Registrant's telephone number, including area code: (312) 917-7700

Date of fiscal year end: May 31

Date of reporting period: November 30, 2014

Form N-CSR is to be used by management investment companies to file reports with the Commission not later than 10 days after the transmission to stockholders of any report that is required to be transmitted to stockholders under Rule 30e-1 under the Investment Company Act of 1940 (17 CFR 270.30e-1). The Commission may use the information provided on Form N-CSR in its regulatory, disclosure review, inspection, and policymaking roles.

A registrant is required to disclose the information specified by Form N-CSR, and the Commission will make this information public. A registrant is not required to respond to the collection of information contained in Form N-CSR unless the Form displays a currently valid Office of Management and Budget ("OMB") control number. Please direct comments concerning the accuracy of the information collection burden estimate and any suggestions for reducing the burden to Secretary, Securities and Exchange Commission, 450 Fifth Street, NW, Washington, DC 20549-0609. The OMB has reviewed this collection of information under the clearance requirements of 44 U.S.C. ss. 3507.

ITEM 1. REPORTS TO STOCKHOLDERS.

---

Nuveen Investments to be acquired by TIAA-CREF

On October 1, 2014, TIAA-CREF completed its previously announced acquisition of Nuveen Investments, Inc., the parent company of your fund's investment adviser, Nuveen Fund Advisors, LLC ("NFAL") and the Nuveen affiliates that act as sub-advisers to the majority of the Nuveen Funds. TIAA-CREF is a national financial services organization with approximately \$840 billion in assets under management as of October 1, 2014 and is a leading provider of retirement services in the academic, research, medical and cultural fields. Nuveen expects to operate as a separate subsidiary within TIAA-CREF's asset management business. Nuveen's existing leadership and key investment teams have remained in place following the transaction.

NFAL and your fund's sub-adviser(s) continue to manage your fund according to the same objectives and policies as before, and there have been no changes to your fund's operations.

Chairman's Letter to Shareholders

Dear Shareholders,

Over the past year, global financial markets were generally strong as stocks of many countries rose due to strengthening economies and abundant central bank support. A low and stable interest rate environment allowed the bond market to generate modest but positive returns.

More recently, markets have been less certain as economic growth is strengthening in some parts of the world, but in other areas recovery has been slow or uneven at best. Despite increasing market volatility, geopolitical turmoil and concerns over rising rates, better-than-expected earnings results and economic data have supported U.S. stocks. Europe continues to face challenges as disappointing growth and inflation measures led the European Central Bank to further cut interest rates. Japan is suffering from the burden of the recent consumption tax as the government's structural reforms continue to steadily progress. Flare-ups in hotspots, such as the ongoing Russia-Ukraine conflict and Middle East, have not yet been able to derail the markets, though that remains a possibility. With all the challenges facing the markets, accommodative monetary policy around the world has helped lessen the impact of these events.

It is in such changeable markets that professional investment management is most important. Investment teams who have experienced challenging markets in the past understand how their asset class can behave in rapidly changing times. Remaining committed to their investment disciplines during these times is a critical component to achieving long-term success. In fact, many strong investment track records are established during challenging periods because experienced investment teams understand that volatile markets place a premium on companies and investment ideas that can weather the short-term volatility. By maintaining appropriate time horizons, diversification and relying on practiced investment teams, we believe that investors can achieve their long-term investment objectives.

As always, I encourage you to communicate with your financial consultant if you have any questions about your investment in a Nuveen Fund. On behalf of the other members of the Nuveen Fund Board, we look forward to continuing to earn your trust in the months and years ahead.

