Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Item 2.02.

Results of Operations and Financial Condition.

On November 11, 2015, Macy's, Inc. ("Macy's") issued a press release announcing Macy's sales, financial condition and results of operations for the 13 and 39 weeks ended October 31, 2015. The full text of the press release is attached hereto as Exhibit 99.1 and is incorporated herein by reference.

The press release referred to above contains certain non-GAAP financial measures of diluted earnings per share attributable to Macy's, Inc. shareholders, operating income and operating income as a percent of sales, excluding certain items, and changes in comparable sales on an owned plus licensed basis. The excluded items include asset impairment charges primarily associated with the anticipated store closings announced in 2015. Management believes that diluted earnings per share attributable to Macy's, Inc. shareholders, operating income and operating income as a percent of sales excluding certain items are useful measures in evaluating Macy's ability to generate earnings from operations and that providing such measures will allow investors to more readily compare the earnings referred to in the press release to the earnings reported by Macy's in past and future periods. Management believes that excluding certain items from these calculations is particularly useful where the amounts of such items are not consistent in the periods presented. Macy's licenses third parties to operate certain departments in its stores and online and receives commissions from these third parties based on a percentage of their net sales. In its financial statements prepared in conformity with GAAP, Macy's includes these commissions (rather than sales of the departments licensed to third parties) in its net sales. Macy's does not, however, include any amounts in respect of licensed department sales (or any commissions earned on such sales) in its comparable sales calculation on an owned basis. Management believes that the amounts of commissions earned on sales of departments licensed to third parties are not material to its results of operations for the periods presented. Management believes that providing changes in comparable sales on an owned plus licensed basis is a useful measure to assist investors in evaluating Macy's ability to generate sales growth, whether through owned businesses or departments licensed to third parties, on a comparable basis. Management believes that providing changes in comparable sales on an owned plus licensed basis is particularly useful in evaluating the impact of changes in the manner in which certain departments are operated. However, the reader is cautioned that any non-GAAP financial measures provided by Macy's are provided in addition to, and not as alternatives for, Macy's reported results prepared in accordance with GAAP. Certain items that may have a significant impact on Macy's financial position, results of operations and cash flows must be considered when assessing Macy's actual financial condition and performance regardless of whether these items are included in these non-GAAP financial measures. In addition, you should note that the amounts received by Macy's on account of sales of departments licensed to third parties are limited to commissions received on such sales. The methods used by Macy's to calculate its non-GAAP financial measures may differ significantly from methods used by other companies to compute similar measures. As a result, any non-GAAP financial measures provided by Macy's may not be comparable to similar measures provided by other companies.
