NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(unaudited)

Note 1: Summary of Significant Accounting Policies

Financial Statement Preparation

The unaudited condensed consolidated financial statements as of December 29, 2013, and for the quarters ended December 29, 2013 and December 30, 2012, have been prepared by Starbucks Corporation under the rules and regulations of the Securities and Exchange Commission ("SEC"). In the opinion of management, the financial information for the quarters ended December 29, 2013 and December 30, 2012 reflects all adjustments and accruals, which are of a normal recurring nature, necessary for a fair presentation of the financial position, results of operations and cash flows for the interim periods. In this Quarterly Report on Form 10-Q ("10-Q") Starbucks Corporation is referred to as "Starbucks," the "Company," "we," "us" or "our."

The financial information as of September 29, 2013 is derived from our audited consolidated financial statements and notes for the fiscal year ended September 29, 2013 ("fiscal 2013") included in Item 8 in the Fiscal 2013 Annual Report on Form 10-K (the "10-K"). The information included in this 10-Q should be read in conjunction with the footnotes and management's discussion and analysis of the financial statements in the 10-K.

The results of operations for the quarter ended December 29, 2013 are not necessarily indicative of the results of operations that may be achieved for the entire fiscal year ending September 28, 2014 ("fiscal 2014").

Recent Accounting Pronouncements

In July 2013, the Financial Accounting Standards Board ("FASB") issued guidance on the financial statement presentation of an unrecognized tax benefit when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists. This guidance requires the unrecognized tax benefit to be presented in the financial statements as a reduction to a deferred tax asset. When a deferred tax asset is not available, or the asset is not intended to be used for this purpose, the unrecognized tax benefit should be presented in the financial statements as a liability and not netted with a deferred tax asset. The guidance will become effective for us at the beginning of our first quarter of fiscal 2015. We do not expect the adoption of this guidance will have a material impact on our financial statements.

In March 2013, the FASB issued guidance on a parent's accounting for the cumulative translation adjustment upon derecognition of certain subsidiaries or groups of assets within a foreign entity or of an investment in a foreign entity. This guidance requires a parent to release any related cumulative translation adjustment into net income only if the sale or transfer results in the complete or substantially complete liquidation of the foreign entity in which the subsidiary or group of assets had resided. The guidance will become effective for us at the beginning of our first quarter of fiscal 2015. We do not expect the adoption of this guidance will have a material impact on our financial statements.

In February 2013, the FASB issued guidance that adds additional disclosure requirements for items reclassified out of accumulated other comprehensive income. This guidance requires the disclosure of significant amounts reclassified from each component of accumulated other comprehensive income and the income statement line items affected by the reclassification. The guidance became effective for us at the beginning of our first quarter of fiscal 2014 and the additional disclosures are provided in Note 7 of this 10-Q.

In January 2013, the FASB issued guidance clarifying the scope of disclosure requirements for offsetting assets and liabilities. The amended guidance limits the scope of balance sheet offsetting disclosures to derivatives, repurchase agreements, and securities lending transactions to the extent that they are offset in the financial statements or subject to an enforceable master netting arrangement or similar agreement. The guidance became effective for us at the beginning of our first quarter of fiscal 2014 and did not have a material impact on our financial statements.

Correction of an Immaterial Error

Effective at the beginning of fiscal 2014, we reclassified certain fees related to our US and Seattle's Best Coffee foodservice operations in our Channel Development segment and All Other Segments, respectively, from other operating expenses to foodservice revenues included in CPG, foodservice and other net revenues in our consolidated statements of earnings. This reclassification results from a correction of an error in our prior period financial statements which we have determined to be immaterial. In order to align prior period classifications with the current period presentation, the historical consolidated financial statements have been corrected, resulting in reclassifications of \$25.4 million and \$22.7 million for fiscal years 2013 and 2012, respectively. The reclassification for the first quarter of fiscal 2013 was \$6.4 million. The consolidated statements of earnings as corrected are presented below (in millions):

Note 2: Derivative Financial Instruments

Interest Rates

Depending on market conditions, we enter into interest rate swap agreements to hedge the variability in cash flows due to changes in the benchmark interest rate related to anticipated debt issuances. When these agreements are cash settled at the time of the pricing of the related debt, the resulting net gains or losses are included in accumulated other comprehensive income and subsequently amortized using the constant effective yield method as an adjustment to interest expense over the life of the related debt, as the underlying interest expense is recognized in the consolidated statements of earnings.

Net derivative gains from these cash flow hedges of \$38.8 million and \$41.4 million, net of taxes, were included in accumulated other comprehensive income as of December 29, 2013 and September 29, 2013, respectively. Of the net derivative gains accumulated as of December 29, 2013, \$3.2 million is expected to be reclassified into earnings within 12 months.

Foreign Currency

We enter into forward and swap contracts to hedge portions of cash flows of anticipated revenue streams and inventory purchases in currencies other than the entity's functional currency. Net derivative gains from these cash flow hedges of \$6.8 million and net derivative losses of \$0.3 million, net of taxes, were included in accumulated other comprehensive income as of December 29, 2013 and September 29, 2013, respectively. Of the net derivative gains accumulated as of December 29, 2013, \$4.7 million is expected to be reclassified into earnings within 12 months and will also continue to experience fair value changes before affecting earnings. Outstanding contracts will expire within 33 months.

