INTERPHARM HOLDINGS, INC. AND SUBSIDIARIES
Notes to Condensed Consolidated Financial Statements (Unaudited)

NOTE 1 - Condensed Consolidated Financial Statements
The accompanying interim unaudited consolidated financial statements include the accounts of Interpharm Holdings, Inc. and its subsidiaries that are hereafter referred to as (the "Company"). All intercompany accounts and transactions have been eliminated in consolidation.

These financial statements have been prepared in accordance with

\section*{Edgar Filing: INTERPHARM HOLDINGS INC - Form 10-Q}
accounting principles generally accepted in the United States of America for interim financial information and with the instructions to Form 10-Q. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. In the opinion of management, such interim statements reflect all adjustments (consisting of normal recurring accruals) necessary to present fairly the financial position and the results of operations and cash flows for the interim periods presented. The operating results for the three and nine months ended March 31, 2005 are not necessarily indicative of the results that may be expected for the fiscal year ending June 30, 2005. For further information, refer to the consolidated financial statements and footnotes thereto included in the Company's Form \(10-\mathrm{K}\) for the year ended June 30 , 2004 .

NOTE 2 - Summary of Significant Accounting Policies
Nature of Business
Interpharm Holdings, Inc. through its wholly-owned subsidiary, Interpharm, Inc. ("Interpharm, Inc.") is in the business of developing, manufacturing and marketing generic prescription strength and over-the-counter pharmaceutical products for wholesale distribution throughout the United States. The majority of the Company's sales have been derived from sales of Ibuprofen tablets in both over-the-counter and prescription strength.

\section*{Earnings Per Share}

Basic earnings per share ("EPS") of common stock is computed by dividing net (loss) income available to common stockholders by the weighted average number of shares of common stock outstanding during the period. Diluted EPS reflects the amount of net (loss) income for the period available to each share of common stock outstanding during the reporting period, giving effect to all potentially dilutive shares of common stock from the potential exercise of stock options and warrants and conversions of convertible preferred stocks. In accordance with EITF Issue No. 03-6, "Participating Securities and the Two-Class Method Under FASB Statement No. 128, Earnings Per Share," in periods when there is a net income, the Company uses the two-class method to calculate the effect of the participating Series \(K\) on the calculation of basic EPS and the if-converted method is used to calculate the effect of the participating Series K on diluted EPS. In periods when there is a net loss, the effect of the participating Series \(K\) is excluded from both basic and diluted EPS.

Use of Estimates in the Financial Statements
The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates. Significant estimates include deferred tax asset valuations and inventory overhead costing estimates.

Capitalization of Interest and Other Costs
The Company capitalizes interest on borrowings and certain other direct costs during the active construction period of major capital projects. Capitalized costs are added to the cost of the underlying assets and will

NOTE 2 - Summary of Significant Accounting Policies, continued
be depreciated over the useful lives of the assets. The Company capitalized approximately \(\$ 271,000\) during the nine month period ended March 31, 2005 in connection with its capital improvements to the Brookhaven, NY facility.

Stock Based Compensation
At March 31, 2005, the Company had two stock-based employee plans. As permitted under Statement of Financial Accounting Standards ("SFAS") No. 148, "Accounting for Stock-Based Compensation - Transition and Disclosure," which amended SFAS No. 123, "Accounting for Stock-Based Compensation," the Company has elected to continue to follow the intrinsic value method in accounting for its stock-based employee compensation arrangements as defined by Accounting Principles Board Opinion ("APB") No. 25, "Accounting for Stock Issued to Employees," and related interpretations including Financial Accounting Standards Board ("FASB") Interpretation ("FIN") No. 44, "Accounting for Certain Transactions Involving Stock Compensation," an interpretation of APB No. 25. No stock-based employee compensation cost is reflected in operations, as all options granted under those plans have an exercise price equal to the market value of the underlying common stock on the date of grant. The following table illustrates the effect on net (loss) income and net (loss) income per share as if the Company had applied the fair value recognition provisions of SFAS No. 123 to stock-based employee compensation:
\begin{tabular}{|c|c|c|c|c|c|c|}
\hline & \multicolumn{4}{|c|}{Three Months Ended March 31,} & \multicolumn{2}{|r|}{Nine Mar} \\
\hline & & 2005 & & & & 2005 \\
\hline Net (loss) income, as reported & \$ & \((633,574)\) & \$ & 983,530 & \$ & 405 , \\
\hline ```
Less: Stock-based employee
    compensation expense
    determined under fair value-based
    method for all awards, net of income tax
``` & & 9,270,345 & & 212,550 & & 10,583, \\
\hline Pro forma net (loss) income & \$ & \((9,903,919)\) & \$ & 770,980 & \$ & (10, 178, \\
\hline \multicolumn{7}{|l|}{Basic net (loss) income per share} \\
\hline Pro forma & \$ & (0.40) & \$ & 0.04 & \$ & ( 0 \\
\hline \multicolumn{7}{|l|}{Diluted net (loss) income per share} \\
\hline Pro forma & \$ & (0.40) & \$ & 0.01 & \$ & \\
\hline
\end{tabular}

In December 2004, the FASB finalized SFAS No. 123R "Share-Based Payment" which will require the Company to expense stock options based on grant date fair value in its financial statements. The effect of expensing stock options on the Company's results of operations using a Black-Scholes option-pricing model is presented in the preceding pro forma table. The 2005 period includes the pro-forma effects of accelerating options valued at \(\$ 4.2\) million, as discussed below.

In an effort to reduce the expected impact to be incurred in future periods as a result of adopting SFAS 123R, the Company has chosen to accelerate the vesting provisions of \(1,192,000\) options, which represents the total unvested options granted after May 30, 2003 through December 31, 2004. An aggregate of

INTERPHARM HOLDINGS, INC. AND SUBSIDIARIES
Notes to Condensed Consolidated Financial Statements (Unaudited)

NOTE 2 - Summary of Significant Accounting Policies, continued
\(1,000,000\) such options were granted to executives of the Company. Since options granted on or prior to May 30, 2003 are not fully vested, the Company expects to record stock options expense commencing the first quarter of fiscal 2006.