William J. Schneider  
Chairman of the Board  
January 23, 2015

## Portfolio Managers' Comments

Nuveen Georgia Dividend Advantage Municipal Fund 2 (NKG)  
Nuveen Maryland Premium Income Municipal Fund (NMY)  
Nuveen Minnesota Municipal Income Fund (NMS)  
Nuveen Missouri Premium Income Municipal Fund (NOM)  
Nuveen North Carolina Premium Income Municipal Fund (NNC)  
Nuveen Virginia Premium Income Municipal Fund (NPV)

These Funds feature portfolio management by Nuveen Asset Management, LLC, an affiliate of Nuveen Investments, Inc. Portfolio managers Daniel J. Close, CFA, Thomas C. Spalding, CFA, Douglas J. White, CFA and Christopher L. Drahn, CFA, discuss key investment strategies and the six-month performance of these six Nuveen Funds. Dan has managed the Nuveen Georgia and North Carolina Funds since 2007. Tom assumed portfolio management responsibility for the Maryland and Virginia Funds in 2011, Doug has managed the Minnesota Fund since 1993 and Chris has managed the Missouri Fund since 2011.

## Fund Mergers

The Nuveen Minnesota Municipal Income Fund (NMS), which commenced operations on October 6, 2014, was formed from the merger of Minnesota Municipal Income Portfolio Inc. (MXA) and First American Minnesota Municipal Income Fund II (MXN) (the Mergers), both of which had been managed by U.S. Bancorp Asset Management, Inc. and sub-advised by Nuveen Fund Advisors, LLC and Nuveen Asset Management, LLC. MXA is treated as the survivor of the Mergers for accounting and performance reporting purposes. Accordingly, all performance and other information shown for NMS for periods prior to October 6, 2014, is that of MXA. MXA's previous fiscal year end was June 30, 2014, and therefore NMS's reporting period for this report is from July 1, 2014 through November 30, 2014.

What key strategies were used to manage the Funds during the reporting period ended November 30, 2014?

Falling long-term interest rates helped municipal bonds rally during the reporting period. Additional tailwinds came from a supportive fundamental backdrop and demand continuing to outpace supply. In this environment, bond issuers sought to take advantage of declining rates by retiring older bonds and replacing them with newer debt issued at lower rates. The national municipal market saw an increase in the number of current calls during the reporting period. However, individual states experienced varying levels of call activity. Overall, the Funds continued to seek bonds with long-term potential, while managing interest rate risk and keeping the Funds fully invested.

Certain statements in this report are forward-looking statements. Discussions of specific investments are for illustration only and are not intended as recommendations of individual investments. The forward-looking statements and other views expressed herein are those of the portfolio managers as of the date of this report. Actual future results or occurrences may differ significantly from those anticipated in any forward-looking statements, and the views expressed herein are subject to change at any time, due to numerous market and other factors. The Funds disclaim any obligation to update publicly or revise any forward-looking statements or views expressed herein.

Ratings shown are the highest rating given by one of the following national rating agencies: Standard & Poor's (S&P), Moody's Investors Service, Inc. (Moody's) or Fitch, Inc. (Fitch). Credit ratings are subject to change. AAA, AA, A and BBB are investment grade ratings; BB, B, CCC, CC, C and D are below investment grade ratings. Certain bonds backed by U.S. government or agency securities are regarded as having an implied rating equal to the rating of such securities. Holdings designated N/R are not rated by these national rating agencies.

Bond insurance guarantees only the payment of principal and interest on the bond when due, and not the value of the bonds themselves, which will fluctuate with the bond market and the financial success of the issuer and the insurer. Insurance relates specifically to the bonds in the portfolio and not to the share prices of a Fund. No representation is made as to the insurers' ability to meet their commitments.

Refer to the Glossary of Terms Used in this Report for further definition of the terms used within this section.

Portfolio Managers' Comments (continued)

In NMY, NMS and NKG, buying activity was fairly muted. In Maryland, we sought bonds with intermediate to longer maturities and medium to lower credit quality, but new issuance in the state during this reporting period tended to be of higher quality and shorter maturity. That being said, we did find two credits with structure and terms that appealed to our strategy, Western Maryland Health and Howard County Housing. New issues of attractive revenue bonds in Minnesota were also relatively scarce, as has typically been the case in this state. We were able to purchase a handful of new issues in the public power and charter school sectors, as well as a few secondary market issues in the health care and transportation sectors in NMS to help keep it fully invested. NKG also stayed fully invested with the purchases of two local general obligation (GO) bonds, one water and sewer bond and one higher education bond, all in the intermediate to longer maturity range.

