Enhanced Buffered Jump Securities Based on the Value of the Worst Performing of the S&P 500[®] Index and the Dow Jones Industrial AverageSM due April 30, 2021

Fully and Unconditionally Guaranteed by Morgan Stanley

Principal at Risk Securities

The Enhanced Buffered Jump Securities, which we refer to as the securities, are unsecured obligations of Morgan Stanley Finance LLC (“MSFL”) and are fully and unconditionally guaranteed by Morgan Stanley. The securities have the terms described in the accompanying product supplement for Jump Securities, index supplement and prospectus, as supplemented and modified by this document. The securities pay no interest and will instead pay an amount in cash at maturity that may be greater than or less than the stated principal amount, depending on the closing values of the underlying indices on the valuation date. If the final index value of **each** underlying index is **greater than or equal to 80%** of its respective initial index value, which we refer to as the respective downside threshold value, you will receive the stated principal amount for each security that you hold at maturity plus the upside payment of \$172.50 per security. However, if the final index value of **either** underlying index is **less than** its respective downside threshold value, you will be exposed to the decline in the level of the worst performing underlying index beyond the buffer amount of 20%, and you will lose some or a significant portion of your initial investment. **The payment at maturity may be significantly less than the stated principal amount, and you could lose up to 80% of your investment.** Because the payment at maturity on the securities is based on the worst performing of the underlying indices, a decline in either final index value below 80% of its respective initial index value will result in a loss on your

investment, even if the other underlying index has appreciated or has not declined as much. The securities are for investors who seek an equity index-based return and who are willing to risk their principal, risk exposure to the worst performing of two underlying indices and forgo current income and returns above the fixed upside payment in exchange for the upside payment and buffer features that in each case apply to a limited range of performance of the worst performing underlying index. The securities are notes issued as part of MSFL's Series A Global Medium-Term Notes Program.

All payments are subject to our credit risk. If we default on our obligations, you could lose some or all of your investment. These securities are not secured obligations and you will not have any security interest in, or otherwise have any access to, any underlying reference asset or assets.

FINAL TERMS

| | |
|---|--|
| Issuer: | Morgan Stanley Finance LLC |
| Guarantor: | Morgan Stanley |
| Issue price: | \$1,000 per security |

Enhanced Buffered Jump Securities Based on the Value of the Worst Performing of the S&P 500[®] Index and the Dow Jones Industrial AverageSM due April 30, 2021

Principal at Risk Securities

Investment Summary

Principal at Risk Securities

The Enhanced Buffered Jump Securities Based on the Value of the Worst Performing of the S&P 500[®] Index and the Dow Jones Industrial AverageSM due April 30, 2021 (the “securities”) can be used:

§ As an alternative to direct exposure to the underlying indices that provides a fixed return of 17.25% if the final index value of **each** underlying index is greater than or equal to its respective downside threshold value;

§ To enhance returns and potentially outperform the worst performing of the S&P 500[®] Index and the Dow Jones Industrial AverageSM in a moderately bullish or moderately bearish scenario;

§ To obtain a buffer against a specified level of negative performance in the worst performing underlying index.

The securities are exposed on a 1-to-1 basis to the percentage decline of the final index value of the worst performing underlying index from its respective initial index value beyond the buffer amount of 20%. **Accordingly, 80% of your principal is at risk.**

| | |
|------------------------------|--|
| Maturity: | Approximately 31 months |
| Upside payment: | \$172.50 per security (17.25% of the stated principal amount), payable only if the final index value of each underlying index is greater than or equal to its respective downside threshold value. |
| Buffer amount: | 20% |
| Minimum payment at maturity: | \$200 per security. You could lose up to 80% of the stated principal amount of the securities. |
| Interest: | None |

The original issue price of each security is \$1,000. This price includes costs associated with issuing, selling, structuring and hedging the securities, which are borne by you. We estimate that the value of each security on the pricing date is \$1,000.20.

What goes into the estimated value on the pricing date?

In valuing the securities on the pricing date, we take into account that the securities comprise both a debt component and a performance-based component linked to the underlying indices. The estimated value of the securities is determined using our own pricing and valuation models, market inputs and assumptions relating to the underlying indices, instruments based on the underlying indices, volatility and other factors including current and expected interest rates, as well as an interest rate related to our secondary market credit spread, which is the implied interest rate at which our conventional fixed rate debt trades in the secondary market.

What determines the economic terms of the securities?

In determining the economic terms of the securities, including the upside payment, the buffer amount and the downside threshold values, we use an internal funding rate, which is likely to be lower than our secondary market credit spreads and therefore advantageous to us. If the issuing, selling, structuring and hedging costs borne by you were lower or if the internal funding rate were higher, one or more of the economic terms of the securities would be more favorable to you.

What is the relationship between the estimated value on the pricing date and the secondary market price of the securities?

The price at which MS & Co. purchases the securities in the secondary market, absent changes in market conditions, including those related to the underlying indices, may vary from, and be lower than, the estimated value on the pricing date, because the secondary market price takes into account our secondary market credit spread as well as the bid-offer spread that MS & Co. would charge in a secondary market transaction of this type and other factors. However, because the costs associated with issuing, selling, structuring and hedging the securities are not fully deducted upon

Morgan Stanley Finance LLC

Enhanced Buffered Jump Securities Based on the Value of the Worst Performing of the S&P 500[®] Index and the Dow Jones Industrial AverageSM due April 30, 2021

Principal at Risk Securities

issuance, for a period of up to 6 months following the issue date, to the extent that MS & Co. may buy or sell the securities in the secondary market, absent changes in market conditions, including those related to the underlying indices, and to our secondary market credit spreads, it may do so based on values higher than the estimated value. We expect that those higher values will also be reflected in your brokerage account statements.

MS & Co. may, but is not obligated to, make a market in the securities, and, if it once chooses to make a market, may cease doing so at any time.

