### BAY NATIONAL CORPORATION

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

#### 1. GENERAL

##### Organization

Bay National Corporation (the "Company") was incorporated on June 3, 1999 under the laws of the State of Maryland to operate as a bank holding company of a national bank with the name Bay National Bank (the "Bank"). On May 12, 2000, the Company purchased all the shares of common stock issued by the Bank. The Bank commenced operations on May 12, 2000 after successfully meeting the conditions of the Office of the Comptroller of the Currency (the "OCC") to receive its charter authorizing it to commence operations as a national bank, and obtaining the approval of the Federal Deposit Insurance Corporation to insure its deposit accounts, and meeting certain other regulatory requirements.

##### Basis of Presentation

The accompanying consolidated financial statements include the activity of Bay National Corporation and its wholly owned subsidiary, Bay National Bank. All significant intercompany transactions and balances have been eliminated in consolidation.

## Edgar Filing: BAY NATIONAL CORP - Form 10QSB

The foregoing consolidated financial statements are unaudited; however, in the opinion of management, all adjustments (comprising only normal recurring accruals) necessary for a fair presentation of the results of the interim periods have been included. The balances as of December 31, 2003 have been derived from audited financial statements. These statements should be read in conjunction with the financial statements and accompanying notes included in Bay National Corporation's 2003 Annual Report on Form 10-KSB. There have been no significant changes to the Company's Accounting Policies as disclosed in the 2003 Annual Report. The results shown in this interim report are not necessarily indicative of results to be expected for the full year 2004.

The accounting and reporting policies of the Company conform to accounting principles generally accepted in the United States of America.

### Reclassifications

Certain reclassifications have been made to amounts previously reported to conform to the current presentation. These reclassifications had no effect on previously reported results of operations or accumulated deficit.

## 2. REGULATORY MATTERS

The Bank is subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory - and possibly additional discretionary - actions by regulators that, if undertaken, could have a direct material effect on the Company's financial statements. Under capital action, the Bank must meet specific capital guidelines that involve quantitative measures of the Bank's assets, liabilities and certain off-balance sheet items as calculated under regulatory accounting practices. The Bank's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weighting and other factors.

6

Quantitative measures established by regulation to ensure capital adequacy require the Bank to maintain minimum amounts and ratios. Management believes, as of September 30, 2004, that the Bank meets all capital adequacy requirements to which it is subject.

As of September 30, 2004, the Bank has been categorized as "Well Capitalized" by the OCC under the regulatory framework for prompt corrective action. To be categorized as well capitalized, the Bank must maintain minimum total risk-based, Tier I risk-based, and Tier I leverage ratios.

## 3. INCOME TAXES

The Company uses the liability method of accounting for income taxes as required by SFAS No. 109, "Accounting for Income Taxes." Under the liability method, deferred-tax assets and liabilities are determined based on differences between the financial statement carrying amounts and the tax bases of existing assets and liabilities (i.e., temporary differences) and are measured at the enacted rates that will be in effect when these differences reverse. Deferred income taxes will be recognized when it is deemed more likely than not that the benefits of such deferred income taxes will be realized; accordingly, no deferred income taxes or income tax benefits have been recorded by the Company.

## 4. EARNINGS PER SHARE

## Edgar Filing: BAY NATIONAL CORP - Form 10QSB

Earnings per common share are computed by dividing net income by the weighted average number of common shares outstanding during the period. Diluted net income per common share is computed by dividing net income by the weighted average number of common shares outstanding during the period, including any potential dilutive common shares outstanding, such as options and warrants.

For the nine-month period ended September 30, 2003, the effect of incremental shares from options and warrants of 204,156 has been excluded from diluted weighted average shares as the effect would have been antidilutive.

### 5. STOCK-BASED COMPENSATION

The Company has adopted the disclosure-only provisions of Statement of Financial Accounting Standards No. 123, "Accounting for Stock-Based Compensation" (SFAS No. 123) and Statement of Financial Accounting Standards No. 148, "Accounting for Stock-Based Compensation - Transition and Disclosure" (SFAS No. 148), and applies Accounting Principles Board Opinion No. 25 and related interpretations in accounting for its stock option plan. No compensation expenses related to the Company's stock option plan were recorded during the three-month and nine-month periods ended September 30, 2004 and 2003.

7

The following table illustrates the effect on net income (loss) and earnings (loss) per share if the Company had applied the fair value recognition provisions of SFAS No. 123 and SFAS No. 148 to stock-based employee compensation for the three-month and nine-month periods ended September 30:

	Three Months Ending September 30		Nine Month Septemb

## Edgar Filing: BAY NATIONAL CORP - Form 10QSB

### Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

This discussion and analysis provides an overview of the financial condition and results of operations of Bay National Corporation (the "Parent") and its national bank subsidiary, Bay National Bank (the "Bank"), collectively (the "Company"), as of September 30, 2004 and December 31, 2003 and for the three-month and nine-month periods ended September 30, 2004 and 2003.

#### General

On May 12, 2000 the Parent became a bank holding company by purchasing all of the common stock of the Bank. The Bank opened its first office on May 12, 2000 and its second office on May 26, 2000.

The Bank was formed to serve the business communities of North Baltimore and Salisbury, Maryland.

