**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)**

NOTE 1 Basis of Presentation

The accompanying condensed consolidated balance sheet as of December 31, 2000, the condensed consolidated statement of income for the three and nine month periods ended December 31, 1999 and 2000, the condensed consolidated statement of cash flows for the nine month periods ended December 31, 1999 and 2000, and the condensed consolidated statement of stockholders' equity for the nine months ended December 31, 2000 have been prepared by the management of ViaSat, Inc., and have not been audited. These financial statements, in the opinion of management, include all adjustments (consisting only of normal recurring accruals) necessary for a fair presentation of the financial position, results of operations and cash flows for all periods presented. These financial statements should be read in conjunction with the financial statements and notes thereto for the year ended March 31, 2000 included in our 2000 Annual Report on Form 10-K. Interim operating results are not necessarily indicative of operating results for the full year.

The accompanying condensed consolidated financial statements include the results of TrellisWare Technologies, Inc., a majority owned subsidiary of ViaSat. All significant intercompany amounts have been eliminated. This equity interest is accounted for under the equity method of accounting as we exercise significant influence. This investment is recorded initially at cost and subsequently adjusted for net equity in income (loss) and cash contributions and distributions. Ownership of the preferred stock of TrellisWare entitles us to substantially all of the economic benefits in the preferred stock affiliate.

On July 28, 2000 the Board of Directors declared a two-for-one stock split of our common stock in the form of a stock dividend. The stock dividend was distributed at the close of business on August 31, 2000 to stockholders of record on August 21, 2000. All share and per share information in the financial statements has been adjusted to reflect the stock split on a retroactive basis.

In general, the functional currency of a foreign operation is deemed to be the local country's currency. Consequently, assets and liabilities of operations outside the United States are generally translated into United States dollars, and the effects of foreign currency translation adjustments are included as a component of stockholders' equity.

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and reported amounts of revenues and expenses during the reporting period. Estimates have been prepared on the basis of the most current and best available information, and actual results could differ from those estimates.

NOTE 2 Secondary Public Stock Offering and Acquisition of Satellite Networks Business

On April 24, 2000, we completed a secondary public stock offering for the sale of 5,224,150 shares of common stock for net proceeds of approximately \$73.1 million.

On April, 25, 2000, we completed the acquisition of the satellite networks business (the "Satellite Networks Business") of Scientific-Atlanta, Inc. for an aggregate purchase price of approximately \$57.1 million in cash (which reflects adjustments to the purchase price in accordance with the purchase agreement), plus warrants to purchase 100,000 shares of common stock valued at \$1.2 million.

The Satellite Networks Business is a significant DAMA-based VSAT supplier with additional product lines addressing the non-DAMA VSAT market, the gateway market, the asset tracking and meter reading market, and the telemetry and antenna systems market. In addition, the Satellite Networks Business brings us a larger and more experienced commercial sales force, a significant customer base, additional research

Table of Contents

and development, and engineering capabilities. We have moved the headquarters of our commercial business to the Satellite Networks Business facilities in Norcross, Georgia.

Edgar Filing: VIASAT INC - Form 10-Q/A

The acquisition has been accounted for by the purchase method of accounting as defined in APB Opinion No. 16. The purchase price of the acquisition has been allocated to the estimated fair value of the tangible and intangible assets acquired and liabilities assumed of the Satellite Networks Business. The purchase price allocation for certain assets is preliminary and further refinements are likely to be made on the completion of final valuation studies. In connection with this acquisition, a charge of \$2.3 million for acquired in process research and development is included in our results. This charge represents the fair value of certain acquired research and development projects that were determined to have not reached technological feasibility and have no alternative future use. The estimated fair value of assets acquired and liabilities assumed, which is subject to further refinement, is as follows:

Accounts receivable	\$ 17,870,000
Inventory	7,515,000
Property, plant and equipment	9,540,000
Intangible assets	24,996,000
Acquired in-process research and development	2,334,000
Other assets	326,000
Liabilities	(4,252,000)
	<hr/>
Total	\$ 58,329,000
	<hr/>

The following unaudited pro forma condensed combined financial information gives effect to the acquisition as of April 1, 1999. Because the Satellite Networks Business had been operated as a division of Scientific-Atlanta, its results may not reflect those that would have resulted had it operated as an independent entity or as a part of ViaSat. The pro forma information for the three and nine month periods ended December 31, 1999 and 2000 does not reflect the effects of anticipated post-acquisition cost savings or restructuring efficiencies.