Morgan Stanley Finance LLC

Enhanced Buffered Jump Securities Based on the Value of the Worst Performing of the S&P 500® Index and the Dow Jones Industrial AverageSM due April 30, 2021

Principal at Risk Securities

Key Investment Rationale

The securities provide a return based on the performance of the worst performing of the S&P 500® Index and the Dow Jones Industrial AverageSM. If the final index value of each underlying index, as determined on the valuation date, is greater than or equal to its respective downside threshold value, you will receive the stated principal amount for each security that you hold at maturity plus the upside payment of \$172.50 per security. However, if the final index value of **either** underlying index is *less than* its respective downside threshold value, the payment due at maturity will be less, and possibly significantly less, than the stated principal amount of the securities. You could lose up to 80% of the stated principal amount of the securities.

Upside Scenario

*If the final index value of **each** underlying index is **greater than or equal to its respective downside threshold value**, the payment at maturity for each security will be equal to \$1,000 *plus* the upside payment of \$172.50.*

*If the final index value of **either** underlying index is **less than its respective downside threshold value**, you will lose 1% for every 1% decline in the value of the worst performing underlying index from its initial index value beyond the buffer amount of 20% (e.g., a 50% depreciation in the worst performing underlying index from the respective initial index value to the respective final index value will result in a payment at maturity of \$700 per security).*

Downside Scenario

Because the payment at maturity of the securities is based on the worst performing of the underlying indices, a decline in either underlying index below its respective downside threshold value will result in a loss on your investment, even if the other underlying index has appreciated or has not declined as much. You could lose up to 80% of your investment.

Morgan Stanley Finance LLC

Enhanced Buffered Jump Securities Based on the Value of the Worst Performing of the S&P 500® Index and the Dow Jones Industrial AverageSM due April 30, 2021

Principal at Risk Securities

Hypothetical Examples

The following hypothetical examples illustrate how to calculate the payment at maturity on the securities. The following examples are for illustrative purposes only. The payment at maturity on the securities is subject to our credit risk. The below examples are based on the following terms. The actual initial index values and downside threshold values are set forth on the cover of this document.

Stated Principal Amount: \$1,000 per security
With respect to the SPX Index: 2,200

Hypothetical Initial Index Value:
With respect to the INDU Index: 24,000

With respect to the SPX Index: 1,760, which is 80% of its hypothetical initial index value

Hypothetical Downside Threshold Value:
With respect to the INDU Index: 19,200, which is 80% of its hypothetical initial index value

Upside Payment: \$172.50 (17.25% of the stated principal amount)
20%

Buffer Amount:

Minimum Payment at Maturity: \$200 per security

Interest: None

EXAMPLE 1: Both underlying indices appreciate substantially, and investors therefore receive the stated principal amount *plus* the upside payment.

Final index value SPX Index:
 3,960

 INDU Index: 45,600

Index percent change SPX Index: $(3,960 - 2,200) / 2,200 = 80\%$

 INDU Index: $(45,600 - 24,000) / 24,000 = 90\%$

Payment at maturity = \$1,000 + upside payment

 = \$1,000 + \$172.50

 = \$1,172.50

In example 1, the final index value for the SPX Index has increased from its initial index value by 80%, and the final index value for the INDU Index has increased from its initial index value by 90%. Because the final index value of each underlying index is above its respective downside threshold value, investors receive at maturity the stated principal amount *plus* the upside payment of \$172.50. Investors receive \$1,172.50 per security at maturity and do not participate in the appreciation of either underlying index. Although both underlying indices have appreciated substantially, the return on the securities is limited to the stated principal amount plus the fixed upside payment of \$172.50.

EXAMPLE 2: The final index values of both underlying indices are at or above their respective downside threshold values, and investors therefore receive the stated principal amount *plus* the upside payment.

Final index value SPX Index:
 1,870

 INDU Index: 21,600

Index percent change SPX Index: $(1,870 - 2,200) / 2,200 = -15\%$

 INDU Index: $(21,600 - 24,000) / 24,000 = -10\%$

Payment at maturity = \$1,000 + upside payment

 = \$1,000 + \$172.50

 = \$1,172.50

Morgan Stanley Finance LLC

Enhanced Buffered Jump Securities Based on the Value of the Worst Performing of the S&P 500® Index and the Dow Jones Industrial AverageSM due April 30, 2021

Principal at Risk Securities

In example 2, the final index value for the SPX Index has decreased from its initial index value by 15%, and the final index value for the INDU Index has decreased from its initial index value by 10%. Because the final index value of each underlying index is above its respective downside threshold value, investors receive at maturity the stated principal amount *plus* the upside payment of \$172.50. Although both underlying indices have depreciated, investors receive \$1,172.50 per security at maturity.

EXAMPLE 3: The final index value of one of the underlying indices is less than its respective downside threshold value. Investors are therefore exposed to the negative performance of the worst performing underlying index, and lose 1% for every 1% decline beyond the buffer amount of 20%.

| | |
|----------------------|--|
| Final index value | SPX Index: 2,640 |
| | INDU Index: 16,800 |
| Index percent change | SPX Index: $(2,640 - 2,200) / 2,200 = 20\%$ INDU Index: $(16,800 - 24,000) / 24,000 = -30\%$ |
| Payment at maturity | $= \$1,000 + [\$1,000 \times (\text{index percent change of the worst performing underlying index} + 20\%)]$ $= \$1,000 + [\$1,000 \times (-30\% + 20\%)]$ $= \$900$ |

In example 3, the final index value for the SPX Index has increased from its initial index value by 20%, and the final index value for the INDU Index has decreased from its initial index value by 30%. Because one of the underlying indices has declined below its respective downside threshold value, investors do not receive the upside payment and are exposed to the negative performance of the INDU Index, which is the worst performing underlying index in this example. Under these circumstances, investors lose 1% for every 1% decline in the value of the worst performing underlying index beyond the buffer amount of 20%. In this example, investors receive a payment at maturity equal to \$900 per security, resulting in a loss of 10%.

