CHEMUNG FINANCIAL CORPORATION AND SUBSIDIARIES
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

1. Basis of Presentation

Chemung Financial Corporation (the "Corporation"), through its wholly owned subsidiaries, Chemung Canal Trust Company (the "Bank") and CFS Group, Inc., a financial services company, provides a wide range of banking, financing, fiduciary and other financial services to its local market area. The consolidated financial statements include the accounts of the Corporation and its wholly owned subsidiaries. All material intercompany accounts and transactions are eliminated in consolidation.

The data in the consolidated balance sheet as of December 31, 2007 was derived from the audited consolidated financial statements in the Corporation's 2007 Annual Report on Form 10-K, which was filed with the Securities and Exchange Commission on March 13, 2008. That data, along with the other interim financial information presented in the consolidated balance sheets, statements of income, shareholders' equity and comprehensive income, and cash flows should be read in conjunction with the audited consolidated financial statements, including the notes thereto, contained in the 2007 Annual Report on Form 10-K. Amounts in prior periods' consolidated interim financial statements are reclassified whenever necessary to conform to the current period's presentation.

The consolidated financial statements included herein reflect all adjustments which are, in the opinion of management, of a normal recurring nature and necessary to present fairly the Corporation's financial position as of March 31, 2008 and December 31, 2007, and results of operations for the three-month periods ended March 31, 2008 and 2007, and changes in shareholders' equity and cash flows for the three-month periods ended March 31, 2008 and 2007. The results for the periods presented are not necessarily indicative of results to be expected for the entire fiscal year or any other interim period.

2.

Earnings Per Share

Earnings per share were computed by dividing net income by 3,596,680 and 3,608,238 weighted average shares outstanding for the three-month periods ended March 31, 2008 and 2007, respectively. Issuable shares (such as those related to directors' restricted stock units and directors' stock compensation) are considered outstanding and are included in the computation of basic earnings per share as they are earned. There were no dilutive common stock equivalents during the three-month periods ended March 31, 2008 or 2007.

3. Recently Adopted Accounting Standards

In September 2006, the FASB issued Statement No. 157, *Fair Value Measurements*. This Statement defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. This Statement establishes a fair value hierarchy about the assumptions used to measure fair value and clarifies assumptions about risk and the effect of a restriction on the sale or use of an asset. The standard is effective for fiscal years beginning after November 15, 2007. In February 2008, the FASB issued Staff Position (FSP) 157-2, *Effective Date of FASB Statement No. 157*. This FSP delays the effective date of FAS 157 for all nonfinancial assets and nonfinancial liabilities, except those that are recognized or disclosed at fair value on a recurring basis (at least annually) to fiscal years beginning after November 15, 2008, and interim periods within those fiscal years. The impact of adoption was not material.

In February 2007, the FASB issued Statement No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities*. The standard provides companies with an option to report selected financial assets and liabilities at fair value and establishes presentation and disclosure requirements designed to facilitate comparisons between companies that choose different measurement attributes for similar types of assets and liabilities. The Corporation did not elect the fair value option for any financial assets or financial liabilities as of January 1, 2008, the effective date of the standard, therefore there was no impact upon adoption.

=====5=====

4. Fair Value

Statement 157 establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Level 1: Quoted prices (unadjusted) or identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.

Level 2: Significant other observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect a reporting entity's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

The fair values of securities available for sale are determined by obtaining quoted prices on nationally recognized securities exchanges (Level 1 inputs) or matrix pricing, which is a mathematical technique widely used to in the industry to value debt securities without relying exclusively on quoted prices for the specific securities but rather by relying on the securities' relationship to other benchmark quoted securities (Level 2 inputs).

Assets and liabilities measured at fair value on a recurring basis are summarized below:

	Fair Value Measurement at March 31, 2008 Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)
	March 31, 2008		
Assets:	-----	-----	-----
Available for sale securities	\$156,839,561	\$ 12,549,863	\$144,289,698
	=====	=====	=====

5.

Business Combination

On March 14, 2008, the Bank completed the acquisition of three branches from Manufacturers and Traders Trust Company ("M&T") in the New York counties of Broome and Tioga. This acquisition was accounted for as a business combination in accordance with Statement of Financial Accounting Standards No. 141 ("SFAS No. 141"). This acquisition represented an expansion of our presence in both Broome and Tioga counties, an opportunity to add to our client base, and provided an additional funding source to support future growth. In this transaction, the Bank acquired approximately \$64.6 million of deposits and \$12.6 million in loans. The results of operation of the acquired branches are included in the Corporation's consolidated financial statements from the date of acquisition. The identified intangible asset from this acquisition is a core deposit intangible of \$1.1 million which is being amortized over 7.25 years. Goodwill resulting from the acquisition was \$7.8 million.