The fair values of Company common stock options granted to employees were estimated on the date of grant using the Black-Scholes option-pricing model with the following assumptions: (1) expected volatility ranging from \(106 \%\) to \(131 \%\) in 2005 and \(124 \%\) in 2004, respectively (2) risk-free interest rate ranging from 4.25\% to 5.58\% in 2005 and \(3.4 \%\) for 2004 , respectively and (3) expected average lives of 10 years for 2005 and 2004, respectively.

Reclassifications

Certain reclassifications have been made to the condensed consolidated financial statements for the prior period in order to have it conform to the current period's classifications. These reclassifications have no effect on previously reported net (loss) income.

Recently Issued Accounting Pronouncements

In November 2004, the FASB issued SFAS No. 151, "Inventory Costs, an amendment of ARB No. 43, Chapter 4". SFAS 151 clarifies that abnormal inventory costs such as costs of idle facilities, excess freight and handling costs, and wasted materials (spoilage) are required to be recognized as current period costs. The provisions of SFAS 151 are effective for the Company's fiscal year 2006. The Company is currently evaluating the provisions of SFAS 151 and does not expect adoption will have a material impact on its financial position, results of operations, or cash flows.

In December 2004, the FASB finalized SFAS 123R amending SFAS No. 123,

\section*{Edgar Filing: INTERPHARM HOLDINGS INC - Form 10-Q}
effective beginning the first quarter of fiscal 2006. SFAS 123R will require the Company to expense stock options based on grant date fair value in its financial statements. Further, the adoption of SFAS 123R will require additional accounting related to the income tax effects and additional disclosure regarding the cash flow effects resulting from share-based payment arrangements. The adoption of SFAS 123R will have no effect on the Company's cash flows, but is expected to have a material adverse impact on its results of operations.

On March 3, 2005 the FASB issued FASB Staff Position FIN 46 (R)-5, which addresses whether a reporting enterprise should consider whether it holds an implicit variable interest in a variable interest entity ("VIE") or a potential VIE when specific conditions exist. The guidance shall be applied to the first reporting period beginning after March 3, 2005, but early application is permitted for periods in which financial statements have not yet been issued.

The Company leases its premises from Sutaria Realty Family Trust. Sutaria Realty Family Trust is owned directly or indirectly by officers of the Company. Management is evaluating the relationship between the Company and Sutaria Realty Family Trust to determine if Sutaria Realty Family Trust is an implicit variable interest entity and the impact on the condensed consolidated financial statements.

\section*{NOTE 5 - Bank Debt}

At March 31, 2005, the Company had \(\$ 5,970,000\) outstanding under advised lines of credit, with \(\$ 7,630,000\) available for future borrowings. Interest rates applied to these borrowings are calculated at ninety day LIBOR plus 150 basis points and range from 4.12\% to 4.46\%. At the end of each term the Company has the option to extend the borrowings at LIBOR plus 150 basis points for terms ranging from 3 to 36 months or at the Bank's then fixed prime rate. In addition, the Company will be required to comply with certain financial covenants. The credit lines are terminable by the Bank at any time as to undrawn amounts.

Additionally, the Company has mortgage note payable of \(\$ 7,153,333\) of which \(\$ 6,783,333\) is accounted for as long term and \(\$ 370,000\) is accounted for as current. At March 31, 2005 the interest rate was \(4.46 \%\) and will be recalculated on July 1, 2005.

During the nine month period ended March 31, 2005 the Company repaid approximately \(\$ 425,000\) of various bank lines of credit, as well as \(\$ 247,000\) of the mortgage note payable.

INTERPHARM HOLDINGS, INC. AND SUBSIDIARIES

\end{tabular}

NOTE 6- Income Taxes

At March 31, 2005 the Company has remaining Federal net operating loss carryforwards ("NOLs") of approximately \(\$ 11,500,000\) and State NOLs of approximately \(\$ 10,900,000\) expiring through 2024 . Pursuant to Section 382 of the Internal Revenue Code regarding substantial changes in Company ownership, utilization of these NOLs is limited to approximately \(\$ 2,690,000\) per year, plus any prior years' amount not utilized, if any. As of March 31, 2005, the Company has determined that it is more likely than not, that the Company will utilize all of the Federal NOLs in the future. The Company recorded a valuation allowance for approximately \(30 \%\) of the State NOLs which the Company does not anticipate utilizing due to State limitations.

In calculating its tax provision for the three and nine month periods ended March 31, 2005, the Company applied an aggregate effective tax rate of approximately \(37 \%\) thereby creating a deferred income tax benefit of \(\$ 373,000\) and an deferred income tax expense of \(\$ 210,000\), respectively, and adjusted its deferred tax asset by like amounts.

NOTE 7- Earning Per Share

As of March 31,2005, the total number of common shares outstanding and the number of common shares potentially issuable upon exercise of all outstanding stock options and conversion of preferred stocks (including contingent conversions) is as follows:
\begin{tabular}{lr} 
Common stock outstanding - March 31, 2005 & \(24,967,202\) \\
Stock options and Warrants outstanding & \(12,917,500\) \\
Common stock issuable upon conversion of preferred stocks: & 1,522 \\
Series A & \\
Series A-1 (maximum contingent conversion) - (a) & \(4,855,389\) \\
Series B & \\
Series C & 292 \\
Series K -- (b)
\end{tabular}

Total - (c) 80,396,139
==========
(a) The Series A-1 shares are convertible only if the Company reaches \(\$ 150\) million in annual sales or upon a merger, consolidation, sale of assets or similar transaction.
(b) On June 4, 2004 one seventh of the 2,050,393 Series \(K\) shares, or 292,913 shares, converted into \(6,274,775\) of the Company's common stock. On June 4, 2005 and on each anniversary date thereof, through June 4, 2010, 292,913 Series \(K\) shares will automatically convert into \(6,274,775\) shares of the Company's common stock.
(c) Assuming no further issuance of equity instruments, or changes to the equity structure of the company, this total represents the maximum number of shares of common stock that could be outstanding through December 31, 2011 (the end of the current vesting and conversion periods).