We also enter into net investment derivative instruments to hedge certain of our equity method investments, to minimize foreign currency exposure. Net derivative losses from net investment hedges of \$6.7 million and \$12.9 million, net of taxes, were included in accumulated other comprehensive income as of December 29, 2013 and September 29, 2013, respectively. Outstanding contracts will expire within 26 months.

In addition to the hedging instruments above, to mitigate the translation risk of certain balance sheet items, we enter into foreign currency swap contracts that are not designated as hedging instruments. These contracts are recorded at fair value, with the changes in fair value recognized in net interest income and other on the consolidated statements of earnings. Gains and losses from these instruments are largely offset by the financial impact of translating foreign currency denominated payables and receivables, which is also recognized in net interest income and other.

Coffee

Depending on market conditions, we enter into futures contracts to hedge a portion of anticipated cash flows under our price-to-be-fixed green coffee contracts, which are described further in Note 4. Net derivative losses of \$3.4 million and \$12.2 million, net of taxes, were included in accumulated other comprehensive income as of December 29, 2013 and September 29, 2013, respectively, related to coffee hedges. Of the net derivative losses accumulated as of December 29, 2013, \$2.7 million is expected to be reclassified into earnings within 12 months and will also continue to experience fair value changes before affecting earnings. Outstanding contracts will expire within 16 months.

Dairy

To mitigate the price uncertainty of a portion of our future purchases of dairy products, we enter into futures contracts that are not designated as hedging instruments. These contracts are recorded at fair value, with the changes in fair value recognized in net interest income and other. Gains and losses from these instruments are largely offset by price fluctuations on our dairy purchases, which are included in cost of sales.

Diesel Fuel

To mitigate the price uncertainty of a portion of our future purchases of diesel fuel, we enter into swap contracts that are not designated as hedging instruments. These contracts are recorded at fair value, with the changes in fair value recognized in net interest income and other. Gains and losses from these instruments are largely offset by the financial impact of diesel fuel fluctuations on our shipping costs, which are included in operating expenses.

Table of Contents

The following table presents the pretax effect of derivative contracts designated as hedging instruments on earnings and other comprehensive income ("OCI") for the quarters ended (in millions):

The fair values of any financial instruments presented above exclude the impact of netting assets and liabilities when a legally enforceable master netting agreement exists.

Short-term and long-term derivative assets are included in prepaid expenses and other current assets and other assets, respectively. Short-term and long-term derivative liabilities are included in other accrued liabilities and other long-term liabilities, respectively.

Gross unrealized holding gains and losses on investments were not material as of December 29, 2013 and September 29, 2013.

Changes in Level 3 Instruments Measured at Fair Value on a Recurring Basis

Financial instruments measured using Level 3 inputs are comprised entirely of our auction rate securities (“ARS”).

Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis

Assets and liabilities recognized or disclosed at fair value in the financial statements on a nonrecurring basis include items such as property, plant and equipment, goodwill and other intangible assets, equity and cost method investments, and other assets. These assets are measured at fair value if determined to be impaired. During the quarters ended December 29, 2013 and December 30, 2012, there were no material fair value adjustments.

The estimated fair value of our long-term debt based on the quoted market price (Level 2) is included at Note 6.

Total	\$943.3	\$1,111.2	\$1,093.2

Other merchandise held for sale includes, among other items, serveware and tea. Inventory levels vary due to seasonality, commodity market supply and price fluctuations.

As of December 29, 2013, we had committed to purchasing green coffee totaling \$519 million under fixed-price contracts and an estimated \$264 million under price-to-be-fixed contracts. As of December 29, 2013, approximately \$1 million of our price-to-be-fixed contracts were effectively fixed through the use of futures contracts.

Price-to-be-fixed contracts are purchase commitments whereby the quality, quantity, delivery period, and other negotiated terms are agreed upon, but the date, and therefore the price, at which the base "C" coffee commodity price component will be fixed has not yet been established. For these types of contracts, either Starbucks or the seller has the option to "fix" the base "C" coffee commodity price prior to the delivery date. Until prices are fixed, we estimate the total cost of these purchase commitments. We believe, based on relationships established with our suppliers in the past, the risk of non-delivery on these purchase commitments is remote.

Note 6: Debt

Long-term Debt

In December 2013, we issued \$400 million of 3-year 0.875% Senior Notes ("the 2014 3-year notes") due December 2016, and \$350 million of 5-year 2.000% Senior Notes ("the 2014 5-year notes") due December 2018, in an underwritten registered public offering. Interest on both of these notes is payable semi-annually on June 5 and December 5 of each year, commencing on June 5, 2014.

As discussed in Note 2, we enter into interest rate swap agreements to hedge the variability in cash flows due to changes in the benchmark interest rate related to anticipated debt issuances. The components of our long-term debt and the associated interest rates, including our effective interest rate, were as follows (in millions, except interest rate amounts):

Issuance	Due Date	Dec 29, 2013		Sep 29, 2013		Stated Interest Rate	Effective Interest Rate

The indentures under which the above notes were issued also require us to maintain compliance with certain covenants, including limits on future liens and sale and leaseback transactions on certain material properties. As of December 29, 2013, we were in compliance with each of these covenants.

