Bottomline Technologies (de), Inc.
Notes to Unaudited Condensed Consolidated Financial Statements
September 30, 2008

Note 1—Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals and adjustments) considered necessary for a fair presentation of the interim financial information have been included. Operating results for the three months ended September 30, 2008 are not necessarily indicative of the results that may be expected for any other interim period or for the fiscal year ending June 30, 2009. For further information, refer to the financial statements and footnotes included in the Company's Annual Report on Form 10-K as filed with the Securities and Exchange Commission (SEC) on September 12, 2008.

Certain prior period amounts have been reclassified to conform to the current year presentation.

Note 2—Fair Values of Assets and Liabilities

In September 2006, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards (SFAS) No. 157, "Fair Value Measurements," or SFAS 157, effective for financial statements issued for fiscal years beginning after November 15, 2007. Accordingly, the Company adopted SFAS 157 effective July 1, 2008. SFAS 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. The Statement applies only to fair value measurements that already are required or permitted by other accounting standards and does not require any new fair value measurements. In February 2008, the FASB issued FASB Staff Position (FSP) No. 157-2, which defers the effective date of SFAS 157 to fiscal years beginning after November 15, 2008 (July 1, 2009 for the Company) for nonfinancial assets and liabilities that are not recognized or disclosed at fair value in the financial statements on a recurring basis.

The adoption of SFAS No. 157 did not have an impact on our financial position or results of operations. The Company's nonfinancial assets and liabilities that meet the deferral criteria set forth in FSP No. 157-2 include goodwill, intangible assets, and property, plant and equipment. The Company does not expect that the adoption of SFAS No. 157 for these nonfinancial assets and liabilities will have a material impact on its financial position or results of operations.

In accordance with the provisions of SFAS No. 157, the Company measures fair value at the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. SFAS 157 prioritizes the assumptions that market participants would use in pricing the asset or liability (the "inputs") into a three-tier fair value hierarchy, as follows:

Level 1: Observable inputs such as quoted prices for identical assets or liabilities in active markets.

Level 2: Other inputs that are observable directly or indirectly, such as quoted prices for similar instruments in active markets or for similar markets that are not active.

Level 3: Unobservable inputs for which there is little or no market data and which require the Company to develop its own assumptions about how market participants would price the asset or liability.

Valuation techniques for assets and liabilities may include methodologies such as the market approach, the income approach or the cost approach, and may use unobservable inputs such as projections, estimates and management's interpretation of current market data. These unobservable inputs are only utilized to the extent that observable inputs are not available or cost-effective to obtain.

At September 30, 2008, assets and liabilities of the Company measured at fair value on a recurring basis included marketable securities of \$47,000. These were valued based on reference to quoted prices in active markets (Level 1 inputs).

Note 3—Business Acquisitions

Optio Software, Inc.

On April 21, 2008, the Company acquired Optio Software, Inc. (Optio). Optio is a US based company with operations in the United States, the United Kingdom, Germany and France that provides software solutions dedicated to automating, managing and controlling the entire lifecycle of document intensive processes. The purchase consideration and acquisition related costs for Optio were approximately \$46.5 million, consisting of approximately \$44.7 million in cash and \$1.8 million in acquisition related costs. Optio operating results are included in the Company's operating results from the date of acquisition forward, as a component of the Payments and Transactional Documents operating segment.

In connection with the acquisition, the Company recorded costs associated with the involuntary termination of certain Optio employees and costs associated with Optio facility exit activities. At September 30, 2008, certain estimated costs were still being finalized. Accordingly, the preliminary estimate of these costs might require adjustment in a subsequent quarter. The Company expects to finalize these estimates no later than March 31, 2009, with any required adjustment resulting in a corresponding adjustment to goodwill. A summary of the severance and facility exit accrual activity through September 30, 2008 is presented below.

	Facility Exit Costs		Severance Costs	
			(in thousands)	
Initial estimate, included in preliminary purchase price allocation for Optio	\$	1,220	\$	1,415
Adjustments to original estimate, recorded through goodwill		---		79
Payments charged against the accrual		(190)		(657)
Impact of changes in foreign currency exchange rates		(13)		(92)
Remaining accrual at September 30, 2008	\$	1,017	\$	745

Pro-forma Information

The following unaudited pro-forma financial information presents the combined results of operations of the Company and Optio as if that acquisition had occurred as of July 1, 2007, after giving effect to certain adjustments such as increased amortization expense of acquired intangible assets, purchase accounting reductions to acquired deferred revenue based on the Company's estimates of fair value, and a decrease in interest income as a result of the net cash paid for the acquisition. This pro-forma financial information does not necessarily reflect the results of operations that would have actually occurred had the Company and Optio been a single entity during this period.

	Pro Forma Three Months Ended September 30, 2007 (unaudited) (in thousands)
Revenues	\$ 36,110

Net loss	\$	(5,966)
Net loss per basic and diluted share	\$	(0.25)

Note 4—Net Loss Per Share

The following table sets forth the computation of basic and diluted net loss per share:

	Three Months Ended September 30, 2008 2007 (in thousands, except per share amounts)	
Numerator:		
Net loss	\$ (3,849)	\$ (801)
Denominator – Weighted average shares outstanding used in computing basic and diluted net loss per share:	23,883	23,602
Basic and diluted net loss per share:	\$ (0.16)	\$ (0.03)

Note 5—Comprehensive Income or Loss

Comprehensive income or loss represents the Company's net loss plus the results of certain stockholders' equity changes not reflected in the unaudited condensed consolidated statements of operations. The components of comprehensive income or loss are as follows:

	Three Months Ended September 30, 2008 2007 (in thousands)	
Net loss	\$ (3,849)	\$ (801)
Other comprehensive (loss) income:		
Foreign currency translation adjustments	(8,025)	1,071
Comprehensive (loss) income	\$ (11,874)	\$ 270

Note 6—Operations by Segments and Geographic Areas

Segment Information

SFAS No. 131, "Disclosures about Segments of an Enterprise and Related Information", establishes standards for reporting information about operating segments in financial statements. Operating segments are defined as components of an enterprise for which separate financial information is available that is evaluated regularly by the chief operating decision maker, or decision making group, in deciding how to allocate resources and in assessing performance.

The Company's operating segments are organized principally by the type of product or services offered and by geography. In accordance with SFAS 131, the Company has aggregated similar operating segments into three reportable segments as follows:

Payments and Transactional Documents. The Company's Payments and Transactional Documents segment is a supplier of software products that provide a range of financial business process management solutions including making and collecting payments, sending and receiving invoices, and generating and storing business documents. This segment also provides a range of standard professional services and equipment and supplies that complement and enhance the Company's core software products. Revenue associated with this segment is typically recorded upon delivery or, if extended payment terms have been granted to the customer, as payments become contractually due. This segment incorporates the Company's check printing solutions in the UK, revenue for which is typically recorded on a per transaction basis or ratably over the expected life of the customer relationship, as well as certain solutions that are licensed on a subscription basis, revenue for which is typically recorded ratably over the contractual term.

Banking Solutions. The Banking Solutions segment provides solutions that are specifically designed for banking and financial institution customers. These solutions typically involve longer implementation periods and a significant level of professional resources. Due to the customized nature of these products, revenue is generally recognized over the period of project performance, on a percentage of completion basis.

Outsourced Solutions. The Outsourced Solutions segment provides customers with outsourced and hosted solution offerings that facilitate invoice receipt and presentment and spend management. The Company's Legal eXchange solution, which provides the opportunity to create more efficient processes for managing invoices generated by

outside law firms, while offering access to important legal spend factors such as budgeting, expense monitoring and outside counsel performance, is included within this segment. This segment also incorporates the Company's hosted and outsourced accounts payable automation solutions. Revenue within this segment is generally recognized on a subscription or transaction basis or proportionately over the estimated life of the customer relationship.

Each operating segment has separate sales forces and, periodically, a sales person in one operating segment will sell products and services that are typically sold within a different operating segment. In such cases, the transaction is generally recorded by the operating segment to which the sales person is assigned. Accordingly, segment results can include the results of transactions that have been allocated to a specific segment based on the contributing sales resources, rather than the nature of the product or service. Conversely, a transaction can be recorded by the operating segment primarily responsible for delivery to the customer, even if the sales person is assigned to a different operating segment.