EXAMPLE 4: The final index values of both underlying indices are less than their respective downside threshold values. Investors are therefore exposed to the negative performance of the worst performing underlying index, and will lose 1% for every 1% decline beyond the buffer amount of 20%.

| | |
|----------------------|--|
| Final index value | SPX Index: 440 |
| | INDU Index: 9,600 |
| Index percent change | SPX Index: $(440 - 2,200) / 2,200 = -80\%$ INDU Index: $(9,600 - 24,000) / 24,000 = -60\%$ |
| Payment at maturity | $= \$1,000 + [\$1,000 \times (\text{index percent change of the worst performing underlying index} + 20\%)]$ $= \$1,000 + [\$1,000 \times (-80\% + 20\%)]$ $= \$400$ |

In example 4, the final index value for the SPX Index has decreased from its initial index value by 80%, and the final index value for the INDU Index has decreased from its initial index value by 60%. Because one or more underlying indices have declined below their respective downside threshold values, investors do not receive the upside payment and are exposed to the negative performance of the SPX Index, which is the worst performing underlying index in this example. Under these circumstances, investors lose 1% for every 1% decline in the value of the worst performing underlying index beyond the buffer amount of 20%. In this example, investors receive a payment at maturity equal to \$400 per security, resulting in a loss of 60%.

Because the payment at maturity of the securities is based on the worst performing of the underlying indices, a decline in the final index value of either underlying index to below its respective downside threshold value will result in a loss of some or a significant portion of your investment, even if the other underlying index has appreciated or has not declined as much. You could lose up to 80% of your investment in the securities.

Morgan Stanley Finance LLC

Enhanced Buffered Jump Securities Based on the Value of the Worst Performing of the S&P 500® Index and the Dow Jones Industrial AverageSM due April 30, 2021

Principal at Risk Securities

Risk Factors

The following is a non-exhaustive list of certain key risk factors for investors in the securities. For further discussion of these and other risks, you should read the section entitled “Risk Factors” in the accompanying product supplement, index supplement and prospectus. You should also consult with your investment, legal, tax, accounting and other advisers in connection with your investment in the securities.

The securities do not pay interest and provide for the minimum payment at maturity of only 20% of your principal. The terms of the securities differ from those of ordinary debt securities in that the securities do not pay interest and provide for the minimum return of only 20% of the principal amount at maturity. At maturity, you will receive for each \$1,000 stated principal amount of securities that you hold an amount in cash based upon the final index value of each underlying index. If the final index value of **either** underlying index is less than 80% of its respective initial index value, you will lose 1% of your principal for every 1% decline in the final index value of the worst performing underlying index beyond the buffer amount of 20%. **You could lose up to 80% of the stated principal amount of the securities.**

You are exposed to the price risk of both underlying indices. Your return on the securities is not linked to a basket consisting of both underlying indices. Rather, it will be based upon the independent performance of each underlying index. Unlike an instrument with a return linked to a basket of underlying assets, in which risk is mitigated and diversified among all the components of the basket, you will be exposed to the risks related to both underlying indices. Poor performance by either underlying index over the term of the securities will negatively affect your return and will not be offset or mitigated by any positive performance by the other underlying index. If the final index value of either underlying index declines to below 80% of its respective initial index value, you will be exposed to the negative performance of the worst performing underlying index at maturity, even if the other underlying index has appreciated or has not declined as much. Accordingly, your investment is subject to the price risk of both underlying indices.

Because the securities are linked to the performance of the worst performing underlying index, you are exposed to greater risk of sustaining a loss on your investment than if the securities were linked to just one underlying index. The risk that you will suffer a loss on your investment is greater if you invest in the securities as opposed to substantially similar securities that are linked to the performance of just one underlying index. With two underlying indices, it is more likely that the final index value of either underlying index will decline to below its respective downside threshold value than if the securities were linked to only one underlying index. Therefore, it is more likely that you will suffer a loss on your investment.

Appreciation potential is fixed and limited. Where the final index value of each underlying index is greater than or equal to its respective downside threshold value, the appreciation potential of the securities is limited to the fixed upside payment of \$172.50 per security (17.25% of the stated principal amount), even if both underlying indices have appreciated substantially.

The amount payable on the securities is not linked to the values of the underlying indices at any time other than the valuation date. The final index value of each underlying index will be based on the index closing value of such underlying index on the valuation date, subject to postponement for non-index business days and certain market disruption events. Even if the values of both underlying indices appreciate prior to the valuation date but the value of either underlying index drops by the valuation date, the payment at maturity may be less, and may be significantly less, than it would have been had the payment at maturity been linked to the values of the underlying indices prior to such drop. Although the actual values of the underlying indices on the stated maturity date or at other times during the term of the securities may be higher than their respective final index values, the payment at maturity will be based solely on the index closing values on the valuation date.

The securities will not be listed on any securities exchange and secondary trading may be limited. The securities will not be listed on any securities exchange. Therefore, there may be little or no secondary market for the securities. Morgan Stanley & Co. LLC, which we refer to as MS & Co., may, but is not obligated to, make a market in the securities and, if it once chooses to make a market, may cease doing so at any time. When it does make a market, it will generally do so for transactions of routine secondary market size at prices based on its estimate of the current value of the securities, taking into account its bid/offer spread, our credit spreads, market volatility, the notional size of the proposed sale, the cost of unwinding any related hedging positions, the

Morgan Stanley Finance LLC

Enhanced Buffered Jump Securities Based on the Value of the Worst Performing of the S&P 500® Index and the Dow Jones Industrial AverageSM due April 30, 2021

Principal at Risk Securities

time remaining to maturity and the likelihood that it will be able to resell the securities. Even if there is a secondary market, it may not provide enough liquidity to allow you to trade or sell the securities easily. Since other broker-dealers may not participate significantly in the secondary market for the securities, the price at which you may be able to trade your securities is likely to depend on the price, if any, at which MS & Co. is willing to transact. If, at any time, MS & Co. were to cease making a market in the securities, it is likely that there would be no secondary market for the securities. Accordingly, you should be willing to hold your securities to maturity.