The pro forma condensed combined financial information combines information from ViaSat's unaudited income statement for the three and nine month periods ended December 31, 1999 and 2000 with the Satellite Networks Business' unaudited income statement for the three and nine month periods ended December 31, 1999 and 2000.

	Three Months Ended December 31,		Nine Months Ended December 31,	
	1999	2000	1999	2000
Revenues	\$ 39,561,000	\$ 43,093,000	\$ 116,052,000	\$ 126,832,000
Net income	798,000	2,715,000	2,620,000	7,559,000
Earnings per share				
Basic	.04	.12	.13	.36
Diluted	.04	.12	.12	.34
Weighted average number of shares*				
Basic	21,451,082	21,836,429	20,928,994	21,187,133
Diluted	21,638,060	22,875,989	21,722,004	22,416,498

*The weighted average number of shares includes 5,224,150 shares related to the secondary public offering.

The unaudited pro forma financial information presented is not necessarily indicative of either the results of operations that would have occurred had the acquisition taken place on April 1, 1999 or the future results of operations of the combined entities.

Table of Contents

NOTE 3 Revenue Recognition

Edgar Filing: VIASAT INC - Form 10-Q/A

The majority of our revenues are derived from products and services performed under a variety of contracts including cost-plus-fixed fee, fixed-price, and time and materials type contracts. Generally, revenues are recognized as contracts are performed using the percentage of completion method, measured primarily by costs incurred to date compared with total estimated costs at completion or based on the number of units delivered. We provide for anticipated losses on contracts by a charge to income during the period in which they are first identified.

Contract costs with the U.S. Government and its prime contractors, including indirect costs, are subject to audit and negotiations with U.S. Government representatives. These audits have been completed and agreed upon through fiscal year 1997. Contract revenues and accounts receivable are stated at amounts which are expected to be realized upon final settlement.

NOTE 4 Earnings Per Share

Common stock equivalents of 1,186,978 and 1,039,559 shares for the three months ended December 31, 1999 and 2000, respectively, and 793,010 and 1,229,366 shares for the nine months ended December 31, 1999 and 2000 respectively, were used to calculate diluted earnings per share. Antidilutive shares excluded from the calculation were zero and 1,933,405 shares for the three months ended December 31, 1999 and 2000, respectively. Antidilutive shares excluded from the calculation were 21,040 and 864,943 shares for the nine months ended December 31, 1999 and 2000, respectively. Common stock equivalents are primarily comprised of options granted under our stock option plans.

NOTE 5 Composition of Certain Balance Sheet Captions

	March 31, 2000	December 31, 2000
		(Unaudited)
Accounts receivable:		
Billed	\$ 13,031,000	\$ 37,898,000
Unbilled	13,237,000	21,551,000
	<u>\$ 26,268,000</u>	<u>\$ 59,449,000</u>
Inventory:		
Raw materials	\$ 2,263,000	\$ 14,190,000
Work in process	484,000	4,368,000
Finished goods	375,000	3,220,000
	<u>\$ 3,122,000</u>	<u>\$ 21,778,000</u>
Intangible assets:		
Technology		\$ 9,754,000
Contracts and relationships		9,650,000
Acquired work force		5,592,000
Accumulated amortization		(2,342,000)
		<u>\$ 22,654,000</u>
Accrued liabilities:		
Current portion of warranty reserve	\$ 799,000	\$ 1,405,000
Accrued vacation	1,188,000	2,195,000
Accrued bonus	1,004,000	1,544,000
Accrued 401(k) matching contribution	917,000	1,419,000
Collections in excess of revenues	694,000	5,343,000
Other	399,000	1,309,000
	<u>\$ 5,001,000</u>	<u>\$ 13,215,000</u>

The intangible assets are amortized using the straight-line method over their estimated useful lives of three to nine years. The technology intangible asset has several components with estimated useful lives of six to nine years, contracts and relationships intangible asset has several components with estimated useful lives of three to nine years and acquired work force has an estimated useful life of five years.

