VistaCare, Inc.
Notes to Consolidated Financial Statements
(Unaudited)
December 31, 2007

Description of Business

VistaCare, Inc. (VistaCare, Company, we or similar pronoun), is a Delaware corporation providing medical care designed to address the physical, emotional, and spiritual needs of patients with a terminal illness and the support of their family members. Hospice services are provided predominately in the patient's home or other residence of choice, such as a nursing home or assisted living facility, or in a hospital or inpatient unit. VistaCare provides inpatient services at its inpatient units and through leased beds at unrelated hospitals and skilled nursing facilities on a per diem basis. VistaCare provides services in Alabama, Arizona, Colorado, Georgia, Indiana, Massachusetts, New Mexico, Nevada, Ohio, Oklahoma, Pennsylvania, South Carolina, Texas and Utah.

The accompanying interim consolidated financial statements of VistaCare have been prepared in conformity with U.S. generally accepted accounting principles, consistent in all material respects with those applied in the Company's Annual Report on Form 10-K for the fiscal year ended September 30, 2007 (fiscal 2007).

1. Basis of Presentation

The accompanying unaudited consolidated financial statements include accounts of VistaCare and its wholly owned subsidiaries: VistaCare USA, Inc., Vista Hospice Care, Inc., and FHI Health Systems, Inc. (including its wholly-owned subsidiaries). Intercompany transactions and balances have been eliminated in consolidation.

The balance sheet at September 30, 2007 has been derived from the audited financial statements at that date but does not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. For further information, refer to the consolidated financial statements and footnotes thereto included in VistaCare, Inc.'s Annual Report on Form 10-K for the fiscal year ended September 30, 2007.

The accompanying unaudited consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by U.S. generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments, including normal recurring accruals, considered necessary for a fair presentation have been included. Operating results for the three months ended December 31, 2007 are not necessarily indicative of the results that may be expected for the fiscal year ending September 30, 2008.

2. Share-Based Compensation

The Company accounts for share-based compensation transactions according to the provisions of Statement of Financial Accounting Standards (SFAS) Statement No. 123(R), Share-Based Payment (SFAS No. 123(R)), which requires companies to measure and recognize compensation expense for all share-based payments at fair value. At December 31, 2007, the Company had two active share-based compensation plans. Stock awards granted from these plans are granted at the fair market value (i.e., the closing price of the stock on the NASDAQ Global Market) on the date of grant, and vest over a period determined at the time the awards are granted, ranging from immediate vesting to seven year vesting, with most awards vesting over five years. The awards generally have a maximum term of ten years. Compensation expense related to share-based awards is amortized over the vesting period with 10% recorded as patient care expenses and 90% recorded in sales, general and administrative expenses in the Consolidated Statements of Operations. When options are exercised or restricted shares are granted, new shares of the Company's Class A common stock are issued under these share-based compensation plans. A total of 4.3 million shares were authorized for issuance under these plans and at December 31, 2007 approximately 1.4 million shares were available for issuance.

The adoption of SFAS No. 123 (R) by the Company has caused management to reevaluate the equity compensation program for employees and non-employee directors. Subsequent to the adoption of SFAS 123(R) the Company has granted more restricted shares than stock options due to management's belief that restricted shares provide a higher level of incentive to employees and non-employee directors than stock options. The restricted shares are recorded as outstanding shares on the date the shares are granted.

Table of Contents**VistaCare, Inc.****Notes to Consolidated Financial Statements (Unaudited) continued**

The employee or director who is given the grant is required to perform future service in order to receive the shares. In addition to service vesting, the Chief Executive Officer was granted restricted shares that vest upon the Company achieving selected performance objectives.

The Company estimates the fair value of all stock option awards as of the date of the grant by applying the Black-Scholes option pricing model. The application of this valuation model involves estimates and management judgement that impact the calculation of compensation expense related to the stock option awards. There were no stock options granted during the three months ended December 31, 2007. The key assumptions used in determining the fair value of options granted during the three months ended December 31, 2006 are as follows:

	Three Months Ended December 31, 2006
Expected dividend yield	0.0%
Expected stock price volatility	48%
Risk-free interest rate	4.44%
Expected term (in years)	7.5

The Company historically has not paid dividends and does not anticipate paying any dividends in the future. The expected stock price volatility is based on historical trading of the Company's stock. The risk-free interest rate is based on the U.S. treasury security rate in effect as of the date of grant. The expected term of options is an average of the contractual terms and vesting periods, respectively.

A summary of stock option activity under all Company plans for the three months ended December 31, 2007 is presented in the table below:

	Number of Shares Under Option	Weighted Average Exercise Price
Outstanding at September 30, 2007	1,559,713	\$ 14.35
Granted		
Exercised	(1,840)	6.25
Cancelled	(6,560)	14.44
Expired	(24,760)	20.35
Outstanding at December 31, 2007	1,526,553	\$ 14.26

A summary of restricted stock activity under all Company plans for the three months ended December 31, 2007 is as follows:

	Nonvested Shares	Shares	Weighted Average Grant Date Fair Value
Nonvested at September 30, 2007		273,070	\$ 11.36
Granted		7,500	7.43
Vested		(23,500)	11.89
Forfeited		(7,100)	10.54

Nonvested at December 31, 2007	249,970	\$	11.22
--------------------------------	---------	----	-------

Total compensation costs for share-based awards for the three months ended December 31, 2007 and 2006 totaled approximately \$0.4 million and \$0.5 million, respectively. As of December 31, 2007, there was approximately \$4.0 million of total unrecognized compensation cost related to nonvested share-based compensation arrangements granted under all Company plans. That cost is expected to be recognized over a weighted-average period of 2.6 years.

SFAS No. 123(R) requires the benefits of tax deductions in excess of the compensation cost recognized for those options (excess tax benefits) to be classified as financing cash flows in the Consolidated Statements of Cash Flow. During the three months ended December 31, 2007 and 2006, the Company had no excess tax benefit related to stock option exercises.

Table of Contents**VistaCare, Inc.****Notes to Consolidated Financial Statements (Unaudited) continued****3. Accrued Expenses and Other Current Liabilities**

A summary of accrued expenses and other current liabilities follows (in thousands):

	December 31, 2007	September 30, 2007
Patient care expenses	\$ 10,394	\$ 9,256
Salaries and payroll taxes	3,757	5,656
Accrued workers compensation	3,561	3,617
Accrued administrative expenses	3,399	3,366
Accrued paid time-off	1,811	2,043
Self-insured health expenses	1,427	1,427
Accrued taxes	129	82
Total accrued expenses and other current liabilities	\$ 24,478	\$ 25,447

4. Earnings Per Share

Basic net income per share is computed by dividing net income by the weighted average number of shares outstanding during the period (excluding issued but unvested shares). Diluted net income per share is computed by dividing net income by the weighted average number of shares outstanding during the period plus the effect of potentially dilutive securities, including outstanding warrants and employee stock options (using the treasury stock method). The effect of potentially dilutive securities amounting to approximately 1.4 million shares and 1.6 million shares were not included in the diluted earnings per share calculation for the three months ended December 31, 2007 and 2006, respectively, because inclusion of the securities would be anti-dilutive.