The Company's chief operating decision maker assesses segment performance based on a variety of factors that can include segment revenue and a segment measure of profit or loss. Each segment's measure of profit or loss is on a pre-tax basis, and excludes stock compensation expense, acquisition-related expenses, amortization of intangible assets and charges related to acquired in-process research and development. There are no inter-segment sales; accordingly, the measure of segment revenue and profit or loss reflects only revenues from external customers. The costs of certain corporate level expenses, primarily general and administrative expenses, are allocated to the Company's operating segments at predetermined rates that approximate cost.

The Company does not track or assign its assets by operating segment.

The following represents a summary of the Company's reportable segments:

	Three Months Ended September 30, 2008		2007	
	As % of total (in thousands)		As % of total (in thousands)	
Revenues:				
Payments and Transactional Documents	\$ 23,376	65.8	\$ 20,147	64.3
Banking Solutions	5,673	16.0	5,626	17.9
Outsourced Solutions	6,457	18.2	5,589	17.8
Total revenues	\$ 35,506	100.0	\$ 31,362	100.0
Segment measure of profit (loss)				
Payments and Transactional Documents	\$ 2,669		\$ 3,925	
Banking Solutions	(981)		568	
Outsourced Solutions	786		(1,922)	
Total measure of segment profit	\$ 2,474		\$ 2,571	

A reconciliation of the measure of segment profit to GAAP operating income before the provision for income taxes is as follows:

	Three Months Ended September 30, 2008		2007	
	(in thousands)			
Segment measure of profit	\$ 2,474		\$ 2,571	
Less:				
Amortization of intangible assets	(4,436)		(2,647)	
Stock compensation expense	(2,210)		(1,927)	
Acquisition related expenses	(35)		----	
Add:				
Other income, net	148		897	
Loss before benefit for income taxes	\$ (4,059)		\$ (1,106)	

The following depreciation expense amounts are included in the segment measure of profit:

	Three Months Ended September 30, 2008		2007	
	(in thousands)			
Depreciation expense:				
Payments and Transactional Documents	\$ 455		\$ 366	
Banking Solutions	175		124	
Outsourced Solutions	396		326	

Total depreciation expense	\$	1,026	\$	816
----------------------------	----	-------	----	-----

9

Geographic Information

The Company has presented geographic information about its revenues, below. This presentation allocates revenue based on the point of sale, not the location of the customer. Accordingly, the Company derives revenues from geographic locations, based on the location of the customer, that would vary from the geographic areas listed here; particularly in respect of several financial institution customers located in Australia, for which the point of sale was the United States.

	Three Months Ended September 30, 2008 2007 (in thousands)	
Revenues from unaffiliated customers:		
United States	\$ 21,618	\$ 17,738
Europe	13,470	13,251
Australia	418	373
Total revenues from unaffiliated customers	\$ 35,506	\$ 31,362

Long-lived assets, which are based on geographical location, were as follows:

	September 30, June 30, 2008 (in thousands)	
Long-lived assets, net		
United States	\$ 10,427	\$ 9,194
Europe	3,136	3,706
Australia	117	175
Total long-lived assets, net	\$ 13,680	\$ 13,075

Note 7—Income Taxes

The Company recorded an income tax benefit of \$0.2 million and \$0.3 million for the three months ended September 30, 2008 and 2007, respectively. The net income tax benefit recorded for the quarter ended September 30, 2008 included approximately \$0.4 million of one-time, non-recurring tax benefits. These non-recurring benefits included \$0.2 million relating to a reduction in the Company's unrecognized tax benefits upon the expiration of certain statutes of limitations, \$0.1 million resulting from the enactment of legislation during the quarter that allowed the Company to claim a tax refund for a portion of its unused research and development credit carryforwards in the US and \$0.1 million relating to a change in the Company's German tax rate as a result of a restructuring of its German operations during the quarter. The Company's net tax benefit also reflected a benefit associated with the Company's UK and German operations. These tax benefits were partially offset by income tax expense associated with the Company's French and Australian operations, and income tax expense in the US. The income tax expense in the US is attributable to an increase in deferred tax liabilities associated with goodwill that is deductible for US tax purposes, but not amortized for financial reporting purposes. The US income tax expense also consisted of a small amount of state income tax expense which will be incurred irrespective of the Company's net operating loss carryforward. The income tax benefit as of September 30, 2007 consisted of a non-recurring tax benefit resulting from the enactment of legislation during the quarter that decreased the statutory tax rates in the UK and Germany, and a benefit associated with the Company's UK operations, which were partially offset by income tax expense associated with the Company's

Australian and German operations, and income tax expense in the US.

10

Note 8—Goodwill and Other Intangible Assets

The following tables set forth the information for intangible assets subject to amortization and for intangible assets not subject to amortization:

As of September 30, 2008			
	Gross Carrying Amount	Accumulated Amortization (in thousands)	Net Carrying Value
Amortized intangible assets:			
Core technology	\$ 28,996	\$ (22,634)	\$ 6,362
Customer related	51,512	(22,202)	29,310
Patent	953	(189)	764
Other intangible assets	1,046	(318)	728
Total	\$ 82,507	\$ (45,343)	\$ 37,164
Unamortized intangible assets:			
Goodwill			68,126
Total intangible assets, net			\$ 105,290

As of June 30, 2008			
	Gross Carrying Amount	Accumulated Amortization (in thousands)	Net Carrying Value
Amortized intangible assets:			
Customer related	\$ 54,081	\$ (20,402)	\$ 33,679
Core technology	30,408	(22,492)	7,916
Patent	953	(172)	781
Other intangible assets	1,051	(200)	851
Total	\$ 86,493	\$ (43,266)	\$ 43,227
Unamortized intangible assets:			
Goodwill			72,187
Total intangible assets			\$ 115,414

Estimated amortization expense for fiscal year 2009 and subsequent fiscal years is as follows:

	(in thousands)
2009	\$ 16,155
2010	12,042
2011	8,190
2012	3,207
2013	1,568
2014 and thereafter	438

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

This Quarterly Report on Form 10-Q contains forward-looking statements that involve risks and uncertainties. The statements contained in this report that are not purely historical are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Without limiting the foregoing, the words “may,” “will,” “should,” “could,” “expects,” “plans,” “intends,” “anticipates,” “believes,” “estimates,” “potential” and similar expressions are intended to identify forward-looking statements. All forward-looking statements included in this Quarterly Report on Form 10-Q are based on information available to us up to, and including, the date of this report, and we assume no obligation to update any such forward-looking statements. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including those set forth below under “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and “Item 1A. Risk Factors” and elsewhere in this Form 10-Q. You should carefully review those factors and also carefully review the risks outlined in other documents that we file from time to time with the Securities and Exchange Commission.

Overview

We provide electronic payment, invoice and document management solutions to corporations, financial institutions and banks around the world. Our solutions are used to streamline, automate and manage processes and transactions involving global payments, invoice receipt and approval, collections, cash management, risk mitigation, document management, reporting and document archive. We offer software designed to run on-site at the customer's location as well as hosted solutions. Historically, our software has been sold predominantly on a perpetual license basis. Today, however, certain of our newer offerings are being sold on a subscription and transaction basis.

Our corporate customers rely on our solutions to automate their payment and accounts payable processes and to streamline and manage the production and retention of electronic documents. We also provide Legal eXchange®, a Software as a Service (SaaS) offering that receives, manages and controls legal invoices and the related spend management for insurance companies and other large consumers of outside legal services. Our offerings also include software solutions that banks use to provide web-based payment and reporting capabilities to their corporate customers.

Our solutions complement and leverage our customers' existing information systems, accounting applications and banking relationships. As a result, our solutions can be deployed quickly and efficiently. To help our customers receive the maximum value from our products and meet their own particular needs, we also provide professional services for installation, training, consulting and product enhancement.

For the first quarter of fiscal year 2009, our revenue increased to \$35.5 million from \$31.4 million in the same quarter of last fiscal year. This revenue increase was primarily attributable to the revenue contribution from Optio Software, Inc., (Optio) which we acquired in April 2008, and increased revenues from our Legal eXchange product offering as a result of continued customer adoption of that product. These increases were offset in part by a decrease of \$0.9 million as a result of declining foreign exchange rates associated with the British Pound Sterling and the European Euro, which depreciated against the US dollar during the three months ended September 30, 2008.

