Dear
SHAREHOLDER

Once again, I am pleased to report that over the most recent reporting period your Fund continued to provide you with monthly tax-free income and an attractive total return. For more specific information about the performance of your Fund, please see the Portfolio Manager's Comments and Performance Overview sections of this report.

With interest rates at historically low levels, many have begun to wonder whether interest rates will rise, and whether that possibility should cause them to adjust their holdings of fixed-income investments. No one knows what the future will bring, which is why we think a well-balanced portfolio that is structured and carefully monitored with the help of an investment professional is an important component in achieving your long-term financial goals. A well-diversified portfolio may actually help to reduce your overall investment risk, and we believe that municipal bond investments like your Nuveen Fund can be important building blocks in a portfolio crafted to perform well through a variety of market conditions.

I'd also like to direct your attention to the inside front cover of this report, which explains the quick and easy process to begin receiving Fund reports like this via e-mail and the internet. Thousands of Nuveen Fund shareholders already have signed-up, and they are getting their Fund information faster and more conveniently than ever. I urge you to consider joining them.

Since 1898, Nuveen Investments has offered financial products and solutions that incorporate careful research, diversification, and the application of conservative risk-management principles. We are grateful that you have chosen us as a partner as you pursue your financial goals. We look forward to continuing to earn your trust in the months and years ahead.

Sincerely,

/s/ Timothy R. Schwertfeger

WHAT FACTORS AFFECTED THE U.S. ECONOMY AND MUNICIPAL MARKET DURING THE
TWELVE-MONTH PERIOD ENDED MAY 31, 2003?

The underlying economic and market conditions remained similar to those we discussed in our last shareholder report dated November 30, 2002. We believe the most influential factors affecting the performance of the U.S. economy and the

Edgar Filing: NUVEEN GEORGIA DIVIDEND ADVANTAGE MUNICIPAL FUND 2 - Form N-CSR

municipal market continued to be the sluggish pace of economic growth and interest rates that remained at 40-year lows. At the same time, continued geopolitical concerns, centering on the threat of terrorism and the Iraqi situation, also had an impact during this reporting period.

In the municipal market, the slow economic recovery and the continued lack of inflationary pressures during the reporting period created conditions that helped many bonds, and especially higher-rated bonds, perform well. Following a record \$357 billion of new supply in calendar year 2002, municipal issuance nationwide remained strong during the first five months of 2003, with \$145.6 billion in new municipal securities, up 14% over the same period in 2002. Much of this increase in supply reflects issuance intended to address fiscal problems facing states and localities as the result of slow economic growth, rising costs (especially for healthcare and pensions) and sharp declines in tax collections. Given the relatively low interest rate environment, many states and local governments have turned to borrowing in order to close budget gaps, fund needed capital projects and free up cash for operating purposes.

The heavy supply of municipal bonds was met with evidence of continued strong demand over most of this reporting period, as the record issuance was absorbed without a significant decline in prices. Both individual and institutional investors were active buyers.

HOW WERE ECONOMIC AND MARKET CONDITIONS IN GEORGIA AND NORTH CAROLINA?

Georgia's economy remained sluggish, but began to show signs of recovery during this reporting period. Over the twelve months, job growth in the state's health services, education and government sectors helped to offset weakness in retail sales, construction and telecommunications. As of May 2003, unemployment in the state was 4.8%, down from 5.1% in May 2002 and well below the current national average of 6.1%. With 13 military bases, Georgia also benefited from recent increases in defense spending. Although Georgia's debt levels remain above-average, debt ratios are relatively moderate, and the state has not exhausted its reserve balances. During the first five months of 2003, Georgia issued \$1.6 billion in new bonds, down 44% from the same period in 2002. This drop-off in supply mainly was a reflection of the heavier volume brought to market

2

during calendar year 2002. In general, while Georgia's manufacturing and transportation industries currently remain stalled awaiting improvement in the national economy, the state's location, strong population trends, and below-average business costs are expected to encourage economic growth over the long term. As of May 31, 2003, Georgia maintained its Aaa/AAA ratings with stable outlooks from both Moody's and Standard & Poor's, respectively.

