VIEW SYSTEMS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

FOR THE SIX MONTHS ENDED JUNE 30, 2002

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Nature of Operations

View Systems, Inc. (the Company) designs and develops computer software and hardware used in conjunction with surveillance capabilities. The technology utilizes the compression and decompression of digital inputs. In March 2002, the Company acquired Milestone Technology, Inc. which has developed a concealed weapons detection portal.

Basis of Consolidation

The consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries, Milestone Technology, Inc., Real View Systems, Inc. (Real View), Xyros Systems, Inc. (Xyros) and Eastern Tech Manufacturing, Inc. (ETMC). All significant intercompany accounts and transactions have been eliminated in consolidation.

Use of Estimates

Management uses estimates and assumptions in preparing financial statements in accordance with accounting principles generally accepted in the United States of America. Those estimates and assumptions affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities, and the reported revenues and expenses. Actual results could differ from the estimates that were used.

Revenue Recognition

The Company and its subsidiaries recognize revenue and the related cost of goods sold upon shipment of the product.

Inventories

Inventories are stated at the lower of cost or market. Cost is determined by the last-in-first-out method (LIFO). The inventory at June 30, 2002 includes the costs associated with the development and production of the weapons detection portals, which are the principal product of Milestone Technology, Inc. The costs also include amounts spent to document the designs of the systems.

Table of Contents

VIEW SYSTEMS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE SIX MONTHS ENDED JUNE 30, 2002

Property and Equipment

Property and equipment is recorded at cost and depreciated over their estimated useful lives, using the straight-line and accelerated depreciation methods. Upon sale or retirement, the cost and related accumulated depreciation are eliminated from the respective accounts, and the resulting gain or loss is included in the results of operations. The useful lives of property and equipment for purposes of computing depreciation are as follows:

Equipment	5-7 years
Software tools	3 years

Repairs and maintenance charges which do not increase the useful lives of assets are charged to operations as incurred. Depreciation expense for the six months ended June 30, 2002 and 2001 amounted to \$930,378 and \$22,382 respectively.

Impairment of Long-Lived Assets

Long-lived assets and identifiable intangibles (including goodwill) to be held and used are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount should be addressed. Impairment is measured by comparing the carrying value to the estimated undiscounted future cash flows expected to result from use of the assets and their eventual disposition.

Income Taxes

Deferred income taxes are recorded under the asset and liability method whereby deferred tax assets and liabilities are recognized for the future tax consequences, measured by enacted tax rates, attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss carryforwards. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period the rate change becomes effective. Valuation allowances are recorded for deferred tax assets when it is more likely than not that such deferred tax assets will not be realized.

Research and Development

Research and development costs are expensed as incurred. Equipment and facilities acquired for research and development activities that have alternative future uses are capitalized and charged to expense over the estimated useful lives.

Table of Contents

VIEW SYSTEMS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE MONTHS ENDED JUNE 30, 2002

Advertising

Advertising costs are charged to operations as incurred. Advertising costs for the six months ended June 30, 2002 and 2001 were \$9,110, and \$1,126 respectively.

Monetary Transactions

Nonmonetary transactions are accounted for in accordance with Accounting Principles Board Opinion No. 29 *Accounting for Nonmonetary Transactions* which requires the transfer or distribution of a nonmonetary asset or liability to be based, generally, on the fair value of the asset or liability that is received or surrendered, whichever is more clearly evident.

Financial Instruments

For most financial instruments, including cash, accounts receivable, accounts payable and accruals, management believes that the carrying amount approximates fair value, as the majority of these instruments are short-term in nature.

Net Loss Per Common Share

Basic net loss per common share (Basic EPS) is computed by dividing net loss available to common stockholders by the weighted average number of common shares outstanding. Diluted net loss per common share (Diluted EPS) is computed by dividing net loss available to common stockholders by the weighted average number of common shares and dilutive potential common share equivalents then outstanding. Potential common shares consist of shares issuable upon the exercise of stock options and warrants. The calculation of the net loss per share available to common stockholders for the six months ended June 30, 2002 does not include potential shares of common stock equivalents, as their impact would be antidilutive.