NOTE 8 - Equity Securities

Common Stock and Stock Options
During the three month period ended March 31, 2005, the Company issued \(2,382,500\) options to purchase its common stock as follows:
o As part of an employment agreement 2,000,000 vested options were issued to the Company's Chief Executive Officer, Cameron Reid having an exercise price of \(\$ 2.24\), which was the closing price of the Company's common stock on the date of the grant.
o 25,000 vested options were granted to the Company's Chief Financial Officer, having an exercise price of \(\$ 2.24\), which was the closing price of the Company's common stock on the date of the grant.
o 50,000 vested options were granted to the Company's director of business development, having an exercise price of \(\$ 2.24\), which was the closing price of the Company's common stock on the date of the grant.
o 150,000 options were granted to the Company's VP of sales and marketing, having an exercise price of \(\$ 2.24\), which was the closing price of the Company's common stock on the date of the grant. \(20 \%\) of the options shall vest on June 30,2006 , and \(20 \%\) on each of the next four anniversaries thereof.
o 150,000 options were granted to the Company's VP of intellectual property, having an exercise price of \(\$ 1.94\), which was the closing price of the Company's common stock on the date of the grant. 40,000 of the options are fully vested on the grant date; the balance shall vest at \(20 \%\) on February 28, 2006, and \(20 \%\) on each of the next four anniversaries thereof.
o 7,500 options were granted to a non-executive employee. The options vest at March 31, 2006 and have an exercise price of \(\$ 1.64\), which was the closing price of the Company's common stock on the date of the grant.

No common stock options were granted during the three month period ending December 31, 2004. During the three month period ending September 30, 2004, 75,000 options were granted to a non executive new employee to purchase a like amount of the Company's common shares. These options are exercisable at a price of \(\$ 2.73\) per share.

\section*{Preferred Stock}

In November, 2004, the Board of Directors, declared a dividend of \(\$ 178\), 719 , in accordance with the terms set forth in the Series \(A-1\) Cumulative Convertible Preferred stock ("A-1 shares"). The A-1 shares have a cumulative annual dividend of \(\$ 0.0341\) per share. The declared dividend was cumulative through June 30 , 2004, and was paid March 10, 2005. As of March 31, 2005 the Company's Board of Directors had not yet declared any dividend on the A-1 shares for the period July 1, 2004 thru March 31, 2005. Such undeclared dividends amounted to approximately \(\$ 124,000\) (Note 14).

Treasury Stock
In January, 2005 the Company retired 624,145 shares of its treasury stock,
valued at approximately \(\$ 798,000\). This was accounted for as a reduction of the Company's Additional Paid-in Capital.

INTERPHARM HOLDINGS, INC. AND SUBSIDIARIES
Notes to Condensed Consolidated Financial Statements (Unaudited)

NOTE 9 - Economic Dependency

Major Customers

The Company had the following customer concentrations for the three and nine month periods ended March 31, 2005 and 2004:

Sales - Percent of Revenue
\begin{tabular}{|c|c|c|c|c|}
\hline \multirow[t]{2}{*}{} & \multicolumn{2}{|l|}{Three Months Ended March 31,} & \multicolumn{2}{|l|}{Nine Months Ended March} \\

\hline Customer "A" & 29\% & 24\% & 23\% & 29\% \\
\hline Customer "B" & 18 & 35 & 24 & 29 \\
\hline Customer "C" & 11 & 8 & 14 & 10 \\
\hline
\end{tabular}

\section*{Accounts Receivable}
\[
\text { March 31, } 2005
\]

Customer "A"
\$ 1,918,000
Customer "B"
1,595,000
Customer "C"
841,000

The Company complies with its supply agreement to sell various strengths of Ibuprofen to the Department of Veteran Affairs through two intermediary wholesale prime vendors whose data are combined and reflected in Customer "C" above.

Major Suppliers

For the three and nine month periods ended March 31, 2005, the Company purchased materials from three suppliers totaling approximately 75\% and \(73 \%\) of purchases, respectively. For the three and nine month periods ended March 31, 2004, the Company purchased materials from three suppliers totaling approximately and \(73 \%\) and \(85 \%\) respectively. At March 31,2005 and 2004, aggregate amounts due to these suppliers included in accounts payable, were approximately \(\$ 3,832,000\) and \(\$ 3,095,000\) respectively.
```

NOTE 10 - Related Party Transactions

```

\section*{Rents}

The Company leases its business premises located in Hauppauge, New York, ("Premises") from an entity controlled by three stockholders of the Company under a noncancelable lease expiring in October 2019, and is obligated to pay minimum annual rent of \(\$ 480,000\), plus property taxes,

\section*{Edgar Filing: INTERPHARM HOLDINGS INC - Form 10-Q}
insurance, maintenance and other expenses related to the Premises. The Company believes that the aggregate lease costs for the premises are less than those for comparable facilities in the area.

Upon a change in control, as defined, of the Company, and every three years thereafter, the annual rent will be adjusted to fair market value, as determined by an independent third party.

16

INTERPHARM HOLDINGS, INC. AND SUBSIDIARIES
Notes to Condensed Consolidated Financial Statements (Unaudited)

Investment in APR, LLC.
On February 16, 2005 the Company purchased 5.0 and 2.5 Class A membership interests ("Interests") from Cameron Reid ("Reid"), our Chief Executive Officer, and John Lomans ("Lomans"), who has no affiliation with the Company, for purchase prices of \(\$ 500,000\) and \(\$ 250,000\), respectively, of APR, LLC, a Delaware limited liability company primarily engaged in the development of complex bulk pharmaceutical products ("APR"). The purchases were made pursuant to separate Class A Membership Interest Purchase Agreements dated February 16, 2005 between the Company and Reid and Lomans (the "Purchase Agreements"). At the time of the purchases, Reid and Lomans owned all of the outstanding Class A membership interests of APR, which had outstanding 75 Class A membership interests and 100 Class B membership interests. The two classes of membership interests have different economic and voting rights, and the class A members have the right to make most operational decisions. The Class B interests are held by one of the Company's major customers and suppliers.

In connection with the purchases made by the Company on February 16, 2005, the Company had an agreement to purchase up to an additional 2.5 Interests from Lomans. On April 11, 2005 the Company purchased an additional 2.5 Interests from Lomans for a purchase price of \(\$ 250,000\). As such, the Company currently owns 10 Interests out of the 100 Interests now outstanding.