We had a net loss of \$3.8 million in the three months ended September 30, 2008 compared to net loss of \$0.8 million in the three months ended September 30, 2007. The net loss in the quarter ended September 30, 2008 reflected \$6.6 million of expense associated with the amortization of intangible assets and stock compensation. The increase of \$1.8 million in intangible asset amortization during the first quarter of fiscal year 2009 as compared to first quarter of fiscal year 2008 reflects the expense impact of our acquisition of Optio in April 2008. Increases in our cost of revenue and operating expense categories during the first quarter of fiscal year 2009 as compared to the first quarter of fiscal year 2008 largely reflect our overall increased operating costs as a result of our Optio acquisition and our general business growth, offset in part by a decrease in foreign exchange rates of approximately \$0.8 million associated with the British Pound Sterling and European Euro.

In the first quarter of fiscal 2009, we derived approximately 47% of our revenue from customers located outside of North America, principally in the UK and Australia. We expect future revenue growth to be driven by increased purchases of our products by new and existing bank and financial institution customers in both North America and international markets, the continued market adoption of our Legal eXchange product in the US, increased sales of our payments and transactional documents products, and the contribution of revenue from our newer subscription and transaction based products. However, given the current economic climate, we anticipate that the British Pound Sterling and European Euro may continue to weaken against the US dollar. To the extent that this occurs, or to the extent that the already weakened European currencies do not return to pre-fiscal 2009 levels, we expect that the translation of our 2009 European revenues will continue to be negatively impacted as compared to the comparable periods of our prior fiscal year.

Critical Accounting Policies

We believe that several accounting policies are important to understanding our historical and future performance. We refer to these policies as “critical” because these specific areas generally require us to make judgments and estimates about matters that are uncertain at the time we make the estimate, and different estimates—which also would have been reasonable—could have been used, which would have resulted in different financial results.

The critical accounting policies we identified in our most recent Annual Report on Form 10-K for the fiscal year ended June 30, 2008 related to stock-based compensation, revenue recognition, goodwill and intangible assets and the valuation of acquired intangible assets and acquired deferred revenue. It is important that the discussion of our operating results that follows be read in conjunction with the critical accounting policies disclosed in our Annual Report on Form 10-K, as filed with the SEC on September 12, 2008. There have been no changes to our critical accounting policies during the three months ended September 30, 2008.

Recent Accounting Pronouncements

Determination of the Useful Life of Intangible Assets

In April 2008, the Financial Accounting Standards Board (FASB) issued FASB Staff Position (FSP) FAS 142-3, Determination of the Useful Life of Intangible Assets. FSP FAS 142-3 amends the factors that should be considered in developing renewal or extension assumptions used to determine the useful life of a recognized intangible asset under FASB Statement No. 142, Goodwill and Other Intangible Assets. FSP FAS 142-3 is effective for fiscal years beginning after December 15, 2008 (July 1, 2009 for us) and early adoption is prohibited. We are currently evaluating the impact of this pronouncement on our consolidated financial statements.

Business Combinations

In December 2007, the FASB issued Statement No. 141(R), "Business Combinations" (SFAS 141(R)) which will significantly change the accounting for and reporting of business combination transactions. The most significant changes in the accounting for business combinations under SFAS 141(R) include:

- Valuation of any acquirer shares issued as purchase consideration will be measured at fair value as of the acquisition date;
- Contingent purchase consideration, if any, will generally be measured and recorded at the acquisition date, at fair value, with any subsequent change in fair value reflected in earnings rather than through an adjustment to the purchase price allocation;
- Acquired in-process research and development costs, which have historically been expensed immediately upon acquisition, will now be capitalized at their acquisition date fair values, measured for impairment (without recurring amortization) over the remaining development period and, upon completion of a successful development project, amortized to expense over the asset's estimated useful life;
- Acquisition related costs will be expensed as incurred rather than capitalized as part of the purchase price allocation;
- Acquisition related restructuring cost accruals will be reflected within the acquisition accounting only if certain specific criteria are met as of the acquisition date. The prior accounting convention, which permitted an acquirer to record restructuring accruals within the purchase price allocation as long as certain, broad criteria had been met, generally around formulating, finalizing and communicating certain exit activities, will no longer be permitted.

SFAS 141(R) is effective for the first annual reporting period beginning on or after December 15, 2008 and earlier adoption is not permitted. Accordingly, we will adopt SFAS 141(R) on July 1, 2009. We expect that the adoption of this pronouncement will significantly affect how we account for business combination transactions consummated after the adoption date, in the areas noted above.

Accounting and Reporting of Noncontrolling Interests

In December 2007, the FASB issued SFAS No. 160, "Noncontrolling Interests in Consolidated Financial Statements, an Amendment of ARB No. 51" (SFAS 160). SFAS 160 clarifies the accounting for noncontrolling interests and establishes accounting and reporting standards for the noncontrolling interest in a subsidiary, including the requirement that the noncontrolling interest be classified as a component of equity. SFAS 160 is required to be adopted simultaneously with SFAS 141(R). We are not presently a party to any transaction in which we have a noncontrolling interest and, accordingly, do not currently believe that this pronouncement will have a significant impact on our financial condition, results of operations or cash flows.

Fair Value Option for Financial Assets and Financial Liabilities

In February 2007, the FASB issued Statement No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities, including an amendment of FASB Statement No. 115" (SFAS 159). The statement permits all entities to choose, at specified election dates, to measure eligible items at fair value. Additionally, the statement requires that entities report unrealized gains and losses on items for which the fair value option has been elected in earnings. The statement also establishes additional presentation and disclosure requirements. SFAS 159 is effective for fiscal years beginning after November 15, 2007, with early adoption permitted, provided that the entity also adopts Statement 157. SFAS 159 became effective for us on July 1, 2008; however, as we did not elect to measure any items at fair value, its adoption did not have an impact on our consolidated financial statements.

Fair Value Measurements

In September 2006, the FASB issued Statement No. 157, "Fair Value Measurements" (SFAS 157). The statement defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. In February 2008, the FASB issued FASB Staff Position No. FAS 157-2, "Effective Date of FASB Statement No. 157" (FSP 157-2). FSP 157-2 delayed the effective date of SFAS 157 to fiscal years beginning after November 15, 2008 for nonfinancial assets and nonfinancial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). SFAS 157 became effective for us on July 1, 2008, excluding the items deferred by FSP 157-2 which will become effective for us on July 1, 2009. SFAS 157 has resulted in additional disclosures within our consolidated financial statements, as further described in Note 2 to our financial statements.

Three Months Ended September 30, 2008 Compared to the Three Months Ended September 30, 2007

Revenues by segment

We have aggregated similar operating segments into three reportable segments: Payments and Transactional Documents, Banking Solutions and Outsourced Solutions. The following table represents our revenues by segment:

	Three Months Ended September 30,				Increase (Decrease) Between Periods	
	2008		2007		2008 Compared to 2007	
	(in thousands)	As % of total Revenues	(in thousands)	As % of total Revenues	(in thousands)	%
Payments and Transactional Documents	\$ 23,376	65.8	\$ 20,147	64.3	\$ 3,229	16.0
Banking Solutions	5,673	16.0	5,626	17.9	47	0.8
Outsourced Solutions	6,457	18.2	5,589	17.8	868	15.5
	\$ 35,506	100.0	\$ 31,362	100.0	\$ 4,144	13.2

Payments and Transactional Documents. The revenue increase for the three months ended September 30, 2008 was primarily attributable to the revenue contribution from Optio, which we acquired in April 2008. This increase was offset in part by a decrease of \$0.7 million as a result of declining foreign exchange rates associated with the British Pound Sterling and European Euro. We expect revenue for the Payments and Transactional Documents segment to increase during the remainder of fiscal 2009 as a result of the continued revenue contribution from Optio and from increased sales of our payment and document management solutions. However, given current economic conditions, we currently expect that the translation of our European based revenues to US dollars will continue to be negatively impacted as compared to the same periods in fiscal year 2008, due to declining European foreign exchange rates.

Banking Solutions. Revenues from our Banking Solutions segment remained consistent with the comparable prior quarter, as we continued to generate revenue from several large ongoing banking projects. We expect revenues for the Banking Solutions segment to increase during the remainder of the fiscal year as a result of the contribution of revenue from ongoing projects and from additional purchases by new and existing bank and financial institution customers in both North America and international markets.