Segment Reporting

The company has determined that it does not have any separately reportable operating segments as of June 30, 2002.

2. FINANCIAL CONDITION

Since its inception, the Company has incurred significant losses and as of June 30, 2000 had an accumulated deficit of \$9.3 million. The Company believes that it will incur operating losses for the foreseeable future. There can be no assurance that the Company will be able to generate sufficient revenues to achieve or sustain profitability in the future. However, the Company believes that its current cash and cash equivalents, along with sales revenue and anticipated equity infusions, will be sufficient to sustain operations through June 30, 2001.

Table of Contents

VIEW SYSTEMS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE MONTHS ENDED JUNE 30, 2002

3. BUSINESS COMBINATION

The Company purchased 100% of the common stock of Milestone Technology, Inc. effective March 25, 2002. The purchase was accomplished in two transactions. The Company acquired 6% of Milestone in December 2001 in exchange for 500,000 shares of the Company's common stock. In March 2002 the Company acquired the remaining 94% of Milestone for 3,300,000 shares of the Company's common stock. Based on the then market value of the Company's common stock (\$0.55 per share in December and \$0.31 per share in March) the total cost of the acquisition was \$1,298,000.

Milestone Technology, Inc. is a developer of concealed weapons detections systems. Its primary product is a walk-through detector that uses advanced magnetic technology to accurately pinpoint the location, size and numbers of concealed weapons. Prior to its acquisition, Milestone Technology, Inc. was considered to be a development stage enterprise.

Summarized unaudited financial statements for Milestone Technology, Inc. as of and for the year ended December 31, 2001 are as follows:

	Balance Sheet (Unaudited) As of December 31, 2001

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read and reviewed in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations set forth in the Company's Annual Report on Form 10-QSB for the year ended December 31, 2001. In addition to historical information, this Form 10-QSB contains forward-looking statements that involve risks and uncertainties, such as statements of the Company's plans and expectations. The Company's actual results could differ materially from management's expectations.

Since start-up of operations in September 1998, and until the end of 2001 we have devoted most of our resources to the development, sale of digital video surveillance products. We have generated limited revenues from these products to date, but are rapidly expanding our distribution network. At the same time we are working on locating new products to meet market demand and enhancing our product line. We have had some success in capturing interest and limited sales in overseas markets such as Europe.

In December of 2001 we entered into a joint venture with Milestone Technology to enhance and further develop their Concealed Weapons Detection portal. This relationship was precipitated by our ability to manufacture electronic boards and the fact that we had skills in developing facial recognition systems. In March of 2002, the relationship evolved into a complete merger of the two companies. Milestone has no less than 8 patents and licenses than become available to be integrated into sellable products. This also resulted in a net increase in assets to over \$4,000,000. We believe that the combination of our products: Digital Video Monitoring Centers, advanced biometric access control, such as facial recognition, and Concealed Weapons Detection (CWD) will help us meet the new heightened awareness demands of security due to the September 11th events.

We have restructured the company and refocused our efforts towards marketing this CWD portal as an entrée and adding other capabilities such as explosives detection capability to build a comprehensive entry control device.. This direction is requiring us to make changes in personnel, engineering and staff that is experienced in doing business with the federal government, state government and local jurisdictions. A new President and Chief Operating Officer has been appointed and is taking control and redirecting our efforts. We have melded the two companies, Milestone and View Systems, operations, assets and distribution networks. Multitude functional changes have been made to integrate efforts and reduce redundancy.

Revenues resulting from these changes will not be realized for several quarters, although we believe that they will be significantly greater as a result of this new direction. During the last three months we have opened a new facility in Denver, CO and

Table of Contents

VIEW SYSTEMS, INC.

are opening a sales and service location in the Los Angeles area. The need to support our resellers has increased in complexity due to the increased complexity of our systems.