In accordance with the terms of the Purchase Agreements, the Company has granted to Reid and Lomans each a proxy to vote 5 of the Interests owned by the Company on all matters on which the holders of Interests may vote. The Board of Directors approved the purchases of Interests at a meeting held on February 15, 2005, based on an analysis and advice from an independent investment banking firm. Reid did not participate during the Company's deliberations on this matter. The Company is accounting for its investment in APR pursuant to the cost method of accounting.

\section*{NOTE 11 - Contingencies}

From time to time, the Company is a party to litigation arising in the normal course of its business operations. In the opinion of management, it is not anticipated that the settlement or resolution of any such matters will have a material adverse impact on the Company's financial condition, liquidity or results of operations.

NOTE 12 - Significant New Contracts

As previously announced, in February, 2005, the Company entered into two agreements with Tris Pharma, Inc. ("Tris"). One of the agreements is for the development and licensing of twenty-five liquid generic products. According to the terms of the agreement for the liquid products, Tris is

\section*{Edgar Filing: INTERPHARM HOLDINGS INC - Form 10-Q}
to develop and deliver the properties, specifications and formulations ("Technical Packages") necessary to effectuate a technology transfer to the Company for the twenty-five generic liquid pharmaceutical products. The Company will then utilize this information to obtain all necessary approvals and manufacture and market the products. Further, this agreement provides the Company with a perpetual license of all technology and components of the Technical Packages necessary to produce the liquid products that are the subject of the agreement. It also allows the Company the use of the technology for other products in exchange for an additional fee. In the event that Tris delivers twenty-five successful Technical Packages, of which there can be no assurance, the Company will pay Tris approximately \(\$ 3,000,000\). In addition, Tris is to receive a royalty of between \(10 \%\) and \(12 \%\) of net profits resulting from the sales of each product. As of March 31, 2005, the Company paid \(\$ 250,000\) to Tris. In accordance with the terms in the agreement, the Company will pay the remaining portion as various milestone deliveries are presented.

INTERPHARM HOLDINGS, INC. AND SUBSIDIARIES
Notes to Condensed Consolidated Financial Statements (Unaudited)

NOTE 12 - Significant New Contracts, continued

The other agreement is for development and licensing of seven solid generic pharmaceutical products, some of which require specialized technology. According to the terms of the agreement for the solid dosage products, the Company will collaborate with Tris on the development, manufacture and marketing of seven solid oral dosage generic products, some of which may require the Company to challenge the patents for the equivalent branded products. This agreement provides for payments of an aggregate of \(\$ 3,750,000\) to Tris, whether or not regulatory approval is obtained for any of the products. The agreement for solids also provides for an equal sharing of net profits for each product that is successfully sold and marketed, after the deduction and reimbursement of all litigation-related and certain other costs. Further, this agreement provides the company with a perpetual royalty-free license to use all technology necessary for the solid products in the United States, its territories and possessions. As of March 31, 2005, the Company paid \(\$ 750,000\), with the balance to be paid essentially over the next seven quarters.

NOTE 13 - Product Sales Analysis

An analysis of the Company's net sales by product for the three and nine month periods ended March 31, 2005 and March 31, 2004 is present below.
\begin{tabular}{|c|c|c|c|c|c|c|}

Total & \(\$ \quad 10,670\) & \(\$\) & 11,308 & \(\$\) & 28,561
\end{tabular}

NOTE 14 - Subsequent events
The Company's board of directors, at a meeting held May 12, 2005, declared a dividend payable amounting to \(\$ 124,177\) for the Series A-1 cumulative convertible preferred stock for cumulative dividends earned through March 31, 2005.

Subsequent to March 31, 2005, the Company issued 1,096,630 shares of its common stock as a result of an employee exercising a like amount of options. The Company received a cash deposit of approximately \(\$ 627,000\) during the quarter, in advance of the exercise of said stock options, included in Accounts payable, accrued expenses and other liabilities as at March 31, 2005.

INTERPHARM HOLDINGS, INC. AND SUBSIDIARIES
ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS of OPERATIONS

\section*{Overview}

Interpharm Holdings, Inc. ("Interpharm," "we," or "us"), through its wholly-owned subsidiary, Interpharm, Inc., is engaged in the business of developing, manufacturing and marketing generic over-the-counter and prescription strength pharmaceutical products. We make sales both under our own label and to wholesalers, distributors, repackagers, and other manufacturers which sell our products under their labels. Sales are recognized when the product is shipped and appropriate provisions are made for returns and charge backs.

Cameron Reid, with over 25 years experience in the pharmaceutical industry, joined our Board of Directors in May, 2004, to assist us in the creation of our internal business plan. Under Mr. Reid's direction, we have created a business plan which capitalizes on our core competencies in the selection of new products as well as diversifies our product development into new areas. In order to implement our plan, Mr. Reid was appointed Chief Executive Officer of Interpharm in January, 2005. Simultaneously with his appointment, Mr. Reid resigned his position on our Board of Directors to focus solely on his duties as Chief Executive Officer.

In order to accelerate our new product development, we have, since February 2005, entered into arrangements with three companies for the development of new products. We spent approximately \(\$ 1,659,000\) on research and development during the quarter ended March 31, 2005 as compared to approximately \(\$ 81,000\) during the same period last year. In order to successfully implement our plan, we will continue to increase our research and development expenditures. However, there can be no assurance that our increased expenditures will result in successful products or increased revenues or profits. In order to capitalize on the availability of qualified scientific and other research and development

\section*{Edgar Filing: INTERPHARM HOLDINGS INC - Form 10-Q}
personnel at significant cost savings, we have begun planning for a research and development facility in Ahmnebad, India. In addition to supplementing our continuing research and development activities in the United States, the planned facility in India, if and when completed, will reduce our reliance on third parties for new product development. However, as we expand our internal research and development capabilities, we will continue to seek strategic alliances with third parties, such as our previously announced agreement with Tris Pharma Inc., for the development of products requiring specialized technologies.

