Item 5. Other Events

1. Press Release. On July 19, 2001, the registrant ("Sprint") announced its second quarter results for the quarter ending June 30, 2001. The press release was as follows:

## Edgar Filing: SPRINT CORP - Form 8-K

### SPRINT ANNOUNCES SECOND QUARTER RESULTS

EDITOR'S NOTE: In the second quarter of 2000, the local division transferred a customer service operation to the PCS Group. Additionally, in the third quarter of 2000, Sprint changed its transfer pricing for certain transactions between the local division and the directory publishing business, which mainly had the effect of reducing local division revenues. The discussion of the local division's results assumes both events occurred at the beginning of 2000.

The Sprint FON Group (NYSE: FON) is comprised of Sprint's Global Markets segment, Local Telecommunications Division and product distribution and directory publishing businesses.

The Sprint PCS Group (NYSE: PCS) consists of Sprint's wireless PCS operations.

KANSAS CITY, Mo., - July 19, 2001 - Sprint today announced record second quarter consolidated revenues of \$6.42 billion, an increase of 10 percent from \$5.82 billion a year ago. During the quarter, the PCS Group reported exceptional operating cash flows (EBITDA) performance and strong customer growth, while reducing churn, increasing average revenue per customer and maintaining good cost control. The FON Group's earnings exceeded expectations due to solid performance in local operations and lower-than-expected losses in the Global Markets segment. In addition, the FON Group continued to increase bundled sales of wireless and wireline offerings and expanded its broadband initiative, opening new domestic Internet centers and deploying additional international capabilities in Europe and Asia. The PCS Group reported a loss per share from recurring operations of 26 cents compared to the 33 cent mean analyst estimate for the quarter and 46 cents a year ago. Second quarter diluted earnings per share for the FON Group's recurring operations were 33 cents compared to the 28 cent mean analyst estimate for the quarter and 50 cents a year ago.

"Sprint continues to build a strong foundation for future growth in both our wireless and wireline businesses," said William T. Esrey, chairman and chief executive officer. "Even in the face of a sluggish economy and heightened competition, I'm very optimistic about our future in the higher-growth areas of wireless, data and broadband services."

#### SPRINT PCS GROUP HIGHLIGHTS

The PCS Group reported EBITDA of \$491 million in the quarter, \$480 million above the same period a year ago excluding nonrecurring items. Excluding \$78 million of quarterly goodwill and intangibles amortization from the 1998 recapitalization of the PCS Group, operating income was a positive \$21 million for the quarter -- the first quarter that the PCS Group has achieved this milestone.

The Sprint PCS group added more than 1 million customers in the second quarter including 843,000 direct customers and 220,000 affiliate customers.

2

The PCS Group's total customer base, including resale and affiliate customers, increased to 12.8 million, up 60 percent from second quarter 2000. The company, including affiliates, operates the nation's largest 100 percent digital, 100 percent PCS wireless network, which now covers a population of nearly 239 million people or more than 80 percent of the U.S. population based on newly released 2000 U.S. Census data.

- . Revenues increased 53 percent to \$2.26 billion in the second quarter from \$1.48 billion during the same quarter a year ago.
- . Monthly average revenue per user (ARPU) for the quarter was \$61. In the

## Edgar Filing: SPRINT CORP - Form 8-K

- quarter, we began reporting contract cancellation fees on a net basis, reducing reported ARPU by about \$2 in the quarter. Had we restated prior periods' measures, second quarter 2001 ARPU would have been \$62, compared to \$59 in both the last and year ago quarters. Previous reporting would have shown that ARPU was \$63, compared to \$60 last quarter and \$59 a year ago.
- . Average monthly operating cash cost per user (CCPU) for the quarter was \$32. Again, reporting contract cancellation fees on a net basis reduced reported CCPU by about \$2 in the quarter. Had we restated prior periods' measures, second quarter 2001 CCPU would have been \$33 in both the 2001 second and first quarters, compared to \$35 a year ago. Previous reporting would have shown CCPU was \$34, consistent with last quarter's \$34 and better than \$35 a year ago.
  - . The average cost to acquire a customer was approximately \$340 in the quarter compared to \$350 during the same period last year.
  - . Sprint PCS increased its business customer base by 62 percent compared to the second quarter 2000. Continuing to fuel this strong growth was the Sprint PCS Wireless Web for Business, a full suite of wireless products and services offering wireless access to enterprise content and applications via Internet-ready Sprint PCS phones. At the end of the quarter, Sprint PCS reported more than 17,000 centrally managed business customers nationwide.
  - . Capital expenditures were \$1.06 billion for the quarter, reflecting continued network capacity expansion and development of new service capabilities.