6. Intangible Assets

The following table presents information relative to the Corporation's core deposit intangible ("CDI") related to the acquisition of deposits from the Resolution Trust Company in 1994:

	At March 31, 2008	At December 31, 2007
	-----	-----
Original core deposit intangible	\$ 5,965,794	\$ 5,965,794
Less: Accumulated amortization	5,501,787	5,402,357
	-----	-----

Edgar Filing: CHEMUNG FINANCIAL CORP - Form 10-Q

Carrying amount	\$ 464,007	\$ 563,437
	=====	=====

=====6=====

Amortization expense for the three months ended March 31, 2008 and 2007 related to the CDI was \$99,430. As of March 31, 2008, the remaining amortization period for the Corporation's CDI was approximately 1.17 years. The estimated amortization expense is \$397,719 for the year ending December 31, 2008, with \$165,718 in amortization expense in 2009.

The following table presents information relative to the Corporation's CDI related to the acquisition of three former M&T Bank branch offices on March 14, 2008. The Corporation acquired approximately \$64.6 million of deposits and \$12.6 million in loans:

	At March 31, 2008

Original core deposit intangible	\$ 1,058,667
Less: Accumulated amortization	12,169

Carrying amount	\$ 1,046,498
	=====

Amortization expense for the three months ended March 31, 2008 related to the CDI was \$12,169. As of March 31, 2008, the remaining amortization period was approximately 7.17 years. The estimated amortization expense is \$121,690 for the year ending December 31, 2008 and \$146,023 for the years ending December 31, 2009 through December 31, 2014, with \$60,839 in amortization expense in 2015.

The following table presents information relative to the Corporation's purchase of the trust business of Partners Trust Financial Group, Inc. on May 3, 2007. At that time, the Corporation acquired \$351 million of trust assets under administration at fair value:

At March 31, 2008

Original customer relationship intangible	\$ 5,301,983
Less: Accumulated amortization	549,684

Carrying amount	\$ 4,752,299
	=====

Amortization expense for the three months ended March 31, 2008 related to the customer relationship intangible was \$314,039. As of March 31, 2008, the remaining amortization period was approximately 13.44 years. The estimated amortization expense is \$579,139 for the year ending December 31, 2008 and \$353,466 for the years December 31, 2009 through December 31, 2020, with \$245,608 in amortization expense in 2021.

7. Comprehensive Income

Comprehensive income or loss of the Corporation represents net income plus other comprehensive income or loss, which consists of the net change in unrealized holding gains or losses on securities available for sale and the change in the funded status of the Corporation's defined benefit pension plan and other benefit plans, net of the related tax effect. Accumulated other comprehensive income or loss represents the net unrealized holding gains or losses on securities available for sale and the funded status of the Corporation's defined benefit pension plan and other benefit plans, as of the consolidated balance sheet dates, net of the related tax effect.

Comprehensive income for the three-month periods ended March 31, 2008 and 2007 was \$2,362,162 and \$1,844,029, respectively.

=====7=====

The following summarizes the components of other comprehensive income:

Other Comprehensive Income	Three Months Ended March 31,	
	2008	2007
	-----	-----
Change in unrealized holding gains on securities available for sale	\$ 942,178	\$ 207,182

Edgar Filing: CHEMUNG FINANCIAL CORP - Form 10-Q

Reclassification adjustment net gains realized in net income	(586,556)	-
	-----	-----
Net unrealized gains	355,622	207,182
Tax effect	(137,576)	(80,698)
	-----	-----

Change in funded status of defined benefit pension plan and other benefit plans	2,913	28,425
Tax effect	(1,127)	(11,071)
	-----	-----
Net of tax amount	1,786	17,354
	-----	-----
Total other comprehensive income	\$ 219,832	\$ 143,838
	=====	=====

8. Commitments and Contingencies

In the normal course of operations, the Corporation engages in a variety of financial transactions that, in accordance with accounting principles generally accepted in the United States of America, are not recorded in the financial statements. The Corporation is also a party to certain financial instruments with off-balance sheet risk such as commitments under standby letters of credit, unused portions of lines of credit and commitments to fund new loans. The Corporation's policy is to record such instruments when funded. These transactions involve, to varying degrees, elements of credit, interest rate and liquidity risk. Such transactions are generally used by the Corporation to manage clients' requests for funding and other client needs.

9. Securities

Amortized cost and estimated fair value of securities available for sale are as follows:

March 31, 2008

December 31, 2007

Edgar Filing: CHEMUNG FINANCIAL CORP - Form 10-Q

	Amortized Cost	Estimated Fair Value	Amortized Cost	Estimated Fair Value
	-----	-----	-----	-----
Obligations of U.S. Government and U.S. Government sponsored enterprises	\$ 74,948,582	\$ 75,916,950	\$ 81,752,335	\$ 81,943,717

10. Loans and Allowance for Loan Losses

The composition of the loan portfolio is summarized as follows:

	March 31, 2008	December 31, 2007
	-----	-----
Residential mortgages	\$ 160,104,165	\$ 159,626,837
Commercial mortgages	72,169,744	70,631,809
Commercial, financial and agricultural	134,456,236	131,071,275
Indirect consumer loans	90,787,977	90,737,964
Consumer loans	99,137,423	87,454,605
	-----	-----
	\$ 556,655,545	\$ 539,522,490
	=====	=====

The following table summarizes the Corporation's non-performing assets:

March 31, 2008 December 31, 2007

Edgar Filing: CHEMUNG FINANCIAL CORP - Form 10-Q

Non-accrual loans	\$ 2,312,086	\$ 2,224,622
Troubled debt restructurings	809,178	830,258
Accruing loans past due 90 days or more	484,422	517,967
Total non-performing loans	\$ 3,605,686	\$ 3,572,847
Other real estate owned	117,320	-
Total non-performing assets	\$ 3,723,006	\$ 3,572,847

Activity in the allowance for loan losses was as follows:

	Three Months Ended March 31,	
	2008	2007
Balance at beginning of period	\$ 8,452,819	\$ 7,983,256
Provision charged to operations	200,000	125,000
Loans charged-off	(364,859)	(237,844)
Recoveries	154,176	239,879
Balance at end of period	\$ 8,442,136	\$ 8,110,291

At March 31, 2008 and December 31, 2007, the recorded investment in loans that are considered to be impaired totaled \$2,659,345 and \$2,634,969, respectively. Included in the March 31, 2008 amount are impaired loans of \$872,704 for which an impairment allowance has been recognized. The related impairment allowance was \$430,378. The December 31, 2007 amount includes \$789,791 of impaired loans with a related impairment allowance of \$340,807.

11. Components of Quarterly Net Periodic Benefit Cost

	Three Months Ended March 31,	
	2008	2007
	----	----
Qualified Pension

Net periodic postretirement, medical and life expense	\$ -	\$ -

=====

12. Segment Reporting

The Corporation manages its operations through two primary business segments: core banking and trust and investment advisory services. The core banking segment provides revenues by attracting deposits from the general public and using such funds to originate consumer, commercial, commercial real estate, and residential mortgage loans, primarily in the Corporation's local markets and to invest in securities. The trust and investment advisory services segment provides revenues by providing trust and investment advisory services to clients.

Summarized financial information concerning the Corporation's reportable segments and the reconciliation to the Corporation's consolidated results is shown in the following table. Income taxes are allocated based on the separate taxable income of each entity and indirect overhead expenses are allocated based on reasonable and equitable allocations applicable to the reportable segment. Holding company amounts are the primary differences between segment amounts and consolidated totals, and are reflected in the Holding Company and Other column below, along with amounts to eliminate transactions between segments. (dollars in thousands)

Item 2: Management's Discussion and Analysis of Financial Condition and Results of Operations

The review that follows focuses on the significant factors affecting the financial condition and results of operations of the Corporation during the three-month period ended March 31, 2008, with comparisons to the comparable period in 2007, as applicable. The following discussion and the unaudited consolidated interim financial statements and related notes included in this report, should be read in conjunction with our 2007 Annual Report on Form 10-K, which was filed with the Securities and Exchange Commission on March 13, 2008. The results for the periods presented are not necessarily indicative of results to be expected for the entire fiscal year or any other interim period.

Forward-looking Statements

This discussion contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. The Corporation intends its forward-looking statements to be covered by the safe harbor provisions for forward-looking statements in these sections. All statements regarding the Corporation's expected financial position and operating results, the Corporation's business strategy, the Corporation's financial plans, forecasted demographic and economic trends relating to the Corporation's industry and similar matters are forward-looking statements. These statements can sometimes be identified by the Corporation's use of forward-looking words such as "may," "will," "anticipate," "estimate," "expect," or "intend." The Corporation cannot promise that its expectations in such forward-looking statements will turn out to be correct. The Corporation's actual results could be materially different from expectations because of various factors, including changes in economic conditions or interest rates, credit risk, difficulties in managing our growth, competition, changes in the regulatory environment, and changes in general business and economic trends.

Critical Accounting Policies, Estimates and Risks and Uncertainties

Critical accounting policies include the areas where the Corporation has made what it considers to be particularly difficult, subjective or complex judgments in making estimates, and where these estimates can significantly affect the Corporation's financial results under different assumptions and conditions. The Corporation prepares its financial statements in conformity with accounting principles generally accepted in the United States of America. As a result, the Corporation is required to make certain estimates, judgments and assumptions that it believes are reasonable based upon the information available. These estimates, judgments and assumptions affect the reported amounts of assets and liabilities at the date of the financial statement and the reported amounts of revenue and expenses during the periods presented. Actual results could be different from these estimates.