Outsourced Solutions. The revenue increase for the three months ended September 30, 2008 was due to an increase in revenue from our Legal eXchange offering as a result of new customers, offset in part by a decrease in revenues from certain of our legacy outsourced accounts payable automation products in Europe and by a decrease in European

foreign currency exchange rates. We expect revenue for the Outsourced Solutions segment to increase during the remainder of the fiscal year as current customers of Legal eXchange move from the implementation phase (during which no revenue is recorded) into live production and as new customers purchase this solution.

Revenues by category

	Three Months Ended September 30,				Increase (Decrease)	
	2008		2007		Between Periods	
	(in thousands)	As % of total Revenues	(in thousands)	As % of total Revenues	(in thousands)	%
Revenues:						
Software licenses	\$ 3,606	10.1	\$ 3,365	10.7	\$ 241	7.2
Subscriptions and transactions	8,229	23.2	6,842	21.8	1,387	20.3
Service and maintenance	21,149	59.6	17,685	56.4	3,464	19.6
Equipment and supplies	2,522	7.1	3,470	11.1	(948)	(27.3)
Total revenues	\$ 35,506	100.0	\$ 31,362	100.0	\$ 4,144	13.2

Software Licenses. The increase in software license revenues was due principally to the revenue contribution from Optio, which we acquired in April 2008, and an increase in revenue due to an increase in demand for certain of our domestic payment products, offset in part by a decrease in software license revenue from our Banking Solutions segment due to the timing of project completion for a large banking project and a decrease of approximately \$0.1 million as a result of declining foreign exchange rates associated with the British Pound Sterling and the European Euro. We expect software license revenues to increase during the remainder of fiscal year 2009, principally as a result of the continued revenue contribution from Optio and as a result of increased software license revenue from our European operations and our Banking Solutions segment.

Subscriptions and Transactions. The increase in subscription and transaction revenues was due principally to the revenue contribution from new Legal eXchange customers and the revenue contribution from certain Optio products that are sold on a subscription basis. These increases were offset in part by a decrease of \$0.2 million as a result of declining foreign exchange rates associated with the British Pound Sterling and the European Euro. We expect subscription and transaction revenues to increase during the remainder of the fiscal year as a result of orders for our newer subscription and transaction based product offerings, the revenue contribution from new Legal eXchange customers and the continued revenue contribution from Optio.

Service and Maintenance. The increase in service and maintenance revenues was primarily the result of the revenue contribution from Optio and an increase in professional services revenues associated with several large banking projects. These increases were offset by a decrease of \$0.4 million as a result of declining foreign exchange rates associated with the British Pound Sterling and European Euro. We expect that service and maintenance revenues will increase during the remainder of the fiscal year as a result of the increased revenue contribution from Optio and from new and existing projects within our Banking Solutions segment.

Equipment and Supplies. The decrease in equipment and supplies revenues was principally due to a decrease in demand for certain of our paper based products, a decrease of approximately \$0.2 million as a result of declining foreign exchange rates associated with the British Pound Sterling, and our continued de-emphasis of lower margin transactions within this aspect of our business. We expect that equipment and supplies revenues will remain relatively consistent during the remainder of 2009.

Cost of revenues by category

Three Months Ended September 30,		Increase (Decrease)
2008	2007	
		Between Periods

		2008 Compared to 2007	
	As % of total	As % of total	
	(in thousands) Revenues	(in thousands) Revenues	(in thousands) %
Cost of revenues:			
Software licenses	\$ 200 0.6	\$ 188 0.6	\$ 12 6.4
Subscriptions and transactions	4,117 11.6	3,971 12.7	146 3.7
Service and maintenance	9,613 27.1	7,599 24.2	2,014 26.5
Stock compensation expense	260 0.7	232 0.8	28 12.1
Equipment and supplies	1,854 5.2	2,524 8.0	(670) (26.5)
Total cost of revenues	\$ 16,044 45.2	\$ 14,514 46.3	\$ 1,530 10.5
Gross profit	\$ 19,462 54.8	\$ 16,848 53.7	\$ 2,614 15.5

Software Licenses. Software license costs consist of expenses incurred by us to manufacture, package and distribute our software products and related documentation and costs of licensing third party software that is incorporated into or sold with certain of our products. Software license costs remained consistent at 6% of software license revenues in the three months ended September 30, 2008 as compared to the three months ended September 30, 2007. We expect that software license costs will remain relatively consistent, as a percentage of software license revenues, during the remainder of the fiscal year.

Subscriptions and Transactions. Subscriptions and transaction costs include salaries and other related costs for our professional services teams as well as costs related to our hosting infrastructure such as depreciation and facilities related expenses. Subscriptions and transactions costs decreased to 50% of subscription and transaction revenues in the three months ended September 30, 2008 from 58% in the three months ended September 30, 2007. The decrease in subscription and transaction costs as a percentage of revenue was due principally to the overall increase in our subscription and transaction revenue streams, improved margins for our transactional revenue streams in Europe, improved Legal eXchange margins in the US and the shift of certain expenses from the subscriptions and transactions cost of sales category to the service and maintenance costs of sales category based on changes in where internal resources were deployed. We expect that subscription and transaction costs will decrease slightly as a percentage of subscription and transaction revenue during the remainder of the fiscal year.

Service and Maintenance. Service and maintenance costs include salaries and other related costs for our customer service, maintenance and help desk support staffs, as well as third party contractor expenses used to complement our professional services team. Service and maintenance costs increased slightly as a percentage of service and maintenance revenues to 45% in the three months ended September 30, 2008 as compared to 43% in the three months ended September 30, 2007. The increase in service and maintenance costs as a percentage of service and maintenance revenues was due to lower margins in our Banking Solutions segment, as we continued to expand our professional service and support teams for new customers, and the shift of certain expenses from the subscriptions and transactions cost of sales category to the service and maintenance costs of sales category based on changes in where internal resources were deployed. We expect that service and maintenance costs will remain relatively consistent, as a percentage of service and maintenance revenues, during the remainder of the fiscal year.

Equipment and Supplies. Equipment and supplies costs include the costs associated with equipment and supplies that we resell, as well as freight, shipping and postage costs associated with the delivery of our products. Equipment and supplies costs increased slightly to 74% of equipment and supplies revenues in the three months ended September 30, 2008 compared to 73% of equipment and supplies revenues in the three months ended September 30, 2007. The increase in equipment and supplies costs as a percentage of equipment and supplies revenues was due to a higher mix of supplies revenue as compared to equipment revenue in the three months ended September 30, 2008, which resulted in a slightly lower overall gross margin. We expect that equipment and supplies costs will remain relatively consistent as a percentage of equipment and supplies revenues for the remainder of the fiscal year.

Operating Expenses

	Three Months Ended September 30,				Increase (Decrease)	
	2008		2007		Between Periods 2008	
	As % of total		As % of total		Compared to 2007	
	(in thousands)	revenues	(in thousands)	revenues	(in thousands)	%
Operating expenses:						
Sales and marketing	\$ 7,942	22.4	\$ 6,907	22.0	\$ 1,035	15.0
Stock compensation expense	696	2.0	612	2.0	84	13.7
Product development and engineering	5,221	14.7	4,043	12.9	1,178	29.1

Stock compensation expense	202	0.6	183	0.6	19	10.4
General and administrative	4,120	11.6	3,559	11.3	561	15.8
Stock compensation expense	1,052	3.0	900	2.9	152	16.9
Amortization of intangible assets	4,436	12.4	2,647	8.4	1,789	67.6
Total operating expenses	\$ 23,669	66.7	\$ 18,851	60.1	\$ 4,818	25.6

Sales and Marketing. Sales and marketing expenses consist primarily of salaries and other related costs for sales and marketing personnel, sales commissions, travel, public relations and marketing materials and trade show participation. Sales and marketing expenses increased in the three months ended September 30, 2008 as compared to the three months ended September 30, 2007 due to higher operating costs, largely as a result of headcount related cost increases from our Optio acquisition and higher trade show costs. These increases were offset by a decrease of \$0.2 million as a result of declining foreign exchange rates associated with the British Pound Sterling and the European Euro. We expect that sales and marketing expenses will increase slightly over the remainder of the fiscal year as we continue to focus on our marketing initiatives to support our new products.