The other three Funds saw more diversified buying opportunities during the reporting period. In Virginia, purchases for NPV came from the new issue and secondary markets and were mostly in longer dated credits. Additions to the portfolio included bonds issued for the University of Virginia, Metropolitan Washington D.C. Airports Authority and Winchester Economic Development Authority for Valley Health System, as well as various state and local issuing authorities. Buying activity in NOM during the reporting period represented a range of sectors and credit ratings (AA, A, BBB and non-rated). Our largest purchase was a AA-rated Excelsior Springs sales tax revenue bond. In the electric utility sector, we added a Missouri Joint Municipal Electric Utility Commission Plum Point Project credit. We also bought bonds in the hospital and senior living care credit sectors. In NNC, we bought two higher education bonds, two airport bonds, two appropriation bonds and one water and sewer bond.

In addition, we established a portfolio hedge in both NKG and NNC by purchasing a credit default swap on the debt obligations of the U.S. territory of Puerto Rico. We have previously noted a correlation between the credit quality of Puerto Rico bonds and that of the overall high yield municipal bond market. Given that these portfolios regularly maintain a meaningful stake in BBB-rated and below investment grade rated bonds, we saw this as a way to reduce the Funds' overall risk while continuing to take advantage of opportunities to invest in the lower quality portion of the market. During the reporting period, these swaps had a negligible impact on performance.

Generally, the cash to finance the Funds' purchases came from bonds that were called or, in the case of NMY, NOM and NPV, sold from our Puerto Rico exposure. In NNC, the market's recent strength provided us an opportunity to sell low coupon structures in the health care sector, using the proceeds to buy premium coupon structures in appropriation bonds. Selling activity in NKG and NMS was overall muted during the reporting period.

How did the Funds perform during the reporting period ended November 30, 2014?

The tables in each Fund's Performance Overview and Holding Summaries section of this report provide the Funds' total returns for the five-month, six-month, one-year, five-year and ten-year periods ended November 30, 2014. Each Fund's total returns at common share net asset value (NAV) are compared with the performance of corresponding market indexes and a Lipper classification average.

For the reporting period ended November 30, 2014, the total return at common share NAV for the six Funds exceeded the return for their respective state's S&P Municipal Bond Index as well as the national S&P Municipal Bond Index. For the same period, NKG, NMY, NOM, NNC and NPV lagged the average return for the Lipper Other States Municipal Debt Funds Classification Average, while NMS outperformed this same classification average. Shareholders should note that the performance of the Lipper Other States classification represents the overall average of returns for funds from ten states with a wide variety of municipal market conditions, making direct comparisons less meaningful.

6 Nuveen Investments

---

Key management factors that influenced the Funds' returns during this reporting period included duration and yield curve positioning, credit exposure and sector allocation. In addition, the use of regulatory leverage was an important factor affecting the performance of these Funds. Leverage is discussed in more detail later in the Fund Leverage section of this report.

Municipal bonds with longer maturities outperformed those with shorter maturities, as the municipal yield curve flattened somewhat during the reporting period. The Funds were generally positioned with overweights to the longer portions of the yield curve and underweights to the shorter end of the curve, which was beneficial to performance.

In terms of the credit quality spectrum, lower rated municipal bonds performed better than those with higher grade ratings during this reporting period. Investors' search for yield in the current low rate environment was a boon to lower quality bonds, which tended to offer higher yields in exchange for higher risk. As AAA-rated bonds were the weakest performing category, underweight allocations to these credits in NKG, NMS, NOM and NNC were advantageous to performance. NMS also held an underweight position in AA-rated bonds, which was favorable to results, as this segment also lagged during the reporting period. Additionally, Funds with overweight exposure to medium and lower rated debt, including NMS and NOM, further benefited from the strong relative performance of BBB, BB and non-rated bonds during the reporting period. However, for NPV, credit quality had a neutral impact on performance. NPV's weighting in U.S. guaranteed bonds, which underperformed because they are primarily short-term bonds with high quality ratings, offset gains made elsewhere in the Fund's portfolio.