North Carolina's economy showed mixed results over the course of this reporting period. While the recession in manufacturing, especially in furniture and transportation equipment, served as the primary drag on the state's economy, this was offset to some degree by growth in the services sector. North Carolina also remained a national banking center as well as a center for high-tech firms and professionals attracted by the state's universities. Over the past 12 months, North Carolina's unemployment fell to 6.1% in May 2003 from 6.8% a year earlier, bringing it more closely in line with the national average. Municipal issuance in the state for the first five months of 2003 topped \$4.3 billion, nearly double the amount seen during the same period last year. Even with increased issuance, the state's debt ratios remain among the lowest in the nation at 1.4% of per capita income. In August 2002, the state's budget problems contributed to Moody's decision to downgrade North Carolina's general obligation debt to Aa1 with a stable outlook, while Standard & Poor's maintained its AAA

Edgar Filing: NUVEEN GEORGIA DIVIDEND ADVANTAGE MUNICIPAL FUND 2 - Form N-CSR

rating for the state.

For additional information, see the individual Performance Overview for your Fund in this report.

For the twelve months ended May 31, 2003, all of the Funds in this report with at least one year of performance history outperformed the national, unleveraged Lehman Brothers Municipal Bond Index. Their performances were generally favorable when compared with the Lipper Other States Municipal Debt Funds category, with NPG the primary exception. While these Lipper comparisons carry some value, we believe they have limited usefulness because the Lipper average includes the results of funds from ten different states, each with its own unique conditions and circumstances.

The performance of these Funds benefited when compared with the results of the Lehman Index from their use of leverage, a strategy that can provide the opportunity for additional income for common shareholders. Most of the Funds also were helped by their relatively long durations.⁴ During

- 1 The total annual returns on common share net asset value (NAV) for these Nuveen Funds are compared with the total annual return of the Lehman Brothers Municipal Bond Index, an unleveraged, unmanaged national index comprising a broad range of investment-grade municipal bonds. Results for the Lehman index do not reflect any expenses.
- 2 The total returns of these Funds are compared with the average annualized return of the 36 funds in the Lipper Other States Municipal Debt Funds category. Fund and Lipper returns assume reinvestment of dividends. It should be noted that the performance of the Lipper Other States category represents the overall average of annual returns for funds from 10 different states with a wide variety of economic conditions, municipal market conditions, and investment guidelines, making direct comparisons less applicable.

- 3 The taxable-equivalent yield represents the yield that must be earned on a taxable investment in order to equal the yield of the Nuveen Fund on an after-tax basis. The taxable-equivalent yield is based on the Fund's market yield on the indicated date and a federal income tax rate of 28% plus the applicable state income tax rate. The combined federal and state tax rates used in this report are as follows: Georgia 32.5% and North Carolina 34%.
- 4 Duration is a measure of a fund's NAV volatility in reaction to interest rate movements. Fund duration, also known as leverage-adjusted duration, takes into account the leveraging process for a fund and therefore is generally longer than the duration of the actual portfolio of individual bonds that make up the fund. References to duration in this commentary are intended to indicate fund duration unless otherwise noted.

3

periods of declining interest rates, such as that we experienced over most of the twelve-month reporting period, longer duration investments generally would be expected to outperform shorter duration investments, assuming all other factors were equal. As of May 31, 2003, the durations of these Funds, with the exception of NNC, ranged from 8.80 to 11.54, compared with 7.80 for the Lehman index. (Please see the individual Performance Overview pages for individual Fund durations.)

In addition to leverage and duration, the relative performances of these Nuveen Funds were influenced by factors including call exposure, portfolio trading activity, and the price movement of specific sectors and holdings. For example, as of May 31, 2003, NPG held 15% of its portfolio in multifamily housing bonds. For most of the reporting period, the housing sector in Georgia underperformed the broader municipal market and lagged most other revenue bond sectors, as measured by subcategories of the Lehman index. While we continued to hold these securities because we like their long-term potential, their performance over this reporting period was a primary reason why NPG's performance lagged the other Nuveen Georgia Funds.

HOW DID THE MARKET ENVIRONMENT AND THE FUNDS' RETURNS AFFECT DIVIDENDS AND SHARE PRICES?

As noted earlier, with short-term interest rates at historically low levels, the dividend-payment capabilities of these Funds benefited from their use of leverage. The amount of this benefit is tied in part to the short-term rates the Funds pay their MuniPreferred(R) shareholders. Low short-term rates can enable the Funds to reduce the amount of income paid to MuniPreferred shareholders, which potentially can leave more earnings to support common share dividends. During the 12 months ended May 31, 2003, the continued low level of short-term interest rates enabled us to implement two dividend increases in NNC and NRB and one increase in both NPG and NZX. As of May 2003, NNO had paid shareholders dependable, attractive dividends for 17 consecutive months, while NKG and NII--which were introduced in September 2002--declared their first monthly distributions in November 2002.

