VECTREN CORPORATION AND SUBSIDIARY COMPANIES
NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS
(UNAUDITED)

1. Organization and Nature of Operations

Vectren Corporation (the Company or Vectren), an Indiana corporation, is an energy holding company headquartered in Evansville, Indiana. The Company's wholly owned subsidiary, Vectren Utility Holdings, Inc. (Utility Holdings), serves as the intermediate holding company for three operating public utilities: Indiana Gas Company, Inc. (Indiana Gas), Southern Indiana Gas and Electric Company (SIGECO), and the Ohio operations. Utility Holdings also has other assets that provide information technology and other services to the three utilities. Utility Holdings' consolidated operations are collectively referred to as the Utility Group. Vectren and Utility Holdings are holding companies as defined by the Energy Policy Act of 2005.

Indiana Gas provides energy delivery services to approximately 565,000 natural gas customers located in central and southern Indiana. SIGECO provides energy delivery services to approximately 141,000 electric customers and approximately 112,000 gas customers located near Evansville in southwestern Indiana. SIGECO also owns and operates electric generation to serve its electric customers and optimizes those assets in the wholesale power market. Indiana Gas and SIGECO generally do business as Vectren Energy Delivery of Indiana. The Ohio operations provide energy delivery services to approximately 318,000 natural gas customers located near Dayton in west central Ohio. The Ohio operations are owned as a tenancy in common by Vectren Energy Delivery of Ohio, Inc. (VEDO), a wholly owned subsidiary, (53% ownership) and Indiana Gas (47% ownership). The Ohio operations generally do business as Vectren Energy Delivery of Ohio.

The Company, through Vectren Enterprises, Inc. (Enterprises), is also involved in nonutility activities in three primary business areas: Energy Marketing and Services, Coal Mining and Energy Infrastructure Services. Energy Marketing and Services markets and supplies natural gas and provides energy management services. Coal Mining mines and sells coal. Energy Infrastructure Services provides underground construction and repair and energy performance contracting services. Enterprises also has other businesses that invest in energy-related opportunities and services, real estate, and leveraged leases, among other investments. In addition, the Company has investments that generate synfuel tax credits and processing fees relating to the production of coal-based synthetic fuels. These operations are collectively referred to as the Nonutility Group. Enterprises supports the Company's regulated utilities pursuant to service contracts by providing natural gas supply services, coal, infrastructure services, and other services.

2. Basis of Presentation

The interim consolidated condensed financial statements included in this report have been prepared by the Company, without audit, as provided in the rules and regulations of the Securities and Exchange Commission. Certain information and note disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States have been omitted as provided in such rules and regulations. The Company believes that the information in this report reflects all adjustments necessary to fairly state the results of the interim periods reported. These consolidated condensed financial statements and related notes should be read in conjunction with the Company's audited annual consolidated financial statements for the year ended December 31, 2006, filed February 16, 2007, on Form 10-K. Because of the seasonal nature of the Company's utility operations, the results shown on a quarterly basis are not necessarily indicative of annual results.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and

liabilities and disclosure of contingent assets and liabilities at the date of the statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

-7-

Table of Contents**3. Comprehensive Income**

Comprehensive income consists of the following:

<i>(In millions)</i>	Three Months Ended June 30,		Six Months Ended June 30,	
	2007	2006	2007	2006
Net income	\$ 16.0	\$ 4.3	\$ 86.1	\$ 61.9
Comprehensive income (loss) of unconsolidated affiliates	8.3	(19.6)	1.8	(12.1)
Cash flow hedges				
Unrealized gains	-	-	0.1	-
Reclassifications to net income (loss)	(0.2)	(0.2)	0.2	(5.0)
Income tax benefit (expense)	(3.2)	7.7	(0.8)	6.5
Total comprehensive income	\$ 20.9	\$ (7.8)	\$ 87.4	\$ 51.3

Other comprehensive income of unconsolidated affiliates is the Company's portion of ProLiance Energy, LLC's accumulated other comprehensive income related to their use of cash flow hedges, including commodity contracts, and the Company's portion of Haddington Energy Partners, LP's accumulated other comprehensive income related to its unrealized gains and losses of "available for sale securities," as defined by SFAS 115, "Accounting for Certain Investments in Debt and Equity Securities."

4. Earnings Per Share

Basic earnings per share is computed by dividing net income available to common shareholders by the weighted-average number of common shares outstanding for the period. Diluted earnings per share assumes the conversion of stock options into common shares and settlement in shares of an equity forward contract (see Note 9), using the treasury stock method, as well as the conversion of restricted shares using the contingently issuable shares method, to the extent the effect would be dilutive.

The following table sets forth the computation of basic and diluted earnings per share.

<i>(In millions, except per share data)</i>	Three Months Ended June 30,		Six Months Ended June 30,	
	2007	2006	2007	2006
Numerator:				
Numerator for basic and diluted EPS - Net income	\$ 16.0	\$ 4.3	\$ 86.1	\$ 61.9
Denominator:				
Denominator for basic EPS - Weighted average common shares outstanding	75.9	75.7	75.9	75.7
Equity forward dilution effect	0.2	-	0.1	-
Conversion of stock options and lifting of restrictions on issued restricted stock	0.6	0.3	1.0	0.4
Denominator for diluted EPS - Adjusted weighted average shares outstanding and assumed conversions outstanding	76.7	76.0	77.0	76.1

Basic earnings per share	\$ 0.21	\$ 0.06	\$ 1.13	\$ 0.82
Diluted earnings per share	\$ 0.21	\$ 0.06	\$ 1.12	\$ 0.81

For the three and six months ended June 30, 2007, all options were dilutive. For the three and six months ended June 30, 2006, options to purchase an additional 2,894 shares of the Company's common stock were outstanding, but were not included in the computation of diluted earnings per share because their effect would be antidilutive. The exercise price for these options was \$27.15.

-8-

Table of Contents**5. Excise and Utility Receipts Taxes**

Excise taxes and a portion of utility receipts taxes are included in rates charged to customers. Accordingly, the Company records these taxes received as a component of operating revenues, which totaled \$6.7 million and \$6.0 million, respectively for the three months ended June 30, 2007 and 2006. For the six months ended June 30, 2007 and 2006, these taxes totaled \$24.7 million and \$23.2 million, respectively. Expenses associated with excise and utility receipts taxes are recorded as a component of *Taxes other than income taxes*.

6. Retirement Plans & Other Postretirement Benefits

The Company maintains three qualified defined benefit pension plans, a nonqualified supplemental executive retirement plan (SERP), and three other postretirement benefit plans. The qualified pension plans and the SERP are aggregated under the heading "Pension Benefits." Other postretirement benefit plans are aggregated under the heading "Other Benefits."

Net Periodic Benefit Cost

A summary of the components of net periodic benefit cost follows:

<i>(In millions)</i>	Three Months Ended June 30,			
	Pension Benefits		Other Benefits	
	2007	2006	2007	2006
Service cost	\$ 1.4	\$ 1.5	\$ 0.1	\$ 0.1
Interest cost	3.7	3.5	1.0	0.9
Expected return on plan assets	(3.6)	(3.4)	(0.1)	(0.1)
Amortization of prior service cost	0.4	0.5	(0.2)	(0.2)
Amortization of transitional obligation	-	-	0.3	0.3
Amortization of actuarial loss	0.4	0.6	-	-
Net periodic benefit cost	\$ 2.3	\$ 2.7	\$ 1.1	\$ 1.0

<i>(In millions)</i>	Six Months Ended June 30,			
	Pension Benefits		Other Benefits	
	2007	2006	2007	2006
Service cost	\$ 2.8	\$ 3.0	\$ 0.3	\$ 0.3
Interest cost	7.4	7.1	2.0	1.9
Expected return on plan assets	(7.2)	(6.8)	(0.3)	(0.3)
Amortization of prior service cost	0.9	0.9	(0.4)	(0.4)
Amortization of transitional obligation	-	-	0.6	0.6
Amortization of actuarial loss	0.7	1.2	-	-
Net periodic benefit cost	\$ 4.6	\$ 5.4	\$ 2.2	\$ 2.1

Employer Contributions to Qualified Pension Plans

Currently, the Company expects to contribute approximately \$8.4 million to its pension plan trusts for 2007. Through June 30, 2007, contributions of \$2.6 million have been made to the pension plan trusts.

7. Transactions with ProLiance Energy, LLC

ProLiance Energy, LLC (ProLiance), a nonutility energy marketing affiliate of Vectren and Citizens Gas and Coke Utility (Citizens Gas), provides services to a broad range of municipalities, utilities, industrial operations, schools, and healthcare institutions located throughout the Midwest and Southeast United States. ProLiance's primary customers

include Vectren's Indiana utilities and nonutility gas supply operations as well as Citizens Gas. ProLiance's businesses include gas marketing, gas portfolio optimization, and other portfolio and energy management services. Consistent with its ownership percentage, Vectren is allocated 61% of ProLiance's profits and losses; however, governance and voting rights remain at 50% for each member; and therefore, the Company accounts for its investment in ProLiance using the equity method of accounting.

-9-

Table of ContentsTransactions with ProLiance

The Company, including its retail gas supply operations, contracted for approximately 76% and 77% of its natural gas purchases through ProLiance during the six months ended June 30, 2007 and 2006, respectively. Purchases from ProLiance for resale and for injections into storage for the three months ended June 30, 2007 and 2006 totaled \$173.5 million and \$152.4 million, respectively, and for the six months ended June 30, 2007 and 2006, totaled \$446.3 million and \$443.3 million, respectively. Amounts owed to ProLiance at June 30, 2007, and December 31, 2006, for those purchases were \$49.9 million and \$84.8 million, respectively, and are included in *Accounts payable to affiliated companies*. Amounts charged by ProLiance for gas supply services are established by supply agreements with each utility.

Summarized Financial Information

Summarized financial information related to ProLiance is presented below:

<i>(in millions)</i>	Three Months Ended June 30,		Six Months Ended June 30,	
	2007	2006	2007	2006
Summarized Statement of Income information:				
Revenues	\$ 495.3	\$ 498.3	\$ 1,263.8	\$ 1,474.1
Margin	14.0	12.4	64.1	55.7
Operating income	6.5	5.0	49.9	38.8
ProLiance's earnings	9.4	5.7	53.7	39.1

<i>(In millions)</i>	As of June 30, 2007	As of December 31, 2006
Summarized balance sheet information:		
Current assets	\$ 515.2	\$ 652.4
Noncurrent assets	41.1	41.5
Current liabilities	285.6	452.2
Noncurrent liabilities	6.5	5.7
Equity	264.2	236.0

Vectren's share of ProLiance's operating results, which are included on a pretax basis in *Equity in earnings of unconsolidated affiliates*, were \$5.7 million and \$3.5 million, respectively, for the three months ended June 30, 2007 and 2006 and \$32.7 million and \$23.9 million year to date at June 30, 2007 and 2006, respectively. Vectren's share of ProLiance's earnings, after income taxes and allocated interest expense, was \$2.5 million and \$1.2 million for the three months ended June 30, 2007 and 2006, respectively, and was \$17.8 million and \$12.5 million for the six months ended June 30, 2007 and 2006, respectively.

8. Synfuel-Related Activity

Pace Carbon Synfuels, LP (Pace Carbon) is a Delaware limited partnership formed to develop, own, and operate four projects to produce and sell coal-based synthetic fuel (synfuel) utilizing Covol technology. The Company has an 8.3 percent interest in Pace Carbon which is accounted for using the equity method of accounting. The Internal Revenue Code provides for manufacturers, such as Pace Carbon, to receive a tax credit for every ton of synthetic fuel sold. Under current tax laws, these synfuel-related credits and fees cease at the end of 2007.

Table of Contents

The Internal Revenue Service has issued private letter rulings, which concluded that the synthetic fuel produced at the Pace Carbon facilities should qualify for tax credits. The IRS has completed tax audits of Pace Carbon for the years 1998 through 2001 without challenging tax credit calculations. As a partner in Pace Carbon, Vectren has reflected synfuel tax credits in its consolidated results from inception through June 30, 2007, of approximately \$111 million, of which approximately \$101 million have been generated since 2001. To date, Vectren has been in a position to utilize or carryforward substantially all of the credits generated. Primarily from the use of these credits, the Company generated an Alternative Minimum Tax (AMT) credit carryforward. The Company has an accumulated AMT credit carryforward of approximately \$41 million at June 30, 2007.

Synfuel tax credits are only available when the price of oil is less than a base price specified by the Internal Revenue Code, as adjusted for inflation. The current forward price curve indicates that a phase out of synfuel tax credits in 2007 may occur. However, in the fourth quarter of 2006, the Company purchased oil contracts with a notional amount of 2.8 million barrels, which approximates the Company's expected 2007 synfuel production, to mitigate 2007 phase out risk. During the three and six months ended June 30, 2007, the mark-to-market losses associated with these contracts totaled \$2.0 million and \$1.3 million, respectively, and are reflected in *Other-net*. Impairment charges relating to the investment in Pace Carbon approximating \$9.5 million, or \$5.7 million after tax, were recorded in *Other-net* in the second quarter of 2006.

The investment in Pace Carbon resulted in losses reflected in *Equity in earnings of unconsolidated affiliates* totaling \$5.3 million and \$6.1 million for the three months ended June 30, 2007 and 2006, respectively, and \$10.5 million and \$12.0 million during the six months ended June 30, 2007 and 2006, respectively. Synfuel related results, inclusive of those losses and their related tax benefits as well as the tax credits and other related activity, were earnings of \$1.4 million and \$4.8 million, respectively, for the three and six months ended June 30, 2007, respectively, compared to losses of \$5.0 million and \$4.3 million, respectively, during the three and six months ended June 30, 2006.

9. Common Stock Offering

In February 2007, the Company sold 4.6 million authorized but previously unissued shares of its common stock to a group of underwriters in an SEC-registered primary offering at a price of \$28.33 per share. The transaction generated proceeds, net of underwriting discounts and commissions, of approximately \$125.7 million. The Company executed an equity forward sale agreement (equity forward) in connection with the offering, and therefore, did not receive proceeds at the time of the equity offering. The equity forward allows the Company to price an offering under market conditions existing at that time, and to better match the receipt of the offering proceeds and the associated share dilution with the implementation of new electric service territory base rates, providing a return on the new equity employed. The offering proceeds, when and if received, will be used to permanently finance primarily electric utility capital expenditures.

In connection with the equity forward, an affiliate of one of the underwriters (the forward seller), at the Company's request, borrowed an equal number of shares of the Company's common stock from institutional stock lenders and sold those borrowed shares to the public in the primary offering. The Company did not receive any proceeds at the time of the offering, but will receive an amount equal to the net proceeds from that sale, subject to certain adjustments defined in the equity forward, upon full share settlement of the equity forward. Those adjustments defined in the equity forward include 1) daily increases in the forward sale price based on a floating interest factor equal to the federal funds rate, less a 35 basis point fixed spread, and 2) structured quarterly decreases to the forward sale price that align with expected Company dividend payments.

The Company may elect to settle the equity forward in shares or in cash, except in specified circumstances or events where the counterparty to the equity forward could force a share settlement. Examples of such events include, but are not limited to, the Company making dividend payments greater than the structured quarterly decreases identified in the equity forward or the Company repurchasing a number of its outstanding common shares over a specified

threshold. If the Company elects to settle in shares, the maximum number of shares deliverable by the Company is 4.6 million shares. If the Company elects to settle in cash, an affiliate of one of the underwriters (the forward purchaser) would purchase shares in the market and return those shares to the stock lenders. The Company will either owe or be owed funds depending upon the Company's average share price during the "unwind period" defined in the equity forward in relation to the equity forward's contracted price. Generally, if the equity forward's contracted price is lower than average share price during the "unwind period", then the Company would owe cash; and if the average share price during the "unwind period" is less than the equity forward's contracted price, the Company would receive cash. Proceeds received or paid when the equity forward is settled will be recorded in *Common Shareholders' Equity*, even if settled in cash. The equity forward must be settled prior to February 28, 2009.

Table of Contents

The equity forward had an initial forward price of \$27.34 per share, representing the public offering price of \$28.33 per share, net of underwriting discounts and commissions. Management therefore estimated the contract had no initial fair value. If the equity forward had been settled by delivery of shares at June 30, 2007, the Company would have received approximately \$126.4 million based on a forward price of \$27.47 for the 4.6 million shares. If the Company had elected to settle the equity forward in cash at June 30, 2007, the Company estimates it would have owed approximately \$5 million, primarily reflecting the gross spread on the sale of shares. The federal funds rate was 5.375% at June 30, 2007. The Company currently anticipates settling the equity forward by delivering shares.

10. Commitments & Contingencies

Legal Proceedings

The Company is party to various legal proceedings arising in the normal course of business. In the opinion of management, there are no legal proceedings pending against the Company that are likely to have a material adverse effect on its financial position, results of operations or cash flows.

Guarantees & Product Warranties

Vectren issues guarantees to third parties on behalf of its unconsolidated affiliates. Such guarantees allow those affiliates to execute transactions on more favorable terms than the affiliate could obtain without such a guarantee. Guarantees may include posted letters of credit, leasing guarantees, and performance guarantees. As of June 30, 2007, guarantees issued and outstanding on behalf of unconsolidated affiliates approximated \$3 million. The Company has accrued no liabilities for these guarantees as they relate to guarantees issued among related parties, or such guarantees were executed prior to the adoption of FASB Interpretation No. 45, "Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others."

In 2006, the Company issued a guarantee with an approximate \$5 million maximum risk related to the residual value of an operating lease that expires in 2011. As of June 30, 2007, Vectren Corporation has a liability representing the fair value of that guarantee of less than \$0.1 million. Liabilities accrued for, and activity related to, product warranties are not significant.

11. Environmental Matters

Clean Air/Climate Change

In March of 2005 USEPA finalized two new air emission reduction regulations. The Clean Air Interstate Rule (CAIR) is an allowance cap and trade program requiring further reductions in Nitrogen Oxides (NO_x) and Sulfur Dioxide (SO₂) emissions from coal-burning power plants. The Clean Air Mercury Rule (CAMR) is an allowance cap and trade program requiring further reductions in mercury emissions from coal-burning power plants. Both sets of regulations require emission reductions in two phases. The first phase deadline for both rules is 2010 (2009 for NO_x under CAIR), and the second phase deadline for compliance with the emission reductions required under CAIR is 2015, while the second phase deadline for compliance with the emission reduction requirements of CAMR is 2018. The Company is evaluating compliance options and fully expects to be in compliance by the required deadlines.

In February 2006, the IURC approved a multi-emission compliance plan filed by the Company's utility subsidiary, SIGECO. Once the plan is implemented, SIGECO's coal-fired plants will be 100% scrubbed for SO₂, 90% scrubbed for NO_x, and mercury emissions will be reduced to meet the new mercury reduction standards. The order, as previously agreed to by the OUCC and Citizens Action Coalition, allows SIGECO to recover an approximate 8% return on up to \$110 million in capital investments through a rider mechanism which is updated every six months for actual costs incurred. The Company will also recover through a rider its operating expenses, including depreciation, once the equipment is placed into service. As of June 30, 2007, the Company has made capital investments of approximately \$75 million related to this environmental requirement, of which \$49.4 million was placed into service on January 1, 2007, and was included in rate base in the aforementioned rate case settlement. The Company may file

periodic updates with the IURC requesting modification to the spending authority.

-12-

Table of Contents

If legislation requiring reductions in carbon dioxide and other greenhouse gases is adopted, such regulation could substantially affect both the costs and operating characteristics of the Company's fossil fuel plants, nonutility coal mining operations, and other operations. At this time and in absence of final legislation, compliance costs and other effects associated with reductions in greenhouse gas emissions remain uncertain.

Pursuant to an IURC order, SIGECO is studying renewable energy alternatives, and on April 9, 2007, filed a green power rider seeking authority to buy 30 MW of wind energy. Future filings with the IURC with regard to new generation and/or further environmental compliance plans will include evaluation of potential carbon requirements.

Environmental Remediation Efforts

In the past, Indiana Gas, SIGECO, and others operated facilities for the manufacture of gas. Given the availability of natural gas transported by pipelines, these facilities have not been operated for many years. Under currently applicable environmental laws and regulations, those that operated these facilities may now be required to take remedial action if certain contaminants are found above the regulatory thresholds at these sites.

Indiana Gas identified the existence, location, and certain general characteristics of 26 gas manufacturing and storage sites for which it may have some remedial responsibility. Indiana Gas completed a remedial investigation/feasibility study (RI/FS) at one of the sites under an agreed order between Indiana Gas and the IDEM, and a Record of Decision was issued by the IDEM in January 2000. Although Indiana Gas has not begun an RI/FS at additional sites, Indiana Gas has submitted several of the sites to the IDEM's Voluntary Remediation Program (VRP) and is currently conducting some level of remedial activities, including groundwater monitoring at certain sites, where deemed appropriate, and will continue remedial activities at the sites as appropriate and necessary.

Indiana Gas accrued the estimated costs for further investigation, remediation, groundwater monitoring, and related costs for the sites. While the total costs that may be incurred in connection with addressing these sites cannot be determined at this time, Indiana Gas has recorded costs that it reasonably expects to incur totaling approximately \$20.4 million.

The estimated accrued costs are limited to Indiana Gas' share of the remediation efforts. Indiana Gas has arrangements in place for 19 of the 26 sites with other potentially responsible parties (PRP), which serve to limit Indiana Gas' share of response costs at these 19 sites to between 20% and 50%. With respect to insurance coverage, Indiana Gas has received and recorded settlements from all known insurance carriers under insurance policies in effect when these plants were in operation in an aggregate amount approximating \$20.4 million.

In October 2002, SIGECO received a formal information request letter from the IDEM regarding five manufactured gas plants that it owned and/or operated and were not enrolled in the IDEM's VRP. In October 2003, SIGECO filed applications to enter four of the manufactured gas plant sites in IDEM's VRP. The remaining site is currently being addressed in the VRP by another Indiana utility. SIGECO added those four sites into the renewal of the global Voluntary Remediation Agreement that Indiana Gas has in place with IDEM for its manufactured gas plant sites. That renewal was approved by the IDEM in February 2004. SIGECO is also named in a lawsuit filed in federal district court in May 2007, involving another site subject to potential environmental remediation efforts.

SIGECO has filed a declaratory judgment action against its insurance carriers seeking a judgment finding its carriers liable under the policies for coverage of further investigation and any necessary remediation costs that SIGECO may accrue under the VRP program and/or related to the aforementioned site subject to the lawsuit. While the total costs that may be incurred in connection with addressing these sites cannot be determined at this time, SIGECO has recorded costs that it reasonably expects to incur totaling approximately \$7.7 million. With respect to insurance coverage, SIGECO has received and recorded settlements from insurance carriers under insurance policies in effect when these sites were in operation in an aggregate amount approximating the costs it expects to incur.

Environmental remediation costs related to Indiana Gas' and SIGECO's manufactured gas plants and other sites have had no material impact on results of operations or financial condition since costs recorded to date approximate PRP and insurance settlement recoveries. While the Company's utilities have recorded all costs which they presently expect to incur in connection with activities at these sites, it is possible that future events may require some level of additional remedial activities which are not presently foreseen and those costs may not be subject to PRP or insurance recovery.

-13-

Table of Contents

12. Rate & Regulatory Matters

Vectren North (Indiana Gas Company, Inc.) Gas Base Rate Filing

In May 2007, the Company filed a petition with the IURC to adjust its gas base rates and charges in its North service territory. The petition requests an increase of approximately \$41 million in rates to recover the ongoing cost of operating, maintaining and expanding the approximately 12,000-mile distribution and storage system used to serve more than 565,000 natural gas customers. Components of the increase include return on additional utility infrastructure investment, costs associated with federally mandated pipeline integrity, inspection and other reliability programs, and aging workforce. A hearing on the Company's request before the IURC is scheduled for late August 2007.

Vectren South (SIGECO) Gas Base Rate Order Received

On August 1, 2007, the Company received an order from the IURC which approved, with a minor modification, the settlement agreement previously reached with the Indiana Office of the Utility Consumer Counselor (OUCC) and other interveners regarding its Vectren South gas rate case. The order provided for a base rate increase of \$5.1 million and an allowed return on equity (ROE) of 10.15 percent, with an overall rate of return of 7.20 percent on rate base of \$121.7 million. The order also includes removal of \$2.6 million of costs from base rates to be recovered through existing tracking mechanisms.

Further, additional expenditures for a multi-year bare steel and cast iron capital replacement program will be afforded certain accounting treatment that mitigates earnings attrition from the investment between rate cases. The accounting treatment allows for the continuation of the accrual for allowance for funds used during construction (AFUDC) and the deferral of depreciation expense after the projects go in service but before they are included in base rates. To qualify for this treatment, the annual expenditures are limited to \$3.0 million and the treatment cannot extend beyond three years on each project.

With this order, the company now has in place for its South gas territory weather normalization, a conservation and decoupling tariff, tracking of gas cost expense related to bad debts and unaccounted for gas through the existing gas cost adjustment mechanism, and tracking of pipeline integrity expense. The allowed ROE of 10.15 percent recognizes these various regulatory mechanisms.

Vectren South (SIGECO) Electric Base Rate Settlement

On April 20, 2007, the Company announced it had reached a settlement agreement with the OUCC and other interveners regarding the proposed changes to the base rates and charges for its electric distribution business in southwestern Indiana. The settlement agreement provides for an approximate \$60.8 million electric rate increase to cover the Company's cost of system growth, maintenance, safety and reliability. The settlement provides for, among other things: timely recovery of certain new electric transmission investments made, ongoing costs, and deferred costs associated with the Midwest Independent System Operator (MISO); operations and maintenance (O&M) expense increases related to managing the aging workforce, including the development of expanded apprenticeship programs and the creation of defined training programs to ensure proper knowledge transfer, safety and system stability; increased O&M expense necessary to maintain and improve system reliability; customer benefit from the sale of wholesale power by Vectren sharing evenly with customers any profit earned above or below \$10.5 million of wholesale power margin; recovery of and return on the investment in demand side management programs to help encourage conservation during peak load periods; and an overall rate of return of 7.32 percent and an ROE of 10.4 percent.

A hearing before the IURC was held on May 3, 2007, with the final briefing filed on May 18, 2007 and the Company is expecting an order in the late summer.

Table of Contents

Ohio and Indiana Lost Margin Recovery/Conservation Filings

In 2005, the Company filed conservation programs and conservation adjustment trackers in Indiana and Ohio designed to help customers conserve energy and reduce their annual gas bills. The programs allow the Company to recover costs of promoting the conservation of natural gas through conservation trackers that work in tandem with a lost margin recovery mechanism. These mechanisms are designed to allow the Company to recover the distribution portion of its rates from residential and commercial customers based on the level of customer revenues established in each utility's last general rate case.

Indiana

In December 2006, the IURC approved a settlement agreement that provides for a five-year energy efficiency program. It allows the Company's Indiana utilities to recover a majority of the costs of promoting the conservation of natural gas through conservation trackers that work in tandem with a lost margin recovery mechanism. The order was implemented in the North service territory in December 2006, and provides for recovery of 85 percent of the difference between weather normalized revenues actually collected by the company and the revenues approved in the company's most recent rate case. Energy efficiency programs began in the South gas territory in December 2006, however, a similar approach regarding lost margin recovery will commence in the South gas territory now that new base rates have been approved, allowing for recovery of 100 percent of the difference between weather normalized revenues actually collected by the Company and the revenues approved in that rate case. While most expenses associated with these programs are recoverable, in the first program year the Company is required to fund \$1.5 million in program costs without recovery.

Ohio

In June 2007, the Public Utilities Commission of Ohio (PUCO) approved a settlement that provides for the implementation of a lost margin recovery mechanism and a related conservation program for the company's Ohio operations. This order confirms the guidance the PUCO previously provided in a September 2006 decision. The conservation program, as outlined in the September 2006 PUCO order and as affirmed in this order, provides for a two year, \$2 million total conservation program to be paid by the company, as well as a sales reconciliation rider intended to be a recovery mechanism for the difference between the weather normalized revenues actually collected by the company and the revenues approved by the PUCO in the company's most recent rate case. Approximately 60 percent of the company's Ohio customers are eligible for the conservation programs. The Ohio Consumer Counselor (OCC) and another intervener have requested a rehearing of the June 2007 order. In accordance with accounting authorization previously provided by the PUCO, the company began recognizing the impact of the September 2006 order on October 1, 2006, and has recognized cumulative revenues of \$2.5 million, of which \$1.2 million has been recorded in 2007. The OCC has appealed the PUCO's accounting authorization and the case is currently pending before the Ohio Supreme Court. Since October 1, 2006, the Company has been ratably accruing its \$2 million commitment.

MISO

Since February 2002 and with the IURC's approval, the Company has been a member of the Midwest Independent System Operator, Inc. (MISO), a FERC approved regional transmission organization. The MISO serves the electrical transmission needs of much of the Midwest and maintains operational control over the Company's electric transmission facilities as well as that of other Midwest utilities. Pursuant to an order from the IURC received in December 2001, certain MISO startup costs (referred to as Day 1 costs) have been deferred for future recovery in the next general rate case, which was filed in 2006.

On April 1, 2005, the MISO energy market commenced operation (the Day 2 energy market). As a result of being a market participant, the Company now bids its owned generation into the Day Ahead and Real Time markets and procures power for its retail customers at Locational Marginal Pricing (LMP) as determined by the MISO market. The Company is typically in a net sales position with MISO and is only occasionally in a net purchase position. Net

positions are determined on an hourly basis. When the Company is a net seller such net revenues are included in *Electric Utility Revenues* and when the Company is a net purchaser such net purchases are included in *Cost of Fuel and Purchased Power*.

On June 1, 2005, Vectren, together with three other Indiana electric utilities, received regulatory authority from the IURC that allows recovery of fuel related costs and deferral of other costs associated with the Day 2 energy market. The order allows fuel related costs to be passed through to customers in Vectren's existing fuel cost recovery proceedings. The other non-fuel and MISO administrative related costs are to be deferred for recovery as part of the next electric general rate case proceeding, which was filed in 2006. During 2006, the IURC reaffirmed the definition of certain costs as fuel related; the Company is following those guidelines.

-15-

Table of Contents

As a result of MISO's operational control over much of the Midwestern electric transmission grid, including SIGECO's transmission facilities, SIGECO's continued ability to import power, when necessary, and export power to the wholesale market has been, and may continue to be, impacted. Given the nature of MISO's policies regarding use of transmission facilities, as well as ongoing FERC initiatives and uncertainties around Day 2 energy market operations, it is difficult to predict near term operational impacts. However, as stated above, it is believed that MISO's regional operation of the transmission system will ultimately lead to reliability improvements.

The potential need to expend capital for improvements to the transmission system, both to SIGECO's facilities as well as to those facilities of adjacent utilities, over the next several years will become more predictable as MISO completes studies related to regional transmission planning and improvements. Such expenditures may be significant.

If the aforementioned electric rate case settlement is approved, the Company will timely recover its investment in certain new electric transmission investments, ongoing costs, and deferred costs.

Ohio Gas Cost Recovery (GCR) Audit Proceedings

In 2005, the PUCO issued an order disallowing the recovery of approximately \$9.6 million of gas costs relating to the two-year audit period ended October 2002 and in 2006, an additional \$0.8 million was disallowed related to the audit period ending October 2005. The initial audit period provided the PUCO staff its initial review of the portfolio administration arrangement between VEDO and ProLiance. Since November 1, 2005, the Company has used a provider other than ProLiance for these services.

Through a series of rehearings and appeals, including action by the Ohio Supreme Court in the first quarter of 2007, the Company was required to refund \$8.6 million to customers. The Company had previously recorded the impact of the PUCO findings, including its estimate of the share of the ultimate disallowance to be received from its partner in ProLiance. The Company does not believe that Court decisions in the first quarter of 2007 will have any material future impact on the Company's financial results.

Integrated Gasification Combined Cycle Project Involvement

In August 2007, the Company announced that it has determined to not participate in the proposed Edwardsport, Indiana, Integrated Gasification Combined Cycle (IGCC) generating plant with Duke Energy Indiana, Inc. (Duke). Based upon a review and analysis of the Company's expected electric generation requirements, the expected demand for energy on the system may be more appropriately satisfied through the use of other alternatives, including additional natural gas peaking generation, purchased power, renewable resources and increased customer conservation. The Company has paid Duke approximately \$3.0 million for engineering studies and related costs. By separate agreement with Duke, the Company expects to be reimbursed for all costs and expenses it has paid to Duke.

13. Adoption of FIN 48

The Company and/or certain of its subsidiaries file income tax returns in the U.S. federal jurisdiction and various states. The Internal Revenue Service (IRS) has conducted its examination of the Company's U.S. federal income tax returns for tax years through December 31, 2004. The State of Indiana, the Company's primary state tax jurisdiction, has conducted examinations of state income tax returns for tax years through December 31, 2002. No examinations are currently ongoing.

On January 1, 2007, the Company adopted FASB Interpretation No. 48 (FIN 48) "Accounting for Uncertainty in Income Taxes" an interpretation of SFAS 109, "Accounting for Income Taxes." FIN 48 prescribes a recognition threshold and measurement attribute for financial statement recognition and measurement of tax positions taken or expected to be taken in an income tax return. FIN 48 also provides guidance related to reversal of tax positions, balance sheet classification, interest and penalties, interim period accounting, disclosure and transition.

Table of Contents

As a result of the implementation of FIN 48, the Company recognized an approximate \$0.3 million increase in the liability for unrecognized tax benefits, of which \$0.1 million will be accounted for as a reduction to the January 1, 2007, balance of *Retained earnings* and \$0.2 million was recorded as an increase to *Goodwill*. At adoption, the total amount of gross unrecognized tax benefits for uncertain tax positions, including positions impacting only the timing of tax benefits, was \$11.6 million. During the six months ended June 30, 2007, the Company settled approximately \$1.0 million of that obligation, leaving the liability at \$10.6 million at June 30, 2007.

The amount of unrecognized tax benefits, which, if recognized, that would impact the effective tax rate as of June 30, 2007, was \$3.1 million. The remaining unrecognized tax benefit relates to tax positions for which the ultimate deductibility is highly certain but for which there is uncertainty about the timing of such deductibility. Because of the impact of deferred tax accounting, other than interest and penalties, the disallowance of the shorter deductibility period would not affect the annual effective tax rate but would accelerate the payment of cash to the taxing authority to an earlier period.

It is reasonably possible the Company will file for an accounting method change within the next twelve months that would result in an approximate \$6 million decrease to the liability. However, it is not expected that such change will have a significant earnings impact and would only affect the timing of payments to taxing authorities.

The Company accrues interest and penalties associated with unrecognized tax benefits in *Income taxes*. During both of the six months ended June 30, 2007 and June 30, 2006, the Company recognized approximately \$0.1 million. The Company had approximately \$0.4 million and \$1.0 million for the payment of interest and penalties accrued as of June 30, 2007 and December 31, 2006, respectively.

14. Segment Reporting

The Company segregates its operations into three groups: 1) Utility Group, 2) Nonutility Group, and 3) Corporate and Other.

The Utility Group is comprised of Vectren Utility Holdings, Inc.'s operations, which consist of the Company's regulated operations and other operations that provide information technology and other support services to those regulated operations. The Company segregates its regulated operations into a Gas Utility Services operating segment and an Electric Utility Services operating segment. The Gas Utility Services segment provides natural gas distribution and transportation services to nearly two-thirds of Indiana and to west central Ohio. The Electric Utility Services segment provides electric distribution services primarily to southwestern Indiana, and includes the Company's power generating and wholesale marketing operations. The Company manages its regulated operations as separated between Energy Delivery, which includes the gas and electric transmission and distribution functions, and Power Supply, which includes the power generating and marketing operations. In total, regulated operations supply natural gas and /or electricity to over one million customers. In total, the Utility Group has three operating segments as defined by SFAS 131 "Disclosure About Segments of an Enterprise and Related Information" (SFAS 131).

The Nonutility Group is comprised of one operating segment as defined by SFAS 131 that includes various subsidiaries and affiliates investing in energy marketing and services, coal mining, and energy infrastructure services, among other energy-related opportunities.