Sectors that outperformed the municipal market during the reporting period included health care, hospitals and transportation, while pre-refunded and GO bonds were the weakest sectors. NMS was aided by overweight allocations in health care (including hospitals and life care), higher education, housing and industrial development credits, together with underweight positions in state and local GO, dedicated tax (primarily sales tax revenue) and pre-refunded bonds. However, NMS's overweight exposure in public power bonds detracted from performance, as the sector underperformed the benchmark. Positive performance in NPV was driven by an allocation to zero coupon bonds for transportation projects, including toll roads and airports. Because these types of projects are used for long periods of time, their bonds tend to have longer durations, which was favorable during a period when long maturity bonds were in demand from investors. NNC was also positioned with overweight exposure to toll road credits that was beneficial to returns, despite the negative impact of an overweight to pre-refunded bonds. In NKG, overall sector allocation and credit selection hurt performance due to an overweight in pre-refunded bonds and a weak performing health care credit, Ty Cobb Regional Medical Center. NMY's tobacco holdings dampened performance but tuition revenue bonds were positive contributors.

Another major theme affecting the Funds' performance during the reporting period was exposure to Puerto Rico bonds. This was the main detractor from performance for NMY and NOM during the reporting period. However, we note that the negative impact of NMY's Puerto Rico position was somewhat buffered by its holding of American Airlines common stock, which performed well as the company has emerged from bankruptcy. The Fund received American Airlines stock when its holding of bonds issued by Puerto Rico Ports Authority for American Airlines was converted into equity as part of the merger with US Airways, which was completed in December 2013. Over time, we expect to sell these shares and reinvest the proceeds into municipal bonds.

The Puerto Rico bonds were originally added to our portfolios to keep assets fully invested and working for the Funds' as well as to enhance diversity, duration and credit. The Puerto Rico credits offered higher yields, added diversification and triple exemption (i.e., exemption from most federal, state and local taxes). However, Puerto Rico's continued economic weakening, escalating debt service obligations and long standing inability to deliver a balanced budget led to multiple downgrades on its debt over the past two years. Following the latest rating reduction by Moody's in July 2014, Puerto Rico general obligation debt was rated B2/BB+/BB

Portfolio Managers' Comments (continued)

(below investment grade) by Moody's, S&P and Fitch, respectively, with negative outlooks. In late June 2014, Puerto Rico approved new legislation creating a judicial framework and formal process that would allow several of the commonwealth's public corporations to restructure their public debt. As of November 2014, the Nuveen complex held \$71 million in bonds backed by public corporations in Puerto Rico that could be restructured under this legislation, representing less than 0.1% of our municipal assets under management. In light of the evolving economic situation in Puerto Rico, Nuveen's credit analysis of the commonwealth had previously considered the possibility of a default and the restructuring of public corporations and we adjusted our portfolios to prepare for such an outcome, although no such default or restructuring has occurred to date. The Nuveen complex's entire exposure to obligations of the government of Puerto Rico and other Puerto Rico issuers totals 0.35% of assets under management as of November 30, 2014.

NMY, NOM and NPV were active sellers of Puerto Rico paper during the reporting period. NMY reduced its allocation by half, from 9.7% to 5.5% at period end. We trimmed NOM's exposure from 3.2% to 0.5%, which represents a single holding in an insured, senior lien COFINA (sales tax) bond. NPV's weighting was cut from 7.8% to 4.6% by the end of the period. NKG, NMS and NNC did not hold any Puerto Rico bonds during the reporting period.