The market price of the securities may be influenced by many unpredictable factors. Several factors, many of which are beyond our control, will influence the value of the securities in the secondary market and the price at which MS & Co. may be willing to purchase or sell the securities in the secondary market, including:

§ the values of the underlying indices at any time (including in relation to their initial index values),

§ the volatility (frequency and magnitude of changes in value) of the underlying indices,

§ dividend rates on the securities underlying the underlying indices,

§ interest and yield rates in the market,

geopolitical conditions and economic, financial, political, regulatory or judicial events that affect the component
§ stocks of the underlying indices or securities markets generally and which may affect the value of the underlying
indices,

§ the time remaining until the maturity of the securities,

§ the composition of the underlying indices and changes in the constituent stocks of the underlying
indices, and

§ any actual or anticipated changes in our credit ratings or credit spreads.

Some or all of these factors will influence the price you will receive if you sell your securities prior to maturity. In particular, you may have to sell your securities at a substantial discount from the stated principal amount if at the time of sale the value of either underlying index is near, at or below its respective downside threshold value.

You cannot predict the future performance of the underlying indices based on their historical performance. If the final index value of either underlying index is less than 80% of its respective initial index value, you will be exposed on a 1-to-1 basis to the decline in the final index value of the worst performing underlying index beyond the buffer amount. There can be no assurance that the final index value of each underlying index will be greater than or equal to 80% of its respective initial index value so that you will receive at maturity an amount that is greater than the \$1,000 stated principal amount for each security you hold, or that you will not lose some or a significant portion of your investment.

The securities are subject to our credit risk, and any actual or anticipated changes to our credit ratings or credit spreads may adversely affect the market value of the securities. You are dependent on our ability to pay all amounts due on the securities at maturity and therefore you are subject to our credit risk. If we default on our § obligations under the securities, your investment would be at risk and you could lose some or all of your investment. As a result, the market value of the securities prior to maturity will be affected by changes in the market's view of our creditworthiness. Any actual or anticipated decline in our credit ratings or increase in the credit spreads charged by the market for taking our credit risk is likely to adversely affect the market value of the securities.

As a finance subsidiary, MSFL has no independent operations and will have no independent assets. As a finance subsidiary, MSFL has no independent operations beyond the issuance and administration of its securities and will have no independent assets available for distributions to holders of MSFL securities if they make claims in respect of such securities in a bankruptcy, resolution or similar proceeding. Accordingly, any recoveries by such § holders will be limited to those available under the related guarantee by Morgan Stanley and that guarantee will rank *pari passu* with all other unsecured, unsubordinated obligations of Morgan Stanley. Holders will have recourse only to a single claim against Morgan Stanley and its assets under the guarantee. Holders of securities issued by MSFL should accordingly assume that in any such proceedings they would not have any priority over and should be treated *pari passu* with the claims of other unsecured, unsubordinated creditors of Morgan Stanley, including holders of Morgan Stanley-issued securities.

Morgan Stanley Finance LLC

Enhanced Buffered Jump Securities Based on the Value of the Worst Performing of the S&P 500® Index and the Dow Jones Industrial AverageSM due April 30, 2021

Principal at Risk Securities

The rate we are willing to pay for securities of this type, maturity and issuance size is likely to be lower than the rate implied by our secondary market credit spreads and advantageous to us. Both the lower rate and the inclusion of costs associated with issuing, selling, structuring and hedging the securities in the original issue price reduce the economic terms of the securities and will adversely affect secondary market prices. Assuming no change in market conditions or any other relevant factors, the prices, if any, at which dealers, including MS & Co., are willing to purchase the securities in secondary market transactions will likely be significantly lower than the original issue price, because secondary market prices will exclude the issuing, selling, structuring and hedging-related costs that are included in the original issue price and borne by you and because the secondary market prices will reflect our secondary market credit spreads and the bid-offer spread that any dealer would charge in a secondary market transaction of this type as well as other factors.

The inclusion of the costs of issuing, selling, structuring and hedging the securities in the original issue price and the lower rate we are willing to pay as issuer make the economic terms of the securities less favorable to you than they otherwise would be.

However, because the costs associated with issuing, selling, structuring and hedging the securities are not fully deducted upon issuance, for a period of up to 6 months following the issue date, to the extent that MS & Co. may buy or sell the securities in the secondary market, absent changes in market conditions, including those related to the underlying indices, and to our secondary market credit spreads, it may do so based on values higher than the estimated value, and we expect that those higher values will also be reflected in your brokerage account statements.

The estimated value of the securities is determined by reference to our pricing and valuation models, which may differ from those of other dealers and is not a maximum or minimum secondary market price. These pricing and valuation models are proprietary and rely in part on subjective views of certain market inputs and certain assumptions about future events, which may prove to be incorrect. As a result, because there is no market-standard way to value these types of securities, our models may yield a higher estimated value of the securities than those generated by others, including other dealers in the market, if they attempted to value the securities. In addition, the estimated value on the pricing date does not represent a minimum or maximum price at which dealers, including MS & Co., would be willing to purchase your notes in the secondary market (if any exists) at any time. The value of your securities at any time after the date of this document will vary based on many factors that cannot be predicted with accuracy, including our creditworthiness and changes in market conditions. See also “The market price of the securities may be influenced by many unpredictable factors” above.

§ Investing in the securities is not equivalent to investing in the underlying indices. Investing in the securities is not equivalent to investing in either underlying index or the component stocks of either underlying index. Investors in the securities will not have voting rights or rights to receive dividends or other distributions or any other rights

with respect to stocks that constitute the underlying indices.