Product Development and Engineering. Product development and engineering expenses consist primarily of personnel costs to support product development, which consists of enhancements and revisions to our products based on customer feedback and general marketplace demands, as well as development of our newer accounts payable automation products. The increase in product development and engineering expenses was primarily attributable to expenses associated with the activities of Optio, which we acquired in April 2008, and by a decrease in the use of development resources in revenue generating roles during the period, the cost of which, to the extent occurring, is recorded as a cost of revenue. We expect that product development and engineering expenses will remain relatively consistent during the remainder of the fiscal year.

General and Administrative. General and administrative expenses consist primarily of salaries and other related costs for operations and finance employees and legal and accounting services. The increase in general and administrative expenses was principally attributable to expenses associated with the activities of Optio offset in part by a decrease in European foreign currency exchange rates. We expect that general and administrative expenses will decrease slightly during the remainder of the fiscal year.

Stock Compensation Expense. During the three months ended September 30, 2008, stock compensation expense increased slightly to \$2.2 million as compared to \$1.9 million for the three months ended September 30, 2007. The expense associated with share based payments is recorded as expense within the same functional expense category in which cash compensation for the applicable employee is recorded. For the three months ended September 30, 2008 and 2007, stock compensation expense was allocated as follows:

	Three Months Ended September 30, 2008 2007 (in thousands)	
Cost of revenues, service and maintenance	\$ 260	\$ 232
Sales and marketing	696	612
Product development and engineering	202	183
General and administrative	1,052	900
	\$ 2,210	\$ 1,927

For the remainder of fiscal 2009, we expect stock compensation costs to increase slightly compared to the level of expense recorded in our first quarter.

Amortization of Intangible Assets. Amortization expense increased as a result of the amortization of intangible assets arising from our acquisition of Optio. We expect that total amortization expense for fiscal 2009 will approximate \$16.2 million.

Other Income, Net

	Three Months Ended September 30, 2008 2007 (in thousands)		Increase (Decrease) Between Periods 2008 Compared to 2007 %	
Interest income	\$ 265	\$ 830	\$ (565)	(68.1)
Interest expense	(24)	(9)	(15)	166.7
Other income (expense), net	(93)	76	(169)	(222.4)

Other income, net	\$	148	\$	897	\$	(749)	(83.5)
-------------------	----	-----	----	-----	----	-------	--------

Other Income, Net. In the three months ended September 30, 2008 as compared to the three months ended September 30, 2007, interest income decreased as a result of the overall decrease in our cash and investments balances, which occurred principally to our use of cash to acquire Optio in April 2008. We expect interest income to remain below fiscal 2008 levels during the remainder of fiscal 2009, reflecting the impact of lower cash and investment balances as well as lower marketplace interest yields. Other income (expense), net decreased as a result of foreign exchange losses. Excluding the anticipated decline in interest income, we expect that the individual components of other income and expense will continue to represent insignificant components of our overall operations during the remainder of 2009.

Provision for Income Taxes. We recorded an income tax benefit of \$0.2 million and \$0.3 million for the three months ended September 30, 2008 and 2007, respectively. The net income tax benefit recorded for the quarter ended September 30, 2008 included approximately \$0.4 million of one-time, non-recurring tax benefits. These non-recurring benefits included \$0.2 million relating to a reduction in our unrecognized tax benefits upon the expiration of certain statutes of limitations, \$0.1 million resulting from the enactment of legislation during the quarter that allowed us to claim a tax refund for a portion of our unused research and development credit carryforwards in the US and \$0.1 million relating to a change in our German tax rate as a result of a restructuring of our German operations during the quarter. Our net tax benefit also reflected a benefit associated with our UK and German operations. These tax benefits were partially offset by income tax expense associated with our French and Australian operations, and income tax expense in the US. The income tax expense in the US is attributable to an increase in deferred tax liabilities associated with goodwill that is deductible for US tax purposes, but not amortized for financial reporting purposes. The US income tax expense also consisted of a small amount of state income tax expense which will be incurred irrespective of our net operating loss carryforward. The income tax benefit as of September 30, 2007 consisted of a non-recurring tax benefit resulting from the enactment of legislation during the quarter that decreased the statutory tax rates in the UK and Germany, and a benefit associated with the our UK operations, which were partially offset by income tax expense associated with the our Australian and German operations, and income tax expense in the US.

Liquidity and Capital Resources

One of our goals is to maintain and improve our capital structure. The key metrics we focus on in assessing the strength of our liquidity are summarized in the table below:

	Three Months Ended September 30, 2008 2007 (in thousands)	
Cash (used in) provided by operating activities	\$ (275)	\$ 1,002

	September 30, 2008 June 30, 2008 (in thousands)	
Cash, cash equivalents and marketable securities	\$ 30,375	\$ 35,373
Working capital	19,827	19,803

We have financed our operations primarily from cash provided by operating activities and the sale of our common stock. We have generated positive operating cash flows in each of our last seven completed fiscal years. We believe that cash generated from our operations and the cash, cash equivalents and marketable securities on hand will be sufficient to meet our working capital and capital expenditure requirements for the foreseeable future. We also may receive additional investments from, and make investments in, customers or other companies. However, any such transactions would require the approval of our board of directors, and in some cases, stockholders and potentially bank or regulatory approval. We also may undertake additional business or asset acquisitions or divestitures.

During the quarter ended September 30, 2008, our cash balances decreased by approximately \$3.1 million as a result of a decline in the foreign currency exchange rates of the British Pound, European Euro, and Australian Dollar to the US Dollar. To the extent that exchange rates associated with these foreign currencies decline further, we could be subject to further decreases in our cash balances upon translation to US dollars. However, we continue to believe that

our existing cash balances, even in light of the foreign currency volatility we are experiencing, are adequate to meet our liquidity and working capital requirements for the foreseeable future.

Operating Activities

	Three Months Ended September 30, 2008 2007 (in thousands)	
Net loss	\$ (3,849)	\$ (801)
Non-cash adjustments	7,545	4,904
Changes in working capital	(3,971)	(3,101)
Net cash (used in) provided by operating activities	\$ (275)	\$ 1,002

Net cash used in operating activities for the three months ended September 30, 2008 was due to our net loss, affected by favorable non-cash adjustments, offset by decreases in accounts payable, accrued expenses, deferred revenue and an increase in accounts receivable. Net cash provided by operating activities for the three months ended September 30, 2007 was due to our net loss, affected by favorable non-cash adjustments, offset in part by decreases in accrued expenses, deferred revenue and an increase in accounts receivable. Non-cash adjustments are transactions that result in the recognition of financial statement expense but not a corresponding cash receipt or disbursement, such as stock compensation expense, amortization of intangible assets, depreciation and amortization of property and equipment and provision for allowances of accounts receivable.

Investing Activities

	Three Months Ended September 30, 2008 2007 (in thousands)	
Purchases of available-for-sale securities	\$ ---	\$ (225)
Proceeds from sale of available-for-sale securities	---	7,400
Purchases of held-to-maturity securities	(53)	(51)
Proceeds from sales of held-to-maturity securities	53	51
Purchases of property and equipment	(987)	(636)
Net cash (used in) provided by investing activities	\$ (987)	\$ 6,539

In the three months ended September 30, 2008, cash was used to acquire property and equipment. For the three months ended September 30, 2007, cash was primarily provided through the sale of marketable securities and, to a lesser extent, was used to acquire property and equipment. We expect to incur quarterly capital expenditures that, on average during the remainder of fiscal 2009, will be higher than the level of capital expenditures incurred in our first fiscal quarter, as we continue to enhance our IT and hosted infrastructure.

Financing Activities

	Three Months Ended September 30, 2008 2007 (in thousands)	
Repurchase of common stock	\$ (1,548)	\$ (3,690)

Proceeds from employee stock purchase plan and exercise of stock options	961	1,970
Excess tax benefits associated with stock compensation	8	59
Capital lease payments	(33)	(8)
Net cash used in financing activities	\$ (612)	\$ (1,669)

Net cash used in financing activities for the three months ended September 30, 2008 and September 30, 2007 was primarily the result of the repurchase of our common stock, offset in part by proceeds received from the exercise of stock options and contributions to our employee stock purchase plan.

Off-Balance Sheet Arrangements

During the three months ended September 30, 2008, we did not engage in material off-balance sheet activities, including the use of structured finance, special purpose or variable interest entities, material trading activities in non-exchange traded commodity contracts or transactions with persons or entities that benefit from their non-independent relationship with us.