Over the course of this twelve-month reporting period, strong demand and favorable market conditions helped to boost the share prices and net asset values of these Funds. As of May 31, 2003, NPG, NNC, NRB and NII continued to trade at premiums to their common share NAVs, while NZX, NKG and NNO were trading at virtually the same levels as their NAVs (see charts on individual Performance Overview pages).

WHAT KEY STRATEGIES WERE USED TO MANAGE THESE FUNDS DURING THE YEAR ENDED MAY

31, 2003?

Over this twelve-month reporting period, we continued to place strong emphasis on diversifying the portfolios, enhancing call protection, and improving dividend-paying capabilities. Strategically, our main focus centered on systematically shortening the Funds' durations, which we believed would enhance our ability to control the Funds' interest rate risk and produce more consistent returns over time. Interest rate risk is the risk that the value of a Fund's portfolio will decline when market interest rates rise (since bond prices move in the opposite direction of interest rates). The longer the duration of a Fund's portfolio, the greater its interest rate risk.

In line with our duration strategy as well as the recent steepness of the municipal yield curve, we concentrated on finding value in the intermediate part of the yield curve (i.e., bonds that mature in 15 to 20 years), particularly in the newer Funds with longer durations. In many cases, bonds in this part of the curve were offering yields similar to those of longer-term bonds but, in our opinion, had less inherent interest rate risk.

4

We also continued to look for individual issues that we believed would perform well regardless of the future direction of interest rates. All the Georgia and North Carolina Funds remained solidly invested in education and healthcare bonds, and the Georgia Funds also had relatively large exposures to water and sewer bonds. These three sectors were among the top performing Lehman Index sectors over this reporting period.

NKG and NII were introduced in September 2002 and are fully invested. As mentioned earlier, these Funds began paying regular monthly dividends in November 2002. As attractive opportunities have arisen, we have replaced bonds from Puerto Rico and other states that were purchased during the initial investment phase last fall with Georgia or North Carolina securities. As of May 31, 2003, approximately 85% of NKG's portfolio were invested in Georgia bonds, and 90% of NII was invested in North Carolina securities. We expect to continue to incrementally increase these percentages through additional purchases of in-state bonds, while closely monitoring the generation of capital gains from sales of any non-Georgia or non-North Carolina securities.

Given the current geopolitical and economic climate, we believed that maintaining strong credit quality remained a vital requirement. As of May 31, 2003, each of these Funds offered excellent credit quality, with allocations of bonds rated AAA/U.S. guaranteed and AA ranging from 78% to 93%. In general, our weightings in AAA and insured bonds benefited the performance of these Funds during the past year.

WHAT IS YOUR OUTLOOK FOR THE MUNICIPAL MARKET IN GENERAL AND THESE FUNDS IN PARTICULAR?

We continue to believe the U.S. economy is slowly headed for a recovery, but one that may take longer and be less robust than some originally anticipated. As a result, we think that inflation and interest rates will remain relatively low over the near term.

However, the threat of an eventual rise in interest rates remains, and we intend to keep a careful watch on the Funds' durations and holdings to be as well-positioned as possible if and when rates do reverse course.

In Georgia, where supply has been tight during the first part of 2003, we expect to see issuance pick up slightly in coming months. While North Carolina issuance should continue to be strong, given the state's budget deficit and continued need for spending on infrastructure, education and healthcare. Recently,

Edgar Filing: NUVEEN GEORGIA DIVIDEND ADVANTAGE MUNICIPAL FUND 2 - Form N-CSR

anticipation of changes to the national tax code led some to wonder about the new law's potential impact on tax-exempt investments. The final version of the 2003 tax relief law reduced, but did not eliminate, taxes on corporate dividends, and, as a result, we do not expect to see any significant impact on the demand or pricing for tax-exempt municipal bonds.

Looking at bond call exposure, we believe these Funds offer good levels of call protection. As of May 31, 2003, the percentage of bonds eligible for calls among the seven Funds ranged from zero to 14% during the remainder of 2003 and through 2004. The number of actual calls over the coming months will depend largely on market interest rates during this time.

We believe that these Nuveen Funds can continue to serve as attractive sources of tax-free income, as well as offer considerable portfolio diversification potential. We remain convinced that these Funds are quality investments that can continue to benefit shareholders as part of a well-balanced core investment portfolio.

