

CONNS INC
Form 10-Q
December 03, 2012

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended October 31, 2012

Commission File Number 000-50421

CONN'S, INC.

(Exact name of registrant as specified in its charter)

A Delaware Corporation
(State or other jurisdiction of incorporation or
organization)

06-1672840
(I.R.S. Employer Identification Number)

4055 Technology Forest Blvd., Suite 210
The Woodlands, Texas 77381
(936) 230-5899
(Address, including zip code, and telephone
number, including area code, of registrant's
principal executive offices)

None
(Former name, former address and former
fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check One):

Edgar Filing: CONNS INC - Form 10-Q

Large accelerated filer ☐ Accelerated filer ☒ Non-accelerated filer ☐ smaller reporting company ☐
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act).
Yes ☐ No ☒

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of November 23, 2012:

Class	Outstanding
Common stock, \$.01 par value per share	32,701,546

CONN'S, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

1. Summary of Significant Accounting Policies

Basis of Presentation. The accompanying unaudited consolidated financial statements of Conn's, Inc. and subsidiaries (the "Company") have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States for complete financial statements. The accompanying financial statements reflect all adjustments that are, in the opinion of management, necessary for a fair presentation of the results for the interim periods presented. All such adjustments are of a normal recurring nature, except as otherwise described herein. The Company's business is somewhat seasonal, with a higher portion of sales and operating profit realized during the quarter that ends January 31, due primarily to the holiday selling season. Operating results for the nine-month period ended October 31, 2012 are not necessarily indicative of the results that may be expected for the fiscal year ending January 31, 2013. The financial statements should be read in conjunction with the Company's audited consolidated financial statements and the notes thereto included in the Company's Annual Report on Form 10-K for the year ended January 31, 2012, filed with the Securities and Exchange Commission on April 12, 2012.

The Company's balance sheet at January 31, 2012, has been derived from the audited financial statements at that date, but does not include all of the information and footnotes required by accounting principles generally accepted in the United States for a complete financial presentation. Please review the Company's Annual Report on Form 10-K for a complete presentation of the audited financial statements for the fiscal year ended January 31, 2012, together with all required footnotes, and for a complete presentation and explanation of the components and presentations of the financial statements.

Principles of Consolidation. The consolidated financial statements include the accounts of Conn's, Inc. and its wholly-owned subsidiaries including a bankruptcy-remote, variable-interest entity ("VIE") further discussed below. Conn's, Inc. is a holding company with no independent assets or operations other than its investments in its subsidiaries. All material intercompany transactions and balances have been eliminated in consolidation.

In April of 2012, the Company transferred certain customer receivables to a VIE in connection with a securitization. The VIE issued debt secured by the customer receivables that were transferred to it, which are included in customer accounts receivable and long-term portion of customer accounts receivable on the consolidated balance sheet.

The Company determined that the VIE should be consolidated within its financial statements due to the fact that it qualified as the primary beneficiary of the VIE based on the following considerations:

- The Company directed the activities that generated the customer receivables that were transferred to the VIE;
- The Company directs the servicing activities related to the collection of the customer receivables transferred to the VIE;
- The Company absorbs losses incurred by the VIE to the extent of its interest in the VIE before any other investors incur losses; and
- The Company has the right to receive benefits generated by the VIE after paying the contractual amounts due to the other investors.

The investors and the securitization trustee have no recourse to the Company's other assets for failure of the VIE to repay the amounts due to them. Additionally, the Company has no recourse to the VIE's assets to satisfy its

obligations. The Company's interests are subordinate to the investors' interests, and will not be paid if the VIE is unable to repay the amounts due. The ultimate realization of the Company's interest is subject to credit, prepayment, and interest rate risks on the transferred financial assets.

Use of Estimates. The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Table of Contents

Earnings per Share. Basic earnings per share is calculated by dividing net income by the weighted average number of common shares outstanding. Diluted earnings per share include the dilutive effects of any stock options and restricted stock units granted, to the extent not anti-dilutive, which is calculated using the treasury-stock method. The following table sets forth the shares outstanding for the earnings per share calculations:

(in thousands)	Three Months Ended October 31,	
	2012	2011
Weighted average common shares outstanding - Basic	32,553	31,881
Assumed exercise of stock options	829	-
Unvested restricted stock units	157	-
Weighted average common shares outstanding - Diluted	33,539	31,881

	Nine Months Ended October 31,	
	2012	2011
Weighted average common shares outstanding - Basic	32,387	31,819
Assumed exercise of stock options	689	-
Unvested restricted stock units	131	-
Weighted average common shares outstanding - Diluted	33,207	31,819

The weighted average number of stock options and restricted stock units not included in the calculation due to their anti-dilutive effect was 0.3 million and 2.2 million for each of the three months ended October 31, 2012 and 2011, respectively, and 0.7 million and 2.4 million for each of the nine months ended October 31, 2012 and 2011, respectively.

Fair Value of Financial Instruments. The fair value of cash and cash equivalents and accounts payable approximate their carrying amounts because of the short maturity of these instruments. [The fair value of customer accounts receivables, determined using a discounted cash flow analysis, approximates their carrying amount]. The fair value of the Company's debt approximates carrying value. The Company's interest rate cap options are reflected in the balance sheet at fair value. Fair value of these instruments were determined using Level 2 inputs of the GAAP hierarchy, which are defined as inputs not quoted in active markets, but are either directly or indirectly observable.

2. Charges and Credits

The Company recorded the following charges and credits during the first nine months of fiscal years 2013 and 2012:

Fiscal year 2013:

Third quarter:

- The Company relocated certain of its corporate operations from Beaumont to The Woodlands, Texas in the third quarter of fiscal year 2013. The Company incurred \$641 thousand in pre-tax costs (\$415 thousand after-tax) in connection with the relocation. This amount is reported within the retail segment and classified in charges and credits in the consolidated statement of operations.
- As further discussed in Note 6, the Company amended and restated its asset-based loan facility with a syndicate of banks on September 26, 2012. In connection with the transaction, the Company expensed \$818 thousand (\$530

thousand after-tax) of previously deferred transaction costs associated with lenders which are no longer in the current syndicate of banks. This amount is reported within the credit segment and classified in loss on extinguishment of debt in the consolidated statement of operations.

Second quarter:

- The Company incurred \$346 thousand in pre-tax costs (\$224 thousand after-tax) in connection with the relocation of certain of its corporate operations from Beaumont to The Woodlands, Texas. This amount is reported within the retail segment and classified in charges and credits in the consolidated statement of operations.

Table of Contents

First quarter:

- The Company accrued the lease buyout costs related to one of its store closures and revised its estimate of future obligations related to its other closed stores. This resulted in a pre-tax charge of \$163 thousand (\$106 thousand after-tax). This amount is reported within the retail segment and classified in charges and credits in the consolidated statement of operations.

Fiscal year 2012:

Third quarter:

- The Company recorded a pre-tax charge of \$14,137 thousand (\$9,743 thousand after-tax), net of previously provided reserves, in connection with the required adoption of new accounting guidance related to Troubled Debt Restructuring. This amount is reported within the credit segment and classified in provision for bad debts and finance charges and other in the consolidated statement of operations.
- The Company re-evaluated its inventory valuation reserve based on recent experience selling aged items, both through store locations and external sources. This resulted in a pre-tax charge of \$4,669 thousand (\$3,218 thousand after-tax). This amount is reported within the retail segment and classified in cost of goods sold, including warehousing and occupancy costs in the consolidated statement of operations.
- The Company revised its estimate of previously provided reserves for future lease obligations of closed stores and recorded a pre-tax credit of \$313 thousand (\$216 thousand after-tax). This amount is reported within the retail segment and classified in charges and credits in the consolidated statement of operations.
- Property and equipment are evaluated for impairment at the retail store level. The Company performs a periodic assessment of assets for impairment. A pre-tax impairment charge of \$688 thousand (\$474 thousand after-tax) was recorded for the period ended October 31, 2011. This amount is reported within the retail segment and classified in charges and credits in the consolidated statement of operations.

Second quarter:

- The Company closed three underperforming retail locations and recorded pre-tax charges of \$3,658 thousand (\$2,230 thousand after-tax) related primarily to future lease obligations. This amount is reported within the retail segment and classified in charges and credits in the consolidated statement of operations.
- The Company recorded a pre-tax charge of \$11,056 thousand (\$6,580 thousand after-tax) in connection with the prepayment of an existing term loan. This amount is reported within the credit segment and classified in loss on extinguishment of debt in the consolidated statement of operations.

First quarter:

- The Company recorded a pre-tax charge of \$813 thousand (\$513 thousand after-tax) associated with employee severance costs. On a pre-tax basis, \$407 thousand is reported within the retail segment and the balance is reported in the credit segment and is classified in selling, general and administrative expenses in the consolidated statement of operations.

3. Supplemental Disclosure of Customer Receivables

Customer accounts receivable are originated at the time of sale and delivery of the various products and services. The Company records the amount of principal and accrued interest on customer receivables that is expected to be collected within the next twelve months, based on contractual terms, in current assets on its consolidated balance sheet. Those amounts expected to be collected after twelve months, based on contractual terms, are included in long-term assets.

Typically, customer receivables are considered delinquent if a payment has not been received on the scheduled due date.

As part of its efforts in mitigating losses on its accounts receivable, the Company may make loan modifications for a borrower experiencing financial difficulty that are intended to maximize the net cash flow after expenses, and avoid the need for repossession of collateral. The Company may extend the loan term, refinance or otherwise re-age an account. In the quarter ended October 31, 2011, the Company adopted new accounting guidance that provides clarification on whether a debtor is experiencing financial difficulties and whether a concession has been granted to the debtor for purposes of determining if a loan modification constitutes a Troubled Debt Restructuring ("TDR"). The adoption was applied retrospectively to its loan restructurings after January 31, 2011. The Company defines TDR accounts that originated subsequent to January 31, 2011 as accounts that have been re-aged cumulatively in excess of three months or refinanced. For accounts originating prior to January 31, 2011, if the cumulative re-aging exceeds three months and the accounts were re-aged subsequent to January 31, 2011, the account is considered a TDR.

Table of Contents

The Company monitors the performance of customer accounts receivable and from time-to-time modifies its policies to improve the long-term portfolio performance. During the quarter ended July 31, 2011, the Company implemented a policy which limited the number of months that an account can be re-aged to a maximum of 18 months and further modified the policy to a maximum of 12 months in the third quarter of fiscal year 2012. As of July 31, 2011, the Company modified its charge-off policy so that an account that is delinquent more than 209 days as of the end of a month is charged-off against the allowance for doubtful accounts and interest accrued subsequent to the last payment is reversed and charged against the allowance for uncollectible interest. Prior to July 31, 2011, the Company charged off all accounts for which no payment had been received in the past seven months, if the account was also delinquent more than 120 days.

The Company segregates the population of accounts within its receivables portfolio into two classes – those with origination credit scores less than 575 and those with origination scores equal to or greater than 575. The Company uses credit scoring criteria to differentiate underwriting requirements, potentially requiring differing down payment and initial application and documentation criteria. The following tables present quantitative information about the receivables portfolio managed by the Company, segregated by class:

(in thousands)	Customer Accounts		Total Outstanding Balance			
	Receivable		60 Days Past Due(1)		Re-aged(1)	
	October 31, 2012	January 31, 2012	October 31, 2012	January 31, 2012	October 31, 2012	January 31, 2012
Customer accounts receivable:						
>= 575 credit score at origination	\$533,349	\$479,301	\$26,795	\$23,424	\$30,454	\$26,005
< 575 credit score at origination	113,238	115,128	10,090	11,278	10,370	14,033
	646,587	594,429	36,885	34,702	40,824	40,038
Restructured accounts(2):						
>= 575 credit score at origination	23,660	27,760	6,473	11,428	23,634	27,749
< 575 credit score at origination	13,497	21,112	4,333	9,060	13,379	21,076
	37,157	48,872	10,806	20,488	37,013	48,825
Total receivables managed	683,744	643,301	\$47,691	\$55,190	\$77,837	\$88,863
Allowance for uncollectible accounts related to the credit portfolio	(44,517)	(49,904)				
Allowance for promotional credit programs	(6,187)	(4,074)				
Current portion of customer accounts receivable, net	(345,546)	(316,385)				
Long-term customer accounts receivable, net	\$287,494	\$272,938				

(1) Amounts are based on end of period balances. As an account can become past due after having been re-aged, accounts may be presented in both the past due and re-aged columns shown above. The amounts included within both the past due and re-aged columns shown above as of October 31, 2012 and January 31, 2012 were \$18.3 million and \$32.5 million, respectively. The total amount of customer receivables past due one day or greater was \$156.2 million and \$152.4 million as of October 31, 2012 and January 31, 2012, respectively. These amounts include the 60 days past due totals shown above.

(2) In addition to the amounts included in restructured accounts, there are \$2.4 million and \$7.9 million as of October 31, 2012 and January 31, 2012, respectively, of accounts re-aged four or more months included in the re-aged balance above that did not qualify as TDRs because they were not re-aged subsequent to January 31, 2011.