#### Overview

The Company continued a pattern of strong growth during the three-month and nine-month periods ended September 30, 2004. This growth has resulted in improved operating results as compared to prior periods. Key measurements for the three-month and nine-month periods ended September 30, 2004 include the following:

- o Total assets at September 30, 2004 increased by 29.11% to \$157.9 million as compared to \$122.3 million as of December 31, 2003.
- o Net loans outstanding increased by 27.06% from \$100.1 million as of December 31, 2003 to \$127.2 million as of September 30, 2004.
- o Nonperforming loans at September 30, 2004 totaled approximately \$11,000. Appropriate reserves for loan losses continue to be maintained.
- o Deposits at September 30, 2004 were \$142.3 million, an increase of \$33.8 million or 31.10% from December 31, 2003.
- o On September 28, 2004, the Company entered into a \$5 million, three year unsecured non-revolving credit facility with another financial institution. The proceeds from the credit facility will be used to provide regulatory capital to the Bank. The loan bears interest at the prime rate. As of September 30, 2004, \$500,000 was outstanding under this facility.
- o The Company realized net income of \$244,372 and \$478,755 for the three-month and nine-month periods ended September 30, 2004. This compares to net income of \$107,348 and a net loss of \$(123,742) for the three-month and nine-month periods ended September 30, 2003.
- o Net interest income, the Company's main source of income, was \$1.3 million and \$3.6 million during the three-month and nine-month periods ended September 30, 2004 compared to \$929,494 and \$2.6 million for the same periods in 2003. This represents increases of 44.75% and 39.58% for the three-months and nine-months ended September 30, 2004 as compared to the same periods in 2003.

- o Loan charge-offs were \$6,221 for the nine-month period ended September 30, 2004. There were no charge-offs for the same period in 2003.
- o Non-interest income declined by \$37,284 and \$95,405, or 21.95% and 19.20%, for the three-month and nine-month periods ended September 30, 2004, as compared to the three-month and nine-month periods ended September 30, 2003.
- o Non-interest expenses increased by \$153,096 or 16.22%, and \$320,950 or 11.36% for the three-month and nine-month periods ended September 30, 2004, as compared to the same periods ended September 30, 2003.
- o The market price of common shares ended the quarter at \$11.25, up 11.39% from the closing price of \$10.10 on December 31, 2003.

A detailed discussion of the factors leading to these changes can be found in the discussion below.

#### Results of Operations

##### Overview

The Company recorded net income of \$244,372 and \$478,755 for the three-month and nine-month periods ended September 30, 2004. This compares to net income of \$107,348 and a net loss of \$(123,742) for the same periods in 2003. This is an improvement of \$137,024 for the three-month period and \$602,497 for the nine-month period. This significant improvement in results for the periods is due to the continued strong growth of the loan portfolio, which reached the levels necessary to generate sufficient net interest income to cover operating expenses. The losses incurred through May 31, 2003 were expected since loan and deposit growth initially were not expected to produce net interest income sufficient to cover operating expenses. On average, community banks do not achieve profitability for the first 24 to 36 months of operation. The Company achieved marginal monthly profitability for the month of June 2003, its 37th full month of operations.

Bay National Bank's mortgage division, based in Salisbury, Maryland, originates conventional first and second residential mortgage loans. Bay National Bank sells most of its first and second residential mortgage loans in the secondary market and typically recognizes a gain on the sale of these loans after the payment of commissions to the loan origination officer. Since its inception in February 2001, the mortgage division has been a significant contributor to operating results. For the three-month periods ended September 30, 2004 and 2003, gains on the sale of mortgage loans totaled \$50,576 and \$102,060, respectively. For the nine-month periods ended September 30, 2004 and 2003, gains on the sale of mortgage loans totaled \$181,697 and \$320,576, respectively. The level of gains on the sale of mortgage loans has declined in 2004 due to the strengthening of economic conditions and the resulting increase in long-term interest rates as compared to the rates in effect during the first half of 2003. An increase in rates traditionally has a negative impact on mortgage loan production due to a reduction in the incentive for borrowers to refinance existing mortgages or purchase new homes.

## Edgar Filing: BAY NATIONAL CORP - Form 10QSB

During the second quarter of 2004, the Company introduced a new loan program for conventional first and second residential mortgage loans. Under this program the Company purchases a 100% participation in mortgage loans originated by a mortgage company in the Baltimore metropolitan area. These participations are for loans which a secondary market investor has committed to purchase. The participations are typically held for a period of three to

10

four weeks before being sold to the secondary market investor. This holding period represents the amount of time taken by the secondary market investor to review the loan files for completeness and accuracy. During this holding period, the Company earns interest on these loans at a rate indexed to the prime rate. The primary risk to the Company is that the secondary market investor may decline to purchase the loans due to documentary deficiencies or errors. The Company attempts to manage this risk by conducting a thorough review of the documentation prior to purchasing the participation. If the secondary market investor declines to purchase the loan, the Company could attempt to sell the loan to other investors or hold the loan in its loan portfolio. As of September 30, 2004, the Company held \$7.0 million of these loans which were classified as held for sale. The Company earned \$186,407 of interest on this program from inception through September 30, 2004.

Management expects continued improvement in operating results over the remainder of 2004; however, actual results will be subject to the volatility of the provision for credit losses, which is related to loan growth, and the volatility of mortgage loan production, which is sensitive to economic and interest rate fluctuations.

### Net Interest Income

Net interest income is the difference between income on assets and the cost of funds supporting those assets. Earning assets are composed primarily of loans, investments, and federal funds sold. Interest-bearing deposits and other short-term borrowings make up the cost of funds. Non-interest bearing deposits and capital are also funding sources. Changes in the volume and mix of earning assets and funding sources along with changes in associated interest rates determine changes in net interest income.

As previously stated, net interest income was \$1.3 million and \$3.6 million during the three-month and nine-month periods ended September 30, 2004 as compared to \$929,494 and \$2.6 million for the same periods in 2003. This represents increases of 44.75% and 39.58% for the three-month and nine-months ended September 30, 2004 as compared to the same periods in 2003.