The following table presents the calculation of basic and diluted net income per share (in thousands, except per share information):

	Three Months Ended December 31,	
	2007	2006
Numerator		
Net income	\$ 1,518	\$ 391
Denominator		
Denominator for basic net income per share weighted average shares	16,606	16,650
Effect of dilutive securities:		
Stock options	190	362
Denominator for diluted net income per share adjusted weighted average shares and assumed conversion	16,796	17,012
Net income per share:		
Basic net income to stockholders	\$ 0.09	\$ 0.02

Diluted net income to stockholders \$ 0.09 \$ 0.02

5. Restructuring

During the second quarter of fiscal year ended September 30, 2007, the Company announced a restructuring plan that includes rationalization of sites, cost reductions, process improvements and organizational streamlining. The Company's restructuring plan calls for the restructuring initiatives to be phased in over a several month period with all initiatives implemented by December 31, 2008, the first quarter of fiscal year 2009. When completed, the restructuring is expected to include the consolidation, closure or sale of 13 sites and two inpatient units and reductions in force at both the corporate headquarters and site locations. As of December 31, 2007, eight hospice programs and one inpatient unit were closed as part of the restructuring. There were no significant restructuring costs during the three months ended December 31, 2006.

The Company accounts for the costs of the restructuring in accordance with SFAS No. 146, Accounting for Costs Associated with Exit or Disposal Activities. Under SFAS No. 146, a liability for a cost associated with an exit or disposal activity is recognized

Table of Contents**VistaCare, Inc.****Notes to Consolidated Financial Statements (Unaudited) continued**

at its fair value in the period in which the liability is incurred. Generally, restructuring costs consist of severance, lease termination payments, moving expenses and fixed asset write offs. Severance is accrued when the amount by employee is determined, communication with the employee has occurred and no future service is required. If future service is required, the cost of the related severance is accrued over the future service period. Lease termination expense is accrued when an agreement has been reached with the landlord and the site terminates operations. A site is considered closed when patients are no longer serviced from a particular location. Severance, early lease termination and other restructuring costs are recorded in sales, general and administrative expenses on the accompanying Consolidated Statements of Operations. Fixed asset write offs are recorded in Loss on Disposal of Assets on the accompanying Consolidated Statements of Operations. Any unpaid amounts are recorded in accrued expenses and other current liabilities on the accompanying Consolidated Balance Sheets. The following tables summarize total costs expensed for the restructuring program as of December 31, 2007 (in thousands):

	Expected Costs	Expensed During Three Months Ended December 31, 2007	Restructuring Costs to Date	Expected Future Costs
Severance	\$ 1,802	\$ 35	\$ 1,386	\$ 416
Lease termination	2,280		572	1,708
Other	847		152	695
Total restructuring costs	\$ 4,929	\$ 35	\$ 2,110	\$ 2,819

The future expected costs represent an estimate as of December 31, 2007 with respect to sites the Company intends to close in the future but have not yet met expense recognition criteria given that notification and closure activities have not yet commenced. For these sites the Company performed impairment analyses with respect to their operating assets and determined they were recoverable as operating assets, or were not recorded in excess of their estimated recoverable value. If the Company sells selected program sites rather than closing the sites, expected future costs may be lower due to lower lease termination and severance costs. In addition, the recoverability of certain operating assets could become less recoverable depending upon the nature of the sales transaction.

The following table reconciles the accrued liability on the balance sheet related to the restructuring program as of December 31, 2007 (in thousands):

	Activity for Three Months Ended December 31, 2007
Balance at September 30, 2007	\$ 258
Charges to sales, general & administrative expense	35
Payments	(163)
Write offs of fixed assets	
Balance at December 31, 2007	\$ 130

6. Debt

In December 2004, the Company renewed its \$30.0 million revolving line of credit and entered into a \$20.0 million term loan agreement (this total of \$50.0 million is collectively referred to herein as the credit facility). The credit facility is collateralized by a lien on substantially all of the Company's assets, including cash, accounts receivable and equipment. Loans under the credit facility bear interest at an annual rate equal to the one-month London Interbank Borrowing Rate in effect from time to time plus 3.0% - 5.0%, depending upon the Company achieving certain financial ratios as described in the credit agreement. Accrued interest under the revolving line of credit and the term loan is due monthly.

Under the revolving line of credit, the Company may (upon satisfaction of certain conditions and lender's waiver of a covenant default) borrow, repay and re-borrow an amount equal to the lesser of: (i) \$30.0 million or (ii) 85% of the net value of eligible accounts receivable. The revolving line of credit can be used for working capital and general corporate purposes, including acquisitions. Under the \$20.0 million term loan, borrowings are used for permitted acquisitions as defined in the credit agreement. The lender will permit term loans provided the Company's pro forma debt service coverage ratio, as defined in the credit agreement, does not fall below the specified ratio (at December 31, 2007, the Company failed to meet the specified ratio). The maturity date of the credit facility is December 22, 2009. As of December 31, 2007, there was no balance outstanding on the revolving line of credit or

Table of Contents**VistaCare, Inc.****Notes to Consolidated Financial Statements (unaudited) continued**

on the term loan.

The credit facility contains certain customary covenants including those that restrict the Company's ability to incur additional indebtedness, pay dividends under certain circumstances, permit liens on property or assets, make capital expenditures, make certain investments and prepay or redeem debt or amend certain agreements relating to outstanding indebtedness. Because of recent operating losses, the Company is not in compliance with the credit facility's debt service coverage ratio covenant and would have to receive a lender waiver, which has not been requested, and complete certain administrative procedures in order to borrow under the current terms of the credit facility.

7. Income Tax

At the end of each interim period, the Company makes its best estimate of the effective tax rate expected to be applicable for the full fiscal year and adjusts the quarterly rate, as necessary. Significant items affecting the difference between the Company's income for financial reporting purposes and the taxable income include the Medicare Cap accrual, stock option expense, amortization expense, and bad debt expense. The Company has established a full valuation allowance on its net deferred tax asset, excluding tax deductible goodwill.

Financial Accounting Standards Board Interpretation No. 48 Accounting for Uncertainty in Income Taxes an Interpretation of FASB Statement No. 109 (FIN 48) requires that companies recognize the effect of a tax position in their consolidated financial statements if there is a greater likelihood than not of the position being sustained upon audit based on the technical merits of the position. The Company adopted the provisions of FIN 48 effective October 1, 2007. The adoption of FIN 48 resulted in no cumulative effect adjustment to the Company's retained earnings.

As of October 1, 2007 (the date the Company adopted FIN 48) and December 31, 2007, the Company had no unrecognized tax benefits. The Company's policy to classify interest and penalties relating to uncertain tax positions as a component of income tax expense in its Consolidated Statement of Operations did not change as a result of implementing the provisions of FIN 48. As of October 1, 2007, there was no liability associated with uncertain tax positions that would affect the Company's effective tax rate.