Adjustments to the underlying indices could adversely affect the value of the securities. The publisher of either underlying index may add, delete or substitute the stocks underlying such index or make other methodological changes that could change the value of such underlying index. Any of these actions could adversely affect the value of the securities. The publisher of such underlying index may also discontinue or suspend calculation or publication of such underlying index at any time. In these circumstances, MS & Co., as the calculation agent, will have the sole discretion to substitute a successor index that is comparable to the discontinued underlying index. MS & Co. could § have an economic interest that is different than that of investors in the securities insofar as, for example, MS & Co. is permitted to consider indices that are calculated and published by MS & Co. or any of its affiliates. If MS & Co. determines that there is no appropriate successor index, the payout on the securities at maturity will be an amount based on the closing prices on the valuation date of the stocks underlying the relevant index at the time of such discontinuance, without rebalancing or substitution, computed by the calculation agent in accordance with the formula for calculating such underlying index last in effect prior to such discontinuance (depending also on the performance of the other underlying index).

The calculation agent, which is a subsidiary of Morgan Stanley and an affiliate of MSFL, will make determinations with respect to the securities. As calculation agent, MS & Co. has determined the initial index § values and the downside threshold values, and will determine the final index values and the index percent changes, if applicable, and the payment that you will receive at maturity. Moreover, certain determinations made

Morgan Stanley Finance LLC

Enhanced Buffered Jump Securities Based on the Value of the Worst Performing of the S&P 500® Index and the Dow Jones Industrial AverageSM due April 30, 2021

Principal at Risk Securities

by MS & Co., in its capacity as calculation agent, may require it to exercise discretion and make subjective judgments, such as with respect to the occurrence or non-occurrence of market disruption events and the selection of a successor index or calculation of the index closing values in the event of a market disruption event or discontinuance of an underlying index. These potentially subjective determinations may adversely affect the payout to you at maturity. For further information regarding these types of determinations, see “Description of Securities—Postponement of Valuation Date(s),” “—Discontinuance of Any Underlying Index or Basket Index; Alteration of Method of Calculation,” “—Alternate Exchange Calculation in case of an Event of Default” and “—Calculation Agent and Calculations” in the accompanying product supplement. In addition, MS & Co. has determined the estimated value of the securities on the pricing date.

Hedging and trading activity by our affiliates could potentially adversely affect the value of the securities. One or more of our affiliates and/or third-party dealers have carried out, and will continue to carry out, hedging activities related to the securities (and to other instruments linked to the underlying indices or their component stocks), including trading in the stocks that constitute the underlying indices as well as in other instruments related to the underlying indices. As a result, these entities may be unwinding or adjusting hedge positions during the term of the securities, and the hedging strategy may involve greater and more frequent dynamic adjustments to the hedge as the valuation date approaches. Some of our affiliates also trade the stocks that constitute the underlying indices and other § financial instruments related to the underlying indices on a regular basis as part of their general broker-dealer and other businesses. Any of these hedging or trading activities on or prior to the pricing date could have increased the initial index value of an underlying index, and, therefore, could have increased the value at or above which such underlying index must close on the valuation date so that you do not suffer a loss on your initial investment in the securities (depending also on the performance of the other underlying index). Additionally, such hedging or trading activities during the term of the securities, including on the valuation date, could adversely affect the value of either underlying index on the valuation date, and, accordingly, the amount of cash an investor will receive at maturity (depending also on the performance of the other underlying index).

§ The U.S. federal income tax consequences of an investment in the securities are uncertain. Please read the discussion under “Additional Provisions—Tax considerations” in this document and the discussion under “United States Federal Taxation” in the accompanying product supplement for Jump Securities (together, the “Tax Disclosure Sections”) concerning the U.S. federal income tax consequences of an investment in the securities. If the Internal Revenue Service (the “IRS”) were successful in asserting an alternative treatment, the timing and character of income on the securities might differ significantly from the tax treatment described in the Tax Disclosure Sections. For example, under one possible treatment, the IRS could seek to recharacterize the securities as debt instruments. In that event, U.S. Holders would be required to accrue into income original issue discount on the securities every year at a “comparable yield” determined at the time of issuance and recognize all income and gain in respect of the securities as ordinary income. Additionally, as discussed under “United States Federal Taxation—FATCA” in the accompanying product supplement for Jump Securities, the withholding rules commonly referred to as “FATCA” would apply to the securities if they were recharacterized as debt instruments. The risk that financial instruments providing for buffers, triggers or similar downside protection features, such as the securities, would be recharacterized as debt is greater than the risk of recharacterization for comparable financial instruments that do not have such features. We do not

plan to request a ruling from the IRS regarding the tax treatment of the securities, and the IRS or a court may not agree with the tax treatment described in the Tax Disclosure Sections.

In 2007, the U.S. Treasury Department and the IRS released a notice requesting comments on the U.S. federal income tax treatment of “prepaid forward contracts” and similar instruments. The notice focuses in particular on whether to require holders of these instruments to accrue income over the term of their investment. It also asks for comments on a number of related topics, including the character of income or loss with respect to these instruments; whether short-term instruments should be subject to any such accrual regime; the relevance of factors such as the exchange-traded status of the instruments and the nature of the underlying property to which the instruments are linked; the degree, if any, to which income (including any mandated accruals) realized by non-U.S. investors should be subject to withholding tax; and whether these instruments are or should be subject to the “constructive ownership” rule, which very generally can operate to recharacterize certain long-term capital gain as ordinary income and impose an interest charge. While the notice requests comments on appropriate transition rules and effective dates, any Treasury regulations or other guidance promulgated after consideration of these

Principal at Risk Securities

issues could materially and adversely affect the tax consequences of an investment in the securities, possibly with retroactive effect. Both U.S. and Non-U.S. Holders should consult their tax advisers regarding the U.S. federal income tax consequences of an investment in the securities, including possible alternative treatments, the issues presented by this notice and any tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction.