Management considers the accounting policy relating to the allowance for loan losses to be a critical accounting policy given the inherent uncertainty in evaluating the level of the allowance required to cover probable credit losses inherent in the loan portfolio, and the material effect that such judgments can have on the Corporation's

===== 1 | =====

results of operations. While management's current evaluation of the allowance for loan losses indicates that the allowance is adequate, under adversely different conditions or assumptions, the allowance would need to be increased. For example, if historical loan loss experience significantly worsened or if current economic conditions significantly deteriorated, additional provisions for loan losses would be required to increase the allowance. In addition, the assumptions and estimates used in the internal reviews of the Corporation's non-performing loans and potential problem loans, and the associated evaluation of the related collateral coverage for these loans, has a significant impact

on the overall analysis of the adequacy of the allowance for loan losses. While management has concluded that the current evaluation of collateral values is reasonable under the circumstances, if collateral evaluations were significantly lowered, the Corporation's allowance for loan losses policy would also require additional provisions for loan losses.

Financial Condition

Consolidated assets at March 31, 2008 totaled \$831.4 million, an increase of \$42.5 million or 5.4% since December 31, 2007. As discussed in greater detail below, this increase was due in large part to the Corporation's acquisition of three branch offices from Manufacturers and Traders Trust Company ("M&T") on March 14, 2008. At that time, the Corporation acquired approximately \$64.6 million of deposits as well as approximately \$12.6 million of loans. The increase in period-end assets is reflected primarily in a \$24.5 million increase in federal funds sold and interest-bearing deposits, a \$17.1 million increase in loans, net of deferred fees and costs and unearned income, and an \$8.4 million increase in goodwill and other intangible assets, net, offset principally by an \$8.2 million decrease in investment securities and a \$2.8 million decrease in Federal Home Loan Bank and Federal Reserve Bank stock.

As noted above, total loans, net of deferred fees and costs and unearned income increased \$17.1 million or 3.2% from December 31, 2007 to March 31, 2008. The most significant growth was in consumer loans, which in total increased \$11.7 million, primarily due to an \$8.6 million increase in home equity balances outstanding and a \$2.1 million increase in student loans. The increase in home equity loans resulted from the M&T branch acquisition, while the student loan increase reflects seasonal borrowing. Additionally, consumer installment loans increased \$1.1 million, again due in large part to the M&T branch acquisition. Total commercial loans (including commercial mortgages) and residential mortgages increased \$4.9 million and \$477 thousand, respectively, with approximately \$1.6 million of the commercial loan growth related to the M&T branch acquisition.

The composition of the loan portfolio is summarized as follows:

	March 31, 2008	December 31, 2007
	-----	-----
Residential mortgages	\$160,104,165	\$159,626,837
Commercial mortgages	72,169,744	70,631,809
Commercial, financial and agricultural	134,456,236	131,071,275
Indirect Consumer loans	90,787,977	90,737,964
Consumer loans	99,137,423	87,454,605
	-----	-----
	\$556,655,545	\$539,522,490
	=====	=====

The available for sale segment of the securities portfolio totaled \$156.8 million at March 31, 2008, down approximately \$8.5 million or 5.1% from December 31, 2007. At amortized cost, the available for sale portfolio was down approximately \$8.8 million, with unrealized appreciation related to the available for sale portfolio increasing

\$356 thousand. During the quarter, \$31.8 million of federal agency bonds were called, replaced with federal agency purchases totaling \$25.0 million. Other significant activity during the quarter included mortgage-backed securities paydowns totaling \$3.4 million, and the purchase of a Trust Preferred Pool in the amount of \$2.2 million. The held to maturity portion of the portfolio, consisting of local municipal obligations, increased approximately \$258 thousand from \$4.5 million at December 31, 2007 to \$4.7 million at March 31, 2008.

The \$7.8 million increase in goodwill along with a \$633 thousand increase in other intangible assets, net, reflects the Corporation's acquisition on March 14, 2008 of the M&T branch offices. The identified intangible asset from this acquisition is a core deposit intangible of approximately \$1.1 million which is being amortized over 7.25 years. Goodwill resulting from the acquisition totaled \$7.8 million. During the quarter, the Corporation recognized \$226 thousand in accelerated amortization of

=====12=====

the purchased relationship intangible associated with the purchase of the trust relationships from Partners Trust in May of 2007, as a large account was closed during the first quarter of 2008.

A \$2.8 million decrease in Federal Home Loan Bank and Federal Reserve Bank stock is due primarily to a decrease in the Corporation's ownership of Federal Home Loan Bank of New York ("FHLB") stock, which is reflective of a decrease in FHLB borrowings since the end of 2007, as excess funds from a significant increase in deposits were used to payoff overnight borrowings with the FHLB, which resulted in a \$62.4 million decrease in these borrowings since December 31, 2007, as well as the \$24.5 million increase in federal funds sold and interest-bearing deposits.

