...YOUR WINDOW TO THE LATEST, MOST UP-TO-DATE INFORMATION ABOUT THE ADVENT
CLAYMORE CONVERTIBLE SECURITIES AND INCOME FUND II

The shareholder report you are reading right now is just the beginning of the story. Online at www.guggenheimfunds.com/agc, you will find:

- Daily, weekly and monthly data on share prices, net asset values, distributions and more
- Portfolio overviews and performance analyses
- Announcements, press releases and special notices
- Fund and adviser contact information

Advent Capital Management and Guggenheim Investments are continually updating and expanding shareholder information services on the Fund's website, in an ongoing effort to provide you with the most current information about how your Fund's assets are managed, and the results of our efforts. It is just one more way we are working to keep you better informed about your investment in the Fund.

April 30,
2012

DEAR SHAREHOLDER

We thank you for your investment in the Advent Claymore Convertible Securities and Income Fund II (the “Fund”), formerly known as Advent/Claymore Global Convertible Securities & Income Fund. This report covers the Fund’s performance for the semiannual fiscal period ended April 30, 2012.

Advent Capital Management, LLC serves as the Fund’s Investment Manager. Based in New York, New York, with additional investment personnel in London, England, Advent is a credit-oriented firm specializing in the management of global convertible, high-yield and equity securities across three lines of business—long-only strategies, hedge funds and closed-end funds. As of April 30, 2012, Advent managed approximately \$5.9 billion in assets.

Guggenheim Funds Investment Advisors, LLC (the “Investment Adviser”) serves as the investment adviser to the Fund. The Investment Adviser is an affiliate of Guggenheim Partners, LLC, a global diversified financial services firm with more than \$130 billion in assets under management and supervision.

The Fund’s investment objective is to provide total return through a combination of capital appreciation and current income. Under normal market conditions, the Fund will invest at least 50% of its managed assets in convertible securities, which are often lower grade securities; the Fund may invest up to 40% of its managed assets in lower-grade non-convertible income securities. In November 2011, the Fund’s Board of Trustees (“Trustees”) approved a change to eliminate the previous guideline that the Fund invest at least 50% of its Managed Assets in foreign securities. Further, the Trustees also approved a change to eliminate a guideline that the Fund invest in the securities of issuers located in at least three different countries. The Investment Manager believes that the Fund’s operating flexibility will be enhanced by these changes, which took effect February 28, 2012. Reflecting these changes, the Fund has changed its name to Advent Claymore Convertible Securities and Income Fund II.

For the six-month period ended April 30, 2012, the Fund generated a total return based on market price of 2.89% and a return of 3.39% based on net asset value (“NAV”). As of April 30, 2012, the Fund’s market price of \$6.72 represented a discount of 7.95% to NAV of \$7.30. As of October 31, 2011, the Fund’s market price of \$6.87 represented a discount of 7.16% to NAV of \$7.40. All Fund returns cited—whether based on NAV or market price—assume the reinvestment of all distributions. The market value of the Fund’s shares fluctuates from time to time, and it may be higher or lower than the Fund’s NAV.

The Fund paid monthly dividends of \$0.0664 in November and December 2011 and in January 2012. In February 2012, the Fund announced a new regular monthly distribution rate of \$0.0470, effective with the February 2012 distribution. The change in the distribution rate was made in an effort to more closely align the earnings potential of the Fund’s investments with its distribution rate, while also seeking to provide investors with greater long-term total return potential. The most recent dividend represents an annualized distribution rate of 8.39% based on the Fund’s most recent market price of \$6.72 as of April 30, 2012. There is no guarantee of any future distributions or that the current returns and distribution rate will be maintained.

We encourage shareholders to consider the opportunity to reinvest their distributions from the Fund through the Dividend Reinvestment Plan (“DRIP”), which is described in detail on page 36 of this report. When shares trade at a discount to NAV, the DRIP takes advantage of the discount by reinvesting the monthly dividend distribution in common shares of the Fund purchased in the market at a price less than NAV. Conversely, when the market price of the Fund’s common shares is at a premium above NAV, the DRIP reinvests participants’ dividends in newly-issued common shares at NAV, subject to an Internal Revenue Service (“IRS”) limitation that the purchase price cannot be more than 5% below the market price per share. The DRIP provides a cost-effective means to accumulate additional shares and enjoy the benefits of compounding returns over time.

41 AGC I ADVENT CLAYMORE CONVERTIBLE SECURITIES AND INCOME FUND II SEMIANNUAL
REPORT

QUESTIONS & ANSWERS

April 30, 2012

Advent Claymore Convertible Securities and Income Fund II, formerly known as Advent/Claymore Global Convertible Securities & Income Fund (the “Fund”) is managed by a team of seasoned professionals at Advent Capital Management, LLC (“Advent” or the “Investment Manager”), led by Tracy V. Maitland, Advent’s President and Chief Investment Officer. In the following interview, Mr. Maitland discusses the global convertible securities and high-yield markets and the performance of the Fund during the six-month period ended April 30, 2012.

Please describe the Fund’s objective and management strategies.

The Fund’s investment objective is to provide total return through a combination of capital appreciation and current income. Under normal market conditions, the Fund will invest at least 80% of its managed assets in a diversified portfolio of convertible securities and non-convertible income-producing securities, each of U.S. and non-U.S. issuers. Within this general investment policy, the Fund will follow, under normal market conditions, the following investment parameters:

- The Fund will invest at least 50% of its managed assets in convertible securities; and
- The Fund may invest up to 40% of its managed assets in non-convertible income-producing securities.

The portion of the Fund’s managed assets invested in convertible securities, non-convertible income-producing securities and foreign securities will vary from time to time, subject to the foregoing parameters and consistent with the Fund’s investment objective, changes in equity prices and interest rates and other economic and market factors. The Fund may invest in securities of any credit quality, including securities that are of below investment grade quality. Investing in below investment grade securities may increase the level of risk in the portfolio, as these securities are issued by companies that are considered less financially strong than issuers of investment-grade securities. This risk is addressed through rigorous credit research. Each issuer’s financial statements are carefully scrutinized, and every effort is made to avoid securities of weaker companies.

In November 2011, the Fund’s Board of Trustees (“Trustees”) approved a change to eliminate the previous guideline that the Fund invest at least 50% of its managed assets in foreign securities. Further, the Trustees also approved a change to eliminate a guideline that the Fund invest in the securities of issuers located in at least three different countries. The Investment Manager believes that the Fund’s operating flexibility will be enhanced by these changes, which took effect February 28, 2012. Reflecting these changes, the Fund has changed its name to Advent Claymore Convertible Securities and Income Fund II.

In furtherance of the Fund’s investment objective, the Fund may engage in an option strategy of writing (selling) covered call options on up to 25% of the securities held in the Fund’s portfolio in an effort to generate current gains from option premiums as a means to enhance distributions payable to the holders of common shares.

The Fund currently uses financial leverage through Auction Market Preferred Shares (“AMPSSM”). It may also use financial leverage through borrowing or the issuance of commercial paper or other forms of debt, through reverse repurchase agreements, dollar rolls or similar transactions or through a combination of the foregoing.

Although the use of financial leverage by the Fund may create an opportunity for increased returns for common shareholders, it also results in additional risks and can magnify the effect of any losses. If the income and gains earned

on securities purchased with the financial leverage proceeds are greater than the cost of the financial leverage, the common shareholders' return will be greater than if financial leverage had not been used. Conversely, if the income and gains from the securities purchased with the proceeds of financial leverage are less than the cost of the financial leverage, common shareholders' return will be less than if financial leverage had not been used. There is no assurance that a financial leveraging strategy will be successful.

Please discuss the economic and market environment over the first half of the Fund's fiscal year.

The U.S. economy finally seems to be in a sustainable recovery, as evidenced by improvement in non-farm payrolls, falling unemployment rates and a reduction in consumers' debt service obligations as a percentage of income. A better employment environment has contributed to improved consumer sentiment and positive trends in retail sales. Industrial production has been showing year-to-year gains, and there have even been some signs of acceleration in housing starts, which marks the first sustained good news in the housing market in several years. In late April 2012, the Department of Commerce reported real growth in gross domestic product (GDP) at an annual rate of 2.2% for the first quarter of 2012, and that followed an even stronger growth rate of 3.0% in the fourth quarter of 2011. Some near-term caution is warranted, as recent economic news has been somewhat less positive, indicating a lack of upside potential to published expectations for growth in 2012. The consensus among business economists seems to be that real growth for the full year 2012 will be in the range of 2.5% and 3.0%.

News from international markets has included positive developments. Many of the concerns about sovereign debt of European nations that gripped investors in the summer of 2011 seemed to dissipate early in 2012 as European nations agreed on a plan to disburse further funds to Greece, and the European central bank agreed to provide longer-term loans to banks to reduce the potential of a liquidity squeeze and a market panic. Recent political turmoil in Greece may also dissipate. Central banks of several key emerging markets, including China and Brazil, reversed earlier moves to tighten monetary policy to combat inflation by taking easing

QUESTIONS & ANSWERS continued

April 30, 2012

measures in recent months. These changes have positive implications for demand for exports from developed nations.

Most U.S. market indices, both equity and fixed-income, posted strong returns for the six-month period ended April 30, 2012. The S&P 500 Index, which is generally regarded as a good indicator of the return from larger-capitalization U.S. stocks, returned 12.77% for this six-month period. Most international markets had positive returns, but were not nearly as strong as the U.S. market. Return of the Morgan Stanley Capital International Europe-Australasia-Far East Index (the "MSCI EAFE") Index, which is composed of approximately 1,100 companies in 20 developed countries in Europe and the Pacific Basin, was 2.69% for the six months ended April 30, 2012.

Return of the Merrill Lynch All U.S. Convertibles Index was 6.52%, and return of the Merrill Lynch Global 300 Convertibles Index was 5.21% for the six months ended April 30, 2012. In 2011, convertible securities underperformed most other asset classes, largely because the equity securities underlying the convertible issues did not generally perform as well as larger-capitalization stocks. Performance of convertibles began to improve in December 2011, and convertibles continued to perform well through the first quarter of 2012, as both credit and equity markets advanced.