Table of Contents

NOTE 6 Contingencies

On September 15, 2000 ORBCOMM Global, L.P. (ORBCOMM) and seven of its subsidiaries filed a voluntary petition for Chapter 11 relief in the United States Bankruptcy Court for the District of Delaware as part of its efforts to restructure and reorganize its business. ORBCOMM has continued its efforts to maintain and operate its network of low-Earth orbit (LEO) satellites and related ground facilities while it restructures its operations. The following table summarizes our assets related to ORBCOMM at December 31, 2000.

Accounts receivable-billed	\$4,611,000
Accounts receivable-unbilled	136,000
Inventory	130,000
	<hr/>
Total	\$4,877,000
	<hr/>

We cannot make assurances that the assets listed above will be fully recovered. If ORBCOMM is unable to successfully restructure its operations it could cause ViaSat to incur losses which could harm our business; however, we have not made any adjustments to the recorded amount as it is not possible at this time to reasonably estimate or determine what loss, if any, will be incurred.

We are currently a party to various government and commercial contracts which require us to meet performance covenants and project milestones. Under the terms of these contracts, failure by us to meet such performance covenants and milestones permit the other party to terminate the contract and, under certain circumstances, recover liquidated damages or other penalties. We are currently not in compliance, or in the past were not in compliance, with the performance or milestone requirements of certain of these contracts. Historically, our customers have not elected to terminate such contracts or seek liquidated damages from us and management does not believe that its existing customers will do so; therefore, we have not accrued for any potential liquidated damages or penalties.

We may be involved in legal proceedings arising in the ordinary course of business, none of which is expected to have a material adverse effect on our business, financial condition, results of operations or cash flows.

Table of Contents

NOTE 7 Segment Information

We are organized primarily on the basis of products with commercial and defense communication applications, represented by ViaSat Satellite Networks which operates primarily in the commercial market and Communication (formerly Electronic) Systems Group which operates primarily in the defense market.

The following table summarizes revenues and operating profits by operating segment for the three and nine month periods ended December 31, 2000. The acquisition of the Satellite Networks Business resulted in a second operating segment. Certain corporate general and administrative costs, amortization of intangible assets and the charge of acquired in-process research and development are not allocated to either segment and accordingly, are shown as reconciling items from segment operating profit and consolidated operating profit.

<u>Three Months Ended</u>	<u>Nine Months Ended</u>

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

When used in this discussion, the words believes, anticipates, expects, intends and similar expressions are intended to identify forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Such statements are subject to certain risks and uncertainties which could cause actual results to differ materially from those projected. Readers are cautioned not to place undue reliance on these forward-looking statements which speak only as of the date hereof. We undertake no obligation to republish revised forward-looking statements to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events. Readers are also urged to carefully review and consider the various disclosures made by us which attempt to advise interested parties of the factors which affect our business, including without limitation the disclosures made under Item 1. Business Factors That May Affect Future Performance in our Annual Report on Form 10-K for our fiscal year ended March 31, 2000, filed with the Securities and Exchange Commission.

Results of Operations

The following table sets forth, as a percentage of total revenues, certain income data for the periods indicated.

Net income	11.1	6.3	10.8	5.9

Three Months Ended December 31, 1999 vs. Three Months Ended December 31, 2000

Revenues. Revenues increased 138.9% from \$18.0 million for the three months ended December 31, 1999 to \$43.1 million for the three months ended December 31, 2000. This increase was primarily due to the acquisition of the Satellite Networks Business as well as improvements in revenues generated by commercial broadband and other development programs including the multifunction information distribution system (MIDS). These increases were partially offset by a decrease in revenues resulting from completion of various production contracts.