Contractual Obligations

Following is a summary of future payments that we are required to make under existing contractual obligations as of September 30, 2008:

	Total	Payments Due by Period *				More Than 5 Years
		Less Than 1 Year	1-3 Years (in thousands)	4-5 Years		
Operating lease obligations	\$ 15,661	\$ 2,867	\$ 9,500	\$ 2,973	\$	321
Capital lease obligations	368	113	252	3		----
Total	\$ 16,029	\$ 2,980	\$ 9,752	\$ 2,976	\$	321

*Payment due dates are calculated from our most recent fiscal year end of June 30, 2008

Purchase orders are not included in the table above. Our purchase orders represent authorizations to purchase rather than binding agreements. The contractual obligation amounts in the table above are associated with agreements that are enforceable and legally binding and that specify all significant terms, including: fixed or minimum services to be used; fixed, minimum or variable price provisions; and the approximate timing of the transaction. Obligations under contract that we can cancel without a significant penalty are not included in the table above. Also excluded from the table is our estimate of unrecognized tax benefits as of September 30, 2008 in the amount of \$0.4 million. These amounts have been excluded because as of September 30, 2008 we are unable to estimate the timing of future cash outflows, if any, associated with these liabilities as we do not currently anticipate settling any of these tax positions with cash payment in the foreseeable future.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

We are exposed to a variety of risks, including foreign currency exchange rate fluctuations and changes in the market value of our investments in marketable securities primarily due to changes in interest rates. We have not entered into any foreign currency hedging transactions or other instruments to minimize our exposure to foreign currency exchange rate fluctuations nor do we presently plan to in the future. Also, we have not entered into any interest rate swap agreements, or other instruments to minimize our exposure to interest rate fluctuations. There has been no material change to our exposure to market risk from that which was disclosed in our Annual Report on Form 10-K as filed with the SEC on September 12, 2008, however given the recent volatility in foreign currency exchange rates, particularly the British Pound Sterling, we have provided a sensitivity analysis below that illustrates the potential impact to our cash and cash equivalents balances of on-going exchange rate fluctuations.

Foreign currency translation risk

Based on our cash and cash equivalents balances denominated in non-US currencies as of September 30, 2008, a 10% increase or decrease in the exchange rate between the British Pound Sterling and the US dollar would result in an increase or decrease to our cash and cash equivalents of approximately \$2.1 million. A 10% increase or decrease in the exchange rate between the European Euro and the US dollar would result in an increase or decrease to our cash and cash equivalents of approximately \$0.2 million. A 10% increase or decrease in the exchange rate between the

Australian Dollar and the US dollar would result in an increase or decrease to our cash and cash equivalents of approximately \$0.2 million

Item 4. Controls and Procedures

Our management, with the participation of our chief executive officer and chief financial officer, evaluated the effectiveness of our disclosure controls and procedures as of September 30, 2008. The term “disclosure controls and procedures,” as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act, means controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC’s rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company’s management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based on the evaluation of our disclosure controls and procedures as of September 30, 2008, our chief executive officer and chief financial officer concluded that, as of such date, our disclosure controls and procedures were effective at the reasonable assurance level.

No change in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) occurred during the fiscal quarter ended September 30, 2008 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

On October 10, 2008, the plaintiffs in the initial public offering securities class action litigation against Bottomline and Optio, which is described in our Annual Report on Form 10-K for the fiscal year ended June 30, 2008, or our Annual Report, withdrew a motion for class certification in certain designated “focus cases” in the United States District Court for the Southern District of New York. Neither Bottomline nor Optio’s cases are part of the designated focus case group. For additional information regarding this litigation, please refer to our Annual Report.

Item 1A. Risk Factors

Investing in our common stock involves a high degree of risk. You should carefully consider the risks and uncertainties described below before making an investment decision involving our common stock. The risks and uncertainties described below are not the only ones facing our company. Additional risks and uncertainties may also impair our business operations.

If any of the following risks actually occur, our business, financial condition or results of operations would likely suffer. In that case, the trading price of our common stock could fall, and you may lose all or part of the money you paid to buy our common stock.

The following risk factor related to the overall economic environment represents a material addition to our risk factors, and should be considered in addition to the other risk factors that follow, which were initially disclosed in Part I, Item 1A. “Risk Factors” in our Annual Report on Form 10-K for the year ended June 30, 2008.

Ongoing financial market volatility and adverse changes in the domestic and global economic environment could have a significant adverse impact on our business, financial condition and operating results

Our business and operating results could be significantly impacted by general economic conditions. In recent months, the US and global economy has experienced a significant downturn due to the effects of the credit market crisis, slower economic activity and a generally negative economic outlook, a decrease in consumer and business confidence and liquidity concerns. A severe or prolonged economic downturn could result in a variety of risks to our business, including:

- increased volatility in our stock price;
- increased volatility in foreign currency exchange rates;
- delays in, or curtailment of, purchasing decisions by our customers or potential customers either as a result of overall economic uncertainty or as a result of their inability to access the liquidity necessary to engage in purchasing initiatives;
- increased credit risk associated with our customers or potential customers, particularly those that may operate in industries most affected by the economic downturn, such as financial services; and
- impairment of our goodwill or other assets.

Over the last several months, we experienced a decline in the foreign currency exchange rates associated with the British Pound Sterling and European Euro, which negatively impacted our overall revenue growth for the three months ended September 30, 2008. Additionally, we have recently experienced a higher than anticipated level of

volatility in our common stock price, which we believe has been a result of the general financial market turmoil rather than the result of anything specific to our business. To date, we have not experienced delays in customer purchasing decisions or disruptions to what we would consider a normal volume of customer orders. However, to the extent that the current economic downturn worsens or persists, or any of the above risks occur, our business and operating results could be significantly and adversely affected.

Our common stock has experienced and may continue to undergo extreme market price and volume fluctuations

Stock markets in general, and The NASDAQ Global Market in particular, have experienced extreme price and volume fluctuations, particularly recently. Broad market fluctuations of this type may adversely affect the market price of our common stock. The stock prices for many companies in the technology sector have experienced wide fluctuations that often have been unrelated to their operating performance. The market price of our common stock has experienced and may continue to undergo extreme fluctuations due to a variety of factors, including:

- general and industry-specific business, economic and market conditions;
- changes in or our failure to meet analysts' or investors' estimates or expectations;

• actual or anticipated fluctuations in operating results, including those arising as a result of any impairment of goodwill or other intangible assets related to past or future acquisitions;

- public announcements concerning us, including announcements of litigation, our competitors or our industry;
- introductions of new products or services or announcements of significant contracts by us or our competitors;
- acquisitions, divestitures, strategic partnerships, joint ventures, or capital commitments by us or our competitors;
- adverse developments in patent or other proprietary rights; and
- announcements of technological innovations by our competitors.

Our future financial results will be impacted by our success in selling new products in a subscription and transaction based revenue model

A substantial portion of our revenues and profitability were historically generated from software license revenues. We are currently offering certain of our newer product sets under a subscription and transaction based revenue model, which we believe has certain advantages over a perpetual license model, including better predictability of revenue.

A subscription and transaction based revenue model typically results in no up-front revenue. Additionally, there can be no assurance that our customers, or the markets in which we compete, will respond favorably to the approach we have taken with our newer offerings. To the extent that our new subscription and transaction based offerings do not receive general marketplace acceptance, our financial results could be materially and adversely affected.

An increasing number of large and more complex customer contracts, or contracts that involve the delivery of services over contractually committed periods, generally delay the timing of our revenue recognition and in the short-term may adversely affect our operating results, financial condition and the market price of our stock

Due to an increasing number of large and more complex customer contracts, particularly in our Banking Solutions segment, we have experienced, and will likely continue to experience, delays in the timing of our revenue recognition. These large and complex customer contracts generally require significant implementation work, product customization and modification and user acceptance and systems integration testing, resulting in the recognition of revenue over the period of project completion, which normally spans several quarters. Delays in revenue recognition on these contracts, including delays that result from customer decisions to halt or otherwise slow down a long-term project due to their own staffing or other challenges, could affect our operating results, financial condition and the market price of our common stock. Similarly, if we are unable to continue to generate new large orders on a regular basis, our business operating results and financial condition could be adversely affected.