Most bond investments also delivered positive returns during the six months ended April 30, 2012. Return of the Barclays U.S. Aggregate Bond Index (the "Barclays Aggregate"), which measures return of the U.S. investment-grade and government bond market as a whole, was 2.44% for the April 30, 2012. Return of the Merrill Lynch High Yield Master II Index, which measures performance of the U.S. high-yield bond market, was 6.45% for the same period.

How did the Fund perform in this environment?

For the six-month period ended April 30, 2012, the Fund generated a total return based on market price of 2.89% and a return of 3.39% based on NAV. As of April 30, 2012, the Fund's market price of \$6.72 represented a discount of 7.95% to NAV of \$7.30. As of October 31, 2011, the Fund's market price of \$6.87 represented a discount of 7.16% to NAV of \$7.40. All Fund returns cited—whether based on net asset value ("NAV") or market price—assume the reinvestment of all distributions. The market price and NAV of the Fund's shares fluctuate from time to time, and the Fund's market price may be higher or lower than its NAV.

Please discuss the Fund's distributions.

The Fund paid monthly dividends of \$0.0664 in November and December 2011 and in January 2012. In February 2012, the Fund announced a new regular monthly distribution rate of \$0.0470, effective with the February 2012 distribution. The change in the distribution rate was made in an effort to more closely align the earnings potential of the Fund's investments with its distribution rate, while also seeking to provide investors with greater long-term total return potential.

The most recent dividend represents an annualized distribution rate of 8.39% based on the Fund's most recent market price of \$6.72 as of April 30, 2012. There is no guarantee of any future distributions or that the current returns and distribution rate will be maintained.

How was the Fund's portfolio allocated among asset classes and geographically during the six months ended April 30, 2012?

Changes in the asset mix during the six months through April 30, 2012, reflected ongoing actions taken by the Investment Manager to reduce the Fund's risk profile. At the end of the prior fiscal year, October 31, 2011, convertible bonds represented 66.7% of total investments, and convertible preferred stocks represented 12.2%, so that the total exposure to convertibles was 78.9%. High yield bonds represented 14.5%, equities 3.3%, and other investments 3.3%. These allocations were adjusted as stronger capital markets provided opportunities to reduce risk.

As of April 30, 2012, convertible securities had been reduced to 61.4% of the Fund's portfolio, with the vast majority of the convertible investment in bonds, which represented 57.8% of total investments. Convertible preferred stocks represented only 3.6% of total investments. High yield bonds represented 31.1%, equities 2.5%, and other investments 5.0% of total investments, respectively.

The major change over the last six months was a reduction in the portion of the portfolio invested in convertible preferred shares. The reason is that convertible preferreds tend to exhibit less of the asymmetry that is a desirable feature of convertible securities than convertible bonds. The asymmetry means that the securities capture much of the upside if the underlying stocks go up but do not go down as much as equities in a falling market. The purpose of this shift was to reduce risk. In order to maintain the same level of income, most of the allocation to convertible preferreds was replaced with high-yielding straight debt.

Reflecting the change in investment policy that no longer requires the Fund to invest at least 50% of its assets in foreign securities, exposure to Europe was reduced, and the proportion of the Fund invested in North America was increased. As of April 30, 2012, 76.1% of the Fund's total investments were invested in North America, compared with 51.3% as of October 31, 2011. Since inception, the Fund has been managed with a global approach, seeking out the best companies in industry groups that are considered attractive, with secondary consideration given to where they are based. With problems in both Asia and Europe hurting markets in those regions, the Investment Manager has deemed it advisable to redeploy some of the proceeds of sales of securities from these regions into U.S. investments. The Investment Manager continues to believe that the U.S. convertible market generally offers more attractive opportunities than other world markets because U.S. convertibles typically offer superior upside/downside asymmetry, including a potentially more rewarding combination of higher yields and lower conversion premiums.

QUESTIONS & ANSWERS continued

April 30, 2012

What were the major securities holdings that affected the Fund's performance?

Among the top performing holdings were Gilead Sciences, Inc., a research-based biopharmaceutical company (2.0% of long-term investments at period end); Illumina, Inc., a U.S.-based biotechnology research systems company (1.9% of long-term investments at period end); TUI Travel PLC, a UK-based leisure travel company (not held in the portfolio at period end); and Aberdeen Asset Management PLC, an international asset management company based in Scotland (not held in the portfolio at period end).

In 2011 Gilead acquired Pharmasset, Inc., a clinical-stage pharmaceutical company that had interesting vaccines for Hepatitis C. Gilead stock was penalized at the time because investors felt that Gilead had paid too much for Pharmasset. Early in 2012, Gilead stock rose on positive news about one of Pharmasset's new drugs; the stock subsequently corrected again on negative news. The Fund was able to benefit from moving in and out of Gilead bonds, as the stock was quite volatile over this period.

Illumina makes gene sequencing technology systems that are sold to universities and pharmaceutical companies as they research ways to use DNA to create new drugs. The stock performed very well in 2011, as it had one of the highest growth rates in the industry. In January 2012, after the stock dropped, the company was approached with an offer to sell itself to Roche Holding AG, a Swiss pharmaceutical company (not held in the portfolio at period end). With convertible bonds, there is often a feature called a change of control put that allows investors to sell convertibles at par to an acquiring company in the event of a change of control. A portion of the Fund's position in Illumina was sold just below par. Then, later after Illumina shareholders rejected Roche's offer, the bonds traded down and the Fund again purchased them.

TUI Travel PLC, which is a leading provider of prepaid planned vacation packages in Europe, is partially owned by TUI AG, a German holding company engaged in the tourism sector, focusing on the markets of Central, Northern and Western Europe. One reason for investing in TUI Travel was the belief that TUI AG might eventually sell one of their other assets, raising capital that could be used to purchase the minority stake in TUI Travel. Also, a buying opportunity was at one point created by weakness in bonds of TUI Travel despite the company's creditworthiness, because of credit problems suffered by other companies in the travel industry. TUI Travel performed well as a result of positive events for both the company's shares and its debt.

Aberdeen manages money for a number of European, Asian and American clients such as pension funds and endowments. The firm experienced strong inflows of cash and margin expansion, resulting from strong investment performance during the period. Also, Aberdeen may be acquired at some point; some Swiss and Japanese financial institutions currently hold minority stakes in Aberdeen and have expressed further interest in the firm. The Fund's holdings of Aberdeen convertible bonds performed well as Aberdeen stock rose.

Among the positions that detracted from performance were a mandatory convertible preferred of Citigroup Inc, a diversified financial services company (0.2% of long-term investments at period end); convertible bonds of Goldcorp Inc., a gold mining company based in Canada (1.6% of long-term investments at period end); and bonds of Central European Media Enterprises (CETV), a media and entertainment company active in eastern Europe (not held in the portfolio at period end).

Citigroup experienced no dramatic event other than general weakness in financial stocks. The company's return on equity continues to be challenged by a combination of the need to reduce leverage and competitive pressures that are keeping fees low for many of their businesses.

Goldcorp stock performed poorly, as did most commodity stocks when commodity prices moved lower; additionally Goldcorp reported disappointing earnings. A modest rise in interest rates and strength in the dollar put pressure on the price of gold, which of course offers investors no interest income.

CETV, which is partially owned by Time Warner Inc., a U.S.-based a media and entertainment company (not held in the portfolio at period end), operates broadcast, content and new media businesses in Hungary, Poland and other countries in central and eastern Europe. Economic weakness in its market area hurt CETV's revenue and the underlying credit; this position has been sold.

How has the Fund's leverage strategy affected performance?

The Fund utilizes leverage (borrowing) as part of its investment strategy, to finance the purchase of additional securities that provide increased income and potentially greater appreciation potential to common shareholders than could be achieved from a portfolio that is not leveraged. The Fund currently implements its leverage strategy through Auction Market Preferred Shares ("AMPSSM") which are floating rate securities. During the period, the Fund entered into certain transactions in an effort to lock in these low rates. As interest rates fell further, the Fund experienced a loss on these transactions and exited the position. See Note 6(e) Summary of Derivatives Information on page 32 of the Notes to Financial Statements. The Fund's leverage outstanding as of April 30, 2012, was \$170 million, approximately 42% of the Fund's total managed assets. Since the Fund's portfolio returned more than the cost of leverage during this period, the leverage contributed to the performance of the common shares.

The Investment Manager continually evaluates the effectiveness of the Fund's leverage program and explores possible new ways to utilize leverage. There is no guarantee that the Fund's leverage strategy will be successful, and the Fund's use of leverage may cause the Fund's NAV and market price of common shares to be more volatile. Leverage adds value only when the return on securities purchased exceeds the cost of leverage.

QUESTIONS & ANSWERS continued

April 30, 2012

What is the current outlook for the markets and the Fund?

Advent is cautiously optimistic about the direction of the economy and securities markets and continues to see opportunities in convertible securities and high-yield bonds. A valuable feature of convertible securities is the asymmetry they offer investors, meaning that the securities capture much of the upside if the underlying stocks go up but do not go down as much as equities in a falling market.

In an atmosphere of considerable uncertainty, the Investment Manager has taken action to create more of a cushion against the possibility of a down market than in the past. This was accomplished by having a greater portion of the Fund invested in straight fixed income corporate bonds and, in the convertible portion, by favoring convertible bonds while reducing the exposure to convertible preferreds, which have the highest volatility among convertible issues.

A distinguishing feature of this Fund is its solid emphasis on convertible securities. While there are many funds that are designated as convertible funds, most competing funds place more emphasis on high yield bonds. Advent believes that this Fund offers the dual advantages of yield from convertible securities and equity participation. As world equity markets rise, the equity sensitivity of a portfolio of convertible securities increases. When the equity markets are weak, convertibles' declining sensitivity and interest income mitigate the downside risk.

Advent believes that, over the long term, careful security selection and asset allocation will help the Fund's performance by providing favorable returns in rising markets and muted exposure to equity price declines during weak markets.