Total receivables managed	\$674,517	\$603,975	\$12,866	\$7,466	\$652,868	\$623,514	\$40,024	\$34,435

(1) Charge-offs include the principal amount of losses (excluding accrued and unpaid interest) net of recoveries which include principal collections during the period shown of previously charged-off balances.

Following is the activity in the Company's balance in the allowance for doubtful accounts and uncollectible interest for customer receivables for the nine-month periods ended October 31, 2012 and 2011:

Nine Months Ended October 31, 2012				
(in thousands)	Customer Accounts Receivable	Restructured Accounts	Total	Nine Months Ended October 31, 2011
Allowance at beginning of period	\$ 24,518	\$ 25,386	\$ 49,904	\$ 44,015
Provision(1)	30,506	10,760	41,266	48,473
Principal charge-offs(2)	(26,281)	(16,684)	(42,965)	(36,918)
Interest charge-offs	(4,054)	(2,575)	(6,629)	(6,501)
Recoveries(2)	1,799	1,142	2,941	2,482
Allowance at end of period	\$ 26,488	\$ 18,029	\$ 44,517	\$ 51,551

(1) Includes provision for uncollectible interest, which is included in finance charges and other.

(2) Charge-offs include the principal amount of losses (excluding accrued and unpaid interest), and recoveries include principal collections during the period shown of previously charged-off balances. These amounts represent net charge-offs.

The Company records an allowance for doubtful accounts, including estimated uncollectible interest, for its customer accounts receivable, based on its historical cash collections and net loss experience and expectations for future cash collections and losses. In addition to pre-charge-off cash collections and charge-off information, estimates of

post-charge-off recoveries, including cash payments, amounts realized from the repossession of the products financed and, at times, payments received under credit insurance policies are also considered.

The Company determines reserves for those accounts that are TDRs based on the present value of cash flows expected to be collected over the life of those accounts. The excess of the carrying amount over the discounted cash flow amount is recorded as a reserve for loss on those accounts. The Company estimates its allowance for bad debts by evaluating the credit portfolio based on the number of months re-aged, if any.

The Company typically only places accounts in non-accrual status when legally required. Interest accrual is resumed on those accounts once a legally-mandated settlement arrangement is reached or other payment arrangements are made with the customer. Customer receivables in non-accrual status were \$8.7 million and \$9.8 million at October 31, 2012 and January 31, 2012, respectively. Customer receivables that were past due 90 days or more and still accruing interest totaled \$35.0 million and \$39.5 million at October 31, 2012 and January 31, 2012, respectively.

Table of Contents

4. Supplemental Disclosure of Finance Charges and Other Revenue

The following is a summary of the classification of the amounts included as finance charges and other for the three and nine months ended October 31, 2012 and 2011:

(in thousands)	Three Months Ended October 31,		Nine Months Ended October 31,	
	2012	2011	2012	2011
Interest income and fees on customer receivables	\$32,458	\$27,222	\$90,915	\$87,514
Insurance commissions	6,280	4,385	17,001	13,426
Other	340	60	857	678
Finance charges and other	\$39,078	\$31,667	\$108,773	\$101,618

The amount included in interest income and fees on customer receivables related to TDR accounts was \$0.9 million and \$1.2 million for the three months ended October 31, 2012 and 2011, respectively, and \$3.1 million and \$2.6 million for the nine months ended October 31, 2012 and 2011, respectively. The Company recognizes interest income on TDR accounts using the interest income method, which requires reporting interest income equal to the increase in the net carrying amount of the loan attributable to the passage of time. Cash proceeds and other adjustments are applied to the net carrying amount such that it always equals the present value of expected future cash flows.

5. Accrual for Store Closures

During the fiscal year ended January 31, 2012, the Company closed 11 retail locations that did not perform at the level the Company expects for mature store locations. As a result of the closure of eight stores with unexpired leases, the Company recorded an accrual in fiscal 2012 for the present value of remaining lease obligations and anticipated ancillary occupancy costs, net of estimated sublease income. Revisions to these projections for changes in estimated marketing times or sublease rates are made to the obligation as further information related to the actual terms and costs become available. The estimate was calculated using Level 2 fair value inputs of the GAAP hierarchy, which are defined as inputs not quoted in active markets, but are either directly or indirectly observable. The changes in the liability recorded for store closures for the nine months ended October 31, 2012 were as follows:

(in thousands)	
Balance at January 31, 2012	\$ 8,106
Accrual for closure	450
Change in estimate	(287)
Cash payments	(3,292)
Balance at October 31, 2012	\$ 4,977

The change in estimate results from the favorable impact of the termination of a lease and is partially offset by changes in sublet assumptions for certain locations and accretion of the present value of the expected future rental payments. The cash payments include payments made for facility rent and related costs.

6. Debt and Letters of Credit

The Company's long-term debt consisted of the following at the period ended:

(in thousands)	October 31, 2012	January 31, 2012
Asset-based revolving credit facility	\$ 272,168	\$ 313,250

Edgar Filing: CONNS INC - Form 10-Q

Asset-backed notes, net of discount of \$317	50,928	-
Real estate loan	7,506	7,826
Other long-term debt	383	628
Total debt	330,985	321,704
Less current portion of debt	51,589	726
Long-term debt	\$ 279,396	\$ 320,978

Table of Contents

On September 26, 2012, the Company amended and restated its asset-based revolving credit facility with a syndicate of banks, increasing the capacity from \$450 million to \$525 million and extending the maturity date from July 2015 to September 2016. The Company's asset-based revolving credit facility provides funding based on a borrowing base calculation that includes customer accounts receivable and inventory. The amended and restated credit facility bears interest at LIBOR plus a spread ranging from 275 basis points to 350 basis points, based on a leverage ratio (defined as total liabilities to tangible net worth). In addition to the leverage ratio, the revolving credit facility includes a fixed charge coverage requirement, a minimum customer receivables cash recovery percentage requirement and a net capital expenditures limit. Additionally, the agreement contains cross-default provisions, such that, any default under another of the Company's credit facilities would result in a default under this agreement, and any default under this agreement would result in a default under those agreements.

On April 30, 2012, the Company's VIE issued \$103.7 million of asset-backed notes which bear interest at 4.0% and were sold at a discount to deliver a 5.21% yield, before considering transaction costs. The principal balance of the notes, which are secured by certain customer receivables, is reduced on a monthly basis by collections on the underlying customer receivables after the payment of interest and other expenses of the VIE. While the final maturity for the notes is April 2016, the Company currently expects to repay any outstanding note balance in April 2013 and, therefore, has classified the outstanding principal within the current portion of long-term debt. Additionally, the notes include a prepayment incentive fee whereby if the notes are not repaid by the expected final principal payment date of April 15, 2013, the VIE will be required to pay, in addition to accrued interest on the notes, a monthly fee equal to an annual rate of 8.5% times the outstanding principal balance. The VIE's borrowing agreement contains certain covenants, including the maintenance of a minimum net worth for the VIE. The VIE's debt is secured by the customer accounts receivable that were transferred to it, which are included in customer accounts receivable and long-term portion of customer accounts receivable on the consolidated balance sheet. At October 31, 2012, the VIE held cash of \$6.4 million from collections on underlying customer receivables which is classified within prepaid expenses and other assets on the consolidated balance sheet. The investors and the securitization trustee have no recourse to the Company's other assets for failure of the VIE to pay the notes when due or any other of its obligations. Additionally, the VIE's assets are not available to satisfy the Company's obligations. The Company's interests in the VIE are subordinate to the investors' interests, and would not be paid if the VIE is unable to repay the amounts due. The ultimate realization of the Company's interest is subject to credit, prepayment, and interest rate risks on the transferred financial assets. Net proceeds from the offering were used to repay borrowings under the Company's asset-based revolving credit facility.

The Company was in compliance with its debt covenants at October 31, 2012.

As of October 31, 2012, the Company had immediately available borrowing capacity of approximately \$157.5 million under its asset-based revolving credit facility, net of standby letters of credit issued, for general corporate purposes. The Company also had \$91.0 million that may become available under its asset-based revolving credit facility if it grows the balance of eligible customer receivables and its total eligible inventory balances.

The Company's asset-based revolving credit facility provides it the ability to utilize letters of credit to secure its deductibles under the Company's property and casualty insurance programs and its obligations to remit payments collected as servicer of the VIE's receivables, among other acceptable uses. At October 31, 2012, the Company had outstanding letters of credit of \$4.3 million under this facility. The maximum potential amount of future payments under these letter of credit facilities is considered to be the aggregate face amount of each letter of credit commitment, which totals \$4.3 million as of October 31, 2012.

7. Contingencies

The Company is involved in routine litigation and claims incidental to its business from time to time, and, as required, has accrued its estimate of the probable costs for the resolution of these matters, which are not expected to be material. These estimates have been developed in consultation with counsel and are based upon an analysis of potential results, assuming a combination of litigation and settlement strategies. Recently, the Company has been included in various patent infringement claims and litigation, the outcomes of which are difficult to predict at this time. Due to the timing of these matters, the Company has determined that no reasonable estimates of probable costs for resolution can be ascertained at this time, and it is possible, however, that future results of operations for any particular period could be materially affected by changes in the Company's assumptions or the effectiveness of its strategies related to these proceedings. However, the results of these proceedings cannot be predicted with certainty, and changes in facts and circumstances could impact the Company's estimate of reserves for litigation.

(1) Selling, general and administrative expenses include the direct expenses of the retail and credit operations, allocated overhead expenses and a charge to the credit segment to reimburse the retail segment for expenses it incurs related to occupancy, personnel, advertising and other direct costs of the retail segment which benefit the credit operations by sourcing credit customers and collecting payments. The reimbursement received by the retail segment from the credit segment is estimated using an annual rate of 2.5% times the average portfolio balance for each applicable period. The amount of overhead allocated to each segment was approximately \$2.3 million and \$1.7 million for the three months ended October 31, 2012 and 2011, respectively, and approximately \$6.5 million and \$6.0 million for the nine months ended October 31, 2012 and 2011, respectively. The amount of reimbursement made to the retail segment by the credit segment was approximately \$4.2 million and \$3.8 million for the three months ended October 31, 2012 and 2011, respectively, and approximately \$12.2 million and \$11.7 million for the nine months ended October 31, 2012 and 2011, respectively.

(2) Provision for bad debts for the three and nine months ended October 31, 2011 includes a pre-tax charge of \$13.1 million due to the implementation of required accounting guidance related to Troubled Debt Restructuring.

Table of Contents

9. Subsequent Event

On November 27, 2012, the Company added an additional lender to its asset-based loan facility. As a result, total commitments under the facility increased \$20.0 million to \$545.0 million.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Statements

This report contains forward-looking statements that involve risks and uncertainties. Such forward-looking statements include information concerning our future financial performance, business strategy, plans, goals and objectives. Statements containing the words “anticipate,” “believe,” “could,” “estimate,” “expect,” “intend,” “may,” “plan,” “should,” or the negative of such terms or other similar expressions are generally forward-looking in nature and not historical facts. Although we believe that the expectations, opinions, projections, and comments reflected in these forward-looking statements are reasonable, we can give no assurance that such statements will prove to be correct. A wide variety of potential risks, uncertainties, and other factors could materially affect our ability to achieve the results either expressed or implied by our forward-looking statements including, but not limited to: general economic conditions impacting our customers or potential customers; our ability to continue existing or offer new customer financing programs; changes in the delinquency status of our credit portfolio; higher than anticipated net charge-offs in the credit portfolio; the success of our planned opening of new stores and the updating of existing stores; technological and market developments and sales trends for our major product offerings; our ability to fund our operations, capital expenditures, debt repayment and expansion from cash flows from operations, borrowings from our revolving credit facility, and proceeds from accessing debt or equity markets; and the other risks detailed from time-to-time in our United States Securities and Exchange Commission (“SEC”) reports, including but not limited to, our Annual Report on Form 10-K for our fiscal year ended January 31, 2012. You are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date of this report. Except as required by law, we are not obligated to publicly release any revisions to these forward-looking statements to reflect events or circumstances after the date of this report or to reflect the occurrence of unanticipated events.

General

We are a specialty retailer of durable consumer products, and we also provide credit to support our customers' purchases of the products that we offer. We derive our revenue from two primary sources: retail sales and delivery of consumer goods, including sales of third-party repair service agreements; and our in-house customer credit program, including sales of credit insurance products. We operate a highly integrated and scalable business through our retail stores and our website, providing our customers with a broad range of brand name products, in-house and third-party financing options, next-day delivery capabilities, and product repair service through well-trained and knowledgeable sales, credit and service personnel.

We currently operate 66 retail locations with 57 stores in Texas, six in Louisiana, two in Oklahoma and one in New Mexico. The Company's primary product categories include:

- Home appliance, including refrigerators, freezers, washers, dryers, dishwashers, ranges and window room air conditioners;
- Furniture and mattress, including furniture for the living room, dining room, bedroom and related accessories and mattresses;
- Consumer electronic, including LCD, LED, 3-D and plasma televisions, camcorders, digital cameras, Blu-ray players, video game equipment, portable audio and home theater products; and
 - Home office, including desktop and notebook computers, tablets, printers and computer accessories.