1. GENERAL INFORMATION AND SIGNIFICANT ACCOUNTING POLICIES

The state Funds (the "Funds") covered in this report and their corresponding Common share stock exchange symbols are Nuveen Georgia Premium Income Municipal Fund (NPG), Nuveen Georgia Dividend Advantage Municipal Fund (NZX), Nuveen Georgia Dividend Advantage Municipal Fund 2 (NKG), Nuveen North Carolina Premium Income Municipal Fund (NNC), Nuveen North Carolina Dividend Advantage Municipal Fund (NRB), Nuveen North Carolina Dividend Advantage Municipal Fund 2 (NNO) and Nuveen North Carolina Dividend Advantage Municipal Fund 3 (NII). Georgia Premium Income (NPG), Georgia Dividend Advantage (NZX), Georgia Dividend Advantage 2 (NKG), North Carolina Dividend Advantage (NRB), North Carolina Dividend Advantage 2 (NNO) and North Carolina Dividend Advantage 3 (NII) are traded on the American Stock Exchange while North Carolina Premium Income (NNC) is traded on the New York Stock Exchange. The Funds are registered under the Investment Company Act of 1940, as amended, as closed-end management investment companies.

Prior to the commencement of operations of Georgia Dividend Advantage (NZX), Georgia Dividend Advantage 2 (NKG), North Carolina Dividend Advantage 2 (NNO) and North Carolina Dividend Advantage 3 (NII), each Fund had no operations other than those related to organizational matters, the initial capital contribution of \$100,275 per Fund by Nuveen Advisory Corp. (the "Adviser"), a wholly owned subsidiary of Nuveen Investments, Inc. (formerly, The John Nuveen Company), and the recording of the organization expenses (\$11,500 per Fund) and their reimbursement by Nuveen Investments, LLC (formerly, Nuveen Investments), also a wholly owned subsidiary of Nuveen Investments, Inc.

Each Fund seeks to provide current income exempt from both regular federal and designated state income taxes by investing primarily in a diversified portfolio of municipal obligations issued by state and local government authorities within

a single state.

The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements in accordance with accounting principles generally accepted in the United States.

Securities Valuation

The prices of municipal bonds in each Fund's investment portfolio are provided by a pricing service approved by the Fund's Board of Trustees. When price quotes are not readily available (which is usually the case for municipal securities), the pricing service establishes fair market value based on yields or prices of municipal bonds of comparable quality, type of issue, coupon, maturity and rating, indications of value from securities dealers and general market conditions. If it is determined that market prices for a security are unavailable or inappropriate, the Board of Trustees of the Funds, or its designee, may establish a fair value for the security. Temporary investments in securities that have variable rate and demand features qualifying them as short-term securities are valued at amortized cost, which approximates market value.

Securities Transactions

Securities transactions are recorded on a trade date basis. Realized gains and losses from such transactions are determined on the specific identification method. Securities purchased or sold on a when-issued or delayed delivery basis may have extended settlement periods. The securities so purchased are subject to market fluctuation during this period. The Funds have instructed the custodian to segregate assets with a current value at least equal to the amount of the when-issued and delayed delivery purchase commitments. At May 31, 2003, North Carolina Premium Income (NNC) and North Carolina Dividend Advantage 3 (NII) had outstanding when-issued purchase commitments of \$2,428,084 and \$1,063,755, respectively. There were no such outstanding purchase commitments in any of the other Funds.

Investment Income

Interest income, which includes the amortization of premiums and accretion of discounts for financial reporting purposes, is recorded on an accrual basis.

Income Taxes

Each Fund is a separate taxpayer for federal income tax purposes. Each Fund intends to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its net investment income to its shareholders. Therefore, no federal income tax provision is required. Furthermore, each Fund intends to satisfy conditions which will enable interest from municipal securities, which is exempt from regular federal and designated state income taxes, to retain such tax-exempt status when distributed to shareholders of the Funds. All monthly tax-exempt income dividends paid during the fiscal year ended May 31, 2003, have been designated Exempt Interest Dividends.

Dividends and Distributions to Common Shareholders

Dividends from tax-exempt net investment income are declared and paid monthly. Net realized capital gains and/or market discount from investment transactions, if any, are distributed to shareholders not less frequently than annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

Distributions to Common shareholders of tax-exempt net investment income, net realized capital gains and/or market discount, if any, are recorded on the

Edgar Filing: NUVEEN GEORGIA DIVIDEND ADVANTAGE MUNICIPAL FUND 2 - Form N-CSR

ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from accounting principles generally accepted in the United States.