Index Definitions

Indices are unmanaged and it is not possible to invest directly in any index.

S&P 500 Index is a capitalization-weighted index of 500 stocks. The index is designed to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries.

The MSCI EAFE Index is a free float-adjusted market capitalization weighted index designed to reflect the movements of stock markets in developed countries of Europe and the Pacific Basin. The index is calculated in U.S. dollars and is constructed to represent about 60% of market capitalization in each country.

The Barclays Capital U.S. Aggregate Bond Index covers the U.S. dollar-denominated, investment-grade, fixed rate, taxable bond market of SEC-registered securities. The Index includes bonds from the Treasury, government-related, corporate, mortgage-backed securities (agency fixed-rate and hybrid ARM passthroughs), asset-backed securities and collateralized mortgage-backed securities sectors.

The Merrill Lynch All U.S. Convertibles Index is comprised of approximately 500 issues of convertible bonds and preferred stock of all qualities.

The Merrill Lynch Global 300 Convertibles Index measures performance of the global market for convertible securities.

Merrill Lynch High Yield Master II Index is a commonly used benchmark index for high yield corporate bonds.

The Merrill Lynch Global High Yield Index measures performance of the global market for high-yield bonds.

AGC Risks and Other Considerations

The views expressed in this report reflect those of the Portfolio Managers only through the report period as stated on the cover. These views are subject to change at any time, based on market and other conditions and should not be construed as a recommendation of any kind. The material may also contain forward-looking statements that involve risk and uncertainty, and there is no guarantee they will come to pass. There can be no assurance that the Fund will achieve its investment objectives. The value of the Fund will fluctuate with the value of the underlying securities. Historically, closed-end funds often trade at a discount to their net asset value. The Fund is subject to investment risk, including the possible loss of the entire amount that you invest. Past performance does not guarantee future results.

Convertible Securities. The Fund is not limited in the percentage of its assets that may be invested in convertible securities. Convertible securities generally offer lower interest or dividend yields than non-convertible securities of similar quality. The market values of convertible securities tend to decline as interest rates increase and, conversely, to increase as interest rates decline. However, the convertible security's market value tends to reflect the market price of the common stock of the issuing company when that stock price is greater than the convertible's "conversion price," which is the predetermined price at which the convertible security could be exchanged for the associated stock.

Structured and Synthetic Convertible Securities Risk. The value of structured convertible securities can be affected by interest rate changes and credit risks of the issuer. Such securities may be structured in ways that limit their potential for capital appreciation and the entire value of the security may be at a risk of loss depending on the performance of the underlying equity security. Structured convertible securities may be less liquid than other convertible securities. The value of a synthetic convertible security will respond differently to market fluctuations than a convertible security because a synthetic convertible security is composed of two or more separate securities, each with its own market value. In addition, if the value of the underlying common stock or the level of the index involved in the convertible component falls below the exercise price of the warrant or option, the warrant or option may lose all value.

Interest Rate Risk. Convertible securities and non-convertible income producing securities are subject to certain risks, including (i) if interest rates go up, the value of convertible securities and non-convertible income-producing securities in the Fund's portfolio generally will decline; (ii) during periods of declining interest rates, the issuer of a security may exercise its option to prepay principal earlier than scheduled, forcing the Fund to reinvest in lower yielding securities (call or prepayment risk); and (iii) during periods of rising interest rates, the average life of certain types of securities may be extended because of slower than expected principal payments (extension risk).

QUESTIONS & ANSWERS continued

April 30, 2012

Credit Risk. Credit risk is the risk that one or more securities in the Fund's portfolio will decline in price, or fail to pay interest or principal when due, because the issuer of the security experiences a decline in its financial status. The Fund's investments in convertible and non-convertible debt securities involve credit risk. However, in general, lower rated securities carry a greater degree of risk that the issuer will lose its ability to make interest and principal payments, which could have a negative impact on the Fund's net asset value or dividends.

Lower Grade Securities Risks. Investing in lower grade securities (commonly known as "junk bonds") involves additional risks, including credit risk. Credit risk is the risk that one or more securities in the Fund's portfolio will decline in price, or fail to pay interest or principal when due, because the issuer of the security experiences a decline in its financial status.

Preferred Securities Risks. There are special risks associated with investing in preferred securities, including risks related to deferral, noncumulative dividends, subordination, liquidity, limited voting rights and special redemption rights.

Foreign Securities and Emerging Markets Risk. Investing in non-U.S. issuers may involve unique risks, such as currency, political, economic and market risk. In addition, investing in emerging markets entails additional risk including, but not limited to (1) news and events unique to a country or region (2) smaller market size, resulting in lack of liquidity and price volatility (3) certain national policies which may restrict the Fund's investment opportunities.

Smaller Company Risk. The general risks associated with corporate income-producing and equity securities are particularly pronounced for securities issued by companies with smaller market capitalizations. These companies may have limited product lines, markets or financial resources, or they may depend on a few key employees. As a result, they may be subject to greater levels of credit, market and issuer risk. Securities of smaller companies may trade less frequently and in lesser volume than more widely held securities and their values may fluctuate more sharply than other securities. Companies with medium-sized market capitalizations may have risks similar to those of smaller companies.

Risk Associated with the Fund's Covered Call Option Writing Strategy. The ability of the Fund to achieve its investment objective of providing total return through a combination of current income and capital appreciation is partially dependent on the successful implementation of its covered call option strategy. There are significant differences between the securities and options markets that could result in an imperfect correlation between these markets, causing a given transaction not to achieve its objectives. A decision as to whether, when and how to use options involves the exercise of skill and judgment, and even a well conceived transaction may be unsuccessful to some degree because of market behavior or unexpected events. As the writer of a covered call option, the Fund forgoes, during the option's life, the opportunity to profit from increases in the market value of the security covering the call option above the sum of the premium and the strike price of the call, but has retained the risk of loss should the price of the underlying security decline.

Leverage Risk. Certain risks are associated with the leveraging of common stock. Both the net asset value and the market value of shares of common stock may be subject to higher volatility and a decline in value.

Illiquid Investments. The Fund may invest without limit in illiquid securities. The Fund may also invest without limit in Rule 144A Securities. Although many of the Rule 144A Securities in which the Fund invests may be, in the view of the Investment Manager, liquid, if qualified institutional buyers are unwilling to purchase these Rule 144A Securities, they may become illiquid. Illiquid securities may be difficult to dispose of at a fair price at the times when the Fund believes it is desirable to do so. The market price of illiquid securities generally is more volatile than that of more liquid securities, which may adversely affect the price that the Fund pays for or recovers upon the sale of illiquid securities.

Auction Market Preferred Shares (AMPS) Risk. The AMPS are redeemable, in whole or in part, at the option of the Fund on any dividend payment date for the AMPS, and are subject to mandatory redemption in certain circumstances. The AMPS are not listed on an exchange. You may buy or sell AMPS only through an order placed at an auction with or through a broker/dealer that has entered into an agreement with the auction agent and the Fund or in a secondary market maintained by certain broker/dealers. These broker/dealers are not required to maintain this market, and it may not provide you with liquidity. The AMPS market continues to remain illiquid as auctions for nearly all AMPS continue to fail. A failed auction is not a default, nor does it require the redemption of a fund's auction-rate preferred shares. Provisions in the Fund's offering documents provide a mechanism to set a maximum rate in the event of a failed auction, and, thus, investors will continue to be entitled to receive payment for holding these AMPS.

In addition to the risks described above, the Fund is also subject to: Foreign Currency Risk, Derivatives Risk, Equity Securities Risk, Counterparty Risk, Liquidity Risk, REIT, Mortgage-Related and Asset-Backed Securities Risks, Income Trust and Master Limited Partnership Risks, Dividend Capture Trading Risk, Reinvestment Risk, Management Risk, Market Disruption Risk, and Anti-Takeover Provisions. Please see www.guggenheimfunds.com/agc for a more detailed discussion about Fund risks and considerations.

~ The principal amount is denominated in U.S. Dollars unless otherwise noted.

* Ratings shown are per Standard & Poor's, Moody's or Fitch. Securities classified as NR are not rated. (For securities not rated by Standard & Poor's Rating Group, the rating by Moody's Investor Services, Inc. is provided. Likewise, for securities not rated by Standard & Poor's Rating Group and Moody's Investor Services, Inc., the rating by Fitch Ratings is provided.) All ratings are unaudited. The ratings apply to the credit worthiness of the issuers of the underlying securities and not to the Fund or its shares.

**Date and price of the earliest optional call or put provision. There may be other call provisions at varying prices at later dates.

*** Less than 0.1%

- (α) Zero coupon bond.
- (β) Securities are exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers. At April 30, 2012 these securities amounted to \$100,263,954, which represents 42.6% of net assets applicable to common shares.
- (χ) Non-income producing as security is in default.
- (δ) “Security is valued in accordance with Fair Valuation procedures established in good faith by the Board of Trustees. The total market value of such securities is \$60,350 which represents less than 0.1% of net assets applicable to common shares.
- (ε) Security is a “Step-up” bond where the coupon increases or steps up at a predetermined date. The rate shown reflects the rate in effect at the end of the reporting period.
- (φ) Security becomes an accreting bond after March 1, 2018 with a 2.00% principal accretion rate.
- (γ) Floating or variable rate coupon. The rate shown is as of April 30, 2012.
- (η) All or a portion of these securities have been physically segregated in connection with forward exchange currency contracts agreements. As of April 30, 2012, the total amount segregated was \$1,670,625.
- (ι) Term loans held by the Fund have a variable interest rate feature which is periodically adjusted based on an underlying interest rate benchmark. In addition, term loans may include mandatory and/or optional prepayment terms. As a result, the actual maturity dates of the loan may be different than the amounts disclosed in the portfolio of investments. Term loans may be considered restricted in that the Fund may be contractually obligated to secure approval from the Agent Bank and/or Borrower prior to the sale or disposition of loan.
- (φ) Security is perpetual and, thus does not have a predetermined maturity date. The coupon rate shown is in effect as of April 30, 2012.
- (κ) All or a portion of this security is segregated as collateral (or potential collateral for future transactions) for written options.
- (λ) Non-income producing security.