Interest income from loans and investments for the three-month and nine-month periods ended September 30, 2004 was \$2,001,108 and \$5,312,537, respectively, compared to \$1,437,720 and \$4,008,966 for the three-month and nine-month periods ended September 30, 2003. The 39.19% and 32.52% increases over the same periods in 2003 are directly related to the 31.05% increase in average interest-earning assets for the nine-months ended September 30, 2004 as compared to the same period in 2003. The increase in average interest-earning assets was also aided by a slight increase in average yields due to three .25% increases in the target federal funds rate since June 30, 2004. The yields on these assets increased from 5.08% for the nine months ended September 30, 2003 to 5.14% for the nine months ended September 30, 2004.

The percentage of average interest-earning assets represented by loans was 87.12% and 82.33% for the nine-month periods ended September 30, 2004 and

## Edgar Filing: BAY NATIONAL CORP - Form 10QSB

2003, respectively. An increase in the percentage of interest-earning assets represented by the loan portfolio would normally result in an increase in average yields on interest-earning assets. However, loan yields have fluctuated as a result of actions taken by the Federal Reserve to reduce its target for the federal funds rate from 1.25% at December 31, 2002 to 1.00% effective June 25, 2003. For the nine-month period ended September 30, 2004, the average yield on the loan portfolio decreased to 5.76% from 6.00% for the nine-month period ended September 30, 2003. This decrease is primarily due to the difference in the target federal funds rate in effect for the periods. The Federal Reserve increased its target for the federal funds rate to: 1.25% effective June 30, 2004; 1.50% effective August 10, 2004; and 1.75% effective September 21, 2004. While these increases

11

had minimal effect on the Company's results for the three-month and nine-month periods ended September 30, 2004, improved yields on earning assets in future periods should occur.

The average yield on the investment portfolio, including overnight investments, was .95% for the nine-month period ended September 30, 2004 as compared to .80% for the same period in 2003. The improvement in the average yield was a direct result of the most recent Federal Reserve actions discussed above, as well as an increase in the holdings of Federal Reserve and Federal Home Loan bank stocks, which pay dividend yields greater than the prevailing federal funds rates. The percentage of average interest-earning assets represented by investments was 12.88% and 17.67% for the nine-month periods ended September 30, 2004 and 2003, respectively.

Interest expense from deposits and short-term borrowings for the three-month and nine-month periods ended September 30, 2004 was \$655,710 and \$1,737,834, respectively. This compares to \$508,226 and \$1,447,836 for the comparable periods in 2003. The 29.02% and 20.03% increases over the three and nine-month periods in 2003 are a result of a 30.80% increase in average interest-bearing liabilities for the nine-month period ended September 30, 2004 as compared to the same period in 2003. The increase in interest expense resulting from the growth in interest-bearing liabilities was offset by decreases in average rates paid. Average rates paid on these liabilities declined from 2.31% for the nine-month period ended September 30, 2003 to 2.12% for the nine-month period ended September 30, 2004.

12

The following tables set forth, for the periods indicated, information regarding the average balances of interest-earning assets and interest-bearing liabilities, the amount of interest income and interest expense and the resulting yields on average interest-earning assets and rates paid on average interest-bearing liabilities. Average balances are also provided for non-interest-earning assets and non-interest-bearing liabilities.

Provision for Credit Losses

The provision for credit losses was \$136,500 and \$350,221 for the three-month and nine-month periods ended September 30, 2004, as compared to \$48,000 and \$355,500 for the three-month and nine-month periods ended September 30, 2003. The provisions for each period were the direct result of growth in loan balances outstanding in all segments of the portfolio. The provision for the nine-month period ended September 30, 2004 was nominally lower than the same period in the prior year due to fact that gross loans outstanding increased by approximately \$27.4 million during that period as compared to an increase of approximately \$28.4 million for the same period in 2003. For additional information regarding the methodology used to determine the provision for credit losses see the Management Discussion and Analysis section entitled "Allowance for Credit Losses and Credit Risk Management."

Non-Interest Income

Non-interest income consists primarily of gains on the sale of mortgage loans, deposit account service charges, and cash management fees. For the three-month period ended September 30, 2004, the Company realized non-interest income in the amount of \$132,602 as compared to \$169,886 for the three-month period ended September 30, 2003. Gains on the sale of mortgage loans of \$50,576 comprise 38.14% of the total for the three-month period ended September 30,

## Edgar Filing: BAY NATIONAL CORP - Form 10QSB

2004. This compares to gains on the sale of mortgage loans of \$102,060, or 60.01% of total non-interest income, for the three-month period ended September 30, 2003.

For the nine-month period ended September 30, 2004, the Company realized non-interest income in the amount of \$401,425 as compared to \$496,830 for the nine-month period ended September 30, 2003. Gains on the sale of mortgage loans of \$181,697 comprised 45.26% of the total for the nine-month period ended September 30, 2004. This compares to gains on the sale of mortgage loans of \$320,576, or 64.52% of total non-interest income, for the nine-month period ended September 30, 2003.

The level of gains on the sale of mortgage loans has declined due to recent increases in long-term interest rates driven by stronger economic conditions. Additional increases in interest rates, or a slow down in the housing market, could further impact the Company's ability to maintain the same level of non-interest income associated with mortgage loan production.

Service charges on deposit accounts totaled \$66,447 and \$178,025 for the three-month and nine-month periods ended September 30, 2004, as compared to \$58,263 and \$149,015 for the three-month and nine-month periods ended September 30, 2003. The increases of 14.05% and 19.47% for the three and nine-month periods, as compared to the same periods in 2003, can be directly attributed to the ongoing growth in the Company's deposit portfolio.