Weighted average common and common equivalent shares outstanding (for diluted calculation)	766.2	761.3
EPS — basic	\$0.72	\$0.58
EPS — diluted	\$0.71	\$0.57

Potential dilutive shares consist of the incremental common shares issuable upon the exercise of outstanding stock options (both vested and non-vested) and unvested RSUs, calculated using the treasury stock method. The calculation of dilutive shares outstanding excludes out-of-the-money stock options (i.e., such options' exercise prices were greater than the average market price of our common shares for the period) because their inclusion would have been antidilutive. Out-of-the-money stock options totaled approximately 1.5 million and 0.2 million as of December 29, 2013 and December 30, 2012, respectively.

Legal Proceedings

In the first quarter of fiscal 2011, Starbucks notified Kraft Foods Global, Inc. (now known as Kraft Foods Group, Inc.) (“Kraft”) that we were discontinuing our distribution arrangement with Kraft on March 1, 2011 due to material breaches by Kraft of its obligations under the Supply and License Agreement between the Company and Kraft, dated March 29, 2004 (the “Agreement”), which defined the main distribution arrangement between the parties. Through our arrangement with Kraft, Starbucks sold a selection of Starbucks and Seattle’s Best Coffee branded packaged coffees in grocery and warehouse club stores throughout the US, and to grocery stores in Canada, the UK and other European countries. Kraft managed the distribution, marketing, advertising and promotion of these products.

Kraft denied it had materially breached the Agreement. On November 29, 2010, Starbucks received a notice of arbitration from Kraft putting the commercial dispute between the parties into binding arbitration pursuant to the terms of the Agreement. In addition to denying it materially breached the Agreement, Kraft further alleged that if Starbucks wished to terminate the Agreement it must compensate Kraft as provided in the Agreement in an amount equal to the fair value of the Agreement, with an additional premium of up to 35% under certain circumstances.

On December 6, 2010, Kraft commenced a federal court action against Starbucks, entitled Kraft Foods Global, Inc. v. Starbucks Corporation, in the U.S. District Court for the Southern District of New York (the “District Court”) seeking injunctive relief to prevent Starbucks from terminating the distribution arrangement until the parties' dispute is resolved through the arbitration proceeding. On January 28, 2011, the District Court denied Kraft's request for injunctive relief. Kraft appealed the District Court's decision to the Second Circuit Court of Appeals. On February 25, 2011, the Second Circuit Court of Appeals affirmed the District Court's decision. As a result, Starbucks has been in full control of our packaged coffee business since March 1, 2011.

On April 2, 2012, Starbucks and Kraft exchanged expert reports regarding alleged damages on their affirmative claims. Starbucks claimed damages of up to \$62.9 million from the loss of sales resulting from Kraft's failure to use commercially reasonable efforts to market Starbucks® coffee, plus attorney fees. Kraft's expert opined that the fair market value of the Agreement was \$1.9 billion. After applying a 35% premium and 9% interest, Kraft claimed damages of up to \$2.9 billion, plus attorney fees. The arbitration hearing commenced on July 11, 2012 and was completed on August 3, 2012. Starbucks presented evidence of material breaches on Kraft's part and sought nominal damages from Kraft for those breaches. Kraft presented evidence denying it had breached the parties' Agreement and sought damages of \$2.9 billion plus attorney fees.

We believe we had valid claims of material breach by Kraft under the Agreement that allowed us to terminate the Agreement and certain other relationships with Kraft without compensation to Kraft. Although Kraft disclosed to the press and in federal court filings a \$750 million offer Starbucks made to Kraft in August 2010 to avoid litigation and ensure a smooth transition of the business, the figure was not a proper basis upon which to estimate a possible outcome of the arbitration but was based upon facts and circumstances at the time. Kraft rejected the offer immediately and did not provide a counter-offer, effectively ending the discussions between the parties with regard to any payment. Moreover, the offer was made prior to our investigation of Kraft's breaches and without consideration of Kraft's continuing failure to comply with material terms of the agreements. As a result, prior to receiving the arbitrator's ruling we could not reasonably estimate the possible loss. Accordingly, no loss contingency was recorded for this matter.

On November 12, 2013, the arbitrator ordered Starbucks to pay Kraft \$2,227.5 million in damages plus prejudgment interest and attorneys' fees. We estimated prejudgment interest, which included an accrual through the estimated payment date, and attorneys' fees to be approximately \$556.6 million. As a result, we recorded a litigation charge of \$2,784.1 million in our fiscal 2013 operating results.

In the first quarter of fiscal 2014, Starbucks paid all amounts due to Kraft under the arbitration, including prejudgment interest and attorneys' fees, and fully extinguished the litigation charge liability. Of the \$2,784.1 million litigation charge accrued in the fourth quarter of fiscal 2013, \$2,763.9 million was paid and the remainder was released as a litigation credit to reflect a reduction to our estimated prejudgment interest payable as a result of paying our obligation earlier than anticipated.