S&P 500[®] Index Overview

The S&P 500[®] Index, which is calculated, maintained and published by S&P Dow Jones Indices LLC (“S&P”), consists of stocks of 500 component companies selected to provide a performance benchmark for the U.S. equity markets. The calculation of the S&P 500[®] Index is based on the relative value of the float adjusted aggregate market capitalization of the 500 component companies as of a particular time as compared to the aggregate average market capitalization of 500 similar companies during the base period of the years 1941 through 1943. For additional information about the S&P 500[®] Index, see the information set forth under “S&P 500[®] Index” in the accompanying index supplement.

Additional Information About the Securities

Please read this information in conjunction with the summary terms on the front cover of this document.

Additional Provisions:

Postponement of maturity date: If the scheduled valuation date is not an index business day with respect to either underlying index or if a market disruption event occurs with respect to either underlying index on that day so that the valuation date is postponed and falls less than two business days prior to the scheduled maturity date, the maturity date of the securities will be postponed to the second business day following that valuation date as postponed with respect to either underlying index.

Minimum ticketing size: \$1,000 / 1 security

Tax considerations: Although there is uncertainty regarding the U.S. federal income tax consequences of an investment in the securities due to the lack of governing authority, in the opinion of our counsel, Davis Polk & Wardwell LLP, under current law, and based on current market conditions, it is more likely than not that a security will be treated as a single financial contract that is an “open transaction” for U.S. federal income tax purposes.

Assuming this treatment of the securities is respected and subject to the discussion in “United States Federal Taxation” in the accompanying product supplement for Jump Securities, the following U.S. federal income tax consequences should result based on current law:

§ A U.S. Holder should not be required to recognize taxable income over the term of the securities prior to settlement, other than pursuant to a sale or exchange.

§ Upon sale, exchange or settlement of the securities, a U.S. Holder should recognize gain or loss equal to the difference between the amount realized and the U.S. Holder’s tax basis in the securities. Such gain or loss should be long-term capital gain or loss if the investor has held the securities for more than one year, and short-term capital gain or loss otherwise.

In 2007, the U.S. Treasury Department and the Internal Revenue Service (the “IRS”) released a notice requesting comments on the U.S. federal income tax treatment of “prepaid forward contracts” and similar instruments. The notice focuses in particular on whether to require holders of these instruments to accrue income over the term of their investment. It also asks for comments on a number of related topics, including the character of income or loss with respect to these instruments; whether short-term instruments should be subject to any such accrual regime; the relevance of factors such as the exchange-traded status of the instruments and the nature of the underlying property to which the instruments are linked; the degree, if any, to which income (including any

mandated accruals) realized by non-U.S. investors should be subject to withholding tax; and whether these instruments are or should be subject to the “constructive ownership” rule, which very generally can operate to recharacterize certain long-term capital gain as ordinary income and impose an interest charge. While the notice requests comments on appropriate transition rules and effective dates, any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the securities, possibly with retroactive effect.

As discussed in the accompanying product supplement for Jump Securities, Section 871(m) of the Internal Revenue Code of 1986, as amended, and Treasury regulations promulgated thereunder (“Section 871(m)”) generally impose a 30% (or a lower applicable treaty rate) withholding tax on dividend equivalents paid or deemed paid to Non-U.S. Holders with respect to certain financial instruments linked to U.S. equities or indices that include U.S. equities (each, an “Underlying Security”). Subject to certain exceptions, Section 871(m) generally applies to securities that substantially replicate the economic performance of one or more Underlying Securities, as determined based on tests set forth in the applicable Treasury regulations (a “Specified Security”). However, pursuant to an IRS notice, Section 871(m) will not apply to securities issued before January 1, 2019 that do not have a delta of one with respect to any Underlying Security. Based on our determination that the securities do not have a delta of one with respect to any Underlying Security, our counsel is of the opinion that the securities should not be Specified Securities and, therefore, should not be subject to Section 871(m).

Our determination is not binding on the IRS, and the IRS may disagree with this determination. Section 871(m) is complex and its application may depend on your particular circumstances, including whether you enter into other transactions with respect to an Underlying Security. If withholding is required, we will not be required to pay any additional amounts with respect to the amounts so withheld. You should consult your tax adviser regarding the potential application of Section 871(m) to the securities.

Both U.S. and non-U.S. investors considering an investment in the securities should read the discussion under “Risk Factors” in this document and the discussion under “United States Federal Taxation” in the accompanying product supplement for Jump Securities and consult their tax advisers regarding all aspects of the U.S. federal income tax consequences of an investment in the securities, including possible alternative treatments, the issues presented by the aforementioned notice and any tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction.

The discussion in the preceding paragraphs under “Tax considerations” and the discussion

Morgan Stanley Finance LLC

Enhanced Buffered Jump Securities Based on the Value of the Worst Performing of the S&P 500[®] Index and the Dow Jones Industrial AverageSM due April 30, 2021

Principal at Risk Securities

contained in the section entitled “United States Federal Taxation” in the accompanying product supplement for Jump Securities, insofar as they purport to describe provisions of U.S. federal income tax laws or legal conclusions with respect thereto, constitute the full opinion of Davis Polk & Wardwell LLP regarding the material U.S. federal tax consequences of an investment in the securities.

**Trustee:
Calculation
agent:**

The Bank of New York Mellon

Morgan Stanley & Co. LLC (“MS & Co.”)

The proceeds from the sale of the securities will be used by us for general corporate purposes. We will receive, in aggregate, \$1,000 per security issued. The costs of the securities borne by you and described on page 2 above comprise the cost of issuing, structuring and hedging the securities.