See notes to financial statements.

Portfolio turnover rate	106	%	125	%	125	%	166	%	118	%	35	%

- (a) Commencement of investment operations.
- (b) Before reimbursement of offering expenses charged to capital during the period.
- (c) Based on average shares outstanding during the period.
- (d) Total investment return is calculated assuming a purchase of a common share at the beginning of the period and a sale on the last day of the period reported either at net asset value (“NAV”) or market price per share. Dividends and distributions are assumed to be reinvested at NAV for NAV returns or the prices obtained under the Fund’s Dividend Reinvestment Plan for market value returns. Total investment return does not reflect brokerage commissions. A return calculated for a period of less than one year is not annualized.
- (e) Annualized.
- (f) The expense ratio does not reflect fees and expenses incurred indirectly by the Fund as a result of its investment in shares of other investment companies. If these fees were included in the expense ratio, the increase to the expense ratio would be approximately 0.06% for the six months ended April 30, 2012 and 0.0% for the years ended October 31, 2011, 2010, 2009, 2008 and 2007, respectively.

See notes to financial statements.

NOTES TO FINANCIAL STATEMENTS (Unaudited)

April 30, 2012

Note 1 – Organization:

Effective following the close of business on February 28, 2012, Advent/Claymore Global Convertible Securities & Income Fund announced that its name had changed to Advent Claymore Convertible Securities and Income Fund II. Advent Claymore Convertible Securities and Income Fund II (the “Fund”) was organized as a Delaware statutory trust on February 26, 2007. The Fund is registered as a diversified, closed-end management investment company under the Investment Company Act of 1940, as amended.

The Fund’s investment objective is to provide total return, through a combination of capital appreciation and current income. The Fund will pursue its investment objective by investing 80% of its assets in a diversified portfolio of convertible securities and non-convertible income-producing securities, each of U.S. and non-U.S. issuers.

Note 2 – Accounting Policies:

The preparation of the financial statements in accordance with accounting principles generally accepted in the United States of America (“GAAP”) requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from these estimates.

The following is a summary of significant accounting policies followed by the Fund:

(a) Valuation of Investments

Equity securities listed on an exchange are valued at the last reported sale price on the primary exchange on which they are traded. Equity securities traded on an exchange for which there are no transactions on a given day are valued at the mean of the closing bid and asked prices. Securities traded on NASDAQ are valued at the NASDAQ Official Closing Price. Equity securities not listed on a securities exchange or NASDAQ are valued at the mean of the closing bid and asked prices. Debt securities are valued by independent pricing services or dealers using the mean of the closing bid and asked prices for such securities or, if such prices are not available, at prices for securities of comparable maturity, quality and type. If sufficient market activity is limited or does not exist, the pricing providers or broker-dealers may utilize proprietary valuation models which consider market characteristics such as benchmark yield curves, option-adjusted spreads, credit spreads, estimated default rates, coupon rates, anticipated timing of principal repayments, underlying collateral, or other unique security features in order to estimate relevant cash flows, which are then discounted to calculate a security’s fair value. Exchange Traded funds are valued at the last sales price or official closing price on the exchange where the security is principally traded. The swaps are valued daily by independent pricing services or dealers using the mid price. Forward exchange currency contracts are valued daily at current exchange rates. Futures contracts are valued using the settlement price established each day on the exchange on which they are traded. Exchange-traded options and notes are valued at the closing price, if traded that day. If not traded, they are valued at the mean of the bid and asked prices on the primary exchange on which they are traded. Short-term securities with remaining maturities of 60 days or less are valued at amortized cost, which approximates market value. The Fund values money market funds at net asset value.

For those securities where quotations or prices are not available, the valuations are determined in accordance with procedures established in good faith by management and approved by the Board of Trustees (“Trustees”). Valuations in accordance with these procedures are intended to reflect each security’s (or asset’s) “fair value”. Fair value is defined as

the price that the Fund would receive to sell an investment or pay to transfer a liability in an orderly transaction with an independent buyer in the principal market, or in the absence of a principal market, the most advantageous market for the investment or liability. Each such determination is based on a consideration of all relevant factors, which are likely to vary from one security to another. Examples of such factors may include, but are not limited to: (i) the type of security, (ii) the initial cost of the security, (iii) the existence of any contractual restrictions on the security's disposition, (iv) the price and extent of public trading in similar securities of the issuer or of comparable companies, (v) quotations or evaluated prices from broker-dealers and/or pricing services, (vi) information obtained from the issuer, analysts, and/or the appropriate stock exchange (for exchange traded securities), (vii) an analysis of the company's financial statements, and (viii) an evaluation of the forces that influence the issuer and the market(s) in which the security is purchased and sold (e.g. the existence of pending merger activity, public offerings or tender offers that might affect the value of the security).

GAAP requires disclosure of fair valuation measurements as of each measurement date. In compliance with GAAP, the Fund follows a fair value hierarchy that distinguishes between market data obtained from independent sources (observable inputs) and the Fund's own market assumptions (unobservable inputs). These inputs are used in determining the value of the Fund's investments and summarized in the following fair value hierarchy:

Level 1 – quoted prices in active markets for identical securities

Level 2 – quoted prices in inactive markets or other significant observable inputs (e.g. quoted prices for similar securities; interest rates; prepayment speed; credit risk; yield curves)

Level 3 – significant unobservable inputs (e.g. discounted cash flow analysis; non-market based methods used to determine fair value)

Observable inputs are those based upon market data obtained from independent sources, and unobservable inputs reflect the Fund's own assumptions based on the best information available. A financial instrument's level within the fair value hierarchy is based on the lowest level of any input both individually and in aggregate that is significant to the fair value measurement. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

NOTES TO FINANCIAL STATEMENTS (Unaudited) continued

April 30, 2012

The following are certain inputs and techniques that are generally utilized to evaluate how to classify each major type of investment in accordance with GAAP.

Equity Securities (Common and Preferred Stock) – Equity securities traded in active markets where market quotations are readily available are categorized as Level 1. Equity securities traded in inactive markets and certain foreign equities are valued using inputs which include broker quotes, prices of securities closely related where the security held is not trading but the related security is trading, and evaluated price quotes received from independent pricing providers. To the extent that these inputs are observable, such securities are categorized as Level 2. To the extent that these inputs are unobservable, such securities are categorized as Level 3.

Convertible Bonds & Notes – Convertible bonds and notes are valued by independent pricing providers who employ matrix pricing models utilizing various inputs such as market prices, broker quotes, prices of securities with comparable maturities and qualities, and closing prices of corresponding underlying securities. To the extent that these inputs are observable, such securities are categorized as Level 2. To the extent that these inputs are unobservable, such securities are categorized as Level 3.

Corporate Bonds & Notes – Corporate bonds and notes are valued by independent pricing providers who employ matrix pricing models utilizing various inputs such as market prices, broker quotes, and prices of securities with comparable maturities and qualities. To the extent that these inputs are observable, such securities are categorized as Level 2. To the extent that these inputs are unobservable, such securities are categorized as Level 3.

The following table represents the Fund's investments carried on the Statement of Assets and Liabilities by caption and by level within the fair value hierarchy as of April 30, 2012:

26 1 AGC 1 ADVENT CLAYMORE CONVERTIBLE SECURITIES AND INCOME FUND II SEMIANNUAL REPORT

NOTES TO FINANCIAL STATEMENTS (Unaudited) continued

April 30, 2012

The fair value estimate for ShengdaTech, Inc. was determined in accordance with procedures established in good faith by management and approved by the Board of Trustees. There were various factors considered in reaching fair value determination including, but not limited to, the following: the type of security, public information obtained from the issuer and data provided by various brokers.

The following table presents the activity of the Fund's investment measured at fair value using significant unobservable inputs (Level 3 valuation) for the six months ended April 30, 2012.

Level 3 Holdings	Corporate Bonds
Beginning Balance at 10/31/11	\$430
Net Realized Gain/Loss	-
Change in Unrealized Gain/Loss	(370)*
Purchases	-
Sales	-
Transfers In	-
Transfers Out	-
Ending Balance at 4/30/12	\$60

*Amount represents the change in unrealized gain (loss) for ShengdaTech, Inc. as of April 30, 2012.

(b) Investment Transactions and Investment Income

Investment transactions are accounted for on the trade date. Realized gains and losses on investments are determined on the identified cost basis. Dividend income is recorded on the ex-dividend date and interest income is recorded on an accrual basis. Discounts on debt securities purchased are accreted to interest income over the lives of the respective securities using the effective interest method. Premiums on debt securities purchased are amortized to interest income up to the next call date of the respective securities using the effective interest method.

(c) Restricted Cash

A portion of cash on hand is pledged with a broker for current or potential holdings, which includes forward exchange currency contracts.

(d) Convertible Securities

The Fund invests in preferred stocks and fixed-income securities which are convertible into common stock. Convertible securities may be converted either at a stated price or rate within a specified period of time into a specified number of shares of common stock. Traditionally, convertible securities have paid dividends or interest greater than on the related common stocks, but less than fixed income non-convertible securities. By investing in a convertible security, the Fund may participate in any capital appreciation or depreciation of a company's stock, but to a lesser degree than if it had invested in that company's common stock. Convertible securities rank senior to common stock in a corporation's capital structure and, therefore, entail less risk than the corporation's common stock.

(e) Currency Translation

Assets and liabilities denominated in foreign currencies are translated into U.S. dollars at the mean of the bid and asked price of respective exchange rates on the last day of the period. Purchases and sales of investments denominated in foreign currencies are translated at the exchange rate on the date of the transaction.

The Fund does not isolate that portion of the results of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from changes in market prices of securities held. Such fluctuations are included with the net realized and unrealized gain or loss from investments.

Foreign exchange realized gain or loss resulting from holding of foreign currency, expiration of a currency exchange contract, difference in exchange rates between the trade date and settlement date of an investment purchased or sold, and the difference between dividends or interest actually received compared to the amount shown in the Fund's accounting records on the date of receipt is shown as net realized gains or losses on foreign currency transactions in the Fund's Statement of Operations.