The Company will continue to seek ways to expand its sources of non-interest income. In the future, the Company may enter into fee arrangements with strategic partners that offer investment advisory services, risk management and employee benefit services. No assurance can be given that such fee arrangements will be obtained or maintained.

### Non-Interest Expense

Non-interest expense for the three-month and nine-month periods ended September 30, 2004, totaled \$1,097,128 and \$3,147,152, respectively. This compares to non-interest expense for the comparable periods in 2003 of \$944,032 and \$2,826,202, respectively. The increase of \$320,950, or 11.36%, for the nine-month period resulted from an increase in salaries and benefits of \$220,585 related to staffing growth to increase marketing efforts, manage the growth of the loan and deposit portfolios, and support increased operational volume. Occupancy expenses increased by \$30,540, or 15.79%, for the nine-months ended September 30, 2004 as compared to the same period in 2003. This increase was due in part to scheduled rent increases as well as a reduction in sublease income of approximately \$7,700 due to expansion of the Company's corporate office into previously sublet space, and \$14,400 of rental expenses associated with new space obtained to facilitate the expansion of the Company's corporate offices. The \$19,498, or 4.92%, increase in data processing and other outside services for the nine-months ended September 30, 2004 as compared to the same period in 2003 is the result of increased data and item processing costs paid to external service providers. These costs are volume-driven based upon the number of customer accounts and related transaction volume. As a result, these costs increase with the growth of the Company. The \$23,623, or 14.38%, decrease in advertising and marketing-related expenses for the nine-months ended September 30, 2004 as compared to the same period in 2003 is related to a reduction in the number of events and marketing campaigns conducted. This reduction was made possible through the use of more efficient marketing methods and through the success of prior campaigns which increased the visibility of the Bank in its markets. The increase of \$73,950, or 15.20%, in all other expenses relates to various costs associated with the increased size and complexity of the Company.

Non-interest expense for the three-month period ended September 30,

## Edgar Filing: BAY NATIONAL CORP - Form 10QSB

2004 increased by \$153,096, or 16.22%, as compared to the same period for the prior year. The increase is directly

15

attributable to the same factors that resulted in the increase for the comparable nine-month periods.

The rate of increase in non-interest expenses is substantially less than the 39.58% increase in net interest income for the nine-month period ended September 30, 2004 as compared to the nine-month period ended September 30, 2003. Management believes this indicates that the Company is continuing to effectively leverage its cost structure to generate profitable growth. While management expects that the ongoing growth of the Company's customer base will continue to require additional staffing in order to appropriately service customers and manage the business effectively, management believes that additional growth in the customer base can continue to be accomplished without proportionate increases in these costs.

### Income Taxes

When the realization of deferred income taxes is deemed to be more likely than not, the recordation of previously unrecorded net deferred income tax assets will have a positive effect on the earnings in the period when such determination is made. As of December 31, 2003, the Company had net deferred tax assets of approximately \$1.8 million that were eliminated through a valuation allowance. Subsequent to the recordation of deferred taxes, the Company will begin to record income tax expense at the statutory rate. Since inception, the Company has not recorded any income tax expense or benefit. Recognizing income tax expense in future periods will have a detrimental effect on reported earnings.

### Financial Condition

#### Composition of the Balance Sheet

As of September 30, 2004, total assets were \$157,935,896. This represents growth of \$35,607,640 or 29.11% since December 31, 2003. The growth in total assets included increases of \$96,793 in cash and due from banks, \$2,060,056 in federal funds sold and other overnight investments, \$6,156,963 in loans held for sale, \$56,600 in other equity securities, \$27,089,245 in loans net of the allowance for credit losses and \$149,850 in other non-earning assets. These increases were offset by a slight decrease of \$1,867 in investment securities available for sale.

During the second quarter of 2004, the Company introduced a new loan program for conventional first and second residential mortgage loans. Under this program the Company purchases a 100% participation in mortgage loans originated by a mortgage company in the Baltimore metropolitan area. These participations are for loans that a secondary market investor has committed to purchase. The participations are typically held for a period of three to four weeks before being sold to the secondary market investor. The Company earns interest on these loans at a rate indexed to the prime rate. As of September 30, 2004, the Company held \$7.0 million of these loans which were classified as held for sale.

As of September 30, 2004, loans, excluding loans held for sale (net of a \$1,610,500 allowance for credit losses), totaled \$127,214,720. The increase of 27.06%, from a balance of \$100,125,475 as of December 31, 2003, is a continuation of the growth trend established in prior periods. The Company continues to emphasize prudent growth through the hiring of experienced

## Edgar Filing: BAY NATIONAL CORP - Form 10QSB

commercial lenders, and the development and use of referral sources including accountants, lawyers and existing customers, as well as members of the Board of Directors and the Baltimore and Salisbury Advisory Boards.

The composition of the loan portfolio as of September 30, 2004 was approximately \$69.6 million of commercial loans, \$2.3 million of consumer loans, and \$56.9 million of real estate loans (excluding mortgage loans held for sale). The composition of the loan portfolio

16

as of December 31, 2003 was approximately \$61.9 million of commercial loans, \$1.7 million of consumer loans, and \$37.8 million of real estate loans (excluding mortgage loans held for sale). Mortgage loans held for sale were \$7.1 million and \$923,825 as of September 30, 2004 and December 31, 2003, respectively.