Since December 31, 2007, total deposits have increased \$102.6 million or 17.9% from \$572.6 million to \$675.2 million, with \$64.6 million of this increase associated with the M&T branch acquisition and \$24.5 million due to higher public fund balances, with all other deposits increasing \$13.4 million. Non-interest bearing demand deposits increased \$8.2 million, including newly acquired demand deposits totaling \$10.2 million. A \$94.4 million increase in interest bearing balances was reflected primarily in a \$53.9 million increase in time deposits and a \$24.5 million increase in insured money market balances, as well as increases in NOW and savings balances totaling \$9.3 million and \$6.7 million, respectively. The increase in time deposits includes a \$13.0 million increase in public fund balances and \$30.6 million of time deposits acquired from M&T, with the increase in insured money market accounts due in large part to a \$14.9 million increase resulting from the M&T acquisition and a \$6.1 million increase in public fund balances. The increase in NOW account balances was due primarily to a \$4.2 million increase in public fund balances, and \$3.5 million of newly acquired deposits, while the savings increase includes \$5.5 million of newly acquired deposits.

Asset Quality

Non-performing loans at March 31, 2008 totaled \$3.606 million as compared to \$3.573 million at December 31, 2007, an increase of \$33 thousand. This increase resulted from an \$87 thousand increase in non-accrual loans, offset by decreases in accruing loans 90 days or more past due and troubled debt restructurings totaling \$33 thousand and \$21 thousand, respectively. During the first quarter of this year, commercial relationships totaling \$269 thousand at March 31, 2008 were placed in non-accrual status, and the outstanding balance of one commercial relationship increased \$18 thousand. These increases in non-accruing commercial loans were offset to some extent by a \$168 thousand reduction related to the partial charge-off (\$76 thousand) of one commercial relationship, with the balance transferred to Other Real Estate Owned (\$92 thousand), as well as other principal reductions totaling \$73 thousand. Additionally, since

Edgar Filing: CHEMUNG FINANCIAL CORP - Form 10-Q

December 31, 2007, an \$89 thousand increase in non-accruing consumer loans was partially offset by a \$46 thousand decrease in non-accruing home equity loans. The increase in Other Real Estate Owned of \$117 thousand reflects the addition of the above mentioned commercial property and one residential property during the quarter.

The following table summarizes the Corporation's non-performing assets:

(dollars in thousands)	March 31, 2008	December 31, 2007
	-----	-----
Non-accrual loans	\$ 2,312	\$ 2,225
Troubled debt restructurings	809	830
Accruing loans past due 90 days or more	485	518
	-----	-----
Total non-performing loans	\$ 3,606	\$ 3,573
Other real estate owned	117	-
	-----	-----
Total non-performing assets	\$ 3,723	\$ 3,573
	=====	=====

In addition to non-performing loans, as of March 31, 2008, the Corporation has identified 14 commercial loan relationships totaling \$10.8 million in potential problem loans, as compared to \$11.1 million (14 commercial loan relationships) at December 31, 2007. Potential problem loans are loans that are currently performing, but where known information about possible credit problems of the related borrowers

=====13=====

causes management to have serious doubts as to the ability of such borrowers to comply with the present loan repayment terms, and which may result in the disclosure of such loans as non-performing at some time in the future. At the Corporation, potential problem loans are typically loans that are performing but are classified in the Corporation's loan rating system as "substandard". Management cannot predict the extent to which any factors may impact borrowers and the potential problem loans. Accordingly, there can be no assurance that other loans will not become 90 days or more past due, be placed on non-accrual, become restructured, or require increased allowance coverage and provisions for loan losses.

Management's evaluation of the adequacy of the allowance for loan losses is performed on a periodic basis and takes into consideration such factors as the historical loan loss experience, review of specific problem loans (including evaluation of the underlying collateral), changes in the composition and volume of the loan portfolio, recent

charge-off experience, overall portfolio quality, and current economic conditions that may affect the borrowers' ability to pay. Based upon an analysis of these factors, including the increase in net charge-offs as discussed below, the Corporation expensed \$200 thousand to the provision for loan losses during the first quarter of 2008, an increase of \$75 thousand over what had been expensed in the related prior period. At March 31, 2008, the Corporation's allowance for loan losses totaled \$8.442 million, resulting in a coverage ratio of allowance to non-performing loans of 234.1%. The allowance for loan losses is an amount that management believes will be adequate to absorb probable loan losses on existing loans. Net loan charge-offs for the first quarter of 2008 totaled \$211 thousand compared to net recoveries during the first quarter of last year of \$2 thousand. This increase was principally due to a \$169 thousand increase in net consumer loan charge-offs, as well as a \$44 thousand decrease in net recoveries on commercial loans, as during the first quarter of 2007, payments of \$162 thousand were received related to a commercial mortgage that had been charged-off in 2006. The allowance for loan losses to total loans at March 31, 2008 was 1.52% as compared to 1.57% as of December 31, 2007.

Activity in the allowance for loan losses was as follows:

(dollars in thousands)	Three Months Ended March 31,

	=====	=====

Results of Operations

First Quarter of 2008 vs. First Quarter of 2007

Net income for the first quarter of 2008 totaled \$2.142 million, an increase of \$442 thousand or 26.0% as compared to first quarter 2007 net income of \$1.700 million.