Foreign exchange unrealized gain or loss on assets and liabilities, other than investments, is shown as unrealized appreciation (depreciation) on foreign currency translation in the Fund's Statement of Operations.

(f) Covered Call and Put Options

The Fund will pursue its objective by employing an option strategy of writing (selling) covered call options or put options on up to 25% of the securities held in the portfolio of the Fund. The Fund seeks to generate current gains from option premiums as a means to enhance distributions payable to shareholders.

When an option is written, the premium received is recorded as an asset with an equal liability and the liability is subsequently marked to market to reflect the current market value of the option written. These liabilities are reflected as options written, at value, in the Statement of Assets and Liabilities. Premiums received from writing options which expire unexercised are recorded on the expiration date as a realized gain. The difference between the premium received and the amount paid on effecting a closing purchase transaction, including brokerage commissions, is also treated as a realized gain, or if the premium is less than the amount paid for the closing purchase transactions, as a realized loss. If a call option is exercised, the premium is added to the proceeds from the sale of the underlying security in determining whether there has been a realized gain or loss.

(g) Forward Exchange Currency Contracts

The Fund entered into forward exchange currency contracts in order to hedge its exposure to changes in foreign currency exchange rates on its foreign portfolio holdings, to hedge certain firm purchases and sales commitments denominated in foreign currencies and for investment purposes. Forward exchange currency contracts are agreements between two parties to buy and sell currencies at a set price on a future date. Fluctuations in the value of open forward exchange currency contracts are recorded for financial reporting purposes as unrealized appreciation and depreciation by the Fund until the contracts are closed. When the contracts are closed, realized gain and losses are recorded and included on the Statement of Operations.

NOTES TO FINANCIAL STATEMENTS (Unaudited) continued

April 30, 2012

Forward exchange currency contracts involve elements of both market and credit risk in excess of the amounts reflected on the Statement of Assets and Liabilities.

(h) Futures Contracts

The Fund uses futures contracts to hedge against market and other risks in the Fund's portfolio. A futures contract represents a commitment for the future purchase or sale of an asset at a specified price on a specified date. Fluctuations in the value of open futures contracts are recorded for financial reporting purposes as unrealized appreciation or depreciation by the Fund.

Futures contracts involve, to varying degrees, risk of loss in excess of the amounts reflected in the financial statements. In addition, there is the risk that the Fund may not be able to enter into a closing transaction because of an illiquid secondary market.

(i) Swaps

A swap is an agreement to exchange the return generated by one instrument for the return generated by another instrument. The Fund may enter into swap agreements to manage its exposure to interest rates and/or credit risk as well as to attempt to enhance return. The swaps are valued daily by independent pricing services or dealers using the mid price and any unrealized gain or loss is included in the Statement of Assets and Liabilities. Gain or loss is realized upon periodic payments and ultimately upon the termination of the swap and is equal to the difference between the Fund's basis in the swap and the proceeds of the closing transaction, including any fees. During the period that the swap agreement is open, the Fund may be subject to risk from the potential inability of the other party (the "Counterparty") to meet the terms of the agreement. The swaps involve elements of both market and credit risk in excess of the amounts reflected on the Statement of Assets and Liabilities. Upon termination of a swap agreement, a payable to or receivable from the swap counterparty is established on the Statement of Assets and Liabilities to reflect the net gain/loss, including interest income/expense, on terminated swap positions, according to the terms of the swap agreement.

Realized gain (loss) upon termination of swap contracts is recorded on the Statement of Operations. Fluctuations in the value of swap contracts are recorded as a component of net change in unrealized appreciation (depreciation) of swap contracts. Upfront premiums paid and/or received by the Fund are recognized as a realized gain or loss when the contract matures or is terminated. Net periodic payments received by the Fund are included as part of realized gain (loss) and, in the case of accruals for periodic payments, are included as part of unrealized appreciation (depreciation) on the Statement of Operations.

(j) Term Loans

Term loans in which the Fund typically invests are not listed on a securities exchange or board of trade. Term loans are typically bought and sold by institutional investors in individually negotiated transactions. The term loan market generally has fewer trades and less liquidity than the secondary market for other types of securities. Due to the nature of the term loan market, the actual settlement date may not be certain at the time of purchase or sale. Interest income on term loans is not accrued until settlement date. Typically, term loans are valued by independent pricing services using broker quotes.

(k) Risks and Other Considerations

In the normal course of business, the Fund trades financial instruments and enters into financial transactions where risk of potential loss exists due to, among other things, changes in the market (market risk) or the potential inability of a counterparty to meet the terms of an agreement (counterparty risk). The Fund is also exposed to other risks such as, but not limited to, concentration, interest rate, credit and financial leverage risks.

Concentration of Risk. It is the Fund's policy to invest a significant portion of its assets in convertible securities. Although convertible securities do derive part of their value from that of the securities into which they are convertible, they are not considered derivative financial instruments. However, certain of the Fund's investments include features which render them more sensitive to price changes in their underlying securities. Consequently, this exposes the Fund to greater downside risk than traditional convertible securities, but still less than that of the underlying common stock.

Credit Risk. Credit risk is the risk that one or more of the securities in the Fund's portfolio will decline in price, or fail to pay interest and principal when due, because the issuer of the security experiences a decline in its financial status. In general, lower rated securities carry a greater degree of risk that the issuer will lose its ability to make interest and principal payments, which could have a negative impact on the Fund's net asset value or dividends.

Interest Rate Risk. Convertible and nonconvertible income securities are subject to certain interest rate risks. If interest rates go up, the value of convertible and nonconvertible income securities in the Fund's portfolio generally will decline. Also during periods of rising interest rates, the average life of certain types of securities may be extended because of slower than expected principal payments. This may lock in a below market interest rate, increase the security's duration (the estimated period until the security is paid in full) and reduce the value of the security. This is known as extension risk. During periods of declining interest rates, the issuer of a security may exercise its option to prepay principal earlier than scheduled, forcing the Fund to reinvest in lower yielding securities. This is known as call or prepayment risk. Lower grade securities have call features that allow the issuer to repurchase the security prior to its stated maturity. An issuer may redeem a lower grade security if the issuer can refinance the security at a lower cost due to declining interest rates or an improvement in the credit standing of the issuer.

Structured and Synthetic Convertible Securities Risk. The value of structured convertible securities can be affected by interest rate changes and credit risks of the issuer. Such securities may be structured in ways that limit their potential for capital appreciation and the entire value of the security may be at a risk of loss depending on the performance of the underlying equity security. Structured convertible securities may be less liquid than other convertible securities. The value of a synthetic convertible security

will respond differently to market fluctuations than a convertible security because a synthetic convertible security is composed of two or more separate securities, each with its own market value. In addition, if the value of the underlying common stock or the level of the index involved in the convertible component falls below the exercise price of the warrant or option, the warrant or option may lose all value.

Foreign Securities and Emerging Markets Risk. Investing in non-U.S. issuers may involve unique risks, such as currency, political, economic and market risk. In addition, investing in emerging markets entails additional risk including, but not limited to: news and events unique to a country or region; smaller market size, resulting in lack of liquidity and price volatility; and certain national policies which may restrict the Fund's investment opportunities; less uniformity in accounting and reporting requirements; unreliable securities valuation; and custody risk.

Financial Leverage Risk. Certain risks are associated with the leveraging of common stock. Both the net asset value and the market value of shares of common stock may be subject to higher volatility and a decline in value.

(l) Distributions to Shareholders

The Fund declares and pays monthly dividends to common shareholders. These dividends consist of investment company taxable income, which generally includes qualified dividend income, ordinary income and short-term capital gains. Any net realized long-term gains are distributed annually to common shareholders. Dividends and distributions to preferred shareholders are accrued and determined as described in Note 7.

Distributions to shareholders are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from GAAP.

(m) Recent Accounting Pronouncements

On May 12, 2011, the Financial Accounting Standards Board ("FASB") issued ASU 2011-04, modifying Topic 820, Fair Value Measurements and Disclosures. At the same time, the International Accounting Standards Board ("IASB") issued International Financial Reporting Standard ("IFRS") 13, Fair Value Measurement. The objective by the FASB and IASB is convergence of their guidance on fair value measurements and disclosures.

Specifically, the ASU requires reporting entities to disclose (i) the amounts of any transfers between Level 1 and Level 2, and the reasons for the transfers, (ii) for Level 3 fair value measurements, quantitative information about significant unobservable inputs used, (iii) a description of the valuation processes used by the reporting entity and, (iv) a narrative description of the sensitivity of the fair value measurement to changes in unobservable inputs if a change in those inputs might result in a significantly higher or lower fair value measurement. The effective date of the ASU is for interim and annual periods beginning after December 15, 2011, and is therefore not effective for the current fiscal period. Guggenheim Funds Investment Advisors, LLC (the "Adviser") is in the process of assessing the impact of the updated standards on the Fund's financial statements.

Note 3 – Investment Management and Advisory Agreements and other agreements:

Pursuant to an Investment Advisory Agreement (the "Agreement") between the Adviser and the Fund, the Adviser furnishes offices, necessary facilities and equipment, provides administrative services to the Fund, oversees the

Edgar Filing: Advent Claymore Convertible Securities & Income Fund II - Form N-CSRS

activities of Advent Capital Management, LLC (the “Investment Manager”), provides personnel and compensates the Trustees and Officers of the Fund who are its affiliates. As compensation for these services, the Fund pays the Adviser an annual fee, payable monthly in arrears, at an annual rate equal to 0.40% of the average Managed Assets during such month. Managed Assets means the total of assets of the Fund (including any assets attributable to any preferred shares to the use of financial leverage, if any) less the sum of accrued liabilities.

Pursuant to an Investment Management Agreement between the Investment Manager and the Fund, the Fund has agreed to pay the Investment Manager an annual fee, payable monthly in arrears, at an annual rate equal to 0.60% of the average Managed Assets during such month for the services and facilities provided by the Investment Manager to the Fund. These services include the day-to-day management of the Fund’s portfolio of securities, which includes buying and selling securities for the Fund and investment research.