Additionally, we offer a variety of products on a seasonal basis, including lawn and garden equipment, and continue to introduce additional product categories for the home to respond to customers product needs and to increase same store sales. We require our sales associates to be knowledgeable of all of our products.

Our business is moderately seasonal, with a greater share of our revenues, operating and net income historically realized during the quarter ending January 31, due primarily to the holiday selling season.

Unlike many of our competitors, we provide flexible in-house credit options for our customers. In the last three years, we financed, on average, approximately 61% of our retail sales through our internal credit programs. We offer our customers an interest-bearing installment financing program and, at times, we offer promotional credit programs to certain of our customers that provide for “same as cash” or deferred interest interest-free periods of varying terms, generally three, six and 12 months, and require monthly payments beginning in the month after the sale. In addition to our own credit programs, we use third-party financing programs, including a Conn’s-branded revolving charge card and non-interest bearing financing with terms greater than 12 months, for purchases made by our customers. We also use a third-party provider to offer a rent-to-own payment option to our customers.

Table of Contents

Operational Changes and Operating Environment

We have implemented, continued to focus on, or modified operating initiatives that we believe should positively impact future results, including:

- Opening expanded Conn's HomePlus stores in new markets. We opened one new store in Waco, Texas in June, another new store in Albuquerque, New Mexico in November and plan to open three additional stores in the fourth quarter of fiscal year 2013 - two in new markets;
- Remodeling existing stores utilizing the new Conn's HomePlus format to increase retail square footage and improve our customers shopping experience;
 - Expanding and enhancing our product offering of higher-margin furniture and mattresses;
 - Focusing on higher-price, higher-margin products to improve operating performance;
- Reviewing our existing store locations to ensure the customer demographics and retail sales opportunity are sufficient to achieve our store performance expectations, and selectively closing or relocating stores to achieve those goals. In this regard, we closed 11 retail locations in fiscal 2012 that did not perform at the level we expect for mature store locations and closed one additional store in May 2012;
- Augmenting our credit offerings through the use of third-party consumer credit providers to provide flexible financing options to meet the varying needs of our customers, while focusing the use of our credit program to offer credit to customers where third-party programs are not available; and
- Limiting the number of months an account can be re-aged and reducing the period of time a delinquent account can remain outstanding before it is charged off. Additionally, we have shortened contract terms for higher-risk products and smaller-balances originated. We have increased credit lines to higher credit scored customers to allow them to purchase additional products given our furniture and mattress offerings expansion. In total, these changes are expected to continue to improve the performance of our portfolio and increase the cost-effectiveness of our collections operation.

While we have benefited from our operations being concentrated in the Texas, Louisiana and Oklahoma region in the past, continued weakness in the national and state economies, including instability in the financial markets and the volatility of oil and natural gas prices, have and will present significant challenges to our operations in the coming quarters.

- (1) Includes installment accounts only. Balances included in over 48 months old totals are also included in balances over 36 months old totals.
- (2) Accounts that become delinquent after being re-aged are included in both the delinquency and re-aged amounts.
- (3) On July 31, 2011, we revised our charge-off policy to require an account that is delinquent more than 209 days at month end to be charged-off.

Table of Contents

Historical Static Loss Table

The following static loss analysis calculates the cumulative percentage of balances charged off, based on the year the credit account was originated and the period the balance was charged off. The percentage computed below is calculated by dividing the cumulative net amount charged off since origination by the total balance of accounts originated during the applicable fiscal year. The net charge-off was determined by estimating, on a pro rata basis, the amount of the recoveries received during a period that was allocable to the applicable origination period.

Fiscal Year of Origination	Cumulative loss rate as a % of balance originated(a)							Terminal(b)
	Fiscal years from origination							
	0	1	2	3	4	5	6	
2005	0.3%	1.7%	3.4%	4.3%	4.7%	4.9%	5.0%	5.0%
2006	0.3%	1.9%	3.6%	4.8%	5.4%	5.7%	5.7%	5.7%
2007	0.2%	1.7%	3.5%	4.6%	5.4%	5.6%	5.6%	
2008	0.2%	1.8%	3.6%	5.0%	5.7%	5.8%		
2009	0.2%	2.0%	4.6%	6.0%	6.6%			
2010	0.2%	2.4%	4.5%	5.8%				
2011	0.4%	2.6%	4.8%					
2012	0.2%	2.3%						

(a) The most recent percentages in years from origination 1 through 6 include loss data through October 31, 2012, and are not comparable to prior fiscal year accumulated net charge-off percentages in the same column.

(b) The terminal loss percentage presented represents the point at which that pool of loans has reached its maximum loss rate.

Table of Contents

Results of Operations

The presentation of our results of operations may not be comparable to some other retailers since we include the cost of our in-home delivery and installation service as part of selling, general and administrative expense. Similarly, we include the cost related to operating our purchasing function in selling, general and administrative expense. It is our understanding that other retailers may include such costs as part of their cost of goods sold.

(1) Selling, general and administrative expenses include the direct expenses of the retail and credit operations, allocated overhead expenses and a charge to the credit segment to reimburse the retail segment for expenses it incurs related to occupancy, personnel, advertising and other direct costs of the retail segment which benefit the credit operations by sourcing credit customers and collecting payments. The reimbursement received by the retail segment from the credit segment is estimated using an annual rate of 2.5% times the average portfolio balance for each applicable period. The amount of overhead allocated to each segment was approximately \$2.3 million and \$1.7 million for the three months ended October 31, 2012 and 2011, respectively, and approximately \$6.5 million and \$6.0 million for the nine months ended October 31, 2012 and 2011, respectively. The amount of

reimbursement made to the retail segment by the credit segment was approximately \$4.2 million and \$3.8 million for the three months ended October 31, 2012 and 2011, respectively, and approximately \$12.2 million and \$11.7 million for the nine months ended October 31, 2012 and 2011, respectively.

- (2) Credit segment provision for bad debts for the three and nine months ended October 31, 2011 includes a pre-tax charge of \$13.1 million due to the implementation of required accounting guidance related to Troubled Debt Restructuring.

Table of Contents

Segment Overview

The following provides an overview of our retail and credit segment operations for the three and nine months ended October 31, 2012. A detailed explanation of the changes in our operations for the comparative periods is included below.

Retail Segment

- Revenues were \$167.7 million for the quarter ended October 31, 2012, an increase of \$12.6 million, or 8.2%, from the prior-year period. The increase in revenues during the quarter was primarily driven by higher demand for furniture and mattresses, tablets and lawn equipment. On a same store basis, revenues for the current quarter rose 12.6% over the prior-year period. Reported revenues for the three months ended October 31, 2012 also reflects the benefit of the completion of 15 store remodels over the past 12 months and the opening of a Conn's HomePlus store in Waco, Texas in June of 2012. This growth in sales was partially offset by store closures and the decline in unit sales due to the focus on higher price-point product offerings. Revenues for the nine months ended October 31, 2012 were \$506.8 million, an increase of 9.1% over the prior-year level and driven by same store sales growth of 17.2%.
- Retail gross margin was 35.5% for the quarter ended October 31, 2012, an increase of 10.2 percentage points over the 25.3% reported in the comparable quarter last year. The prior-year quarter included an inventory reserve adjustment, which increased cost of goods sold by \$4.7 million and decreased reported retail gross margin by 300 basis points. Excluding this adjustment, retail gross margin rose 720 basis points year-over-year driven by margin expansion within each of the major product categories. Additionally, results were favorably influenced by sales mix, with the 31.7% increase in higher-margin furniture and mattress sales outpacing the overall growth realized in the other product categories. The broad margin improvement across all categories was driven by the continued focus on higher price-point, higher margin products and sourcing opportunities. Retail gross margin was 34.4% for the nine months ended October 31, 2012, an improvement of 620 basis points over the prior-year period. After excluding the \$4.7 million fiscal 2012 inventory reserve adjustment, retail gross margin rose 520 basis points over the prior-year period. This margin expansion reflects a favorable shift in product mix and margin expansion in each of the product categories.
- Selling, general and administrative ("SG&A") expense was \$47.3 million for the quarter ended October 31, 2012, an increase of \$1.4 million, or 3.0%, over the quarter ended October 31, 2011. The SG&A expense increase was primarily due to higher sales-driven compensation costs and advertising expenses, partially offset by a reduction in depreciation and facility-related expenses. As a percent of segment revenues, SG&A expense declined 140 basis points to 28.2% in the current period from 29.6% in the prior-year quarter. For the nine months ended October 31, 2012, SG&A expense was \$139.8 million, an increase of \$7.8 million from the prior-year period. SG&A expense as a percent of segment revenues declined 80 basis points to 27.6% attributable to the leveraging effect of higher total revenues.

Credit Segment

- Revenues were \$38.7 million for the three months ended October 31, 2012, an increase of \$7.1 million, or 22.6%, from the prior-year quarter. The increase reflects the impact of year-over-year growth of 11.7% in the average balance of the portfolio as well as an increase in portfolio interest and fee yield to 19.3%. Revenues for the nine months ended October 31, 2012 were \$107.9 million, an increase of \$7.0 million, primarily due to the impact of a 4.7% increase year-over-year in the average portfolio balance.
-

SG&A expense for the credit segment was \$13.9 million for the quarter ended October 31, 2012, relatively unchanged from the same quarter last year. SG&A expense as a percent of revenues was 36.0% in the current year period, which compares to 44.0% in the prior-year period. For the nine months ended October 31, 2012, SG&A expense was \$40.4 million, or 37.5% of revenues, versus \$43.4 million, or 43.0% of revenues, in the comparable prior-year period. On a dollar basis, SG&A decreased by \$3.0 million in the current period due to reduced compensation and related expenses.

- Provision for bad debts was \$13.2 million for the three months ended October 31, 2012, a decrease of \$13.0 million from the prior-year quarter. The year-over-year decrease is attributable to the \$13.1 million impact in the prior year of required adoption of accounting guidance related to Troubled Debt Restructuring and our implementation of stricter re-aging and charge-off policies in the second and third quarters of fiscal 2012. The provision for bad debts was \$34.2 million for the nine months ended October 31, 2012, a decrease of \$8.4 million over the prior-year period. This decrease also reflects the effect of the implementation of the required TDR accounting guidance and the re-age and charge-off policy modifications.
- Net interest expense for the quarter ended October 31, 2012 was \$4.5 million, an increase of \$0.6 million from the prior-year period, which was due to an increase in the effective interest rate with the issuance of the asset-backed notes in April of 2012 and a 7.7% increase in average level of debt outstanding. For the nine months ended October 31, 2012, net interest expense totaled \$13.2 million, a decrease of \$5.3 million from the prior-year period, which was attributable to the decline in the overall effective interest rate.

Total net sales	\$ 167,323	100.0 %	\$ 154,956	100.0 %	\$ 12,367	8.0 %	12.6 %	

The following provides a summary of items impacting the Company's product categories during the quarter, compared to the same quarter in the prior fiscal year:

- Home appliance sales rose during the quarter, attributable to a 24.4% increase in the average selling price and partially offset by a 17.4% decline in unit volume. Approximately one-quarter of the unit sales decrease was attributable to the previous store closures. On a same store basis, laundry sales rose 14.9%, refrigeration sales increased 3.6% and cooking sales increased 24.7%. Milder temperatures resulted in a 26.0% decline in room air conditioner sales;
- The continued growth in furniture and mattress sales was driven by enhanced presentation, product selection and increased promotional activity. The reported increase was tempered by the impact of previous store closures;
 - Furniture same store sales growth reflects a 16.4% increase in unit sales and a 15.2% increase in the average sales price;
 - Mattress same store sales also grew, driven by a favorable shift in product mix from the Company's decision to discontinue offering low price-point products. As a result, on a same store basis, the average mattress selling price

increased 41.6% and was partially offset by a 5.4% decline in unit volume;

- Consumer electronic sales declined slightly due to the emphasis of higher price-point televisions and the previous store closures. Same store unit sales of televisions with a screen size of 50 inches or above increased 5.9% over the prior-year quarter, driving a 10.5% increase in average selling price; and
- Home office sales growth resulted from the expansion of tablet sales, as well as a 28.2% increase in the average selling price of computers. The reported growth was partially offset by the impact of store closures, a reduction in computer unit volume and lower sales of accessory items.

Table of Contents

(in thousands)	Three Months Ended October 31,		
	2012	2011	Change
Interest income and fees	\$ 32,458	\$ 27,222	\$ 5,236
Insurance commissions	6,280	4,385	1,894
Other income	340	60	281
Finance charges and other	\$ 39,078	\$ 31,667	\$ 7,411

Interest income and fees and insurance commissions are included in the finance charges and other for the credit segment, while other income is included in finance charges and other for the retail segment.

Interest income and fees of the credit segment increased over the prior-year level primarily driven by an 11.7% increase in the average balance of the portfolio and the effect of a \$1.0 million increase in reserves for uncollectible interest for the three months ended October 31, 2011 resulting from the prior-year adoption of TDR accounting guidance. Portfolio interest and fee yield increased to 19.3% from 18.0% in the third quarter of fiscal 2012. The increase in insurance commissions was primarily related to the increase in retail sales.