The Internal Revenue Service (the IRS) recently completed an audit of the Company's tax returns for fiscal years 2005 and 2006 which included re-opening tax returns from fiscal years 2004 and 2003 due to the carry back of net operating losses used in the tax returns for fiscal years 2005 and 2006. A no change notice has been received from the IRS; however this audit is still underway with the Joint Committee. The Company, including its subsidiaries, files income tax returns in the U.S. federal jurisdiction, and many state jurisdictions. In the U.S., although an IRS audit has been completed; federal income tax returns for fiscal years 2003 through 2006 still remain open to examination. For U.S., state and local jurisdictions, the statute of limitations generally varies between three and four years.

8. Litigation

The Company is subject to a variety of claims and suits that arise from time to time in the ordinary course of its business. While management currently believes that resolving all of these matters, individually or in aggregate, will not have a material adverse impact on the Company's financial position or its results of operations, the litigation and other claims that the Company faces are subject to inherent uncertainties and management's view of these matters may change in the future. Should an unfavorable final outcome occur, there exists the possibility of a materially adverse impact on the Company's financial position, results of operations and cash flows for the period in which the effect becomes probable and reasonably estimable.

9. Recent Accounting Pronouncements

In December 2007, the FASB issued SFAS No. 160, Noncontrolling Interests in Consolidated Financial Statements an amendment of ARB No. 51, to improve the relevance, comparability, and transparency of the financial information that a reporting entity provides in its consolidated financial statements. This statement applies to all entities that prepare consolidated financial statements, except not-for-profit organizations, but will affect only those entities that have an outstanding non-controlling interest in one or more subsidiaries or that deconsolidate a subsidiary. This statement is effective for the Company beginning in fiscal 2010. Earlier adoption is prohibited. The issuance of

this statement has no current impact on the Company.

10. Subsequent Events

Table of Contents**VistaCare, Inc.****Notes to Consolidated Financial Statements (unaudited) continued***Potential Merger*

As disclosed in the Form 8-K filed by the Company on January 15, 2008, the Company entered into an Agreement and Plan of Merger (the Merger Agreement) on January 15, 2008, with Odyssey HealthCare Holding Company, a Delaware corporation (Odyssey) and its wholly-owned subsidiary, OHC Investment, Inc., a Delaware corporation (Merger Sub). Odyssey HealthCare, Inc. is the sole shareholder of Odyssey.

Pursuant to the Merger Agreement, Merger Sub commenced a tender offer (the Offer) to purchase all of the Company's outstanding shares of Class A common stock, par value \$0.01 per share (the Common Stock), including the associated Series A Junior Participating Preferred Stock purchase rights (the Rights), issued pursuant to the Rights Agreement, dated as of August 18, 2004, as amended, between the Company and Computershare Trust Company, N.A., formerly known as Equiserve Trust Company, N.A. (such Common Stock, together with the associated Rights, (the Shares), at a price of \$8.60 per share in cash, without any interest thereon (the Offer Price).

The Offer commenced on January 30, 2008 and expires at 12:00 midnight, New York City time, on February 27, 2008 (the Expiration Date), unless it is extended in accordance with its terms. In connection therewith, the Company filed a Schedule 14D-9 and related exhibits on January 30, 2008. Consummation of the Offer and the Merger (hereinafter defined) are subject to customary closing conditions, including the expiration or termination of any waiting period (and any extension thereof) under the Hart-Scott-Rodino Antitrust Improvements Act of 1976, as amended. In addition, the consummation of the Offer is conditioned on, among other conditions, the valid tender of a majority of the outstanding Shares determined on a fully-diluted basis. Each of the directors and executive officers of the Company holding approximately 5.9% of the issued and outstanding Shares as of January 14, 2008 (excluding Shares that are Options with an exercise price in excess of \$8.60 per Share, the remaining Shares constitute approximately 3% of the issued and outstanding Shares as of January 14, 2008) have agreed to tender their Shares in connection with the Offer and have agreed to vote in favor of the Merger, pursuant to stockholder agreements, dated January 15, 2008, entered into with Odyssey and Merger Sub (the Stockholder Agreements).

Upon successful completion of the Offer, and subject to the satisfaction or waiver of the conditions set forth in the Merger Agreement, Merger Sub will be merged (the Merger) with and into the Company and the Company will survive the Merger as a wholly-owned subsidiary of Odyssey. At the effective time of the Merger (the Effective Time), each outstanding Share, other than Shares owned by Odyssey or its subsidiaries immediately prior to the Effective Time, will automatically be canceled, will cease to exist and will be converted into the right to receive \$8.60 in cash, without any interest thereon, on the terms and subject to the conditions set forth in the Merger Agreement. The Merger Agreement provides that all awards of restricted Common Stock granted under any of the Company's equity based compensation plans (the Stock Plans) shall vest in full immediately prior to the Merger Sub's acceptance for payment of Shares tendered in the Offer and may be tendered in the Offer or, alternatively, receive an amount in cash equal to \$8.60 at the Effective Time. In addition, each option to purchase Common Stock granted by the Company under any Stock Plans which is outstanding immediately prior to the Effective Time, whether vested or unvested, shall be cancelled and the holder of each option shall be entitled to receive an amount in cash equal to the product of the excess, if any, of \$8.60 over the exercise price per Share of such option multiplied by the total number of Shares subject to such option.

The closing of the Merger, if required by applicable law, is subject to the adoption of the Merger Agreement by holders of a majority of the outstanding Shares. However, if following completion of the Offer, and after giving effect to any Shares purchased pursuant to the top-up option described below, Merger Sub owns at least 90% of the outstanding Shares, the Merger will be completed without a meeting of the Company's stockholders pursuant to Delaware's short-form merger statute.

The Company, Odyssey and Merger Sub have made customary representations, warranties and covenants in the Merger Agreement. The Company's covenants include covenants regarding the operation of the business prior to the closing and covenants prohibiting the Company from soliciting, providing information or entering into discussions concerning, proposals relating to alternative business combination transactions, except in limited circumstances relating to unsolicited proposals that are, or could reasonably be expected to result in, a proposal superior to the

transactions contemplated by the Merger Agreement.

In the Merger Agreement, the Company also granted Odyssey and Merger Sub, subject to certain conditions and limitations, an irrevocable option, to be exercised after completion of the Offer, to acquire a number of Shares, that, when added to the number of Shares owned by Odyssey or Merger Sub at the time of the exercise of the option, constitutes one share more than 90% of the number of Shares that will be outstanding after giving effect to the exercise of the option, at a price per Share equal to the amount paid for

Table of Contents

VistaCare, Inc.

Notes to Consolidated Financial Statements (unaudited) continued

Shares pursuant to the Offer (the Top-Up Option). The Top-Up Option is intended to expedite the timing of the completion of the Merger by permitting the Merger to occur pursuant to Delaware's short-form merger statute at a time when the approval of the Merger at a meeting of the Company's stockholders would be assured because of Merger Sub's ownership of a majority of the Shares following completion of the Offer.

In addition, effective upon payment for the Shares pursuant to the Offer, during the period after completion of the Offer and prior to the effective time of the Merger, Odyssey shall be entitled to designate a majority of the directors on the Company's Board of Directors.