The Bank of New York Mellon (“BNY”) acts as the Fund’s custodian, accounting agent and auction agent. As custodian, BNY is responsible for the custody of the Fund’s assets. As accounting agent, BNY is responsible for maintaining the books and records of the Fund’s securities and cash. As auction agent, BNY is responsible for conducting the auction of the preferred shares.

Guggenheim Funds Investment Advisors, LLC provides fund administration services to the Fund. As compensation for its services performed under the Administration Agreement, Guggenheim Funds Investment Advisors, LLC receives an administration fee payable monthly at the annual rate set forth below as a percentage of the average daily managed assets of the Fund:

Managed Assets	Rate
First \$200,000,000	0.0275%
Next \$300,000,000	0.0200%
Next \$500,000,000	0.0150%
Over \$1,000,000,000	0.0100%

Certain Officers and Trustees of the Fund are also Officers and Directors of the Adviser or Investment Manager. The Fund does not compensate its Officers or Trustees who are Officers of the aforementioned firms.

Note 4 – Federal Income Taxes:

The Fund intends to continue to comply with the requirements of Subchapter M of the Internal Revenue Code of 1986, as amended, applicable to regulated investment companies. Accordingly, no provision for U.S. federal income taxes is required. In addition, by distributing substantially all of its ordinary income and long-term capital gains, if any, during each calendar year, the Fund avoids a 4% federal excise tax that is assessed on the amount of the under distribution.

NOTES TO FINANCIAL STATEMENTS (Unaudited) continued

April 30, 2012

At April 30, 2012, the cost and related gross unrealized appreciation and depreciation on investments for tax purposes, excluding swaps, written options, futures contracts, forward exchange currency contracts and foreign currency translations are as follows:

Cost of Investments for Tax Purposes	Gross Tax Unrealized Appreciation	Gross Tax Unrealized Depreciation	Net Tax Unrealized Appreciation on Investments	Net Tax Unrealized Depreciation on Derivatives and Foreign Currency
\$410,849,576	\$13,889,195	\$(11,322,305)	\$2,566,890	\$(452,950)

As of October 31, 2011 (the most recent fiscal year end for federal income tax purposes), the components of accumulated earnings/(loss) (excluding paid-in-capital) on a tax basis were as follows:

Undistributed Ordinary Income/(Accumulated Ordinary Loss)	Undistributed Long-Term Gains/(Accumulated Capital Loss)
\$ –	\$(313,624,710)

The differences between book basis and tax basis unrealized appreciation/(depreciation) is attributable to the tax deferral of losses on wash sales, additional income accrued for tax purposes on certain convertible securities and swaps.

At October 31, 2011 (the most recent fiscal year end for federal income tax purposes), for federal income tax purposes, the Fund had a capital loss carryforward of \$313,624,710 available to offset possible future capital gains. Of the capital loss carryforward, \$155,887,528 expires on October 31, 2016, \$155,338,152 expires on October 31, 2017, and \$2,399,030 expires on October 31, 2019. Per the Regulated Investment Company Modernization Act of 2010, capital loss carryforwards generated in taxable years beginning after December 22, 2010 must be fully used before capital loss carryforwards generated in taxable years prior to December 22, 2010; therefore, under circumstances, capital loss carryforwards available as of the report date, if any, may expire unused.

For the year ended October 31, 2011 the tax character of distributions paid, as reflected in the Statement of Changes in Net Assets, was \$13,632,746 of ordinary income and \$14,543,319 of return of capital.

For all open tax years and all major jurisdictions, management of the Fund has concluded that there are no significant uncertain tax positions that would require recognition in the financial statements. Uncertain tax positions are tax positions taken or expected to be taken in the course of preparing the Fund's tax returns that would not meet a

more-likely-than-not threshold of being sustained by the applicable tax authority and would be recorded as a tax expense in the current year. Open tax years are those that are open for examination by taxing authorities (i.e. generally the last four tax year ends and the interim tax period since then). Furthermore, management of the Fund is also not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months.

Note 5 – Investments in Securities:

For the six months ended April 30, 2012, purchases and sales of investments, other than short-term securities, were \$408,384,788 and \$412,178,540 respectively.

Note 6 – Derivatives:

(a) Covered Call and Put Options

An option on a security is a contract that gives the holder of the option, in return for a premium, the right to buy from (in the case of a call) or sell to (in the case of a put) the writer of the option the security underlying the option at a specified exercise or “strike” price. The writer of an option on a security has the obligation upon exercise of the option to deliver the underlying security upon payment of the exercise price (in the case of a call) or to pay the exercise price upon delivery of the underlying security (in the case of a put).

There are several risks associated with transactions in options on securities. As the writer of a covered call option, the Fund forgoes, during the option’s life, the opportunity to profit from increases in the market value of the security covering the call option above the sum of the premium and the strike price of the call, but has retained the risk of loss should the price of the underlying security decline. A writer of a put option is exposed to the risk of loss if the fair value of the underlying security declines, but profits only to the extent of the premium received if the underlying security increases in value. The writer of an option has no control over the time when it may be required to fulfill its obligation as writer of the option. Once an option writer has received an exercise notice, it cannot effect a closing purchase transaction in order to terminate its obligation under the option and must deliver the underlying security at the exercise price.

The Fund entered into written option contracts for the six months ended April 30, 2012.

Details of the transactions were as follows:

	Number of Contracts	Premiums Received
Options outstanding, beginning of year	–	\$ –
Options written during the period	27,490	4,368,785
Options expired during the period	–	–
Options closed during the period	(23,986)	(3,681,444)
Options assigned during the period	–	–
Options outstanding, end of period	3,504	\$ 687,341

(b) Forward Exchange Currency Contracts

A forward exchange currency contract is a commitment to purchase or sell a foreign currency on a future date at a negotiated forward rate. The gain or loss arising from the difference between the original contracts and the closing of such contracts would be included in net realized gain or loss on foreign currency transactions.

Risk may arise from the potential inability of a Counterparty to meet the terms of a contract and from unanticipated movements in the value of a foreign currency relative to the U.S. dollar. The face or contract amount, in U.S. dollars, reflects the total exposure the Fund has in that particular currency contract.

						(621,312)
Total unrealized depreciation for forward exchange currency contracts						\$(450,863)

(c) Swaps

Swap agreements are contracts between parties in which one party agrees to make periodic payments to the Counterparty based on the change in market value or level of a specified rate, index or asset. In return, the Counterparty agrees to make periodic payments to the first party based on the return of a different specified rate, index or asset. Swap agreements will usually be done on a net basis, the Fund receiving or paying only the net amount of the two payments. The net amount of the excess, if any, of each Fund's obligations over its entitlements with respect to each swap is accrued on a daily basis and an amount of cash or highly liquid securities having an aggregate value at least equal to the accrued excess is maintained in an account at the Fund's custodian bank.

The Fund is party to various derivative contracts governed by International Swaps and Derivatives Association Master Agreements (“ISDA agreements”). The Fund’s ISDA agreements, which are separately negotiated with each Counterparty, typically contain provisions allowing, absent other considerations, a Counterparty to exercise rights, to the extent not otherwise waived, against the Fund in the event the Fund does not meet certain collateral requirements or the Fund’s net assets decline over time by a pre-determined percentage or fall below a pre-determined floor. With respect to certain counterparties, collateral posted to the Fund is held in a segregated account by the Fund’s custodian and with respect to those amounts which can be sold or repledged, are presented in the Fund’s Statement of Assets and Liabilities in Restricted Cash. Collateral pledged by the Fund is segregated by the Fund’s custodian and is identified in the Fund’s Portfolio of Investments. Collateral can be in the form of cash or securities as agreed to by the Fund and the applicable Counterparty. Collateral requirements are determined based on the Fund’s net position with each Counterparty. The ISDA agreements also contain provisions, absent other conditions, for the Fund to exercise rights, to the extent not otherwise waived, against counterparties (i.e. decline in a Counterparty’s credit rating below a specified level). Such rights for both the Counterparty and the Fund often include the ability to terminate (i.e., close out) open contracts at prices which may favor the Counterparty, which could have an adverse effect on the Fund. The ISDA agreements with certain counterparties allow the Fund and Counterparty to offset certain derivative instruments’ payables or receivables with collateral posted to a segregated custody account.

Credit default swap transactions involve the Fund’s agreement to exchange the credit risk of an issuer. A buyer of a credit default swap is said to buy protection by paying periodic fees in return for a contingent payment from the seller if the issuer has a credit event such as bankruptcy, a failure to pay outstanding obligations or deteriorating credit while the swap is outstanding. A seller of a credit default swap is said to sell protection and thus collects the periodic fees and profits if the credit of the issuer remains stable or improves while the swap is outstanding but the seller in a credit default swap contract would be required to pay an agreed upon amount, which approximates the notional amount of the swap, to the buyer in the event of an adverse credit event of the issuer.

At April 30, 2012, there were no swap agreements outstanding.

NOTES TO FINANCIAL STATEMENTS (Unaudited) continued

April 30, 2012

(d) Futures Contracts

A futures contract is an agreement to buy or sell a specified underlying security for a fixed price at a future date. Upon entering into a futures contract, the Fund is required to make an initial margin deposit with the broker an amount of cash or securities equal to a specified percentage of the contract amount. Subsequent payments (“variation margin”) are made or received by the Fund each day, depending on the daily fluctuation of the value of the contract. Variation margin is recorded as a receivable or payable on the Statement of Assets and Liabilities. During the period the futures contracts is open, changes in the value of the contract are recorded as unrealized gain (loss) on the Statement of Operations. When the futures contract is closed or expired, the Fund records a realized gain (loss) on the Statement of Operations.

Futures contracts involve, to varying degrees, risk of loss in excess of the amounts reflected in the financial statements. In addition, there is the risk that the Fund may not be able to enter into a closing transaction because of an illiquid secondary market.

At April 30, 2012, there were no futures contracts outstanding.