The following table provides key portfolio performance information for the three months ended October 31, 2012 and 2011:

(in thousands, except percentages)	Three Months Ended October 31,	
	2012	2011
Interest income and fees (a)	\$ 32,458	\$ 27,222
Net charge-offs	(12,866)	(7,466)
Borrowing costs (b)	(4,526)	(3,919)
Net portfolio yield	\$ 15,066	\$ 15,837
Average portfolio balance	\$ 674,517	\$ 603,975
Interest income and fee yield % (annualized)	19.3 %	18.0 %
Net charge-off % (annualized)	7.6 %	4.9 %

(a) Included in finance charges and other.
(b) Included in interest expense.

(in thousands, except percentages)	Three Months Ended October 31,		
	2012	2011	Change
Cost of goods sold	\$ 105,688	\$ 112,844	(7,156)
Product gross margin percentage	30.3 %	19.6 %	

Product gross margin rose 1070 basis points as a percent of product sales from the quarter ended October 31, 2011. The expansion in product gross margin primarily reflects a favorable shift in our relative product sales mix. The year-over-year comparison was also influenced by an increase in the inventory valuation reserve of \$4.7 million during the quarter ended October 31, 2011.

October 31,

23

Table of Contents

Cost of service parts sold declined due to a \$0.5 million reduction in service revenues.

	Three Months Ended October 31,			
(in thousands, except percentages)	2012		2011	Change
Selling, general and administrative expense - Retail	\$ 47,275		\$ 45,899	\$ 1,376
Selling, general and administrative expense - Credit	13,935		13,902	33
Selling, general and administrative expense - Consolidated	\$ 61,210		\$ 59,801	\$ 1,409
As a percent of total revenues	29.7	%	32.0	%

For the three months ended October 31, 2012, the increase in SG&A expense was driven by higher sales-related compensation partially offset by the impact of previous store closures. The improvement in our SG&A expense as a percentage of total revenues was largely attributable to the leveraging effect of higher total revenues.

The SG&A expense increase in the retail segment was primarily due to higher sales-driven compensation costs and advertising expenses, partially offset by a reduction in depreciation and facility-related expenses. As a percent of segment revenues, SG&A expense declined 140 basis points to 28.2% in the current period from 29.6% in the prior-year quarter.

The SG&A expense for the credit segment was relatively unchanged from the same quarter last year. SG&A expense as a percent of revenues was 36.0% in the current year period, which compares to 44.0% in the prior-year period.

	Three Months Ended October 31,			
(in thousands, except percentages)	2012		2011	Change
Provision for bad debts	\$ 13,449		\$ 26,400	\$ (12,951)
As a percent of average portfolio balance (annualized)	8.0	%	17.5	%

The provision for bad debts is primarily related to the operations of our credit segment, with approximately \$0.2 million and \$0.1 million for the periods ended October 31, 2012 and 2011, respectively, included in the results of operations for the retail segment.

The year-over-year comparison is influenced by the impact of a pre-tax charge to provision for bad debts of \$13.1 million, net of previously provided reserves, in connection with the required adoption of new accounting guidance related to Troubled Debt Restructuring. Excluding this charge, the provision increased by \$0.2 million.

	Three Months Ended October 31,			
(in thousands)	2012		2011	Change
Costs related to relocation	\$ 641		\$ -	\$ 641
Costs related to store closings	-		(313)	313
Impairment of long-lived assets	-		688	(688)
Charges and credits	\$ 641		\$ 375	\$ 266

The Company relocated certain of its corporate operations from Beaumont to The Woodlands, Texas in the third quarter of fiscal year 2013. The Company incurred \$0.6 million in pre-tax costs in connection with the relocation.

During the third quarter of fiscal 2012, the Company revised its estimate of previously provided reserves for future lease obligations of closed stores and recorded a pre-tax credit of \$0.3 million. Additionally, the Company recorded a pre-tax impairment charge of \$0.7 million related to certain assets associated with non-performing stores.

Table of Contents

	Three Months Ended October 31,		
(in thousands)	2012	2011	Change
Interest expense	\$ 4,526	\$ 3,919	\$ 607

Interest expense for the three months ended October 31, 2012 increased by \$0.6 million from the prior-year period primarily due to an increase in the effective interest rate with the issuance of the asset-backed notes in April of 2012 and a 7.7% increase in average level of debt outstanding. The entirety of our interest expense is included in the results of operations of the credit segment.

	Three Months Ended October 31,		
(in thousands)	2012	2011	Change
Loss on extinguishment of debt	\$ 818	\$ -	\$ (818)

The Company amended and restated its asset-based loan facility with a syndicate of banks on September 26, 2012. In connection with the transaction, the Company expensed \$0.8 million in previously deferred transaction costs associated with lenders which are no longer in the current syndicate of banks. This amount is included in the results of operations of the credit segment.

	Three Months Ended October 31,		
(in thousands, except percentages)	2012	2011	Change
Provision (benefit) for income taxes	\$ 6,765	\$ (5,635)	\$ 12,400
As a percent of income before income taxes	36.5 %	30.7 %	

The provision for income taxes increased due to the year-over-year improvement in profitability. The improvement in profitability also drove the change in the effective tax rate in the current period due to the impact of the Texas margin tax, which is based on gross margin and is not affected by changes in income before income taxes.

Table of Contents

Nine Months Ended October 31, 2012 Compared to Nine Months Ended October 31, 2011

(in thousands)	Nine Months Ended October 31,		
	2012	2011	Change
Total net sales	\$ 505,915	\$ 464,013	\$ 41,902
Finance charges and other	108,773	101,618	7,155
Total Revenues	\$ 614,688	\$ 565,631	\$ 49,057

The following table provides an analysis of net sales by product category in each period, including repair service agreement commissions and service revenues, expressed both in dollar amounts and as a percent of total net sales.

(in thousands, except for percentages)	Nine Months Ended October 31,				% Change		Same store % change

Repair service agreement commissions	35,930	7.1	29,449	6.4	6,481	22.0	31.6	
Service revenues	10,181	2.0	11,650	2.5	(1,469)	(12.6)		
Total net sales	\$505,915	100.0 %	\$464,013	100.0 %	\$41,902	9.0 %	17.2 %	

The following provides a summary of items impacting the Company's product categories during the period, compared to the same period in the prior fiscal year:

- Home appliance sales increased during the period on a 25.9% increase in the average selling price, partially offset by a 17.5% decrease in unit sales. Approximately one-third of the unit sales decline was attributable to previous store closures. On a same store basis, laundry sales were up 16.8%, refrigeration sales were up 8.7% and cooking sales were up 24.8%. Milder temperatures drove a 23.1% decrease in room air conditioner sales;
- The growth in furniture and mattress sales was driven by enhanced displays, product selection and increased promotional activity. The reported increase was moderated by the impact of store closures. Furniture same store sales growth was driven by a 22.1% increase in the average sales price and an 18.7% increase in unit sales. Mattress same store sales also increased reflecting a favorable shift in product mix with the Company's decision to discontinue offering low price-point products. The average mattress selling price was up 61.3%, while unit volume declined 11.9% on a same store basis; and
- Consumer electronic sales decreased due primarily to previous store closures. On a same store basis, sales increased 0.3% with growth in television, home theater and audio sales offset by a reduction in gaming hardware and accessory item sales. With the Company's decision not to compete for low-priced, low-margin television sales during the current year, the same store average selling price for televisions increased 27.0%, while unit sales declined 20.6%; and

- Home office sales grew primarily as a result of the expansion of tablet sales and a 26.6% increase in the average selling price of computers, partially offset by the impact of store closures, a decline in computer unit volume and lower sales of accessory items.

Table of Contents

	Nine Months Ended October 31,		
(in thousands)	2012	2011	Change
Interest income and fees	\$ 90,915	\$ 87,514	\$ 3,401
Insurance commissions	17,001	13,426	3,575
Other income	857	678	179
Finance charges and other	\$ 108,773	\$ 101,618	\$ 7,155

Interest income and fees and insurance commissions are included in the finance charges and other for the credit segment, while other income is included in finance charges and other for the retail segment.

The increase in interest income and fees of the credit segment was driven primarily by growth in the average portfolio balance and the effect of a \$1.0 million increase in reserves for uncollectible interest for the three months ended October 31, 2011 resulting from the prior-year adoption of TDR accounting guidance. The increase in insurance commissions was primarily related to the increase in retail sales.

The following table provides key portfolio performance information for the nine months ended October 31, 2012 and 2011:

	Nine Months Ended October 31,	
(in thousands, except percentages)	2012	2011
Interest income and fees (a)	\$ 90,915	\$ 87,514
Net charge-offs	(40,024)	(34,435)
Borrowing costs (b)	(13,159)	(18,479)
Net portfolio yield	\$ 37,732	\$ 34,600
Average portfolio balance	\$ 652,868	\$ 623,514
Interest income and fee yield % (annualized)	18.6 %	18.7 %
Net charge-off % (annualized)	8.2 %	7.4 %

(a) Included in finance charges and other.
(b) Included in interest expense.

	Nine Months Ended October 31,		
(in thousands, except percentages)	2012	2011	Change
Cost of goods sold	\$ 325,041	\$ 324,774	\$ 267
Product gross margin percentage	29.3 %	23.2 %	

Product gross margin increased 610 basis points as a percent of product sales from the nine months ended October 31, 2011 primarily due a favorable shift in our relative product mix. The year-over-year comparison was also influenced by an increase in the inventory valuation reserve of \$4.7 million during the quarter ended October 31, 2011.

	Nine Months Ended October 31,		
(in thousands, except percentages)	2012	2011	Change
Cost of service parts sold	\$ 4,513	\$ 4,973	\$ (460)

As a percent of service revenues	44.3	%	42.7	%
----------------------------------	------	---	------	---

27

Table of Contents

Cost of service parts sold decreased primarily due to a \$1.5 million decline in service revenues.

(in thousands, except percentages)	Nine Months Ended October 31,			
	2012		2011	Change
Selling, general and administrative expense - Retail	\$ 139,832		\$ 132,009	\$ 7,823
Selling, general and administrative expense - Credit	40,415		43,411	(2,996)
Selling, general and administrative expense - Consolidated	\$ 180,247		\$ 175,420	\$ 4,827
As a percent of total revenues	29.3	%	31.0	%

For the nine months ended October 31, 2012, the SG&A increase was driven by the higher retail sales. These increases were partially offset by reductions in depreciation and occupancy expense, credit personnel costs and reduced credit card fees. The improvement in SG&A expense as a percentage of total revenues was largely attributable to the leveraging effect of higher total revenues.

The SG&A expense in the retail segment increased primarily due to an increase in sales-driven compensation expense and increased advertising, partially offset by reduction in costs related to the reduced store count. SG&A expense as a percent of segment revenues declined 80 basis points to 27.6% attributable to the leveraging effect of higher total revenues.

The SG&A expense in the credit segment declined primarily due to reduced compensation and related expenses. SG&A expense as a percent of segment revenues was 37.5% of revenue in the current year period compared to 43.0% in the comparable prior-year period.

(in thousands, except percentages)	Nine Months Ended October 31,			
	2012		2011	Change
Provision for bad debts	\$ 34,838		\$ 43,115	\$ (8,277)
As a percent of average portfolio balance (annualized)	7.1	%	9.2	%

The provision for bad debts is primarily related to the operations of our credit segment, with approximately \$0.6 million and \$0.5 million for the periods ended October 31, 2012 and 2011, respectively, included in the results of operations for the retail segment.

The year-over-year comparison is influenced by the impact of a pre-tax charge to provision for bad debts of \$13.1 million, net of previously provided reserves, in connection with the required adoption of new accounting guidance related to Troubled Debt Restructuring. Excluding this charge, the provision increased by \$4.8 million driven by growth in the overall portfolio balance.

(in thousands)	Nine Months Ended October 31,			
	2012		2011	Change
Costs related to relocation	\$ 987		\$ -	\$ 987
Costs related to store closings	163		3,345	(3,182)
Impairment of property and equipment	-		688	(688)
Charges and credits	\$ 1,150		\$ 4,033	\$ (2,883)

The Company relocated certain of its corporate operations from Beaumont to The Woodlands, Texas in the third quarter of fiscal year 2013. The Company incurred \$1.0 million in pre-tax costs in connection with the relocation during the nine-month period ended October 31, 2012.

The Company has closed a number of underperforming retail locations. In connection with these closures, the Company provided reserves for future lease obligation and adjusts such obligations as more information becomes available. During the nine months ended October 31, 2012 and 2011, the Company incurred charges of \$0.2 million and \$3.3 million, respectively. Additionally, the Company recorded a pre-tax impairment charge of \$0.7 million related to certain assets associated with non-performing stores during the nine months ended October 31, 2011.

Table of Contents

	Nine Months Ended October 31,		
(in thousands)	2012	2011	Change
Interest expense	\$ 13,159	\$ 18,479	\$ (5,320)

Interest expense for the nine months ended October 31, 2012 decreased by \$5.3 million from the prior-year period primarily due to the refinancing of higher interest borrowings in the prior period. The entirety of our interest expense is included in the results of operations of the credit segment.

