2 SEMI-ANNUAL REPORT FEBRUARY 28, 2011

Dear Shareholder

Over the past 12 months, we have seen a sluggish, stimulus-driven economic recovery at long last gain real traction, accelerate, and transition into a consumption-driven expansion. For the most part, 2010 was plagued with widely fluctuating economic data, but as the year drew to a close, it became clear that cyclical stimulus had beaten out structural problems as economic data releases generally became more positive and financial markets showed signs of continuing improvement. Although the sovereign debt crises and emerging market inflation that troubled the global economy in 2010 remain a challenge, overall investor sentiment considerably improved. Near the end of the period, geopolitical tensions across the Middle East North Africa ("MENA") region along with rising oil prices introduced new cause for concern about the future of the global economy. As of this writing, economic news remains fairly positive although we face additional uncertainties related to the aftermath of the devastating earthquake in Japan, with particular focus on the damage to nuclear power plants.

In the United States, strength from the corporate sector and increasing consumer spending have been key drivers of economic growth, while the housing and labor markets have been the heaviest burdens. While housing has yet to show any meaningful sign of improvement, labor statistics have delivered a mixed bag month after month, but became increasingly encouraging toward the end of the period when the unemployment rate fell to its lowest level since April 2009.

Global equity markets experienced uneven growth and high volatility over the course of 2010, but ended the year strong. Following a strong start to 2011, stocks lost their momentum on the back of geopolitical events in the MENA region and a sharp rise in oil prices. Overall, equities posted strong returns for the 12-month period. US stocks outpaced most international markets and small cap stocks outperformed large caps as investors moved into higher-risk assets.

Fixed income markets saw yields trend lower over most of 2010, until the fourth quarter brought an abrupt reversal in sentiment and risk tolerance that drove yields sharply upward (pushing bond prices down) through year end. Improving economic data continued to pressure fixed income yields in 2011; however, escalating geopolitical risks have acted as a counterweight, restoring relative stability to yield movements. Nevertheless, the yield curve remained steep and higher-risk sectors outperformed the fixed income market.

The tax-exempt municipal market enjoyed a powerful rally during the period of low interest rates in 2010; however, when the yield trend reversed, the market was dealt an additional blow as it became evident that the Build America Bond program would expire at year end. In addition, negative headlines regarding fiscal challenges faced by state and local governments damaged investor confidence and further heightened volatility in the municipal market. Tax-exempt mutual funds experienced heavy outflows, resulting in wider quality spreads and further downward pressure on municipal bond prices. These headwinds began to abate as the period came to a close and municipals finally posted gains in February, following a five-month run of negative performance.

Edgar Filing: BLACKROCK VIRGINIA MUNICIPAL BOND TRUST - Form N-CSRS

Cash investments, as represented by the 3-month Treasury bill, returned only a fraction over 0% for the 12-month period as short-term interest rates remained low. Yields on money market securities remain near all-time lows.

Total returns as of February 28, 2011	6-month	12-month
US large cap equities (S&P 500 Index)	27.73%	22.57%
US small cap equities (Russell 2000 Index)	37.55	32.60
International equities (MSCI Europe, Australasia, Far East Index)	23.77	20.00
3-month Treasury bill (BofA Merrill Lynch 3-Month Treasury Bill Index)	0.07	0.14
US Treasury securities (BofA Merrill Lynch 10-Year US Treasury Index)	(6.04)	4.76
US investment grade bonds (Barclays Capital US Aggregate Bond Index)	(0.83)	4.93
Tax-exempt municipal bonds (Barclays Capital Municipal Bond Index)	(3.51)	1.72
US high yield bonds (Barclays Capital US Corporate High Yield 2% Issuer Capped Index)	10.05	17.34

While no one can peer into a crystal ball and eliminate the uncertainties presented by the economic landscape and financial markets, BlackRock can offer investors the next best thing: partnership with the world's largest asset management firm and a unique global perspective that allows us to identify trends early and capitalize on market opportunities. For additional market perspective and investment insight, visit www.blackrock.com/shareholdermagazine, where you'll find the most recent issue of our award-winning Shareholder® magazine, as well as its quarterly companion newsletter, Shareholder Perspectives. As always, we thank you for entrusting BlackRock with your investments, and we look forward to your continued partnership in the months and years ahead.

THIS PAGE NOT PART OF YOUR FUND REPORT 3

Municipal Market Overview

As of February 28, 2011

The municipal market began the six-month period with yields at historic lows as investor concerns were focused on the possibility of deflation and a double-dip in the US economy. However, as these fears soon abated, yields began drifting higher in October, and ultimately, a “perfect storm” of negative events resulted in the worst quarterly performance that the municipal market has seen since the Fed tightening cycle of 1994. Treasury yields lost their support as concerns about the US deficit raised questions over the willingness of foreign investors to continue to purchase Treasury securities, at least at the previous historically low yields. Municipal valuations also suffered a quick and severe setback as it became evident that the Build America Bond (“BAB”) program would expire at year-end. The program had opened the taxable market to municipal issuers, which had successfully alleviated supply pressure in the traditional tax-exempt marketplace, bringing down yields in that space.

The financial media has been replete with interviews, articles and presentations publicizing the stress experienced in municipal finance, resulting in a loss of confidence among retail investors who buy individual bonds or mutual funds. From the middle of November through year-end, funds specializing in tax-exempt bonds witnessed weekly outflows averaging over \$2.5 billion. Long-term and high-yield funds saw the greatest redemptions, followed by state-specific funds to a lesser but still significant degree. Demand usually is strong at the beginning of a new year against a backdrop of low new-issue supply, but the mutual fund outflows continued into February, putting additional upward pressure on municipal yields. Political uncertainty surrounding the midterm elections and the approach taken by the new Congress on issues such as income tax rates and alternative minimum tax (and the previously mentioned BAB non-extension) exacerbated the situation. All these conditions, combined with the seasonal illiquidity surrounding year-end holidays and dealers closing their fiscal books, sapped willing market participation from the trading community.