=====14=====

Earnings per share increased 27.7% from \$0.47 per share to \$0.60 per share on 11,558 fewer average shares outstanding. This improvement in first quarter net income resulted in part from an initial public offering ("IPO") of Visa, Inc. ("Visa") common stock. As a Visa member institution, the Corporation was issued shares of Visa stock prior to the IPO, approximately 39% of which were redeemed by Visa following the IPO, resulting in a net pre-tax gain of \$411 thousand. Additionally, the positive first quarter results reflect higher net interest income and other non-interest income, somewhat offset by higher operating expenses, an increase in the provision for loan losses and a higher effective tax rate.

Net interest income increased \$916 thousand or 15.0% from \$6.119 million during the first quarter of 2007 to \$7.035 million during the first quarter of 2008, with the net interest margin increasing 33 basis points to 3.99%. This improvement in net interest income and margin resulted principally from an increase in average loans, a 7 basis point increase in the yield on average earning assets and a 38 basis point decrease in the average cost of interest-bearing liabilities. A \$30.6 million or 4.5% increase in average earning assets was due to a \$56.2 million or 11.5% increase in average loans and a \$3.3 million increase in average federal funds sold and interest-bearing deposits, offset by a \$28.9 million or 15.4% decrease in the average securities portfolio. The increase in average loans is reflective of growth in all segments of the loan portfolio, with average consumer loans increasing \$27.0 million, average mortgages increasing \$23.7 million and average commercial loans increasing \$5.5 million. With the significant growth in loans since the first quarter of 2007, principal reductions in the securities portfolio have been reinvested in these higher yielding loans, a significant factor in the decrease in the average securities portfolio. The growth in average earning assets, coupled with the increase in average yield, resulted in a \$679 thousand or 6.5% increase in total interest income from \$10.394 million in the first quarter of 2007 to \$11.073 million in the first quarter of this year.

Total average funding liabilities, including non-interest bearing demand deposits, increased \$31.9 million or 4.9% compared to first quarter 2007 averages, due primarily to a \$25.1 million increase in average deposits and a \$6.8 million increase in other borrowed funds. Approximately \$12.9 million of the increase in average deposits was related to the M&T branch acquisition. In total, average non-interest bearing deposits increased \$2.7 million, while average interest-bearing deposits increased \$22.4 million. The increase in average interest-bearing deposits was reflected primarily in higher average insured money market and time deposits of \$12.0 million and \$9.8 million, respectively. The increase in average other borrowings was impacted by funding requirements to support the aforementioned increase in average loans. While average interest-bearing liabilities increased \$29.2 million or 5.7%, interest expense decreased \$237 thousand or 5.5%, as with the decline in interest rates since the first quarter of 2007, the average cost of interest bearing liabilities decreased 38 basis points from 3.40% to 3.02%.

As discussed more fully under the Asset Quality section of this report, a \$75 thousand increase in the provision for loan losses reflects management's evaluation of the adequacy of the allowance for loan losses based upon a number of factors, including an analysis of historical loss factors, the evaluation of collateral, recent charge-off experience, overall credit quality and loan growth.

Non-interest income during the first quarter of 2008 compared to the first quarter of 2007 increased \$924 thousand or 24.3%. In addition to the increase related to the above mentioned Visa IPO, this increase was impacted to a great extent by increases in Trust and Investment Center fee income and service charges on deposit accounts totaling \$594 thousand and \$158 thousand, respectively. The increase in Trust and Investment Center fee income was principally due to higher fee income associated with the Corporation's acquisition in May of 2007 of the trust department relationships of Partners Trust, while the increase in service charges is primarily due to higher fee income related to checks presented against insufficient funds. Other significant non-interest income increases included a \$57 thousand increase in revenue from the Corporation's equity investment in Cephass Capital Partners, LP ("Cephass"), and a \$42 thousand increase in check card interchange fee income. The above increases were somewhat offset primarily by a \$464 thousand decrease in gains on the sale of Other Real Estate Owned ("OREO"), as during the first quarter of 2007 the Corporation recognized a \$464 thousand gain on the sale of a commercial property that had previously been foreclosed upon.