Starbucks is party to various other legal proceedings arising in the ordinary course of business, including certain employment litigation cases that have been certified as class or collective actions, but, except as noted above, is not currently a party to any legal proceeding that management believes could have a material adverse effect on our consolidated financial position, results of operations or cash flows.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

CAUTIONARY STATEMENT PURSUANT TO THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995

Certain statements herein, including statements regarding trends in or expectations relating to the expected effects of our initiatives and plans, as well as trends in or expectations regarding earnings per share, revenues, operating income, operating margins, comparable store sales, sales leverage, sales growth, profitability, expenses, dividends, share repurchases, other financial results, capital expenditures, scaling and expansion of international operations, shifts in our store portfolio to more licensed stores in EMEA and to more company-operated stores in CAP, profitable growth models and opportunities, strategic acquisitions, commodity costs and our mitigation strategies, the transition from our distribution arrangement with Kraft to a direct distribution model, liquidity, cash flow from operations, use of cash, the potential issuance of debt and applicable interest rate, anticipated store openings, closings and renovations, the health and growth of our business overall and of specific businesses or markets, benefits of recent initiatives, increased traffic to our stores, operational efficiencies, product innovation and distribution, tax rates, and economic conditions in the US and international markets, constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such statements are based on currently available operating, financial and competitive information and are subject to various risks and uncertainties. Actual future results and trends may differ materially depending on a variety of factors, including, but not limited to, coffee, dairy and other raw materials prices and availability, successful execution of our initiatives, successful execution of internal plans, fluctuations in US and international economies and currencies, the impact of competitors' initiatives, the effect of legal proceedings, and other risks detailed in our filings with the SEC, including in Part I Item IA "Risk Factors" in the 10-K.

A forward-looking statement is neither a prediction nor a guarantee of future events or circumstances, and those future events or circumstances may not occur. You should not place undue reliance on the forward-looking statements, which speak only as of the date of this report. We are under no obligation to update or alter any forward-looking statements, whether as a result of new information, future events or otherwise.

This information should be read in conjunction with the condensed consolidated financial statements and the notes included in Item 1 of Part I of this 10-Q and the audited consolidated financial statements and notes, and Management's Discussion and Analysis of Financial Condition and Results of Operations, contained in the 10-K. General

Our fiscal year ends on the Sunday closest to September 30. All references to store counts, including data for new store openings, are reported net of store closures, unless otherwise noted.

Overview

Starbucks first quarter results reflect a strong start to fiscal 2014 across all segments. Total net revenues increased 12% to \$4.2 billion, with every segment contributing. Global comparable store sales grew 5%, driven by a 4% increase in the number of transactions. Consolidated operating income increased 29% to \$814 million and operating margin expanded 260 basis points to 19.2%. Earnings per share was \$0.71, representing growth of 25% over the prior year quarter.

The Americas segment continued its solid performance in the first quarter, growing revenues by 8% to \$3.1 billion, primarily driven by comparable store sales growth of 5%, comprised of a 4% increase in the number of transactions and a 1% increase in average ticket. Successful holiday beverages and expanded food offerings, including our new La Boulange™ bakery platform, contributed to the growth in comparable store sales. Operating margin expanded 300 basis points to 23.8%, primarily due to lapping costs incurred in the prior year quarter for our leadership conference, incremental litigation charges, and the impact of Superstorm Sandy. Lower coffee costs and sales leverage also contributed. Looking forward, we expect to continue to drive revenue growth and margin expansion through new stores and expanded product offerings, including the completion of the rollout of La Boulange™ bakery items in our retail stores.

In the EMEA segment, the cost management and store portfolio optimization work we have undertaken is translating into improved results. Revenues grew 11% to \$340 million, driven by a combination of licensed store revenue growth and a 5% increase in comparable store sales for our company-operated stores. Our strategic portfolio shift to higher

margin licensed stores drove the increase in operating margin of 260 basis points over the prior year to 9.9%. We expect continued disciplined licensed store expansion and focus on the customer experience in this region will result in improved operating performance as we progress on our plan towards mid-teens operating margin over time.

Table of Contents

The China/Asia Pacific segment continues to be our fastest growing and highest margin region. New store growth, along with an 8% increase in comparable store sales, drove a 25% increase in total net revenues to \$267 million. Operating income grew 12% to \$81 million, while operating margin declined 330 basis points to 30.4%. The margin contraction was driven by a lower contribution from our equity investees, specifically Japan. We expect this segment will become a more meaningful contributor to overall company profitability in the future, as we look forward to continued new store openings and establishing China as our largest market outside of the US.

Channel Development segment revenues grew 7% for the quarter to \$401 million, primarily due to increased sales of premium single serve products, driven by sales of Starbucks- and Tazo-branded K-Cup® portion packs. This was partially offset by the packaged coffee price reductions taken in the third quarter of fiscal 2013. Operating margin increased 370 basis points to 29.6% for the first quarter of fiscal 2014, primarily driven by lower coffee costs. As we continue to expand customer occasions outside of our retail stores, including growing our presence in the premium single serve category, we expect this segment to become a more significant contributor to future growth.

Comparable Store Sales

Starbucks comparable store sales for the first quarter of fiscal 2014:

	Quarter Ended Dec 29, 2013		
	Sales Growth	Change in Transactions	Change in Ticket
Consolidated	5%	4%	1%
Americas	5%	4%	1%
EMEA	5%	3%	1%
China / Asia Pacific	8%	7%	1%

Our comparable store sales represent the growth in revenue from Starbucks® company-operated stores open 13 months or longer. Comparable store sales exclude the effect of fluctuations in foreign currency exchange rates.