**Use of proceeds
and hedging:**

On or prior to the pricing date, we hedged our anticipated exposure in connection with the securities by entering into hedging transactions with our affiliates and/or third party dealers. We expect our hedging counterparties to have taken positions in stocks of the underlying indices and in futures and options contracts on the underlying indices and any component stocks of the underlying indices listed on major securities markets. Such purchase activity could have increased the initial index value of either underlying index, and, therefore, could have increased the value at or above which such underlying index must close on the valuation date so that you do not suffer a loss on your initial investment in the securities (depending also on the performance of the other underlying index). In addition, through our affiliates, we are likely to modify our hedge position throughout the term of the securities, including on the valuation date, by purchasing and selling the stocks constituting the underlying indices, futures or options contracts on the underlying indices or their component stocks listed on major securities markets or positions in any other available securities or instruments that we may wish to use in connection with such hedging activities. As a result, these entities may be unwinding or adjusting hedge positions during the term of the securities, and the hedging strategy may involve greater and more frequent dynamic adjustments to the hedge as the valuation date approaches. We cannot give any assurance that our hedging activities will not affect the value of either underlying index, and, therefore, adversely affect the value of the securities or the payment you will receive at maturity (depending also on the performance of the other underlying index). For further information on our use of proceeds and hedging, see “Use of Proceeds and Hedging” in the accompanying product supplement.

**Benefit plan
investor
considerations:**

Each fiduciary of a pension, profit-sharing or other employee benefit plan subject to Title I of the Employee Retirement Income Security Act of 1974, as amended (“ERISA”) (a “Plan”), should consider the fiduciary standards of ERISA in the context of the Plan’s particular circumstances before authorizing an investment in the securities. Accordingly, among other factors, the fiduciary should consider whether the investment would satisfy the prudence and diversification requirements of ERISA and would be consistent with the documents and instruments governing the Plan.

In addition, we and certain of our affiliates, including MS & Co., may each be considered a “party in interest” within the meaning of ERISA, or a “disqualified person” within the meaning of the Internal Revenue Code of 1986, as amended (the “Code”), with respect to many Plans, as well as many individual retirement accounts and Keogh plans (such accounts and plans, together with other plans, accounts and arrangements subject to Section 4975 of the Code, also “Plans”). ERISA Section 406 and Code Section 4975 generally prohibit transactions between Plans and parties in interest or disqualified persons. Prohibited transactions within the meaning of ERISA or the Code would likely arise, for example, if the securities are acquired by or with the assets of a Plan with respect to which MS & Co. or any of its affiliates is a service provider or other party in interest, unless the securities are acquired pursuant to an exemption from the “prohibited transaction” rules. A violation of these “prohibited transaction” rules could result in an excise tax or other liabilities under ERISA and/or Section 4975 of the Code for those persons, unless exemptive relief is available under an applicable statutory or administrative exemption.

The U.S. Department of Labor has issued five prohibited transaction class exemptions (“PTCEs”) that may provide exemptive relief for direct or indirect prohibited transactions resulting from the purchase or holding of the securities. Those class exemptions are PTCE 96-23 (for certain transactions determined by in-house asset managers), PTCE 95-60 (for certain transactions involving insurance company general accounts), PTCE 91-38 (for certain transactions involving bank collective investment funds), PTCE 90-1 (for certain transactions involving insurance company separate accounts) and PTCE 84-14 (for certain transactions determined by independent qualified professional asset managers). In addition, ERISA Section 408(b)(17) and Code Section 4975(d)(20) of the Code provide an exemption for the purchase and sale of securities and the related lending transactions, provided that neither the issuer of the securities nor any of its affiliates has or exercises any discretionary authority or control or renders any investment advice with respect to the assets of the Plan involved in the transaction and provided further that the Plan pays no more, and receives no less, than “adequate consideration” in connection with the transaction (the so-called “service provider” exemption). There can be no assurance that any of these class or statutory exemptions will be available with respect to transactions involving the securities.

Because we may be considered a party in interest with respect to many Plans, the securities may not be purchased, held or disposed of by any Plan, any entity whose underlying assets include “plan assets” by reason of any Plan’s investment in the entity (a “Plan Asset Entity”) or any person investing “plan assets” of any Plan, unless such purchase, holding or disposition is eligible for exemptive relief, including relief available under PTCEs 96-23, 95-60, 91-38, 90-1, 84-14 or the service provider exemption or such

Morgan Stanley Finance LLC

Enhanced Buffered Jump Securities Based on the Value of the Worst Performing of the S&P 500® Index and the Dow Jones Industrial AverageSM due April 30, 2021

Principal at Risk Securities

purchase, holding or disposition is otherwise not prohibited. Any purchaser, including any fiduciary purchasing on behalf of a Plan, transferee or holder of the securities will be deemed to have represented, in its corporate and its fiduciary capacity, by its purchase and holding of the securities that either (a) it is not a Plan or a Plan Asset Entity and is not purchasing such securities on behalf of or with “plan assets” of any Plan or with any assets of a governmental, non-U.S. or church plan that is subject to any federal, state, local or non-U.S. law that is substantially similar to the provisions of Section 406 of ERISA or Section 4975 of the Code (“Similar Law”) or (b) its purchase, holding and disposition of these securities will not constitute or result in a non-exempt prohibited transaction under Section 406 of ERISA or Section 4975 of the Code or violate any Similar Law.

Due to the complexity of these rules and the penalties that may be imposed upon persons involved in non-exempt prohibited transactions, it is particularly important that fiduciaries or other persons considering purchasing the securities on behalf of or with “plan assets” of any Plan consult with their counsel regarding the availability of exemptive relief.

The securities are contractual financial instruments. The financial exposure provided by the securities is not a substitute or proxy for, and is not intended as a substitute or proxy for, individualized investment management or advice for the benefit of any purchaser or holder of the securities. The securities have not been designed and will not be administered in a manner intended to reflect the individualized needs and objectives of any purchaser or holder of the securities.

Each purchaser or holder of any securities acknowledges and agrees that:

(i) the purchaser or holder or its fiduciary has made and shall make all investment decisions for the purchaser or holder and the purchaser or holder has not relied and shall not rely in any way upon us or our affiliates to act as a fiduciary or adviser of the purchaser or holder with respect to (A) the design and terms of the securities, (B) the purchaser or holder’s investment in the securities, or (C) the exercise of or failure to exercise any rights we have under or with respect to the securities;

(ii) we and our affiliates have acted and will act solely for our own account in connection with (A) all transactions relating to the securities and (B) all hedging transactions in connection with our obligations under the securities;

(iii) any and all assets and positions relating to hedging transactions by us or our affiliates are assets and positions of those entities and are not assets and positions held for the benefit of the purchaser or holder;

(iv) our interests are adverse to the interests of the purchaser or holder; and

(v) neither we nor any of our affiliates is a fiduciary or adviser of the purchaser or holder in connection with any such assets, positions or transactions, and any information that we or any of our affiliates may provide is not intended to be impartial investment advice.