(e) Summary of Derivatives Information

The Fund is required by GAAP to disclose: a) how and why a fund uses derivative instruments, b) how derivatives instruments are accounted for, and c) how derivative instruments affect a fund’s financial position, results of operations and cash flows.

The following table presents the types of derivatives in the Fund by location as presented on the Statement of Assets Liabilities as of April 30, 2012.

Statement of Asset and Liability Presentation of Fair Values of Derivative Instruments:
(amount in thousands)

Derivatives not accounted for as hedging instruments	Asset Derivatives Statement of Assets and Liabilities Location		Liability Derivatives Statement of Assets and Liabilities Location	
		Fair Value		Fair Value
Foreign exchange risk	Unrealized appreciation on forward exchange currency contracts	\$172	Unrealized depreciation on forward exchange currency contracts	\$ 623
Equity risk		–	Options Written	693
Total		\$172		\$1,316

The following table presents the effect of Derivatives Instruments on the Statement of Operations for the six months ended April 30, 2012.

Effect of Derivative Instruments on the Statement of Operations:
(amount in thousands)

Amount of Realized Gain (Loss) on Derivatives

Average Settlement Value Sold	\$4,047,037
Ending Settlement Value Purchased	\$16,913,724
Ending Settlement Value Sold	\$49,846,461

Swaps:

The Fund decreased the volume of activity in swaps during the six months ended April 30, 2012 with an average notional balance of approximately \$5,066,016 during the six months ended April 30, 2012. As of April 30, 2012, there were no swap agreements outstanding.

Futures Contracts:

As of April 30, 2012, there were no futures contracts outstanding.

Note 7 – Capital:

Common Shares

The Fund has an unlimited number of common shares, \$0.001 par value, authorized and 32,240,720 issued and outstanding.

32 1 AGC 1 ADVENT CLAYMORE CONVERTIBLE SECURITIES AND INCOME FUND II SEMIANNUAL
REPORT

NOTES TO FINANCIAL STATEMENTS (Unaudited) continued

April 30, 2012

Transactions in common shares were as follows:

	Six Months Ended April 30, 2012	Year Ended October 31, 2011
Beginning shares	32,240,720	32,111,474
Shares issued through dividend reinvestment	–	129,246
Ending shares	32,240,720	32,240,720

Preferred Shares

On June 12, 2007, the Fund's Trustees authorized the issuance of Preferred Shares, as part of the Fund's leverage strategy. Preferred Shares issued by the Fund have seniority over the common shares.

On September 14, 2007, the Fund issued 3,400 shares of Preferred Shares Series T7 and 3,400 shares of Preferred Shares Series W7, each with a liquidation value of \$25,000 per share plus accrued dividends.

Dividends are accumulated daily at a rate set through an auction process and are paid monthly. Distributions of net realized capital gains, if any, are made annually. The broad auction-rate preferred securities market, including the Fund's AMPS, has experienced considerable disruption since mid-February 2008. The result has been failed auctions on nearly all auction-rate preferred shares, including the Fund's AMPS. A failed auction is not a default, nor does it require the redemption of the Fund's AMPS.

Provisions in the AMPS offering documents establish a maximum rate in the event of a failed auction. The AMPS reference rate is the LIBOR Rate for a dividend period of fewer than 365 days. For AAA rated AMPS, the maximum rate, for auctions for which the Fund has not given notice that the auction will consist of net capital gains or other taxable income, is the higher of the reference rate times 125% or the reference rate plus 1.25%. Distributions of net realized gains, if any, are made annually.

For the six months ended April 30, 2012, the annualized dividend rates ranged from:

	High	Low	At April 30, 2012
Series T7	1.47%	1.44%	1.44%
Series W7	1.46%	1.44%	1.44%

The Fund is subject to certain limitations and restrictions while Preferred Shares are outstanding. Failure to comply with these limitations and restrictions could preclude the Fund from declaring any dividends or distributions to common shareholders or repurchasing common shares and/or could trigger the mandatory redemption on Preferred Shares at their liquidation value.

Effective June 14, 2012, the Fund terminated Moody's Investor Services as a rating agency for the AMPS. Fitch Ratings continues to rate the AMPS as of this date.

Preferred Shares, which are entitled to one vote per share, generally vote with the common stock but vote separately as a class to elect two Trustees and on any matters affecting the rights of the Preferred Shares.

Note 8 – Indemnifications:

In the normal course of business, the Fund enters into contracts that contain a variety of representations, which provide general indemnifications. The Fund's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Fund that have not yet occurred. However, the Fund expects the risk of loss to be remote.

Note 9 – Regulatory Matters:

The Adviser has notified the Fund of the following:

In 2009, the Securities and Exchange Commission ("SEC") staff conducted an examination of the Adviser and in 2010 reported to the Adviser that the SEC staff believed certain deficiencies existed in connection with the management of a liquidated closed-end fund formerly advised by the Adviser and a third-party sub-adviser. The fund in question is neither the Fund nor any other fund advised by Advent. In April 2012, the Adviser and a current and a former employee of the Adviser each received separate letters from the SEC staff (commonly referred to as a Wells Notice) stating that the staff intends to recommend to the SEC that action be brought against the Adviser and the current and former employee for allegedly failing to cause the fund to adequately disclose certain investments made by the fund and providing the recipients of the letters with an opportunity to respond to the potential allegations.

The Adviser has replied to the Wells Notice and responded to the SEC staff's allegations. Furthermore, the Adviser has advised the Fund that it believes its disclosures were proper and that resolution of this matter will not materially and adversely affect its financial condition or its ability to act as an investment adviser to the Fund, although there can be no assurance as to this outcome.

Note 10 – Subsequent Events:

Subsequent to April 30, 2012, the Fund declared on May 1, 2012, a monthly dividend to common shareholders of \$0.0470 per common share. The dividend is payable on May 31, 2012 to shareholders of record on May 15, 2012.

On June 1, 2012, the Fund declared a monthly dividend to common shareholders of \$0.0470 per common share. The dividend is payable on June 29, 2012 to shareholders of record on June 15, 2012.

The Fund has performed an evaluation of subsequent events through the date of issuance of this report and has determined that there are no material events that would require disclosure other than the events disclosed above.

DIVIDEND REINVESTMENT PLAN (Unaudited)

April 30, 2012

Unless the registered owner of common shares elects to receive cash by contacting Computershare Shareowner Services LLC, (the "Plan Administrator"), all dividends declared on common shares of the Fund will be automatically reinvested by the Plan Administrator, for shareholders in the Fund's Dividend Reinvestment Plan (the "Plan"), in additional common shares of the Fund. Participation in the Plan is completely voluntary and may be terminated or resumed at any time without penalty by notice if received and processed by the Plan Administrator prior to the dividend record date; otherwise such termination or resumption will be effective with respect to any subsequently declared dividend or other distribution. Some brokers may automatically elect to receive cash on your behalf and may re-invest that cash in additional common shares of the Fund for you. If you wish for all dividends declared on your common shares of the Fund to be automatically reinvested pursuant to the Plan, please contact your broker.

The Plan Administrator will open an account for each common shareholder under the Plan in the same name in which such common shareholder's common shares are registered. Whenever the Fund declares a dividend or other distribution (together, a "Dividend") payable in cash, non-participants in the Plan will receive cash and participants in the Plan will receive the equivalent in common shares. The common shares will be acquired by the Plan Administrator for the participants' accounts, depending upon the circumstances described below, either (i) through receipt of additional unissued but authorized common shares from the Fund ("Newly Issued Common Shares") or (ii) by purchase of outstanding common shares on the open market ("Open-Market Purchases") on the New York Stock Exchange or elsewhere. If, on the payment date for any Dividend, the closing market price plus estimated brokerage commission per common share is equal to or greater than the net asset value per common share, the Plan Administrator will invest the Dividend amount in Newly Issued Common Shares on behalf of the participants. The number of Newly Issued Common Shares to be credited to each participant's account will be determined by dividing the dollar amount of the Dividend by the net asset value per common share on the payment date; provided that, if the net asset value is less than or equal to 95% of the closing market value on the payment date, the dollar amount of the Dividend will be divided by 95% of the closing market price per common share on the payment date. If, on the payment date for any Dividend, the net asset value per common share is greater than the closing market value plus estimated brokerage commission, the Plan Administrator will invest the Dividend amount in common shares acquired on behalf of the participants in Open-Market Purchases.

If, before the Plan Administrator has completed its Open-Market Purchases, the market price per common share exceeds the net asset value per common share, the average per common share purchase price paid by the Plan Administrator may exceed the net asset value of the common shares, resulting in the acquisition of fewer common shares than if the Dividend had been paid in Newly Issued Common Shares on the Dividend payment date. Because of the foregoing difficulty with respect to Open-Market Purchases, the Plan provides that if the Plan Administrator is unable to invest the full Dividend amount in Open-Market Purchases during the purchase period or if the market discount shifts to a market premium during the purchase period, the Plan Administrator may cease making Open-Market Purchases and may invest the uninvested portion of the Dividend amount in Newly Issued Common Shares at net asset value per common share at the close of business on the Last Purchase Date provided that, if the net asset value is less than or equal to 95% of the then current market price per common share; the dollar amount of the Dividend will be divided by 95% of the market price on the payment date.

The Plan Administrator maintains all shareholders' accounts in the Plan and furnishes written confirmation of all transactions in the accounts, including information needed by shareholders for tax records. Common shares in the account of each Plan participant will be held by the Plan Administrator on behalf of the Plan participant, and each shareholder proxy will include those shares purchased or received pursuant to the Plan. The Plan Administrator will

forward all proxy solicitation materials to participants and vote proxies for shares held under the Plan in accordance with the instruction of the participants.

There will be no brokerage charges with respect to common shares issued directly by the Fund. However, each participant will pay a pro rata share of brokerage commission incurred in connection with Open-Market Purchases. The automatic reinvestment of Dividends will not relieve participants of any Federal, state or local income tax that may be payable (or required to be withheld) on such Dividends.