Fiscal 2014 — Financial Outlook for the Year

For fiscal year 2014, we expect revenue growth driven by mid-single digit comparable store sales growth, new store openings, and continued growth in the Channel Development business. Approximately one-half of new store openings will be in China / Asia Pacific, with the remaining half coming primarily from the Americas.

We expect full-year consolidated operating margin improvement of 150 to 200 basis points over fiscal 2013 when excluding the Kraft litigation charge and strong EPS growth.

Revenues

	Quarter Ended

CPG, foodservice and other	494.0	453.4	9.0	
Total net revenues	\$4,239.6	\$3,793.2	11.8	%

Total net revenues for the first quarter of fiscal 2014 increased \$446 million, or 12%, over the prior year period, primarily due to increased revenues from company-operated stores (contributing \$354 million), driven by a 5% increase in comparable store sales (approximately \$160 million) and incremental revenues from 527 net new company-operated store openings over the past 12 months (approximately \$128 million).

Also contributing to the increase in total net revenues was licensed store revenue growth of \$52 million, primarily due to increased product sales to and royalty revenues from our licensees, as a result of improved comparable store sales and the opening of 1,005 net new licensed stores over the past 12 months.

Table of Contents

CPG, foodservice and other revenues increased \$41 million for the first quarter of fiscal 2014, primarily due to increased sales of premium single serve products (approximately \$25 million).

Cost of sales including occupancy costs as a percentage of total net revenues decreased 40 basis points for the first quarter of fiscal 2014, primarily driven by lower coffee costs (approximately 80 basis points), partially offset by the impact of trade promotions on total net revenues (approximately 20 basis points). Sales leverage on occupancy costs also contributed.

Store operating expenses as a percentage of total net revenues decreased 100 basis points for the first quarter of fiscal 2014. Store operating expenses as a percentage of company-operated store revenues decreased 130 basis points for the quarter, primarily driven by higher litigation charges in the prior year quarter (approximately 80 basis points) and decreased marketing (approximately 60 basis points), largely due to lapping the prior year launch of the Verismo® system by Starbucks in company-operated stores. Sales leverage also contributed.

Other operating expenses as a percentage of total net revenues decreased 60 basis points for the first quarter of fiscal 2014. Excluding the impact of company-operated store revenues, other operating expenses decreased 290 basis points for the first quarter, in part due to decreased marketing, primarily resulting from lapping the prior year launch of the Verismo® system by Starbucks in Channel Development.

General and administrative expenses as a percentage of total net revenues decreased 40 basis points for the first quarter of fiscal 2014, primarily due to lapping our leadership conference held in the prior year quarter (approximately 60 basis points).

The \$20.2 million litigation credit (contributing approximately 50 basis points) reflects a reduction to our estimated prejudgment interest payable associated with the Kraft arbitration, as a result of paying our obligation earlier than anticipated. The \$2.8 billion litigation charge was accrued for in the fourth quarter of fiscal 2013 and fully extinguished in the first quarter of fiscal 2014.

Lapping the impact of Superstorm Sandy, which unfavorably impacted revenues and various expense lines in the prior year quarter, also contributed (approximately 20 basis points). The combination of these changes resulted in an overall increase in operating margin of 260 basis points for the first quarter of fiscal 2014.

For the first quarter of fiscal 2014, net interest income and other increased \$23 million, primarily due to favorable mark-to-market adjustments from derivatives used to manage our risk of commodity price fluctuations (approximately \$9 million), favorable foreign exchange fluctuations (approximately \$5 million), and unrealized gains on our trading securities portfolio (approximately \$4 million).

Interest expense increased \$8 million, due to interest on the long-term debt we issued in the first quarter of fiscal 2014 and the fourth quarter of fiscal 2013.

The effective tax rate for the first quarter of fiscal 2014 was 34.0% compared to 30.4% for the same quarter in fiscal 2013. The increase in the rate was primarily due to lapping the recognition of a net tax benefit in the first quarter of fiscal 2013, primarily from state income tax expense adjustments for returns filed in prior years.

Americas total net revenues for the first quarter of fiscal 2014 increased \$232 million, or 8%, primarily due to higher revenues from company-operated stores (contributing \$201 million) and licensed stores (contributing \$35 million).

Table of Contents

The increase in company-operated store revenues was driven by a 5% increase in comparable store sales (approximately \$137 million), and incremental revenues from 277 net new company-operated store openings over the past 12 months (approximately \$90 million). Licensed store revenue growth was primarily due to increased product sales to and higher royalty revenues from our licensees, as a result of improved comparable store sales and the opening of 458 net new licensed stores over the past 12 months.

Operating Expenses

Cost of sales including occupancy costs as a percentage of total net revenues decreased 60 basis points for the first quarter of fiscal 2014, primarily driven by lower coffee costs (approximately 50 basis points). Sales leverage on occupancy costs also contributed.

Store operating expenses as a percentage of total net revenues decreased 130 basis points for the first quarter of fiscal 2014. As a percentage of company-operated store revenues, store operating expenses decreased 120 basis points, primarily driven by higher litigation charges in the prior year period (approximately 90 basis points). Sales leverage also contributed.