First quarter 2008 operating expenses were \$980 thousand or 13.3% higher than the comparable period last year, due in large part to expenses associated with the

=====15=====

Corporation's acquisition of the trust relationships of Partners Trust in May of 2007, and the M&T branch acquisition on March 14, 2008. Costs associated with these acquisitions represent approximately \$790 thousand of the operating expense increase and are reflected to a great extent in the increases in salaries and wages, net occupancy expenses, data processing and amortization of intangible assets. Of the \$223 thousand increase in salaries and wages, approximately \$161 thousand is related to acquisitions, with the balance primarily reflecting merit increases effective in January of 2008. The increase in pension and other benefits of \$52 thousand is due principally to higher employee health insurance costs. A \$231 thousand increase in net occupancy expenses includes approximately \$79 thousand of increased expenses related to acquisitions, as well as increases in other rent and building maintenance costs. A \$326 thousand increase in amortization of intangible assets resulted primarily from a \$314 thousand increase in amortization of the intangible related to the purchase of the trust relationships of Partners Trust, including \$226 thousand in accelerated amortization associated with the closing of a large account during the first quarter of this year, as well as \$12 thousand of amortization of the core deposit intangible associated with the M&T branch acquisition. Data processing expenses increased approximately \$138 thousand, with approximately \$55 thousand of this increase

associated with acquisitions, with the balance reflecting higher trust processing costs, as well as increased hardware and software maintenance costs.

A \$343 thousand increase in income tax expense and the increase in the effective tax rate from 29.8% in the first quarter of 2007 to 33.2% in the first quarter of this year resulted principally from an increase in pre-tax income as well as a decrease in the relative percentage of tax-exempt income to pre-tax income.

=====16=====

Average Consolidated Balance Sheet and Interest Analysis

For the purpose of these computations, non-accruing loans are included in the daily average loan amounts outstanding. Daily balances were used for average balance computations. Investment securities are stated at amortized cost. No tax equivalent adjustments have been made in calculating yields on obligations of states and political subdivisions.

1. The change in interest due to both rate and volume has been allocated to volume and rate changes in proportion to the relationship of the absolute dollar amounts of the change in each.

Liquidity and Capital Resources

Liquidity management involves the ability to meet the cash flow requirements of deposit customers, borrowers, and the operating, investing, and financing activities of the Corporation. The Corporation uses a variety of resources to meet its liquidity needs. These include short term investments, cash flow from lending and investing activities, core deposit growth and non-core funding sources, such as time deposits of \$100,000 or more, securities sold under agreements to repurchase and other borrowings.

The Corporation is a member of the Federal Home Loan Bank of New York ("FHLB") which allows it to access borrowings which enhance management's ability to satisfy future liquidity needs. At March 31, 2008, the Corporation maintained a \$149.4 million line of credit with the FHLB, as compared to \$144.4 million at March 31, 2007.

During the first three months of 2008, cash and cash equivalents increased \$27.5 million as compared to an increase of \$2.6 million during the first three months of last year. In addition to cash provided by operating activities, a major source of cash was the net cash received in the M&T branch acquisition totaling \$43.6 million. The major factors netting to this included cash received for the deposits assumed totaling \$64.6 million, which was offset primarily by the purchase of \$12.6 million of loans, the payment of an \$8.4 million premium for the deposits acquired, and the purchase of fixed assets totaling \$120 thousand. Other primary sources of cash during the first three months of 2008 included proceeds from maturities and principal payments on securities totaling \$37.0 million, a \$37.6 million increase in other deposits and \$2.8 million in net redemptions of FHLB and Federal Reserve Bank stock. Proceeds from the above were used primarily to fund a \$58.3 million net reduction of FHLB advances and other borrowed funds, purchases of securities totaling \$27.9 million, a \$2.9 million net increase in loans, payment of cash dividends

totaling \$880 thousand, and the purchase of fixed assets and treasury shares totaling \$582 thousand and \$136 thousand, respectively.

In addition to cash provided by operating activities, other primary sources of cash during the first three months of 2007 included a \$16.9 million increase in deposits, \$7.5 million from maturities and other principal payments on securities, a \$3.0 million increase in securities sold under agreements to repurchase and proceeds from the sale of other real estate owned totaling \$1.5 million. Proceeds from the above were used primarily to fund a \$16.6 million net increase in loans, a \$7.9 million reduction in advances from the FHLB, payment of cash dividends totaling \$849 thousand, purchases of fixed assets in the amount of \$462 thousand, and purchases of securities and treasury stock totaling \$310 thousand and \$311 thousand, respectively.

=====18=====

As of March 31, 2008, the Corporation's consolidated leverage ratio was 9.13%. The Tier I and Total Risk Adjusted Capital ratios were 12.13% and 13.95%, respectively. All of the above ratios are in excess of the requirements for being considered "well capitalized" by the FDIC, the Federal Reserve and the New York State Banking Department.

During the first quarter the Corporation declared a cash dividend of \$0.25 per share compared with \$0.24 per share declared during the first quarter of 2007, an increase of 4.2%.

When shares of the Corporation become available in the market, we may purchase them after careful consideration of our capital position. On November 15, 2006, the Corporation's Board of Directors authorized the repurchase of up to 180,000 shares, or approximately 5% of its then outstanding common shares, either through open market purchases or privately negotiated transactions over a two-year period. During the first three months of 2008, the Corporation purchased 4,813 shares at an average price of \$28.26 per share. As of March 31, 2008, a total of 56,938 shares had been purchased since the inception of the announced repurchase program. Additionally, during the first quarter of 2008, 9,548 shares were re-issued from treasury to fund the stock component of directors' 2007 compensation, as well as the stock component of an executive officer's 2007 bonus.