As demand for municipal securities from traditional retail investors was declining and trading desk liquidity was being curtailed, there was no comparable reduction in supply. As it became evident that the BAB program would be retired, issuers rushed deals to market both in the taxable municipal space and, to a lesser degree, in the traditional tax-exempt space. This imbalance in the supply/demand technicals provided the classic market action, leading to wider quality spreads and higher bond yields. The municipal curve steepened as the issuance was concentrated in longer (greater than 20-year) maturities. Curve steepening that began in October accelerated in November, spurred on by Treasury weakness, heavy supply and record outflows. As measured by Thomson Municipal Market Data, yields on AAA-rated municipals rose nearly 103 basis points (“bps”) for maturities 25 years and longer from August 31, 2010, to February 28, 2011. The spread between two-year and 30-year maturities widened from 332 bps to 398 bps over the period.

The fundamental picture for municipalities will be subject to scrutiny for months to come, as the challenges to state and local budgets are real and need to be addressed with significant cuts to expenses and tax revenue increases. The debates around austerity measures needed to

Edgar Filing: BLACKROCK VIRGINIA MUNICIPAL BOND TRUST - Form N-CSRS

succeed in balancing these budgets are not over whether action needs to be taken, but over degree, approach and political will to accomplish these needs. The attention shone upon municipal finance has the potential to improve this market for the future if these efforts result in greater means toward disclosure and accuracy (and timeliness) of reporting. Early tests to judge progress will come soon as California, Illinois and Puerto Rico need to take austerity measures and access financing in the municipal market to address relatively immediate fiscal imbalances. BlackRock favors a more constructive outlook for the municipal market as the typical, and this year particularly atypical, weakness passes.

4 SEMI-ANNUAL REPORT FEBRUARY 28, 2011

Trust Summary as of February 28, 2011 **BlackRock Maryland Municipal Bond Trust**

Trust Overview

BlackRock Maryland Municipal Bond Trust's (BZM) (the "Trust") investment objective is to provide current income exempt from regular federal income taxes and Maryland personal income taxes. The Trust seeks to achieve its investment objectives by investing primarily in municipal bonds exempt from federal income taxes (except that the interest may be subject to the federal alternative minimum tax) and Maryland personal income taxes. The Trust invests, under normal market conditions, at least 80% of its assets in municipal bonds that are investment grade quality at the time of investment. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust's investment objective will be achieved.

Performance

For the six months ended February 28, 2011, the Trust returned (3.76)% based on market price and (4.83)% based on net asset value ("NAV"). For the same period, the closed-end Lipper Other States Municipal Debt Funds category posted an average return of (9.15)% based on market price and (6.07)% based on NAV. All returns reflect reinvestment of dividends. The Trust's premium to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV. At the beginning of the period, the Trust benefited from tightening credit quality spreads driven by generous investor cash flows into tax-exempt mutual funds. Spreads were pushed even tighter by heightened demand from taxable investors for corporate-backed municipal debt due to its attractive valuation relative to the corporate sector. In this environment of strong demand, we were able to sell lower-quality securities that had outperformed and had previously been very limited in their liquidity. Toward the end of the period, the Trust's position in cash and cash equivalents proved beneficial when the municipal market saw net cash flows into mutual funds turn dramatically negative. However, as municipal rates rose on credit concerns and the Build America Bonds program neared its expiration, while long-term investment rates (i.e., rates on US Treasuries and other fixed income securities) were generally increasing, the Trust's longer duration stance had an overall negative impact on performance.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

SEMI-ANNUAL REPORT FEBRUARY 28, 2011 5

Trust Summary as of February 28, 2011 **BlackRock MuniHoldings New York Quality Fund, Inc.**

Trust Overview

Effective November 9, 2010 BlackRock MuniHoldings New York Insured Fund, Inc. changed its name to BlackRock MuniHoldings New York Quality Fund, Inc.

BlackRock MuniHoldings New York Quality Fund, Inc.'s (MHN) (the "Trust") investment objective is to provide shareholders with current income exempt from federal income tax and New York State and New York City personal income taxes. The Trust seeks to achieve its investment objective by investing, under normal market conditions, at least 80% of its assets in investment grade New York municipal obligations exempt from federal income taxes (except that the interest may be subject to the federal alternative minimum tax) and New York State and New York City personal income taxes ("New York Municipal Bonds"), except at times when, in the judgment of its investment adviser, New York Municipal Bonds of sufficient quality and quantity are unavailable for investment by the Trust. At all times, however, except during temporary defensive periods, the Trust invests at least 65% of its assets in New York Municipal Bonds. The Trust invests, under normal market conditions, at least 80% of its assets in municipal obligations with remaining maturities of one year or more. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust's investment objective will be achieved.

Performance

Effective November 9, 2010, the Trust's investment policy was changed by the removal of the insurance investment policy that required at least 80% of its assets to be invested in insured municipal securities. Accordingly, the Trust was moved from the Lipper Single-State Insured Municipal Debt Funds category into the Lipper New York Municipal Debt Funds category. For the six months ended February 28, 2011, the Trust returned (10.55)% based on market price and (8.98)% based on NAV. For the same period, the closed-end Lipper New York Municipal Debt Funds category posted an average return of (9.60)% based on market price and (6.76)% based on NAV, while the closed-end Lipper Single-State Insured Municipal Debt Funds category posted an average return of (10.54)% based on market price and (6.87)% based on NAV. All returns reflect reinvestment of dividends. The Trust moved from a premium to NAV to a discount by period-end, which accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV. The Trust's exposure to the long end of the yield curve and holdings of low-coupon, long-duration bonds during a period of rising rates had a negative impact on performance. The Trust's holdings of Puerto Rico credits also detracted from performance, as did holdings of lower-quality credits, where spreads widened amid the backdrop of poor relative performance across the municipal market. Conversely, the Trust benefited from its holdings of tax-backed credits (state, county, city and school district) as well as its limited exposure to