	Nine Months Ended October 31,		
(in thousands)	2012	2011	Change
Loss on extinguishment of debt	\$ 818	\$ 11,056	\$ 10,238

The Company amended and restated its asset-based loan facility with a syndicate of banks on September 26, 2012. In connection with the transaction, the Company expensed \$0.8 million in previously deferred transaction costs associated with lenders which are no longer in the current syndicate of banks. This amount is included in the results of operations of the credit segment.

On July 28, 2011, we extinguished an existing term loan with proceeds from a new real estate loan and borrowings under our expanded revolving credit facility. We recorded a charge of \$11.1 million during the period including the prepayment premium of \$4.8 million, write-off of the unamortized original issue discount of \$5.4 million and term loan deferred financing costs of \$0.9 million. This amount is included in the results of operations of the credit segment.

	Nine Months Ended October 31,		
(in thousands, except percentages)	2012	2011	Change
Provision (benefit) for income taxes	\$ 20,080	\$ (4,876)	\$ 24,956
As a percent of income before income taxes	36.5 %	29.9 %	

The provision for income taxes increased due to the year-over-year improvement in profitability. The improvement in profitability also drove the change in the effective tax rate in the current period due to the impact of the Texas margin tax, which is based on gross margin and is not affected by changes in income before income taxes.

Liquidity and Capital Resources

Cash flow

Operating activities

During the nine months ended October 31, 2012, net cash provided by operating activities was \$14.6 million, which compares to \$74.9 million provided during the prior-year period. The year-over-year improvement in operating performance was more than offset by the use of cash to fund an \$84.8 million increase in customer accounts receivable during the nine months ended October 31, 2012 as compared to cash provided by a decrease in customer receivables of \$26.4 million in the nine months ended October 31, 2011. In the current-year period, the impact of investments in inventory was offset by an increase in accounts payable.

Investing activities

Net cash used in investing activities increased to \$21.0 million in the nine months ended October 31, 2012, as compared to \$2.3 million in the nine months ended October 31, 2011, primarily due to expenditures for store remodels and relocations. We expect during the next twelve months to invest between \$25 million and \$30 million, net of tenant allowances, in capital expenditures for new stores, remodels and other projects. We expect to fund these estimated capital expenditures with cash from operations, borrowings under our asset-based revolving credit facility and tenant allowances from landlords.

Table of Contents

Financing activities

Net cash provided by financing activities was \$4.4 million for the nine months ended October 31, 2012, compared to net cash used in financing activities of \$77.0 million during the nine months ended October 31, 2011. During the nine months ended October 31, 2012, we used net cash provided by operations and net proceeds from our VIE's bond issuance to pay down outstanding balances under our asset-based revolving credit facility.

Liquidity

We require capital to finance our growth as we add new stores and markets to our operations, which in turn requires additional working capital for increased customer receivables and inventory. We have historically financed our operations through a combination of cash flow generated from earnings and external borrowings, including primarily bank debt, extended terms provided by our vendors for inventory purchases, acquisition of inventory under consignment arrangements and transfers of customer receivables to asset-backed securitization facilities.

We currently have an asset-based revolving credit facility with capacity of \$545 million that matures in September 2016. The facility provides funding based on a borrowing base calculation that includes customer accounts receivable and inventory. The credit facility bears interest at LIBOR plus a spread ranging from 275 basis points to 350 basis points, based on a leverage ratio (defined as total liabilities to tangible net worth). In addition to the leverage ratio, the revolving credit facility includes a fixed charge coverage requirement, a minimum customer receivables cash recovery percentage requirement and a net capital expenditures limit. The leverage ratio covenant requirement is a required maximum of 2.00 to 1.00. The fixed charge coverage ratio requirement is a minimum of 1.10 to 1.00. We expect, based on current facts and circumstances, that we will be in compliance with the above covenants for the next 12 months. The weighted average interest rate on borrowings outstanding under the asset-based revolving credit facility was 3.4% at October 31, 2012.

On April 30, 2012, our VIE issued \$103.7 million of notes which bear interest at 4.0% and were sold at a discount to deliver a 5.21% yield, before considering transaction costs. The principal balance of the notes, which are secured by certain customer receivables, will be reduced on a monthly basis by collections on the underlying customer receivables after the payment of interest and other expenses of the VIE. While the final maturity for the notes is April 2016, we currently expect to repay any outstanding note balance in April 2013. Additionally, the notes include a prepayment incentive fee, whereby the VIE will be required to pay, in addition to accrued interest on the notes, a monthly fee equal to an annual rate of 8.5% times the outstanding principal balance, if the notes are not repaid by the expected final principal payment date of April 15, 2013. The VIE's borrowing agreement contains certain covenants, including a minimum net worth requirement for the VIE.

We have an \$8.0 million real estate loan, collateralized by three of our owned store locations, that will mature in July 2016 and requires monthly principal payments based on a 15-year amortization schedule. The interest rate on the loan is the prime rate plus 100 basis points with a floor of 5%.

We have interest rate cap options with a notional amount of \$100 million. These cap options are held for the purpose of hedging against variable interest rate risk related to the variability of cash flows in the interest payments on a portion of its variable-rate debt, based on the benchmark one-month LIBOR interest rate exceeding 1.0%. These cap options have monthly caplets extending through August, 2014.

The weighted average effective interest rate on borrowings outstanding under all our credit facilities for the three months ended October 31, 2012 was 5.6%, including the interest expense associated with our interest rate caps and amortization of deferred financing costs.

A summary of the significant financial covenants that govern our credit facility compared to our actual compliance status at October 31, 2012, is presented below:

	Actual	Required Minimum/ Maximum
Fixed charge coverage ratio must exceed required minimum	1.85 to 1.00	1.10 to 1.00
Total liabilities to tangible net worth ratio must be lower than required maximum	1.15 to 1.00	2.00 to 1.00
Cash recovery percentage must exceed stated amount	5.26%	4.74%
Capital expenditures, net must be lower than stated amount	\$23.1 million	\$40.0 million

Note: All terms in the above table are defined by the revolving credit facility and may or may not agree directly to the financial statement captions in this document. The covenants are required to be calculated quarterly on a trailing twelve month basis, except for the Cash recovery percentage, which is calculated monthly on a trailing three month basis.

Table of Contents

As of October 31, 2012, we had immediately available borrowing capacity of \$157.5 million under our asset-based revolving credit facility, net of standby letters of credit issued of \$4.3 million, available to us for general corporate purposes before considering extended vendor terms for purchases of inventory. In addition to the \$157.5 million currently available under the revolving credit facility, an additional \$91.0 million may become available if we grow the balance of eligible customer receivables and total eligible inventory balances. Payments received on customer receivables averaged approximately \$42.3 million per month during the three months ended October 31, 2012. Payments received on receivables used as collateral for the revolving credit facility averaged \$36.1 million and are available each month to fund new customer receivables generated. Once the VIE's notes are retired, we would expect all payments to be available to fund new customer receivables.

We intend to continue to finance our operations and future growth through a combination of cash flow generated from operations and external borrowings, including primarily bank debt, extended vendor terms for purchases of inventory, acquisition of inventory under consignment arrangements and transfers of customer receivables to asset-backed securitization facilities. Based on our current operating plans, we believe that cash generated from operations, available borrowings under our revolving credit facility, extended vendor terms for purchases of inventory, acquisition of inventory under consignment arrangements, and transfers of customer receivables to asset-based securitization facilities will be sufficient to fund our operations, store expansion and updating activities and capital programs for at least the next 12 months, subject to continued compliance with the covenants in our debt and other credit arrangements. Additionally, if there is a default under any of the facilities that is not waived by the various lenders, it could result in the requirement to immediately repay of all amounts owed under our credit facilities, as all of the facilities have cross-default provisions that would result in default under all of the facilities if there is a default under any one of the facilities. If the repayment of amounts owed under our debt and other credit arrangements is accelerated for any reason, we may not have sufficient cash and liquid assets at such time to be able to immediately repay all the amounts owed under the facilities.

The revolving credit facility is a significant factor relative to our ongoing liquidity and our ability to meet the cash needs associated with the growth of our business. Our inability to use this program because of a failure to comply with its covenants would adversely affect our business operations. Funding of current and future customer receivables under the borrowing facility can be adversely affected if we exceed certain predetermined levels of re-aged customer receivables, write-offs, bankruptcies or other ineligible customer receivable amounts.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Interest Rate Risk Management

Our VIE issued \$103.7 million of fixed-rate notes on April 30, 2012. The notes bear interest at a fixed rate of 4.0% and were sold at a discount to deliver a 5.21% yield, before considering transaction costs. Net proceeds from the offering were used to repay borrowings under our asset-based revolving credit facility, which bears interest at LIBOR plus a spread ranging from 350 basis points to 400 basis points, based on a leverage ratio (defined as total liabilities to tangible net worth). There have been no other significant changes to our market risk since January 31, 2012.

For additional quantitative and qualitative disclosures about market risk, see Item 7A. "Quantitative and Qualitative Disclosures about Market Risk," of Conn's, Inc. Annual Report on Form 10-K for the fiscal year ended January 31, 2012.

Item 4. Controls and Procedures

Based on management's evaluation (with the participation of our Chief Executive Officer (CEO) and Chief Financial Officer (CFO)), as of the end of the period covered by this report, our CEO and CFO have concluded that our

disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)), are effective to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in SEC rules and forms, and is accumulated and communicated to management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

For the nine months ended October 31, 2012, there have been no changes in our internal controls over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934) that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

Table of Contents

PART II – OTHER INFORMATION

Item 1. Legal Proceedings

The Company is involved in routine litigation and claims incidental to its business from time to time, and, as required, has accrued its estimate of the probable costs for the resolution of these matters, which are not expected to be material. These estimates have been developed in consultation with counsel and are based upon an analysis of potential results, assuming a combination of litigation and settlement strategies. Recently, the Company has been included in various patent infringement claims and litigation, the outcomes of which are difficult to predict at this time. Due to the timing of these matters, the Company has determined that no reasonable estimates of probable costs for resolution can be ascertained at this time, and it is possible, however, that future results of operations for any particular period could be materially affected by changes in the Company's assumptions or the effectiveness of its strategies related to these proceedings. However, the results of these proceedings cannot be predicted with certainty, and changes in facts and circumstances could impact the Company's estimate of reserves for litigation.

Item 1A. Risk Factors

You should carefully consider the risks described below before making an investment decision. Our business, financial condition or results of operations could be materially adversely affected by these risks. The trading price of our common stock could decline due to any of these risks, and you may lose all or part of your investment. You should also refer to the other information included in this report, including our consolidated financial statements and related notes.

We may not be able to open and profitably operate new stores in existing, adjacent and new geographic markets. We reinstated our new store opening program during fiscal year 2013. We have opened two stores and have plans to open three more new stores in fiscal year 2013. New stores may not be profitable on an operating basis during the first months after they open and even after that time period may not be profitable or meet our goals. Any of these circumstances could have a material adverse effect on our financial results. There are a number of factors that could affect our ability to open and operate new stores consistent with our business plan, including:

- The availability of additional financial resources;
- The availability of favorable sites in existing, adjacent and new markets at price levels consistent with our business plan;
- Competition in existing, adjacent and new markets;
- Competitive conditions, consumer tastes and discretionary spending patterns in adjacent and new markets that are different from those in our existing markets;
- A lack of consumer demand for our products or financing programs at levels that can support new store growth;
- Inability to make customer financing programs available that allow consumers to purchase products at levels that can support new store growth;
- Limitations created by covenants and conditions under our revolving credit facility;
- The substantial outlay of financial resources required to open new stores and the possibility that we may recognize little or no related benefit;

- An inability or unwillingness of vendors to supply product on a timely basis at competitive prices;
- The failure to open enough stores in new markets to achieve a sufficient market presence and realize the benefits of leveraging our advertising and our distribution system;
- Unfamiliarity with local real estate markets and demographics in adjacent and new markets;
- Problems in adapting our distribution and other operational and management systems to an expanded network of stores;
- Difficulties associated with the hiring, training and retention of additional skilled personnel, including store managers; and
- Higher costs for print, radio and television advertising.

These factors may also affect the ability of any newly opened stores to achieve sales and profitability levels comparable with our existing stores or to become profitable at all. As a result, we may determine that we need to close additional stores or reduce the hours of operation in some stores, which could materially adversely impact our business, financial condition, operating results or cash flows, as we may incur additional expenses and non-cash write-offs related to closing a store and settling our remaining lease obligations and our initial investment in fixed assets and related store costs.

We may not successfully implement our existing store remodeling program which could negatively impact our results of operations or fail to provide a favorable return on our investment. We plan to remodel 35 of our existing stores by the end of fiscal year 2014, 15 of which were completed as of October 31, 2012. These efforts may not be successful in enhancing the operating results of the stores remodeled, which could negatively affect our results of operations or may not yield a favorable return on the investment required for such remodels. Further, our store operations for such stores could be disrupted or such stores temporarily closed, which could negatively impact our financial performance. If we are unable to successfully operate remodeled stores in our new store format or customers for those stores are not receptive to the new store format, our operating results for such stores would be negatively affected.