An advisory board has been formed and is being built that can increase sales, revenue and expand our reach in the security market. Several prestigious individuals have become advisors to our board. More are being interviewed and it expected will join the Board of Directors and Advisory Board.

Results of Operations

Three Months Ended June 30, 2002 Compared With the Three Months Ended June 30, 2001:

Revenue

For the six months ended June 30, 2002, revenues from sales of our products decreased \$300,893 or 70%, to \$131,596 from \$432,489 in the same period last year. This is largely due to our shift in focus from purely digital video storage recorders to the introduction of our award winning SecureScan Concealed Weapons Detection system. The sales cycles in the new market we are addressing are long and require the approval of highly bureaucratic decision makers. In contrast, the price points and margins are many multiples larger.

Gross Profit

Gross profit on sales for the six months ended June 30, 2002 decreased \$183,619 or 76% to \$59,482 compared with \$243,101 in the same period last year. Gross profit margin for the six months ended June 30, 2002 was 45% compared with 55% in the same period last year. Because of low net sales we achieved in the period ended June 30, 2002, for reasons explained in the previous paragraph under Revenue, we do not believe gross profit margin comparisons are meaningful at this state of our operations.

Operating Expenses

Operating expenses for the six months ended June 30, 2002, increased to \$1,293,016, compared with \$921,869 for the comparable period in 2001. The increase is principally due to increasing the allowance for bad debts by \$234,809, increased expenditures in R & D and increased professional fees. Professional fees as of June 30, 2002 included \$211,234 from the issuance of common stock as compensation for services rendered in lieu of cash. The increases have been necessary due to shifts in our product line to the Concealed Weapons Detection units.

As a result of the foregoing, net loss was \$(1,233,534) for the six months ended June 30, 2002, compared to a net loss of \$(776,315) for the six months ended June 30, 2001.

Table of Contents

VIEW SYSTEMS, INC.

Costs of Products and Services Sold

The cost of products and services sold, was \$72,114 for the six months ended June 30, 2002 and represented 55% of revenue for the period, compared to \$198,900 for the six months ended June 30, 2001 which represents 45% of revenues for that period. Because of our low sales volume during this period, we do not consider the costs of goods sold in the same period last year to be a good measure of our true costs of goods sold. As our product sales increase and account for a larger percentage of our overall sales, we expect that our costs of goods and services sold will decline and stabilize as a percentage of total revenue. We are continually working on engineering changes in our security products that we expect will lower component costs for these products. We do not determine our inventory on a quarterly basis, instead we do it on an annual basis. Therefore, our cost of goods sold calculations are based on estimates of inventory used in products sold.

Research and Development Expense

We spent \$74,686 on research and development for the six months ended June 30, 2002, as compared with \$0 in the same period last year. We are working on changing our production facilities to manufacture the CWD portal. The changes in the production facility will allow our margins to double and possibly triple. Currently we purchase the CWD portal for about 60% of our selling price. Manufacturing ourselves will allow us to sell at about 3 times cost of manufacturing.

Salaries and Benefits

We spent \$295,026 on salaries and benefits for the six months ended June 30, 2002, as compared with \$305,217 in the same period last year. We incurred \$70,257 on business development expenses for the six-month period ended June 30, 2002 as compared with \$24,105 in the same period a year ago. We expect the business development expense to increase sharply as we launch the new products into the market.

Net Operating Loss

We incurred approximately \$(1,233,534) of net operating loss carry forwards for the six-month period ended June 30, 2002, which may be used to offset taxable income and income taxes in future years.

The refocusing of our sales and manufacturing to the Concealed Weapons Detection portal is making comparisons for the three month period a year ago not significant. It will most likely take another three months until we get a steady revenue flow to be able to make valid comparisons. Manufacturing, shipping and service is significantly different and needs a longer time to compare.