Funds not extended in loans are invested in cash and due from banks, federal funds sold and other overnight investments, and short-term U.S. Treasury securities. At September 30, 2004, the Company had federal funds sold and other overnight investments totaling \$19,547,037 as compared to \$17,486,981 as of December 31, 2003. The Company held \$312,690 of Federal Reserve Bank stock at September 30, 2004 and December 31, 2003, respectively. The Company also held Federal Home Loan Bank of Atlanta stock of \$225,000 and \$168,400 as of September 30, 2004 and December 31, 2003, respectively, and United States Treasury bills with a maturity value of \$1,550,000 as of both September 30, 2004 and December 31, 2003. The Treasury securities are used to collateralize repurchase agreements which are classified as short-term borrowings under which \$1,550,000 and \$1,222,000 were outstanding as of September 30, 2004 and December 31, 2003, respectively. The increase in total assets is related to the strong deposit growth of \$33.8 million or 31.10% since December 31, 2003, as well as \$328,000 in additional short-term borrowings, \$500,000 in borrowings under a note payable, and \$412,500 in proceeds from the issuance of common stock upon the exercise of stock warrants. Management has made a decision to maintain an appropriate level of liquidity in the investment portfolio in order to ensure that funds are readily available to fund the growth of the loan portfolio and to meet the needs of deposit customers.

Deposits at September 30, 2004 were \$142,284,845, of which \$7,798,704, or 5.48% are related to two customers in one industry. Deposits at December 31, 2003 were \$108,530,901, of which deposits for these same customers stood at \$7,749,590 or 7.14% of total deposits. The deposits for these customers tend to fluctuate significantly; as a result, management monitors these deposits on a daily basis to ensure that liquidity levels are adequate to compensate for these fluctuations. Deposit growth resulted from the continued marketing efforts of officers and directors, direct mail campaigns and the listing of money market and certificate of deposit rates in print publications and on the national market. Management has set the interest rates paid on deposits to be competitive in the market and will continue its marketing activities to generate growth in deposits.

The market in which the Company operates is very competitive; therefore, the rates of interest paid on deposits are affected by rates paid by other depository institutions. Management closely monitors rates offered by other institutions and seeks to be competitive within the market. The Company has chosen to selectively compete for large certificates of deposits. The Company will choose to pursue such deposits when expected loan growth provides for adequate spreads to support the cost of those funds. As of September 30, 2004, the Company had outstanding certificates of deposit of approximately \$30.2

## Edgar Filing: BAY NATIONAL CORP - Form 10QSB

million that were obtained through the listing of certificate of deposit rates on two Internet-based listing services (such deposits are sometimes referred to herein as national market certificates of deposit). These certificates of deposit were issued with an average yield of 2.82% and an average term of 29.6 months. Included in the \$30.2 million of Internet-originated certificates of deposit is \$394,013 that has been classified as "Brokered Deposits" for bank regulatory purposes. These "Brokered Deposits" were issued in average amounts of approximately \$98,503 with an average yield of 3.62% and an average term of 40.53 months. As of December 31, 2003, the total certificates of deposit obtained through the listing of certificate of deposit rates on the Internet-based listing services were approximately \$25 million, of which \$790,157 were classified as "Brokered Deposits." The Company has never paid broker fees for deposits. Additionally, the Company has not accepted any new "Brokered Deposits" since August 2002.

17

Core deposits, which management categorizes as all deposits other than national market certificates of deposit and all but \$2.0 million of deposits from the two large customers described above (which management considers to be a stable deposit amount from these customers based upon historical trends), stood at \$106,271,575 as of September 30, 2004, up 36.70% from \$77,742,030 as of December 31, 2003. Core deposits are closely monitored by management because they consider such deposits not only a relatively stable source of funding but also reflective of the growth of commercial and consumer depository relationships.

Short-term borrowings consist of repurchase agreements collateralized by pledges of U.S. Government Treasury Securities, based upon their market values, equal to 100% of the principal and accrued interest of its short-term borrowings. The outstanding balance of short-term borrowings increased from \$1,222,000 at December 31, 2003 to \$1,550,000 at September 30, 2004, due to increases in the balance of available funds for customers participating in this program.

Note payable consists of \$500,000 borrowed under a \$5 million, three-year unsecured non-revolving credit facility executed on September 28, 2004 with another financial institution. Borrowings under the credit facility will be used to provide regulatory capital to the Bank. The loan bears interest at the prime rate.

Total stockholders' equity at September 30, 2004 was \$12,957,755 as compared to \$12,066,500 at December 31, 2003. The increase in stockholders' equity is a result of the positive operating results for the nine-months ended September 30, 2004, and \$412,500 received upon the issuance of 41,250 shares of common stock upon the exercise of warrants. Management believes that this level of capital is adequate to support projected asset growth for at least the next 12 months.

### Allowance for Credit Losses and Credit Risk Management

Originating loans involves a degree of risk that credit losses will occur in varying amounts according to, among other factors, the type of loans being made, the credit-worthiness of the borrowers over the term of the loans, the quality of the collateral for the loan, if any, as well as general economic conditions. The Company charges the provision for credit losses to earnings to maintain the total allowance for credit losses at a level considered by management to represent its best estimate of the losses known and inherent in the portfolio that are both probable and reasonable to estimate, based on, among other factors, prior loss experience, volume and type of lending conducted,

## Edgar Filing: BAY NATIONAL CORP - Form 10QSB

estimated value of any underlying collateral, economic conditions (particularly as such conditions relate to Bay National Corporation's market area), regulatory guidance, peer statistics, management's judgment, past due loans in the loan portfolio and concentrations of risk (if any). The Company charges losses on loans against the allowance when it is believed that collection of loan principal is unlikely. Recoveries on loans previously charged off are added back to the allowance.