If we are unable to manage our growing business, our revenues may not increase as anticipated, our cost of operations may rise and our results of operations may decline. As a result of re-initiating our store opening plan and beginning to grow our store base, we will face many business risks associated with growing companies, including the risk that our management, financial controls and information systems will be inadequate to support our expansion in the future. Our growth will require management to expend significant time and effort and additional resources to ensure the continuing adequacy of our financial controls, operating procedures, information systems, product purchasing, warehousing and distribution systems and employee training programs. We cannot predict whether we will be able to effectively manage these increased demands or respond on a timely basis to the changing demands that our expansion will impose on our management, financial controls and information systems. If we fail to manage successfully the challenges of growth, do not continue to improve these systems and controls or encounter unexpected difficulties during expansion, our business, financial condition, operating results or cash flows could be materially adversely affected.

We may expand our retail offerings which may have different operating or legal requirements than our current operations. In addition to the retail and consumer finance products we currently offer, we may offer other products and services in the future, including new financing products. These products and services may require additional or different operating systems or have additional or different legal or regulatory requirements than the products and services we currently offer. In the event we undertake such an expansion and do not have the proper infrastructure or personnel, or do not successfully execute such an expansion, our business, financial condition, operating results or cash flows could be materially adversely affected.

A decrease in our credit sales or a decline in credit quality could lead to a decrease in our product sales and profitability. In the last three fiscal years, we financed, on average, including down payments, approximately 61% of our retail sales through our in-house proprietary credit programs to customers with a broad range of credit worthiness. A large portion of our credit portfolio is to customers considered by many to be subprime borrowers. Our ability to provide credit as a financing alternative for our customers depends on many factors, including the quality of our customer receivables portfolio. Payments on some of our credit accounts become delinquent from time to time, and some accounts end up in default, due to several factors, such as general and local economic conditions, including the impact of rising interest rates and unemployment rates. As we expand into new markets, we will obtain new credit accounts that may present a higher risk than our existing credit accounts since new credit customers do not have an established credit history with us. A general decline in the quality of our customer receivable portfolio could lead to a reduction in the advance rates used or eligible customer receivable balances included in the borrowing base calculations under our revolving credit facility and thus a reduction of available credit to fund our finance operations. As a result, if we are required to reduce the amount of credit we grant to our customers, we most likely would sell fewer products, which would adversely affect our financial condition, operating results and cash flows. Further, because approximately 60% of our credit customers have historically made their credit account payments in our stores, any decrease in credit sales could reduce traffic in our stores and lower our revenues. A decline in the credit quality of our credit accounts could also cause an increase in our credit losses, which would result in an adverse effect on our earnings. A decline in credit quality could also lead to stricter underwriting criteria which would likely have a negative impact on net sales.

We have significant future capital needs and the inability to obtain funding for our credit operations may adversely affect our business and expansion plans. We currently finance our customer receivables through an asset-based loan facility that provides \$545.0 million in financing commitments and securitized notes. As of October 31, 2012, we had \$272.2 million outstanding under our asset-based revolving credit facility, including standby letters of credit issued. Our ability to raise additional capital through expansion of our asset-based loan facility, future securitization transactions or other debt or equity transactions, and do so on economically favorable terms, depends in large part on factors that are beyond our control.

These factors include:

- Conditions in the securities and finance markets generally;
- Our credit rating or the credit rating of any securities we may issue;
- Economic conditions;
- Conditions in the markets for securitized instruments, or other debt or equity instruments;
- The credit quality and performance of our customer receivables;
- Our overall sales performance and profitability;

- Our ability to provide or obtain financial support for required credit enhancement;
- Our ability to adequately service our financial instruments;
- Our ability to meet debt covenant requirements; and
- Prevailing interest rates.

If adequate capital and funds are not available at the time we need capital, we will have to curtail future growth, which could materially adversely affect our business, financial condition, operating results or cash flow. As we grow our business, capital expenditures during future years are likely to exceed our historical capital expenditures. The ultimate amount of capital expenditures needed will be dependent on, among other factors, the availability of capital to fund new store openings and customer receivables portfolio growth.

In addition, we historically used our customer receivables as collateral to raise funds through securitization programs. In fiscal year 2011, we completed amendments to our existing credit facilities and our terminated securitization facilities to obtain relief from potential covenant violations and revise certain covenant requirements. If we require amendments in the future and are unable to obtain such amendments or we are unable to arrange substitute financing facilities or other sources of capital, we may have to limit or cease offering credit through our finance programs due to our inability to draw under our revolving credit facility upon the occurrence of a default. If availability under the borrowing base calculations of our revolving credit facility is reduced, or otherwise becomes unavailable, or we are unable to arrange substitute financing facilities or other sources of capital, we may have to limit the amount of credit that we make available through our customer finance programs. A reduction in our ability to offer customer credit will adversely affect revenues and results of operations and could have a material adverse effect on our results of operations. Further, our inability or limitations on our ability to obtain funding through securitization facilities or other sources may adversely affect our profitability under our credit programs if existing customers fail to repay outstanding credit due to our refusal to grant additional credit.

Additionally, the inability of any of the financial institutions providing our financing facilities to fund their commitment would adversely affect our ability to fund our credit programs, capital expenditures and other general corporate needs.

If we are unable to renew or replace our existing credit facilities in the future or have access to securitization markets reduced, we would be required to reduce, or possibly cease, offering customers credit, which could adversely affect our revenues and results of operations in the same manner as discussed above.

Failure to comply with our covenants in our credit facilities could materially and adversely affect us. Under our existing asset-based loan facility we have certain obligations, including maintaining certain financial covenants. If we fail to maintain the financial covenants in our credit facility and are not able to obtain relief from any covenant violation, then an event of default could occur and the lenders could cease lending to us, accelerate the payments of our debt and foreclose on our assets that secure the asset-based loan facility. Any such action by the lenders could materially and adversely affect us and could even result in bankruptcy. While we are in compliance with the covenants in our existing facilities, if our retail and credit operation performance deteriorates, we could be in breach of one or more covenants.

Increased borrowing costs will negatively impact our results of operations. Because most of our customer receivables have interest rates equal to the highest rate allowable under applicable law, we would not be able to pass higher borrowing costs along to our customers and our results of operations would be negatively impacted. The interest rates on our revolving credit facility fluctuate up or down based upon the LIBOR rate, the prime rate of our administrative agent or the federal funds rate. The level of interest rates in the market in general will impact the interest rate on any debt instruments issued, if any. Additionally, we may issue debt securities or enter into credit facilities under which we pay interest at a higher rate than we have historically paid which would further reduce our margins and negatively impact our results of operations.

Deterioration in the performance of our customer receivables portfolio could significantly affect our liquidity position and profitability. Our liquidity position and profitability are heavily dependent on our ability to collect our customer receivables. If our customer receivables portfolio were to substantially deteriorate, the liquidity available to us would most likely be reduced due to the challenges of complying with the covenants and borrowing base calculations under our revolving credit facility and our earnings may decline due to higher provisions for bad debt expense, higher servicing costs, higher net charge-off rates and lower interest and fee income.

Our ability to collect from credit customers may be materially impaired by store closings and our need to rely on a replacement servicer in the event of our liquidation. We may be unable to collect a large portion of periodic credit

payments should our stores close as many of our customers remit payments in-store. During the course of fiscal year 2012, approximately 60% of our active credit customers made a payment in one of our stores. In the event of store closings, credit customers may not pay balances in a timely fashion, or may not pay at all, since a large number of our customers have not traditionally made payments to a central location.

In addition, we service our active credit customers through our in-house servicing operation. At this time, there is not a formalized back-up servicer plan in place for the vast majority of our customer receivables. In the event of our liquidation, a servicing arrangement would have to be implemented, which could materially impact the collection of our customer receivables.

In deciding whether to extend credit to customers, we rely on the accuracy and completeness of information furnished to us by or on behalf of our credit customers. If we and our systems are unable to detect any misrepresentations in this information, this could have a material adverse effect on our results of operations and financial condition. In deciding whether to extend credit to customers, we rely heavily on information furnished to us by or on behalf of our credit customers and our ability to validate such information through third-party services, including employment and personal financial information. If a significant percentage of our credit customers intentionally or negligently misrepresent any of this information, and we or our systems did not detect such misrepresentations, it could have a material adverse effect on our ability to effectively manage our credit risk, which could have a material adverse effect on our results of operations and financial condition.

Our policy of re-aging certain delinquent borrowers affects our delinquency statistics and the timing and amount of our write-offs. As of October 31, 2012, 11.4% of our credit portfolio consisted of “re-aged” customer receivables. Re-aging is offered to certain eligible past-due customers if they meet the conditions of our re-age policy. Our decision to offer a delinquent customer a re-age program is based on that borrower’s specific condition, our history with the borrower, the amount of the loan and various other factors. When we re-age a customer’s account, we move the account from a delinquent status to a current status. Management exercises a considerable amount of discretion over the re-aging process and has the ability to re-age an account multiple times during its life. During fiscal year 2012, we put a policy in place to limit the number of months an account can be re-aged over the life of the account to 12 months. Treating an otherwise uncollectible account as current affects our delinquency statistics, as well as impacting the timing and amount of charge-offs. If these accounts had been charged off sooner, our net loss rates might have been higher.

If we fail to timely contact delinquent borrowers, then the number of delinquent customer receivables eventually being charged off could increase. We contact customers with delinquent credit account balances soon after the account becomes delinquent. During periods of increased delinquencies it is important that we are proactive in dealing with borrowers rather than simply allowing customer receivables to go to charge-off. Historically, when our servicing becomes involved at an earlier stage of delinquency with credit counseling and workout programs, there is a greater likelihood that the customer receivable will not be charged off.

During periods of increased delinquencies, it becomes extremely important that we are properly staffed and trained to assist borrowers in bringing the delinquent balance current and ultimately avoiding charge-off. If we do not properly staff and train our collections personnel, then the number of accounts in a delinquent status or charged-off could increase. In addition, managing a substantially higher volume of delinquent customer receivables typically increases our operational costs. A rise in delinquencies or charge-offs could have a material adverse effect on our business, financial condition, liquidity and results of operations.

We rely on internal models to manage risk and to provide accounting estimates. Our results could be adversely affected if those models do not provide reliable accounting estimates or predictions of future activity. We make significant use of business and financial models in connection with our efforts to measure and monitor our risk exposures and to manage our credit portfolio. For example, we use models as a basis for credit underwriting decisions, portfolio delinquency, charge-off and collection expectations and other market risks, based on economic factors and our experience. The information provided by these models is used in making business decisions relating to strategies, initiatives, transactions and pricing, as well as the size of our allowance for doubtful accounts, among other accounting estimates. Models are inherently imperfect predictors of actual results because they are based on historical data available to us and our assumptions about factors such as credit demand, payment rates, default rates, delinquency rates and other factors that may overstate or understate future experience. Our models could produce unreliable results for a number of reasons, including the limitations of historical data to predict results due to unprecedented events or circumstances, invalid or incorrect assumptions underlying the models, the need for manual adjustments in response to rapid changes in economic conditions, incorrect coding of the models, incorrect data being used by the models or inappropriate application of a model to products or events outside of the model’s intended use. In particular, models are less dependable when the economic environment is outside of historical experience, as has been the case recently.

In addition, we continually receive new economic data. Our critical accounting estimates, such as the size of our allowance for doubtful accounts, are subject to change, often significantly, due to the nature and magnitude of changes in economic conditions. However, there is generally a lag between the availability of this economic information and the preparation of our consolidated financial statements. When economic conditions change quickly and in unforeseen ways, there is a risk that the assumptions and inputs reflected in our models are not representative of current economic conditions.

Due to the factors described above and in “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in this report and our annual report on Form 10-K for the fiscal year ended January 31, 2012, we may be required or may deem it necessary to increase our allowance for doubtful accounts in the future. Increasing our allowance for doubtful accounts would adversely affect our results of operations and our financial position.

The dramatic changes in the economy and the credit and capital markets have required frequent adjustments to our models and the application of greater management judgment in the interpretation and adjustment of the results produced by our models. This application of greater management judgment reflects the need to take into account updated information while continuing to maintain controlled processes for model updates, including model development, testing, independent validation and implementation. As a result of the time and resources, including technical and staffing resources, that are required to perform these processes effectively, it may not be possible to replace existing models quickly enough to ensure that they will always properly account for the impacts of recent information and actions.

The recent economic downturn has affected consumer purchases from us as well as their ability to repay their credit obligations to us, which could have a continued or prolonged negative effect on our net sales, gross margins and credit portfolio performance. Many factors affect spending, including regional or world events, war, conditions in financial markets, general business conditions, interest rates, inflation, energy and gasoline prices, consumer debt levels, the availability of consumer credit, taxation, unemployment trends and other matters that influence consumer confidence and spending. Our customers’ purchases of our products decline during periods when disposable income is lower or periods of actual or perceived unfavorable economic conditions. Recent turmoil in the national economy, including instability in financial markets and the so-called “fiscal cliff” involving a potential combination of expiring tax cuts and mandatory federal spending reductions at the end of 2012, decreases in consumer confidence and volatile oil prices have negatively impacted our markets and may present significant challenges to our operations in the future. If this occurs, our net sales and results of operations would decline.