---

## Fund Leverage

## IMPACT OF THE FUNDS' LEVERAGE STRATEGIES ON PERFORMANCE

One important factor impacting the returns of the Funds relative to their comparative benchmarks was the Funds' use of leverage through their issuance of preferred shares and/or investments in inverse floating rate securities, which represent leveraged investments in underlying bonds. The Funds use leverage because our research has shown that, over time, leveraging provides opportunities for additional income, particularly in the recent market environment where short-term market rates are at or near historical lows, meaning that the short-term rates the Fund has been paying on its leveraging instruments have been much lower than the interest the Fund has been earning on its portfolio of long-term bonds that it has bought with the proceeds of that leverage. However, use of leverage can expose the Fund to additional price volatility. When a Fund uses leverage, the Fund will experience a greater increase in its net asset value if the municipal bonds acquired through the use of leverage increase in value, but it will also experience a correspondingly larger decline in its net asset value if the bonds acquired through leverage decline in value, which will make the Fund's net asset value more volatile, and its total return performance more variable over time. In addition, income in levered funds will typically decrease in comparison to unlevered funds when short-term interest rates increase and increase when short-term interest rates decrease. Leverage had a positive impact on the performance of the Funds over the reporting period.

As of November 30, 2014, the Funds' percentages of leverage are as shown in the accompanying table.

	NKG	NMY	NMS	NOM	NNC	NPV
Effective Leverage*	36.06%	34.54%	33.59%	37.79%	33.46%	37.46%
Regulatory Leverage*	33.52%	32.36%	33.59%	35.07%	33.46%	32.77%

\* Effective Leverage is a Fund's effective economic leverage, and includes both regulatory leverage and the leverage effects of certain derivative and other investments in a Fund's portfolio that increase the Fund's investment exposure. Currently, the leverage effects of Tender Option Bond (TOB) inverse floater holdings are included in effective leverage values, in addition to any regulatory leverage. Regulatory leverage consists of preferred shares issued or borrowings of a Fund. Both of these are part of a Fund's capital structure. Regulatory leverage is subject to asset coverage limits set forth in the Investment Company Act of 1940.

## Fund Leverage (continued)

## THE FUNDS' REGULATORY LEVERAGE

As of November 30, 2014, the Funds have issued and outstanding MuniFund Term Preferred (MTP) Shares, Variable Rate MuniFund Term Preferred (VMTP) Shares and Variable Rate Demand Preferred (VRDP) Shares as shown in the accompanying table.

Series	MTP Shares			NYSE/ NYSE MKT Ticker	VMTP Shares		VRDP Shares		Total
	Shares Issued at Liquidation Value	Annual Dividend Rate			Shares Issued at Liquidation Value	Series	Shares Issued at Liquidation Value	Series	
NKG	—	—	—	2017	\$ 75,000,000	—	—	—	\$ 75,000,000
NMY	—	—	—	2017	\$ 167,000,000	—	—	—	\$ 167,000,000
NMS	—	—	—	2017*	\$ 44,100,000	—	—	—	\$ 44,100,000
				NOM					
NOM	2015	\$ 17,880,000	2.10%	PRC	—	—	—	—	\$ 17,880,000
NNC	—	—	—	2017	\$ 125,000,000	—	—	—	\$ 125,000,000
NPV	—	—	—	—	—	—	1	\$ 128,000,000	\$ 128,000,000

\* Includes VMTP Shares resulting from the Merger.

Refer to Notes to Financial Statements, Note 1 – General Information and Significant Accounting Policies and Note 4 – Fund Shares for further details on MTP, VMTP and VRDP Shares and each Fund's respective transactions.

## Common Share Information

## COMMON SHARE DISTRIBUTION INFORMATION

The following information regarding the Funds' distributions is current as of November 30, 2014. Each Fund's distribution levels may vary over time based on each Fund's investment activity and portfolio investments value changes.

During the current reporting period, each Fund's monthly distributions to common shareholders were as shown in the accompanying table.