Management uses a loan grading system where all loans are graded based upon management's evaluation of the risk associated with each loan. A factor, based on the loan grading, is applied to the loan balance to reserve for potential losses. In addition, management judgmentally establishes an additional nonspecific reserve. The nonspecific portion of the allowance reflects management's estimate of probable inherent, but undetected losses, within the portfolio due to uncertainties in economic conditions, delays in obtaining information, including unfavorable information about a borrower's financial condition, the difficulty in identifying triggering events that correlate perfectly to subsequent loss rates and risk factors that have not yet manifested themselves in loss allocation factors.

18

The reserve factors used are based on management's judgment as to appropriate reserve percentages for various categories of loans, and adjusting those values based on the following: historical losses in each category; historical and current delinquency in each category; underwriting standards in each category; comparison of losses and delinquencies to peer group performance; and an assessment of the likely impact of economic and other external conditions on the performance of each category.

A test of the adequacy of the allowance for credit losses is performed and reported to the Board of Directors on a monthly basis. Management uses the information available to make a determination with respect to the allowance for credit losses, recognizing that the determination is inherently subjective and that future adjustments may be necessary depending upon, among other factors, a change in economic conditions of specific borrowers, or generally in the economy, and new information that becomes available. However, there are no assurances that the allowance for credit losses will be sufficient to absorb losses on nonperforming assets, or that the allowance will be sufficient to cover losses on nonperforming assets in the future.

The allowance for credit losses as of September 30, 2004 and December 31, 2003 was \$1,610,500 and \$1,266,500, respectively. The amount equates to 1.25% of outstanding loans, net of loans held for sale, as of September 30, 2004 and December 31, 2003. This percentage has remained consistent because no additional information has indicated that the overall level of reserves is inappropriate. Bay National Corporation has no exposure to foreign countries or foreign borrowers. Management believes that the allowance for credit losses is adequate for each period presented.

As of September 30, 2004 the Company had one loan of approximately \$11,000 that was more than 90 days past due and therefore classified as a non-accrual loan. The Company had loan charge-offs of \$6,221 during the nine-months ended September 30, 2004 with no charge-offs occurring during the three-months ended September 30, 2004. These charge-offs were the first loan charge-offs incurred since the Company's inception in 2000.

### Liquidity and Interest Rate Sensitivity

The Company's principal sources of liquidity are cash and assets that

## Edgar Filing: BAY NATIONAL CORP - Form 10QSB

can be readily converted into cash, including investment securities, and loans held for sale which can be liquidated in a timeframe which is usually less than 30 days. The Company also has commitments for a total of \$7 million of borrowing availability under unsecured Federal funds lines of credit with three separate financial institutions, approximately \$10 million of borrowing capacity with the Federal Home Loan Bank of Atlanta and \$4,500,000 of borrowing capacity under its three-year note payable. The credit facilities can be used in conjunction with the normal deposit strategies, which include pricing changes to increase deposits as necessary.

As of September 30, 2004, the Company had \$669,917 in cash and due from banks, and \$19,547,037 in federal funds sold and other overnight investments. This represents an increase in liquid assets of \$2,156,849, or 11.94%, since December 31, 2003, at which time liquid assets consisted of \$573,124 in cash and due from banks and \$17,486,981 in federal funds sold and other overnight investments. The increase in the overall level of liquid assets is the result of strong deposit growth of \$33.8 million or 31.10% since December 31, 2003, as well as \$328,000 in additional short-term borrowings, \$500,000 in borrowings under the note payable, and \$412,500 in proceeds from the issuance of common stock upon the exercise of warrants.

19

The Company has sufficient liquidity to meet its loan commitments as well as fluctuations in deposits. The Company will choose to retain maturing certificates of deposit, when necessary, by offering competitive rates. Management is not aware of any demands, trends, commitments, or events that would result in the Company's inability to meet anticipated or unexpected liquidity needs.

The primary objective of asset/liability management is to ensure the steady growth of the Company's primary earnings component, net interest income. Net interest income can fluctuate with significant interest rate movements. To minimize the risk associated with these rate swings, management works to structure the Company's balance sheet so that the ability exists to adjust pricing on interest-earning assets and interest-bearing liabilities in roughly equivalent amounts at approximately the same time intervals. Imbalances in these repricing opportunities at any point in time constitute interest rate sensitivity.

The measurement of the Company's interest rate sensitivity, or "gap," is one of the principal techniques used in asset/liability management. The interest sensitive gap is the dollar difference between assets and liabilities subject to interest rate pricing within a given time period, including both floating rate or adjustable rate instruments and instruments which are approaching maturity.

The following table sets forth the amount of the Company's interest-earning assets and interest-bearing liabilities as of September 30, 2004, which are expected to mature or reprice in each of the time periods shown:

	Amount	Percent of Total	0 to 3 Months	Maturity or repricing wit 4 to 12 Months	1 to 5 Years
	-----	-----	-----	-----	-----
Interest-earning assets					

Edgar Filing: BAY NATIONAL CORP - Form 10QSB

	=====	=====	=====	=====	=====
Periodic repricing differences					
Periodic gap			\$ 60,086,784	\$ (22,595,122)	\$ (7,921,0
			=====	=====	=====
Cumulative gap			\$ 60,086,784	\$ 37,491,662	\$29,570,6
			=====	=====	=====
Ratio of rate sensitive assets to rate sensitive liabilities					
			192.00%	19.56%	75.1

The Company has 77.37% of its interest-earning assets and 47.06% of its interest-bearing liabilities in variable rate balances. Interest-earning assets exceed interest-bearing liabilities by \$32,292,421. The majority of this gap is concentrated in items maturing or repricing within 12

20

months. This gap is generally reflective of the Company's emphasis on originating variable rate loans and the demand in the market for higher yielding fixed rate deposits. This analysis indicates that the Company generally will benefit from increasing market rates of interest. However, since all interest rates and yields do not adjust at the same pace, the gap is only a general indicator of interest rate sensitivity. The analysis of the Company's interest-earning assets and interest-bearing liabilities presents only a static view of the timing of maturities and repricing opportunities, without taking into consideration the fact that changes in interest rates do not affect all assets and liabilities equally. Net interest income may be affected by other significant factors in a given interest rate environment, including changes in the volume and mix of interest-earning assets and interest-bearing liabilities.