We face significant competition from national, regional, local and internet retailers of home appliances, consumer electronics and furniture. The retail market for consumer electronics and furniture is highly fragmented and intensely competitive and the market for home appliances is concentrated among a few major dealers. We currently compete against a diverse group of retailers, including national mass merchants such as Sears, Wal-Mart, Target, Sam's Club and Costco, specialized national retailers such as Best Buy and Rooms To Go, home improvement stores such as Lowe's and Home Depot, and locally-owned regional or independent retail specialty stores that sell home appliances, consumer electronics, furniture, and mattresses similar, and often identical, to those items we sell. We also compete with retailers that market products through store catalogs and the internet. In addition, there are few barriers to entry into our current and contemplated markets, and new competitors may enter our current or future markets at any time.

We may not be able to compete successfully against existing and future competitors. Some of our competitors have financial resources that are substantially greater than ours and may be able to purchase inventory at lower costs and better endure economic downturns. As a result, our sales may decline if we cannot offer competitive prices to our customers or we may be required to accept lower profit margins. Our competitors may respond more quickly to new or emerging technologies and may have greater resources to devote to promotion and sale of products and services. If two or more competitors consolidate their businesses or enter into strategic partnerships, they may be able to compete more effectively against us.

Our existing competitors or new entrants into our industry may use a number of different strategies to compete against us, including:

- Expansion by our existing competitors or entry by new competitors into markets where we currently operate;

• Entering the television market as the decreased size of flat-panel televisions allows new entrants to display and sell these products more easily;

- Lower pricing;

- Aggressive advertising and marketing;

- Extension of credit to customers on terms more favorable than we offer;

- Larger store size, which may result in greater operational efficiencies, or innovative store formats; and

- Adoption of improved retail sales methods.

Competition from any of these sources could cause us to lose market share, sales and customers, increase expenditures or reduce prices, any of which could have a material adverse effect on our results of operations.

If new products are not introduced or consumers do not accept new products, our sales may decline. Our ability to maintain and increase sales depends to a large extent on the periodic introduction and availability of new products and technologies. It is possible that new products will never achieve widespread consumer acceptance or will be supplanted by alternative products and technologies that do not offer us a similar sales opportunity or are sold at lower price points or margins.

We have expanded the floor space dedicated to our furniture and mattress product offerings. If the strategy of increasing our emphasis on furniture and mattress offerings is unsuccessful, it would have a materially adverse effect on our sales and results of operations.

If we fail to anticipate changes in consumer preferences, our sales will decline. Our products must appeal to a broad range of consumers whose preferences cannot be predicted with certainty and are subject to change. Our success depends upon our ability to anticipate and respond in a timely manner to trends in consumer preferences relating to home appliances, consumer electronics and furniture. If we fail to identify and respond to these changes, our sales of these products will decline. In addition, we often make commitments to purchase products from our vendors up to nine months in advance of proposed delivery dates. Significant deviation from the projected demand for products that we sell may have a material adverse effect on our results of operations and financial condition, either from lost sales or lower margins due to the need to reduce prices to dispose of excess inventory.

We may experience significant price pressures over the life cycle of our products from competing technologies and our competitors and we may not be able to maintain our historical gross margin levels. Prices for many of our products decrease over their life cycle. Such decreases often result in decreased gross profit margins for us. There is also substantial and continuing pressure from customers to reduce their total costs for products. Suppliers may also seek to reduce our margins on the sales of their products in order to increase their own profitability. The consumer electronics industry depends on new products to drive same store sales increases. Typically, these new products, such as high-definition LED and 3-D televisions, Blu-ray players and digital cameras are introduced at relatively high price points that are then gradually reduced as the product becomes mainstream. To sustain positive same store sales growth, unit sales must increase at a rate greater than the decline in product prices. The affordability of the product helps drive the unit sales growth. However, as a result of relatively short product life cycles in the consumer electronics industry, which limit the amount of time available for sales volume to increase, combined with rapid price erosion in the industry, retailers are challenged to maintain overall gross margin levels and positive same store sales. This has historically been our experience, and we continue to adjust our marketing strategies to address this challenge through the introduction of new product categories and new products within our existing categories. If we fail to accurately anticipate the introduction of new technologies, we may possess significant amounts of obsolete inventory that can only be sold at substantially lower prices and profit margins than we anticipated. In addition, we may not be able to maintain our historical margin levels in the future due to increased sales of lower margin products such as personal electronics products and declines in average selling prices of key products. If sales of lower margin items continue to increase and replace sales of higher margin items or our consumer electronics products average selling prices decreases due to the maturity of their life cycle, our gross margin and overall gross profit levels will be adversely affected.

A disruption in our relationships with, in the operations of, or supply of product from any of our key suppliers could cause our sales to decline. The success of our business and growth strategies depends to a significant degree on our relationships with our suppliers, particularly our brand name suppliers such as Dell, Electrolux, Franklin, Frigidaire, General Electric, Hewlett-Packard, Jackson-Catnapper, LG, Samsung, Sealy, Serta, Sharp, Steve Silver, Sony, Toshiba, and Vaughn-Bassett. We do not have long-term supply agreements or exclusive arrangements with the majority of our vendors. We typically order our inventory and repair parts through the issuance of individual purchase orders to vendors. We also rely on our suppliers for cooperative advertising support. We may be subject to rationing by suppliers with respect to a number of limited distribution items. In addition, we rely heavily on a relatively small number of suppliers. Our top six suppliers represented 72.0% of our purchases for fiscal year 2012, and the top two suppliers represented approximately 48.6% of our total purchases. The loss of any one or more of these key vendors or failure to establish and maintain relationships with these and other vendors, and limitations on the availability of inventory or repair parts could have a material adverse effect on our results of operations and financial condition. If one of our vendors were to go out of business, it could have a material adverse effect on our results of operations and financial condition if such vendor is unable to fund amounts due to us, including payments due for returns of product and warranty claims. Catastrophic or other unforeseen events, such as the one which impacted Japan during 2011, could adversely impact the supply and delivery of products to us and could adversely impact our results of operations.

Our ability to enter new markets successfully depends, to a significant extent, on the willingness and ability of our vendors to supply merchandise to additional warehouses or stores. If vendors are unwilling or unable to supply some or all of their products to us at acceptable prices in one or more markets, our results of operations and financial condition could be materially adversely affected.

Furthermore, we rely on credit from vendors to purchase our products. As of October 31, 2012, we had \$66.2 million in accounts payable and \$77.2 million in merchandise inventories. A substantial change in credit terms from vendors or vendors' willingness to extend credit to us, including providing inventory under consignment arrangements, would reduce our ability to obtain the merchandise that we sell, which would have a material adverse effect on our sales and results of operations.

Our vendors also supply us with marketing funds and volume rebates. If our vendors fail to continue these incentives it could have a material adverse effect on our sales and results of operations.

You should not rely on our comparable store sales as an indication of our future results of operations because they fluctuate significantly. Our historical same store sales growth figures have fluctuated significantly from quarter to quarter. A number of factors have historically affected, and will continue to affect, our comparable store sales results, including:

- Changes in competition, such as pricing pressure, and the opening of new stores by competitors in our markets;
- General economic conditions;
- New product introductions;
- Consumer trends;
- Changes in our merchandise mix;
- Changes in the relative sales price points of our major product categories;
- Ability to offer credit programs attractive to our customers;

- The impact of any new stores on our existing stores, including potential decreases in existing stores' sales as a result of opening new stores;
 - Weather conditions in our markets;
 - Timing of promotional events;
 - Timing, location and participants of major sporting events;
 - Reduction in new store openings;
 - The percentage of our stores that are mature stores;
 - The locations of our stores and the traffic drawn to those areas;
 - How often we update our stores; and
 - Our ability to execute our business strategy effectively.

Changes in our quarterly and annual comparable store sales results could cause the price of our common stock to fluctuate significantly.

We experience seasonal fluctuations in our sales and quarterly results. We typically experience seasonal fluctuations in our net sales and operating results, with the quarter ending January 31, which includes the holiday selling season, generally accounting for a larger share of our net sales and net income. We also incur significant additional expenses during such fiscal quarter due to higher purchase volumes and increased staffing. If we miscalculate the demand for our products generally or for our product mix during the fiscal quarter ending January 31, or if we experience adverse events, such as bad weather in our markets during our fourth fiscal quarter, our net sales could decline, resulting in excess inventory or increased sales discounts to sell excess inventory, which would harm our financial performance. A shortfall in expected net sales, combined with our significant additional expenses during this fiscal quarter, could cause a significant decline in our operating results and such sales may not be deferred to future periods.

Our business could be adversely affected by changes in consumer protection laws and regulations. Federal and state consumer protection laws and regulations, such as the Fair Credit Reporting Act, and the Consumer Financial Protection Bureau limit the manner in which we may offer and extend credit. Because our customers finance through our credit segment a substantial portion of our sales, any adverse change in the regulation of consumer credit could adversely affect our total sales and gross margins. For example, new laws or regulations could limit the amount of interest or fees that may be charged on consumer credit accounts, including by reducing the maximum interest rate that can be charged in the states in which we operate, or restrict our ability to collect on account balances, which would have a material adverse effect on our cash flow and results of operations. Compliance with existing and future laws or regulations, including regulations that may be applicable to us under the Dodd-Frank Wall Street Reform and Consumer Protection Act, which was enacted into law in July 2010, could require us to make material expenditures, in particular personnel training costs, or otherwise adversely affect our business or financial results. Failure to comply with these laws or regulations, even if inadvertent, could result in negative publicity, fines or additional licensing expenses, any of which could have an adverse effect on our cash flow and results of operations.

We are required to comply with laws and regulations regulating credit extensions and other dealings with customer and our failure to comply with applicable laws and regulations, or any adverse change in those laws or regulations, could have a negative impact on our business. Our customers finance through our credit segment a substantial portion of our sales. We also sell our customers gift cards for redemption against future purchases. Providing credit and other financial products and otherwise dealing with consumers and information provided by consumers does or could subject us to the jurisdiction of various federal, state and local government authorities, including the Consumer Financial Protection Bureau, which was created by the Dodd-Frank Wall Street Reform and Consumer Protection Act, the Federal Trade Commission, the SEC, state regulators having jurisdiction over persons engaged in consumer sales, consumer credit and other financial products and consumer debt collection, and state attorneys general. Our business practices, including the terms of our marketing and advertising, our procedures and practices for credit applications and underwriting, the terms of our credit extensions and gift cards and related disclosures, our data privacy and protection practices, and our collection practices, may be subject to periodic or special reviews by these regulatory and enforcement authorities. These reviews could range from investigations of specific consumer complaints or concerns to broader inquiries into our practices generally. If as part of these reviews the regulatory authorities conclude that we are not complying with applicable law or regulations, they could request or impose a wide range of sanctions and remedies including requiring changes in advertising and collection practices, changes in our credit application and underwriting practices, changes in our data privacy or protection practices, changes in the terms of our credit or other financial products (such as decreases in interest rates or fees), the imposition of fines or penalties, or the paying of restitution or the taking of other remedial action with respect to affected customers. They also could require us to stop offering some of our credit or other financial products within one or more states, or nationwide.

Negative publicity relating to any specific inquiry or investigation, regardless of whether we have violated any applicable law or regulation or the extent of any such violation, could negatively affect our reputation and our brand as well as our stock price, which would adversely affect our ability to raise additional capital and would raise our costs of doing business. If any deficiencies or violations of law or regulations are identified by us or asserted by any

regulator or other person, or if any regulatory or enforcement authority or court requires us to change any of our practices, the correction of such deficiencies or violations, or the making of such changes, could have a material adverse effect on our financial condition, results of operations or business. We face the risk that restrictions or limitations resulting from the enactment, change, or interpretation of federal or state laws and regulations, such as the Dodd-Frank Act, could negatively affect our business activities, require us to make material expenditures or effectively eliminate credit products or other financial products currently offered to customers.

In addition, whether or not we modify our practices when a regulatory or enforcement authority or court requests or requires that we do so, there is a risk that we or other industry participants may be named as defendants in individual or class action litigation involving alleged violations of federal and state laws and regulations, including consumer protection laws and regulations. Any failure on our part to comply with legal requirements in connection with credit or other financial products, or in connection with servicing our accounts or collecting debts or otherwise dealing with consumers, could significantly impair our ability to collect the full amount of the account balances and could subject us to substantial liability for damages or penalties. The institution of any litigation of this nature, or the rendering of any judgment, against us or any other industry participant in any litigation of this nature, could adversely affect our business and financial condition.