The Merger Agreement contains certain termination rights for each of Odyssey and the Company and provides that, upon the termination of the Merger Agreement under specified circumstances, the Company will be required to pay Odyssey a termination fee. In addition, in certain circumstances where the Merger Agreement is terminated, each of Odyssey and the Company may be entitled to reimbursement of their expenses, subject to a cap, by the other party; provided however that any amount received by Odyssey as expense reimbursement shall reduce the amount that it may recover under the termination fee.

The foregoing description of the Merger Agreement is not complete and is qualified in its entirety by reference to the Merger Agreement filed as an exhibit to the Company's Form 8-K filing on January 15, 2008.

The Company was recently notified by a third party it formerly used for strategic advisory services that the third party believes it may be due compensation under an arrangement that called for them to receive 1% of proceeds upon sale of the Company. The Company is currently evaluating whether there is any basis for such claim and no amounts have been accrued since the potential payment, if any, is contingent upon sale of the Company.

Potential Sale of Programs

As part of its restructuring plan, the Company signed a Letter of Intent on January 23, 2008 to sell the Company's four Oklahoma locations in Tulsa, Cushing, Purcell and Oklahoma City to Community Health Systems Professional Services Corporation (CHS). The sale is pending the completion of a due diligence investigation by CHS.

As part of the sale, CHS would acquire all of the tangible and intangible assets including, but not limited to, inventory, furniture and fixtures used by the Oklahoma programs and would assume certain contracts, provider agreements, office leases and other agreements used by those programs. The Company would receive a nominal cash payment which is due at closing. The sale, if consummated, could result in a loss of up to \$0.2 million if the related net assets were determined to be in excess of their recoverable value through either sale or redeployment.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Overview

We currently operate 47 hospice programs (programs) under 34 Medicare provider numbers including six inpatient units, serving approximately 4,900 patients in 14 states. Hospice services are provided predominately in the patient's home or other residence of choice, such as a nursing home or assisted living community, or in a hospital or inpatient unit. Inpatient services are provided by us at our inpatient units and through leased beds at unrelated hospitals and skilled nursing facilities on a per diem basis.

We are in the process of opening a new inpatient unit in San Antonio, Texas which is anticipated to be opened prior to the end of March 2008.

In order to monitor our financial performance, we prepare operating statements for each program, inpatient unit and Sales, General & Administrative (SG&A) department for each fiscal period. Management uses the information in these operating statements to improve the profitability of our operating units and control the cost of our support functions. To assess performance, management monitors the following, as well as other financial and operating statistics at the entity level and down to the individual operating unit when applicable:

Increases or decreases in total net patient revenue compared to the same period(s) in the prior fiscal year;

Increases or decreases in net patient revenue compared to the same period(s) in the prior fiscal year at comparable programs that is programs that have been open 12 months or longer;

Expenses, particularly payroll, as a percent of net patient revenue;

Income prior to interest, taxes, depreciation and amortization;

Medicare Cap liability;

Payment denials;

Average daily census;

Patient days; and

Admissions.

Net patient revenue is primarily the amount we are entitled to collect for our services, which is determined by the number of billable patient days, the level of care provided, the contracted reimbursement rate by payor which can vary by geographic area, adjusted for estimated Medicare Cap and estimated payment denials. Medicare reimbursements accounted for approximately 93% of our net patient revenue during the three months ended December 31, 2007. We actively monitor each of our programs to determine when the programs have the potential to exceed the annual Medicare Cap and attempt to institute corrective actions to avoid a Medicare Cap charge. However, when we believe our corrective actions will not avoid a Medicare Cap charge, an estimate of the amount that could be repaid to Medicare is booked as a reduction to net patient revenue.

Since payment for hospice services is primarily on a per diem basis, our profitability is largely dependent on our ability to manage the expenses of providing hospice services. Expenses are primarily categorized as patient care expenses or sales, general and administrative expenses. Patient care expenses consist primarily of salaries, benefits, payroll taxes, contract labor and mileage costs associated with patient care and direct patient care expenses for pharmaceuticals, durable medical equipment, medical supplies, in-patient facilities, nursing home costs and purchased services such as ambulance, infusion and radiology. SG&A expenses primarily include salaries, payroll taxes, benefits and travel expenses associated with our staff not directly involved with patient care, bonuses for all employees, marketing, office leases, professional services and use taxes. Expenses are controlled through a budgeting process by

which managers are expected to meet the established benchmarks. Approved budgets may be adjusted as changes in net patient revenue or other circumstances warrant.

Because we were not meeting our profit objectives, we announced a restructuring plan during the second quarter of fiscal year ended September 30, 2007, that includes rationalization of sites, cost reductions, process improvements and organizational streamlining. Our restructuring plan calls for the restructuring initiatives to be phased in over a several month period with all initiatives implemented by December 31, 2008, the first quarter of fiscal year 2009. When completed, the restructuring is expected to include the consolidation, closure or sale of 13 sites and two inpatient units and reductions in force at both the corporate headquarters and site locations. As of December 31, 2007, eight hospice programs and one inpatient unit were closed as part of the restructuring.

Table of Contents

The following tables summarize total costs expensed for the restructuring program as of December 31, 2007 (in thousands):

	Expected Costs	Expensed During Three Months Ended December 31, 2007	Restructuring Costs to Date	Expected Future Costs
Severance	\$ 1,802	\$ 35	\$ 1,386	\$ 416
Lease termination	2,280		572	1,708
Other	847		152	695
Total restructuring costs	\$ 4,929	\$ 35	\$ 2,110	\$ 2,819

The future expected costs represent an estimate as of December 31, 2007 with respect to sites we intend to close in the future but have not yet met expense recognition criteria given that notification and closure activities have not yet commenced. For these sites we performed impairment analyses with respect to their operating assets and determined they were recoverable as operating assets, or were not recorded in excess of their estimated recoverable value. If we sell selected program sites rather than closing the sites, expected future costs may be lower due to lower lease termination and severance costs. In addition, the recoverability of certain operating assets could become less recoverable depending upon the nature of the sales transaction.

The following table reconciles the accrued liability on the balance sheet related to the restructuring program as of December 31, 2007 (in thousands):

	Activity for Three Months Ended December 31, 2007
Balance at September 30, 2007	\$ 258
Charges to sales, general & administrative expense	35
Payments	(163)
Write offs of fixed assets	
Balance at December 31, 2007	\$ 130

Certain of our restructuring initiatives, primarily related to process improvements, have been suspended due to our pending merger which is described below. If for any reason the merger is not consummated, our intention is to complete our restructuring as originally planned.

Subsequent Events*Potential Merger*

As disclosed in the Form 8-K filed by the Company on January 15, 2008, the Company entered into an Agreement and Plan of Merger (the Merger Agreement) on January 15, 2008, with Odyssey HealthCare Holding Company, a Delaware corporation (Odyssey) and its wholly-owned subsidiary, OHC Investment, Inc., a Delaware corporation (Merger Sub). Odyssey HealthCare, Inc. is the sole shareholder of Odyssey.