Results of Operations

Summary

Our loss before income taxes for the quarter ended March 31, 2005 of \(\$ 1,007,000\) represents a decrease in income of \(\$ 2,566,000\) when compared to income before taxes of \(\$ 1,559,000\) for the same period last year. The decrease is the result of the increase in research and development expenses of approximately \(\$ 1,578,000\) (62\% of the decrease), an increase in selling, general, and administrative expenses of approximately \(\$ 414,000\) (16\%) and a decrease in gross profit of approximately \(\$ 543,000\) (21\%). During the period ended March 31, 2005, our increase in research and development expenses was attributable to the commencement of the implementation of our business plan. The increase in selling, general and administrative expenses was to retain key management personnel that were not employed by us a year ago and the reduction in gross profit is primarily attributable to a decrease in net sales and a \(3.6 \%\) decrease in gross profit percentage. We will continue to incur increasing research and development expenses in the future and believe that these expenditures, combined with the hiring of additional personnel, are critical to the successful implementation of our business plan.

Net sales by product (in thousands of dollars):

1,693
\$ 29,890
27
12
6

As indicated in the tables above, our net revenues decreased. Significant components include:
o Net sales of Ibuprofen for the nine month period ended March 31, 2005 increased \(\$ 1,117,000\) or \(6.7 \%\) when compared to the nine month period ended March 31, 2004. However, during the quarter ended March 31, 2005 there was a \(4.1 \%\) decrease when compared to a year ago. Based upon an expanded customer base for Ibuprofen, we believe sales of Ibuprofen should increase during the balance of this fiscal year, however, there can be no assurance that this will occur.

Both Allopurinol and Atenolol are manufactured for one customer based on quantities ordered by the customer. Net sales for these two products during the three month period ended March 31, 2005 were slightly higher than the same three month period in the prior year. However, when examining the results for the nine months ended March 31st, we determined that orders of Allopurinol and Atenolol were above normal quantities during the nine month period ended March 31, 2004, resulting in a decrease of approximately \(\$ 2,363,000\) or more than one-third of the 2004 year to date results. As revenue attributable for these two products are from one customer, it is difficult to forecast, however, at present we believe future quarterly net sales through the end of the calendar year 2005, for Allopurinol and Atenolol should approximate the quarterly average recognized during the nine month period ended March 31, 2005, however, there can be no assurance that this will occur.

As compared to the three month period ended March 31, 2004, our net sales of Naproxen decreased \(\$ 1,419,000\). Net sales of Naproxen during the three month period ended March 31, 2004 included shipments of more than \(\$ 1,400,000\), to one customer, an amount nearly equal to the six month period ended December 31, 2003 of \(\$ 1,535,000\). This customer has placed minimal re-orders since that time. We believe we have identified new customers for Naproxen and therefore, believe that future net sales of Naproxen may begin to increase during our fiscal 2006 year. However than can be no assurance that this will occur.

Since we began shipping Hydrocodone-7.5 mg/Ibuprofen-200 mg, our generic version of Vicoprofen, in October, 2004, we have recognized revenue of \(\$ 1,242,000\). While it is still too early to accurately forecast future net sales for this product, wedo not believe future orders will be as high because the results for the year to date period included initial shipments, which tend to be greater than future replenishment orders. The results for the periods reported include additional revenue derived from our profit sharing arrangement for this product.

During the three and nine month periods ended March 31, 2005, with respect to our primary products, raw material prices have remained relatively constant when compared to prior year. While no assurance can be given, we believe that our raw material costs should remain relatively constant to current prices at least through June 30, 2005. The remaining components of our cost of sales, primarily direct labor and overhead have, as a percentage of net sales, increased during the three months ended March 31, 2005, primarily as a result of costs associated to training production staff for the second facility, which we anticipate will be operational sometime in 2005. Additionally, we witnessed increases in general overhead costs such as product liability and utilities. We believe these higher costs we likely continue for the near future.

As a result of the issues outlined above, our total gross profit percentage for the three months ended March 31, 2005 was \(21.3 \%\), a decrease of 3.6 percentage points compared to 24.9 for the three months ended March 31, 2004 . Our total gross profit percentage for the nine months ended March 31, 2005 was 23.8\%, an increase of 0.8 percentage points compared to \(23.0 \%\) for the nine months ended March 31, 2004. During the nine-month period ended March 31, 2005, we shipped approximately \(\$ 670,000\) of inventory that had not been previously capitalized. Without such sale our gross profit percentage for the nine months ended March 31, 2005 would have been \(21.5 \%\), a decrease of 1.5 percentage points compared to 23.0\% for the nine months ended March 31, 2004.

\section*{Research and Development Expenses}

As described above, as part of our business plan, during the three month period ended March 31, 2005, we took significant steps toward expanding our product line. During the three month period ended March 31, 2005, the Company had research and development expenses of \(\$ 1,659,000\) as compared to approximately \(\$ 81,000\) for the same period last year.

As previously announced, in February, 2005, we entered into two agreements with Tris Pharma, Inc. ("Tris"). One of the agreements is for the development and licensing of twenty-five liquid generic products. According to the terms of the agreement for the liquid products, Tris is to develop and deliver the properties, specifications and formulations ("Technical Packages") necessary to effectuate a technology transfer to us for the twenty-five generic liquid pharmaceutical products. We will then utilize this information to obtain all necessary approvals and manufacture and market the products. Further, this agreement provides us with a perpetual license of all technology and components of the Technical Packages necessary to produce the liquid products that are the subject of the agreement. It also allows us use of the technology for other products in exchange for an additional fee. In the event that Tris delivers twenty-five successful Technical Packages, of which there can be no assurance, we will pay Tris approximately \(\$ 3,000,000\). In addition, Tris is to receive a royalty of between \(10 \%\) and \(12 \%\) of net profits resulting from the sales of each product.

The other agreement is for development and licensing of seven solid generic pharmaceutical products, some of which require specialized technology. According to the terms of the agreement for the solid dosage products, we will collaborate with Tris on the development, manufacture and marketing of seven solid oral dosage generic products, some of which may require us to challenge the patents for the equivalent branded products. This agreement provides for payments of an aggregate of \(\$ 3,750,000\) to Tris, whether or not we obtain regulatory approval for any of the products. The agreement for solids also provides for an equal sharing of net profits for each product that is successfully sold and marketed, after the deduction and reimbursement of all litigation-related and certain

\title{
Edgar Filing: INTERPHARM HOLDINGS INC - Form 10-Q
}
other costs. Further, this agreement provides us with a perpetual royalty-free license to use all technology necessary for the solid products in the United States, its territories and possessions.