Pending litigation relating to the sale of credit insurance and the sale of repair service agreements in the retail industry could adversely affect our business. State attorney generals and private plaintiffs have filed lawsuits against other retailers relating to improper practices conducted in connection with the sale of credit insurance in several jurisdictions around the country. We offer credit insurance in our stores on sales financed under our credit programs and require the customer to purchase property insurance from us or provide evidence from a third-party insurance provider, at their election, in connection with sales of merchandise on installment credit; therefore, similar litigation could be brought against us. While we believe we are in full compliance with applicable laws and regulations, if we are found liable in any future lawsuit regarding credit insurance or repair service agreements, we could be required to pay substantial damages or incur substantial costs as part of an out-of-court settlement or require us to modify or suspend certain operations any of which could have a material adverse effect on our results of operations. An adverse judgment or any negative publicity associated with our repair service agreements or any potential credit insurance litigation could also affect our reputation, which could have a negative impact on our cash flow and results of operations.

Pending and potential litigation regarding alleged patent infringements could result in significant costs to us to defend what we consider to be spurious claims. Recently the manufacturing, retail and software industries have been the targets of patent litigation claimants filing claims or demands based upon alleged patent ownership infringement through the manufacturing and selling, either in merchandise or through software and internet websites, of product or merely providing access through website portals. We, in conjunction with multiple other parties, have been the targets of such claims. While we believe that we have not violated or infringed on any alleged patent ownership rights, and intend to defend vigorously any such claims, the cost to defend, settle or pay any such claims could be substantial, and could have an adverse effect on our cash flow and results of operations.

Our corporate actions may be substantially controlled by our principal shareholders and affiliated entities. As of November 29, 2012, Stephens Inc. and The Stephens Group, LLC, and their affiliated entities beneficially owned approximately 22.3% and 25.7%, respectively, of our common stock. Their interests may conflict with the will or interests of our other equity holders. While Stephens Inc. and its affiliates hold their 21.6% of our common stock through a voting trust that will vote the shares in the same proportion as votes cast by all other stockholders, this voting trust agreement will expire in October 31, 2013, unless extended, and upon expiration Stephens Inc. and its affiliates will not be restricted on how it votes its shares. These stockholders, acting individually or as a group, could exert substantial influence over matters such as electing directors and approving mergers or other business combination transactions.

If we lose key management or are unable to attract and retain the qualified sales and credit granting and collection personnel required for our business, our operating results could suffer. Our future success depends to a significant degree on the skills, experience and continued service of our key executives or the identification of suitable successors for them. If we lose the services of any of these individuals, or if one or more of them or other key personnel decide to join a competitor or otherwise compete directly or indirectly with us, and we are unable to identify a suitable successor, our business and operations could be harmed, and we could have difficulty in implementing our strategy. In addition, as our business grows, we will need to locate, hire and retain additional qualified sales personnel in a timely manner and develop, train and manage an increasing number of management level sales associates and other employees. Additionally, if we are unable to attract and retain qualified credit granting and collection personnel, our ability to perform quality underwriting of new credit transactions and maintain workloads for our collections personnel at a manageable level, our operation could be adversely impacted and result in higher delinquency and net charge-offs on our credit portfolio. Competition for qualified employees could require us to pay higher wages to attract a sufficient number of employees, and increases in the federal minimum wage or other employee benefits costs could increase our operating expenses. If we are unable to attract and retain personnel as needed in the future, our net sales and operating results could suffer.

Our costs of doing business could increase as a result of changes in federal, state or local regulations. Changes in the federal, state or local minimum wage requirements or changes in other wage or workplace regulations could increase our cost of doing business. In addition, changes in federal, state or local regulations governing the sale of some of our products or tax regulations could increase our cost of doing business. Also, passage of the Employer Free Choice Act or similar laws in Congress could lead to higher labor costs by encouraging unionization efforts among our associates and disruption of store operations.

Because our stores are located in Texas, Louisiana, Oklahoma and New Mexico, and our distribution centers are located in Texas, we are subject to regional risks. Our 66 stores are located exclusively in Texas, Louisiana, Oklahoma and New Mexico and our four regional distribution centers are located in Texas. This subjects us to regional risks, such as the economy, weather conditions, hurricanes and other natural or man-made disasters. If the region suffers a continued or another economic downturn or any other adverse regional event, there could be an adverse impact on our net sales and results of operations and our ability to implement our planned expansion program. Several of our competitors operate stores across the United States and thus are not as vulnerable to the risks of operating in one region. Additionally, these states in general, and the local economies where many of our stores are located in particular, are dependent, to a degree, on the oil and gas industries, which can be very volatile. Additionally, because of fears of climate change and adverse effects of drilling explosions and oil spills in the Gulf of Mexico, legislation has been considered, and governmental regulations and orders have been issued, which, combined with the local economic and employment conditions caused by both, could materially and adversely impact the oil and gas industries and the areas in which a majority of our stores are located in Texas and Louisiana. To the extent the oil and gas industries are negatively impacted by declining commodity prices, climate change or other legislation and other factors, we could be negatively impacted by reduced employment, or other negative economic factors that impact the local economies where we have our stores.

In addition, recent turmoil in the national economy, including instability in the financial markets, has impacted our local markets. A downturn in the general economy, or in the region where we have our stores, could have a negative impact on our net sales and results of operations.

Our information technology infrastructure is vulnerable to damage that could harm our business. Our ability to operate our business from day to day, in particular our ability to manage our credit operations and inventory levels, largely depends on the efficient operation of our computer hardware and software systems. We use management information systems to track inventory information at the store level, communicate customer information, aggregate daily sales information and manage our credit portfolio, including processing of credit applications and management of collections. These systems and our operations are subject to damage or interruption from:

- Power loss, computer systems failures and Internet, telecommunications or data network failures;
- Operator negligence or improper operation by, or supervision of, employees;
- Physical and electronic loss of data or security breaches, misappropriation and similar events;
- Computer viruses;
- Intentional acts of vandalism and similar events; and
- Hurricanes, fires, floods and other natural disasters.

In addition, the software that we have developed to use in our daily operations may contain undetected errors that could cause our network to fail or our expenses to increase. Any failure of our systems due to any of these causes, if it is not supported by our disaster recovery plan, could cause an interruption in our operations and result in reduced net sales and results of operations. Though we have implemented contingency and disaster recovery processes in the event of one or several technology failures, any unforeseen failure, interruption or compromise of our systems or our security measures could affect our flow of business and, if prolonged, could harm our reputation. The risk of possible failures or interruptions may not be adequately addressed by us or the third parties on which we rely, and such failures or interruptions could occur. The occurrence of any failures or interruptions could have a material adverse effect on our business, financial condition, liquidity and results of operations.

If we are unable to maintain our insurance licenses in the states we operate, our results of operations would suffer. We derive a significant portion of our revenues and operating income from the commissions we earn from the sale of various insurance products of third-party insurers to our customers. These products include credit insurance, repair service agreements and product replacement policies. We also are the direct obligor on certain extended repair service agreements we offer to our customers. If for any reason we were unable to maintain our insurance licenses in the states we operate or if there are material claims or future material litigation involving our repair service agreements or product replacement policies, our results of operations would suffer.

If we are unable to continue to offer third-party repair service agreements to our customers who purchase, or have purchased our products, we could incur additional costs or repair expenses, which would adversely affect our financial condition and results of operations. There are a limited number of insurance carriers that provide repair service agreement programs. If insurance becomes unavailable from our current providers for any reason, we may be unable to provide repair service agreements to our customers on the same terms, if at all. Even if we are able to obtain a substitute provider, higher premiums may be required, which could have an adverse impact on our profitability if we are unable to pass along the increased cost of such coverage to our customers. Inability to maintain the repair service agreement program could cause fluctuations in our repair expenses and greater volatility of earnings and could require

us to become the obligor under new contracts sold.

If we are unable to maintain group credit insurance policies from insurance carriers, which allow us to offer their credit insurance products to our customers purchasing our merchandise on credit, our revenues would be reduced and the provision for bad debts might increase. There are a limited number of insurance carriers that provide credit insurance coverage for sale to our customers. If credit insurance becomes unavailable for any reason we may be unable to offer substitute coverage on the same terms, if at all. Even if we are able to obtain substitute coverage, it may be at higher rates or reduced coverage, which could affect the customer acceptance of these products, reduce our revenues or increase our credit losses.

Changes in premium and commission rates allowed by regulators on the credit insurance, repair service agreements or product replacement agreements we sell as allowed by the laws and regulations in the states in which we operate could affect our revenues. We derive a significant portion of our revenues and operating income from the sale of various third-party insurance products to our customers. These products include credit insurance, repair service agreements and product replacement agreements. If the commission we retain from sales of those products declines, our operating results would suffer.

Changes in trade regulations, currency fluctuations and other factors beyond our control could affect our business. A significant portion of our inventory is manufactured and/or assembled overseas and in Mexico. Changes in trade regulations, currency fluctuations or other factors beyond our control may increase the cost of items we purchase or create shortages of these items, which in turn could have a material adverse effect on our results of operations and financial condition. Conversely, significant reductions in the cost of these items in U.S. dollars may cause a significant reduction in the retail prices of those products, resulting in a material adverse effect on our sales, margins or competitive position. In addition, commissions earned on our credit insurance, repair service agreement or product replacement agreement products could be adversely affected by changes in statutory premium rates, commission rates, adverse claims experience and other factors.

Our costs to protect our intellectual property rights, infringement of which could impair our name and reputation, could be significant. We believe that our success and ability to compete depends in part on consumer identification of the name “Conn’s.” We have registered the trademarks “Conn’s,” “Conn’s HomePlus,” “YES Money,” “YE\$ Money,” “SI Money” and our logos. We intend to protect vigorously our trademark against infringement or misappropriation by others. A third party, however, could attempt to misappropriate our intellectual property in the future. The enforcement of our proprietary rights through litigation could result in substantial costs to us that could have a material adverse effect on our financial condition or results of operations.

Failure to protect the security of our customer’s information or failure to comply with data privacy and protection laws could expose us to litigation, judgments for damages, increased operating costs and undermine the trust placed with us by our customers. We capture, transmit, handle and store sensitive information, which involves certain inherent security risks. Such risks include, among other things, the interception of customer data and information by persons outside us or by our own employees. While we believe we have taken appropriate steps to protect confidential information, there can be no assurance that we can prevent the compromise of our customers’ data or other confidential information. If such a breach should occur it could have a severe negative impact on our business and results of operations. In addition, interpretation and application of privacy and customer data protection laws are in a state of flux and vary from jurisdiction to jurisdiction, and various governmental entities are considering imposing new regulations on data privacy and protection. These new regulations may be interpreted and applied inconsistently and our current policies and practices, which could cause us to incur substantial costs or require us to change our business practices in a manner adverse to our business.

Any changes in the tax laws of the states in which we operate could affect our state tax liabilities. Additionally, beginning operations in new states could also affect our state tax liabilities. As we experienced in fiscal year 2008 with the change in the Texas tax law, legislation could be introduced at any time that changes our state tax liabilities in a way that has an adverse impact on our results of operations. The Texas margin tax, which is based on gross profit rather than earnings, can create significant volatility in our effective tax rate. The potential to enter new states in the future could adversely affect our results of operations, dependent upon the tax laws in place in those states.

Significant volatility in oil and gasoline prices could affect our customers’ determination to drive to our stores, and cause us to raise our delivery charges. Significant volatility in oil and gasoline prices could adversely affect our customers’ shopping decisions and patterns. We rely heavily on our distribution system and our next day delivery policy to satisfy our customers’ needs and desires, and increases in oil and gasoline prices could result in increased distribution charges. Such increases may not significantly affect our competitors.

Failure to successfully utilize and manage e-commerce could adversely affect our business and prospects. Our website is a significant driver of our sales and we believe represents a possible source for future sales growth. In order to promote our products, allow our customers to complete credit applications in the privacy of their homes and drive traffic to our stores, we must effectively create, design, publish and distribute content. There can be no assurance that we will be able to design and publish web content with a high level of effectiveness or grow our e-commerce business in a profitable manner.

The price of our common stock has fluctuated substantially over the past several years and may continue to fluctuate substantially in the future. During fiscal year 2011, the trading price of our common stock ranged from a low of \$3.12 per share to a high of \$10.33 per share and from February 1, 2012 through November 29, 2012, the trading price of our common stock ranged from a low of \$10.87 per share to a high of \$29.23 per share. Our stock may continue to be subject to fluctuations as a result of a variety of factors, which are described above. Some of these factors are beyond our control. We may fail to meet the expectations of our stockholders or securities analysts at some time in the future, and our stock price could decline as a result.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Mine Safety Disclosure

None.

Item 5. Other Information

(a) On November 30, 2012, Reymundo de la Fuente, Jr., President – Credit Division, announced he is resigning from the Company effective January 31, 2013.

(b) There have been no material changes to the procedures by which security holders may recommend nominees to our board of directors since we last provided disclosure in response to the requirements of Item 7(d)(2)(ii)(G) of Schedule 14A.

Item 6. Exhibits

The exhibits required to be furnished pursuant to Item 6 of Form 10-Q are listed in the Exhibit Index filed herewith, which Exhibit Index is incorporated herein by reference.