Revenue

For the three months ended March 31, 2002, revenues from sales of our products decreased \$19,268 or 22% to \$71,512 from \$90,780 in the same period last year. The refocusing of our efforts to the Concealed Weapons Detection Portals sales has resulted in low net sales for the period ended June 30, 2002. The sales cycles for this product are significant longer but also our revenue potential is much larger than digital video revenue. The competition in digital video products is much greater whereas the CWD portal is unique and patent protected.

Gross Profit

Gross profit on sales for the three months ended June 30, 2002 decreased \$3,616 or 10% to \$32,174 compared with \$35,790 in the same period last year. Gross profit margin for the three months ended June 30, 2002 was 45% compared with 30% in the same period last year. We do not believe gross profit margin comparisons are meaningful at this state of our operations. We do anticipate higher gross margin percentages as our new products are sold.

Operating Expenses

Operating expenses for the three months ended June 30, 2002, increased to \$801,313, compared with \$431,818 for the comparable period in 2001. The increase is principally due to a shift of expenditures with increased expenditures in research and development, professional fees and bad debt expense.

As a result of the foregoing, net loss was \$(769,139) for the three months ended June 30, 2002, compared to a net loss of \$(396,028) for the three months ended June 30, 2001. Our expenses have increased significantly in spite of decreased sales due to our shifting of direction to the

CWD sales.

Costs and Expenses:

Costs of Products and Services Sold

The cost of products and services sold, was \$39,338 for the three months ended June 30, 2002 and represented 65% of revenue for the period, compared to \$59,990 for the three months ended June 30, 2001 which represents 61% of revenues for that period. Because of our low sales volume during this period, we do not consider the costs of goods sold in the same period last year to be a good measure of our true costs of goods sold. As our product sales increase and account for a larger percentage of our overall sales, we expect that our costs of goods and services sold will decline and stabilize as a percentage of total revenue. We are continually working on engineering changes in our security products that we expect will lower component costs for these products. We do not determine our inventory on a quarterly basis, instead we do it on an annual basis. Therefore, our cost of goods sold calculations are based on estimates of inventory used in products sold.

Research and Development Expense

We spent \$21,404 on research and development for the three months ended June 30, 2002, as compared with \$0 in the same period last year. We are working on introducing additional products, such as the CWD and Central Station Monitoring to the market in 2002. We expect continued heavy expenditures in this area, evidencing our commitment to develop industry leading video management and identification products.

Bad Debt Expense

Bad debt expense increased to \$234,809 for the period as we continue to attempt to collect receivables for 2001 sales made to an international customer. We are currently in negotiation to collect the amounts but we believe that amounts actually collected will not be the full sales amounts and that the allowance established at this time will be sufficient.

Salaries and Benefits

We spent \$123,581 on salaries and benefits for the three months ended June 30, 2002, as compared with \$131,511 in the same period last year. We incurred \$27,763 as business development expenses for the three month period ended June 30, 2002 as compared with \$6,986 in the same period a year ago.

Net Operating Loss

We incurred approximately \$(750,000) of net operating loss carry forwards for the three-month period ended June 30, 2002, which may be used to offset taxable income and income taxes in future years.

Liquidity and Capital Resources

Since the start-up of our operations in 1998, we have funded our cash requirements primarily through equity transactions. We received \$10,946,435 since inception through the issuance of our common stock. We are not currently generating cash from our operations in sufficient amounts to finance our business and will continue to need to raise capital from other sources. We used the proceeds from these sales of

Table of Contents

VIEW SYSTEMS, INC.

equity to fund operating activities, including, product development, sales and marketing, and to invest in the acquisition of technology, assets and business. As of June 30, 2002, we had total assets of \$4,013,145, an increase of \$1,414,433 over last year's \$2,598,712 at December 31, 2001. Total liabilities were \$1,151,738, at June 30, 2002, resulting in stockholders' equity of \$2,861,407, an increase of \$757,404 from the December 31, 2001 balance of \$2,104,003.