Pursuant to the Merger Agreement, Merger Sub commenced a tender offer (the Offer) to purchase all of the Company's outstanding shares of Class A common stock, par value \$0.01 per share (the Common Stock), including the

associated Series A Junior Participating Preferred Stock purchase rights (the Rights), issued pursuant to the Rights Agreement, dated as of August 18, 2004, as amended, between the Company and Computershare Trust Company, N.A., formerly known as Equiserve Trust Company, N.A. (such Common Stock, together with the associated Rights, (the Shares), at a price of \$8.60 per share in cash, without any interest thereon (the Offer Price).

The Offer commenced on January 30, 2008 and expires at 12:00 midnight, New York City time, on February 27, 2008 (the Expiration Date), unless it is extended in accordance with its terms. In connection therewith, the Company filed a Schedule 14D-9 and related exhibits on January 30, 2008. Consummation of the Offer and the Merger (hereinafter defined) are subject to customary closing conditions, including the expiration or termination of any waiting period (and any extension thereof) under the Hart-Scott-Rodino Antitrust Improvements Act of 1976, as amended. In addition, the consummation of the Offer is conditioned on, among other conditions, the valid tender of a majority of the outstanding Shares determined on a fully-diluted basis. Each of the directors and

Table of Contents

executive officers of the Company holding approximately 5.9% of the issued and outstanding Shares as of January 14, 2008 (excluding Shares that are Options with an exercise price in excess of \$8.60 per Share, the remaining Shares constitute approximately 3% of the issued and outstanding Shares as of January 14, 2008) have agreed to tender their Shares in connection with the Offer and have agreed to vote in favor of the Merger, pursuant to stockholder agreements, dated January 15, 2008, entered into with Odyssey and Merger Sub (the Stockholder Agreements).

Upon successful completion of the Offer, and subject to the satisfaction or waiver of the conditions set forth in the Merger Agreement, Merger Sub will be merged (the Merger) with and into the Company and the Company will survive the Merger as a wholly-owned subsidiary of Odyssey. At the effective time of the Merger (the Effective Time), each outstanding Share, other than Shares owned by Odyssey or its subsidiaries immediately prior to the Effective Time, will automatically be canceled, will cease to exist and will be converted into the right to receive \$8.60 in cash, without any interest thereon, on the terms and subject to the conditions set forth in the Merger Agreement. The Merger Agreement provides that all awards of restricted Common Stock granted under any of the Company's equity based compensation plans (the Stock Plans) shall vest in full immediately prior to the Merger Sub's acceptance for payment of Shares tendered in the Offer and may be tendered in the Offer or, alternatively, receive an amount in cash equal to \$8.60 at the Effective Time. In addition, each option to purchase Common Stock granted by the Company under any Stock Plans which is outstanding immediately prior to the Effective Time, whether vested or unvested, shall be cancelled and the holder of each option shall be entitled to receive an amount in cash equal to the product of the excess, if any, of \$8.60 over the exercise price per Share of such option multiplied by the total number of Shares subject to such option.

The closing of the Merger, if required by applicable law, is subject to the adoption of the Merger Agreement by holders of a majority of the outstanding Shares. However, if following completion of the Offer, and after giving effect to any Shares purchased pursuant to the top-up option described below, Merger Sub owns at least 90% of the outstanding Shares, the Merger will be completed without a meeting of the Company's stockholders pursuant to Delaware's short-form merger statute.

The Company, Odyssey and Merger Sub have made customary representations, warranties and covenants in the Merger Agreement. The Company's covenants include covenants regarding the operation of the business prior to the closing and covenants prohibiting the Company from soliciting, providing information or entering into discussions concerning, proposals relating to alternative business combination transactions, except in limited circumstances relating to unsolicited proposals that are, or could reasonably be expected to result in, a proposal superior to the transactions contemplated by the Merger Agreement.

In the Merger Agreement, the Company also granted Odyssey and Merger Sub, subject to certain conditions and limitations, an irrevocable option, to be exercised after completion of the Offer, to acquire a number of Shares, that, when added to the number of Shares owned by Odyssey or Merger Sub at the time of the exercise of the option, constitutes one share more than 90% of the number of Shares that will be outstanding after giving effect to the exercise of the option, at a price per Share equal to the amount paid for Shares pursuant to the Offer (the Top-Up Option). The Top-Up Option is intended to expedite the timing of the completion of the Merger by permitting the Merger to occur pursuant to Delaware's short-form merger statute at a time when the approval of the Merger at a meeting of the Company's stockholders would be assured because of Merger Sub's ownership of a majority of the Shares following completion of the Offer.

In addition, effective upon payment for the Shares pursuant to the Offer, during the period after completion of the Offer and prior to the effective time of the Merger, Odyssey shall be entitled to designate a majority of the directors on the Company's Board of Directors.

The Merger Agreement contains certain termination rights for each of Odyssey and the Company and provides that, upon the termination of the Merger Agreement under specified circumstances, the Company will be required to pay Odyssey a termination fee. In addition, in certain circumstances where the Merger Agreement is terminated, each of Odyssey and the Company may be entitled to reimbursement of their expenses, subject to a cap, by the other party; provided however that any amount received by Odyssey as expense reimbursement shall reduce the amount that it may recover under the termination fee.

Edgar Filing: VISTACARE, INC. - Form 10-Q

The foregoing description of the Merger Agreement is not complete and is qualified in its entirety by reference to the Merger Agreement filed as an exhibit to the Company's Form 8-K filing on January 15, 2008.

The Company was recently notified by a third party it formerly used for strategic advisory services that the third party believes it may be due compensation under an arrangement that called for them to receive 1% of proceeds upon sale of the Company. The Company is currently evaluating whether there is any basis for such claim and no amounts

Table of Contents

have been accrued since the potential payment, if any, is contingent upon sale of the Company.

Potential Sale of Programs

As part of our restructuring plan, we signed a Letter of Intent on January 23, 2008 to sell our four Oklahoma locations in Tulsa, Cushing, Purcell and Oklahoma City to Community Health Systems Professional Services Corporation (CHS). The sale is pending the completion of a due diligence investigation by CHS.

As part of the sale, CHS would acquire all of the tangible and intangible assets including, but not limited to, inventory, furniture and fixtures used by the Oklahoma programs and would assume certain contracts, provider agreements, office leases and other agreements used by those programs. We would receive a nominal cash payment which is due at closing. . The sale, if consummated, could result in a loss of up to \$0.2 million if the related net assets were determined to be in excess of their recoverable value through either sale or redeployment.

Table of Contents

Glossary

As used in this report, the following terms have the meanings indicated.

Admissions: New admissions including re-admissions.

Average Daily Census (ADC): Total patient days for all patients divided by the number of days during the period.

Average length of stay: Total days of care for patients discharged during the period divided by the total patients discharged.

Discharges: Total patients deceased or discharged from service.

Ending census: All patients served on last day of period.

Inpatient days: Total patient days in an acute care facility (hospital based or company owned) at general inpatient level of care. Also discussed general inpatient (GIP) days.