General and administrative expenses as a percentage of total net revenues decreased 90 basis points for the first quarter of fiscal 2014, primarily due to lapping our leadership conference held in the prior year quarter (approximately 80 basis points).

Lapping the impact of Superstorm Sandy, which unfavorably impacted revenues and various expense lines in the prior year quarter, also contributed (approximately 30 basis points). The combination of these changes resulted in an overall increase in operating margin of 300 basis points for the first quarter of fiscal 2014.

Revenues

EMEA total net revenues increased \$33 million, or 11%, for the first quarter of fiscal 2014. Licensed store revenues grew \$17 million, or 38%, for the first quarter, due to increased product sales to and higher royalty revenues from our licensees, primarily from the opening of 163 net new licensed stores over the past 12 months and improved comparable store sales. Company-operated store revenues increased \$16 million, driven by a 5% increase in comparable store sales (approximately \$11 million).

Operating Expenses

Cost of sales including occupancy costs as a percentage of total net revenues decreased 30 basis points for the first quarter of fiscal 2014, primarily due to lower commodity costs (approximately 60 basis points).

Store operating expenses as a percentage of total net revenues decreased 110 basis points for the first quarter of fiscal 2014, driven by increased licensed store revenues. As a percentage of company-operated store revenues, store operating expenses increased 10 basis points.

Table of Contents

Other operating expenses as a percentage of total net revenues increased 70 basis points for the first quarter of fiscal 2014. Excluding the impact of company-operated store revenues, other operating expenses increased 80 basis points for the first quarter, primarily driven by increased costs to grow our licensed operations in the region (approximately 60 basis points).

General and administrative expenses as a percentage of total net revenues decreased 130 basis points, primarily due to decreased salaries expense resulting from cost optimization initiatives in the region (approximately 100 basis points). The combination of these changes resulted in an overall increase in operating margin of 260 basis points for the first quarter of fiscal 2014.

China/Asia Pacific total net revenues for the first quarter of fiscal 2014 increased \$53 million, or 25%, primarily due to increased revenues from company-operated stores (contributing \$51 million), driven by 254 net new company-operated store openings over the past 12 months (approximately \$39 million) and an 8% increase in comparable store sales (approximately \$12 million).

Operating Expenses

Cost of sales including occupancy costs as a percentage of total net revenues remained flat for the first quarter of fiscal 2014. Cost of sales decreased 130 basis points while occupancy costs increased 120 basis points, both primarily due to company-operated store growth outpacing licensed store growth.

Store operating expenses as a percentage of total net revenues increased 80 basis points for the first quarter of fiscal 2014. As a percentage of company-operated store revenues, store operating expenses decreased 80 basis points for the first quarter, primarily driven by sales leverage.

Other operating expenses as a percentage of total net revenues decreased 80 basis points for the first quarter of fiscal 2014, driven by the increase in company-operated store revenues. Excluding the impact of company-operated store revenues, other operating expenses increased 20 basis points for the first quarter.

Income from equity investees decreased \$1 million for the first quarter of fiscal 2014, driven by lower income from our joint venture operation in Japan, primarily due to the weakening of the Yen against the US dollar, partially offset by improved performance of our joint venture operations in Korea and China. The decrease in income from equity investees paired with the growing topline segment revenues resulted in income from equity investees declining as a percentage of total net revenues.

Total Channel Development net revenues for the first quarter of fiscal 2014 increased \$27 million, or 7%, driven by increased sales of premium single serve products (approximately \$25 million), partially offset by the impact of the packaged coffee list price reductions (approximately \$14 million) effective beginning in the third quarter of fiscal 2013. Also contributing was an increase in foodservice revenues (approximately \$9 million) from increased sales volumes compared to the prior year quarter.

Operating Expenses

Cost of sales as a percentage of total net revenues decreased 160 basis points for the first quarter of fiscal 2014. The decrease was primarily driven by lower coffee costs (approximately 340 basis points), partially offset by the impact of the list price reductions on total net revenues (approximately 220 basis points).

Other operating expenses as a percentage of total net revenues decreased 340 basis points for the first quarter of fiscal 2014, primarily driven by decreased marketing (approximately 190 basis points), largely due to lapping the prior year launch of the Verismo® system by Starbucks.

Income from equity investees decreased \$3 million for the first quarter of fiscal 2014 as a result of lower income from our North American Coffee Partnership joint venture (approximately 80 basis points), driven by increased investment in support of new product innovation platforms. The growth in segment revenues also contributed to our joint venture income declining as a percentage of total net revenues.

The combination of these changes resulted in an overall increase in operating margin of 370 basis points for the first quarter of fiscal 2014.

Financial Condition, Liquidity and Capital Resources

Investment Overview

Starbucks cash and short-term investments totaled \$1.7 billion and \$3.2 billion as of December 29, 2013 and September 29, 2013, respectively. As discussed below, in the first quarter of fiscal 2014 we paid the \$2.8 billion that was accrued at September 29, 2013 for the Kraft arbitration matter. We actively manage our cash and short-term investments in order to internally fund operating needs, make scheduled interest and principal payments on our borrowings, and return cash to shareholders through common stock cash dividend payments and share repurchases. Our short-term and long-term investments consist of highly liquid available-for-sale securities, predominantly agency obligations, corporate bonds, government treasury securities, mortgage and asset-backed securities, commercial paper, and certificates of deposit. As of December 29, 2013, approximately \$1.1 billion of cash and investments was held in foreign subsidiaries.