Gross Profit. Gross profit increased 80.5% from \$7.5 million (41.8% of revenues) for the three months ended December 31, 1999 to \$13.6 million (31.6% of revenues) for the three months ended December 31, 2000. This increase was primarily due to higher volumes related to the acquisition of the Satellite Networks Business and broadband development programs. The decrease as a percentage of revenues resulted from lower volumes of high margin defense products and increased volumes of lower margin development projects.

Selling, General and Administrative Expenses. Selling, general and administrative (SG&A) expenses increased 169.8% from \$2.8 million (15.8% of revenues) for the three months ended December 31, 1999 to \$7.7 million (17.8% of revenues) for the three months ended December 31, 2000. The increase was primarily due to the additional costs from the Satellite Networks Business, transition costs related to the

Table of Contents

acquisition and efforts related to pursuing broadband business. SG&A expenses consist primarily of personnel costs and expenses for business development, marketing and sales, bid and proposal, finance, contract administration and general management. Certain of these expenses are difficult to predict and vary based on specific government and commercial sales opportunities.

Independent Research and Development. Independent research and development (IR&D) expenses decreased 23.9% from \$2.1 million (11.6% of revenues) for the three months ended December 31, 1999, to \$1.6 million (3.7% of revenues) for the three months ended December 31, 2000. This decrease resulted from a higher level of funded development programs.

Amortization of Intangible Assets. Intangible assets are being amortized over useful lives ranging from three to nine years. For the three months ended December 31, 2000, amortization expense was \$967,000.

Edgar Filing: VIASAT INC - Form 10-Q/A

Interest Expense. Interest expense decreased from \$37,000 for the three months ended December 31, 1999 to \$15,000 for the three months ended December 31, 2000. Interest expense relates to loans for the purchase of capital equipment, which are generally three year variable rate term loans, and to short-term borrowings under our line of credit to cover working capital requirements. Total outstanding equipment loans were \$1.5 million at December 31, 1999, and \$504,000 at December 31, 2000. There were no outstanding borrowings under our line of credit as of December 31, 1999 or 2000.

Interest Income. Interest income increased from \$283,000 for the three months ended December 31, 1999 to \$304,000 for the three months ended December 31, 2000. This increase resulted from increased invested balances. Interest income relates largely to interest earned on short-term deposits of cash.

Provision for Income Taxes. Our effective income tax rate decreased from 29.9% for the three months ended December 31, 1999 to 22.4% for the three months December 31, 2000. The difference relates primarily to increases in estimates of prior period research and development tax credits.

Nine Months Ended December 31, 1999 vs. Nine Months Ended December 31, 2000

Revenues. Revenues increased 129.3% from \$52.1 million for the nine months ended December 31, 1999 to \$119.4 million for the nine months ended December 31, 2000. This increase was primarily due to the acquisition of the Satellite Networks Business as well as improvements in revenues generated by commercial broadband and other development programs including the multifunction information distribution system (MIDS). These increases were partially offset by a decrease in revenues resulting from completion of simulator systems and various production contracts.

Gross Profit. Gross profit increased 73.0% from \$22.3 million (42.9% of revenues) for the nine months ended December 31, 1999 to \$38.6 million (32.4% of revenues) for the nine months ended December 31, 2000. This increase was primarily due to higher volumes related to the acquisition of the Satellite Networks Business and broadband development programs. The decrease as a percentage of revenues resulted from lower volumes of various high margin products and increased volumes of lower margin development projects.

Selling, General and Administrative Expenses. SG&A expenses increased 143.9% from \$8.2 million (15.8% of revenues) for the nine months ended December 31, 1999 to \$20.1 million (16.8% of revenues) for the nine months ended December 31, 2000. The increase in SG&A expenses was primarily due to the additional costs from the Satellite Networks Business, transition costs related to the acquisition, marketing of commercial products, increased business development and bid and proposal efforts for defense programs, and additional administrative staffing to support our growth.