Inpatient unit: Patient care provided in a hospital or other facility when pain and other symptoms cannot be managed effectively in a home setting. In the inpatient units we operate, we care for our own patients and a limited number of other hospice providers' patients. In some of our programs we contract with other inpatient units to provide care for our patients.

Median length of stay: The midpoint of the total days of service provided to patients that were discharged during the period.

Medicare Cap: The limitation on overall aggregate payments made to a hospice for services provided to Medicare beneficiaries during a Cap period that begins November 1 and ends October 31 each year, assessed on an individual provider number basis.

Medicare Cap Calculation: A calculation made by our Medicare fiscal intermediary pursuant to applicable Medicare regulations to determine whether a hospice provider has received payments in excess of the Medicare Cap. The total Medicare payments received under a given provider number for services provided to all Medicare hospice care beneficiaries served within the provider number between each November 1 and October 31 is determined (Total Payments). The number of Medicare beneficiaries admitted (adjusted for the portion of time served by another provider pro-ratio) at each hospice provider between September 28 of each year and September 27 of the following year is determined (Beneficiaries). The number of Beneficiaries is multiplied by the per beneficiary Cap amount for the applicable Cap period (Cap Amount). If the Total Payments are greater than the Cap Amount, the provider must refund the difference.

Patient Day: A day we provide service to a patient.

Program: A separate hospice location operated under the same management as other company hospices.

Provider number: Unique identifiers assigned by Medicare and Medicaid to their providers. Multiple locations can share the same Medicare provider number.

Net income	2.5%	0.6%

Three Months Ended December 31, 2007 Compared to Three Months Ended December 31, 2006***Net Patient Revenue***

Net patient revenue decreased \$0.3 million, to \$60.7 million for the three months ended December 31, 2007, compared to \$61.0 million for the three months ended December 31, 2006. Due to our restructuring program we are operating eight less programs which negatively impacted our net patient revenue and several of our other operating statistics such as patient days, admissions, etc.

The negative impact of our lower program count on net patient revenue was partially offset by the following: an increase in inpatient days, which have a high per diem rate, to 7,405 days for the three months ended December 31, 2007, from 5,936 days for the three months ended December 31, 2006. We currently operate six inpatient units compared to five inpatient units during the three months ended December 31, 2006; and

Medicare reimbursement rate increase of 3.3% effective October 1, 2007.

We are subject to Medicare Cap limits based on the total amount of Medicare payments that will be made to each of our provider numbers. We actively monitor each of our programs, by provider number, as to their program specific admission, discharge rate and average length of stay data in an attempt to determine whether they have the potential to

exceed the annual Medicare Cap. When we determine that a provider number has the potential to exceed the annual Medicare Cap based upon trends, we attempt to institute corrective action, such as a change in patient mix or increase in patient admissions. However, to the extent we believe our corrective action will not avoid a Medicare Cap charge, we estimate the amount that we could be required to repay Medicare following the end of the Medicare Cap year, and accrue that amount in proportion to the number of months that have elapsed in the Medicare Cap year as a reduction to net patient revenue. We recorded reductions to net patient revenue of \$1.1 million and \$1.4 million for the three months ended December 31, 2007 and 2006, respectively, for the estimated cost of exceeding the annual Medicare Cap. The \$1.1 million reduction to net patient revenue for Medicare Cap for the three months ended December 31, 2007 represents a quarter of the total estimated accrual for patient service dates during 2008, including pro-ratio for estimated services that these 2008 patients may

Table of Contents

receive from other hospice programs. Our Medicare Cap liability accrual as of December 31, 2007 and September 30, 2007, is \$5.6 million and \$11.6 million, respectively.

We also record reductions to net patient revenue for estimated payment denials, contractual adjustments (such as differences in payments by commercial payors) and subsequent changes to initial level of care determinations (made retroactively by VistaCare staff after initial admission). We recorded reductions to net patient revenue for these types of adjustments of \$1.3 million and \$0.7 million for the three months ended December 31, 2007 and 2006, respectively. Our allowance for denials on patient accounts receivable and room and board as of December 31, 2007 and September 30, 2007 is \$3.2 million and \$4.2 million, respectively.

Patient Care Expenses

Patient care expenses decreased \$0.5 million, or 1.3%, to \$39.6 million for the three months ended December 31, 2007 from \$40.1 million for the three months ended December 31, 2006. As a percentage of net patient revenue, patient care expenses decreased to 65.2% for the three months ended December 31, 2007 from 65.8% for the three months ended December 31, 2006. Total patient care expenses were lower for the three months ended December 31, 2007 when compared to the three months ended December 31, 2006 partially because we operated eight less programs than in the same period in the prior year.

Patient care salary expense decreased \$1.6 million for the three months ended December 31, 2007 when compared to the three months ended December 31, 2006. As a percentage of net patient revenue, patient care salary expense decreased to 41.6% for the three months ended December 31, 2007 from 44.1% for the three months ended December 31, 2006. Salary expense as a percent to net revenue was positively impacted by implementation of our restructuring program and improved salary expense control. Patient care other expenses increased \$0.3 million to \$6.2 million from \$5.9 million when compared to the three months ended December 31, 2006. As a percentage of net patient revenue, patient care other expenses increased to 10.3% from 9.7% compared to the three months ended December 31, 2006. During the three months ended December 31, 2007 we operated one more inpatient unit than during the three months ended December 31, 2006. Inpatient expenses such as rent, housekeeping services, supplies and food are recorded in this expense category and were higher due to the additional inpatient unit.

Also negatively impacting patient care expenses was an increase in net room and board expenses of \$0.9 million for the three months ended December 31, 2007 when compared to the three months ended December 31, 2006. Nursing home revenue decreased by approximately \$0.2 million to \$10.6 million for the three months ended December 31, 2007 from \$10.8 million for the three months ended December 31, 2006. Nursing home expenses totaled approximately \$13.0 million and \$12.3 million for the three months ended December 31, 2007 and 2006, respectively. This increase was due to a \$0.4 million increase in room and board bad debt expense and a \$0.3 million increase in room and board expense. Nursing home costs, net were \$2.4 million and \$1.5 million for the three months ended December 31, 2007 and 2006, respectively.

Sales, General and Administrative Expenses

Sales, general and administrative (SG&A) expenses decreased \$2.0 million, or 9.6%, to \$18.9 million for the three months ended December 31, 2007 from \$20.9 million for the three months ended December 31, 2006. As a percentage of net patient revenue, SG&A expenses decreased to 31.2% for the three months ended December 31, 2007 from 34.3% for the three months ended December 31, 2006.

Salaries for employees classified in SG&A expense decreased approximately \$2.1 million for the three months ended December 31, 2007 when compared to the three months ended December 31, 2006. This is mainly due to the headcount reductions implemented as part of our restructuring program. Many other SG&A expense categories decreased when compared to the three months ended December 31, 2006 also due mainly to the implementation of our restructuring program. Further, training expenses were \$0.6 million lower in the three months ended December 31, 2007 because a company training event was not held. Bonus expense increased \$0.4 million compared to the three months ended December 31, 2006 due to our anticipation of higher bonus payouts because of our increased profitability. Legal fees increased \$0.3 million due to litigation of cases in the normal course of our business and additional legal work required by our review of strategic alternatives and pending merger.