Borrowing Capacity

In December 2013, we issued \$400 million of 3-year 0.875% Senior Notes ("the 2014 3-year notes") due December 2016, and \$350 million of 5-year 2.000% Senior Notes ("the 2014 5-year notes") due December 2018, in an underwritten registered public offering, to fund a portion of the payment required by the arbitration award in the Kraft litigation matter. The remaining net proceeds will be used for general corporate purposes, which may include business expansion, payment of cash dividends on Starbucks common stock, the repurchase of common stock under the company's ongoing share repurchase program, or financing of possible acquisitions. Interest on the notes is payable semi-annually on June 5 and December 5 of each year, commencing on June 5, 2014.

Note 6, Debt, to the condensed consolidated financial statements provides details on all of our issued and outstanding long-term debt.

The indentures under which our long-term debt was issued require us to maintain compliance with certain covenants, including limits on future liens and sale and leaseback transactions on certain material properties. As of December 29, 2013, we were in compliance with each of these covenants.

Our \$750 million unsecured, revolving credit facility with various banks, of which \$150 million may be used for issuances of letters of credit, is available for working capital, capital expenditures and other corporate purposes, including acquisitions and share repurchases, and is currently set to mature on February 5, 2018. Starbucks has the option, subject to negotiation and agreement with the related banks, to increase the maximum commitment amount by an additional \$750 million. Borrowings under the credit facility will bear interest at a variable rate based on LIBOR, and, for US dollar-denominated loans under certain circumstances, a Base Rate (as defined in the credit facility), in each case plus an applicable margin. The applicable margin is based on the better of (i) the Company's long-term credit ratings assigned by Moody's and Standard & Poor's rating agencies, and (ii) the Company's fixed charge coverage ratio, pursuant to a pricing grid set forth in the credit facility. The current applicable margin is 0.795% for Eurocurrency Rate Loans and 0.00% for Base Rate Loans. The credit facility contains provisions requiring us to maintain compliance with certain covenants, including a minimum fixed charge coverage ratio, which measures our ability to cover financing expenses. As of December 29, 2013, we were in compliance with each of these covenants. Under our commercial paper program, as approved by our Board of Directors, we may issue unsecured commercial paper notes up to a maximum aggregate amount outstanding at any time of \$1 billion, with individual maturities that may vary, but not exceed 397 days from the date of issue. Amounts outstanding under the commercial paper program are to be backstopped by available commitments under our credit facility. Currently, we may issue up to \$729 million under our commercial paper program (the \$750 million committed credit facility amount, less \$21 million in outstanding letters of credit). The proceeds from borrowings under our commercial paper program may be used for working capital needs, capital expenditures and other corporate purposes, including acquisitions and share repurchases. During the first quarter of fiscal 2014, we issued commercial paper to fund a portion of the \$2.8 billion payment for the Kraft arbitration matter. The largest amount of commercial paper outstanding during the first quarter was \$225 million and no amounts were outstanding as of December 29, 2013. During fiscal 2013, there were no borrowings under the credit facility or commercial paper programs. As of December 29, 2013 and September 29, 2013, a total of \$21 million in letters of credit were outstanding under the credit facility.

Table of Contents

Use of Cash

In the first quarter of fiscal 2014, Starbucks paid all amounts due to Kraft under the arbitration, including prejudgment interest and attorneys' fees, and fully extinguished the litigation charge liability. Of the \$2,784.1 million litigation charge accrued in the fourth quarter of fiscal 2013, \$2,763.9 million was paid and the remainder was released as a litigation credit to reflect a reduction to our estimated prejudgment interest payable as a result of paying our obligation earlier than anticipated.

We expect to use additional available cash and short-term investments, including additional potential future borrowings under the credit facility and commercial paper program, to invest in our core businesses, including new product innovations and related marketing support, as well as other new business opportunities related to our core businesses. We believe that future cash flows generated from operations and existing cash and short-term investments both domestically and internationally will be sufficient to finance capital requirements for our core businesses in those respective markets as well as shareholder distributions for the foreseeable future.

We consider the majority of undistributed earnings of our foreign subsidiaries and equity investees as of December 29, 2013 to be indefinitely reinvested and, accordingly, no US income and foreign withholding taxes have been provided on such earnings. We have not, nor do we anticipate the need to, repatriate funds to the US to satisfy domestic liquidity needs; however, in the event that we need to repatriate all or a portion of our foreign cash to the US we would be subject to additional US income taxes, which could be material. We do not believe it is practical to calculate the potential tax impact of repatriation, as there is a significant amount of uncertainty around the calculation, including the availability and amount of foreign tax credits at the time of repatriation, tax rates in effect, and other indirect tax consequences associated with repatriation.

We may use our available cash resources to make proportionate capital contributions to our equity method and cost method investees. We may also seek strategic acquisitions to leverage existing capabilities and further build our business in support of our growth agenda. Acquisitions may include increasing our ownership interests in our equity method and cost method investees. Any decisions to increase such ownership interests will be driven by valuation and fit with our ownership strategy. Significant new joint ventures, acquisitions and/or other new business opportunities may require additional outside funding.