Independent Research and Development. IR&D expenses decreased 17.0% from \$6.0 million (11.5% of revenues) for the nine months ended December 31, 1999 to \$5.0 million (4.1% of revenues) for the nine months ended December 31, 2000. This decrease resulted from the award of funded development contracts related to both our defense and commercial products.

Table of Contents

Acquired In-Process Research and Development. The acquisition of the Satellite Networks Business was accounted for by the purchase method of accounting. In connection with this acquisition, a charge of \$2.3 million for purchased in-process research and development (IPR&D) was included in our results.

An independent valuation was performed and used as an aid in determining the fair value of the purchased IPR&D projects. There were three product areas identified in which there were research and development efforts underway where technological feasibility had not been reached.

The Satellite Networks Business is developing a next generation mobile subscriber communicator. This next generation product contains a new chipset, new connectors, added functionality, bigger programming space and a longer battery life than the legacy product and will be sold at a lower price. The estimated completion date at the time of the acquisition was November 2000. We estimated based on man hours incurred versus man hours required to complete the project that at the acquisition date the project was 77% complete and would require approximately \$500,000 to complete. Using the income approach the value calculated for the IPR&D associated with the mobile subscriber communicator was \$1.6 million. The market for this product has not materialized to the extent anticipated and as a result, the completion date has been delayed.

The Satellite Networks Business also has the SkyRelay and the SkyLynx products. The SkyRelay development of a next generation terminal included a terminal with newer interfaces, an additional IP port and consolidated functionality onto a single card. At the time of acquisition, the project completion was expected to be in June of 2001 and we estimated based on man hours incurred versus man hours required to complete the

Edgar Filing: VIASAT INC - Form 10-Q/A

project that the project was estimated to be 15% complete and will require approximately \$6.0 million to complete. Using the income approach the value calculated for the IPR&D associated with SkyRelay was \$300,000. The production for this next generation SkyRelay product is expected to begin in fiscal 2002. The SkyLynx related IPR&D projects are the Mesh Working and 2mbps Channel Unit. Based on the same completion criteria as SkyRelay, it was estimated the SkyLynx related IPR&D was 60% complete at the date of acquisition and would require approximately \$385,000 to complete. The estimated completion date at the time of acquisition was in fiscal 2002 for both projects. Also using the income approach, the value calculated for IPR&D associated with SkyLynx was \$400,000. The IPR&D for the SkyRelay and SkyLynx products continue progress, in all material respects, consistently with our original assumptions that were provided to the independent appraiser and used to value the IPR&D.

Amortization of Intangible Assets. Intangible assets are being amortized over useful lives ranging from three to nine years. For the nine months ended December 31, 2000, amortization expense was \$2.3 million for the period from April 25, 2000 to December 31, 2000.

Interest Expense. Interest expense decreased from \$126,000 for the nine months ended December 31, 1999 to \$80,000 for the nine months ended December 31, 2000. Total outstanding equipment loans were \$1.5 million at December 31, 1999, and \$504,000 at December 31, 2000. There were no outstanding borrowings under our line of credit as of December 31, 1999 or 2000.

Interest Income. Interest income increased from \$762,000 for the nine months ended December 31, 1999 to \$1.3 million for the nine months ended December 31, 2000. This increase resulted from higher average invested cash balances.

Provision for Income Taxes. Our effective income tax rate decreased from 36.0% for the nine months ended December 31, 1999 to 30.0% for the nine months ended December 31, 2000. The decrease relates primarily to increases in estimates of prior period research and development tax credits.

Backlog

At December 31, 2000 we had firm backlog of \$221.7 million of which \$207.9 million was funded. The firm backlog of \$221.7 million does not include contract options of \$58.7 million. Of the \$221.7 million in firm backlog, approximately \$35.9 million is expected to be delivered in the fiscal year ending March 31, 2001, and the balance is expected to be delivered in the fiscal year ending March 31, 2002 and thereafter.