Edgar Filing: BLACKROCK VIRGINIA MUNICIPAL BOND TRUST - Form N-CSRS

corporate-backed credits, which experienced some buy-side demand from non-traditional cross-over buyers.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

6 SEMI-ANNUAL REPORT FEBRUARY 28, 2011

Trust Summary as of February 28, 2011 **BlackRock New Jersey Municipal Bond Trust**

Trust Overview

BlackRock New Jersey Municipal Bond Trust's (BLJ) (the "Trust") investment objective is to provide current income exempt from regular federal

income tax and New Jersey gross income tax. The Trust seeks to achieve its investment objective by investing primarily in municipal bonds exempt

from federal income taxes (except that the interest may be subject to the federal alternative minimum tax) and New Jersey gross income taxes.

Under normal market conditions, the Trust invests at least 80% of its assets in municipal bonds that are investment grade quality at the time

of investment. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust's investment objective will be achieved.

Performance

For the six months ended February 28, 2011, the Trust returned (13.80)% based on market price and (7.59)% based on NAV. For the same

period, the closed-end Lipper New Jersey Municipal Debt Funds category posted an average return of (12.05)% based on market price and

(7.61)% based on NAV. All returns reflect reinvestment of dividends. The Trust moved from a premium to NAV to a discount by period end,

which accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to

performance based on NAV. The Trust's exposure to housing and corporate-backed bonds aided performance as both sectors outperformed

the broad municipal market. The Trust's holdings of high-quality essential service bonds with premium coupons (6% or higher) also benefited performance, as they held their value better than lower-coupon bonds in the rising interest rate environment. Conversely, exposure to longer-duration and longer-maturity bonds detracted from performance as the long end of the yield curve steepened during the period. Additionally, holdings in health care and transportation hindered performance as both sectors underperformed the broad municipal market.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

As of February 28, 2011 and August 31, 2010, the market value of these securities was \$1,469,185 representing 3% and \$1,013,550 representing 2% respectively, of the Trust's long-term investments.

Trust Summary as of February 28, 2011 **BlackRock New York Municipal Income Quality Trust**

Trust Overview

Effective November 9, 2010 BlackRock New York Insured Municipal Income Trust changed its name to BlackRock New York Municipal Income Quality Trust.

BlackRock New York Municipal Income Quality Trust's (BSE) (the "Trust") investment objective is to provide current income exempt from federal income tax, including the alternative minimum tax, and New York State and New York City personal income taxes. The Trust seeks to achieve its investment objective by investing at least 80% of its assets in municipal obligations exempt from federal income taxes (including the alternative minimum tax) and New York State and New York City personal income taxes. Under normal market conditions, the Trust invests primarily in municipal bonds that are investment grade quality at the time of investment. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust's investment objective will be achieved.

Performance

Effective November 9, 2010, the Trust's investment policy was changed by the removal of the insurance investment policy that required at least 80% of its assets to be invested in insured municipal securities. Accordingly, the Trust was moved from the Lipper Single-State Insured Municipal Debt Funds category into the Lipper New York Municipal Debt Funds category. For the six months ended February 28, 2011, the Trust returned (12.49)% based on market price and (7.51)% based on NAV. For the same period, the closed-end Lipper New York Municipal Debt Funds category posted an average return of (9.60)% based on market price and (6.76)% based on NAV, while the closed-end Lipper Single-State Insured Municipal Debt Funds category posted an average return of (10.54)% based on market price and (6.87)% based on NAV. All returns reflect reinvestment of dividends. The Trust moved from a premium to NAV to a discount by period-end, which accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV. The Trust's exposure to the long end of the yield curve and holdings of low-coupon, long-duration bonds during a period of rising rates had a negative impact on performance. Also detracting from performance was the Trust's holdings of Puerto Rico credits, as it was the poorest performing state/territory for the period. Conversely, the Trust benefited from its holdings of tax-backed credits (state, county, city and school district), which were among the better performing sectors during the period. Additionally, avoiding tobacco credits proved beneficial as it was the worst performing sector for the period.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

⁶ The investment advisor has deemed certain of these non-rated securities to be of investment grade quality. As of February 28, 2011 and August 31, 2010, the market value of these securities was \$1,864,940 representing 1% and \$9,329,772 representing 6%, respectively, of the Trust's long-term investments.

⁸ SEMI-ANNUAL REPORT FEBRUARY 28, 2011

Trust Summary as of February 28, 2011 **BlackRock New York Municipal Bond Trust**

Trust Overview

BlackRock New York Municipal Bond Trust's (BQH) (the "Trust") investment objective is to provide current income exempt from regular federal income taxes and New York State and New York City personal income taxes. The Trust seeks to achieve its investment objective by investing primarily in municipal bonds exempt from federal income taxes (except that the interest may be subject to the federal alternative minimum tax) and New York State and New York City personal income taxes. Under normal market conditions, the Trust invests at least 80% of its assets in municipal bonds that are investment grade quality at the time of investment. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust's investment objective will be achieved.