Income Tax

We record income taxes under the liability method as required by Financial Accounting Standards Board Statement No. 109, Accounting for Income Taxes (FAS 109) and Financial Accounting Standards Board Interpretation No. 48 Accounting for Uncertainty in Income Taxes an Interpretation of FASB Statement No. 109 (FIN 48). We adopted the provisions of FIN 48

Table of Contents

effective October 1, 2007. FIN 48 requires that we recognize the effect of a tax position in our consolidated financial statements if there is a greater likelihood than not of the position being sustained upon audit based on the technical merits of the position. The adoption of FIN 48 resulted in no cumulative effect adjustment to our retained earnings. As of October 1, 2007 and December 31, 2007, we had no unrecognized tax benefits and there was no liability associated with uncertain tax positions that would affect our effective tax rate.

Due to our recent operating losses, we recorded a full valuation allowance which was equal to our deferred tax assets, less the deferred tax liabilities expected to reverse and become taxable income, excluding tax deductible goodwill. For the three months ended December 31, 2007 and 2006, our income tax expense was \$0.1 million. Our effective income tax rate for the three months ended December 31, 2007 and 2006 was 5.3% and 14.8% of pretax income, respectively. Since we have a full valuation allowance established on our net deferred tax assets, with the exception of indefinite life tax deductible goodwill, our fiscal 2008 tax provision consists of state taxes where loss carry forwards do not exist and increases to our tax deductible goodwill deferred tax liability.

Liquidity and Capital Resources

We expect that our principal liquidity requirements will be for working capital, capital expenditures and the development of new hospice programs or inpatient units. Due to our ongoing restructuring efforts, the development of new hospice programs and/or inpatient units will most likely occur on a limited basis in circumstances intended to protect our existing strategic advantages. Other than working capital needs, these expenditures are at our election and we do not currently have material commitments for expenditures in these areas. Based on our current working capital requirements and existing capital commitments, we expect that our existing funds and cash flows from operations will be sufficient to fund our principal liquidity requirements for at least the next twelve months. During 2008 we plan on evaluating additional working capital financing alternatives and to evaluate additional sources of capital to fund future growth and future long term working capital needs if necessary. Our future liquidity requirements and the adequacy of our available funds will depend on many factors, including payment for our services, potential payment delays due to Medicare additional development requests (as defined below) and sequential billing requirements, regulatory changes and compliance with new regulations, expense levels, future development of new hospice programs or inpatient units, acquisitions of other hospice programs and capital expenditures.

We have received a significant number of Medicare additional development requests (ADR) from our third party fiscal intermediary Palmetto GBA beginning in November 2006. These periodic standard requests for additional information on selected claims delay payment on the listed claims and all subsequent claims related to that Medicare beneficiary and adversely affect claims billing activity for the entire program. After Palmetto GBA reviews the additional information provided, these claims and future claims are expected to be paid under normal payment terms but the sequential billing model prevents a hospice program from billing for services to a patient until the prior billing periods pertaining to the patient have been reimbursed. At this time, we believe we have adequately reserved for any claim denials. We estimate the delay in accounts receivable payments to be approximately \$11.7 million at December 31, 2007. We anticipate continuing delays in payment in the near future because the review process is continuing for four sites reported under two provider numbers.

Because we were not meeting our income objectives, we began a restructuring effort in the second quarter of fiscal year 2007 that is being phased in over an 18 month period with all restructuring initiatives scheduled to be implemented by December 31, 2008, the end of the first quarter of our 2009 fiscal year. We anticipate the benefit from this restructuring effort to result in approximately \$45.0 million in annualized gross cost savings which will be partially offset by reductions in revenue of approximately \$16.0 million due to site consolidations, closures or sales resulting in annual net savings of approximately \$29.0 million. Currently, we estimate our future cash outlays to be approximately \$2.8 million to implement these initiatives. If the pending sale of our Oklahoma programs is completed, our future cash outlays will be reduced by approximately \$0.9 million to \$1.9 million due to lower lease termination and severance payments. We anticipate all costs to be paid by June 30, 2008, the third quarter of our fiscal year 2008.

As of December 31, 2007, we had cash and cash equivalents of \$28.8 million, working capital of approximately \$44.3 million and the potential ability to borrow up to \$50.0 million under our revolving credit and term loan facility based on borrowing base calculations, subject to lender approval, which would be required since we are not presently

in compliance with our loan covenants and certain other restrictions as described in more detail below under the caption Debt.

Three months ended December 31, 2007 compared to three months ended December 31, 2006.

Net cash provided by operating activities for the three months ended December 31, 2007 was \$0.9 million as compared to cash used in operating activities of \$4.5 million for the three months ended December 31, 2006. Net income was \$1.1 million higher in the

Table of Contents

period ended December 31, 2007 than in the period ended December 31, 2006. During the period ended December 31, 2007, \$6.8 million of cash was provided by accounts receivable collections. In the period ending December 31, 2006, accounts receivable balances grew by \$1.8 million. During the period ended December 31, 2007, \$7.1 million was paid for Medicare Cap assessments while no Medicare Cap assessments were paid during the period ended December 31, 2006.

Net cash provided by investing activities was \$5.0 million for the three months ended December 31, 2007 compared to \$1.1 million of cash provided by investing activities for the three months ended December 31, 2006. Cash provided by sales of investments was \$6.6 million in the period ended December 31, 2007. In the period ended December 31, 2006, cash used to purchase investments was \$1.2 million more than cash received from the sale of investments. Cash used for equipment purchases was \$0.4 million more in the three months ended December 31, 2007 than in the three months ended December 31, 2006. Also, \$1.2 million of cash was received from the sale of the Cincinnati hospice program in the period ended December 31, 2006. No program sales occurred during the three months ended December 31, 2007.

Net cash provided by financing activities was \$0.1 million for the three months ended December 31, 2007 and 2006, respectively. Cash provided by financing activities principally resulted from the exercise of employee stock options and employee stock purchases.

Debt

In December 2004, we renewed our \$30.0 million revolving line of credit and entered into a \$20.0 million term loan agreement (this total of \$50.0 million is collectively referred to herein as the credit facility). The credit facility is collateralized by a lien on substantially all of our assets, including cash, accounts receivable and equipment. Loans under the credit facility bear interest at an annual rate equal to the one-month London Interbank Borrowing Rate in effect from time to time plus 3.0% - 5.0%, depending upon our achievement of certain financial ratios as described in the credit agreement. Accrued interest under the revolving line of credit and the term loan is due monthly.