Preferred Shares

The Funds have issued and outstanding \$25,000 stated value Preferred shares. Each Fund's Preferred shares are issued in one Series. The dividend rate on each Series may change every seven days, as set pursuant to a dutch auction process by the auction agent, and is payable at or near the end of each rate period. The number of Preferred shares outstanding for each Fund is as follows:

	GEORGIA PREMIUM INCOME (NPG)	GEORGIA DIVIDEND ADVANTAGE (NZX)	GEORGIA DIVIDEND ADVANTAGE 2 (NKG)	NORTH CAROLINA PREMIUM INCOME (NNC)	NORTH CAROLINA DIVIDEND ADVANTAGE (NRB)	NORTH CAROLINA DIVIDEND ADVANTAGE 2 (NNO)	ADVANTAGE 3 (NII)

Effective November 15, 2002, Georgia Dividend Advantage 2 (NKG) issued 1,320 Series F, \$25,000 stated value Preferred shares. Effective November 15, 2002, North Carolina Dividend Advantage 3 (NII) issued 1,120 Series W, \$25,000 stated value Preferred shares.

Derivative Financial Instruments

The Funds may invest in certain derivative financial instruments including futures, forward, swap and option contracts, and other financial instruments with similar characteristics. Although the Funds are authorized to invest in such financial instruments, and may do so in the future, they did not make any such investments during the fiscal year ended May 31, 2003.

Custodian Fee Credit

Each Fund has an arrangement with the custodian bank whereby certain custodian fees and expenses are reduced by credits earned on each Fund's cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments.

Offering Costs

Nuveen Investments, LLC has agreed to pay all Common share offering costs (other than the sales load) that exceed \$.03 per Common share for Georgia Dividend Advantage (NZX), Georgia Dividend Advantage 2 (NKG), North Carolina Dividend Advantage 2 (NNO) and North Carolina Dividend Advantage 3 (NII). Georgia Dividend Advantage's (NZX), Georgia Dividend Advantage 2's (NKG), North Carolina Dividend Advantage 2's (NNO) and North Carolina Dividend Advantage 3's (NII) share of Common share offering costs (\$58,470, \$136,200, \$111,750 and \$117,375, respectively) were recorded as a reduction of the proceeds from the sale of Common shares.

Costs incurred by Georgia Dividend Advantage (NZX), Georgia Dividend Advantage 2 (NKG), North Carolina Dividend Advantage 2 (NNO) and North Carolina Dividend Advantage 3 (NII) in connection with their offering of Preferred shares (\$260,991, \$782,000, \$410,844 and \$678,500, respectively) were recorded as a reduction to paid-in surplus.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets applicable to Common shares from operations during the reporting period. Actual results may differ from those estimates.

Build Your Wealth
AUTOMATICALLY

SIDEBAR TEXT: NUVEEN MAKES REINVESTING EASY. A PHONE CALL IS ALL IT TAKES TO SET UP YOUR REINVESTMENT ACCOUNT.

NUVEEN CLOSED-END EXCHANGE-TRADED FUNDS DIVIDEND REINVESTMENT PLAN

Your Nuveen Closed-End Exchange-Traded Fund allows you to conveniently reinvest dividends and/or capital gains distributions in additional fund shares.

By choosing to reinvest, you'll be able to invest money regularly and automatically, and watch your investment grow through the power of tax-free compounding. Just like dividends or distributions in cash, there may be times when income or capital gains taxes may be payable on dividends or distributions that are reinvested.

It is important to note that an automatic reinvestment plan does not ensure a profit, nor does it protect you against loss in a declining market.

EASY AND CONVENIENT

To make recordkeeping easy and convenient, each month you'll receive a statement showing your total dividends and distributions, the date of investment, the shares acquired and the price per share, and the total number of shares you own.

HOW SHARES ARE PURCHASED

The shares you acquire by reinvesting will either be purchased on the open market or newly issued by the Fund. If the shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the then-current market price. If the shares are trading at less than net asset value, shares for your account will be purchased on the open market. Dividends and distributions received to purchase shares in the open market will normally be invested shortly after the dividend payment date. No interest will be paid on dividends and distributions awaiting reinvestment. Because the market price of shares may increase before purchases are completed, the average purchase price per share may exceed the market price at the time of valuation, resulting in the acquisition of fewer shares than if the dividend or distribution had been paid in shares issued by the Fund. A pro rata portion of any applicable brokerage commissions on open market purchases will be paid by Plan participants. These commissions usually will be lower than those charged on individual transactions.