Performance

For the six months ended February 28, 2011, the Trust returned (8.35)% based on market price and (6.14)% based on NAV. For the same period, the closed-end Lipper New York Municipal Debt Funds category posted an average return of (9.60)% based on market price and (6.76)% based on NAV. All returns reflect reinvestment of dividends. The Trust moved from a premium to NAV to a discount by period-end, which accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV. The Trust's exposure to the long end of the yield curve and holdings of low-coupon, long-duration bonds during a period of rising rates had a negative impact on performance. The Trust's holdings of Puerto Rico credits also detracted from performance, as did holdings of lower-quality credits, where spreads widened amid the backdrop of poor relative performance across the municipal market. Positively impacting performance was the Trust's high exposure to pre-refunded bonds, which performed well due to their shorter duration as municipal rates rose sharply. In addition, the Trust benefited from its holdings of corporate-backed credits, which experienced some buy-side demand from non-traditional cross-over buyers.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

Trust Summary as of February 28, 2011 **BlackRock Virginia Municipal Bond Trust**

Trust Overview

BlackRock Virginia Municipal Bond Trust's (BHV) (the "Trust") investment objective is to provide current income exempt from regular federal income tax and Virginia personal income taxes. The Trust seeks to achieve its investment objectives by investing primarily in municipal bonds exempt from federal income taxes (except that the interest may be subject to the federal alternative minimum tax) and Virginia personal income taxes. The Trust invests, under normal market conditions, at least 80% of its assets in municipal bonds that are investment grade quality at the time of investment. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust's investment objective will be achieved.

Performance

For the six months ended February 28, 2011, the Trust returned (3.79)% based on market price and (6.19)% based on NAV. For the same period, the closed-end Lipper Other States Municipal Debt Funds category posted an average return of (9.15)% based on market price and (6.07)% based on NAV. All returns reflect reinvestment of dividends. The Trust's premium to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV. At the beginning of the period, the Trust benefited from tightening credit quality spreads driven by generous investor cash flows into tax-exempt mutual funds. Spreads were pushed even tighter by heightened demand from taxable investors for corporate-backed municipal debt due to its attractive valuation relative to the corporate sector. In this environment of strong demand, we were able to sell lower-quality securities that had outperformed and had previously been very limited in their liquidity. However, toward the end of the period, when municipal rates rose on credit concerns and the Build America Bonds program neared its expiration, while long-term investment rates (i.e., rates on US Treasuries and other fixed income securities) were generally increasing, the Trust's longer duration stance had an overall negative impact on performance.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

⁶ The investment advisor has deemed certain of these non-rated securities to be of investment grade quality. As of February 28, 2011 and August 31, 2010, the market value of these securities was \$2,490,031 representing 7% and \$2,770,588 representing 7%, respectively, of the Trust's long-term investments.

Trust Summary as of February 28, 2011 **The Massachusetts Health & Education Tax-Exempt Trust**

Trust Overview

The Massachusetts Health & Education Tax-Exempt Trust's (MHE) (the "Trust") investment objective is to provide shareholders with as high a level of current income exempt from both regular federal income taxes and Massachusetts personal income taxes as is consistent with the preservation of shareholders' capital. The Trust seeks to achieve its investment objective by investing primarily in tax-exempt obligations (including bonds, notes and capital lease obligations) issued on behalf of Massachusetts not-for-profit health and education institutions ("Massachusetts Health & Education Obligations"). The Trust invests, under normal market conditions, at least 80% of its assets in Massachusetts Health & Education Obligations and at least 80% of its assets in obligations that are rated investment grade at the time of investment. Under normal market conditions, the Trust invests its assets so that at least 80% of the income generated by the Trust is exempt from federal income taxes, including federal alternative minimum tax, and Massachusetts personal income taxes.

The Trust invests primarily in long term municipal obligations with maturities of more than ten years. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust's investment objective will be achieved.

Performance

For the six months ended February 28, 2011, the Trust returned (8.64)% based on market price and (7.22)% based on NAV. For the same period, the closed-end Lipper Other States Municipal Debt Funds category posted an average return of (9.15)% based on market price and (6.07)% based on NAV. All returns reflect reinvestment of dividends. The Trust's premium to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV. Holdings in health care and education hindered performance as both sectors underperformed the broad municipal market. Additionally, exposure to longer-duration and longer-maturity bonds detracted from the Trust's performance as the long end of the yield curve steepened during the period. Conversely, exposure to pre-refunded bonds in the 2- to 3-year maturity range aided performance as that sector was the best performer in the municipal market.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

As of February 28, 2011 and August 31, 2010, the market value of these securities was \$855,000 representing 2% and \$2,061,578 representing 4%, respectively, of the Trust's long-term investments.

The Benefits and Risks of Leveraging

The Trusts may utilize leverage to seek to enhance the yield and NAV of their common shares (Common Shares). However, these objectives cannot be achieved in all interest rate environments.

To leverage, the Trusts issue preferred shares (Preferred Shares), which pay dividends at prevailing short-term interest rates, and invest the proceeds in long-term municipal bonds. In general, the concept of leveraging is based on the premise that the financing cost of assets to be obtained from leverage, which will be based on short-term interest rates, will normally be lower than the income earned by each Trust on its longer-term portfolio investments. To the extent that the total assets of each Trust (including the assets obtained from leverage) are invested in higher-yielding portfolio investments, each Trust's holders of Common Shares (Common Shareholders) will benefit from the incremental net income.

To illustrate these concepts, assume a Trust's Common Shares capitalization is \$100 million and it issues Preferred Shares for an additional \$50 million, creating a total value of \$150 million available for investment in long-term municipal bonds. If prevailing short-term interest rates are 3% and long-term interest rates are 6%, the yield curve has a strongly positive slope. In this case, the Trust pays dividends on the \$50 million of Preferred Shares based on the lower short-term interest rates. At the same time, the securities purchased by the Trust with assets received from Preferred Shares issuance earn income based on long-term interest rates. In this case, the dividends paid to holders of Preferred Shares (Preferred Shareholders) are significantly lower than the income earned on the Trust's long-term investments, and therefore the Common Shareholders are the beneficiaries of the incremental net income.

If short-term interest rates rise, narrowing the differential between short-term and long-term interest rates, the incremental net income pickup on the Common Shares will be reduced or eliminated completely. Furthermore, if prevailing short-term interest rates rise above long-term interest rates of 6%, the yield curve has a negative slope. In this case, the Trust pays interest expense on the higher short-term interest rates whereas the Trust's total portfolio earns income based on lower long-term interest rates.