"Sprint PCS has delivered stellar financial results, achieved strong subscriber gains and continued to deliver excellent clarity, coverage, connectivity and value for customers," Esrey said.

Esrey added that Sprint PCS is ideally positioned to be the U.S. wireless industry leader in deployment of high-speed, third-generation (3G) services. Unlike its wireless competitors, Sprint PCS believes it has adequate spectrum for a seamless transition to 3G, and offers the most cost-efficient path to the faster services, attributable to CDMA technology in 100 percent of its network.

"Sprint expects to provide its customers with high-speed 3G data rates that will change the way people traditionally use wireless services," Esrey said. "With 3G, customers with Sprint phones and other devices are expected to be able to take advantage of advanced mobile applications such as e-mail attachments, downloadable photos and streaming audio and video."

3

During the quarter, the PCS Group reached major milestones in its aggressive plans to bring high-speed 3G services to customers nationwide. Sprint announced separate multi-year deals with Lucent Technologies and Nortel Networks for deployment of enhanced wireless network equipment and professional services.

Also in the quarter, Sprint and Lucent completed the fastest-ever 3G over-the-air data call for a U.S. mobile wireless carrier, at speeds of up to 2.4 mbps.

Additionally in the second quarter, Sprint PCS was named #1 in Customer Services by Smart Money magazine. Also, Sprint announced nationwide availability of voice-enabled web services through Sprint PCS Voice Command. The services allow Sprint PCS customers to listen and respond to e-mail and access news, stocks, traffic reports and other services just by pressing \*TALK and speaking into any Sprint PCS Phone.

### SPRINT FON GROUP HIGHLIGHTS

- . Second quarter revenues of \$4.31 billion declined 3 percent compared to \$4.45

## Edgar Filing: SPRINT CORP - Form 8-K

billion in the same period a year ago.

- . Net income was \$290 million in the quarter compared to \$443 million a year ago, excluding 2000 second quarter costs associated with the terminated WorldCom merger and a nonrecurring gain on a sale of an independent directory publishing operation.
- . Second quarter diluted earnings per share from recurring operations were 33 cents compared to 50 cents a year ago.
- . Excluding the nonrecurring items, FON Group operating income in the quarter was \$488 million compared to \$754 million a year ago.
- . Operating cash flows in the quarter were \$1.10 billion, compared to \$1.31 billion in the second quarter a year ago, excluding nonrecurring items.

### Local Telecommunications Division

- . Revenues were up 3 percent for the quarter to \$1.55 billion from \$1.51 billion a year ago.
- . Operating income rose 5 percent in the quarter to \$466 million from \$443 million a year ago.
- . Voice grade equivalent lines grew 17 percent from the second quarter a year ago. The number of access lines increased 1 percent over the past 12 months and declined nearly 1 percent in the second quarter compared to the first quarter of 2001.
- . Operating cash flows in the quarter increased 2 percent to \$741 million from \$726 million in the previous second quarter.

### Global Markets

- . Revenues in the Global Markets segment for the quarter were down nearly 5 percent from a year ago due to lower long distance voice revenues and reduced sales of network management services and customer premise equipment. These declines were partially offset by growth in Internet Protocol (IP) and enterprise data services. Second quarter revenues were \$2.56 billion compared to \$2.69 billion a year ago.
- . Operating income declined in the quarter primarily due to lower long distance margins and increased bad debt expense combined with incremental dilution from Sprint ION(R), broadband fixed wireless activities and other growth initiatives. Second quarter operating loss was \$47 million compared to operating income of \$240 million a year ago.
- . Operating cash flows in the second quarter were \$287 million compared to \$507 million a year ago.
- . Long distance calling volumes rose 18 percent for the quarter compared to last year.