Ex-Dividend Date	Per Common Share Amounts					
	NKG	NMY	NMS	NOM	NNC	NPV
June 2014	\$ 0.0535	\$ 0.0555	N/A	\$ 0.0610	\$ 0.0530	\$ 0.0615
July	0.0535	0.0555	\$ 0.0740	0.0610	0.0530	0.0640
August	0.0535	0.0555	0.0715	0.0610	0.0530	0.0640
September	0.0535	0.0555	0.0690	0.0610	0.0530	0.0640
October	0.0535	0.0555	0.1110	0.0610	0.0530	0.0640
November 2014	0.0535	0.0555	0.0690	0.0610	0.0530	0.0640
Market Yield*	5.10%	5.27%	5.56%	4.85%	4.88%	5.73%
Taxable-Equivalent Yield*	7.53%	7.75%	8.57%	7.16%	7.20%	8.44%

\* Market Yield is based on the Fund's current annualized monthly dividend divided by the Fund's current market price as of the end of the reporting period. Taxable-Equivalent Yield represents the yield that must be earned on a fully taxable investment in order to equal the yield of the Fund on an after-tax basis. It is based on a combined federal and state income tax rate of 32.3%, 32.0%, 35.1%, 32.3%, 32.2% and 32.1% for Georgia, Maryland, Minnesota, Missouri, North Carolina and Virginia, respectively. When comparing a Fund to investments that generate qualified dividend income, the Taxable-Equivalent Yield would be lower.

Each Fund in this report seeks to pay regular monthly dividends out of its net investment income at a rate that reflects its past and projected net income performance. To permit each Fund to maintain a more stable monthly dividend, the Fund may pay dividends at a rate that may be more or less than the amount of net income actually earned by the Fund during the period. If a Fund has cumulatively earned more than it has paid in dividends, it will hold the excess in reserve as undistributed net investment income (UNII) as part of the Fund's net asset value. Conversely, if a Fund has cumulatively paid in dividends more than it has earned, the excess will constitute a negative UNII that will likewise be reflected in the Fund's net asset value. Each Fund will, over time, pay all its net investment income as dividends to shareholders.

As of November 30, 2014, all the Funds in this report had positive UNII balances, based upon our best estimate, for tax purposes. NMY, NMS, NOM and NPV had positive UNII balances, while NKG and NNC had negative balances for financial reporting purposes.

All monthly dividends paid by the Funds during the period ended November 30, 2014 were paid from net investment income. If a portion of a Fund's monthly distributions was sourced from or comprised of elements other than net investment income, including capital gains and/or a return of capital, the Funds' shareholders would have received a notice to that effect. The composition and per share amounts of each Fund's monthly dividends for the reporting period are presented in the Statement of Changes in Net Assets and Financial Highlights, respectively (for reporting purposes) and in Note 6 — Income Tax Information within the accompany Notes to Financial Statements (for income

tax purposes), later in this report.

## Common Share Information (continued)

## COMMON SHARE EQUITY SHELF PROGRAM

During the current reporting period, NPV was authorized to issue an additional 1,700,000 common shares through its equity shelf program. Under this program, the Fund, subject to market conditions, may raise additional capital from time to time in varying amounts and offering methods at a net price at or above the Fund's NAV per common share. During the current reporting period NPV did not sell any common shares through its equity shelf program.

As of September 30, 2014 NPV's shelf offering registration statement is no longer effective. Therefore, the Fund may not issue additional common shares under its equity shelf program until a new registration statement is effective.

Refer to Notes to Financial Statements, Note 1 — General Information and Significant Accounting Policies for further details on the Fund's equity shelf program.

## COMMON SHARE REPURCHASES

During August 2014, the Nuveen Funds' Board of Trustees reauthorized an open-market share repurchase program, allowing each of NKG, NMY, NOM, NNC and NPV to repurchase an aggregate of up to approximately 10% of its outstanding shares.