Interest Rate Risk

As intermediaries between borrowers and savers, commercial banks incur both interest rate risk and liquidity risk. The Corporation's Asset/Liability Committee ("ALCO") has the strategic responsibility for setting the policy guidelines on acceptable exposure to these areas. These guidelines contain specific measures and limits regarding these risks, which are monitored on a regular basis. The ALCO is made up of the president and chief executive officer, two executive vice presidents, chief financial officer, asset liability management officer, senior marketing officer, and others representing key functions.

The ALCO is also responsible for supervising the preparation and annual revisions of the financial segments of the annual budget, which is built upon the committee's economic and interest-rate assumptions. It is the responsibility of the ALCO to modify prudently the Corporation's asset/liability policies.

Interest rate risk is the risk that net interest income will fluctuate as a result of a change in interest rates. It is the assumption of interest rate risk, along with credit risk, that drives the net interest margin of a financial institution. For that reason, the ALCO has established tolerance limits based upon a 200-basis point change in interest rates. At March 31, 2008, it is estimated that an immediate 200-basis point decrease in interest rates would negatively impact the next 12 months net interest income by 5.75% and an immediate 200-basis point increase would negatively impact the next 12 months net interest income by 1.41%. Both are within the Corporation's policy guideline of 15% established by ALCO.

A related component of interest rate risk is the expectation that the market value of our capital account will fluctuate with changes in interest rates. This component is a direct corollary to the earnings-impact component: an institution exposed to earnings erosion is also exposed to shrinkage in market value. At March 31, 2008, it is estimated that an immediate 200-basis point decrease in interest rates would negatively impact the market value of our capital account by 10.12% and an immediate 200-basis point increase in interest rates would negatively impact the market value by 4.40%. Both are within the established tolerance limit of 15%.

Management does recognize the need for certain hedging strategies during periods of anticipated higher fluctuations in interest rates and the Board-approved Funds Management Policy provides for limited use of certain derivatives in asset liability management. These strategies were not employed during the first nine months of 2007.

Item 3: Quantitative and Qualitative Disclosures About Market Risk

Information required by this Item is set forth herein in Management's Discussion and Analysis of Financial Condition and Results of Operations under the heading "Interest Rate Risk."

=====19=====

Item 4: Controls and Procedures

The Corporation's management, under the supervision and with the participation of our President and Chief Executive Officer, who is the Corporation's principal executive officer, and our Treasurer and Chief Financial Officer, who is the Corporation's principal financial officer, has evaluated the effectiveness of the Corporation's disclosure controls and procedures as of March 31, 2008. Based upon that evaluation, the President and Chief Executive Officer and the Treasurer and Chief Financial Officer have concluded that the Corporation's disclosure controls and procedures are effective as of March 31, 2008.

There were no significant changes in the Corporation's internal control over financial reporting that occurred during the Corporation's most recent fiscal quarter that have materially affected, or that are reasonably likely to materially affect, the Corporation's internal control over financial reporting.

OTHER INFORMATION

PART II.

Item 1A. Risk Factors

There have been no material changes in the risk factors set forth in the Corporation's Annual Report on Form 10-K for the year ended December 31, 2007.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(c) Issuer Purchases of Equity Securities

Period	Total number of shares purchased	Average price paid per share	Total number of shares purchased as part of publicly announced plans or programs	Maximum number of shares that may yet be purchased under the plans or programs
1/1/08-1/31/08	2,613	\$29.45	2,613	125,262
2/1/08-2/29/08	2,200	\$26.85	2,200	123,062
3/1/08-3/31/08	-	\$ -	-	123,062
Quarter ended 3/31/08	4,813 =====	\$28.26 =====	4,813 =====	123,062 =====

All of the above transactions were privately negotiated transactions.

On November 16, 2006, the Corporation announced that its Board of Directors had authorized the repurchase of up to 180,000 shares, or approximately 5% of the Corporation's then outstanding common stock over a two year period, expiring November 15, 2008. Purchases will be made from time to time on the open-market or in private negotiated transactions, and will be at the discretion of management.

Item 6. Exhibits

The Corporation files herewith the following exhibits:

31.1 Certification of President and Chief Executive Officer of the Registrant pursuant to Rule 13a-14(a) under the Securities Exchange Act of 1934.

31.2 Certification of Treasurer and Chief Financial Officer of the Registrant pursuant to Rule 13a-14(a) under the Securities Exchange Act of 1934.

32.1 Certification of President and Chief Executive Officer of the Registrant pursuant to Rule 13a-14(b) under the Securities Exchange Act of 1934 and 19 U.S.C. 1350.

32.2 Certification of Treasurer and Chief Financial Officer of the Registrant pursuant to Rule 13a-14(b) under the Securities Exchange Act of 1934 and 19 U.S.C. 1350.
