheet and Cash Flow

Modine's balance sheet remains strong with excellent liquidity. The cash balance at the end of the first quarter stood at \$47.3 million compared with \$63.3 million at the end of the last fiscal year, while operating cash flow for the first quarter was \$2.7 million versus \$14.5 million one year ago. The differences were mainly the result of a larger increase in accounts receivable this year due to higher sales volumes versus last year and a larger decrease in accounts payable this year versus last year. Total debt at the end of the first quarter was \$85.9 million, down slightly from \$87.9 million at the end of the last fiscal year, resulting in a total debt to capital (total debt plus shareholders' equity) ratio of 12.7%, compared with 13.0% at the prior year-end. "We continue to make improvements in working capital management. Compared with the same period one year ago, days sales outstanding decreased two days to 51 days, and inventory turns increased from 6.4 to 7.7," said Brad Richardson, Modine's Chief Financial Officer. "Capital expenditures for the first quarter were \$12.8 million, down from \$14.3 million one year ago, and below the depreciation and amortization costs of \$16.0 million. We expect that total capital expenditures for this fiscal year will be in line with depreciation levels as we are focused on leveraging our existing asset base to drive improvement in return on capital employed."

Fiscal 2005 Outlook

"We carried the positive momentum from the second half of fiscal year 2004 to the first quarter, posting another record in quarterly sales and increased earnings," said Rayburn. "Our second quarter earnings are expected to be slightly higher than the first quarter. While our effective tax rate for the first quarter was 41.1%, we expect it to be between 35% and 37% for the balance of the year. We are confident that we are on track to deliver or potentially exceed the fiscal 2005 guidance we stated in our prior year-end earnings release.

"The closing of our proposed acquisition of the Automotive Climate Control Division of WiniaMando Inc. is expected to occur within the next 30 days," added Rayburn. "This proposed acquisition, along with new business programs and continued market recovery in certain of our businesses, will continue to produce strong financial results and performance for the Company and increase shareholder value."

First Quarter Webcast

Modine's executive management team will conduct a live audio webcast on Thursday, July 22, 2004 at 9:00 a.m. (EDT) to discuss additional details regarding the Company's performance for the first quarter of fiscal 2005. The

webcast may be accessed at www.modine.com. A replay will be available on Modine's website after the webcast. In addition, the 2004 Annual Meeting of Shareholders slide presentation by President and Chief Executive Officer David Rayburn will be posted to Modine's website on Wednesday, July 21.

Modine specializes in thermal management, bringing heating and cooling technology to diversified markets. Modine products are used in light, medium and heavy-duty vehicles, HVAC (heating, ventilating, air conditioning) equipment, industrial equipment, refrigeration systems, fuel cells, and electronics. Modine can be found on the Internet at www.modine.com.

This news release contains statements, including information about future financial performance, accompanied by phrases such as "believes," "estimates," "expects," "plans," "anticipates," "will," "intends," and other similar "forward-looking" statements, as defined in the Private Securities Litigation Reform Act of 1995. Modine's actual results, performance or achievements may differ materially from those expressed or implied in these statements, because of certain risks and uncertainties, which are identified on page 31 of the Company's 2004 Annual Report to Shareholders and other recent Company filings with the Securities and Exchange Commission. In addition, this news release contains a forward-looking statement regarding an anticipated reduction in Modine's effective tax rate. This statement is subject to uncertainties, particularly relating to Modine's ability to predict the global mix of its future business. This news release also contains forward-looking statements regarding a proposed acquisition and the benefits thereof. These forward-looking statements are particularly subject to a number of risks and uncertainties, including regulatory approvals; international economic changes and challenges; market acceptance and demand for new products and technologies; and the ability of Modine to integrate the acquired operations and employees in a timely and cost-effective manner.

Modine does not assume any obligation to update any of these forward-looking statements.