4

### Product Distribution and Directory Publishing

- . Revenues grew 1 percent to \$474 million in the second quarter from \$471 million a year ago. Non-affiliate revenues, which accounted for about 58 percent of total revenues, declined by 8 percent reflecting a telecom industry slowdown in capital spending.
- . Operating income increased 16 percent to \$79 million in the second quarter from \$68 million a year ago.
- . Operating cash flows grew nearly 17 percent to \$84 million in the second quarter from \$72 million a year ago.

"We continue to expand our broadband capabilities domestically and around the globe, and we continue to build on Sprint's heritage of innovation by developing and refining data capabilities and products designed for the next generation of communications customers," Esrey said. "With the FON Group's enviable set of assets, history of technological leadership and high degree of marketing expertise, I remain confident about the FON Group's ability to perform in today's highly-competitive marketplace," Esrey said.

## Edgar Filing: SPRINT CORP - Form 8-K

The Local Telecommunications Division delivered solid results, largely driven by increased dedicated access service revenues and growth in bundled sales. The increase in bundled sales contributed to an increase in the sale of add-on services such as Caller ID. Very strong expense control also enabled the division to achieve solid operating income growth in the quarter.

The local division's revenues from data services for the quarter increased 28 percent from a year ago and accounted for 78 percent of the division's total revenue growth.

The division sold over 400,000 consumer and business bundles during the quarter, which contributed to an increased penetration of Sprint's long distance and wireless services in the local territories. Nearly 43 percent of Sprint's local residential lines and 36 percent of its business lines now use Sprint long distance services. Increased bundle sales in the residential market continued to boost penetration of vertical services such as Caller ID, call waiting and voicemail services. The division also sold approximately 24,000 bundles of local and Sprint PCS wireless service during the quarter.

The local division continued to expand its broadband footprint in the quarter, installing over 7,000 new DSL lines and increasing the local division's total number of DSL lines to over 35,000. DSL revenue per user for the quarter was \$57, a \$2 increase sequentially.

In Global Markets, the long distance market proved once again to be highly competitive. Total voice revenues declined 5 percent in the quarter compared to a year ago. Business voice revenues continue to be impacted by aggressive market pricing. In the quarter, Sprint continued to increase sales of current-generation data services in spite of a sluggish economy and a competitive price environment. Sprint reported particularly strong results from asynchronous transfer mode (ATM) services. During the quarter, overall data revenue grew 6 percent compared to a year ago.

5

During the quarter, dedicated IP service revenues grew just over 30 percent compared to the same period last year and increased 12 percent sequentially. Overall, Internet revenues for the quarter grew 11 percent compared to the same period last year. To support future Internet revenue growth, Sprint recently opened a state-of-the-art Sprint E|Solutions Internet Center in Dallas-Fort Worth to offer customers application and Web-hosting support, collocation, and IT professional services. The new center joined similar facilities in Sacramento, Reston, Kansas City, New York and Boston. The company plans to open additional Internet centers in 4 more markets by the end of 2001.

During the quarter, Sprint signed an applications hosting agreement with BroadVision(R), Inc., designed to bring together Sprint's Internet Center capabilities with BroadVision's experience in delivering personalized, e-business application solutions. Sprint also was commissioned by the state of Texas to complete the nation's first-ever, comprehensive information technology security assessment for the state.

Sprint's Tier 1 Internet backbone continued to expand internationally during the quarter, with IP nodes deployed in Paris, Amsterdam, Brussels, Frankfurt, Sydney, Stockholm, Copenhagen, and Tokyo. Sprint expects to ultimately connect 15 cities in 13 major European and Asian countries by the end of 2001 and 35 cities in 19 countries by the end of 2003. The international deployment will provide multinational companies, ISPs and other communications companies with direct access to Sprint's data network and broad portfolio of advanced products and services.

## Edgar Filing: SPRINT CORP - Form 8-K

Sprint Broadband Direct currently serves 13 residential and 14 small business markets and has over 40,000 customers. Sprint Broadband Direct customers also are aggressively purchasing other Sprint products with over 35 percent of new customers choosing to bundle their data product with Sprint long distance services. Finally, Sprint recently completed the first phase of trial testing for next-generation technology related to Sprint Broadband Direct. Next-generation technology is expected to not only lower our cost structure, but also increase capacity and reduce line of sight issues. We expect to be able to leverage our own network of PCS towers in this endeavor and improve our opportunity for growth and selling bundled services.