While we have selected the liquid and solid products we believe can be successfully developed, manufactured and marketed, there can be no assurance that the liquid products will be commercially successful, or that Interpharm and Tris will be able to successfully develop, manufacture and market any of the solid products.

In connection with the agreements described above, we have, as of March 31, 2005, paid \(\$ 1,000,000\) to Tris. In addition, during the three month period ended March 31, 2005, we have disbursed an aggregate of approximately \(\$ 659,000\) for labor, raw materials, bio-equivalency studies and tooling toward other projects.

If we are successful in our efforts we believe we could see sales from new products to our line during fiscal 2006, however, there can be no assurance that these products or our second facility will obtain timely FDA approval.

\section*{Selling, General and Administrative Expenses}

Selling, general and administrative expenses include salaries and related costs, commissions, travel, administrative facilities, communications costs and promotional expenses for our direct sales and marketing staff, administrative and executive salaries and related benefits, legal, accounting and other professional fees as well as general corporate overhead.

Selling, general and administrative expenses increased approximately \(\$ 414,000\) to approximately \(\$ 1,580,000\), or \(14.8 \%\) of net sales during the three months ended March 31,2005 , from approximately \(\$ 1,166,000\), or \(10.3 \%\) of net sales, during the same period in 2004. The significant components of this increase are: salaries, including payroll taxes and benefits (\$301,000); legal and accounting costs of \((\$ 98,000)\); and software licenses and fees \((\$ 34,000)\).

Selling, general and administrative expenses increased approximately \(\$ 833,000\) to approximately \(\$ 3,893,000\), or \(13.6 \%\) of net sales during the nine months ended March 31, 2005, from approximately \(\$ 3,060,000\), or \(10.2 \%\) of net sales, during the same period in the prior year. The significant components of this increase are: salaries, including payroll taxes and benefits (\$444,000); professional services; investor relations (\$143,000) and public relations (\$88,000); utilities (\$62,000); legal and accounting (\$54,000) and travel /auto/entertainment (\$50,000).

The increase in salaries, payroll taxes, benefits, professional fees and utilities are primarily attributable to our continuing overall corporate expansion. An integral part of our corporate development was to attract and retain key senior executives who have the capability to effectively manage and effectuate our current and long term business strategies. To that end, during the three month period ending March 31 , 2005 , we retained a new chief executive officer, and filled openings of the vice president of sales and marketing and vice president of intellectual property. As relates to our investor and public relations costs increasing, we engaged a public relations firm during the three month period ended March 31,2004 . This action resulted in increased costs during the three and nine month periods ended March 31, 2005 with little or no

\section*{Edgar Filing: INTERPHARM HOLDINGS INC - Form 10-Q}
costs incurred during the same period in the prior year. The increases in legal and accounting and professional fees witnessed during the three month period ended March 31, 2005 compared to the same period in the prior year are primarily attributable to added services which are consistent with our product line growth.

In an effort to reduce the expected material adverse impact to be incurred in future periods as a result of adopting SFAS 123R, the Company has chosen to accelerate the vesting provisions of \(1,192,000\) options, which represents the total unvested options granted after May 30, 2003 through December 31, 2004. An aggregate of \(1,000,000\) such options were granted to executives of the company. Since options granted on or prior to May 30, 2003 are not fully vested, the Company expects to record stock options expense commencing the first quarter of fiscal 2006.

\section*{Income Taxes}

The effective tax rate for the three and nine month periods ended March 31,2005 of approximately \(37.1 \%\) resulted in an income tax benefit of \(\$ 373,000\) and an income tax provision of approximately \(\$ 239,000\), respectively, compared to effective aggregate tax rates of \(35.9 \%\) and \(36 \%\) for the three and nine month periods ended March 31, 2004 , respectively, which resulted in provisions for income taxes of approximately \(\$ 575,000\) and \(1,249,000\), respectively. While we anticipate revenue to increase, we further believe that as a direct result of accelerating our aggressive product development program, we will likely incur accelerated increased research and development expenses which, in turn will cause us to delay utilization of the current portion of our deferred tax asset. As such, we have reclassified the balance of our current deferred tax asset to long term deferred tax asset.

\section*{Liquidity and Capital Resources}

We currently finance our operations and capital expenditures through bank borrowings and cash flows from operations. Net cash provided by operating activities for the nine month period ended March 31, 2005 was \(\$ 1,336,000\) as compared to \(\$ 456,000\) net cash used in operating activities for the same period in the prior year. Components of the net cash provided from operating activities for the nine month period ended March 31, 2005 include non-cash operating items of \(\$ 1,092,000\) plus net income of \(\$ 405,000\) and a decrease in accounts receivable of \(\$ 337,000\), a increase in accounts payable, accrued expenses and other liabilities of \(\$ 2,634,000\), offset by increases in inventories and prepaid expenses and other current assets of \(\$ 3,065,000\) and \(\$ 85,000\), respectively. It should be noted that during the three month period ended March 31, 2005, we disbursed approximately \(\$ 1,659,000\) for research and development. We belive this level of spending will continue to occur for the forseeable future.

Net cash provided by financing activities of \(\$ 5,120,000\) for the nine months ended March 31, 2005, was a result of drawing \(\$ 5,970,000\) from the available lines of credit offset by the pay down of a mortgage note of \(\$ 246,000\), payment of \(\$ 179,000\) in dividends and working capital lines of credit by \(\$ 425,000\). Net cash provided by financing activities a year ago was \(\$ 1,470,000\). Net cash in-flows for the nine months were used to finance operations as well as our expansion. A component of our current plan is the completion of renovations to
our second facility along with the installation of additional production, packaging and research and development. Additionally, we continue to add to our capacity at our current facility as well. As such, during the nine month period ended March 31, 2005, we disbursed \(\$ 5,844,000\) for new equipment, furniture and improvements. In addition, we have disbursed \(\$ 96,000\) for deposits toward additional assets. As further detailed in Note 10 to our condensed consolidated financial statements, based upon information presented by an independent investment banking firm, the Board of Directors authorized an investment of \(\$ 750,000\), plus \(\$ 22,500\) of related investment banking fees, into APR, LLC, ("APR"), a company primarily engaged in the development of complex bulk pharmaceutical products. In April 2005, we made an additional investment of \(\$ 250,000\). In the aggregate we used \(\$ 6,713,000\) in investing activities during the nine months ended March 31, 2005.