Other than normal operating expenses, cash requirements for the remainder of fiscal 2014 are expected to consist primarily of capital expenditures for remodeling and refurbishment of, and equipment upgrades for, existing company-operated stores; new company-operated stores; systems and technology investments in the stores and in the support infrastructure; and additional investments in manufacturing capacity. Total capital expenditures for fiscal 2014 are expected to be approximately \$1.2 billion.

During the first quarter of fiscal 2014, Starbucks Board of Directors declared a quarterly cash dividend to shareholders of \$0.26 per share to be paid on February 21, 2014 to shareholders of record as of the close of business on February 6, 2014. Starbucks repurchased 0.6 million shares of common stock (\$46.7 million) during the first quarter of fiscal 2014 under share repurchase authorizations. The number of remaining shares authorized for repurchase as of December 29, 2013 totaled 25.8 million.

Cash Flows

Cash used by operating activities was \$1.4 billion for the first quarter of fiscal 2014, compared to cash provided by operating activities of \$1.1 billion for the same period in fiscal 2013. The decrease was driven by the first quarter payment of \$2.8 billion for the Kraft arbitration matter discussed above. This was partially offset by cash provided by operating activities of \$1.4 billion resulting from increased earnings and improvements in working capital accounts.

Cash used by investing activities for the first quarter of fiscal 2014 totaled \$193.3 million, compared to cash provided by investing activities of \$28.7 million for the same period in fiscal 2013. The decline was primarily due to increased investment into long-term securities during the quarter, partially offset by sales of short-term securities used to partially fund the payment to Kraft.

Cash provided by financing activities for the first quarter of fiscal 2014 totaled \$568.9 million, compared to cash used by financing activities of \$434.0 million for the same period in fiscal 2013. The increase was primarily due to the proceeds from the issuance of long-term debt in the first quarter of fiscal 2014 and decreased share repurchases compared to the first quarter of fiscal 2013.

Contractual Obligations

In Management's Discussion and Analysis of Financial Condition and Results of Operations included in the 10-K, we disclosed that we had \$10.0 billion in total contractual obligations as of September 29, 2013. Other than the items discussed below, there have been no material changes to this total obligation during the period covered by this 10-Q outside of the ordinary course of our business.

Table of Contents

In the first quarter of fiscal 2014, we issued \$750 million of debt, as described in Note 6 to the condensed consolidated financial statements. In addition, the \$2.8 billion that was accrued for the Kraft arbitration matter as of September 29, 2013 was removed from total contractual obligations, as this obligation was fully extinguished in the first quarter of fiscal 2014.

Off-Balance Sheet Arrangements

There has been no material change in our off-balance sheet arrangements discussed in Management's Discussion and Analysis of Financial Condition and Results of Operations included in the 10-K.

Commodity Prices, Availability and General Risk Conditions

Commodity price risk represents our primary market risk, generated by our purchases of green coffee and dairy products, among other items. We purchase, roast and sell high quality whole bean arabica coffee and related products and risk arises from the price volatility of green coffee. In addition to coffee, we also purchase significant amounts of dairy products to support the needs of our company-operated stores. The price and availability of these commodities directly impact our results of operations and we expect commodity prices, particularly coffee, to impact future results of operations. For additional details see Product Supply in Item 1 of the 10-K, as well as Risk Factors in Item 1A of the 10-K.

Seasonality and Quarterly Results

Our business is subject to seasonal fluctuations, including fluctuations resulting from the holiday season in December. Notwithstanding the \$2.8 billion cash payment in the first quarter of 2014 related to the Kraft arbitration matter, our cash flows from operations are considerably higher in the first fiscal quarter than the remainder of the year. This is largely driven by cash received as Starbucks Cards are purchased and loaded during the holiday season. Since revenues from the Starbucks Card are recognized upon redemption and not when purchased, seasonal fluctuations on the consolidated statements of earnings are much less pronounced. Quarterly results are affected by the timing of the opening of new stores and the closing of existing stores. For these reasons, results for any quarter are not necessarily indicative of the results that may be achieved for the full fiscal year.

RECENT ACCOUNTING PRONOUNCEMENTS

See Note 1 to the condensed consolidated financial statements included in Item 1 of Part I of this 10-Q.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

There has been no material change in the commodity price risk, foreign currency exchange risk, equity security price risk, or interest rate risk discussed in Item 7A of the 10-K.

Item 4. Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that material information required to be disclosed in our periodic reports filed or submitted under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Our disclosure controls and procedures are also designed to ensure that information required to be disclosed in the reports we file or submit under the Exchange Act is accumulated and communicated to our management, including our principal executive officer and principal financial officer as appropriate, to allow timely decisions regarding required disclosure.

During the first quarter of fiscal 2014, we carried out an evaluation, under the supervision and with the participation of our management, including our chief executive officer and our chief financial officer, of the effectiveness of the design and operation of the disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act. Based upon that evaluation, our chief executive officer and chief financial officer concluded that our disclosure controls and procedures were effective, as of the end of the period covered by this report (December 29, 2013).

There were no changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act) during our most recently completed fiscal quarter that materially affected or are reasonably likely

to materially affect internal control over financial reporting.

The certifications required by Section 302 of the Sarbanes-Oxley Act of 2002 are filed as exhibits 31.1 and 31.2 to this 10-Q.
