Section 8 – Other Events

Item 8.01. Other Events

On January 25, 2012, Occidental Petroleum Corporation announced net income of \$1.6 billion (\$2.01 per diluted share) for the fourth quarter of 2011, compared with the \$1.2 billion (\$1.49 per diluted share) for the fourth quarter of 2010. Core income was \$1.6 billion (\$2.02 per diluted share) for the fourth quarter of 2011, compared with \$1.3 billion (\$1.58 per diluted share) for the fourth quarter of 2010.

Net income for the twelve months of 2011 was \$6.8 billion (\$8.32 per diluted share), compared with \$4.5 billion (\$5.56 per diluted share) for the same period in 2010. Core income for the year 2011 exceeded \$6.8 billion (\$8.39 per diluted share), compared with \$4.7 billion (\$5.72 per diluted share) for the same period in 2010.

QUARTERLY RESULTS

Oil and Gas

Oil and gas segment earnings were \$2.5 billion for the fourth quarter of 2011, compared with \$1.7 billion for the fourth quarter of 2010. After excluding 2010 domestic asset impairments, the fourth quarter of 2010 core segment earnings were \$1.9 billion. The increase in the fourth quarter of 2011 earnings was due to higher liquids volumes and prices, partially offset by higher operating costs and DD&A rates.

For the fourth quarter of 2011, daily oil and gas production volumes averaged 748,000 barrels of oil equivalent (BOE), compared with 714,000 BOE in the fourth quarter of 2010. As a result of higher year-over-year average oil prices and other factors affecting production sharing and similar contracts, production was reduced in the Middle East/North Africa and Colombia by 17,000 BOE per day.

The fourth quarter 2011 production volume increase was a result of 61,000 BOE per day higher domestic volumes, partially offset by lower volumes in the Middle East/North Africa and Colombia. The domestic increase was from South Texas, the Williston Basin and California. The Middle East/North

Africa was lower due to the decline of production in Libya and the effect of price and other factors on production sharing contracts.

Daily sales volumes increased from 699,000 BOE per day in the fourth quarter of 2010 to 749,000 BOE per day in the fourth quarter of 2011.

Oxy's realized price for worldwide crude oil was \$99.62 per barrel for the fourth quarter of 2011, compared with \$79.96 per barrel for the fourth quarter of 2010. The fourth quarter of 2011 realized oil price represents 106 percent of the average WTI and 91 percent of the average Brent price for the quarter. Worldwide NGL prices were \$55.25 per barrel in the fourth quarter of 2011, compared with \$49.17 per barrel in the fourth quarter of 2010. Domestic gas prices decreased from \$4.13 per MCF in the fourth quarter of 2010 to \$3.59 per MCF for the fourth quarter of 2011.

Chemicals

Chemical segment earnings for the fourth quarter of 2011 were \$144 million, compared to \$111 million in the fourth quarter of 2010. The improvement in fourth quarter results on a year-over-year basis was primarily due to higher caustic soda pricing, which more than offset higher feedstock costs.

Midstream, Marketing and Other

Midstream segment earnings were \$70 million for the fourth quarter of 2011, compared with \$202 million for the fourth quarter of 2010. The decline in earnings for the fourth quarter of 2011 was primarily due to lower marketing and trading results.

TWELVE-MONTH RESULTS

Oil and Gas

Oil and gas segment earnings were \$10.2 billion for the twelve months of 2011, compared with \$7.2 billion for the same period of 2010. Oil and gas core earnings, after excluding asset impairments, were \$10.3 billion for the twelve months of 2011, compared with \$7.4 billion for the same period of 2010. The \$2.9 billion increase in the 2011 results reflected higher crude oil and NGL prices and sales volumes, partially offset by higher operating costs and DD&A rates.

Oil and gas production volumes for twelve months were 733,000 BOE per day for 2011, compared with 706,000 BOE per day for 2010. Higher year-over-year average oil prices and other factors affecting production sharing and similar contracts lowered the Middle East/North Africa, Colombia and Long Beach production by 18,000 BOE per day.

Domestic volumes increased primarily due to new operations in South Texas, California and the Williston Basin. Middle East/North Africa production declined due to impacts of price and other factors on production sharing contracts and lower production in Libya, partially offset by higher production in Oman's Mukhaizna field and Iraq.

Daily sales volumes were 731,000 BOE in 2011, compared with 701,000 BOE for 2010.

Oxy's realized prices improved for crude oil and NGLs but declined for natural gas on a year-over-year basis. Realizations for crude oil and NGLs rose 30 percent and 23 percent, respectively, and fell 10 percent for natural gas. Worldwide crude oil prices were \$97.92 per barrel for the twelve months of 2011, compared with \$75.16 per barrel for 2010. Worldwide NGL prices were \$55.53 per barrel for the

twelve months of 2011, compared with \$45.08 per barrel in 2010. Domestic gas prices declined from \$4.53 per MCF in 2010 to \$4.06 per MCF in 2011.

Chemicals

Chemical segment earnings were \$861 million for the twelve months of 2011, compared with \$438 million for the same period in 2010. The 2011 results reflect strong export sales and higher margins resulting from higher demand across most products.

Midstream, Marketing and Other

Midstream segment earnings were \$448 million for the twelve months of 2011, compared with \$472 million for the same period in 2010. The 2011 results reflect lower marketing and trading income, partially offset by higher pipeline income.

SIGNIFICANT TRANSACTIONS AND EVENTS AFFECTING EARNINGS

Occidental's results of operations often include the effects of significant transactions and events affecting earnings that vary widely and unpredictably in nature, timing and amount. Therefore, management uses a measure called "core results," which excludes those items. This non-GAAP measure is not meant to disassociate those items from management's performance, but rather is meant to provide useful information to investors interested in comparing Occidental's earnings performance between periods. Reported earnings are considered representative of management's performance over the long term. Core results is not considered to be an alternative to operating income in accordance with generally accepted accounting principles.