### Business Outlook

The following statements are based on current expectations. These statements are forward-looking, and actual results may differ materially.

Sprint continues to expect that PCS Group net customer additions for the year could be around 3.8 million. At this level, Sprint would expect that a corresponding EBITDA level would be around \$1.7 billion, which is about \$100 million above our previous expectation. In the third quarter Sprint expects the PCS Group to achieve EBITDA in the low \$500 million range. Sprint continues to expect that full year capital expenditures for the PCS Group will be approximately \$3.4 billion.

Sprint expects that total FON Group revenues will decline by 1-2% in the third quarter compared to the same period last year. In the third quarter, Sprint expects that FON Group earnings could approach 30 cents per share. Sprint continues to expect that full year FON Group capital expenditures will be approximately \$5.9 billion although this level will likely be influenced by any revisions to our plans for broadband initiatives. Sprint expects to provide an update on its plans and expectations for Sprint ION in the late summer to early fall timeframe.

6

### CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING INFORMATION

This press release includes certain estimates, projections and other forward-looking statements. Future performance cannot be ensured. Actual results may differ materially from those in the forward-looking statements. Some factors that could cause actual results to differ include:

- . the effects of vigorous competition in the markets in which Sprint operates;
- . the costs and business risks related to entering new markets necessary to provide nationwide or global services and providing new services;
- . the ability of the PCS Group to continue to grow a significant market presence;
- . the effects of mergers and consolidations within the telecommunications industry;
- . the uncertainties related to Sprint's strategic investments;
- . the impact of any unusual items resulting from ongoing evaluations of Sprint's business strategies;
- . unexpected results of litigation filed against Sprint;
- . the possibility of one or more of the markets in which Sprint competes being impacted by changes in political, economic or other factors such as monetary policy, legal and regulatory changes including the impact of the Telecommunications Act of 1996, or other external factors over which Sprint has no control; and
- . other risks referenced from time to time in Sprint's filings with the Securities and Exchange Commission ("SEC").

## Edgar Filing: SPRINT CORP - Form 8-K

The words "estimate," "project," "intend," "expect," "believe" and similar expressions are intended to identify forward-looking statements. You should not place undue reliance on forward-looking statements, which speak only as of the date of this press release. Sprint is not obligated to publicly release any revisions to forward-looking statements to reflect events after the date of this press release or unforeseen events. Sprint provides a detailed discussion of risk factors in periodic SEC filings and you are encouraged to review these filings.

The FON Group and the PCS Group are integrated businesses of Sprint Corporation and do not constitute stand-alone entities.

- (1) Represents costs recorded in the 2000 second quarter associated with the proposed WorldCom merger, which was terminated. These charges reduced FON Group income from continuing operations by \$105 million, or \$0.12 per share and increased PCS Group net loss from continuing operations by \$16 million, or \$0.02 per share.
- (2) In the 2001 first quarter, the FON Group recorded net gains on investment activities of \$14 million which increased income from continuing operations by \$9 million or \$0.01 per share. In the 2000 second quarter, the FON Group recorded a gain on sale of an independent directory publishing operation of \$45 million, which increased income from continuing operations by \$27 million or \$0.03 per share. In the 2000 first quarter, the FON Group recorded net gains on investment activities of \$26 million, which increased income from continuing operations by \$17 million or \$0.02 per diluted share. In the 2000 first quarter, the PCS Group recorded a gain on sale of network infrastructure and the right to manage customers to a PCS affiliate of \$28 million, which decreased PCS Group loss from continuing operations by \$18 million or \$0.02 per share.

Sprint's FON Group reporting segments are intended to reflect the operating results of its global markets, local services, and product distribution and directory publishing businesses. The Global Markets segment includes domestic and international voice services (except for consumer services provided to customers within Sprint's local franchise territories); data communications services such as frame relay access and transport, web hosting, collocation, security services, our integrated communications services, referred to as Sprint ION, and broadband fixed wireless services; and Internet services. The Local Services segment includes local phone services, access to its local network, consumer long distance services provided to customers within our local franchise territories, and sales of telecommunications equipment. The Product Distribution and Directory Publishing segment provides wholesale distribution services of telecommunications products and publishes and markets white and yellow page phone directories. The FON Group is an integrated business of Sprint Corporation and does not constitute a stand-alone entity.