Under the revolving line of credit, we may (upon satisfaction of certain conditions and lender's waiver of a covenant default) borrow, repay and re-borrow an amount equal to the lesser of: (i) \$30.0 million or (ii) 85% of the net value of eligible accounts receivable. The revolving line of credit can be used for working capital and general corporate purposes, including acquisitions. Under the \$20.0 million term loan, borrowings are used for permitted acquisitions as defined in the credit agreement. The lender will permit term loans provided our pro forma debt service coverage ratio, as defined in the credit agreement, does not fall below the specified ratio (at December 31, 2007, we failed to meet the specified ratio). The maturity date of the credit facility is December 22, 2009. As of December 31, 2007, there was no balance outstanding on the revolving line of credit or on the term loan.

The credit facility contains certain customary covenants including those that restrict our ability to incur additional indebtedness, pay dividends under certain circumstances, permit liens on property or assets, make capital expenditures, make certain investments and prepay or redeem debt or amend certain agreements relating to outstanding indebtedness. Due to our recent operating losses, we are not in compliance with the credit facility's debt service coverage ratio covenant and would have to receive a lender waiver, which has not been requested, and complete certain administrative procedures in order to borrow under the current terms of the credit facility.

Interest Rate Risk

We do not expect our cash flow to be affected, to any significant degree, by a sudden change in market interest rates. We have not implemented a strategy to manage interest rate market risk because we do not believe that our exposure to this risk is material at this time. We invest excess cash balances in money market accounts with average maturities of less than 90 days.

Payment, Legislative and Regulatory Changes

We are almost exclusively dependent on payments from the Medicare and Medicaid programs. These programs are subject to statutory and regulatory changes, possible retroactive and prospective rate adjustments, administrative rulings, rate freezes and funding reductions. Reductions in amounts paid by these programs for our services or changes in methods or regulations governing payments for our services could have a material adverse affect on our net patient revenue, cash flow from operations and profitability.

Inflation

The healthcare industry is labor intensive. Historically, wages and other expenses increased during periods of inflation and labor

Table of Contents

shortages in the marketplace. In addition, suppliers pass along rising costs to us in the form of higher prices for the goods and services that we purchase. We have implemented control measures designed to curb increases in operating expenses; however, we cannot predict our ability to cover or offset future cost increases.

Critical Accounting Policies

There have been no changes to our critical accounting policies during the quarter ended December 31, 2007. Refer to our Annual Report on Form 10-K for the fiscal year ended September 30, 2007 for a summary of our critical accounting policies.

Recent Accounting Pronouncements

In December 2007, the FASB issued SFAS No. 160, Noncontrolling Interests in Consolidated Financial Statements an amendment of ARB No. 51, to improve the relevance, comparability, and transparency of the financial information that a reporting entity provides in its consolidated financial statements. This statement applies to all entities that prepare consolidated financial statements, except not-for-profit organizations, but will affect only those entities that have an outstanding non-controlling interest in one or more subsidiaries or that deconsolidate a subsidiary. This statement is effective for us beginning in fiscal 2010. Earlier adoption is prohibited. The issuance of this statement has no current impact on the Company.

Contractual Obligations

There have been no material changes to our contractual obligations during the quarter ended December 31, 2007. Refer to our Annual Report on Form 10-K for the fiscal year ended September 30, 2007 for a summary of our contractual obligations.

Forward-Looking Statements

Certain statements contained in this quarterly report on Form 10-Q and the accompanying tables, including statements with respect to VistaCare's anticipated growth in net patient revenue, organic patient census and diluted earnings per share, are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. The words believe, expect, hope, anticipate, plan, expectations, forecast, goal, targeted and expressions identify forward-looking statements, which speak only as of the date the statement was made. VistaCare does not undertake and specifically disclaims any obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. These statements are based on current expectations and assumptions and involve various risks and uncertainties, which could cause VistaCare's actual results to differ from those expressed in such forward-looking statements. These risks and uncertainties arise from, among other things, possible changes in regulations governing the hospice care industry, periodic changes in reimbursement levels and procedures under Medicare and Medicaid programs, difficulties predicting patient length of stay and estimating potential Medicare reimbursement obligations, patient discharge rate, challenges inherent in VistaCare's growth strategy, the current shortage of qualified nurses and other healthcare professionals, VistaCare's dependence on patient referral sources and other factors detailed under the caption Factors that May Affect Future Results or Risk Factors in VistaCare's most recent report on Form 10-K and its other filings with the Securities and Exchange Commission. You are cautioned not to place undue reliance on such forward-looking statements and there are no assurances that the matters contained in such statements will be achieved.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

Market risk represents the risk of loss that may affect us due to adverse changes in financial market prices and rates. We have not entered into derivative or hedging transactions to manage any market risk. We do not believe that our exposure to market risk is material at this time.

Item 4. Controls and Procedures.*(a) Evaluation of Disclosure Controls and Procedures.*

Our management, with the participation of our Chief Executive Officer (CEO) and Chief Financial Officer (CFO) evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act) as of December 31, 2007. In designing and evaluating our disclosure controls and procedures, our management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives, and our management necessarily applied its judgment in evaluating the cost-benefit relationship of possible

Table of Contents

controls and procedures. Based on this evaluation, our CEO and CFO concluded that, as of December 31, 2007, our disclosure controls and procedures were (1) designed to ensure that information required to be disclosed by us is accumulated and communicated to management, including our CEO and CFO, by others within our organization to allow timely decisions regarding required disclosure and (2) effective, in that they provide reasonable assurance that information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities Exchange Commission's rules and forms.

(b) Changes in Internal Controls.

There have been no changes in our internal controls over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act) that occurred during the period covered by this report that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

Table of Contents

PART II OTHER INFORMATION

Item 1. Legal Proceedings.

We are subject to a variety of claims and suits that arise from time to time in the ordinary course of our business. While management currently believes that resolving all of these matters, individually or in aggregate, will not have a material adverse impact on our financial position or results of operations, the litigation and other claims that we face are subject to inherent uncertainties and management's view of these matters may change in the future. Should an unfavorable final outcome occur, there exists the possibility of a materially adverse impact on our financial position, results of operations and cash flows for the period in which the effect becomes probable and reasonably estimable.

Item 1A. Risk Factors.

In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I, Item 1A. Risk Factors in our Annual Report on Form 10-K for the fiscal year ended September 30, 2007, which could materially affect our financial condition, results of operations or future results. The risks described in our Annual Report on Form 10-K are not the only risks we face. Additional risks and uncertainties not currently known or that are currently deemed to be immaterial may also have a material adverse affect on our financial condition, results of operations and future results. There have been no material changes from the risk factors disclosed in the 2007 Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

(a) *Sales of Unregistered Securities.* Not applicable.

(b) *Use of Proceeds from Registered Securities.* Not applicable.

(c) *Repurchases of Securities.* We did not repurchase any of our securities during the three months ended December 31, 2007.

(d) *Restrictions Upon the Payment of Dividends.* We are prohibited under our credit facility from paying any cash dividends if there is a default under the facility or if the payment of any cash dividends would result in default.

Item 3. Defaults Upon Senior Securities.

Not applicable.

Item 4. Submission of Matters to a Vote of Security Holders.

Not applicable.

Item 5. Other Information.

Not applicable.

Item 6. Exhibits.

Exhibits: The exhibits are listed in the Exhibit Index to this report and are incorporated herein.