As discussed in previous filings, we obtained a \(\$ 21,000,000\) credit facility which consisted of:
o a \(\$ 7,400,000\) mortgage loan used for the purchase of the second facilty. As of March 31, 2005 the total amount remaining is \(\$ 7,153,333\). The interest rate, as at March 31, 2005 was 4.46\% through July 31, 2005, at which time it will be set according to the terms setforth below.
o An aggregate of \(\$ 13,600,000\) of advised credit lines primarily to acquire new equipment and for renovations of the Company's two locations and working capital. A portion of the funds accessed through these credit lines are eligible to convert to fully amortizing five year term loans. As of March 31, 2005, we have drawn down \(\$ 5,970,000\), all currently on an interest only basis. Each borrowing is a 90 day loan at LIBOR plus 150 basis points. Interest rates average \(4.34 \%\) and range from \(4.12 \%\) to \(4.46 \%\).
o At our option, interest will be calculated at (i) LIBOR plus 1.5\% for 3 to 36 month periods, or at (ii) the Bank's then fixed prime rate. In addition, we are required to comply with certain financial covenants. As of March 31, 2005, we were in compliance with all covenants. The Bank reviews the credit facility annually. The credit lines are terminable by the Bank at any time as to undrawn amounts. This credit facility is collateralized by substantially all assets of the Company.

During the nine month period ended March 31, 2005, working capital decreased \(\$ 6,925,000\) to \(\$ 4,785,000\) from \(\$ 11,710,000\) at June 30,2004 . Significant factors which contributed to this reduction are increases in:
o current portion of bank borrowings of approximately \(\$ 5,576,000\)
- accounts and accrued expenses payable of \(\$ 2,004,000\)
- inventory of \(\$ 3,065,000\)
plus decreases in:
o current portion of deferred tax assets of \(\$ 1,280,000\)

As discussed earlier, we entered into agreements with Tris Pharma, Inc for the development and delivery of thirty-two new Technical Packages. The combined costs of these two agreements will approximate \(\$ 6,750,000\) of which we have paid \(\$ 1,000,000\) as of March 31, 2005. The balance on one agreement of approximately \(\$ 2,750,000\) could be paid within three years. The second agreement has a balance of \(\$ 3,000,000\) and will be paid within two years.

Future cash flows could be aided by utilization of our available Federal net operating loss carryforwards ("NOLs"). At March 31, 2005, we had approximately \(\$ 11,075,000\) NOLs available to reduce future taxable income, subject to certain limitations. At current effective tax rates, these NOLs could result in savings of approximately \(\$ 3,600,000\) in future income tax payments (although there will be no corresponding benefit on income tax expenses). Further, utilization of these NOLs is limited to approximately \(\$ 2,690,000\) per year, plus any prior years' amount not utilized, if any.

We believe the financing arrangements described above along with the funds we generate from operations should allow us to continue our expansion plans and be sufficient for us to meet our operating requirements during the next twelve months. We are, nevertheless, seeking to significantly increase our credit lines with our banks and are likely to seek other financing arrangements to facilitate the timely implementation of our business plan. However, there can be no assurances that we will be able to raise the necessary additional funds, and if we are unable to raise such funds, we will be required to modify our business plan for new product developments.

Accounts Receivable

Our accounts receivable at March 31,2005 was \(\$ 6,512,000\) compared to \(\$ 6,850,000\) at June 30,2004 . This decrease is primarily attributable to net sales in the current quarter being less than that of the three month period ended June 30 , 2004. Our accounts receivable turnover ratio decreased 1.3 turns to 5.7 turns at March 31, 2005 from 7.0 turns at June 30 , 2004 . The quality of our accounts receivable is good, and as such we have encountered little or no bad debt exposure.

\section*{Inventory}

At March 31, 2005, our inventory was \(\$ 8,595,000\), an increase of \(\$ 3,065,000\) from \(\$ 5,530,000\) at June 30,2004 . Our inventory turnover ratio of 4.1 annualized turns at March 31, 2005 decreased when compared to June 30, 2004 - 6.2 average turns. The drop in turnover ratio to slightly over four turns, is primarily the result of a deliberate build-up of inventory in certain key products. As such, we believe the reduction in annual turns as at March 31, 2005, to be within acceptable limits of our current operating plan.

Accounts Payable

The accounts payable, accrued expenses and other liabilities increased by approximately \(\$ 2,634,000\) during the nine month ended March 31, 2005 as compared to June 30, 2004. As outlined above, this increase is primarily a result of a build up of inventory.

Cash and Cash Equivalents

Cash and cash equivalents decreased during the nine months ended March 31, 2005 by approximately \(\$ 257,000\) from \(\$ 2,885,000\) at June 30,2004 to \(\$ 2,628,000\) at March 31, 2005. Thus far this year we funded our business from bank borrowings and operations: bank borrowings - net \(\$ 5,298,000\); net cash provided by operations - \(\$ 1,336,000\). These were offset primarily through the use of cash to acquire new property and equipment and other additions of \(\$ 5,940,000\) and our investment in APR, LLC of \(\$ 772,500\).

\section*{Critical Accounting Policies}

Management's discussion and analysis of financial condition and results of operations discusses our financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires that Interpharm make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. On an on-going basis, Interpharm evaluates judgments and estimates made, including those related to revenue recognition, inventories, income taxes and contingencies including litigation. Interpharm bases its judgments and estimates on historical experience and on various other factors that it believes to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying value of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

We consider the following accounting policies to be most critical in understanding the more complex judgments that are involved in preparing our financial statements and the uncertainties that could impact results of operations, financial condition and cash flows.