Furthermore, the value of the Trusts' portfolio investments generally varies inversely with the direction of long-term interest rates, although other factors can influence the value of portfolio investments. In contrast, the redemption value of the Trusts' Preferred Shares and/or debt securities does not fluctuate in relation to interest rates. As a result, changes in interest rates can influence the Trusts' NAV positively or negatively in addition to the impact on Trust performance from leverage from Preferred Shares discussed above.

Edgar Filing: BLACKROCK VIRGINIA MUNICIPAL BOND TRUST - Form N-CSRS

The Trusts may also leverage their assets through the use of TOBs, as described in Note 1 of the Notes to Financial Statements. TOB investments generally will provide the Trusts with economic benefits in periods of declining short-term interest rates, but expose the Trusts to risks during periods of rising short-term interest rates similar to those associated with Preferred Shares issued by the Trusts, as described above. Additionally, fluctuations in the market value of municipal bonds deposited into the TOB may adversely affect each Trust's NAV per share.

The use of leverage may enhance opportunities for increased income to the Trusts and Common Shareholders, but as described above, it also creates risks as short or long-term interest rates fluctuate. Leverage also will generally cause greater changes in the Trusts' NAVs, market prices and dividend rates than comparable portfolios without leverage. If the income derived from securities purchased with assets received from leverage exceeds the cost of leverage, each Trust's net income will be greater than if leverage had not been used. Conversely, if the income from the securities purchased is not sufficient to cover the cost of leverage, the Trusts' net income will be less than if leverage had not been used, and therefore the amount available for distribution to Common Shareholders will be reduced. Each Trust may be required to sell portfolio securities at inopportune times or at distressed values in order to comply with regulatory requirements applicable to the use of leverage or as required by the terms of leverage instruments, which may cause a Trust to incur losses. The use of leverage may limit each Trust's ability to invest in certain types of securities or use certain types of hedging strategies, such as in the case of certain restrictions imposed by ratings agencies that rate Preferred Shares issued by the Trusts. Each Trust will incur expenses in connection with the use of leverage, all of which are borne by Common Shareholders and may reduce income to the Common Shares.

Under the Investment Company Act of 1940, the Trusts are permitted to issue Preferred Shares in an amount of up to 50% of their total managed assets at the time of issuance. Under normal circumstances, each Trust anticipates that the total economic leverage from Preferred Shares and/or TOBs will not exceed 50% of its total managed assets at the time such leverage is incurred. As of February 28, 2011, the Trusts had economic leverage from Preferred Shares and/or TOBs as a percentage of their total managed assets as follows:

	Percent of Leverage
BZM	38%
MHN	43%
BLJ	38%
BSE	37%
BQH	36%
BFY	39%

BHV	37%
MHE	41%

SEMI-ANNUAL REPORT FEBRUARY 28, 2011 13

Derivative Financial Instruments

The Trusts may invest in various derivative instruments, including financial futures contracts, as specified in Note 2 of the Notes to Financial Statements, which may constitute forms of economic leverage. Such instruments are used to obtain exposure to a market without owning or taking physical custody of securities or to hedge market and/or interest rate risks. Such derivative instruments involve risks, including the imperfect correlation between the value of a derivative instrument and the underlying asset, possible default of the counterparty to the transaction or illiquidity of the derivative instrument. The Trusts' ability to use a derivative instrument successfully depends on the investment advisor's ability to predict pertinent market movements accurately, which cannot be assured. The use of derivative instruments may result in losses greater than if they had not been used, may require a Trust to sell or purchase portfolio investments at inopportune times or for distressed values, may limit the amount of appreciation a Trust can realize on an investment, may result in lower dividends paid to shareholders or may cause a Trust to hold an investment that it might otherwise sell. The Trusts' investments in these instruments are discussed in detail in the Notes to Financial Statements.

* The cost and unrealized appreciation (depreciation) of investments as of February 28, 2011, as computed for federal income tax purposes, were as follows:

Aggregate cost	\$ 45,291,345
Gross unrealized appreciation	\$ 594,318
Gross unrealized depreciation	(1,330,785)
Net unrealized depreciation	\$ (736,467)

(a) US government securities, held in escrow, are used to pay interest on this security as well as to retire the bond in full at the date indicated, typically at a premium to par.

(b) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration to qualified institutional investors.

(c) Security represents a beneficial interest in a trust. The collateral deposited into the trust is federally tax-exempt revenue bonds issued by various state or local governments, or their respective agencies or authorities. The security is subject to remarketing prior to its stated maturity.

(d) Securities represent bonds transferred to a TOB trust in exchange for which the Trust acquired residual interest certificates. These securities serve as collateral in a financing transaction. See Note 1 of the Notes to Financial Statements for details of municipal bonds transferred to TOBs.

(e) Investments in companies considered to be an affiliate of the Trust during the period, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, as amended, were as follows:

Affiliate	Shares Held at August 31, 2010	Net Activity	Shares Held at February 28, 2011	Income
FFI Institutional				
Tax-Exempt Fund	1,846,050	(552,019)	1,294,031	\$ 1,489

(f) Represents the current yield as of report date.

•For Trust compliance purposes, the Trust's sector classifications refer to any one or more of the sector sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Trust management. This definition may not apply for purposes of this report, which may combine such sector sub-classifications for reporting ease.

•Financial futures contracts sold as of February 28, 2011 were as follows:

Contracts Issue	Exchange	Expiration	Notional Value	Unrealized Depreciation
10 10-Year U.S.	Chicago Board

* The cost and unrealized appreciation (depreciation) of investments as of February 28, 2011, as computed for federal income tax purposes, were as follows:

Aggregate cost	\$ 676,042,924
Gross unrealized appreciation	\$ 9,876,194
Gross unrealized depreciation	(37,228,991)
Net unrealized depreciation	\$ (27,352,797)

(a) Variable rate security. Rate shown is as of report date.