Table of Contents

At March 31, 2000 we had firm backlog of \$88.2 million, of which \$58.6 million was funded, not including options of \$53.3 million. We include in our backlog only those orders for which we have accepted purchase orders. However, backlog is not necessarily indicative of future sales. A majority of our government backlog scheduled for delivery can be terminated at the convenience of the government since orders are often made substantially in advance of delivery, and our contracts typically provide that orders may be terminated with limited or no penalties. In addition, purchase orders may set forth product specifications that would require us to complete additional product development. A failure to develop products meeting such specifications could lead to a termination of the related purchase order.

The backlog amounts as presented are comprised of funded and unfunded components. Funded backlog represents the sum of contract amounts for which funds have been specifically obligated by customers to contracts. Unfunded backlog represents future amounts that customers may obligate over the specified contract performance periods. Our government customers allocate funds for expenditures on long-term contracts on a periodic basis. Our ability to realize revenues from government contracts in backlog is dependent upon adequate funding for such contracts. Although funding of government contracts is not within our control, our experience indicates that actual contract fundings have ultimately been approximately equal to the aggregate amounts of the contracts.

Liquidity and Capital Resources

We have financed our operations to date primarily with cash flows from operations, bank line of credit financing, equity financing and loans for the purchase of capital equipment. Cash provided by operating activities for the nine months ended December 31, 1999 was \$1.7 million and cash used in operating activities for the nine months ended December 31, 2000 was \$9.4 million. Increases in accounts receivable and inventories due to the new business were offset by increases in accounts payable.

Cash provided by investing activities for the nine months ended December 31, 1999 was \$9.3 million and cash used in investing activities for the nine months ended December 31, 2000 was \$64.7 million. During the nine months ended December 31, 2000, we acquired the Satellite Networks Business for cash of \$57.1 million plus warrants to purchase 100,000 shares of common stock valued at \$1.2 million. In addition, we acquired \$3.0 million in equipment in the nine months ended December 31, 2000 compared to \$2.9 million of equipment during the nine months

Edgar Filing: VIASAT INC - Form 10-Q/A

ended December 31, 1999, excluding the acquisition of the Satellite Networks Business.

Cash used in financing activities for the nine months ended December 31, 1999 was \$399,000 and cash provided by financing activities for the nine months ended December 31, 2000 was \$74.4 million. This increase was primarily the result of completing a secondary public stock offering for \$73.1 million.

At December 31, 2000, we had \$24.5 million in cash, cash equivalents and short-term investments, \$88.0 million in working capital and \$504,000 in equipment financing. We had no outstanding borrowings under our line of credit at December 31, 2000.

We are in the process of negotiating the terms of the \$25.0 million revolving line of credit facility with a bank.

On September 15, 2000 ORBCOMM Global, L.P. (ORBCOMM) and seven of its subsidiaries filed a voluntary petition for Chapter 11 relief in the United States Bankruptcy Court for the District of Delaware as part of its efforts to restructure and reorganize its business. ORBCOMM has continued its efforts to maintain and operate its network of low-Earth orbit (LEO) satellites and related ground facilities while it restructures its operations. We have approximately \$5.0 million worth of receivables and other assets currently at risk with ORBCOMM. We cannot make assurances that the assets will be fully recovered. If ORBCOMM is unable to successfully restructure its operations it could cause ViaSat to incur losses up to the amount of the assets at risk; however, we have not made any adjustments to the recorded amount as it is not possible at this time to reasonably estimate or determine what loss, if any, will be incurred.

13

Table of Contents

Our future capital requirements will depend upon many factors, including the progress of our research and development efforts, expansion of our marketing efforts, and the nature and timing of orders. We believe that our current cash balances and net cash expected to be provided by operating activities will be sufficient to meet our working capital and capital expenditure requirements for at least the next 12 months. We invest our cash in excess of current operating requirements in short-term, interest-bearing, investment-grade securities.
