Item 2.02 Results of Operations and Financial Condition

On October 31, 2017, Mastercard Incorporated (“Mastercard”) issued an earnings release announcing financial results for its third quarter 2017.

A copy of the earnings release is attached hereto as Exhibit 99.1. All information in the press release is furnished but not filed.

Non-GAAP Financial Information

In the attached press release, Mastercard discloses as non-GAAP financial measures adjusted operating expenses, adjusted operating margin, adjusted effective income tax rate, adjusted net income and adjusted diluted earnings per share (as well as related applicable growth rates versus the comparable period in the prior year), that each exclude the impact of the following:

- In the first quarter of 2017, Mastercard recorded a provision for litigation related to a litigation settlement with Canadian merchants.

- In the second quarter of 2016, Mastercard recorded a provision for litigation related to a judgment issued against the Company in a litigation with a merchant in the U.K.

Mastercard excluded these litigation provisions because its management monitors material litigation judgments and settlements separately from ongoing operations and evaluates ongoing performance without these amounts. Mastercard’s management believes that the non-GAAP financial measures presented facilitate an understanding of Mastercard’s operating performance and meaningful comparison of its results between periods.

In the attached earnings release, management also presents growth rates on a currency-neutral basis, which is a non-GAAP financial measure. Currency-neutral growth rates are calculated by remeasuring the prior period’s results using the current period’s exchange rates for both the translational and transactional impacts on operating results. The impact of foreign currency translation represents the effect of translating operating results where the functional currency is different than our U.S. dollar reporting currency. The impact of the transactional foreign currency represents the effect of converting revenue and expenses occurring in a currency other than the functional currency. Mastercard’s management believes the presentation of certain currency-neutral growth rates provides relevant information.

Mastercard’s management uses non-GAAP financial measures to, among other things, evaluate its ongoing operations in relation to historical results, for internal planning and forecasting purposes and in the calculation of performance-based compensation. The attached press release includes reconciliations of the requisite non-GAAP financial measures to the most directly comparable GAAP financial measures. The presentation of non-GAAP financial measures should not be considered in isolation or as a substitute for Mastercard’s related financial results prepared in accordance with GAAP.

Item 9.01 Financial Statements and Exhibits

(d) Exhibits.