(b) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.

(c) US government securities, held in escrow, are used to pay interest on this security as well as to retire the bond in full at the date indicated, typically at a premium to par.

(d) Securities represent bonds transferred to a TOB in exchange for which the Trust acquired residual interest certificates. These securities serve as collateral in a financing transaction. See Note 1 of the Notes to Financial Statements for details of municipal bonds transferred to tender option bond trusts.

(e) Variable rate security. Rate shown is as of report date and maturity shown is the date the principal owed can be recovered through demand.

(f) Investments in companies considered to be an affiliate of the Trust during the period, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, as amended, were as follows:

Affiliate	Shares Held at August 31, 2010	Net Activity	Shares Held at February 28, 2011	Income
BIF New York Municipal Money Fund	8,738,117	(3,121,529)	5,616,588	—

(g) Represents the current yield as of report date.

Financial futures contracts sold as of February 28, 2011 were as follows:

Contracts Issue	Exchange	Expiration	Notional Value	Unrealized Depreciation
-----------------	----------	------------	-------------------	----------------------------

Edgar Filing: BLACKROCK VIRGINIA MUNICIPAL BOND TRUST - Form N-CSRS

176 30-Year U.S. Treasury Bond	Chicago Board of Trade	June 2011	\$20,968,520	\$ (211,928)
-----------------------------------	---------------------------	-----------	--------------	--------------

•For Trust compliance purposes, the Trust's sector classifications refer to any one or more of the sector sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Trust management. This definition may not apply for purposes of this report, which may combine such sector sub-classifications for reporting ease.

•Fair Value Measurements — Various inputs are used in determining the fair value of investments and derivatives. These inputs are summarized in three broad levels for financial statement purposes as follows:

- Level 1 — price quotations in active markets/exchanges for identical assets and liabilities
- Level 2 — other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)
- Level 3 — unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust's own assumptions used in determining the fair value of investments and derivatives)

The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Trust's policy regarding valuation of investments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following tables summarize the inputs used as of February 28, 2011 in determining the fair valuation of the Trust's investments and derivatives:

Valuation Inputs	Level 1	Level 2	Level 3	Total
Assets:				
Investments in Securities:				
Long-Term				
Investments ¹	—	\$714,411,139	—	\$714,411,139
Short-Term				
Securities	\$ 5,616,588	375,000	—	5,991,588
Total	\$ 5,616,588	\$714,786,139	—	\$720,402,727

¹ See above Schedule of Investments for values in each sector.

Derivative Financial Instruments²

Net Assets Applicable to Common Shares — 100.0% \$ 31,493,096

* The cost and unrealized appreciation (depreciation) of investments as of February 28, 2011, as computed for federal income tax purposes, were as follows:

Aggregate cost	\$ 51,796,969
Gross unrealized appreciation	\$ 1,149,221
Gross unrealized depreciation	(3,115,872)
Net unrealized depreciation	\$ (1,966,651)

(a) Variable rate security. Rate shown is as of report date.

(b) Issuer filed for bankruptcy and/or is in default of interest payments.

(c) Non-income producing security.

(d) US government securities, held in escrow, are used to pay interest on this security as well as to retire the bond in full at the date indicated, typically at a premium to par.

(e) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.

(f) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration to qualified institutional investors.

(g) Security represents a beneficial interest in a trust. The collateral deposited into the trust is federally tax-exempt revenue bonds issued by various state or local governments, or their respective agencies or authorities. The security is subject to remarketing prior to its stated maturity.

(h) Securities represent bonds transferred to a TOB in exchange for which the Trust acquired residual interest certificates. These securities serve as collateral in a financing transaction. See Note 1 of the Notes to Financial Statements for details of municipal bonds transferred to TOBs.

See Notes to Financial Statements.

22 SEMI-ANNUAL REPORT FEBRUARY 28, 2011

Schedule of Investments (concluded)

BlackRock New Jersey Municipal Bond Trust (BLJ)

(i) Investments in companies considered to be an affiliate of the Trust during the period, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, as amended, were as follows:

Affiliate	Shares Held at August 31, 2010	Net Activity	Shares Held at February 28, 2011	Income
BIF New Jersey Municipal Money Fund	915,154	(361,941)	553,213	\$ 188

(i) Represents the current yield as of report date.

•For Trust compliance purposes, the Trust's sector classifications refer to any one or more of the sector sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Trust management. This definition may not apply for purposes of this report, which may combine sector sub-classifications for reporting ease.

•Financial futures contracts sold as of February 28, 2011 were as follows:

Contracts Issue	Exchange	Expiration	Notional Unrealized Value Depreciation
12 10-Year U.S. Treasury Note	Chicago Board of Trade	June 2011	\$1,422,165 \$ (6,398)

•Fair Value Measurements — Various inputs are used in determining the fair value of investments and derivatives. These inputs are summarized in three broad levels for financial statement purposes as follows:

•Level 1 — price quotations in active markets/exchanges for identical assets and liabilities

•Level 2 — other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

•Level 3 — unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust's own assumptions used in determining the fair value of investments and derivatives)

The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Trust's policy regarding valuation of investments and derivatives and other significant accounting policies, please refer to Note 1 of the Notes to

Edgar Filing: BLACKROCK VIRGINIA MUNICIPAL BOND TRUST - Form N-CSRS

Financial Statements.

The following tables summarize the inputs used as of February 28, 2011 in determining the fair valuation of the Trust's investments and derivatives:

Valuation Inputs	Level 1	Level 2	Level 3	Total
Assets:				
Investments in Securities:				
Long-Term				
Investments ¹	—	\$49,996,888	—	\$49,996,888
Short-Term				
Securities	\$ 553,213	—	—	553,213
Total	\$ 553,213	\$49,996,888	—	\$50,550,101

¹ See above Schedule of Investments for values in each sector.