Each purchaser and holder of the securities has exclusive responsibility for ensuring that its purchase, holding and disposition of the securities do not violate the prohibited transaction rules of ERISA or the Code or any Similar Law. The sale of any securities to any Plan or plan subject to Similar Law is in no respect a representation by us or any of our affiliates or representatives that such an investment meets all relevant legal requirements with respect to investments by plans generally or any particular plan, or that such an investment is appropriate for plans generally or any particular plan. In this regard, neither this discussion nor anything provided in this document is or is intended to be investment advice directed at any potential Plan purchaser or at Plan purchasers generally and such purchasers of these securities should consult and rely on their own counsel and advisers as to whether an investment in these securities is suitable.

However, individual retirement accounts, individual retirement annuities and Keogh plans, as well as employee benefit plans that permit participants to direct the investment of their accounts, will not be permitted to purchase or hold the securities if the account, plan or annuity is for the benefit of an employee of Morgan Stanley, Morgan Stanley Wealth Management or a family member and the employee receives any compensation (such as, for example, an addition to bonus) based on the purchase of the securities by the account, plan or annuity.

Additional considerations:

Supplemental information regarding plan of distribution; conflicts of interest:

Client accounts over which Morgan Stanley, Morgan Stanley Wealth Management or any of their respective subsidiaries have investment discretion are not permitted to purchase the securities, either directly or indirectly.

MS & Co. will act as the agent for this offering and will not receive a sales commission in connection with sales of the securities; *provided* that, solely with respect to securities purchased by brokerage account holders, a clearing fee of \$2.50 per security is payable.

Morgan Stanley Finance LLC

Enhanced Buffered Jump Securities Based on the Value of the Worst Performing of the S&P 500® Index and the Dow Jones Industrial AverageSM due April 30, 2021

Principal at Risk Securities

MS & Co. is an affiliate of MSFL and a wholly owned subsidiary of Morgan Stanley, and it and other affiliates of ours expect to make a profit by selling, structuring and, when applicable, hedging the securities.

MS & Co. will conduct this offering in compliance with the requirements of FINRA Rule 5121 of the Financial Industry Regulatory Authority, Inc., which is commonly referred to as FINRA, regarding a FINRA member firm's distribution of the securities of an affiliate and related conflicts of interest. MS & Co. or any of our other affiliates may not make sales in this offering to any discretionary account. See "Plan of Distribution (Conflicts of Interest)" and "Use of Proceeds and Hedging" in the accompanying product supplement.

Validity of the securities:

In the opinion of Davis Polk & Wardwell LLP, as special counsel to MSFL and Morgan Stanley, when the securities offered by this pricing supplement have been executed and issued by MSFL, authenticated by the trustee pursuant to the MSFL Senior Debt Indenture (as defined in the accompanying prospectus) and delivered against payment as contemplated herein, such securities will be valid and binding obligations of MSFL and the related guarantee will be a valid and binding obligation of Morgan Stanley, enforceable in accordance with their terms, subject to applicable bankruptcy, insolvency and similar laws affecting creditors' rights generally, concepts of reasonableness and equitable principles of general applicability (including, without limitation, concepts of good faith, fair dealing and the lack of bad faith), *provided* that such counsel expresses no opinion as to (i) the effect of fraudulent conveyance, fraudulent transfer or similar provision of applicable law on the conclusions expressed above and (ii) any provision of the MSFL Senior Debt Indenture that purports to avoid the effect of fraudulent conveyance, fraudulent transfer or similar provision of applicable law by limiting the amount of Morgan Stanley's obligation under the related guarantee. This opinion is given as of the date hereof and is limited to the laws of the State of New York, the General Corporation Law of the State of Delaware and the Delaware Limited Liability Company Act. In addition, this opinion is subject to customary assumptions about the trustee's authorization, execution and delivery of the MSFL Senior Debt Indenture and its authentication of the securities and the validity, binding nature and enforceability of the MSFL Senior Debt Indenture with respect to the trustee, all as stated in the letter of such counsel dated November 16, 2017, which is Exhibit 5-a to the Registration Statement on Form S-3 filed by Morgan Stanley on November 16, 2017.

Contact:

Morgan Stanley clients may contact their local Morgan Stanley branch office or Morgan Stanley's principal executive offices at 1585 Broadway, New York, New York 10036 (telephone number (866) 477-4776). All other clients may contact their local brokerage representative. Third-party distributors may contact Morgan Stanley Structured Investment Sales at (800) 233-1087.

Where you can find more information:

Morgan Stanley and MSFL have filed a registration statement (including a prospectus, as supplemented by the product supplement for Jump and the index supplement) with the Securities and Exchange Commission, or SEC, for the offering to which this communication relates. You should read

the prospectus in that registration statement, the product supplement for Jump, the index supplement and any other documents relating to this offering that Morgan Stanley and MSFL have filed with the SEC for more complete information about Morgan Stanley, MSFL and this offering. You may get these documents without cost by visiting EDGAR on the SEC web site at www.sec.gov. Alternatively, Morgan Stanley, any underwriter or any dealer participating in the offering will arrange to send you the prospectus, the product supplement for Jump and the index supplement if you so request by calling toll-free 800-584-6837.

You may access these documents on the SEC web site at www.sec.gov as follows:

Product Supplement for Jump Securities dated November 16, 2017

Index Supplement dated November 16, 2017

Prospectus dated November 16, 2017

Terms used but not defined in this document are defined in the product supplement for Jump, in the index supplement or in the prospectus.