The Fund reserves the right to amend or terminate the Plan. There is no direct service charge to participants with regard to purchases in the Plan; however, the Fund reserves the right to amend the Plan to include a service charge payable by the participants.

All correspondence or questions concerning the Plan should be directed to the Plan Administrator, Computershare Shareowner Services, LLC, P.O. Box 358015, Pittsburgh, PA 15252- 8015; Attention Shareholder Services Department, Phone Number: (866)488-3559.

INVESTMENT MANAGEMENT AGREEMENT AND
INVESTMENT ADVISORY AGREEMENT RE-APPROVAL

April 30, 2012

ADVENT CLAYMORE CONVERTIBLE SECURITIES & INCOME FUND II

Section 15(c) of the Investment Company Act of 1940, as amended (the“1940 Act”) contemplates that the Board of Trustees (the “Board”) of Advent Claymore Convertible Securities & Income Fund II (the “Fund”), including a majority of the Trustees who have no direct or indirect interest in the investment management agreement and are not “interested persons” of the Fund, as defined in the 1940 Act (the“ Independent Trustees”), is required to annually review and re-approve the terms of the Fund’s existing investment management agreement and investment advisory agreement and approve any newly proposed terms therein. In this regard, the Board reviewed and re-approved, during the most recent six month period covered by this report, the investment management agreement (the “Management Agreement”) with Advent Capital Management, LLC (“Advent”) and the investment advisory agreement (the “Advisory Agreement”) with Guggenheim Funds Investment Advisors, LLC (“Guggenheim Funds”), for the Fund.

More specifically, at a meeting held on March 29, 2012, the Board, including the Independent Trustees advised by their independent legal counsel, considered the factors and reached the conclusions described below relating to the re-approval of the Management Agreement and the Advisory Agreement.

Nature, Extent and Quality of Services

The Board received and considered various data and information regarding the nature, extent and quality of services provided to the Fund by Advent and Guggenheim Funds under the Management Agreement and Advisory Agreement. The Board reviewed and analyzed the responses of Advent and Guggenheim Funds to a detailed series of requests submitted by the Independent Trustees’ independent legal counsel on behalf of such Trustees which included, among other things, information about the background and experience of the senior management and the expertise of, and amount of attention devoted to the Fund by personnel of Advent and Guggenheim Funds. In this regard, the Board specifically reviewed the qualifications, background and responsibilities of the officers primarily responsible for day-to-day portfolio management services for the Fund.

The Board evaluated the ability of Advent and Guggenheim Funds, including their resources, reputation and other attributes, to attract and retain highly qualified investment professionals, including research, advisory and supervisory personnel. Accordingly, the Board considered information regarding the compensation structures for the personnel of Advent involved in the management of the Fund and the personnel of Guggenheim Funds involved in the management of the Fund. The Board considered information regarding personnel changes at Advent and Guggenheim Funds and additional information they deemed relevant.

Based on the above factors, together with those referenced below, the Board concluded that it was satisfied with the nature, extent and quality of the investment management services provided to the Fund by Advent and the investment advisory services provided to the Fund by Guggenheim Funds.

Fund Performance and Expenses

The Board considered the performance results for the Fund on a market price and net asset value basis over various time periods. It also considered these results in comparison to the performance results of a group of other closed-end funds that were respectively determined to be similar to the Fund in terms of investment strategy (the “Peer Group”).

The Board recognized that the number of other funds in the Peer Group was low. Despite the Fund's underperformance in certain periods in relation to the Peer Group, the Board took into account the fact that for a variety of reasons, including that a Peer Group fund may be managed in a way that is substantially different than the Fund, Peer Group comparisons may have limited usefulness. The Board considered the steps management is taking to address the Fund's underperformance and will continue to monitor performance on an on-going basis. Performance was also compared against various indices. The Board also reviewed information about the discount at which the Fund's shares have traded as compared with its peers.

The Board received and considered statistical information regarding the Fund's total expense ratio (based on net assets applicable to common shares) and its various components. The Board also considered comparisons of these expenses to the expense information for the Peer Group. The Board recognized that the expense ratio of the Fund (expressed as a percentage of net assets attributable to common shares) was higher than expense ratios of certain Peer Group funds because of the Fund's leverage, and because certain funds in the Peer Group had no leverage or lower leverage and therefore reported lower expense ratios. The Board also noted that expense ratio comparisons with Peer Groups was difficult, because each fund's definition of expenses was different. The Board considered that the Fund benefited from the use of leverage despite the costs.

Based on the above-referenced considerations and other factors, the Board concluded that the overall performance results and expense comparison supported the re-approval of the Investment Management Agreement and the Investment Advisory Agreement.

AGC 1 ADVENT CLAYMORE CONVERTIBLE SECURITIES AND INCOME FUND II SEMIANNUAL REPORT 137

INVESTMENT MANAGEMENT AGREEMENT AND
INVESTMENT ADVISORY AGREEMENT RE-APPROVAL continued

April 30, 2012

Investment Management Fee Rate

The Board reviewed and considered the contractual investment management fee rate for the Fund (collectively the “Management Agreement Rate”) payable by the Fund to Advent and to Guggenheim Funds for investment management and advisory services, respectively. Additionally, the Board received and considered information comparing the Management Agreement Rate (on a stand-alone basis exclusive of service fee/administrative fee rates) with those of the other funds in the Peer Group. The Board concluded that the fees were fair and equitable based on relevant factors, including the Fund’s performance results and total expenses relative to the Peer Group.

Profitability

The Board received and considered an estimated profitability analysis of Advent and Guggenheim Funds based on the Management Agreement Rate. The Board concluded that, in light of the costs of providing investment advisory, investment management and other services to the Fund, the profits and other ancillary benefits that Advent and Guggenheim Funds received with regard to providing these services to the Fund were not unreasonable.

Economies of Scale

The Board received and considered information regarding whether there have been economies of scale with respect to the management of the Fund, whether the Fund has appropriately benefited from any economies of scale, and whether there is potential for realization of any further economies of scale. The Board concluded that the opportunity to benefit from economies of scale was diminished in the context of closed-end funds.

After considering the above described factors and based on the deliberations and their evaluation of the information provided to them, the Board concluded that re-approval of the Investment Management Agreement and the Investment Advisory Agreement was in the best interest of the Fund the its shareholders.

Privacy Principles of the Fund

The Fund is committed to maintaining the privacy of its shareholders and to safeguarding their non-public personal information. The following information is provided to help you understand what personal information the Fund collects, how the Fund protects that information and why, in certain cases, the Fund may share information with select other parties.

Generally, the Fund does not receive any non-public personal information relating to its shareholders, although certain non-public personal information of its shareholders may become available to the Fund. The Fund does not disclose any non-public personal information about its shareholders or former shareholders to anyone, except as permitted by law or as is necessary in order to service shareholder accounts (for example, to a transfer agent or third party administrator).

The Fund restricts access to non-public personal information about its shareholders to employees of the Fund’s investment advisor and its affiliates with a legitimate business need for the information. The Fund maintains physical, electronic and procedural safeguards designed to protect the non-public personal information of its shareholders.

Questions concerning your shares of Advent Claymore Convertible Securities and Income Fund II?

- If your shares are held in a Brokerage Account, contact your Broker.

- If you have physical possession of your shares in certificate form, contact the Fund's Transfer Agent: Computershare Shareowner Services LLC, 480 Washington Boulevard, Jersey City, NJ 07310; (866)488-3359.

This report is sent to shareholders of Advent Claymore Convertible Securities and Income Fund II for their information. It is not a Prospectus, circular or representation intended for use in the purchase or sale of shares of the Fund or of any securities mentioned in this report.

A description of the Fund's proxy voting policies and procedures related to portfolio securities is available without charge, upon request, by calling the Fund at (866)274-2227. Information regarding how the Fund voted proxies for portfolio securities, if applicable, during the most recent 12-month period ended June 30, is also available, without charge and upon request by calling the Fund at (866)274-2227, by visiting Guggenheim Funds website at www.guggenheimfunds.com/agg or by accessing the Funds Form N-PX on the U.S. Securities & Exchange Commission's ("SEC") website at www.sec.gov.

The Fund files its complete schedule of portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form N-Q. The Fund's Form N-Q is available on the SEC website at www.sec.gov or by visiting Guggenheim Funds website at www.guggenheimfunds.com/agg. The Funds Form N-Q may also be viewed and copied at the SEC's Public Reference Room in Washington, DC; information on the operation of the Public Reference Room may be obtained by calling (800) SEC-0330 or at www.sec.gov.

Notice to Shareholders

Notice is hereby given in accordance with Section 23(c) of the Investment Company Act of 1940, as amended, that the Fund may purchase at market prices from time to time shares of its common and preferred stock in the open market or in private transactions.

AGC 1 ADVENT CLAYMORE CONVERTIBLE SECURITIES AND INCOME FUND II SEMIANNUAL REPORT 1 39

ABOUT THE FUND MANAGER

Advent Capital Management, LLC

Advent Capital Management, LLC (“Advent”) is a registered investment adviser, based in New York, which specializes in convertible and high-yield securities for institutional and individual investors. The firm was established by Tracy V. Maitland, a former Director in the Convertible Securities sales and trading division of Merrill Lynch. Advent’s investment discipline emphasizes capital structure research, encompassing equity fundamentals as well as credit research, with a focus on cash flow and asset values while seeking to maximize total return.

Investment Philosophy

Advent believes that superior returns can be achieved while reducing risk by investing in a diversified portfolio of global equity, convertible and high-yield securities. The Fund Manager seeks securities with attractive risk/reward characteristics. Advent employs a bottom-up security selection process across all of the strategies it manages. Securities are chosen from those that the Fund Manager believes have stable-to-improving fundamentals and attractive valuations.

Investment Process

Advent manages securities by using a strict four-step process:

- 1 Screen the convertible and high-yield markets for securities with attractive risk/reward characteristics and favorable cash flows;
- 2 Analyze the quality of issues to help manage downside risk;
- 3 Analyze fundamentals to identify catalysts for favorable performance; and
- 4 Continually monitor the portfolio for improving or deteriorating trends in the financials of each investment.