Derivative Financial Instruments²

Valuation Inputs	Level 1	Level 2	Level 3	Total
Liabilities:				
Interest rate				
contracts	\$ (6,398)	—	—	\$ (6,398)

² Derivative financial instruments are financial futures contracts, which are shown at the unrealized appreciation/depreciation on the instrument.

See Notes to Financial Statements.

See Notes to Financial Statements.

SEMI-ANNUAL REPORT FEBRUARY 28, 2011 25

Schedule of Investments (concluded)

BlackRock New York Municipal Income Quality Trust (BSE)

* The cost and unrealized appreciation (depreciation) of investments as of February 28, 2011, as computed for federal income tax purposes, were as follows:

Aggregate cost	\$ 129,328,229
Gross unrealized appreciation	\$ 1,467,629
Gross unrealized depreciation	(4,826,234)
Net unrealized depreciation	\$ (3,358,605)

(a) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.

(b) US government securities, held in escrow, are used to pay interest on this security as well as to retire the bond in full at the date indicated, typically at a premium to par.

(c) Securities represent bonds transferred to a tender option bond trust in exchange for which the Trust acquired residual interest certificates. These securities serve as collateral in a financing transaction. See Note 1 of the Notes to Financial Statements for details of municipal bonds transferred to tender option bond trusts.

(d) Variable rate security. Rate shown is as of report date and maturity shown is the date the principal owed can be recovered through demand.

(e) Investments in companies considered to be an affiliate of the Trust during the period, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, as amended, were as follows:

Affiliate	Shares Held at August 31, 2010	Net Activity	Shares Held at February 28, 2011	Income
BIF New York Municipal Money Fund	1,077,827	(749,603)	328,224	\$ 96

(f) Represents the current yield as of report date.

•For Trust compliance purposes, the Trust's sector classifications refer to any one or more of the sector sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Trust management. This definition may not apply for purposes of this report, which may combine such sector sub-classifications for reporting ease.

•Financial futures contracts sold as of February 28, 2011 were as follows:

Contracts Issue	Exchange	Expiration	Notional Value	Unrealized Depreciation
37 30 Year U.S. Treasury Bond	Chicago Board of Trade	June 2011	\$ 4,408,180	\$ (44,539)

Edgar Filing: BLACKROCK VIRGINIA MUNICIPAL BOND TRUST - Form N-CSRS

•Fair Value Measurements — Various inputs are used in determining the fair value of investments and derivatives. These inputs are summarized in three broad levels for financial statement purposes as follows:

- Level 1 — price quotations in active markets/exchanges for identical assets and liabilities
- Level 2 — other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)
- Level 3 — unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust's own assumptions used in determining the fair value of investments and derivatives)

The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Trust's policy regarding valuation of investments and derivatives and other significant accounting policies, please refer to the Note 1 of the Notes to Financial Statements.

The following tables summarize the inputs used as of February 28, 2011 in determining the fair valuation of the Trust's investments and derivatives:

Valuation Inputs	Level 1	Level 2	Level 3	Total
Assets:				
Investments in Securities:				
Long-Term				
Investments ¹	—	\$135,999,903	—	\$135,999,903
Short-Term				
Securities	\$ 328,224	50,000	—	378,224
Total	\$ 328,224	\$136,049,903	—	\$136,378,127

¹ See above Schedule of Investments for values in each sector.

Derivative Financial Instruments²

Valuation Inputs	Level 1	Level 2	Level 3	Total
Liabilities:				
Interest rate				
contracts	\$ (44,539)	—	—	\$ (44,539)

² Derivative financial instruments are financial futures contracts, which are shown at the unrealized appreciation/depreciation on the instrument.

See Notes to Financial Statements.

28 SEMI-ANNUAL REPORT FEBRUARY 28, 2011

Schedule of Investments (concluded)

BlackRock New York Municipal Bond Trust (BQH)

(Percentages shown are based on Net Assets)

Short-Term Securities	Shares	Value
BIF New York Municipal Money Fund, 0.00% (j)(k)	238,561	\$ 238,561
Total Short-Term Securities		
(Cost — \$238,561) — 0.6%		238,561
Total Investments (Cost — \$62,081,586*) — 155.4%		61,327,027
Other Assets Less Liabilities — 1.4%		535,997
Liability for Trust Certificates, Including Interest		
Expense and Fees Payable — (0.7)%		(270,055)
Preferred Shares, at Redemption Value — (56.1)%		(22,126,549)
Net Assets Applicable to Common Shares — 100.0%		\$ 39,466,420

* The cost and unrealized appreciation (depreciation) of investments as of February 28, 2011, as computed for federal income tax purposes, were as follows:

Aggregate cost	\$ 61,719,368
Gross unrealized appreciation	\$ 1,686,922
Gross unrealized depreciation	(2,349,161)
Net unrealized depreciation	\$ (662,239)

(a) Variable rate security. Rate shown is as of report date.

(b) US government securities, held in escrow, are used to pay interest on this security as well as to retire the bond in full at the date indicated, typically at a premium to par.

(c) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.

(d) Issuer filed for bankruptcy and/or is in default of interest payments.

(e) Non-income producing security.

(f) Represents a step-up bond that pays an initial coupon rate for the first period and then a higher coupon rate for the following periods. Rate shown reflects the current yield as of report date.

(g) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration to qualified institutional investors.

(h) Security represents a beneficial interest in a trust. The collateral deposited into the trust is federally tax-exempt revenue bonds issued by various state or local governments, or their respective agencies or authorities. The security is subject to remarketing prior to its stated maturity.

(i) Securities represent bonds transferred to a TOB in exchange for which the Trust acquired residual interest certificates. These securities serve as collateral in a financing transaction. See Note 1 of the Notes to Financial Statements for details of municipal bonds transferred to TOBs.