Management constantly monitors and manages the structure of the Company's balance sheet, seeks to control interest rate exposure, and evaluate pricing strategies. Strategies to better match maturities of interest-earning assets and interest-bearing liabilities include structuring loans with rate floors and ceilings on variable-rate notes and by providing for repricing opportunities on fixed rate notes. Management believes that a lending strategy

## Edgar Filing: BAY NATIONAL CORP - Form 10QSB

focusing on variable-rate loans and short-term fixed rate loans will best facilitate the goal of minimizing interest rate risk. However, management will opportunistically enter into longer term fixed-rate loans and/or investments when, in management's judgment, rates adequately compensate the Company for the interest rate risk. The Company's current investment concentration in federal funds sold and other overnight investments provides the most flexibility and control over rate sensitivity since it generally can be restructured more quickly than the loan portfolio. On the liability side, deposit products can be restructured so as to offer incentives to attain the maturity distribution desired although competitive factors sometimes make control over deposit maturity difficult.

In theory, maintaining a nominal level of interest rate sensitivity can diminish interest rate risk. In practice, this is made difficult by a number of factors, including cyclical variation in loan demand, different impacts on interest sensitive assets and liabilities when interest rates change, and the availability of funding sources. Management generally attempts to maintain a balance between rate-sensitive assets and liabilities as the exposure period is lengthened to minimize the overall interest rate risk to the Company.

### Off-Balance Sheet Arrangements

In the normal course of business the Company is a party to financial instruments with off-balance sheet risk. These financial instruments primarily include commitments to extend credit, lines of credit and standby letters of credit. The Company uses these financial instruments to meet the financing needs of its customers. These financial instruments involve, to varying degrees, elements of credit, interest rate, and liquidity risk.

Outstanding loan commitments and lines and letters of credit as of September 30, 2004 and December 31, 2003 are as follows:

	September 30, 2004	December 31, 2003
Loan commitments	\$ 9,367,094	\$ 11,458,333
Unused lines of credit	43,897,329	32,234,145
Letters of credit	1,997,159	2,167,501

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have interest rates fixed at current market amounts, fixed expiration dates or other termination clauses and may require payment of a fee. Unused lines of credit represent the unused portion of lines of credit previously extended and available to the customer as long as there is no violation of any contractual condition.

These lines generally have variable interest rates. Since many of the commitments are expected to expire without being drawn upon, and since it is unlikely that customers will draw upon their line of credit in full at any time, the total commitment amount or line of credit amount does not necessarily represent future cash requirements. The Company is not aware of any loss it would incur by funding its commitments or lines of credit.

Standby letters of credit are conditional commitments issued to guarantee the performance of a customer to a third party. The Company's exposure to credit loss in the event of nonperformance by the customer is the contract amount of the commitment.

## Edgar Filing: BAY NATIONAL CORP - Form 10QSB

In general, loan commitments, lines of credit and letters of credit are made on the same terms, including with respect to collateral, as outstanding loans. Each customer's credit-worthiness and collateral requirement is evaluated on a case-by-case basis.

The increase in the overall level of loan commitments and unused lines of credit as of September 30, 2004 as compared to loan commitments and unused lines of credit as of December 31, 2003, is a direct result of the same marketing activities that resulted in the 27.06% increase in outstanding loans.

### Capital Resources

The Company had stockholders' equity at September 30, 2004 of \$12,957,755 as compared to \$12,066,500 at December 31, 2003. The increase in capital is a result of the positive operating results for the nine months-ended September 30, 2004, and \$412,500 received upon the issuance of 41,250 shares of common stock upon the exercise of warrants. Management believes that this level of capital is adequate to support projected asset growth for at least the next 12 months.

Banking regulatory authorities have implemented strict capital guidelines directly related to the credit risk associated with an institution's assets. Banks and bank holding companies are required to maintain capital levels based on their "risk adjusted" assets so that categories of assets with higher "defined" credit risks will require more capital support than assets with lower risks. The Bank has exceeded its capital adequacy requirements to date.

Banking regulations also limit the amount of dividends that may be paid without prior approval of the Bank's regulatory agencies. Regulatory approval is required to pay dividends that exceed the Bank's net profits for the current year plus its retained net profits for the preceding two years. The Bank could not have paid dividends to the Company without approval from bank regulatory agencies at September 30, 2004.

### Reconciliation of Non-GAAP Measures

Below is a reconciliation of total deposits to core deposits as of September 30, 2004 and December 31, 2003, respectively:

	September 30 2004	December 2003
	-----	-----
Total deposits	\$ 142,284,845	\$ 108,530
National market certificates of deposit	(30,214,566)	(25,039)
Variable balance accounts (2 customers)	(7,798,704)	(7,749)
Portion of variable balance accounts considered to be core	2,000,000	2,000
	-----	-----
Core deposits	\$ 106,271,575	\$ 77,742
	=====	=====

## Edgar Filing: BAY NATIONAL CORP - Form 10QSB

The Company's consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States of America and follow general practices within the industries in which it operates. Application of these principles requires management to make estimates, assumptions and judgments that affect the amounts reported in the financial statements and accompanying notes. These estimates, assumptions and judgments are based on information available as of the date of the financial statements; accordingly, as this information changes, the financial statements could reflect different estimates, assumptions and judgments. Certain policies inherently have a greater reliance on the use of estimates, assumptions and judgments and as such have a greater possibility of producing results that could be materially different than originally reported. Estimates, assumptions and judgments are necessary when assets and liabilities are required to be recorded at fair value, when a decline in the value of an asset not carried on the financial statements at fair value warrants an impairment write-down or valuation reserve to be established, or when an asset or liability must be recorded contingent upon a future event. Carrying assets and liabilities at fair value inherently results in more financial statement volatility. The fair values and the information used to record valuation adjustments for certain assets and liabilities are based either on quoted market prices or are provided by other third-party sources, when available.