During November 2014, NMS's Board of Trustees authorized the Fund to participate in Nuveen's closed-end fund complex-wide share repurchase program, allowing the Fund to repurchase an aggregate of up to approximately 10% of its outstanding shares.

As of November 30, 2014, and since the inception of the Funds' repurchase programs, the Funds have cumulatively repurchased and retired common shares as shown in the accompanying table.

	NKG	NMY	NMS	NOM	NNC	NPV
Common Shares Cumulatively Repurchased and Retired	—	400,000	—	—	105,000	—
Common Shares Authorized for Repurchase	1,055,000	2,405,000	555,000	235,000	1,655,000	1,795,000

During the current reporting period, the following Funds repurchased and retired their common shares at a weighted average price per common share and a weighted average discount per common share as shown in the accompanying table.

	NMY	NNC
Common Shares Repurchased and Retired	400,000	105,000
Weighted Average Price per Common Share Repurchased and Retired	\$ 12.56	\$ 13.02
Weighted Average Discount Price per Common Share Repurchased and Retired	13.89%	13.78%

## OTHER COMMON SHARE INFORMATION

As of November 30, 2014, and during the current reporting period, the Funds' common share prices were trading at a premium/(discount) to their common share NAVs as shown in the accompanying table.

Edgar Filing: NUVEEN MISSOURI PREMIUM INCOME MUNICIPAL FUND - Form N-CSRS

	NKG	NMY	NMS	NOM	NNC	NPV
Common Share NAV	\$ 14.10	\$ 14.73	\$ 15.65	\$ 14.19	\$ 15.12	\$ 14.65
Common Share Price	\$ 12.59	\$ 12.64	\$ 14.89	\$ 15.10	\$ 13.03	\$ 13.40
Premium/(Discount) to NAV	(10.71)%	(14.19)%	(4.86)%	6.41%	(13.82)%	(8.53)%
6-Month Average						
Premium/(Discount) to NAV	(9.58)%	(13.53)%	(0.39)%*	5.99%	(12.63)%	(8.69)%

\* For the 5-Month period.

12 Nuveen Investments

---

## Risk Considerations

Fund shares are not guaranteed or endorsed by any bank or other insured depository institution, and are not federally insured by the Federal Deposit Insurance Corporation. Past performance is no guarantee of future results. Fund common shares are subject to a variety of risks, including:

**Investment, Price and Market Risk.** An investment in shares is subject to investment risk, including the possible loss of the entire principal amount that you invest. Your investment in shares represents an indirect investment in the municipal securities owned by the Fund, which generally trade in the over-the-counter markets. Shares of closed-end investment companies like these Funds frequently trade at a discount to their net asset value (NAV). Your shares at any point in time may be worth less than your original investment, even after taking into account the reinvestment of Fund dividends and distributions.

**Leverage Risk.** Each Fund's use of leverage creates the possibility of higher volatility for the Fund's per share NAV, market price, distributions and returns. There is no assurance that a Fund's leveraging strategy will be successful. Certain aspects of the recently adopted Volcker Rule may limit the availability of tender option bonds, which are used by the Funds for leveraging and duration management purposes. The effects of this new Rule, expected to take effect in mid-2015, may make it more difficult for a Fund to maintain current or desired levels of leverage and may cause the Fund to incur additional expenses to maintain its leverage.

**Tax Risk.** The tax treatment of Fund distributions may be affected by new IRS interpretations of the Internal Revenue Code and future changes in tax laws and regulations.

**Issuer Credit Risk.** This is the risk that a security in a Fund's portfolio will fail to make dividend or interest payments when due.

**Interest Rate Risk.** Fixed-income securities such as bonds, preferred, convertible and other debt securities will decline in value if market interest rates rise.

**Reinvestment Risk.** If market interest rates decline, income earned from a Fund's portfolio may be reinvested at rates below that of the original bond that generated the income.

**Call Risk or Prepayment Risk.** Issuers may exercise their option to prepay principal earlier than scheduled, forcing a Fund to reinvest in lower-yielding securities.