FLEXIBILITY

Edgar Filing: NUVEEN GEORGIA DIVIDEND ADVANTAGE MUNICIPAL FUND 2 - Form N-CSR

You may change your distribution option or withdraw from the Plan at any time, should your needs or situation change. Should you withdraw, you can receive a certificate for all whole shares credited to your reinvestment account and cash payment for fractional shares, or cash payment for all reinvestment account shares, less brokerage commissions and a \$2.50 service fee.

You can reinvest whether your shares are registered in your name, or in the name of a brokerage firm, bank, or other nominee. Ask your investment advisor if his or her firm will participate on your behalf. Participants whose shares are registered in the name of one firm may not be able to transfer the shares to another firm and continue to participate in the Plan.

The Fund reserves the right to amend or terminate the Plan at any time. Although the Fund reserves the right to amend the Plan to include a service charge payable by the participants, there is no direct service charge to participants in the Plan at this time.

For more information on the Nuveen Automatic Reinvestment Plan or to enroll in or withdraw from the Plan, speak with your financial advisor or call us at (800) 257-8787.

POLICY CHANGE

On November 14, 2002, the Board adopted a policy that allows these Funds, in addition to investments in municipal bonds, to invest up to 5% of its net assets (including assets attributable to preferred shares, if any) in tax-exempt or taxable fixed-income securities or equity securities for the purpose of acquiring control of an issuer whose municipal bonds (a) the Fund already owns and (b) have deteriorated or are expected shortly to deteriorate significantly in credit quality, provided Nuveen Advisory determines that such investment should enable the Fund to better maximize the value of its existing investment in such issuer. This policy is a non-fundamental policy of each Fund which means that it can be changed at any time by the Board of Trustees without vote of the shareholders.

Glossary of Terms Used in this Report

Average Annual Total Return: This is a commonly used method to express an investment's performance over a particular, usually multi-year time period. It expresses the return (including change in NAV and reinvested dividends) that would have been necessary on an annual basis to equal the investment's actual performance over the time period being considered.

Average Effective Maturity: The average of all the maturities of the bonds in a fund's portfolio, computed by weighting each maturity date (the date the security comes due) by the market value of the security. This figure does not account for the likelihood of prepayments or the exercise of call provisions.

Leverage-Adjusted Duration: Duration is a measure of a bond or bond fund's sensitivity to changes in interest rates. Generally, the longer a bond or fund's duration, the more the price of the bond or fund will change as interest rates change. Leverage-adjusted duration takes into account the leveraging process for a Fund and therefore is generally longer than the duration of the actual portfolio of individual bonds that make up the Fund.

Market Yield (also known as Dividend Yield or Current Yield): An investment's current annualized dividend divided by its current market price.

Net Asset Value (NAV): A fund's NAV is calculated by subtracting the liabilities of the fund from its total assets and then dividing the remainder by the number of shares outstanding. Fund NAVs are calculated at the end of each business day.

Taxable-Equivalent Yield: The yield necessary from a fully taxable investment to equal, on an after-tax basis, the yield of a municipal bond investment.

Each Fund intends to repurchase shares of its own common or preferred stock in the future at such times and in such amounts as is deemed advisable. No shares were repurchased during the period ended May 31, 2003. Any future repurchases will be reported to shareholders in the next annual or semiannual report.

Serving Investors
FOR GENERATIONS

Since 1898, financial advisors and their clients have relied on Nuveen Investments to provide dependable investment solutions. For the past century, Nuveen Investments has adhered to the belief that the best approach to investing

Edgar Filing: NUVEEN GEORGIA DIVIDEND ADVANTAGE MUNICIPAL FUND 2 - Form N-CSR

is to apply conservative risk-management principles to help minimize volatility.

Building on this tradition, we today offer a range of high quality equity and fixed-income solutions that are integral to a well-diversified core portfolio. Our clients have come to appreciate this diversity, as well as our continued adherence to proven, long-term investing principles.

Managing \$80 billion in assets, Nuveen Investments offers access to a number of different asset classes and investing solutions through a variety of products. Nuveen Investments markets its capabilities under four distinct brands: Nuveen, a leader in tax-free investments; NWQ, a leader in value-style equities; Rittenhouse, a leader in growth-style equities; and Symphony, a leading institutional manager of market-neutral alternative investment portfolios.