(j) Investments in companies considered to be an affiliate of the Trust during the period, for purposes of Section 2(a)(3) of the Investment Company Act of 1940,

Edgar Filing: BLACKROCK VIRGINIA MUNICIPAL BOND TRUST - Form N-CSRS

as amended, were as follows:

Affiliate	Shares Held at August 31, 2010	Net Activity	Shares Held at February 28, 2011	Income
BIF New York Municipal Money Fund	563,059	(324,498)	238,561	\$ 37

(k) Represents the current yield as of report date.

•For Trust compliance purposes, the Trust's sector classifications refer to any one or more of the sector sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Trust management. This definition may not apply for purposes of this report, which may combine such sector sub-classifications for reporting ease.

•Financial futures contracts sold as of February 28, 2011 were as follows:

Contracts Issue	Exchange	Expiration	Notional Value	Unrealized Depreciation
17 30-Year U.S. Treasury Bond	Chicago Board of Trade	June 2011	\$2,025,373	\$ (20,469)

•Fair Value Measurements — Various inputs are used in determining the fair value of investments and derivatives. These inputs are summarized in three broad levels for financial statement purposes as follows:

•Level 1 — price quotations in active markets/exchanges for identical assets and liabilities

•Level 2 — other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

•Level 3 — unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust's own assumptions used in determining the fair value of investments and derivatives)

The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Trust's policy regarding valuation of investments and derivatives and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following tables summarize the inputs used as of February 28, 2011 in determining the fair valuation of the Trust's investments and derivatives:

Edgar Filing: BLACKROCK VIRGINIA MUNICIPAL BOND TRUST - Form N-CSRS

- (a) Variable rate security. Rate shown is as of report date.
- (b) US government securities, held in escrow, are used to pay interest on this security as well as to retire the bond in full at the date indicated, typically at a premium to par.
- (c) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.
- (d) Issuer filed for bankruptcy and/or is in default of interest payments.
- (e) Non-income producing security.
- (f) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration to qualified institutional investors.
- (g) Security represents a beneficial interest in a trust. The collateral deposited into the trust is federally tax-exempt revenue bonds issued by various state or local governments, or their respective agencies or authorities. The security is subject to remarketing prior to its stated maturity.
- (h) Securities represent bonds transferred to a TOB in exchange for which the Trust acquired residual interest certificates. These securities serve as collateral in a financing transaction. See Note 1 of the Notes to Financial Statements for details of municipal bonds transferred to TOBs.
- (i) Investments in companies considered to be an affiliate of the Trust during the period, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, as amended, were as follows:

Affiliate	Shares Held at August 31, 2010	Net Activity	Shares Held at February 28, 2011	Income
BIF New York Municipal Money Fund	935,140	425,065	1,360,205	\$ 151

(j) Represents the current yield as of report date.

32 SEMI-ANNUAL REPORT FEBRUARY 28, 2011

Schedule of Investments (concluded)

BlackRock New York Municipal Income Trust II (BFY)

•Fair Value Measurements — Various inputs are used in determining the fair value of investments and derivatives. These inputs are summarized in three broad levels for financial statement purposes as follows:

- Level 1 — price quotations in active markets/exchanges for identical assets and liabilities
- Level 2 — other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)
- Level 3 — unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust's own assumptions used in determining the fair value of investments and derivatives)

The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Trust's policy regarding valuation of investments and derivatives and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following tables summarize the inputs used as of February 28, 2011 in determining the fair valuation of the Trust's investments and derivatives:

Valuation Inputs	Level 1	Level 2	Level 3	Total
Assets:				
Investments in Securities:				
Long-Term				
Investments ¹	—	\$110,939,749	—	\$110,939,749
Short-Term				
Securities	\$ 1,360,205	—	—	1,360,205
Total	\$ 1,360,205	\$110,939,749	—	\$112,299,954

¹ See above Schedule of Investments for values in each sector.

Derivative Financial Instruments²

Valuation Inputs	Level 1	Level 2	Level 3	Total
Liabilities:				
Interest rate				
contracts	\$ (36,120)	—	—	\$(36,120)

² Derivative financial instruments are financial futures contracts, which are

valued at the unrealized appreciation/depreciation on the instrument.

See Notes to Financial Statements.

* The cost and unrealized appreciation (depreciation) of investments as of February 28, 2011, as computed for federal income tax purposes, were as follows:

Edgar Filing: BLACKROCK VIRGINIA MUNICIPAL BOND TRUST - Form N-CSRS

Aggregate cost	\$ 34,080,691
Gross unrealized appreciation	\$ 1,002,886
Gross unrealized depreciation	(823,562)
Net unrealized appreciation	\$ 179,324

(a) Variable rate security. Rate shown is as of report date.

(b) US government securities, held in escrow, are used to pay interest on this security as well as to retire the bond in full at the date indicated, typically at a premium to par.

(c) When-issued security. Unsettled when-issued transactions were as follows:

Counterparty	Value	Unrealized Appreciation
Wells Fargo Bank	\$503,135	\$15,040

(d) Security is collateralized by Municipal or US Treasury obligations.

(e) Security represents a beneficial interest in a trust. The collateral deposited into the trust is federally tax-exempt revenue bonds issued by various state or local governments, or their respective agencies or authorities. The security is subject to remarketing prior to its stated maturity.

(f) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration to qualified institutional investors.

(g) Securities represent bonds transferred to a TOB in exchange for which the Trust acquired residual interest certificates. These securities serve as collateral in a financing transaction. See Note 1 of the Notes to Financial Statements for details of municipal bonds transferred to TOBs.

(h) Investments in companies considered to be an affiliate of the Trust during the period, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, as amended, were as follows:

Affiliate	Shares Held at August 31, 2010	Net Activity	Shares Held at February 28, 2011	Income
FFI Institutional Tax-Exempt Fund	164,857	68,333	233,190	\$ 375

(i) Represents the current yield as of report date.

*Financial futures contracts sold as of February 28, 2011 were as follows:
