**NEWS RELEASE**

**Enbridge announces quarterly interest distribution for Preferred Securities**

**CALGARY, Alberta, March 1, 2006** Enbridge Inc. today announced that a quarterly interest distribution of \$0.4875 per security will be paid on the company's 7.80% Preferred Securities, Series D, on March 31, 2006, to holders of record at the close of business on March 15, 2006.

Enbridge Inc., a Canadian company, is a leader in energy transportation and distribution in North America and internationally. As a transporter of energy, Enbridge operates, in Canada and the U.S., the world's longest crude oil and liquids transportation system. As a distributor of energy, Enbridge owns and operates Canada's largest natural gas distribution company, and provides distribution services in Ontario, Quebec, New Brunswick and New York State. The Company also has international operations and a growing involvement in the natural gas transmission and midstream businesses.

Enbridge's common shares trade on the Toronto Stock Exchange in Canada and on the New York Stock Exchange in the United States under the symbol ENB. Information about Enbridge is available on the Company's web site at [www.enbridge.com](http://www.enbridge.com).

**NEWS RELEASE**

**Enbridge's Spearhead Pipeline delivers Canadian crude oil to Cushing, Oklahoma**

**CALGARY, Alberta, and CUSHING, Oklahoma, March 2, 2006** Enbridge Inc. (TSX/NYSE: ENB) announced today that the first Western Canadian crude oil will officially be delivered through its Spearhead Pipeline to Cushing, Oklahoma this morning. This event marks the inauguration of an economic path for substantial volumes of Canadian crude oil to penetrate the most significant trading hub in the United States.

A number of Enbridge Inc. senior executives, customers and other dignitaries will celebrate the first oil of Spearhead at a special inaugural valve-turning ceremony today at the Cushing crude oil terminal.

The crude oil being delivered to Cushing originates in the Canadian oil sands located in northern Alberta. The oil sands contain 175 billion barrels of reserves, second only to Saudi Arabia. The oil enters the Enbridge mainline system at Edmonton, Alberta, and travels 1,565 miles (2,519 kilometers) to Chicago, before entering the Spearhead Pipeline for the final 650-mile (1046-kilometer) lap to Cushing. The transit time from Edmonton to Cushing averages approximately 47 days.

This event marks the beginning of a new era of North American crude supply, said Patrick D. Daniel, Enbridge president and chief executive officer. Canada is already the largest supplier of crude oil to U.S. markets at 1.6 million barrels per day. Canadian exports have the potential to double during the next 10 years if attractive markets for the production can be established.

The Spearhead Pipeline is one component of Enbridge's broader plan to provide access for Canadian production to new markets in the United States, added Mr. Daniel. This will enable more U.S. refineries to receive reliable supplies of Canadian crude oil while providing Canadian producers with the favorable netbacks required to make this crude oil economic to produce. For example, in recent weeks, the price of heavy crude oil in Cushing ran at about \$10 higher per barrel than Canadian heavy crude sells for in Chicago. The spot toll to move a barrel from Chicago to Cushing on Spearhead is only \$1.50. As a result, we anticipate that throughput will rapidly reach the 125,000 barrels per day initial capacity on the line.

We also have received strong interest in expanding the line, which we can do very economically, continued Mr. Daniel. We will respond with all the capacity that shippers require through a combination of a near-term power-up to 190,000 barrels per day and a longer term looping program, the first phase of which would provide a further 100,000 barrels per day.

The Spearhead Pipeline is the spearhead of Enbridge's market access initiatives. Other components of Enbridge's plan include the Southern Access and Alberta Clipper mainline expansion projects and the Southern Access extension. The combination of these pipeline projects will provide the lowest toll and greatest delivery and storage flexibility for shippers and will enable substantial additional volumes of oil sands production to supply U.S. refineries in Chicago and beyond and as far south as the U.S. Gulf Coast.

Note: A high resolution map of the Spearhead Pipeline is available on Enbridge's web site at [www.enbridge.com](http://www.enbridge.com)  
*Enbridge Inc., a Canadian company, is a leader in energy transportation and distribution in North America and internationally. **NEWS RELEASE**

**Enbridge's Southern Access expansion tolls approved by FERC**

**CALGARY, Alberta and HOUSTON, Texas, March 23, 2006** Enbridge Inc. (TSX/NYSE:ENB) and Enbridge Energy Partners, L.P. (NYSE:EEP) (the Partnership) are pleased to advise that the U.S. Federal Energy Regulatory Commission (FERC) has approved an Offer of Settlement (Settlement) with respect to tolls for the Southern Access expansion. The Settlement was filed with FERC in December 2005 with the support of the Canadian Association of Petroleum Producers and shippers. The FERC order approves the Settlement as "...fair and reasonable and in the public interest.

The Settlement allows the Lakehead System to recover through a surcharge the costs associated with Southern Access expansion in addition to its existing base rates. The surcharge will be a transparent, cost-of-service-based tariff mechanism that the Partnership will true-up each year to actual costs and throughput. The decision marks the conclusion of a critical step toward the completion of the Southern Access expansion. With the toll design approved, Enbridge will continue with permitting and construction in order to have the facilities fully in service in early 2009.

The Southern Access expansion program includes expansions on Enbridge's Canadian mainline from Hardisty, Alberta to the international border near Neche, North Dakota and new pipeline construction in the U.S. by the Partnership.

The U.S. portion of the expansion will add a total of 400,000 barrels per day of capacity at an estimated cost of US\$1,040 million (in 2005 dollars). This portion of the expansion will be undertaken on the Partnership's Lakehead System, with the first stage to add 44,000 barrels per day of capacity in 2007 and an additional 146,000 barrels per day by early 2008, with the final 210,000 barrels per day stage completed in early 2009. The new pipeline will be built between Superior, Wisconsin and Flanagan, Illinois, just west of Chicago. At Flanagan, the new line will have access to Chicago and will interconnect with Enbridge Inc.'s Spearhead Pipeline that began delivering to Cushing, Oklahoma on March 1, 2006.

Additional information on the Southern Access Program is posted at [www.southernaccess.com](http://www.southernaccess.com).

## **ABOUT ENBRIDGE ENERGY PARTNERS**

Enbridge Energy Partners, L.P. owns and operates a diversified portfolio of crude oil and natural gas transportation systems in the U.S. Its principal crude oil system is the largest transporter of growing oil production from western Canada. The system's deliveries to refining centers in the U.S. Midwest account for approximately 10 percent of total U.S. oil imports; while deliveries to Ontario, Canada satisfy approximately 60 percent of refinery demand in that region. The Partnership's natural gas gathering, treating, processing and transmission assets, which are principally located onshore in the active U.S. Mid-Continent and Gulf Coast area, deliver more than 2 billion cubic feet of natural gas daily. Enbridge Energy Management, L.L.C. (NYSE:EEQ) ([www.enbridgemanagement.com](http://www.enbridgemanagement.com)) manages the business and affairs of the Partnership and its principal asset is an approximate 18 percent interest in the Partnership. Enbridge Energy Company, Inc., an indirect wholly owned subsidiary of Enbridge Inc. is the general partner and holds an approximate 11 percent interest in the Partnership.

## **ABOUT ENBRIDGE INC.**

Enbridge Inc. ([www.enbridge.com](http://www.enbridge.com)) is a leader in energy transportation and distribution in North America and internationally. As a transporter of energy, Enbridge operates, in Canada and the United States, the world's longest crude oil and liquids pipeline system. Enbridge also has international operations and a growing involvement in the natural gas transmission and midstream businesses. As a distributor of energy, Enbridge owns and operates Canada's largest natural gas distribution company, which provides distribution services in the provinces of Ontario, Quebec and New Brunswick, and in New York State. Enbridge is a Canadian company and its common shares trade on the Toronto Stock Exchange in Canada and on the New York Stock Exchange in the United States under the symbol ENB.

## **LEGAL NOTICE**

*When used in this news release, words such as anticipates, expects, plans, will and similar expressions are intended to identify forward-looking statements. Such statements are subject to certain risks, uncertainties and assumptions pertaining to factors such as: (1) changes in the demand for, or the supply of, and price trends related to crude oil and natural gas liquids; including the rate of development of the Alberta Oil Sands; (2) changes in or challenges to Enbridge Partners' tariff rates; (3) the effects of competition, including by other pipeline systems; (4) regulatory approvals; and (5) performance of other parties. Reference should also be made to Enbridge Partners' filings with the U.S. Securities and Exchange Commission, including its Annual Report on Form 10-K for the most recently completed fiscal year, for additional factors that may affect results. These filings are available to the public over the Internet at the SEC's web site ([www.sec.gov](http://www.sec.gov)) and via Enbridge Partners' web site.*