\section*{Revenue Recognition}

Revenue from the sale of our products are recognized upon shipment of the product. Revenue is recorded net of provisions for rebates, charge-backs, discounts and returns, which are established at the time of sale. Estimates for rebates, charge-backs, and discounts are calculated based on actual experience and also cover chargebacks on sales to intermediary wholesale prime vendors for the supply of Ibuprofen to the Department of Veterans Affairs.

With respect to certain products, we purchase raw materials from suppliers, which is then used in the manufacturing of completed goods and sold back to the suppliers or by direct drop shipment to the supplier's customers. Some raw materials may used in the manufacturing of products for other customers. We also (i) have the general inventory risk by taking title to all of the raw material purchased, (ii) establish the selling price for the finished product and, (iii) significantly change the raw materials into the finished product under our specifications and formulas. These factors among others, qualify us as the principal under the indicators set forth in EITF 99-19, Reporting Revenue Gross as a Principal vs. Net as an Agent. If the terms and substance of the arrangement change, such that we no longer qualify to report these transactions on a gross reporting basis, our net income and cash flows would not be affected. However, our sales and cost of sales would both be reduced by a similar amount.

Inventory

Our inventories are valued at the lower of cost or market determined on a first-in, first -out basis, and includes the cost of raw materials, labor and manufacturing overhead. We continually evaluate the carrying value of our inventories and when factors such as expiration dates and spoilage indicate that impairment has occurred, either a reserve is established against the inventories' carrying value or the inventories are disposed of and completely written off in the period incurred.

Issues And Uncertainties
Risk of Product Liability Claims
The testing, manufacturing and marketing of pharmaceutical products subject us to the risk of product liability claims. We believe that we maintain an adequate
amount of product liability insurance, but no assurance can be given that such insurance will cover all existing and future claims or that we will be able to maintain existing coverage or obtain additional coverage at reasonable rates.

\section*{ITEM 3 - QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK}

Our principal financial instrument currently is a \(\$ 21.0\) million credit facility. In June 2004 we took a \(\$ 7,400,000\) mortgage note payable for the purchase of our second facilty,located in Brookhaven, New York, of which approximately \(\$ 7,153,333\) was outstanding at March 31, 2005. Additionally, as of March 31, 2005, we borrowed an additional \(\$ 5,970,000\) through the advised lines of credit. Any obligations created under this credit facility incur interest calculated at our option at (i) LIBOR plus \(1.5 \%\) for periods ranging in length from 3 to 36 months, or (ii) at the Bank's then fixed prime rate. As of March 31, 2005 , the interest rates on the mortgage note payable was \(4.66 \%\). The average interest rate for the \(\$ 5,970,000\) borrowings was \(4.34 \%\). If our combined borrowings remained at the same amount as of March 31, 2005, for the remainder of our fiscal year, for every one percent change, upward or downward in our borrowing rate, we would incur or save approximately \(\$ 33,000\) per quarter. We anticipate that during the next twelve months we will likely draw down additional funds from the existing credit facility primarily to purchase equipment for both facilities, as well as implement our research and development plan. This likely increase in our borrowings will increase our exposure to interest rate market risk. We are required to comply with certain financial covenants. The Bank reviews the credit facility annually. The credit lines are terminable by the Bank at any time as to undrawn amounts.

We do not use any derivative financial instruments to hedge our exposure to adverse fluctuations in interest rates, fluctuations in commodity prices or other market risks, nor do we invest in speculative financial instruments.

ITEM 4 - CONTROLS AND PROCEDURES

Evaluation of Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management to allow timely decisions regarding required disclosure. Management necessarily applied its judgment in assessing the costs and benefits of such controls and procedures, which, by their nature, can provide only reasonable assurance regarding management's control objectives.

At the conclusion of the three and nine month period ended March 31, 2005, we carried out an evaluation, under the supervision and with the participation of our management, including our Chairman and Chief Executive Officer, Chief Financial Officer and General Counsel, of the effectiveness of the design and operation of our disclosure controls and procedures. Based upon that evaluation, the Chairman and Chief Executive Officer, Chief Financial Officer and General Counsel concluded that our disclosure controls and procedures were effective in alerting them in a timely manner to information relating to the Company required to be disclosed in this report but adopted additional disclosure controls and procedures to improve the quality and timeliness of disclosure during our
transition from a private to a public company.

On September 20, 2004, our independent registered accounting firm Marcum \& Kliegman, LLP ("MK"), informed us and our Audit Committee of the Board of Directors that in connection with their audit of our financial results for the fiscal year ended June 30, 2004, MK had discovered a condition which they deemed to be a material weakness in our internal controls (as defined by standards established by the Public Company Accounting Oversight Board). MK noted the lack of adequate internal control / review procedures required to properly and timely record customer chargebacks. Management has informed MK and the Audit Committee that it has modified its internal control / review procedures in such a manner that it believes will prevent reoccurrences of this deficiency. The impact of the above condition was isolated to the fiscal quarter ended June 30, 2004, and did not affect the results of any prior period nor the three and nine month periods ended March 31, 2005.

PART II - OTHER INFORMATION

\section*{FORWARD-LOOKING STATEMENTS AND ASSOCIATED RISK}

Certain statements in this Report, and the documents incorporated by reference herein, constitute "forward-looking statements" within the meaning of section 27A of the Securities Act of 1933, Section \(21 E\) of the Securities Exchange Act of 1934 and the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause deviations in actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied. Such factors include but are not limited to: the difficulty in predicting the timing and outcome of legal proceedings, the difficulty of predicting the timing of U.S. Food and Drug Administration ("FDA") approvals; court and FDA decisions on exclusivity periods; competitor's ability to extend exclusivity periods past initial patent terms; market and customer acceptance and demand for our pharmaceutical products; our ability to market our products; the successful integration of acquired businesses and products into our operations; the use of estimates in the preparation of our financial statements; the impact of competitive products and pricing; the ability to develop and launch new products on a timely basis; the regulatory environment; fluctuations in operating results, including spending for research and development and sales and marketing activities; and, other risks detailed from time-to-time in our filings with the Securities and Exchange Commission.

The words "believe, expect, anticipate, intend and plan" and similar expressions identify forward-looking statements. These statements are subject to risks and uncertainties that cannot be predicted or quantified and, consequently, actual results may differ materially from those expressed or implied by such forward-looking statements. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date the statement was made.