**Inverse Floater Risk.** The Funds may invest in inverse floaters. Due to their leveraged nature, these investments can greatly increase a Fund's exposure to interest rate risk and credit risk. In addition, investments in inverse floaters involve the risk that the Fund could lose more than its original principal investment.

**Municipal Bond Market Liquidity Risk.** Inventories of municipal bonds held by brokers and dealers have decreased in recent years, lessening their ability to make a market in these securities. This reduction in market making capacity has the potential to decrease a Fund's ability to buy or sell bonds, and increase bond price volatility and trading costs, particularly during periods of economic or market stress. In addition, recent federal banking regulations may cause certain dealers to reduce their inventories of municipal bonds, which may further decrease a Fund's ability to buy or sell bonds. As a result, the Fund may be forced to accept a lower price to sell a security, to sell other securities to raise cash, or to give up an investment opportunity, any of which could have a negative effect on performance. If the Fund needed to sell large blocks of bonds, those sales could further reduce the bonds' prices and hurt performance.

Derivatives Risk. The Funds may use derivative instruments, which involve a high degree of financial risk, including the risk that the loss on a derivative may be greater than the principal amount investment.

(1) All percentages shown in the Portfolio of Investments are based on net assets applicable to common shares unless otherwise noted.

(2) Optional Call Provisions: Dates (month and year) and prices of the earliest optional call or redemption. There may be other call provisions at varying prices at later dates. Certain mortgage-backed securities may be subject to periodic principal paydowns.

(3)

Ratings: Using the highest of Standard & Poor's Group ("Standard & Poor's"), Moody's Investors Service, Inc. ("Moody's") or Fitch, Inc. ("Fitch") rating. Ratings below BBB by Standard & Poor's, Baa by Moody's or BBB by Fitch are considered to be below investment grade. Holdings designated N/R are not rated by any of these national rating agencies.

- (4) At or subsequent to the end of the reporting period, this security is non-income producing. Non-income producing, in the case of a fixed-income security, generally denotes that the issuer has (1) defaulted on the payment of principal or interest, (2) is under the protection of the Federal Bankruptcy Court or (3) the Fund's Adviser has concluded that the issue is not likely to meet its future interest payment obligations and has directed the Fund's custodian to cease accruing additional income on the Fund's records.
  - (5) Investment valued at fair value using methods determined in good faith by, or at the discretion of, the Board. For fair value measurement disclosure purposes, investment classified as Level 3. See Notes to Financial Statements, Note 2 – Investment Valuation and Fair Value Measurements for more information.
  - (6) Backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities, which ensure the timely payment of principal and interest. Certain bonds backed by U.S. Government or agency securities are regarded as having an implied rating equal to the rating of such securities.
  - (7) Variable Rate MuniFund Term Preferred Shares, at Liquidation Value as a percentage of Total Investments is 33.6%
  - (8) Other Assets Less Liabilities includes the Unrealized Appreciation (Depreciation) of derivative instruments as listed within Investments in Derivatives as of the end of the reporting period.
  - (9) The Fund entered into the credit default swaps to gain investment exposure to the referenced entity. Selling protection has a similar credit risk position to owning the referenced entity. Buying protection has a similar credit risk position to selling the referenced entity short.
  - (10) The credit spread generally serves as an indication of the current status of the payment/performance risk and therefore the likelihood of default of the credit derivative. The credit spread also reflects the cost of buying/selling protection and may include upfront payments required to be made to enter into a credit default swap contract. Higher credit spreads are indicative of higher likelihood of performance by the seller of protection.
- WI/DD Investment, or portion of investment, purchased on a when-issued or delayed delivery basis.
- (IF) Inverse floating rate investment.
- (UB) Underlying bond of an inverse floating rate trust reflected as a financing transaction. See Notes to Financial Statements, Note 3 – Portfolio Securities and Investments in Derivatives, Inverse Floating Rate Securities for more information.

See accompanying notes to financial statements.