Based on the valuation techniques used and the sensitivity of financial statement amounts to the methods, assumptions and estimates underlying those amounts, management has identified the determination of the allowance for credit losses as the accounting area that requires the most subjective or complex judgments, and as such could be most subject to revision as new information becomes available.

Management has significant discretion in making the judgments inherent in the determination of the provision and allowance for credit losses. The establishment of allowance factors is a continuing exercise and allowance factors may change over time, resulting in an increase or decrease in the amount of the provision or allowance based upon the same volume and classification of loans. Changes in allowance factors or in management's interpretation of those factors will have a direct impact on the amount of the provision, and a corresponding effect on income and assets. Also, errors in management's perception and assessment of the allowance factors could result in the allowance not being adequate to cover losses in the portfolio, and may result in additional provisions or charge-offs, which would adversely affect income and capital.

For additional information regarding the allowance for loan and lease losses, see the "Allowance for Credit Losses and Credit Risk Management" section of this financial review.

### Item 3. Controls and Procedures

As of the end of the period covered by this quarterly report on Form 10-QSB, Bay National Corporation's Chief Executive Officer and Chief Financial Officer evaluated the effectiveness of Bay National Corporation's disclosure controls and procedures. Based upon that evaluation, Bay National Corporation's Chief Executive Officer and Chief Financial Officer concluded that Bay National Corporation's disclosure controls and procedures are effective. Disclosure controls and procedures are controls and other procedures that are designed to ensure that information required to be disclosed by Bay National Corporation in the reports that it files or submits under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

In addition, there were no changes in Bay National Corporation's internal controls over financial reporting (as defined in Rule 13a-15 or Rule

## Edgar Filing: BAY NATIONAL CORP - Form 10QSB

15d-15 under the Securities Act of 1934, as

23

amended) during the quarter ended September 30, 2004, that have materially affected, or are reasonably likely to materially affect, Bay National Corporation's internal control over financial reporting.

### Information Regarding Forward-Looking Statements

In addition to the historical information contained in Part I of this Quarterly Report on Form 10-QSB, the discussion in Part I of this Quarterly Report on Form 10-QSB contains certain forward-looking statements. Forward-looking statements often use words such as "believe," "expect," "plan," "may," "will," "should," "project," "contemplate," "anticipate," "forecast," "intend" or other words of similar meaning. You can also identify them by the fact that they do not relate strictly to historical or current facts. Our actual results and the actual outcome of our expectations and strategies could be different from those anticipated or estimated.

The statements presented herein with respect to, among other things, Bay National Corporation's plans, objectives, expectations and intentions, including statements regarding profitability, liquidity, allowance for loan losses, interest rate sensitivity, market risk and financial and other goals are forward looking. These statements are based on Bay National Corporation's beliefs and assumptions, and on information available to Bay National Corporation as of the date of this filing, and involve risks and uncertainties. These risks and uncertainties include, among others, those discussed in this Quarterly Report on Form 10-QSB; Bay National Corporation's limited operating history; dependence on key personnel; risks related to Bay National Bank's choice of loan portfolio; risks related to Bay National Bank's lending limit; risks of a competitive market; impact of government regulation on operating results; and effect of developments in technology. For a more complete discussion of these risks and uncertainties see the discussion under the caption "Factors Affecting Future Results" in Bay National Corporation's Form 10-KSB.

Bay National Corporation's actual results could differ materially from those discussed herein and you should not put undue reliance on any forward-looking statements. All forward-looking statements speak only as of the date of this filing, and Bay National Corporation undertakes no obligation to make any revisions to the forward-looking statements to reflect events or circumstances after the date of this filing or to reflect the occurrence of unanticipated events.

## PART II - OTHER INFORMATION

Item 1. Legal Proceedings.

None

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

(a) From July 13, 2004 to September 30, 2004, Bay National Corporation issued 41,250 shares of its common stock, \$0.01 par value per share,

## Edgar Filing: BAY NATIONAL CORP - Form 10QSB

at a purchase price of \$10.00 per share, and received aggregate proceeds of \$412,500. The shares were issued upon the exercise of outstanding warrants.

On September 10, 1999, Bay National Corporation issued warrants to purchase 56,250 shares of its common stock, \$0.01 par value per share, to purchasers in its organizational offering. The warrants became exercisable on April 30, 2001 and expire on November 16, 2004.

There were and will be no underwriting discounts or commissions paid with respect to the issuance of the common stock upon exercise of the warrants. Bay National Corporation believes that the issuance of the shares of common stock upon exercise of the warrants is exempt from the registration requirements of the Securities Act of 1933 by virtue of Section 4(2) of the Securities Act of 1933 and Rule 506 promulgated thereunder. The transaction was not conducted by any form of general solicitation or general advertising and, in connection with the transaction, Bay National Corporation is taking reasonable care to assure that the purchasers of the common stock upon exercise of the warrants are not underwriters within the meaning of Section 2(11) of the Securities Act by, among other things, placing appropriate restrictive legends on the share certificates.