We make significant investments in existing products and new product offerings that can adversely affect our operating results and may not be successful

We operate in a highly competitive and rapidly evolving technology environment and believe that it is important to enhance existing product offerings and develop new product offerings to meet strategic opportunities as they evolve. Investments in existing products and new product offerings can have a negative impact on our operating results, and any existing product enhancements or new product offerings may not be accepted in the marketplace or generate material revenues. For example, our operating results have recently been affected by increases in product development expenses as we continued to make investments in our hosted, banking and accounts payable automation products.

Integration of acquisitions could interrupt our business and our financial condition could be harmed

Part of our operating strategy is to identify and pursue strategic acquisitions that can expand our geographical footprint or complement our existing product functionality. We acquired Optio Software in April 2008 and may in the future continue to acquire, or make investments in, other businesses, products or technologies. Any acquisition or strategic investment we have made in the past or may make in the future may entail numerous risks, including the following:

- difficulties integrating acquired operations, personnel, technologies or products;
- inadequacy of existing operating, financial and management information systems to support the combined organization or new operations;
- write-offs related to impairment of goodwill and other intangible assets;
- entrance into markets in which we have no or limited prior experience or knowledge;
- diversion of management's focus from our core business concerns;
- dilution to existing stockholders and earnings per share;
- incurrence of substantial debt; and
- exposure to litigation from third parties, including claims related to intellectual property or other assets acquired or liabilities assumed.

Any such difficulties encountered as a result of any merger, acquisition or strategic investment could have a material adverse effect on our business, operating results and financial condition.

As a result of our acquisitions, we could be subject to significant future write-offs with respect to intangible assets, or expenses related to acquired in-process research and development costs, which may adversely affect our future operating results

We review our intangible assets, including goodwill, periodically for impairment. At September 30, 2008, the carrying value of our goodwill and our other intangible assets was approximately \$68 million and \$37 million, respectively. While we reviewed our goodwill and intangible assets during the fourth quarter of fiscal year 2008 and concluded that there was no impairment, we could be subject to future impairment charges with respect to these intangible assets, or intangible assets arising as a result of acquisitions in future periods. Further, to the extent we acquire projects related to in-process research and development activities, such amounts require immediate, rather than ratable, expense recognition. Any such charges, to the extent occurring, would likely have a material adverse effect on our operating results.

Our fixed costs may lead to operating results below analyst or investor expectations if our revenues are below anticipated levels, which could adversely affect the market price of our common stock

A significant percentage of our expenses, particularly personnel and facilities costs, are relatively fixed and based in part on anticipated revenue levels. In recent years, we experienced slowing growth rates with certain of our licensed software products. In the three months ended September 30, 2008 we experienced a decline in the foreign currency exchange rates of our European based revenues, which negatively impacted our revenue growth. A decline in revenues without a corresponding and timely slowdown in expense growth could negatively affect our business. Significant revenue shortfalls in any quarter may cause significant declines in operating results since we may be

unable to reduce spending in a timely manner.

Quarterly or annual operating results that are below the expectations of public market analysts could adversely affect the market price of our common stock. Factors that could cause fluctuations in our operating results include the following:

• economic conditions, which may affect our customers' and potential customers' budgets for information technology expenditures;

• the timing of orders and longer sales cycles;

• the timing of product implementations, which are highly dependent on customers' resources and discretion;

• the incurrence of costs relating to the integration of software products and operations in connection with acquisitions of technologies or businesses; and

• the timing and market acceptance of new products or product enhancements by either us or our competitors.

Because of these factors, we believe that period-to-period comparisons of our results of operations are not necessarily meaningful.

Our mix of products and services could have a significant effect on our financial condition, results of operations and the market price of our common stock

The gross margins for our products and services vary considerably. Our software revenues generally yield significantly higher gross margins than do our subscription and transaction, service and maintenance and equipment and supplies revenue streams. In fiscal 2008, we experienced a slight decrease in our software license fees. If software license fees were to significantly decline in any future period, or if the mix of our products and services in any given period did not match our expectations, our results of operations and the market price of our common stock could be significantly adversely affected.

We face risks associated with our international operations that could harm our financial condition and results of operations

A significant percentage of our revenues have been generated by our international operations, and our future growth rates and success are in part dependent on our continued growth and success in international markets. We have operations in the US, UK, Australia, France and Germany. As is the case with most international operations, the success and profitability of these operations are subject to numerous risks and uncertainties that include, in addition to the risks our business as a whole faces, the following:

- currency exchange rate fluctuations;
- difficulties and costs of staffing and managing foreign operations;
- differing regulatory and industry standards and certification requirements;
- the complexities of foreign tax jurisdictions;
- reduced protection for intellectual property rights in some countries; and
- import or export licensing requirements.

A significant percentage of our revenues to date have come from our payment and document management offerings and our future performance will depend on continued market acceptance of these solutions

A significant percentage of our revenues to date have come from the license and maintenance of our payment and document management offerings and sales of associated products and services. Any significant reduction in demand for our payment and document management offerings could have a material adverse effect on our business, operating results and financial condition. Our future performance could depend on the following factors:

- continued market acceptance of our payment and document management offerings;
- our ability to introduce enhancements to meet the market's evolving needs for secure payments and cash management solutions; and
- acceptance of software solutions offered on a hosted basis.

A growing number of our customer arrangements involve selling our products and services on a hosted basis, which may have the effect of delaying revenue recognition and increasing development or start-up expenses

An increasing number of our customer arrangements involve offering certain of our products and services on a hosted basis. These arrangements typically include a contractually defined service period as well as performance criteria that

our products or services are required to meet over the duration of the service period. Arrangements entered into on a hosted basis generally delay the timing of revenue recognition and often require the incurrence of up-front costs, which can be significant. We are continuing to make investments in certain of our hosted offerings, such as our accounts payable automation products, and there can be no assurance that these products will ultimately gain broad market acceptance. Additionally, there is a risk that we might be unable to consistently maintain the performance requirements, or service levels, called for under any such hosted arrangements. Such events, to the extent occurring, could have a material and adverse effect on our operating results.

Our future financial results will depend on our ability to manage growth effectively

Our ability to manage growth effectively will depend in part on our ability to continue to enhance our operating, financial and management information systems. If we are unable to manage growth effectively, the quality of our services, our ability to retain key personnel and our business, operating results and financial condition could be materially adversely affected.

We face significant competition in our targeted markets, including competition from companies with significantly greater resources

In recent years, we have encountered increasing competition in our targeted markets. We compete with a wide range of companies, ranging from small start-up enterprises with limited resources, which compete principally on the basis of technology features or specific customer relationships, to large companies, which can leverage significant customer bases and financial resources. Given the size and nature of the markets we target, the implementation of our growth strategy and our success in competing for market share is dependent on our ability to grow our sales and marketing capabilities and maintain an appropriate level of financial resources.

We depend on key employees who are skilled in e-commerce, payment, cash and document management and invoice presentment methodology and Internet and other technologies

Our success depends upon the efforts and abilities of our executive officers and key technical employees who are skilled in e-commerce, payment methodology and regulation, and Internet, database and network technologies. Our key employees are in high demand within the marketplace and many competitors, customers and industry organizations are able to offer considerably higher compensation packages than we currently provide. The loss of one or more of these individuals could have a material adverse effect on our business. In addition, we currently do not maintain "key man" life insurance policies on any of our employees. While some of our executive officers have employment or retention agreements with us, the loss of the services of any of our executive officers or other key employees could have a material adverse effect on our business, operating results and financial condition.

We must attract and retain highly skilled personnel with knowledge in e-commerce, payment, cash and document management and invoice presentment methodology and Internet and other technologies

We believe that our success is in part dependent upon our ability to attract, hire, train and retain highly skilled technical, sales and marketing, and support personnel, particularly with expertise in e-commerce, payment, cash management and invoice methodology and Internet and other technologies. Competition for qualified personnel is intense. As a result, we may experience increased compensation costs that may not be offset through either improved productivity or higher sales prices. There can be no assurance that we will be successful in attracting, recruiting or retaining existing personnel. Based on our experience, it takes an average of nine months for a new salesperson to become fully productive. We cannot assure you that we will be successful in increasing the productivity of our sales personnel, and the failure to do so could have a material adverse effect on our business, operating results and financial condition.