Corporate and Other includes unallocated corporate expenses such as advertising and charitable contributions, among other activities, that benefit the Company's other operating segments. Net income is the measure of profitability used by management for all operations. Information related to the Company's business segments is summarized below:

Table of Contents

<i>(In millions)</i>	Three Months Ended June 30,		Six Months Ended June 30,	
	2007	2006	2007	2006

Consolidated Net Income	\$ 16.0	\$ 4.3	\$ 86.1	\$ 61.9

15. Impact of Recently Issued Accounting GuidanceSFAS 159

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities – Including an Amendment of FASB Statement No. 115 (SFAS 159). SFAS 159 permits entities to choose to measure many financial instruments and certain other items at fair value. Items eligible for the fair value measurement option include: financial assets and financial liabilities with certain exceptions; firm commitments that would otherwise not be recognized at inception and that involve only financial instruments; nonfinancial insurance contracts and warranties that the insurer can settle by paying a third party to provide those goods or services; and host financial instruments resulting from separation of an embedded financial derivative instrument from a nonfinancial hybrid instrument. The fair value option may be applied instrument by instrument, with few exceptions, is irrevocable and is applied only to entire instruments. SFAS 159 is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007. Early adoption is permitted as of the beginning of a fiscal year that begins on or before November 15, 2007, provided the entity also elects to apply the provisions of FASB Statement No. 157, "Fair Value Measurements", and with certain other requirements. SFAS 159 permits application to eligible items existing at the effective date. The Company is currently assessing the impact this statement will have on its financial statements and results of operations.

SFAS No. 157

In September 2006, the FASB issued SFAS No. 157, "Fair Value Measurements" (SFAS 157). SFAS 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles (GAAP), and expands disclosures about fair value measurements. This statement does not require any new fair value

measurements; however, the standard will impact how other fair value based GAAP is applied. SFAS 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years with early adoption encouraged. The Company is currently assessing the impact this statement will have on its financial statements and results of operations.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Description of the Business

Vectren Corporation (the Company or Vectren), an Indiana corporation, is an energy holding company headquartered in Evansville, Indiana. The Company's wholly owned subsidiary, Vectren Utility Holdings, Inc. (Utility Holdings), serves as the intermediate holding company for three operating public utilities: Indiana Gas Company, Inc. (Indiana Gas), Southern Indiana Gas and Electric Company (SIGECO), and the Ohio operations. Utility Holdings also has other assets that provide information technology and other services to the three utilities. Utility Holdings' consolidated operations are collectively referred to as the Utility Group. Vectren and Utility Holdings are holding companies as defined by the Energy Policy Act of 2005.

Indiana Gas provides energy delivery services to approximately 565,000 natural gas customers located in central and southern Indiana. SIGECO provides energy delivery services to approximately 141,000 electric customers and approximately 112,000 gas customers located near Evansville in southwestern Indiana. SIGECO also owns and operates electric generation to serve its electric customers and optimizes those assets in the wholesale power market. Indiana Gas and SIGECO generally do business as Vectren Energy Delivery of Indiana. The Ohio operations provide energy delivery services to approximately 318,000 natural gas customers located near Dayton in west central Ohio. The Ohio operations are owned as a tenancy in common by Vectren Energy Delivery of Ohio, Inc. (VEDO), a wholly owned subsidiary, (53% ownership) and Indiana Gas (47% ownership). The Ohio operations generally do business as Vectren Energy Delivery of Ohio.

The Company, through Vectren Enterprises, Inc. (Enterprises), is also involved in nonutility activities in three primary business areas: Energy Marketing and Services, Coal Mining and Energy Infrastructure Services. Energy Marketing and Services markets and supplies natural gas and provides energy management services. Coal Mining mines and sells coal. Energy Infrastructure Services provides underground construction and repair and energy performance contracting services. Enterprises also has other businesses that invest in energy-related opportunities and services, real estate, and leveraged leases, among other investments. In addition, the Company has investments that generate synfuel tax credits and processing fees relating to the production of coal-based synthetic fuels. These operations are collectively referred to as the Nonutility Group. Enterprises supports the Company's regulated utilities pursuant to service contracts by providing natural gas supply services, coal, infrastructure services, and other services.

The Utility Group generates revenue primarily from the delivery of natural gas and electric service to its customers. The primary source of cash flow for the Utility Group results from the collection of customer bills and the payment for goods and services procured for the delivery of gas and electric services. The activities of and revenues and cash flows generated by the Nonutility Group are closely linked to the utility industry, and the results of those operations are generally impacted by factors similar to those impacting the overall utility industry. However, managing each group requires distinct competencies and business strategies since they offer different energy and energy related products and services and experience different opportunities and risks. The Company therefore analyzes the contribution to consolidated earnings of the Utility Group and Nonutility Group separately. In addition, there are other operations referred to herein as Corporate and Other that include unallocated corporate expenses such as advertising and charitable contributions, among other activities, that benefit the Utility and Nonutility Groups.

In this discussion and analysis of results of operations, the results of the Utility Group, Nonutility Group, and Corporate and Other are presented on a per share basis. Such per share amounts are based on the earnings contribution of each group included in Vectren's consolidated results divided by Vectren's basic average shares outstanding during the period. The earnings per share of the groups do not represent a direct legal interest in the assets and liabilities allocated to the groups, but rather represent a direct equity interest in Vectren Corporation's assets and liabilities as a whole.

The Company has in place a disclosure committee that consists of senior management as well as financial management. The committee is actively involved in the preparation and review of the Company's SEC filings.