During the six months ended June 30, 2002, our cash decreased from \$73,344 at December 31, 2001, to \$28,764 at June 30, 2002. Net cash used in operating activities was \$834,391 for the six months ended June 30, 2002, including decreases in accounts receivable of \$233,801 (primarily from write downs), increases in inventory of \$60,360, and decreases in accounts payable of \$24,414.

Net cash generated from financing activities during the six months ended June 30, 2002 was \$778,980, consisting of proceeds received from sales of stock of \$753,700, collections of loans to shareholders of \$31,332, less payments of \$6,052 made on a promissory note to Columbia Bank.

As a result of the foregoing, at June 30, 2002 we had working capital of \$244,863, including \$732,561 in net trade accounts receivable and \$475,651 in inventory. We have provided and may continue to provide payment term extensions to certain customers from time to time. As of June 30, 2002 we have not granted material payment term extensions.

Our inventory balance at June 30, 2002, was estimated to be \$475,651. We do not take inventory on a quarterly basis, and we made inventory estimates based on annual inventory determinations. With expected increased product sales, we will need to make increased inventory expenditures. However, the terms of our product sales generally requires a twenty five percent (25%) deposit on order. In addition, we endeavor to keep inventory levels low. Therefore, we do not believe that increased product sales, associated materials purchases and inventory increases, will adversely affect liquidity.

Under our outstanding employment and consulting agreements, we are obligated to pay Mr. Than \$96,000 per year. Mr. Than has been paid intermittently and we expect to become current with his compensation this fiscal year. If we terminate the employment of Mr. Than without cause or because of merger, acquisition or change in control, we will be obligated to pay him approximately \$350,000 in severance payments on a three-year period.

We believe that cash from operations and funds available will not be sufficient to meet anticipated operating capital expenditure and debt service requirements for the next twelve months and that we will be dependent on raising additional capital through equity sales or debt financing.

We also have outstanding warrants with various investors with an exercise price of \$.40 per share. If the warrant holders exercise all of their warrants, at the exercise

Table of Contents

VIEW SYSTEMS, INC.

price of \$.40 per share, we will receive \$800,000, which we will use for additional working capital.

Plan Of Operation

The amount of capital that we need to raise will depend upon many factors primarily including

- the rate of sales growth and market acceptance of our product lines;
- the amount of investment needed to set up manufacturing of the CWD units at our facility.;
- the amount and time of expenditures to sufficiently market and promote our products;

We intend to use the cash raised from the private sale of shares and the exercise of warrants held by the Selling Stockholders to the following:

- bring our Concealed Weapons Detection and recording flash light devices to market;
- continue our product development efforts;
- expand our sales, marketing and promotional activities for the SecureScan line of products; and
- increase our engineering, production management, quality control, and customer support staff.

We operate in a very competitive industry that requires continued large amounts of capital to develop and promote our products. We believe that it will be essential to continue to raise additional capital, both internally and externally, to compete in this industry.

In addition to accessing the public and private equity markets, we will pursue bank credit lines and equipment lease lines for certain capital expenditures. We currently estimate we will need between \$3 million and \$4 million to fully develop all our products and launch our expanded business operations in accordance with our current business plan.

Risk Factors and Cautionary Statements

Statements within the Form 10-QSB which are not historical facts, including statements about strategies and expectations for new and existing products, technologies, and opportunities, are forward-looking statements that involve risks and uncertainties. Our actual results may differ substantially from such forward-looking statements. Forward-looking statements involve risks and uncertainties that could cause actual results to differ materially from those expressed or implied by the statement, including, but not limited to, risks detailed in our other securities filing, including our Annual Report on Form 10-KSB for the year ended December 31, 2001, and registration statement, as amended, filed on Form SB-2.