Increased competition may result in price reductions and decreased demand for our product solutions

The markets in which we compete are intensely competitive and characterized by rapid technological change. Some competitors in our targeted markets have longer operating histories, significantly greater financial, technical, and marketing resources, greater brand recognition and a larger installed customer base than we do. We expect to face additional competition as other established and emerging companies enter the markets we address. In addition, current and potential competitors may make strategic acquisitions or establish cooperative relationships to expand their product offerings and to offer more comprehensive solutions. This growing competition may result in price reductions of our products and services, reduced revenues and gross margins and loss of market share, any one of which could have a material adverse effect on our business, operating results and financial condition.

Our success depends on our ability to develop new and enhanced products, services and strategic partner relationships

The markets in which we compete are subject to rapid technological change and our success is dependent on our ability to develop new and enhanced products, services and strategic partner relationships that meet evolving market needs. Trends that could have a critical impact on us include:

- evolving industry standards, mandates and laws, such as those mandated by the National Automated Clearing House Association and the Association for Payment Clearing Services;
- rapidly changing technology, which could cause our software to become suddenly outdated or could require us to make our products compatible with new database or network systems;
- developments and changes relating to the Internet that we must address as we maintain existing products and introduce any new products; and

the loss of any of our key strategic partners who serve as a valuable network from which we can leverage industry expertise and respond to changing marketplace demands.

There can be no assurance that technological advances will not cause our products to become obsolete or uneconomical. If we are unable to develop and introduce new products or enhancements to existing products in a timely and successful manner, our business, operating results and financial condition could be materially adversely affected. Similarly, if our new products did not receive general marketplace acceptance, or if the sales cycle of any of our new products significantly delayed the timing of revenue recognition, our results could be negatively affected.

Our products could be subject to future legal or regulatory actions, which could have a material adverse effect on our operating results

Our software products and hosted services offerings facilitate the transmission of business documents and information including, in some cases, confidential financial data related to payments, invoices and cash management. Our web-based software products, and certain of our hosted services offerings, transmit this data electronically. While we believe that all of our product and service offerings comply with current regulatory and security requirements, there can be no assurance that future legal or regulatory actions will not impact our product and service offerings. To the extent that regulatory or legal developments mandate a change in any of our products or services, or alter the demand for or the competitive environment of our products and services, we might not be able to respond to such requirements in a timely or successful manner. If this were to occur, our business, operating results and financial condition could be materially adversely affected.

Any unanticipated performance problems or bugs in our product offerings could have a material adverse effect on our future financial results

If the products that we offer and continue to introduce do not sustain marketplace acceptance, our future financial results could be adversely affected. Since certain of our offerings are still in early stages of adoption and since most of our products are continually being enhanced or further developed in response to general marketplace demands, any unanticipated performance problems or bugs that we have not been able to detect could result in additional development costs, diversion of technical and other resources from our other development efforts, negative publicity regarding us and our products, harm to our customer relationships and exposure to potential liability claims. In addition, if our products do not enjoy wide commercial success, our long-term business strategy will be adversely affected, which could have a material adverse effect on our business, operating results and financial condition.

We could incur substantial costs resulting from warranty claims or product liability claims

Our software license agreements typically contain provisions that afford customers a degree of warranty protection in the event that our software fails to conform to its written specifications. These agreements typically contain provisions intended to limit the nature and extent of our risk of warranty and product liability claims. There is a risk, however, that a court might interpret these terms in a limited way or could hold part or all of these terms to be unenforceable. Furthermore, some of our licenses with our customers are governed by non-US law, and there is a risk that foreign law might provide us less or different protection. While we maintain general liability insurance, including coverage for errors and omissions, we cannot be sure that our existing coverage will continue to be available on reasonable terms or will be available in amounts sufficient to cover one or more large claims. Although we have not experienced any material warranty or product liability claims to date, a warranty or product liability claim, whether or not meritorious, could result in substantial costs and a diversion of management's attention and our resources, which could have an adverse effect on our business, operating results and financial condition.

We could be adversely affected if we are unable to protect our proprietary technology and could be subject to litigation regarding our intellectual property rights, causing serious harm to our business

We rely upon a combination of patent, copyright and trademark laws and non-disclosure and other intellectual property contractual arrangements to protect our proprietary rights. However, we cannot assure you that our patents, pending applications for patents that may issue in the future, or other intellectual property will be of sufficient scope and strength to provide meaningful protection to our technology or any commercial advantage to us, or that the patents will not be challenged, invalidated or circumvented. We enter into agreements with our employees and customers that seek to limit and protect the distribution of proprietary information. Despite our efforts to safeguard and maintain our proprietary rights, there can be no assurance that such rights will remain protected or that we will be able to detect unauthorized use and take appropriate steps to enforce our intellectual property rights.

In recent years, there has been significant litigation in the United States involving patents and other intellectual property rights. We may be a party to litigation in the future to protect our intellectual property rights or as a result of an alleged infringement of the intellectual property rights of others. Any such claims, whether or not meritorious, could require us to spend significant sums in litigation, pay damages, delay product implementations, develop non-infringing intellectual property or acquire licenses to intellectual property that is the subject of the infringement claim. These claims could have a material adverse effect on our business, operating results and financial condition.

We engage off-shore development resources which may not be successful and which may put our intellectual property at risk

In order to optimize our research and development capabilities and to meet development timeframes, we contract with off-shore third party vendors in India and elsewhere for certain development activities. While our experience to date with these resources has been positive, there are a number of risks associated with off-shore development activities that include, but are not limited to, the following:

• less efficient and less accurate communication and information flow as a consequence of time, distance and language barriers between our primary development organization and the off-shore resources, resulting in delays or deficiencies in development efforts;

• disruption due to political or military conflicts around the world;

• misappropriation of intellectual property from departing personnel, which we may not readily detect; and

• currency exchange rate fluctuations that could adversely impact the cost advantages intended from these agreements.

To the extent that these or unforeseen risks occur, our operating results and financial condition could be adversely impacted.

Some anti-takeover provisions contained in our charter and under Delaware law could hinder a takeover attempt

We are subject to the provisions of Section 203 of the General Corporation Law of the State of Delaware prohibiting, under some circumstances, publicly-held Delaware corporations from engaging in business combinations with some stockholders for a specified period of time without the approval of the holders of substantially all of our outstanding voting stock. Such provisions could delay or impede the removal of incumbent directors and could make more difficult a merger, tender offer or proxy contest involving us, even if such events could be beneficial, in the short-term, to the interests of our stockholders. In addition, such provisions could limit the price that some investors might be willing to pay in the future for shares of our common stock. Our certificate of incorporation and bylaws contain provisions relating to the limitations of liability and indemnification of our directors and officers, dividing our board of directors into three classes of directors serving three-year terms and providing that our stockholders can take action only at a duly called annual or special meeting of stockholders.

We may incur significant costs from class action litigation as a result of expected volatility in our common stock

In the past, companies that have experienced market price volatility of their stock have been the targets of securities class action litigation. In August 2001, we were named as a party in one of the so-called “laddering” securities class action suits relating to the underwriting of our initial public offering. In April 2008, we acquired Optio Software, which is also a party in a “laddering” securities class action suit. We could incur substantial costs and experience a diversion of our management’s attention and resources in connection with any such litigation, which could have a material adverse effect on our business, financial condition and results of operations.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The following table provides information about purchases by us of our common stock during the three months ended September 30, 2008:

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased	Approximate Dollar Value of
--------	-------------------------------------	---------------------------------	-------------------------------------	--------------------------------

				as Part of Publicly Shares That May Announced Yet be Purchased Plans Under The or Programs Plans or Programs (1)
July 1, 2008 — July 31, 2008	----	----	----	\$ 7,870,000
August 1, 2008 — August 31, 2008	69,000	\$ 11.48	69,000	\$ 7,078,000
September 1, 2008 — September 30, 2008	70,000	\$ 10.79	70,000	\$ 6,322,000
Total	139,000	\$ 11.13	139,000	\$ 6,322,000

(1) In April 2008, our board of directors authorized a repurchase program for the repurchase of up to \$10.0 million of our common stock.

Item 6. Exhibits

See the Exhibit Index on page 29 for a list of exhibits filed as part of this Quarterly Report on Form 10-Q, which Exhibit Index is incorporated herein by reference.

SIGNATURE

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
